Annually the Corporation prepares its Basic Insurance general rate application and files it with the Public Utilities Board in the month of June for implementation the following fiscal year commencing on March 1. The general rate application includes the prospective rate requirements based on historical and forecasted financial and other information as well as the application of actuarial, accounting and statistical principles and practices.

The Corporation is required to pay a portion of the Public Utilities Board's operating costs relating to the Corporation's share of the overall Public Utilities Board budget. In addition, the Public Utilities Board can also order the Corporation to reimburse other proceeding participants for specified costs such as their time, legal and expert witness fees.

27. Subsequent Events

On March 30, 2018, the Corporation sold and transferred possession of surplus property at 1103 Pacific Avenue in Winnipeg. The property sold for $1.9 million, resulting in a gain of $1.3 million. Decommission of the property resulted from ongoing efforts by the Corporation to reduce its physical footprint by consolidating services to better meet customer service expectations.

28. Contingent Liabilities

The Corporation is subject to litigation arising in the normal course of conducting its insurance business. The Corporation is of the opinion that this litigation will not have a significant effect on the financial position, financial performance or cash flows of the Corporation.

Manitoba Public Insurance

Management Discussion and Analysis

Management's discussion and analysis provides a review of the financial results and future outlook of Manitoba Public Insurance. It should be read in conjunction with the unaudited condensed interim financial statements and supporting notes for the first quarter ended May 31, 2018 included herein and the annual audited financial statements and supporting notes and the Corporation's 2017 Annual Report available at mpi.mb.ca. Certain information in this report may consist of forward-looking statements. These statements are based on various techniques and assumptions including predictions about future events which may not occur. Actual results could deviate significantly from the forward-looking statements.

Results of Operations

Manitoba Public Insurance reported net income of $33.7 million for the three months ended May 31, 2018 compared to net income of $38.9 million for the same period last year. This includes net income of $14.9 million (2017 – net income of $15.4 million) from the Basic insurance line of business. Corporate net income decreased from the previous year by $5.2 million due to:

i) an increase in earned revenues of $23.2 million, offset by a increase in total expenses of $3.7 million;
ii) a decrease in claims cost of $30.6 million;
iii) a decrease in investment income of $57.0 million mainly due to the decrease of unrealized gains on Fair Value Through Profit or Loss bonds of $47.3 million and decrease gains on the sale of equities and other investments of $9.7 million.

Current Year and Last Year

Total earned revenues for the three months ended May increased from the previous year by $23.2 million. This increase is primarily attributed to motor vehicle earned revenues which increased by $19.2 million or 6.8%. The increase in earned revenues is primarily due to the growth in the number of vehicles on the road in Manitoba, and the value of these vehicles and movement of drivers down the Drivers Safety Rating scale resulted in higher premiums.

Claims costs for the three months ended May 31, 2018 decreased by $30.6 million or 11.6% compared to last year due primarily to a decrease of $26.1 million or 22.9% in bodily injury claims incurred and a decrease of $4.3 million or 3.1% in physical damage claims incurred. The $26.1 million increase in bodily injury claims was impacted by a decrease of $51.3 million due to the interest rate adjustment on unpaid claims. Claims expense increased by $0.2 million or 0.5% from the previous year, offset by a decrease in road safety and loss prevention expenses of $0.4 million or $15.5%.

Total expenses increased by $3.7 million compared to last year due primarily to an increase of $1.2 million or 5.8% in commission expenses, an increase of $700 thousand or 7.4% in premium taxes and an increase of $1.8 million or 5.6% in operating expenses.

Retained Earnings

Net income of $33.7 million for the first three months ending May 31, 2018 increased retained earnings from $352.6 million to $386.3 million (May 31, 2017 – $300.4 million). Retained earnings are comprised of $185.9 million for Basic insurance (May 31, 2017 - $114.7 million) and $200.4 million for non-Basic lines (May 31, 2017 - $185.7 million).

Total Equity

Total equity of $442.0 million (May 31, 2017 – $379.5 million) are comprised of $386.3 million retained earnings and $55.7 million accumulated other comprehensive income (May 31, 2017 - $79.1 million).

The Corporation's Chief Actuary concluded that a minimum total equity level of $201.0 million would be required for Basic to achieve satisfactory future financial condition. At the end of the first quarter, Basic insurance reported total equity of $234.0 million (May 31, 2017 – $183.4 million). Extension's current capital target level for total equity is $64.0 million based on the Corporation's most recent Dynamic Capital Adequacy Test (DCAT) analysis. At the end of the first quarter, Extension insurance reported total equity of $116.9 million (May 31, 2017 - $111.3 million). Special Risk Extension's current capital target level for total equity is $65.0 million based on the Corporation's most recent DCAT analysis. At the end of the first quarter, Special Risk Extension insurance reported total equity of $91.7 million (May 31, 2017 - $84.9 million).

Outlook

The Corporation remains committed to achieving its Corporate goals. Actual results will be monitored, and corrective actions taken when necessary, to ensure that expected outcomes are realized.

As approved by the Public Utilities Board (PUB), effective March 1, 2018, there was a 2.6 per cent overall rate increase to average Basic insurance rates for the 2018/19 insurance year and the equivalent of a 1.8 per cent increase for demerit drivers.

For the 2019/20 insurance year, Manitoba Public Insurance is requesting a 2.2 per cent overall rate increase in its general rate application. All insurance companies hold funds to pay claims, as well as to maintain a buffer of capital to endure unexpected adverse circumstances. Manitoba Public Insurance's 'buffer' is known as the Rate Stabilization Reserve and to remain effective it must grow with the business. For the 2019/20 insurance year, the Corporation is proposing a Capital Maintenance Provision which accounts for 2.1 per cent of the overall 2.2 per cent increase.

Overall:

- 547,166 vehicles (excluding trailers and off-road vehicles) will receive increases in their Basic premium next year, with 39.5 per cent of these vehicles increasing by less than $50 per year.
- Approximately 37.7 per cent of all vehicle owners (excluding trailers and off-road vehicles) will see no change or a decrease in premium over 2018/19 rates.
- The average vehicle premium for Private Passenger Vehicle Class will be $1,138 if the 2019 rate application is approved
- Motorcycle rates (including moped and motor scooters) will increase 3.1 per cent
- If approved, rate changes will take effect March 1, 2019

Manitoba Public Insurance is committed to keeping rates stable over the long term. Manitoba Public Insurance continues to have one of the lowest rates of year-over-year premium increases of all Canadian provinces.

Notes to Financial Statements

1) Status of the Corporation

The Manitoba Public Insurance Corporation (the "Corporation") was incorporated as a Crown Corporation under The Automobile Insurance Act in 1970. In 1974, The Automobile Insurance Act was revised and became The Manitoba Public Insurance Corporation Act (Chapter A180 of the continuing consolidation of the Statutes of Manitoba). In 1988, the Act was re-enacted in both official languages as Chapter P215 of the Statutes of Manitoba. The address of the Corporation's registered office is 234 Donald Street, Winnipeg, Manitoba.

Under the provisions of its Act and regulations, the Corporation operates an automobile insurance division and a discontinued general insurance division. The lines of business for the automobile insurance division provide for basic universal compulsory automobile insurance, extension and special risk coverages. For financial accounting purposes, the lines of business for the automobile insurance division and the discontinued general insurance division are regarded as separate operations and their revenues and expenses are allocated on a basis described in the summary of significant accounting policies. For financial reporting purposes, due to the immateriality of the financial results of the discontinued general insurance operations, the operations are reported as part of the Special Risk Extension line of business. The basic universal compulsory automobile insurance line of business rates are approved by the Public Utilities Board of Manitoba.

Under The Drivers and Vehicles Act (DVA), the Corporation is responsible for DVA operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services.

2) Basis of Reporting

Statement of Compliance

The financial statements of the Corporation are in such form as prescribed by Section 43(1) of The Manitoba Public Insurance Corporation Act and are presented in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Basis of Presentation

The Corporation presents its Statement of Financial Position broadly in order of liquidity.

These statements are presented in thousands of Canadian dollars which is the Corporation's functional and presentational currency except as otherwise specified.

Seasonality

The automobile insurance business, which reflects the primary business of the Corporation, is seasonal in nature. While net premiums earned are generally stable from quarter to quarter, underwriting income is typically highest in the first and second quarter of each year and lowest in the fourth quarter of each year. This is driven mainly by weather conditions which may vary significantly between quarters.

Basis of Measurement

The Corporation prepares its financial statements as a going concern, using the historical cost basis, except for financial instruments and insurance contract liabilities and reinsurers' share of unpaid claims. Measurement of the financial instruments is detailed in Note 3 of the 2017 Annual Report. Insurance contract liabilities and reinsurers' share of unpaid claims are measured on a discounted basis in accordance with accepted actuarial practice (which in the absence of an active market provides a reasonable proxy for fair value).

Estimates and Judgments

The preparation of financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

3) Summary of Significant Accounting Policies

Refer to the 2017/18 Annual Audited Financial Statements for a summary outlining those accounting policies followed by the Corporation that have a significant effect on the condensed interim financial statements.

4) Provision for Unpaid Claims

The provision for unpaid claims, including adjustment expenses, represents an estimate for the full amount of all costs and the projected final settlement of claims incurred.

The provision for unpaid claims, including adjustment expenses, is subject to variability. This variability is related to future events that arise from the date the loss was reported to the ultimate settlement of the claims. Accordingly, short-tail claims such as physical damage claims tend to be more reasonably predictable than long-tail claims such as Personal Injury Protection Plan (PIPP) and public liability claims. Factors such as the receipt of additional claims information during the claims settlement process, changes in severity and frequencies of claims from historical trends, and effects of inflationary trends contribute to this variability.

The determination of the provision for unpaid claims, including adjustment expenses, relies on judgment, analysis of historical claim trends, investment rates of return and expectation on the future development of claims. The process of establishing this provision necessarily involves risks which could cause the actual results to deviate, perhaps substantially, from the best determinable estimate.

5) Cash and Investments

Cash consists of cash net of cheques issued in excess of amounts on deposit.

Cash equivalent investments have a total principal amount of $133.4 million (2017 – $74.1 million) comprised of provincial short-term deposits with effective interest rates of 1.10% (2017 – 0.55%), with interest receivable at varying dates.

The Corporation has an unsecured operating line of credit with its principal banker in the amount of $5.0 million (2017 - $5.0 million). The unsecured operating line of credit remained unutilized at May 31, 2018 (2017 – nil).

Subtotal – Other Investments	399	1,094	1,493
Total AFS Equity and Other Investments	320,539	121,000	441,539

AFS financial assets where the investment's underlying cost is greater than the fair value, the loss has not been recognized in net income either because:

- there is not objective evidence of impairment, or
- the loss is not considered to be significant or prolonged.

Fair Value Measurement

Financial assets that are measured at fair value are classified by their level within the fair value hierarchy. The fair value hierarchy consists of three levels that are defined on the basis of the type of inputs used to measure fair value. The classification cannot be higher than the lowest level of input that is significant to the measurement:

Level 1 – Fair value is determined based on unadjusted quoted prices of identical assets in active markets. Inputs include prices from exchanges where equity and debt securities are actively traded.

Level 2 – Level 2 valuations utilize inputs other than quoted market prices included in Level 1 that are observable, directly or indirectly, for the asset. These inputs include quoted prices for similar assets in active markets and observable inputs other than quoted prices, such as interest rates and yield curves. The fair values for some Level 2 securities were obtained from a pricing service. Pricing service inputs may include benchmark yields, reported trades, broker/dealer quotes and bid/ask spreads.

Level 3 – Fair value measurements using significant inputs that are not based on observable market data are Level 3. This mainly consists of derivatives and private equity investments. In these cases prices may be determined by internal pricing models utilizing all available financial information, including direct comparison

and industry sector data. For some investments, valuations are obtained annually. For periods between valuations, management assesses the validity of the valuation for current reporting purposes.

The following table presents financial instruments measured at fair value in the Statement of Financial Position, classified by level within the fair value hierarchy.

As at May 31, 2018 (in thousands of Canadian dollars)	**Level 1**	**Level 2**	**Level 3**
FVTPL financial assets			
Bonds	**-**	**1,259,754**	**14,362**

Manitoba Public Insurance is a provincial Crown corporation that has provided automobile insurance coverage since 1971. We assumed a broader spectrum of services in 2004, when we merged driver and vehicle licensing into our operations. The Corporation is governed by *The Manitoba Public Insurance Corporation Act* and *The Drivers and Vehicles Act*.

This annual report is available in French at mpi.mb.ca.

Le rapport annuel est disponible en français sur le site Web mpi.mb.ca.

Letters of Transmittal

Manitoba Public Insurance

May 31, 2018

The Honourable Cliff Cullen
Minister of Crown Services
Room 314, Legislative Building
Winnipeg, MB R3C 0V8

Dear Minister,

In accordance with Section 43(1) of *The Manitoba Public Insurance Corporation Act*, I am pleased to submit the Annual Report of the Manitoba Public Insurance Corporation for the fiscal year ended February 28, 2018.

Respectfully submitted,

Brent VanKoughnet
CHAIRPERSON OF THE BOARD

Manitoba

May 31, 2018

Her Honour The Honourable
Janice C. Filmon, C.M., O.M.
Lieutenant Governor of Manitoba
Room 235, Legislative Building
Winnipeg, MB R3C 0V8

May it please your Honour,

I am pleased to present the Annual Report for the Manitoba Public Insurance Corporation for the fiscal year ended February 28, 2018.

Respectfully submitted,

Cliff Cullen
MINISTER OF CROWN SERVICES

Message from the Chairperson

During the 2017/18 fiscal year, we placed a strong, clear focus on our core business, and we developed key priorities to keep us on track well into the future.

Manitoba Public Insurance is committed to delivering value to Manitobans through affordable rates, exceptional coverage and service, and safer roads.

This commitment is rooted in the promises to provide ratepayers with adequate compensation for loss, and to continuously evaluate policies and procedures, streamline operations, reduce operating costs, and implement loss-prevention programs to control claims frequency and severity.

As a public auto insurer, the Corporation is entrusted by Manitobans with the exclusive authority to provide Basic automobile insurance coverage. The Board of Directors firmly believes that, in turn, the Board has an obligation to ensure Manitoba Public Insurance is adhering to best practices in insurance and demonstrating disciplined management that will provide exceptional value to Manitobans.

During the 2017/18 fiscal year, we placed a strong, clear focus on our core business, and we developed key priorities to keep us on track well into the future.

The Board is committed to keeping Basic rates as stable, predictable and affordable as possible. The Basic program must be operated on a self-sustaining basis; with a capital reserve that is sufficient to absorb unforeseen variations in revenues, claims costs and investment income; and with rates that are actuarially sound. To ensure we accomplish this, the Corporation will continue to demonstrate fiscal prudence and sound financial management with a focus on driving cost containment, streamlining operations and eliminating unnecessary operational expenses. Key performance measures have been re-established and will be benchmarked against best disciplines of other public and private insurance organizations to ensure the continued pursuit of operational effectiveness, financial prudence and optimum investment-management practices.

Over the next year, a thorough product and service review will be conducted to inform and guide the continued adaptation of Manitoba Public Insurance to meet the evolving needs of Manitobans, including those in rural, northern and remote communities. We will investigate online customer self-service options to address and enhance customer service and convenience, while ensuring capital projects and technological initiatives are directly linked to supporting and optimizing core business functions and meeting the priorities of Manitobans.

Vehicle manufacture and repair is undergoing a dramatic shift due to increased use of lightweight complex materials and advanced electronic systems. There are significant cost and repair implications that will need to be managed thoughtfully. In response, we enhanced our claims process, including the launch of our increasingly popular Direct Repair program. Manitoba Public Insurance will continue to collaborate with the repair industry to ensure vehicles damaged in collisions are properly repaired, and we will continue to be proactive in preparing for structural change in the auto industry, including the anticipated introduction of fully autonomous vehicles.

The Board also recognizes the importance the Corporation plays in the broader provincial economy. We will strive to be good corporate citizens in each of the communities we operate in. We will commit to be fair and ethical partners with the many different strategic partners and stakeholders we depend on, and who depend on us to deliver service to Manitobans. We will continue to aspire to create a rewarding and high performance workplace where we hire and train employees with a commitment to excellent service. We also commit to financial management of the Corporation in a manner that will not impair the consolidated financial statements of the Province of Manitoba.

In February, Manitoba Public Insurance welcomed our new President and Chief Executive Officer, Benjamin Graham, who joins us following the retirement of Dan Guimond. Benjamin will be leading our executive, management and employees to focus on key priorities and objectives and to ensure public automobile insurance continues to provide exceptional value to Manitobans.

Lastly, my sincere thanks to my colleagues on the Board for their dedication and professional guidance, and to Manitoba Public Insurance executive, management and staff for their commitment to a journey of renewal, continuous improvement and the pursuit of exceptional value.

BENJAMIN GRAHAM
Ex-Officio

Message from the President and Chief Executive Officer

We are constantly refining and adapting our products, services and initiatives to meet the diverse needs and service expectations of our customers—no matter where they live in Manitoba.

Our role at Manitoba Public Insurance can be summed up in three phrases: Exceptional coverage. Affordable rates. Safer roads.

To this end, Manitoba Public Insurance is committed to providing guaranteed access to comprehensive automobile insurance coverage at rates that are stable, predictable and affordable. At the same time, we are constantly refining and adapting our products, services and initiatives to meet the diverse needs and service expectations of our customers—no matter where they live in Manitoba.

I joined Manitoba Public Insurance as its President and Chief Executive Officer as we concluded the 2017/18 fiscal year. I enter a company that is demonstrably successful in many areas of our business, but I have been tasked to apply international experience to further improve Manitoba Public Insurance. Simply put, we will refocus on being a fiscally strong insurance company that prides itself on informed underwriting and diligent claims management supported through a prudent investment strategy.

First and foremost, our public auto insurance model provides among the most affordable rates and most comprehensive coverage in Canada. In Winnipeg, insuring a 2016 Ford F150 XLT SuperCrew would cost $1,260, as compared to $4,655 in Calgary and $5,164 in Toronto, for a 40-year-old couple and their 16-year-old son, all with clean driving records.

Our partnership in the *Manitoba Road Safety Plan 2017-2020: Road to Zero* will reduce risk and create safer roads. In the 2017 calendar year, Manitoba saw the second lowest number of roadway fatalities in 35 years. However, the fact that there were still 73 deaths in vehicle collisions highlights just how much further we must go to improve our traffic safety culture.

Customer satisfaction continues to be strong—90 per cent are satisfied with the service they receive. Nevertheless, we must continue to strive for improvement and ensure that we continue to satisfy the evolving needs of customers. To this end, we will be emphasizing enhancements to customer service, including the creation of additional online self-service options, and the creation of a new product road map. This will inform a new customer service framework in 2019 that will evolve our customer-centric focus.

We will be continuing to address the speed of change in the design and manufacture of automobiles, to work collaboratively with the Public Utilities Board, to build on positive relationships with our business partners, and to streamline operations and contain costs to position ourselves for long-term financial stability.

At a high level, this will all be achieved through a framework of three key overriding objectives: product and service leadership; operational excellence; and high functioning relationships with customers, stakeholders and partners at all levels. We recognize that as we prepare for the future, we must continue to provide clear value—low cost, outstanding service, comprehensive coverage and universal access—to all Manitobans.

I would like to extend my sincere appreciation to the Board of Directors for the opportunity to guide the Corporation through this period of focused evolution. I look forward to the Board's guidance and collaboration as we continue the Corporation's long tradition of adding value to Manitoba. I am proud to be working with my executive team, with all of our employees, our business partners, and our industry stakeholders on our mission to provide value and exceptional insurance to Manitobans.

Report on Performance

During the 2017/18 insurance year, Manitoba Public Insurance maintained a focus on our core business and our corporate strategic objectives.

Key successes throughout the year included working collaboratively with the collision repair industry to facilitate proper and accountable repair, creating operational efficiencies to both contain costs and better serve customers, and undertaking loss prevention initiatives to positively influence driving behaviour with a view to reducing collisions, claims and claim costs.

At the outset of the year, we launched our Direct Repair program. Direct Repair enables customers with eligible claims to proceed directly to a participating repair shop for a vehicle damage estimate, after reporting the claim to Manitoba Public Insurance, instead of visiting a Service or Claim Centre. This program creates a streamlined process that provides increased convenience and flexibility for customers, and greater recognition, visibility and workflow management for participating repair shops.

As part of a long-term strategy to keep pace with rapid changes in the design, manufacture and repairability of motor vehicles, Manitoba Public Insurance opened a state-of-the-art centre for automotive research and training at our J.W. Zacharias Physical Damage Research Centre. The centre enables technicians to work closely with the repair industry to provide training on new and emerging repair techniques and equipment. This has already resulted in improved access to training and cost savings for the repair industry and helps ensure Manitoba vehicles are repaired to manufacturer specifications, protecting the safety of all road users.

The Corporation was also proud to host the 2017 Research Council for Automotive Repair (RCAR) conference. This international body exchanges research strategies and findings into repairability and safety, with the overall goal of reducing the human and economic cost of motor vehicle losses.

Physical damage claim efficiencies were also found through the introduction of paintless dent repair, an industry-standard method of removing dents from vehicle body panels. This cost-effective repair method is particularly suited to damage from hail claims. In addition, a change in the initial eradication and disinfection of rodent claims is reducing claims costs, while increasing options and simplifying the claim process for customers.

New Vehicle for Hire insurance coverage was developed, providing a made-in-Manitoba approach for vehicle owners offering ride-share services in accordance with municipal bylaws.

Throughout the year, several successful loss prevention initiatives were undertaken to promote road safety for many key issues, including distracted driving, speeding and impaired driving. This included the Corporation's first broad awareness and education campaign about the dangers of drug-impaired driving in partnership with MADD Canada.

A virtual reality experience, DRIVR-X, was created to tackle critical road safety issues affecting young drivers. DRIVR-X allows participants to explore a realistic, three-dimensional environment with multiple storylines requiring them to make important, life-changing decisions.

Loss prevention efforts culminated in the creation of *Manitoba Road Safety Plan 2017-2020: Road to Zero*. This is the first plan of its kind in our province—it provides the vision for Manitoba to have the safest roads in Canada and commits to one day achieving zero traffic fatalities on our roadways.

In the coming year, we look forward to continuing to build upon the strong foundations that were established in 2017/18 as we implement our strategic objectives going forward.

Better coverage.
Lower rates.
Safer roads.

Strategic Direction

At Manitoba Public Insurance, we are constantly evolving to meet the diverse needs and service expectations of our customers while providing guaranteed access to automobile insurance at cost.

We provide value to Manitobans through low and stable rates, ease-of-access to benefits, superior service, and the convenience of one-stop shopping for licensing, insurance and registration. The Corporation is committed to providing peace of mind for Manitobans through exceptional injury and damage coverage. Our road safety partnerships and initiatives will reduce risk on the road, save lives and reduce suffering for Manitoba families.

All of this speaks to the value that Manitoba Public Insurance provides as we look to the future—value that is achieved through a framework of three key objectives:

1) Product and service leadership.

2) Operational excellence and outstanding customer service.

3) High-functioning relationships with our key stakeholders and partners.

In the upcoming year, our internal evolution will focus on building a performance culture, and on assessing customer service and product offerings. We will develop a product road map to review and examine opportunities, and we will create a new customer experience framework to evolve our customer-centric focus. We recognize the demand for greater online service for customers, partners and staff, and we will work towards robust self-service options. In addition, a review of legacy computer systems will be undertaken as the first phase of a multi-year modernization project.

Our fast-changing external environment includes strengthening key relationships with the public, customers, government, the Public Utilities Board, and partners in road safety and service delivery. In the upcoming year, we will be emphasizing the development of new agreements with key partners and providers to continue to provide service and claims excellence for Manitobans.

The design and manufacture of vehicles is undergoing a dramatic shift, due to greater use of lightweight, complex materials, and increased adoption of electronic collision-avoidance and vehicle-control systems. The rapid pace of change will continue to evolve, and we will continue to work with our partners in the collision repair industry to ensure vehicles are repaired properly and cost effectively, in the best interest of all Manitobans.

The Corporation is committed to evolving the traffic safety culture of Manitoba, and fully supports the goals of the *Manitoba Road Safety Plan 2017-2020: Road to Zero*. We are dedicated to renewing our High School Driver Education program, which provides approximately 12,000 new teen drivers with access to professional training each year. Overall, safety and awareness priorities will remain focused on key

contributing factors to collisions, such as distracted driving, impaired driving and speed. We also recognize priorities around cycling, pedestrian and motorcycle safety, and the need to prepare for the legalization of recreational use of cannabis expected in 2018. We remain committed to working with road safety partners to influence driving behaviour with a view to reducing collisions, claims and their associated costs, and making our roads the safest in Canada.

Overall, through product and service leadership, operational excellence, and high-functioning relationships, our strategic direction will position us to continue to provide exceptional value for Manitobans, based on affordable insurance, comprehensive protection, outstanding service and universal access to coverage.

Exceptional coverage and service, affordable rates and safer roads through public auto insurance.

Management Discussion & Analysis

Corporate Profile

Corporate Mission

Exceptional coverage and service, affordable rates and safer roads through public auto insurance.

Corporate Vision

Manitoba Public Insurance will be a leader in automobile insurance and driver services, providing Manitobans with guaranteed access to superior products, coverage and value. We will anticipate and meet the evolving needs of Manitobans. We are dedicated to offering province-wide accessibility and, in co-operation with our business partners, will perform at the highest attainable levels of economy, efficiency and effectiveness

Manitoba Public Insurance will make our roadways and communities safer by enforcing standards fordrivers and vehicles, by raising awareness of the inherent risk of driving and by investing in lasting solutions. We will develop education and awareness programs andcontrols that help and encourage Manitobans to acquire the knowledge and skills to avoid collisions.

Our people will deliver knowledgeable service with care, efficiency and justifiable pride, and will be appropriately recognized for their contributions in helping the Corporation achieve its goals. Manitoba Public Insurance will be one of the best and most inclusive places in the province to work and pursue a career, where people will deliver knowledgeable and caring services in new and innovative ways.

We will ensure Manitobans understand and support the unique contribution Manitoba Public Insurance makes to the province of Manitoba.

This report provides a review of financial performance and operational outcomes for the 2017/18 fiscal year. For this reason, 2017/18 goals, strategies and performance measures have been retained for retrospective reporting purposes. Moving forward, we will report on new financial and operational performance measures consistent with strategic direction provided by the Corporation's Board of Directors, and as referenced in Manitoba Public Insurance's Annual Business Plan for the 2018/19 fiscal year.

Corporate Values

As a public auto insurer, we hold ourselves accountable to all Manitobans to deliver value by fostering a culture of excellence. We achieve this through our four core values:

Striving for Excellence
We provide exceptional coverage and service. We adapt to meet evolving customer and industry needs, focusing on continuous improvement.

Providing Value to Manitobans
We maintain affordable rates and ensure accessible coverage. As a public auto insurer, fiscal responsibility is at the forefront of everything we do.

Doing What's Right
We act with integrity and accountability. We strive to be open and transparent.

Investing in People
We empower our employees to provide excellent service. We work together with business, community and road safety partners to fulfil our mission.

Corporate Governance

Responsibilities of the Board

Manitoba Public Insurance was created by an act of the Legislature to achieve the Corporation's founding principles. The Corporation's Board of Directors, appointed by the Government of Manitoba, ensures that corporate policies are consistent with its mandate and the laws of the Province of Manitoba. The Board is also responsible for policy development and approval, and provides oversight and monitoring. Currently, the Board has eight members. The president and chief executive officer is an ex-officio, non-voting member of the Board and the Board Committees. Further duties, obligations and responsibilities of the Board of Directors are prescribed by *The Crown Corporations Governance and Accountability Act*.

The Corporation is responsible for preparing an annual business plan which must be approved by the Board and submitted to the Minister of Crown Services.

Under the provisions of T*he Manitoba Public Insurance Corporation Act*, the Board chairperson is required to provide the Minister of Crown Services with an annual report, which is subsequently reviewed by the Standing Committee of the Legislature. With the approval of the Lieutenant Governor in Council, the Minister of Crown Services has the legislative authority to issue directives related to matters of policy, accounting, advertising standards and organizational reviews. The Public Utilities Board approves changes to Basic Autopac insurance rates.

Whistleblower Report

The Corporation established an anonymous and confidential Whistleblower Hotline system for the receipt, retention and treatment of complaints about activities that are potentially unlawful or injurious to the public interest, including suspected fraud or financial mismanagement by employees. It is fully compliant with *The Public Interest Disclosure (Whistleblower Protection) Act*.

As these matters are of paramount concern to the Board of Directors and senior management, the Corporation has retained the services of an independent third party to administer the Whistleblower Hotline, receive complaints and provide reports directly to the chair of the Audit Committee, the corporate General Counsel and the manager of Internal Audit—recognizing that employees will be more likely to submit reports if they have a direct channel open to them with which they are comfortable.

Furthermore, it is the policy of the Corporation to ensure there are no reprisals against any employee for accessing the Whistleblower Hotline and making a report, should the identity of the reporting employee become known despite stringent provisions for confidentiality. The purpose of the policy is to discipline those responsible, not to discipline those who report such abuses.

During the fiscal period March 1, 2017, to February 28, 2018, the Whistleblower Hotline received no inquiries.

Fair Practices Office

Our public auto insurance system strives for continuous improvement in all aspects of its operation, particularly those aimed at ensuring fair and appropriate service to customers. With that goal in mind, the Fair Practices Office (FPO) was created in 1999. The FPO is a means for customers and other interested parties to bring issues of a systemic nature to the attention of the Corporation.

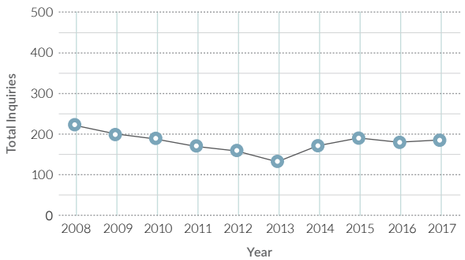
The FPO generally deals with concerns related to corporate policy, or issues involving complex or unusual situations where the correct interpretation of policy may seem unclear. The FPO may initiate its own investigations or respond to inquiries referred by others. It is free to scrutinize the Corporation's policies and procedures in an objective and constructive manner. As required, it can make recommendations about an operational decision on a specific case and alert senior management of any systemic concerns or policies that should be addressed.

Many of these matters are referred to the FPO by the provincial ombudsman, staff and customers. Inquiries of a systemic or policy nature may also be referred by the Customer Relations unit, which deals primarily with individual customers.

2017 Fair Practices Office Results

In the 2017/18 fiscal year, the FPO received 196 documented inquiries from the following referral sources:

Customer	/ 44
Formal Ombudsman inquiries	/ 3
Informal Ombudsman inquiries	/ 106
Internal referrals	/ 1
Executive referrals	/ 16
Ministerial inquiries	/ 26



Over the same period, the FPO investigated a total of 181 inquiries. Of the inquiries investigated, FPO recommended the Corporation revise its decision in 26 situations, or about 14 per cent of the cases reviewed.

Compliance to Legislative Authority: Sustainable Development Act

In accordance with Section 14 of *The Manitoba Sustainable Development Act* (1997), the Corporation did not experience any environmental incidents between March 1, 2017, and February 28, 2018.

The Corporation has a sustainable development program including policies and guidelines to reduce the environmental impact of the Corporation and its business partners.

Corporate Goals, Strategies and Measures

Manitoba Public Insurance's Goals, Strategies and Measures are as follows:

Goal 1

Universally available mandatory protection against the cost of automobile collisions. Rates, on average, will be lower than those charged by private insurance companies for comparable coverage and service.

Strategies

1.1 Basic automobile insurance — to ensure that the Basic, compulsory program meets the needs of Manitoba motorists for affordable, accessible and comprehensive coverage.

1.2 To keep all controllable costs at their lowest possible level through loss prevention and cost containment strategies.

1.3 To improve the efficiency and convenience of Manitoba Public Insurance's distribution and service network by reducing or eliminating low value transactions.

1.4 To the maximum extent possible, leverage synergies offered by strategic partners that are mutually beneficial, improve customer service and reduce costs.

1.5 To make prudent investments within acceptable risk profiles.

1.6 To maintain an information technology environment that is efficient, adaptable and designed to meet customer needs.

1.7 To maintain the Basic Insurance Rate Stabilization Reserve to protect motorists from rate increases that would otherwise have been necessary due to unexpected variances from forecasted results and due to events and losses arising from non-recurring events and factors.

Rate Comparison Chart

2018 rates based on: 2016 Ford F150 XLT SuperCrew, $500 all-perils deductible, $2 million third-party liability	**21-Year-Old Male** Claims and conviction free	**35-Year-Old Couple** Both claims and conviction free	**40-Year-Old Couple** Both claims and conviction free **16-Year-Old Son** Claims and conviction free
Winnipeg, MB	**$1,534**	**$1,215**	**$1,260**
Calgary, AB	$6,728	$2,188	$4,655
Toronto, ON	$7,706	$2,318	$5,164

Notes: 1. The 2016 Ford F150 XLT SuperCrew is the most common passenger vehicle registered in Manitoba.
2. Manitobans will pay less for their automobile insurance in 2018 than most major Canadian cities.

Goal 2

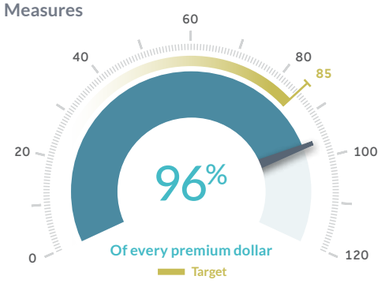
The Basic plan will return at least 85 per cent of premium revenue to Manitobans in the form of claims benefits.

Strategies

2.1 To maintain claims expense per reported claim at a maximum of 50 per cent of industry average.

2.2 To break even over the long term on Basic automobile insurance.

Measures



PREMIUM RETURNED FOR EACH DOLLAR EARNED

Goal 3

Manitoba Public Insurance will be a leader in automobile insurance and vehicle and driver licensing, providing Manitobans with superior products, coverage and service. The Corporation will utilize technology to provide products and services that will enhance the value it delivers to Manitobans.

Strategies

3.1 To ensure Manitobans receive understandable information on Manitoba Public Insurance products, entitlements, services and service standards. The Corporation will adopt a strategy that ensures information reaches the appropriate target groups at appropriate times.

3.2 Autopac Extension — to be profitable by providing products and services that continue to recognize the changing needs of our customers and continue to successfully achieve high levels of customer satisfaction through strategic pricing, accessibility and convenience. To mitigate risk through appropriate product design and automated underwriting techniques.

3.3 Special Risk Extension — to be profitable by responding to the variable and specialized needs of our commercial customers and providing personalized auto-related insurance products that cannot be met by the universal compulsory program or by the automobile extension program. To partner with customers in pursuing fleet safety and loss prevention initiatives. To provide Manitobans with a stable market choice that promotes long-term partnerships.

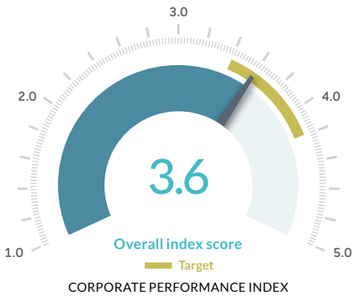
3.4 To use our economies of scale to help ensure safe, quality, reliable repairs for Manitobans by providing support for skilled trades through the development and delivery of cost-effective training.

3.5 To leverage our service delivery model to meet customer expectations, increasing accessibility and convenience.

3.6 To expand the value that the Corporation provides Manitobans by capitalizing on the effectiveness of its technology and distribution channels to develop innovative solutions that benefit its customers in a cost-effective manner.

3.7 To improve the service relationship between drivers and vehicle owners and the Corporation by modernizing business processes and ensuring all aspects of driver risk rating are consistent, clear and fair.

Measures



CORPORATE PERFORMANCE INDEX

Goal 4

Manitoba Public Insurance will provide service that is responsive, fair, courteous and convenient. Manitoba Public Insurance will meet corporate customer service standards that are based on customer expectations.

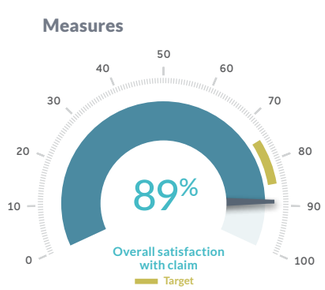
Strategies

4.1 To enhance a customer-centric service philosophy.

4.2 To create, publish and comply with comprehensive customer service standards for ourselves, brokers, business associates and service providers who are in contact with our customers.

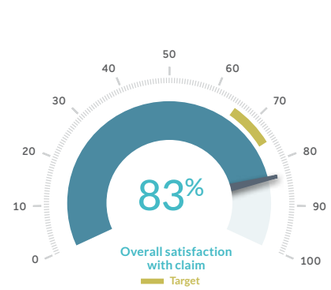
4.3 To promptly address and respond to legitimate concerns expressed by our customers. To provide internal and external appeal mechanisms.

Measures



PHYSICAL DAMAGE CLAIMS

OVERALL CUSTOMER SATISFACTION



BODILY INJURY CLAIMS

DRIVER AND VEHICLE LICENSING

Goal 5

Total equity will be maintained within established target levels.

Strategies

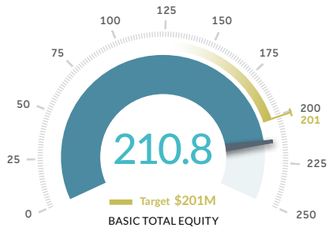
5.1 To maintain financial stability by setting appropriate premium rates, strengthening investments, and maintaining total equity within established target levels.

5.2 To continuously identify and assess the likelihood and magnitude of potential risks and act explicitly to avoid and mitigate such risks.

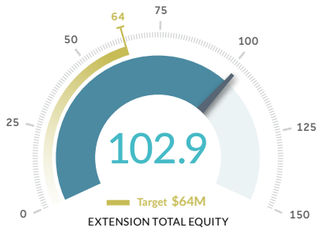
5.3 To develop business strategies to ensure competitive lines of business are profitable and contribute to the benefit of all Manitobans.

5.4 To assess corporate financial risk in keeping with industry standards and establish appropriate total equity target levels for each line of business.

Measures



BASIC TOTAL EQUITY



EXTENSION TOTAL EQUITY

SRE TOTAL EQUITY

Goal 6

Manitoba Public Insurance will offer an environment and career opportunities that will encourage employees to strive for excellence. Our people will be treated with respect and fairness and their contributions will be recognized.

Strategies

6.1 To build a culture of greater collaboration, accountability and innovation.

6.2 To foster a culture that attracts and retains a diverse workforce.

6.3 To continue to provide clear direction and foster a management style that reflects our values and supports employee commitment to the organization.

6.4 To use change management strategies that ensure communication, education and employee training support and facilitate business change.

6.5 To ensure employees are provided with effective, informative and timely two-way communication.

Measures

EMPLOYEE ENGAGEMENT

Goal 7

Manitoba Public Insurance will lead driver and vehicle safety initiatives that reduce risk and protect Manitobans on our streets and in their neighbourhoods. Manitobans will recognize the Corporation is living its mission.

Strategies

7.1 To develop an evidence-based road safety strategy with an aim to reduce automobile collisions, using a multi-faceted approach.

7.2 To ensure Manitoba drivers meet and continue to maintain established standards of knowledge, skill and behaviour to gain access to Manitoba roads.

7.3 To reduce risk on the road by working with and supporting the vehicle repair industry to ensure safe, quality and reliable repairs for Manitobans.

7.4 To ensure vehicles and vehicle repairs meet provincial mechanical standards and repairs are made according to the latest best practices.

7.5 To develop strategies and initiatives that support continuous vehicle and driver performance monitoring to ensure Manitoba roads remain safe for everyone.

7.6 To continue to provide a clear and understandable Driver Safety Rating program, which rewards safe drivers and motivates higher-risk drivers to improve their driving behaviour through insurance rates that reflect the risk they represent on the road.

7.7 To enhance road safety research and awareness activities, fine-tune and target advertising campaigns, and explore innovative ways to reach Manitobans with road safety messaging by leveraging the latest technologies.

7.8 To partner with community groups across Manitoba supporting community-based initiatives that increase road safety awareness and education opportunities.

Measures

PUBLIC SUPPORT FOR ROAD SAFETY

Results of Operations

Corporate

During the reporting period, for every dollar of revenue earned, the Corporation provided Manitobans with 84 cents in claims benefits. Operating expenses, including regulatory and appeal expenses, accounted for 10 cents of every dollar of revenue earned while broker commissions and premium taxes cost 9 cents. This resulted in an underwriting loss of 3 cents. Investment income added 11 cents for every dollar of revenue earned, resulting in the Corporation's net income being 8 cents for every dollar of revenue earned during the year.

Current Year and Last Year

In 2017/18, the Corporation had net income of $91.1 million, $176.3 million better than the previous year. The underwriting results were better than 2016/17, due primarily to a decrease of claims costs of $72.5 million largely resulting from favourable claims experience as well as actuarial adjustments and the change in interest rates which positively affected the claims reserves. Additionally, earned revenues rose by $65.3 million and investment income was $38.1 million better compared to last year.

Revenue

Total earned revenues in 2017/18 increased $65.3 million or 5.2 per cent to $1.3 billion because of the Public Utilities Board-approved 3.7 per cent overall rate increase for March 1, 2017; the growth in the number of vehicles on the road in Manitoba; the value of these vehicles; and movement of drivers down the Driver Safety Rating scale, all of which resulted in higher premiums. Total earned revenues include $30.2 million received from the Province of Manitoba as part of the agreement for providing services related to *The Drivers and Vehicles Act* operations.

Claims Costs

Beginning in 2005, a new reserving method was implemented for older open Personal Injury Protection Plan (PIPP) claims files. There are now 12 years of development observations under this process of reserving for open claims with continuing periodic payments. These observations have shown relative consistency in the periodic claim development patterns since the introduction of the new process in 2005.

In 2017/18, the Corporation's overall claims costs decreased by $72.5 million to remain at $1.1 billion compared to 2016/17. The decrease was mostly driven by claims incurred of $883.8 million, which is $97.5 million lower than last year. Of this amount, injury claims incurred decreased by $67.7 million while physical damage claims decreased by $29.8 million. The total number of claims filed decreased by 4,360 from 303,878 in 2016/17 to 299,518 in 2017/18.

The $67.7 million decrease in injury claims incurred compared to last year is mainly due to the significant unfavourable actuarial adjustment made in 2016/17. The decrease of $29.8 million in physical damage claims was attributed to a decrease in comprehensive claims incurred of $55.0 million primarily due to a $36.8 million improvement in hail offset by higher collision of $17.6 million and higher property damage of $7.6 million. Collision claims increased by 2,218 claims or 1.4 per cent from 159,373 claims last year to 161,591. Total severity of physical damage claims decreased $29.8 million in 2017/18.

+	Investment income	$ 0.11
=	Net income	$ 0.08

Climate Change

For Manitoba, climate change has become synonymous with increasing and unpredictable levels of flooding, fires and severe weather conditions, including snowstorms and hailstorms.

From 1971 to 1996, the Corporation did not experience any significant claims costs related to hail damage requiring reinsurance recovery. However, since 1996, the once stable and consistent weather pattern has changed, resulting in the Corporation making four reinsurance claims following severe hailstorms.

In 2017/18, we did not see any one significant hailstorm requiring reinsurance recovery, but claims resulting from hailstorms contributed $8.3 million to the Corporation's overall claims costs.

The impact to the Corporation's overall claims costs resulting from hailstorms for the last five years is:

2017/18	**$8.3 million**
2016/17	$45.1 million
2015/16	$52.6 million
2014/15	$13.8 million
2013/14	$23.5 million

We will continue to monitor carefully and respond to future projections, which call for a continued trend in unpredictable and variable weather patterns.

Expenses

Total corporate expenses of $239.0 million, are $0.4 million better than last year. This decrease was due primarily to Operating and Regulatory/Appeal expense decrease of $5.0 million offset by an increase in Premium Taxes of $4.6 million as they are reflective of the increase in Premiums.

Operating costs are allocated to Basic, Extension, Special Risk Extension and *The Drivers and Vehicles Act* operations (lines of business) representing their share of common costs such as compensation of common departments (Human Resources, Finance, Fair Practices Office, Enterprise Systems Support and IT Support) that support the four lines of business. Costs are allocated through a formal and structured allocation policy developed in 2011. The external auditors have accepted the policy and, for Basic Autopac rate-setting purposes, the Public Utilities Board has approved its use. Effectively, the Corporation's integrated service delivery model ensures that the cost of providing these services is lower than if each were operated on a stand-alone basis.

Investment Income

Total investment income including investment management fees, increased to $134.8 million compared to $96.6 million last year, an increase of $38.2 million. The $38.2 million increase is primarily due to higher unrealized gains on held for trading bonds of $33.2 million. There were impairment losses of $1.1 million to the equity portfolio compared to no impairment last year. Please refer to Note 6 of the Condensed Financial Statements for a breakdown of investment income by type of investment.

The Minister of Finance is responsible for investing the money that Manitoba Public Insurance sets aside for future claims payments and other liabilities. The total fair value of the Corporation's investment portfolio was $2.8 billion at February 28, 2018, an increase of 4.7 per cent or $130.3 million from the previous year. The bond portfolio, which accounts for 67.6 per cent of the investment portfolio, is primarily invested in two types of bonds:

- Marketable bonds, mainly issued by the governments of Manitoba and other provinces, including floating rate notes (45.5 per cent of the total portfolio market value).
- Non-marketable bonds, issued by Manitoba municipalities, hospitals and school divisions, purchased through the Manitoba Department of Finance (22.1 per cent of the total portfolio).

The Minister of Finance through his government department has selected three external investment managers to administer Manitoba Public Insurance's Canadian equity portfolio, which represents 9.5 per cent of the total investment portfolio. The Corporation also has 5.2 per cent of its portfolio in United States equities with exposure to the U.S. equity market through two exchange traded funds. Cash and cash equivalents account for 3.2 per cent of the investment fund; investment in five infrastructure holdings accounts for 3.6 per cent of investments and pooled real estate funds account for 9.4 per cent while directly held real estate investments account for 1.5 per cent of the investment portfolio.

The total portfolio, on a market value basis, had a positive 5.0 per cent return during the fiscal year. Marketable bonds returned positive 3.6 per cent while non-marketable bonds returned 4.6 per cent. The total Canadian equity portfolio earned positive 4.7 per cent, while large cap Canadian equities returned positive 5.0 per cent and small cap Canadian equities returned positive 4.1 per cent. U.S. equities returned positive 3.2 per cent in Canadian dollars. The real estate portfolio returned 11.2 per cent while the infrastructure portfolio grew by 9.8 per cent in fiscal 2018. Over a four-year period, the investment portfolio has achieved an annualized return of 4.4 per cent.

Basic

Years Ended February 28/29

Basic Autopac — Five-Year Statistics ($000)	2018	2017	2016	2015	2014
Premiums written	**994,593**	923,789	888,365	824,865	784,741
Claims incurred	**767,239**	860,035	666,404	745,837	747,435
Claims expense	**143,337**	120,972	118,614	116,578	114,552
Other expenses	**154,310**	152,853	148,410	146,953	139,964
Net income (loss)	**34,424**	(123,070)	(56,050)	2,440	(69,162)

Current Year and Last Year

In 2017/18, Basic insurance had net income from annual operations of $34.4 million, $157.5 million better than last year. Underwriting results increased by $124.1 million and Basic's share of investment income by $33.4 million. The $124.1 million increase in underwriting results was primarily resulting from a $69.8 million decrease in total claims costs due to the change in interest rates which positively affected the claims reserves and the actuarial adjustment and a $55.1 million increase in earned revenues offset by an increase in total expenses of $0.9 million.

Revenue

The number of policies in force at year end increased to 1,124,731 from 1,107,011. Total earned revenues increased from $927.9 million last year to $983.0 million.

Claims Costs

Total claims costs decreased to $923.7 million, $69.8 million lower compared to last year. The change in claims costs is comprised of a $65.5 million decrease in injury claims incurred and a $27.3 million decrease in physical damage claims incurred offset by a $23.0 million increase in claims expense. The increase in claims expense was mainly due to a one-time write-off of $16.5 million due predominately to the discontinuation of an automated claims adjudication platform.

Injury claims incurred decreased by $65.5 million due to the year-over-year change in the actuarial adjustment which positively impacted the injury claims liabilities by $126.0 million. This was offset by an increase in direct claims incurred of $65.4 million. The number of injury claims increased by 2.6 per cent from 17,273 to 17,734.

Physical damage claims incurred were lower compared to last year, decreasing by $27.3 million. Hail decreased comprehensive claims incurred by $36.8 million compared to last year. Total severity for Basic physical damage claims decreased by $20.8 million in 2017/18.

** Fatal includes PIPP, non-PIPP and those still under investigation as at February 28/29. Years prior to 2015 have been restated.*
*** 2015 has been restated to be consistent with prior years.*

Expenses

Basic expenses increased from $140.3 million last year to $141.2 million. The increase was due to higher commissions and premium taxes of $4.0 million related to the increase in premiums offset by lower operating expenses and regulatory appeal expenses of $3.1 million.

Investment Income

Basic's share of corporate investment income was $116.3 million, net of investment management fees. This was an increase of $33.4 million, attributable mainly to unrealized gains on held for trading bonds.

Total Equity

Net income for the Basic line of business for 2017/18 increased retained earnings from $99.3 million to $133.7 million. Combined with Accumulated Other Comprehensive Income, the Basic total equity was $173.5 million. As per the Risk Management section, the Corporation's Chief Actuary concluded that a minimum total equity level of $201.0 million would be required for Basic to achieve a satisfactory future financial condition. The Corporation transferred $37.3 million to Basic retained earnings from the Extension line of business. This transfer results in an ending retained earnings of $171.0 million and total equity of $210.8 million to support rate stabilization.

Extension

Years Ended February 28/29

Extension — Five Year Statistics ($000)	2018	2017	2016	2015	2014
Premiums written	**156,947**	151,303	144,299	138,667	134,470
Claims incurred	**66,144**	67,195	65,967	56,443	60,052
Claims expense	**11,852**	10,236	9,757	11,749	11,974
Other expenses	**48,404**	48,063	49,248	51,363	50,843
Net income	**44,921**	37,988	26,644	43,134	31,125

Current Year and Last Year

Extension insurance reported net income of $44.9 million compared to $38.0 million the previous year. The $6.9 million increase in net income was due to a $5.8 million increase in underwriting results and a $1.1 million increase in Extension's share of investment income.

Revenue

Earned revenues from the sale of Extension products increased by $6.6 million to $164.9 million compared to last year. All products, including the sale of coverage for deductible buy down and third party liability, contributed to the increase.

Claims Costs
Total claims costs — including claims benefits, claims handling, loss prevention and road safety expenses — increased $0.5 million to $78.9 million. Physical damage claims incurred decreased by $4.4 million or 7.0 per cent. Injury claims incurred increased $3.3 million, due primarily to increased severity and volume of claims. Claims expenses were higher than last year by $1.6 million.

Expenses
Expenses related to the sale of Extension products was $47.4 million, an increase of $0.3 million from the previous year. This increase was due to higher commissions of $0.1 million and premium taxes of $0.2 million.

Investment Income
Extension's share of corporate investment income of $6.3 million, including investment management fees, was $1.1 million higher than last year.

Retained Earnings
Extension's total retained earnings are comprised of retained earnings from the sale of Extension products. As at February 28, 2018, Extension retained earnings totaled $102.5 million compared to $94.9 million the previous year. Extension retained earnings decreased by $37.3 million as a result of the transfer to Basic retained earnings. Extension's current capital target level for total equity is $64.0 million based on the 2017 Extension Dynamic Capital Adequacy Test (DCAT) report.

Special Risk Extension
Years Ended February 28/29

SRE — Five Year Statistics ($000)	2018	2017	2016	2015	2014
Premiums written	**80,810**	78,328	70,521	63,022	58,781
Claims incurred	**50,460**	54,068	38,253	42,596	53,650
Claims expense	**6,393**	5,895	6,140	5,920	6,037
Other expenses	**18,679**	17,961	17,692	16,645	14,199
Net income (loss)	**10,886**	3,193	4,650	10,768	(6,928)

Current Year and Last Year
Special Risk Extension (SRE) insurance reported a net income of $10.9 million, an increase of $7.7 million from the previous year. Underwriting results increased by $4.9 million and SRE's share of investment income increased by $2.8 million.

Revenue
Total earned revenues in 2017/18 were $77.0 million compared to $74.5 million the previous year. The sale of SRE products, which include large trucking companies' liability, cargo and physical damage coverage, showed a growth of 3.4 per cent compared to last year.

Claims Costs
Total claims costs decreased from $61.2 million in 2016/17 to $58.1 million in 2017/18. Injury claims decreased $5.5 million. Physical damage claims incurred increased by 6.5 per cent compared to the previous year, a change of $1.9 million. Claims expense and loss prevention and road safety costs increased by $0.4 million from the previous year.

Expenses
SRE's expenses increased to $17.4 million from $16.7 million, primarily due to an increase in commissions of $0.7 million.

Investment Income
SRE's share of corporate investment income, including investment management fees, was $9.4 million, an increase of $2.8 million compared to last year.

Retained Earnings
SRE's retained earnings are derived from the annual operations of the SRE line of business. SRE's retained earnings were $81.7 million as at February 28, 2018, compared to $70.8 million last year. SRE's current capital target level for total equity is $65.0 million based on the 2017 SRE DCAT report.

The Drivers and Vehicles Act Operations
Current Year and Last Year
The Drivers and Vehicles Act (DVA) operations experienced net income of $0.9 million in 2017/18 compared to a net loss of $3.3 million last year.

Revenue
The government provides funding to the Corporation that covers the cost of the DVA administrative operation. In 2017/18, the Corporation received $30.2 million from the Province of Manitoba and reported $1.0 million in service fees and other revenue, resulting in overall revenue being $1.1 million higher than the previous year.

Expenses
DVA operations' expenses of $33.0 million were down $2.4 million from last year's expenses of $35.4 million primarily due to reduced operating expenses of $2.0 million and commissions of $0.4 million.

Investment Income
DVA operations' portion of corporate investment income, including investment management fees, increased to $2.7 million, $0.8 million higher compared to last year.

Retained Earnings
Extension and SRE retained earnings were transferred to create the Extension Development Fund (EDF) which was primarily set up to support the projects undertaken to maximize the opportunities presented by the 2004 merger of the Corporation and the Division of Driver and Vehicle Licensing. From EDF funding, DVA operations benefited by $79.5 million including $14.0 million for the implementation of the Manitoba Enhanced Identification Card, Manitoba Enhanced Driver's Licence and Manitoba Identification Card. DVA operations has subsequently repaid $6.1 million to offset the costs associated with these projects and funding.

Risk Management
Like any enterprise, Manitoba Public Insurance assumes risks in its operations that must be handled effectively in order to achieve its goals.

The Audit, Finance & Risk Committee of the Board of Directors ensures that enterprise-wide risk assessment processes and controls are in place to identify and mitigate these risks. The Audit, Finance & Risk Committee also monitors the Corporation's risks on an ongoing basis.

Management is responsible for developing, updating and enforcing the Corporation's Risk Management Framework (the Framework), which includes:

- Risk identification and assessment of impact if there were no risk mitigation actions in place.
- Risk monitoring procedures.
- Processes and controls to manage and mitigate risks.
- The residual risk after consideration of management action.

The Framework ensures a consistent approach for addressing risks and a common understanding of risk and its mitigation throughout the Corporation. The risks are categorized based on the Corporation's seven overall corporate goals.

Much of the risk management process is focused on Goal 1: Rates, on average, will be lower than those charged by private insurance companies for comparable coverage and service.

The key risk mitigation areas are:

- Maintaining adequate unpaid claims reserve.
- Maintaining an adequate Rate Stabilization Reserve.
- Governance of investments.
- Claims control strategies.
- Information technology processes.
- Loss prevention strategies.

Unpaid Claims
Manitoba Public Insurance maintains provisions for unpaid claims on a discounted basis to cover its future claims commitments. The Corporation makes provisions for future development on claims that have been made, and an estimate for those that may have occurred but have not yet been reported.

In the case of major injuries, only a small portion of the total benefit is paid in the first year. As time passes and more information is available, the estimates are revised to reflect the most current forecast of claims costs.

Because the total amount paid on any single claim may be different from its initial reserve, Manitoba Public Insurance reviews the adequacy of these reserves quarterly. Adjustments, if needed, are calculated by the Corporation's Chief Actuary. An independent assessment of the reserves is also conducted twice a year by the Corporation's external Appointed Actuary. The external auditor performs procedures to assess the reasonability of the reserves as part of its annual audit of the Corporation's financial statements. This process serves to mitigate risk of misstatement of unpaid claims reserves.

For Manitoba Public Insurance, long-lasting injury claims are the largest source of year-to-year variability in the estimate of ultimate costs. This variability and volatility is related to future events that arise from the date of loss to the ultimate settlement of the claims. Accordingly, short-tail claims, such as physical damage claims, tend to be more reasonably predictable than long-tail claims such as Personal Injury Protection Plan (PIPP) and public liability claims. For Manitoba Public Insurance, factors such as the effects of inflationary trends and changing interest rates contribute to this variability. Investment portfolio management techniques help to reduce this potential volatility.

The determination of the provision for unpaid claims, including adjustment expenses, relies on analysis of historical claim trends, investment rates of return, expectation on the future development of claims and judgement. The process of establishing this provision necessarily involves risks which could cause the actual results to deviate, perhaps substantially, from the best determinable estimate.

Rate Stabilization Reserve
The Corporation establishes and maintains a Rate Stabilization Reserve (RSR) to protect motorists from rate increases made necessary by unexpected losses arising from non-recurring events or factors.

The Corporation's Board of Directors' current minimum target level for total equity (which includes Basic retained earnings and the Basic portion of AOCI) is $201.0 million (February 28, 2017 - $181.0 million) based on the 2017 Basic Insurance Dynamic Capital Adequacy Test (DCAT) report. In this report, the Corporation's Chief Actuary concluded that a minimum total equity of $201.0 million would be required for Basic to achieve a satisfactory future financial condition. A total equity level lower than $201.0 million results in a "not satisfactory" opinion because there were plausible adverse scenarios at the 1-in-40 year probability level where liabilities exceed assets.

In Order No. 130/17, the Public Utilities Board approved a lower DCAT-based RSR target (for total equity) of $180.0 million and the continued use of the DCAT methodology for this purpose. However, the Corporation's Board of Directors continues to rely on the Chief Actuary's minimum target of $201.0 million as the Public Utilities Board estimate does "not reflect best estimate expectations", as noted on page 78 of Order No. 130/17. Further, a target of $180.0 million is not sufficient to achieve satisfactory financial conditions as calculated by the Corporation's Chief Actuary.

For the upper (maximum) RSR target for total equity, the Corporation proposed the continued use of the 100 per cent Minimum Capital Test (MCT) ratio in the 2018 General Rate Application. The MCT is a capital adequacy test used by nearly all property and casualty insurers in Canada, and at the 100 per cent level, capital available is equal to capital required. The Corporation is the only insurer in Canada that has proposed the use of 100 per cent MCT as a maximum capital target. Other public insurers have utilized 100 per cent MCT as a target capital amount or a minimum capital amount, while federally regulated private insurers have a target capital ratio (supervisory target) of 150 per cent MCT, and a minimum internal target which would be set greater than the 150 per cent supervisory target. In 2017, the Public Utilities Board set the maximum RSR target for total equity at $325 million, which is equivalent to an MCT ratio of approximately 70 per cent.

Investments

In accordance with Section 12(1) of *The Manitoba Public Insurance Corporation Act*, the Minister of Finance is responsible for the investments of the Corporation. The Minister has charged the Department of Finance with the operational management of the fund. The Corporation, through the Investment Committee of the Board, works collaboratively with the Department of Finance and makes recommendations to the Minister regarding appropriate policies and strategies to maximize return, minimize volatility and mitigate risk. The Investment Committee has completed asset liability management studies to ensure that the asset mix chosen is compatible with the Corporation's liability profile. A complete description of these risks and risk mitigation strategies is outlined in Note 28 of the 2017/18 audited financial statements located on the Corporation's website, mpi.mb.ca.

Claims Control Strategies

Our cost-control measures with respect to claims management include:

- Management of an accreditation program for the collision repair industry to ensure proper, quality and safe repairs at a reasonable cost. This requires shops and the technicians within shops to meet standards for facilities, equipment and annual training of technicians.
- Delivery of high-quality training programs to the collision repair industry to ensure repairs are performed by highly trained technicians to original equipment manufacturer's standards using current technologies.
- Use of estimatics software, along with Manitoba Public Insurance estimating standards, to ensure all repair estimates are prepared accurately and consistently, ensuring that only required repairs are performed.
- Use of industry-recognized valuation tools to determine actual cash value of vehicles when settling total loss claims.
- Use of aftermarket, re-manufactured and recycled parts in vehicle repairs.
- Discounted pricing on glass parts used in vehicle repairs.
- Maximizing recovery of claims costs from other insurers and at-fault parties (subrogation).
- Sale of autos through salvage and tenders.
- A goal oriented and team-based approach to managing Personal Injury Protection Plan claims that helps individuals realize their full recovery potential.

Each year, these initiatives significantly contain costs and generate revenue, which results in lower insurance premiums for our customers. For example, salvage auto sales and tenders yielded $43.6 million in the 2017/18 fiscal year.

Information Technology Processes

Information Technology Optimization

The Corporation depends on highly integrated, quality systems to serve customers and fulfill its legislated mandate. It is imperative that we continue to ensure that the Corporation's systems infrastructure is operating in the most secure, effective and efficient manner. Applications and supporting infrastructure must also be secure and well-supported.

With respect to protecting our ongoing ability to serve customers, we are continuing investment in these technologies, as well as the related processes and capabilities. This reduces the risk of business interruption, and thus provides better customer service via highly reliable and available systems.

Business Continuity

The objective of our Business Continuity Management Program (BCMP) is to create corporate plans and responses that ensure continued customer service in the event of a business disruption. BCMP includes emergency response, crisis management, business recovery, IT service continuity, catastrophe, contingency and pandemic responses, and the processes used to ensure ongoing readiness. The program is focused on creating and implementing a Corporate Business Continuity Plan through a strong understanding of our products and services, people, delivery processes and technology.

Business continuity includes planning, prevention, preparedness and a proactive program approach to crisis responses and business delivery. The practice of business continuity recognizes the need for continuity in contrast to recovery. This approach leverages the prevention and proactive aspects of business continuity that provide continuous service during business disruptions as opposed to suspension and recovery.

Outlook

The Corporation remains committed to achieving its seven corporate goals. Actual results are monitored quarterly by the Board of Directors and may deviate from forecasts prepared in the previous year for rate setting purposes.

Basic Autopac Rates

Under *The Crown Corporations Governance and Accountability Act*, Manitoba Public Insurance is required to submit Basic Autopac rates to the Public Utilities Board for approval. The Corporation generally files its rate application in June of each year for the fiscal year beginning the following March.

On June 16, 2017, Manitoba Public Insurance filed its 2018/19 General Rate Application for Basic insurance with the Public Utilities Board. The application sought approval of a 2.7 per cent overall rate increase for vehicle premiums and a 1.8 per cent rate increase through driver premiums from demerit drivers on the Driver Safety Rating scale. On December 4, 2017, the Public Utilities Board ordered a 2.6 per cent overall rate increase for vehicle premiums and approved the Corporation's request for a 1.8 per cent rate increase from demerit drivers.

Basic Autopac Net Income

Basic had net income of $34.4 million in 2017/18, which was $80.0 million better than budget. The majority of the favourable variance came from total claims incurred, including interest rate impacts of $76.2 million and better than budget investment income of $9.4 million.

The Corporation had favourable hail experience with Basic hail claims that occurred in 2017/18 coming in at an estimated $28.2 million better than budget. While there was less hail frequency in 2017/18, the Corporation also introduced a paintless dent repair strategy, which helped lower hail claim repair severity by 32.0 per cent from 2016/17 severity levels. The Corporation forecasts hail claims frequency based on longer term averages given the volatility of hail claims experience.

The Corporation also implemented the rodent claims strategy in March 2017 to address the ten-fold increase in rodent claims frequency since 2007/08. The strategy resulted in a $9.8 million improvement from the 2017/18 budget of $13.3 million. This strategy is expected to permanently reduce rodent claims on a go-forward basis with minimal customer complaints. In fact, clients are seeing much faster remediation times on these claims.

The 2017/18 year experienced another relatively mild winter with minimal snowfall, which resulted in Basic collision claims being $8.4 million under budget. Collision claim frequency continues to decline as a result of a combination of factors including favourable winter driving conditions, increased safety features on new vehicles, and improved incentives from the Corporation's Driver Safety Rating program. On the flip side, the Corporation anticipates upward pressure on severity in future years as a result of increased complexity of vehicles. Collision severity was close to budget in 2017/18.

Basic investment income, excluding the impact of interest rates, was $9.4 million better than budget in 2017/18 primarily as a result of higher than anticipated returns from the Corporation's investment in the pooled real estate fund.

The net impact of interest rates from the Corporation's Basic Asset and Liability Management (ALM) strategy resulted in a $21.9 million favourable impact to net income in 2017/18. The ALM strategy would normally result in a close to zero impact to net income; however, in 2017/18 the Corporation made a change to its discount rate methodology in the actuarial valuation which resulted in a $28.7 million favourable adjustment. Excluding this change in methodology, the net impact of interest rates on assets and liabilities was a $6.8 million decrease in net income.

Other Lines of Business Net Income

Extension and Special Risk Extension are expected to realize profits, while ongoing operations related to the administration of *The Drivers and Vehicles Act* are expected to generate some limited net income. Non-Basic lines of business had a net income of $56.7 million in 2017/18, which was $5.5 million better than budget.

Loss Prevention

Loss prevention programs and activities contribute to our overall goal of reduced claims and lower claims costs, which contribute to lower insurance premiums for rate payers. As the mandatory provider of basic auto insurance and the administrator of drivers and vehicles, Manitoba Public Insurance is uniquely positioned to leverage driver and vehicle data in Manitoba to deliver programs that teach, influence and incent safe driving behaviour and intervene to reduce risk associated with driver readiness and fitness, vehicle condition, or fraudulent and ineligible claims.

As our environment evolves, we recognize the need to adopt new approaches to prevent loss. Manitoba Public Insurance interventions are selected strategically, are evidence-based, proven effective, and evaluated to demonstrate value to Manitobans where it matters—in their personal safety and in their pocketbooks.

Condensed Financial Statements

These financial statements are not audited. The February 28, 2018, audited financial statements are available at mpi.mb.ca or upon request.

Condensed Statement of Financial Position

Notes to Condensed Financial Statements

February 28, 2018

1. Status of Corporation

The Manitoba Public Insurance Corporation (the "Corporation") was incorporated as a Crown Corporation under *The Automobile Insurance Act* in 1970. The Corporation is owned by the Province of Manitoba and the financial results of the Corporation are included in the consolidated financial statements of the Province of Manitoba. In 1974, *The Automobile Insurance Act* was revised and became *The Manitoba Public Insurance Corporation Act* (Chapter A180 of the continuing consolidation of the Statutes of Manitoba). In 1988, the Act was re-enacted in both official languages as Chapter P215 of the Statutes of Manitoba. The address of the Corporation's registered office is 234 Donald Street, Winnipeg, Manitoba.

Under the provisions of its Act and regulations, the Corporation operates an automobile insurance division and a discontinued general insurance division. The lines of business for the automobile insurance division provide for Basic Universal Compulsory Automobile Insurance, extension and special risk coverages. For financial accounting purposes, the lines of business for the automobile insurance division and the discontinued general insurance division are regarded as separate operations and their revenues and expenses are allocated on a basis described in the summary of significant accounting policies. For financial reporting purposes, due to the immateriality of the financial results of the discontinued general insurance operations, the operations are reported as part of the Special Risk Extension line of business. The Basic Universal Compulsory Automobile Insurance line of business rates are approved by the Public Utilities Board of Manitoba.

Under *The Drivers and Vehicles Act* (DVA), the Corporation is responsible for DVA operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services.

2. Basis of Reporting

Statement of Compliance

The financial statements of the Corporation are in such form as prescribed by Section 43(1) of *The Manitoba Public Insurance Corporation Act* and are presented in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The financial statements were authorized for issue by the Board of Directors on May 17, 2018.

The external actuary is appointed by the Board of Directors of the Corporation. With respect to preparation of these financial statements, the Appointed Actuary is required to carry out a valuation of the insurance contract liabilities and to report thereon to the Corporation's Board of Directors. Insurance contract liabilities include unearned premiums and fees, and unpaid claims and adjustment expenses.

The Appointed Actuary also uses the work of the external auditors in their verification of the information prepared by the Corporation used in the valuation of the insurance contract liabilities.

The external auditors are appointed by the Lieutenant Governor in Council to conduct an independent and objective audit of the financial statements of the Corporation in accordance with Canadian generally accepted auditing standards. In carrying out their audit, the external auditors also make use of the work of the Appointed Actuary and their report on the Corporation's insurance contract liabilities. The external auditors' report outlines the scope of their audit and their opinion.

Basis of Presentation

The Corporation presents its Statement of Financial Position broadly in order of liquidity.

The following balances are generally classified as current: cash and cash equivalents, investments, due to/from other insurance companies, accounts receivable, prepaid expenses, deferred policy acquisition costs, reinsurers' share of unearned premiums and unpaid claims, accounts payable and accrued liabilities, unearned premiums and fees, and provision for employee current benefits.

The following balances are generally classified as non-current: investment property, property and equipment, deferred development costs, financing lease obligation, provision for employee future benefits and provision for unpaid claims.

These statements are presented in thousands of Canadian dollars which is the Corporation's functional and presentational currency except as otherwise specified.

Seasonality

The automobile insurance business, which reflects the primary business of the Corporation, is seasonal in nature. While net premiums earned are generally stable from quarter to quarter, underwriting income is typically highest in the first and second quarter of each year and lowest in the fourth quarter of each year. This is driven mainly by weather conditions which may vary significantly between quarters.

Basis of Measurement

The Corporation prepares its financial statements as a going concern, using the historical cost basis, except for financial instruments and insurance contract liabilities and reinsurers' share of unpaid claims. Measurement of the financial instruments is detailed in Note 3. Insurance contract liabilities and reinsurers' share of unpaid claims are measured on a discounted basis in accordance with accepted actuarial practice (which in the absence of an active market provides a reasonable proxy for fair value) as explained in Note 3.

Estimates and Judgments

The preparation of financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

3. Summary of Significant Accounting Policies

For a complete listing of significant accounting policies, please refer to the February 28, 2018, audited financial statements available at mpi.mb.ca.

The following are excerpts from the summary of significant accounting policies contained in the audited financial statements and do not represent full disclosure of significant accounting policies.

Investments

Funds available for investments are managed by the Manitoba Department of Finance, on behalf of the Corporation in accordance with Section 12(1) of *The Manitoba Public Insurance Corporation Act*.

The Corporation's directly held real estate investments are recorded at cost and are being depreciated over their estimated useful life.

The Corporation has classified or designated its financial assets and liabilities in the following categories:

- available for sale (AFS)
- held to maturity (HTM)
- financial assets and liabilities at fair value through profit or loss (FVTPL)
- loans and receivables
- other financial liabilities

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

Investments that are determined to be impaired are written down to their expected recoverable amount. For equity investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

Fair Value Determination

The fair values of financial instruments are obtained from external pricing services and are based on bid prices for financial assets. Cash equivalent investments comprise investments due to mature within 90 days from the date of purchase and are carried at fair value.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Replacement costs are capitalized when incurred and if it is probable that future economic benefits associated with the item will flow to the Corporation and the cost of the item can be measured reliably. All repairs and maintenance costs are recognized in net income (loss) during the period in which they occur.

Depreciation is provided on a straight-line basis which will depreciate the cost of each asset to its residual value over its estimated useful life:

Land & Building	
• HVAC systems	20 years
• land improvements	25 years
• roofing systems	30 years
• elevators/escalators	30 years
• buildings	40 years
Furniture & Equipment	
• computer equipment	3 years
• vehicles	5 years
• furniture and equipment	10 years
• demountable wall systems	10 years

Buildings held under a long-term lease arrangement are depreciated on a straight-line basis over 40 years. Leasehold improvements are carried at cost and are depreciated over the term of the lease plus the first renewal period. Depreciation of construction in progress will begin, in accordance with the above policy, when construction has been completed. Land is not subject to depreciation and is carried at cost.

Revenue

Premiums

Written premiums comprise the premiums on contracts commencing in the fiscal year. Earned premiums represent the portion of written premiums earned through the year on a prorata basis by way of insurance coverage. Written and earned premiums are stated gross of commissions and premium taxes payable and are reported on a gross basis and net of amounts ceded to reinsurance companies.

Unearned Premiums

The liability for unearned premiums is the portion of premiums that relate to the unexpired term of each insurance contract.

Interest Revenue

Interest revenue is recognized when it is probable that the economic benefits will flow to the Corporation and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Investment Income

Investment income is recorded as it accrues. Dividend income from investments is recognized when the Corporation's rights to receive payments is established. Dividend income on common and preferred shares is recorded on the ex-dividend date. Distributions on pooled funds are recorded on the income distribution date. Gains and losses are determined and recorded as at the trade date, and are calculated on the basis of average cost. The effective interest rate method is used to amortize premiums or discounts on the purchase of bonds.

Realized Gains and Losses

The realized gain or loss on disposal of an investment is the difference between the proceeds received, net of transaction costs, and its original cost or amortized cost as appropriate.

The realized gain or loss on disposal of property and equipment is the difference between the proceeds received, net of transaction costs, and its original cost or depreciated cost as appropriate.

Unrealized Gains and Losses

Unrealized gains or losses represent the difference between the carrying value at the year-end and the carrying value at the previous year-end or purchase value during the year, less the reversal of previously recognized unrealized gains or losses in respect of disposals during the year.

Provisions

Provisions are recognized when the Corporation has a present obligation (legal or constructive) as a result of a past event, it is probable that the Corporation will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provision for Employee Current Benefits

The provision for employee current benefits includes accruals for vacation pay and sick pay determined in accordance with the Collective Agreement and Corporate policy.

Provision for Employee Future Benefits

Included in the provision for employee future benefits are the pension benefit plan and other benefit plans.

i. Pension Benefit Plan

The employees of the Corporation are members of a defined benefit pension plan administered under *The Civil Service Superannuation Act*. Included in the accounts is a provision for the employer's future pension liability calculated on an indexed basis. The provision for pension is actuarially determined on an annual basis using the projected benefit method prorated on services. The actuarial present value of the accrued pension benefits is measured using the Corporation's best estimates based on assumptions relating to market interest rates at the measurement date based on high quality debt instruments, salary changes, withdrawals and mortality rates. Changes in experience gains and losses are recognized in the current period. Current service costs and interest costs are recognized in net income in the current period. Actuarial gains and losses are recognized in Other Comprehensive Income (OCI) in the current period.

The Corporation values its pension benefit plan annually, the most recent valuation is at December 31, 2017. Roll-forward procedures are performed to ensure that the December 31, 2017, valuation is a reliable estimate of the valuation at February 28, 2018.

ii. Other Benefit Plans

Other benefit plans consist of two post-retirement extended health plans and severance pay benefits.

The provision for post-retirement extended health benefits is actuarially determined on an annual basis using the projected benefit method prorated on services, which includes the Corporation's best estimates based on assumptions relating to retirement ages of employees and expected health costs. Changes in experience gains and losses are recognized in the current period. Current service costs and interest costs are recognized in net income in the current period. Actuarial gains and losses are recognized in OCI in the current period.

Employees of the Corporation are entitled to severance pay in accordance with the Collective Agreement and Corporate policy. The provision for severance pay is actuarially determined on an annual basis using the projected benefit method prorated on services, without salary projection, which includes the Corporation's best estimates based on assumptions relating to the proportion of employees that will ultimately retire.

Provision for Unpaid Claims

IFRS 4, Insurance Contracts permits the continued use of insurance liability valuation methods previously used under pre-IFRS Canadian Generally Accepted Accounting Principles (GAAP). The Corporation establishes reserves for payment of claims and adjustment expenses that arise from the Corporation's insurance products. The reserve balance represents the expected ultimate cost to settle claims occurring prior to, but still outstanding as of, the reporting date. There are two categories of

loss reserves: (1) reserves for reported losses and (2) reserves for incurred but not yet reported (IBNR) losses. In addition, reserves are set up for internal loss adjustment expenses, which include estimated internal costs and other expenses that are expected to be incurred to finalize the settlement of the losses. The Corporation discounts its liabilities for unpaid claims and includes a provision for adverse deviations. Liabilities for unpaid claims are estimated using the input of assessment for individual cases reported to the Corporation and statistical analyses for the claims incurred but not reported. Claims and adjustment expenses are charged to income as incurred.

All of the Corporation's insurance policies meet the definition of an insurance contract and have been accounted for in accordance with IFRS 4.

Reinsurers' share of unpaid claims are recognized when the related gross insurance claim is recognized according to the terms of the relevant reinsurance contracts.

Liability Adequacy Test

At each reporting period, insurance liability adequacy tests are performed to ensure the adequacy of the contract liabilities, net of related Deferred Policy Acquisition Costs (DPAC) and Reinsurers' Share of Unpaid Claims. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. A premium deficiency exists when estimated future claims and related expenses exceed unearned premiums. Any resulting deficiency is recognized first by writing down the DPAC with any remainder recognized as a premium deficiency in unpaid claims.

Allocation of Revenue, Claims Incurred and Expenses

Premiums written, premiums earned and claims incurred are allocated directly to the division writing the insurance risk.

Service fees and other revenue are allocated to the automobile insurance division lines of business and *The Drivers and Vehicles Act* operations on the following basis:

i. Identifiable direct service fees and other revenue are allocated to each line of business.

ii. Where direct allocation is not possible, service fees and other revenue are prorated to each line of business based mainly on factors such as premiums written ratios, expense allocation ratios and investment income allocation ratios. The formulas developed for the allocation of service fees and other revenue are approved by the Board of Directors.

Investment income is allocated to the automobile insurance division lines of business, *The Drivers and Vehicles Act* operations and the discontinued general insurance division based on a monthly averaging of the funds available within each division.

Expenses, including claims expense, are allocated to the automobile insurance division lines of business and *The Drivers and Vehicles Act* operations on the following basis:

i. Identifiable direct expenses are charged to each line of business.

ii. Where direct allocation is not possible, expenses are prorated to each line of business based mainly on factors such as space, number of employees, time usage, Contact Centre statistics, premiums written ratios and net claims incurred ratios. The basis for allocation of indirect shared expenses is approved by the Board of Directors.

iii. The allocation of improvement initiative costs is based on a review of each project to determine which line of business will benefit from the project. The allocation basis for each project is approved by the Board of Directors.

Reinsurance Ceded

Premiums, claims and expenses are reported gross and net of amounts due to and recoverable from reinsurers. Estimates of amounts recoverable from reinsurers on unpaid claims are recorded separately from estimated amounts payable to policyholders.

The reinsurers' share of unearned premiums is recognized as an asset in a manner which is consistent with the method used in determining the unearned premium liability.

4. Provision for Unpaid Claims

The provision for unpaid claims, including adjustment expenses, represents an estimate for the full amount of all costs and the projected final settlement of claims incurred.

The provision for unpaid claims, including adjustment expenses, is subject to variability. This variability is related to future events that arise from the date the loss was reported to the ultimate settlement of the claims. Accordingly, short-tail claims such as physical damage claims tend to be more reasonably predictable than long-tail claims such as Personal Injury Protection Plan (PIPP) and public liability claims. Factors such as the receipt of additional claims information during the claims settlement process, changes in severity and frequencies of claims from historical trends, and effects of inflationary trends contribute to this variability.

The determination of the provision for unpaid claims, including adjustment expenses, relies on judgment, analysis of historical claim trends, investment rates of return and expectation on the future development of claims. The process of establishing this provision necessarily involves risks which could cause the actual results to deviate, perhaps substantially, from the best determinable estimate.

5. Investments

Cash consists of cash net of cheques issued in excess of amounts on deposit.

Cash equivalent investments have a total principal amount of $83.2 million (February 28, 2017 – $61.5 million) comprised of provincial short-term deposits with effective interest rates of 1.10 per cent (February 28, 2017 – 0.55 per cent), with interest receivable at varying dates.

The Corporation has an unsecured operating line of credit with its principal banker in the amount of $5.0 million (February 28, 2017 - $5.0 million). The unsecured operating line of credit remained unutilized at February 28, 2018 (February 28, 2017 – nil).

5.2 Organization Chart (as at February 2018) 14

5.3 Factors That May Affect Compensation and Staffing 15

6.0 Capital Plans 16

1.0 Mandate & Strategic Direction

The Roles and Responsibilities Record for the Manitoba Public Insurance Corporation sets out the Corporation's mandate and responsibilities.

1.1 Corporation's Mandate, Objects or Purposes as set out in *The Manitoba Public Insurance Corporation Act*

It is the function of the Corporation to engage in and carry out the activity of all classes of automobile insurance, to administer the universal, compulsory automobile insurance as well as Extension insurance as prescribed by regulation. It may also carry out, both within and outside of Manitoba the business of insurance and re-insurance in all classes. In carrying out these responsibilities the Corporation may also repair, salvage and dispose of any property insured by it. The Corporation also has the responsibility to administer *The Drivers and Vehicle Act*.

1.2 Key Priorities (subject to adjustment based on Ministerial Mandate Letter)

- The Corporation will continue to demonstrate fiscal prudence and sound financial management practices while driving cost-containment, streamlining of operations and elimination of unnecessary operational expenses.
- The Basic compulsory insurance program must be operated on a self-sustaining basis with a sufficient capital reserve to absorb unforeseen variations in revenues, claims costs and investment revenues, and with insurance rates that are actuarially supported and established in accordance with Accepted Actuarial Principles.
- The Basic compulsory insurance rates will be kept as stable, predictable and affordable as possible.
- Capital projects and major technological initiatives will focus on supporting and optimizing core business functions, including ensuring the Corporation's ability to adapt appropriately to changes in the auto insurance and registration environment.
- Suitable operational and financial performance measures will be established and will be benchmarked against best practices in the auto insurance industry to demonstrate operational effectiveness and strong financial and investment management practices.
- Products and services will continue to evolve to address the evolving needs of Manitobans, including services to Manitobans in rural, northern and remote communities.
- The Corporation will continue to be proactive in preparing for structural changes in the automobile industry and collaborating with Manitoba's vehicle collision repair industry to ensure that vehicles damaged in motor vehicle collisions are properly repaired to original manufacturer specifications. The Corporation is also expected to evolve its business model to prepare for the anticipated introduction

of both partially-automated and fully-automated vehicles into the Manitoba market.

- The Corporation will continue to invest in Manitoba where prudent, recognizing that doing so provides jobs to Manitobans and results in broader contributions to the provincial economy through the Corporation's relationships with strategic partners.
- The Corporation will continue to hire and train employees predominantly in Manitoba with a commitment to excellent service.
- The financial affairs of the Corporation will be managed in a manner that will not impair the consolidated financial statements of the Province of Manitoba.

1.3 New Corporate Mission

Exceptional coverage and service, affordable rates and safer roads through public auto insurance.

1.4 Vision and Values

A new MPI vision statement and values will be developed to support the new corporate mission and direction of the company. These will be completed during 2018/19.

2.0 Operating Environment

The Corporation is constantly evolving to meet the diverse needs and service expectations of our customers, while providing guaranteed access to automobile insurance at cost effective rates. The Corporation takes a long-term view of providing sustainable and predictable Basic insurance to Manitobans at affordable rates, without compromising coverage or service. Given the growth and increasing diversity of Manitoba's population, the continuous advances in technology and the changing automobile industry, the Corporation continues to refine and adapt our products and services with our customers and business partners in mind.

2.1 Internal Environment

The Corporation's internal operating environment is extremely dynamic. The 2018-19 year will see an emphasis on building a culture of excellence, customer service and product assessment, with an ongoing focus on core business and building value.

2.1.1 Products and Services

Our product roadmap will review opportunities in a number of product or service areas. The Corporation will work with the Public Utilities Board on various technical conferences regarding MPI product evolution, including principal driver underwriting. Other product and service efforts in 2018-19:

- Basic deductibles will be reviewed and assessed to determine if they have kept pace with cost of repair and industry best practices.
- Extension products will be assessed to determine appropriate profit margins, and to determine impact of any potential change to Basic deductibles.
- Special Risk Extension products will be reviewed for potential growth opportunities.
- The Corporation is examining areas of opportunity related to PIPP coverage and claims.
- A redevelopment of the High School Driver Education Program continues, with the implementation of a curriculum redesign.

2.1.2 Customer Experience Framework

The Corporation's current customer satisfaction system was developed in 1998. A new Customer Experience Framework is required to evolve the Corporation's customer-centric focus. Elements of the framework include new channel choice and service delivery options (including enhanced self-service options), new and evolved customer experience metrics, and point-of-service data capture to collect customer feedback in real-time.

2.1.3 Online and Systems Technology

The Corporation is moving towards greater online service for customers, partners and staff. Online service enhancements include:

- a new corporate learning management system to provide a central location for all training and development
- introduction and expansion of customer and partner internet self-serve options such as booking appointments

A review of the Corporation's over 20 year old legacy systems is required. A multi-year legacy systems modernization project will be initiated, with a first year objective of assessing the current systems and establishing a strategy and roadmap.

2.1.4 Creating a Culture of Excellence

Manitoba Public Insurance is striving to create and renew a culture of excellence in an effort to attract, retain and motivate top talent. The company is focused on promoting, recognizing, managing performance and adopting industry best practices in linking performance to pay and rewards. This will be further enabled by building organizational capacity in developing leaders to set clear expectations, measuring performance and a reward mechanism that recognizes an individual's contribution while managing corporate fiscal responsibility.

2.1.5 Other Efforts

There are additional initiatives for 2018/19 such as:

- Accessibility Action Plan
- French Language Services Action Plan
- Compliance to New West Partnership Trade Agreement (procurement)

2.2 External Environment

Manitoba Public Insurance operates in a challenging and fast-changing external environment. Key relationships in this environment include the public and customers, government, the Public Utilities Board and our delivery partners (e.g. healthcare providers, brokers, repair shops and others).

2.2.1 New Light Vehicle Accreditation Agreement for March 2019

The Corporation will be negotiating a new agreement with Manitoba's collision repair industry, with the current agreement set to expire February 28, 2019. At over $300 million in claims per year, vehicle repair is a significant cost driver for MPI customers.

Major recent developments in physical damage claims include:

- Major changes to estimating under the Direct Repair program will continue in 2018, with a larger percentage of repair estimates to be conducted in repair shops in future.
- An administrative premium of $81 per job payable to qualifying Direct Repair shops will be in place from March 1, 2018 to February 28, 2019. Also in 2018, repair shops must have attained, or be substantially in process of attaining, their I-CAR Gold Class Professionals designation.
- Continuation of Paintless Dent Repair, an industry-standard method of removing dents from vehicle body panels. This cost-effective repair is particularly suited to damage seen in hail claims, and will continue in future.
- The Corporation's rodent strategy is proving successful and the reduction in rodent claims costs will continue.

2.2.2 Changing Vehicle Industry

The manufacture of automobiles is undergoing a dramatic shift, resulting in major changes to the repair industry. Lighter materials, such as aluminum, advanced high-strength steels, magnesium and carbon fibre, are increasingly being used in vehicle construction to reduce vehicle weight and improve fuel efficiency.

Vehicles routinely incorporate collision-avoidance and vehicle-control technologies to meet growing customer demand. Partially-autonomous driver-assistance technology is currently available in some vehicles on the market, and research and testing into fully autonomous vehicles continues to ramp up at several vehicle and technology companies.

The rapid pace of change will continue to evolve as more and more vehicles with complex materials and advanced electronic systems enter the market. We will continue to work with our collision repair industry partners in the best interests of Manitobans to ensure these vehicles are repaired properly and the anticipated cost increases are kept at industry averages.

2.2.3 New Broker Accord for March 2019

Negotiations for a new agreement to take effect in 2019 with Manitoba insurance brokers will present another key impact on the Corporation's operating environment. Known items to discuss include commission rates and increased online services from MPI.

2.2.4 Traffic Safety Culture

The Province's *Manitoba Road Safety Plan 2017-2020: Road to Zero* envisions Manitoba having the safest roads in Canada, and commits to one day achieving

zero traffic fatalities on our roadways. The Corporation fully supports the Road Safety Plan and its goals, and commits to working to change the traffic safety culture of Manitobans. We co-chair this plan with Manitoba Infrastructure and will design and deliver road safety education initiatives to complement the goals and objectives of the provincial plan.

2.2.5 Other Efforts

There are additional initiatives for 2018/19 such as:

- Development and continued refinement of an insurance rating framework for Transportation Network Companies and other authorized ride-share services
- Service and accessibility enhancements to northern and remote communities
- Prepare for legalization of recreational use of cannabis through proactive education and awareness campaigns to mitigate the potential impact to impaired driving-related collision, fatalities and injuries

2.3 Risks

2.3.1 Financial Losses from Weather or Investments

A key risk is the potential for financial loss, generally arising from weather-driven increases in claims from hail or winter accidents. An additional related risk is the depletion of financial reserves, which is possible from two years of bad losses in the investment portfolio or increases in claims as described above. To mitigate volatility, MPI will continue to incorporate reinsurance where appropriate and ensure reserves are adequate at the corporate level and the basic insurance product level. In regards to this risk, MPI is pleased with the recent PUB order regarding an upper and lower limit for MPI reserves.

2.3.2 Public Support

Another risk is a loss of public support. Causes could include increased rates as outlined above, and a lack of customer-centricity in MPI products or services (including a perceived lack of appeal options for unsatisfied customers). Mitigation includes renewing customer satisfaction measures within the Customer Experience Framework, settling claims in a fair and reasonable way, and ensuring appeal options are fair and are available within a reasonable timeframe.

2.3.3 Insurance Business Risk

The Corporation keeps watch on insurance technology developments and auto maker self-insurance models to mitigate potential risks from these areas.

2.3.4 Cyber Security

The risk of cyber-attack is also present, and the Corporation mitigates this risk by continuing IT security plans to defend from attack, including agreement on a new information security maturity level.

3.0 Performance Measures & Targets

These performance metrics have been newly established for MPI and will be evolving over 2018/19 as we change from the previous dials used for various public financial reporting.

MPI Performance Metrics					
Category	**Measure**	**Description**	**Actual 2016/17**	**Forecast 2017/18**	**Target 2018/19**
Customer	Customer Satisfaction Index	Track customer satisfaction over time	89%	89%	89%[1]
Financial	Net Premiums Earned	Net premiums earned	$1,130M	$1,194M	$1,276M
	Claims Incurred	Net claims incurred	$981M	$926M	$959M
	Corporate Claims Costs Ratio	Tracks claims costs from all lines of business as % of NPE	100.3%	91.4%	88.5%
	Investment Management	Net investment yield	6.9%	7.4%	5.0%
Operational Excellence	Expenses Excluding Claims Costs	Tracks operating expenses as % of NPE	10.8%	10.1%	9.7%
	Total FTE	Tracks all non-consultant FTE in MPI	1,923	1,917	1,903
Organization Health	Employee Engagement	Engagement score	73%	73%	75%
	Capital Adequacy	Minimum Capital Test:			
		- Basic	30%	30%	75-100%[2]
		- Extension	311%	498%	200%[3]
		- Special Risk Extension	349%	366%	300%[3]

Notes:

[1]MPI will conduct a review of our customer satisfaction metrics during the 2018/19 year.

[2]Target range of 75-100% is not anticipated to be reached by 2018/19; however, 100% is the appropriate target for MPI in a reasonable time.

[3]Minimum capital test for Extension and Special Risk Extension insurance lines are currently in excess of the minimum but within an acceptable range given overall MPI reserves and risks at this time. Therefore, MPI will not simply deploy this capital during 2018/19 to meet these minimum targets.

4.0 Financial Budgets & Forecasts

4.1 Statement of Operations

In thousands of Canadian dollars ($000's)	Actual for the year ended February 28, 2017	Budget for the year ending February 28, 2018	Forecast for the year ending February 28, 2018	Budget for the year ending February 28, 2019

Underwriting income (loss)	(181,839)	(114,982)	(73,733)	(38,620)
Investment income (loss)	96,635	120,600	149,627	97,605
Net income (loss) from operations	**(85,204)**	**5,618**	**75,894**	**58,985**

Note: for additional information on the financials of MPI, please refer to the 2016/17 Annual Report, found at www.mpi.mb.ca/en/PDFs/2016-Annual-Report.pdf

4.2 Key Planning Assumptions

Key assumptions include:

- Forecasts based upon data up to and including October 2017 month end
- The 2018/19 PUB Order
- The results of the October 31 Valuation of Policy Liabilities

- Flat interest rates over the entire forecast period based on October 2017 actuals
- MPI's current investment portfolio with one assumption change which is an increased allocation to corporate bonds from 4% to 18% in the final three quarters of 2018/19
- No significant changes to operations that would impact long term fleet growth, vehicle upgrade, or claims trends over the outlook period.

4.3 Sensitivity Analysis

Due to the nature of its business, MPI's primary risks relate to trends in claiming experience on its insured book of business and impacts on investment income stemming from fluctuations in the marketplace.

The following table depicts MPI's sensitivity to various scenarios stated on the basis of impact to net income.

Scenario Analysis - 2018/19 Budget Base to Scenario
Summary - CORPORATE
($000's)

Scenario	2018/19 Net Income	$ Change from Base Scenario	% Change from Base Scenario
1. 2018-19 Budget Base	58,985	0	0%
2. Collision Frequency +1%	54,443	-4,542	-8%
3. Collision Severity +1%	54,662	-4,323	-7%
4. Interest Rates +50 bps	54,050	-4,935	-8%
5. Interest Rates -50 bps	64,887	5,902	10%
6. 1-in-40 Adverse Winter Collision Frequency	18,527	-40,458	-69%
7. 1-in-40 Favourable Winter Collision Frequency	138,103	79,118	134%
8. 1-in-40 Adverse Hail [1]	30,551	-28,434	-48%
9. 1-in-40 Favourable Hail	75,392	16,407	28%
10. 1-in-40 Adverse Loss Ratio	-12,211	-71,196	-121%
11. 1-in-40 Favourable Loss Ratio	151,218	92,233	156%
12. 1-in-40 Decreasing Interest Rates [2]	54,546	-4,439	-8%
13. 1-in-40 Increasing Interest Rates [2]	65,273	6,288	11%
14. 1-in-40 Adverse Equities [3]	38,862	-20,123	-34%
15. 1-in-40 Favourable Equities [3]	85,119	26,134	44%

1. Hail: Assumed $15M retention and fully placed reinsurance coverage up to $267M based on current structure. Probable maximum loss (PML) as per Aon Benfield's use of RMS RiskLink 2017 modelling is $184M at a 1-in-50 year interval and $300M at a 1-in-100 year interval.

2. Interest Rates: +147 bps increase and -94 bps decrease to GOC 10 Year Bond. Assumed interest rate floor of 1.00%.

3. Equities: The results only include realized gains/losses. Adverse Scenario: -24.6% return and $131M in unrealized losses, Favourable Scenario: 45.5% return and $160M in unrealized gains.

5.0 Human Resources

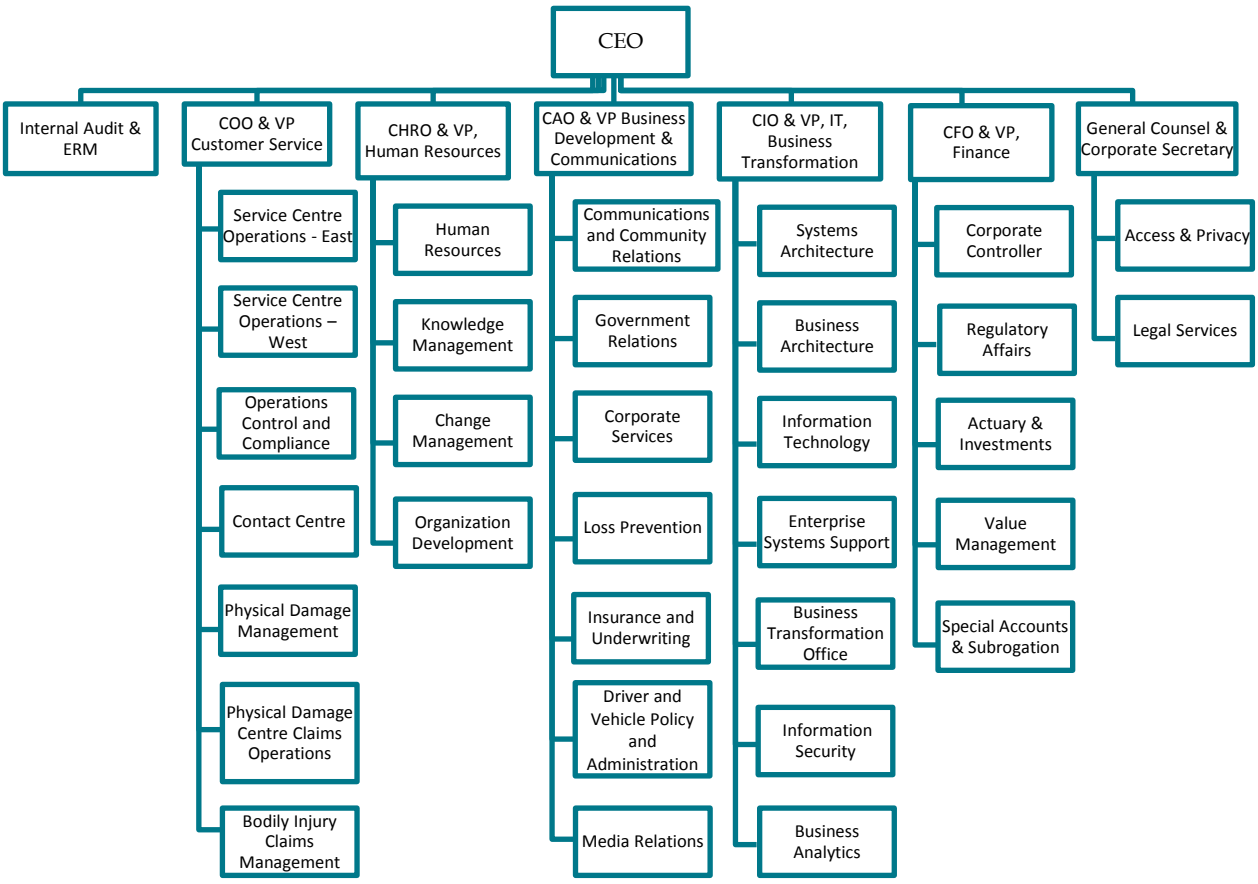
5.1 Full-Time Employees

	Actuals as at February 28, 2017	Revised Budget	Budget
	2016/17	2017/18	2018/19
Senior Management (1)	40.0	34.0	32.0
Management (2)	125.0	101.0	100.0
Employees (3)	1,757.9	1,781.9	1,770.5
Total	1,922.9	1,916.9	1,902.5

1. Senior Management - Executives & Directors
2. Management - Managers & Assistant Managers
3. Employees - Remaining employees not included in above

- 1,902 includes 1,874 from normal operations and 28 from improvement initiative and specialty programs

5.2 Organization Chart (as at February 2018)



5.3 Factors That May Affect Compensation and Staffing

The proposed 2018/19 plan includes 1,902 full-time employees (FTEs) with a total compensation budget of $173.9 million. The budget includes management reductions of 15 per cent from 2016/17 and staff reduction through improvement initiative efficiencies. Management continues to manage its FTE counts with a focus on operational efficiencies and vacancy management to ensure proper workforce composition to meet operational demands. This year's plan also includes a contractual obligation of 1.5 per cent general wage increase for the workforce.

6.0 Capital Plans

2018/2019 Capital Projects

(spend beyond 2018/19 is currently under review by MPI)

($000's)

	LTD Spend to February 28 2018	Budget 2018/19	Remaining Spend for Future Years	Total Forecast at Completion
Technology Risk Management	4,082	4,500	18,000	26,582

The goal of the Technology Risk Management is to implement projects that will keep existing technology in a stable and supported state and address other technology risk through process and technology improvements. Return on investment will be realized through risk reduction.

Finance Re-Engineering	343	500	13,117	13,960

The strategic objectives of the Finance Re-Engineering Project are:

- Provide timely access to accurate financial information
- Increase efficiency and effectiveness of financial processes and system integration
- Provide appropriate support to other Divisions within the Corporation to guide decision making

Customer Claims Reporting System (PDR Spinoff)	15,269	7,200	750	23,219

This project will introduce a new online claims first notice of loss (FNOL) customer self-service tool that is highly intuitive and user friendly. To ensure that a customer has a consistent customer service experience, the MPI contact centre process will also be modified to align to the customer self-service experience. These processes will be complemented by automated claims adjudication processing for common claim situations as well as eligible repair shop determination and shop appointment scheduling.

Legacy Systems Modernization Project	-	2,000	TBD	TBD

The first year objective of this project is to complete a multi-faceted assessment of our current legacy systems to determine if these systems can meet our future business objectives, capabilities and operational needs. The FY 18/19 assessment will then be utilized to establish a strategy, business case, financial analysis, and implementation roadmap and plan for Board of Directors review and approval in December 2018 prior to initiating the Legacy System Modernization program implementation.

Appendix 1: Long Tail Experience of PIPP Claimants

Provided Electronically

Attachment A: Actuary's Report as at October 31, 2017
Attachment B: Actuary's Report as at February 28, 2018
Attachment C: PWC Actuarial Support

EXTERNAL ACTUARY REVIEW OF POLICY LIABILITIES

This section presents the results of the review of policy liabilities for Basic as completed by the Corporation's Appointed Actuary. The Appointed Actuary signs off on two reviews annually – one as at October 31 and the other as at February 28/29.

This section is divided into three subsections. The first subsection presents the two Appointed Actuary reports for Basic for fiscal year 2017/18, as well as the review of these reports by the external auditors. The second subsection presents an analysis of the runoff. The third subsection presents the regression analysis by coverage for the selected trends used in the Actuary's Report as at February 28, 2018.

EAR.1 REVIEW OF POLICY LIABILITIES

The following three reports are provided electronically as:

- Attachment A: Actuary's Report as at October 31, 2017
- Attachment B: Actuary's Report as at February 28, 2018
- Attachment C: PWC Actuarial Support

EAR.2 ANALYSIS OF RUNOFF

Figure EAR- 5 shows the Basic total net runoff for fiscal year 2017/18 by coverage and insurance year. In total, Basic saw an unfavourable runoff of $33.7 million attributable to the following factors:

Figure EAR- 1: Sources of Runoff

Line No.	Changes	Favourable (Unfavourable) Runoff
1	Experience	(103,910,000)
2	Valuation Methodology	0
3	Valuation Assumptions	70,202,000
4	Total	(33,708,000)

EAR.2.1 Changes in Experience

Figure EAR- 6 shows the net runoff from changes in experience only for fiscal year 2017/18 by coverage and insurance year. The unfavourable runoff of $103.9 million was determined by undoing all changes made to the valuation methodology and valuation assumptions.

Figure EAR- 6 indicates significant unfavourable runoff for Accident Benefits – Weekly Indemnity and significant favourable runoff for Accident Benefits – Other (Indexed). This is driven primarily by the introduction of centralized reserving. A dedicated team was set up specifically to ensure proper reserving for long-term PIPP claims. The team was tasked with regularly updating PIPP reserves based on established reserving guidelines.

The team completed a review of all PIPP claims older than 24 months to ensure that case reserves for these claims were adequate to cover claimants' long-term entitlement to PIPP benefits based on established reserving guidelines. As a result, the case reserves were increased significantly for Accident Benefits – Weekly Indemnity, and reduced significantly for Accident Benefits – Other (Indexed).

The following table compares actual reported to expected reported for fiscal year 2016/17 for insurance years 2000/01 to 2016/17.

Figure EAR- 2: Comparison of Actual Reported to Expected Reported

Line No.	Coverage	Actual Reported	Expected Reported	Variance
1	Accident Benefits – Weekly Indemnity	$150,271,000	$63,211,000	$87,060,000
2	Accident Benefits – Other (Indexed)	($2,715,000)	$19,728,000	($22,443,000)

Accident Benefits – Other (Non-Indexed) shows unfavorable runoff attributable mainly to 2015/16 and 2016/17. Actual reported losses for these years came in higher than expected.

Figure EAR- 6 also indicates favourable runoff for Comprehensive attributable mainly to the favourable runoff for 2016/17. Actual reported losses for this year came in better than expected. The favourable runoff for PIPP Enhancement is attributable to lower than expected number of catastrophic claimants.

EAR.2.2 Changes to the Valuation Methodology

There were no changes made to the valuation methodology for fiscal year 2017/18.

EAR.2.3 Changes to the Valuation Assumptions

Changes made to the valuation assumptions which contributed to the runoff are as provided in the following table. The runoff presented in the following table are based on the February 28, 2018 Actuarial Report.

Figure EAR- 3: Impact on Runoff from Changes in Valuation Assumptions

Line No.	Change	Rationale	Favourable (Unfavourable) Runoff
1	Changes to the loss development factors:		
2	• Accident Benefits – Weekly Indemnity		$27,266,000
3	• Accident Benefits – Other (Indexed)	Note 1	($829,000)
4	• All other coverage		($1,700,000)
5	Change in the "Selected IBNR" for insurance year 2013/14		
6	• Accident Benefits – Weekly Indemnity	Note 2	$8,910,000
7	• Accident Benefits – Other (Indexed)		$11,855,000
8	Change in the "Selected IBNR"		
9	• Accident Benefits – Weekly Indemnity	Note 3	$14,967,000
10	• Accident Benefits – Other (Indexed)		$9,734,000
11	Total Valuation Assumptions		$70,202,000
12	Note 1: Changes to the loss development factors by coverage are documented in the respective appendices in the February 28, 2018 Actuarial Report. Loss development factors are revised annually to reflect recent experience. Refer also to the October 31, 2017 Actuarial Report, Pages 6 and 7		
13	Note 2: The "Selected IBNR" was revised from the higher of the Incurred Bornheutter-Ferguson (BF) Method or Paid BF Method to the Incurred BF Method. This is a normal transition based on the prior methodology.		
14	Note 3: Refer to the October 31, 2017 Actuarial Report, Page 7		

EAR.2.4 Restating to Current Benefit Levels

The runoff figures for the two indexed coverages, namely Accident Benefits - Weekly Indemnity and Accident Benefits - Other (Indexed), were derived based on estimated ultimate losses restated to current benefit levels.

For Accident Benefits - Weekly Indemnity, paid losses restated to current benefit levels, as presented in *Attachment B Actuarial Report as at February 28, 2018 Appendix E, page 12*, were added to the unpaid losses from prior year-end valuations restated to current benefit levels. The following table presents an example of this calculation. Estimated ultimate losses restated to current benefit levels, for the six most recent year-end valuations, are presented in *Attachment B Actuarial Report as at February 28, 2018 Exhibit 3, Sheet 11*.

Figure EAR- 4: Estimated Ultimate Losses – February 2017 Valuation

Line No.	Insurance Year	Paid Losses Restated	Estimated Unpaid Losses	Unpaid Losses Restated	Estimated Ultimate Losses
1	*($000)*				
2	**[a]**	[b]	[c]	[d]	[e]
3	**2012**	36,285	39,223	39,733	76,018
4	**2013 [f]**	28,685	52,274	52,954	81,639
5	**2014**	20,118	53,372	54,066	74,184
6	**2015**	19,673	51,139	51,804	71,476
7	**2016**	9,597	55,492	56,213	65,811
8	[b] Actuarial Report as at February 28, 2018 Appendix E, Page 12				
9	[c] Actuarial Report as at February 28, 2017, Exhibit 2, Sheet 5				
10	[d] = [c] * 1.0130				
11	[e] = [b] + [d]				
12	[f] Paid Losses Restated was reduced by ceded paid of 103				

A similar calculation was done for Accident Benefits - Other (Indexed), using paid losses restated to current benefit levels, as presented in *Attachment B Actuarial Report as at February 28, 2018 Appendix F, page 17*, added to the unpaid losses from prior year-end valuations restated to current benefit levels. Estimated ultimate losses restated to current benefit levels, for the six most recent year-end valuations, are presented in *Attachment B Actuarial Report as at February 28, 2018 Exhibit 3, Sheet 12*.

Appendix 1: LONG TAIL EXPERIENCE OF PIPP CLAIMANTS

1 PUB Order

The PUB stated the following in Order 130/17, directive 11.10:

> *In the 2019 GRA, MPI shall report back on its efforts to seek insight on longer tail experience from other jurisdictions, and in particular from the Société de l'assurance automobile du Québec.*

In response to this order, MPI contacted both Saskatchewan Government Insurance (SGI) and the Société de l'assurance automobile du Québec (SAAQ) and requested their paid loss triangles for Income Replacement benefits for the entire history of their public insurance programs. Both jurisdictions kindly provided the requested information and gave MPI permission to share this information with the Manitoba Public Utilities Board.

2 MPI's Current Forecasting Methodology for Long Tail Income Replacement Claims

MPI uses the methodology described below for forecasting the payment patterns on long-tail income replacement claims. MPI defines long-tail claims as those claims that remain active beyond 10 years of development. MPI firmly stands behind this methodology as the most appropriate way to ensure the valuation reflects best estimate assumptions while also being responsive to trends in termination rates or claimant behavior.

Forecasting Methodology for Long Tail Income Replacement Claims

1. Book lifetime tabular case reserves for all active income replacement claims (i.e. claims currently receiving payments) beyond 60 months of development. If a claimant is not receiving income replacement benefits after 60 months, there is no lifetime case reserve.

2. For all development periods where there are at least 5 observations, select the best estimate loss development factor based on the observed experience.

3. Adjust the tabular reserve estimates based on the actual observed development of the tail experience.

4. Annually monitor the performance of the mortality assumptions to ensure that the tabular reserving assumptions continue to be appropriate, while recognizing the adjustments that have been made to the tabular assumptions based on observed experience.

How does the current MPI methodology handle retirement income benefits?

The tabular reserving methodology assumes that all lifetime claimants will receive full retirement income benefits. However, the reality is that claimants (on average) will receive less than this amount because of other sources of income (e.g. pension income). This reserving assumption would appear to be a source of conservatism, but it is not. If there is a favourable development bias in the case reserving methodology then the income replacement forecast should see favourable development over time as claimants convert to receiving retirement income benefits. The long-tail forecasting methodology correctly handles this reality by actively adjusting the tabular reserving estimates based on the actual development experience of claimants. If there is a favourable development bias in the tail estimates, then the methodology will automatically adjust the tabular estimates over time to reflect the expectation of favourable development.

How does the current MPI methodology handle relapse claims?

The tabular reserving methodology assumes that no case reserve is required beyond 10 years of development if the claim is closed or not actively receiving benefit payments. This reserving assumption would appear to be a source of under-estimation because the reality is that MPI does have relapse claimants. However, this is not the case. If there is an unfavourable development bias in the reserving methodology (i.e. understating the impact of relapse claims) then the income replacement forecast

should see unfavourable development over time. The long-tail forecasting methodology automatically adjusts the tabular estimates over time to reflect the expectation of unfavourable development.

How has the current MPI methodology played out so far?

The table below shows the average observed incurred development factors for income replacement claims beyond 10 years of development. If MPI forecasting assumptions were perfectly accurate, then the expectation would be a loss development factor of 1.000 (i.e. estimated ultimate incurred remains the same as the previous year); if there is a net favourable bias from mortality or retirement income benefits then the development factors will be less than 1.000; if there is a net unfavourable bias from mortality or relapse claims then the development factors will be greater than 1.000.

12	2005	1.000	1.028	0.993											
13	2006	1.008	1.020												
14	2007	1.010													
15	Average	0.986	0.984	0.990	1.002	0.997	1.009	1.010	1.007	1.008	1.011	0.998	1.021	1.002	1.007
16	Average of all Observed-to-Date Factors					1.003									

As shown in the table above, the experience to-date has tracked very closely to 1.000 (actual = 1.003). This means that on-average the observed development of long term income replacement claims has been unfavourable by an average of 0.3% per year relative to the tabular reserving estimates. However, MPI has responded to this observed experience by reflecting the unfavourable development in the selection of its tail loss development factors and tabular reserving estimates. Based on the MPI observed experience, there is no evidence that MPI is overstating or understating its

tail loss development experience. MPI continues to modify its assumptions to reflect best estimates in each valuation.

3 Income Replacement Data from SAAQ and SGI

Income replacement valuation data was requested from SAAQ and SGI due to the assumed consistency of income replacement data between jurisdictions. Each of the public programs has a variety of injury benefits, and income replacement was seen as a standard coverage that could be easily compared between jurisdictions, specifically in the tail of the development patterns (i.e. 120 months of development or longer). Although very similar, the income replacement benefits in each jurisdiction, and their treatment in the associated actuarial valuations, are not identical. MPI has not conducted an analysis of the coverage, reserving, claims handling, or claims composition differences in each jurisdiction as part of this review.

4 Analysis

4.1 Comparison of observed paid development factors

Due to the differences between each jurisdiction, it would be incorrect to draw conclusions about tail development by simply comparing the paid development factors between the three jurisdictions. That said, we will start by comparing the observed paid loss development factors to determine the differences that exist between the actual experience in each jurisdiction. The table below shows the paid development factors in 12 month intervals in table and graphical form. The gray cells are MPI's current forecasted paid development factors based on the February 2018 valuation.

Figure EAR App 1- 2: Paid Development Factors – All Years Averages
Uses the adjusted paid loses

Line No.		MPI	SGI	SAAQ	Correlations

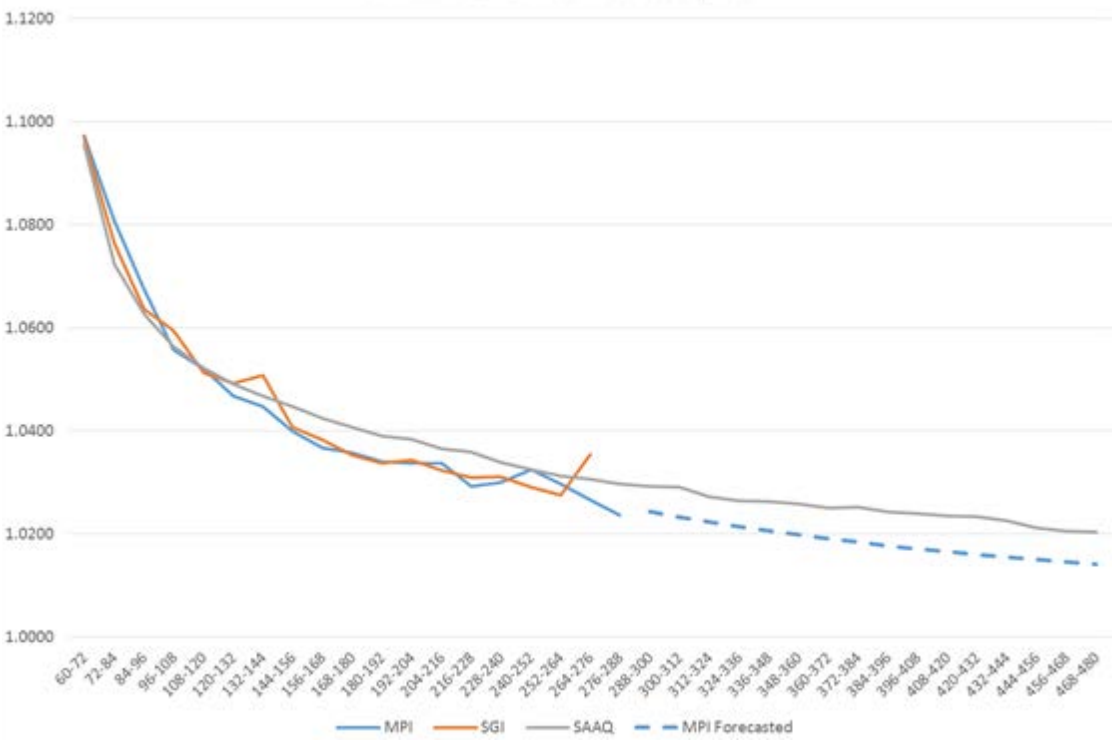
36	468-480	1.0140		1.0204		

Figure EAR App 1- 3: Income Replacement Paid Loss Development Factors by Company – 60 months to 480 months of development



4.2 Findings

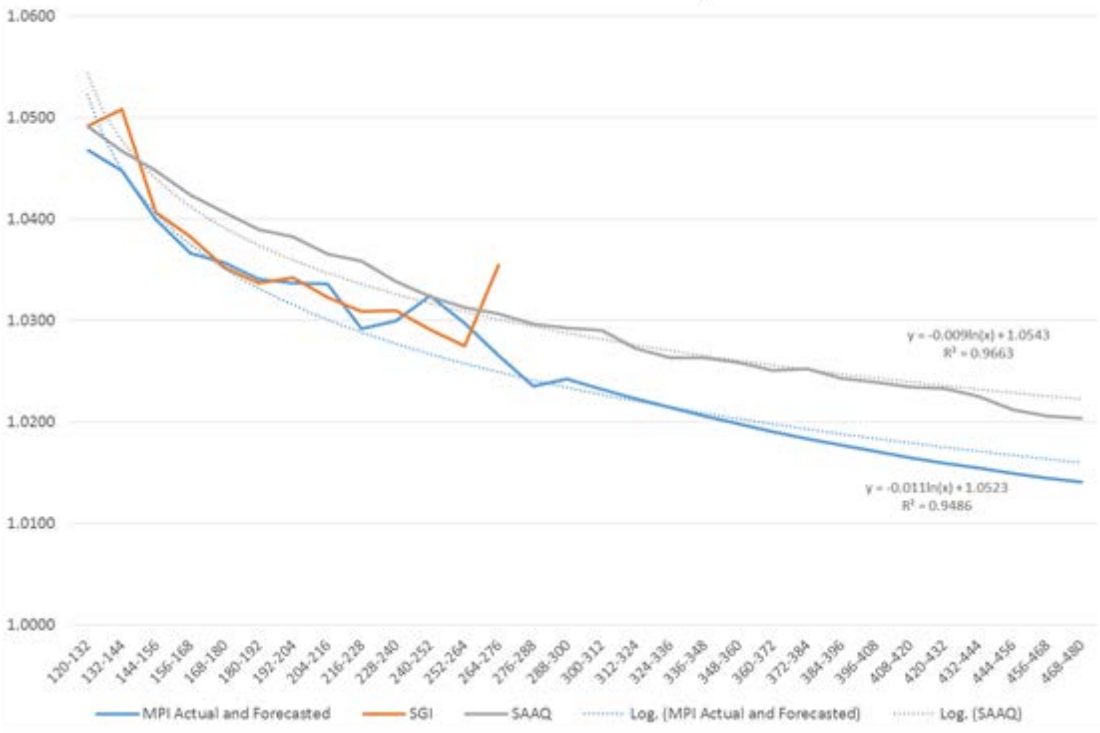
The observed paid development factors between jurisdictions are highly consistent as the correlation between MPI/SAAQ and MPI/SGI data sets are both over 0.98. On average, MPI has consistently lower observed tail development factors than SAAQ and has almost identical tail development factors as SGI.

Each jurisdiction selects their paid development factors based on their own experience. Simply comparing selected tail development factors is not instructive. Based on the above table, all of MPI's development factors for 120 months and after, determined based on actual experience, are lower than the corresponding factors for SAAQ. As a result, MPI's forecasted tail development factors will naturally be lower than SAAQ. It would be incorrect to say that MPI is understating its future tail

development risk because SAAQ has higher paid loss development factors in the tail period than MPI.

The more relevant comparison between MPI and SAAQ paid development experience is the trend in the paid development beyond MPI's observed experience. The graph below has been updated to reflect MPI's actual and projected paid development experience beyond 120 months. As shown in the graph, MPI is currently projecting a paid development trend line that is almost identical to SAAQ, despite not having shared any valuation data.

Figure EAR App 1- 4: Income Replacement Paid Loss Development Factors by Company – 120 months to 480 months of development



5 Conclusions

Based on this analysis, MPI has concluded the following:

- MPI has a well-established, effective, and transparent methodology for selecting its tail factors for Income Replacement coverage.
- MPI's long-tail experience cannot be directly compared to the long tail experience at SGI or SAAQ in absolute terms because of differences in coverage, reserving practices, and other potential unknown factors (e.g. environmental, claims handing, claims composition, etc.). However, after consideration of the observed-to-date differences in the data, MPI's experience behaves very similar to SGI and SAAQ. The observed correlations between the data sets are very high (>.98) and the trends in MPI's paid development assumptions are almost identical to that of SAAQ.
- While a jurisdictional comparison is informative, MPI does not see any value in changing its current long-tail reserving process. A more beneficial use of the jurisdictional comparison would be to use this information to model policy liability misestimation risk as part of the DCAT exercise.

May 17, 2018

Mr. Mark Giesbrecht
Chief Financial Officer
Manitoba Public Insurance Corporation
912 – 234 Donald St.
Winnipeg, Manitoba R3C 4A4

Re: Manitoba Public Insurance – Universal Compulsory Automobile Insurance Policy Liabilities as of February 28, 2018

Dear Mr. Giesbrecht,

This letter, opinion and attached exhibits provide an update to our Appointed Actuary Report as of October 31, 2017 using data as of February 28, 2018 for Manitoba Public Insurance – Universal Compulsory Automobile Insurance. All comments, caveats, limitations and explanations contained in our October 31, 2017 report continue to apply unless noted in this letter.

This update to our previous report adds four additional months experience. We reviewed our methodologies and assumptions used in our October 31, 2017 report. For claim liabilities, our discount rate has changed from 3.35% to 3.47% (1.32% to 1.44% for indexed benefits). For premium liabilities, our discount rate has changed from 0.97% to 1.10% (1.32% to 1.44% for indexed benefits). These changes were made to reflect an increase in the portfolio yield from October 31, 2017 to February 28, 2018.

All other previous methodologies and assumptions used to estimate the policy liabilities remain appropriate.

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC.

Based on the results of this valuation, the net claims development, excluding ILAE, from February 28, 2017 is as follows:

BASIC ($000)	Unpaid claims @ 2/28/2017*	Paid in fiscal year 2017/18	Unpaid claims @ 2/28/2018	Favourable development (adverse development)
Undiscounted	1,591,404	272,554	1,343,280	(24,430)
Actuarial Present Value	1,620,081	272,554	1,320,283	27,244

*Unpaid claims as of February 28, 2017 are indexed to the current benefit levels.

The updated Expression of Opinion follows this letter.

We are not aware of any event subsequent to February 28, 2018 which would have a significant impact on the claims liabilities.

If you have any questions, please do not hesitate to call me.

Yours truly,

Joe S. Cheng

JSC/pl

J. S. CHENG & PARTNERS INC.

EXPRESSION OF OPINION

To the Directors of Manitoba Public Insurance Corporation:

I have valued the Automobile Insurance Division – Universal Compulsory Automobile Insurance policy liabilities and reinsurance recoverables of Manitoba Public Insurance Corporation for its statement of financial position at February 28, 2018 and their change in the statement of income for the year then ended in accordance with accepted actuarial practice in Canada including selection of appropriate assumptions and methods.

In my opinion, the amount of policy liabilities net of reinsurance recoverables makes appropriate provision for all policy obligations and the financial statements fairly present the results of the valuation.

The results of my valuation are as follows:

Claims Liabilities	Appointed Actuary's Estimate $000's
(1) Direct unpaid claims and adjustment expenses:	1,796,730
(2) Assumed unpaid claims and adjustment expenses:	0
(3) Gross unpaid claims and adjustment expenses:	1,796,730
(4) Ceded unpaid claims and adjustment expenses:	1,270
(5) Net unpaid claims and adjustment expenses (3)-(4):	1,795,460

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC.

Premium Liabilities	Appointed Actuary's Estimate $000's
(1) Gross policy liabilities in connection with unearned premiums:	472,051
(2) Net policy liabilities in connection with unearned premiums:	477,458
(3) Gross unearned premiums carried by the Corporation:	468,613
(4) Net unearned premiums carried by the Corporation:	468,613
(5) Premium deficiency:	8,845
(6) Deferred policy acquisition expenses carried by the Corporation:	0
(7) Maximum policy acquisition expenses deferrable [(4)+(5)] – (2) :	0

DISTRIBUTION AND USE

This report contains confidential information about MPI. It does not deal with the future financial condition or rate adequacy of MPI. Its sole purpose is to provide an opinion on the appropriateness of the Automobile Insurance Division – Universal Compulsory Automobile Insurance policy provisions for Manitoba Public Insurance Corporation as at February 28, 2018. The report is neither intended nor necessarily suitable for any other use.

This report may be distributed to the regulator in the jurisdiction where the Corporation operates. Furthermore, the Corporation may distribute this report to its external auditor.

It is our understanding that this report is also filed annually with MPI's General Rate Application, which is a public document. Nevertheless, any party other than the ones named in paragraph two should be considered as a third party.

Where the report is disclosed, it should be provided in its entirety.

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC.

VARIABILITY OF ACTUARIAL ESTIMATES

There is a limitation upon the accuracy of claim liabilities as there is an inherent uncertainty in any estimate of claim liabilities. This inherent uncertainty is present because future events could affect the ultimate claim settlement. Some examples of future events are:

1. High/low inflation
2. High/low investment return
3. High/low termination rate
4. Increase/decrease in benefit levels (other than regular indexation)
5. Introduction of new benefits applicable to all insurance years

Therefore, one must acknowledge that the actual ultimate claim amount may differ materially from our estimates. We have employed standard actuarial techniques and appropriate assumptions. In our judgment, the conclusions presented in this report are best estimates, given the information available while performing the valuation.

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC.

SCOPE OF THE REPORT

The scope of this report is limited to the Universal Compulsory Automobile Insurance (Basic Insurance). We were asked to:

1. Estimate the unpaid claims on a gross, ceded and net basis as of the valuation date.
2. Estimate the premium liabilities on the unearned premium as of the valuation date.
3. Determine the maximum allowable deferred policy acquisition expense.

All valuations were done as of February 28, 2018.

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC.

DATA AND RELIANCE

We relied on the gross and net case incurred (loss and allocated loss adjustment expense paid plus case reserve), and loss and allocated loss adjustment expense payments by insurance year as provided by MPI.

Premium figures were provided by MPI. They included both earned premium and unearned premium.

All data is as at February 28, 2018. We have used the work of PricewaterhouseCoopers LLP ("PwC"), the external auditor for MPI, to verify the valuation data against the Corporation's records.

We did not audit the claims and premium data, but a reconciliation was performed to ensure that no material data was omitted (see Appendix H).

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC.

STANDARD OF MATERIALITY

The Corporation's financial statement items for Basic Insurance are as follows:

Item	Amount $000	%	Threshold $000
2017/18 Net Unpaid Claims	1,795,460	0.5	8,977
Selected materiality for October 31, 2017 valuation			5,000
Auditor's materiality for MPI			14,400
Basic Insurance unpaid claims / Total MPI's unpaid claims			94.5%
This year's selected materiality			5,000

For the purpose of this valuation, an omission or inexplicable difference of $5,000,000 or about 0.3% of the net unpaid claims would be considered as material.

However, this does not imply that the actuary's provision is accurate within 0.3%. In fact, the future claim payment could be significantly different from the actuary's provision due to adverse/favourable claim development as noted in the Variability of Actuarial Estimates section.

Notes:
(2) - Per comment in Page 19: 216-Ult Factor = 1.0175 ^ 17
(3), (4) & (5) - Assuming Paid at 192 Months of 1,000
(14) = (12) / [(6) * (1 + Discount Rate Without Margin) ^ 0.5]
(15) = (13) / [(7) * (1 + Discount Rate With Margin) ^ 0.5]
[a] Assuming the Paid in Period is paid in the middle of the period:
Discount Rate Without Margin 1.44%
Discount Rate With Margin 0.94%
[b] As at 192 months
[c] Represents the discounting of the remaining unpaid at the beginning of the period back to the beginning of the period.
For example, the discount factor for the period 300-312 represents the remaining unpaid at 300 months discounted back to 300 months.

Estimate of Liabilities Including Provision for Adverse Deviation (Direct & Agency)
As of February 28, 2018

PE Exhibit 4
Sheet 1

PIPP Enhancement: Quality of Life Enhancements

	215	Catastrophic claimants (PE Appendix G, Column 8)
	54	Paneled; Assume 25% of catastrophic claimants
	161	Remaining catastophic claimants

I) Cottage Modifications

	35,000	Manitobans with cottages
	1,200,000	Total Manitobans
	2.92%	Percent of Manitobans with cottages
	5	Expected number of cottages requiring modifications; 161 x 2.92%
$	150,000	Expected cost per cottage
$	**750,000**	**Estimated Ultimate Claims - Cottage Modifications**

II) Attendant Care (for Work)

		Per claimant cost:
$	20	Cost per hour
	8	Hours per day (above PCA and Home Care)
	240	Expected number of working days per year
$	38,400	Total per claimant cost per year
	20	Expected working life (in years)
$	768,000	Total expected per claimant cost
	1	Expected number of claimants utilizing benefit
$	**768,000**	**Estimated Ultimate Claims - Attendant Care**

III) Activity Cost

		Per claimant cost:
$	2,000	Total per claimant cost per year
	25	Expected life (in years)
$	50,000	Total expected per claimant cost
	40	Expected number of claimants utilizing benefit; 161 x 25.00%
$	**2,000,000**	**Estimated Ultimate Claims - Activity Cost**

$	**3,518,000**	**Estimated Ultimate Claims - All Cost [(I) + (II) + (III)]**	(a)
$	742,007	Paid	(b)
$	1,350,366	Case Reserves	(c)
$	2,092,373	Reported	(d)
$	1,425,627	Estimated IBNR [(a) - (d)]	(e)
$	2,775,993	Estimated Unpaid Claims [(c) + (e)]	(f)
	86.01%	Discount Factor With Margin [PE Exhibit 2, Sheet 2, Column 3]	(g)
	79.89%	Discount Factor Without Margin [PE Exhibit 2, Sheet 2, Column 4]	(h)
$	2,387,627	Discounted Unpaid With Margin [(f) x (g)]	(i)
$	2,217,721	Discounted Unpaid Without Margin [(f) x (h)]	(j)
$	169,906	Interest PFAD [(i) - (j)]	(k)
	12.07%	Claims Development Margin [PE Exhibit 2, Sheet 2, Column 8]	(l)
$	267,624	Claims Development PFAD [(j) x (l)]	(m)
$	**2,655,251**	**CIA Rules Unpaid Claims [(j) + (k) + (m)]**	(n)
$	**1,304,885**	**Required IBNR [(n) - (f) + (e)]**	(o)

2016	60	222,600	13	95,758	3	42,879	11	419,725	227,924
2017	60	222,600	13	95,758	3	42,879	12	424,269	230,197
Total	860	3,051,222	252	1,856,178	101	1,443,579	215	7,492,436	4,063,767

Notes:
Mild - Permanent Impairment 20% or greater but less than 50%; Maximum allowance = $250/Year
Moderate - Permanent Impairment 50% or greater but less than 70%; Maximum allowance = $500/Year
Severe - Permanent Impairment 70% or greater; Maximum allowance = $1,000/Year
Catastrophic - Special category; Maximum allowance = $2,000/Year
(3), (5), (7), & (9) - Based on assumption that claimants will use up the maximum allowance
(10) - Based on expected uptake of 5% for Mild, Moderate and Severe, and 50% for Catastrophic

INTRODUCTION

Corporation:	Manitoba Public Insurance Corporation
Purpose:	To provide an opinion on the policy provision for the Basic Insurance.
Valuation Date:	October 31, 2017
Author:	Joe S. Cheng, F.C.I.A.
Address:	1500 Don Mills Road, Suite 706, Toronto, Ontario, Canada M3B 3K4
Telephone:	(416) 510-8360
Fax:	(416) 510-8359
E-mail Address:	jscp@jscp.com
Position:	Appointed Actuary of Manitoba Public Insurance Corporation

EXECUTIVE SUMMARY

J. S. Cheng & Partners Inc. ("JSCP" or "we") has been appointed by the Board of Directors of Manitoba Public Insurance Corporation ("MPI" or "the Corporation") to conduct a policy liability valuation as of October 31, 2017. JSCP was engaged by MPI to provide an opinion on the policy provision for Universal Compulsory Automobile Insurance. The valuation was performed under the direction of Mr. Joe Cheng, FCIA.

The purpose of this report is to provide an opinion on the appropriateness of the Automobile Insurance Division – Universal Compulsory Automobile Insurance (Basic Insurance) policy provisions for the Manitoba Public Insurance Corporation as at October 31, 2017.

Our policy liability valuation has resulted in a release[1] of $35.3 million. The following tables break down the release (increase) by claim liabilities and by the change in deferred policy acquisition expenses write-down and premium deficiency.

Net Claim Liabilities (All figures in $'000)	Indicated [a]	MPI Carried Before Review	Release (Increase)
1) Accident Benefits	302,138	317,885	15,747
2) Other than Accident Benefits	49,544	57,808	8,264
3) All lines excluding PIPP Enhancement (1) + (2)	351,682	375,693	24,011
4) PIPP Enhancement	42,590	45,855	3,265
5) Internal Loss Adjustment Expense	174,244	181,128	6,884
6) Total Actuarial Liabilities [b]	**568,516**	**602,676**	**34,160**
7) Case Reserves Outstanding	1,252,919	1,252,919	0
8) Total Claim Liabilities [c]	**1,821,435**	**1,855,595**	**34,160**

[a] (1), (2), (4), (5) & (7) per Exhibit 1

[b] Sum of (3) to (5)

[c] Sum of (6) to (7)

[1] A release occurs when the booked value is greater than the indicated value (the result of the valuation) which leads to a decrease in the booked value to match the indicated value.

(All figures in $'000)	Indicated [a]	MPI Carried Before Review	Release (Increase)
9) Deferred Policy Acquisition Expenses (DPAE)	30,759		
10) Maximum Permissible DPAE	0		
11) DPAE Write-down	**30,759**	**29,692**	**-1,067**
12) Premium Deficiency	**4,677**	**6,844**	**2,167**

Total	**35,260**

Major changes in the policy liability valuation are summarized below:

Loss Development Factors

We reviewed the loss development factors and seasonality adjustment factors. The following is a list of changes made and the associated impact on the actuarial present value (APV) unpaid claims:

- We revised the loss development factors for Bodily Injury to reflect recent experience. Impact: Decrease of $0.2 million.
- We revised the loss development factors for Property Damage to reflect recent experience. Impact: Increase of $1.0 million.
- We revised the loss development factors for Collision to reflect recent experience. Impact: Decrease of $1.1 million.
- We revised the loss development factors for Comprehensive to reflect recent experience. Impact: Increase of $2.9 million.
- We revised the loss development factors for Accident Benefits – Weekly Indemnity to reflect the changes in reserving approach and recent experience. In respect of the reserving approach, MPI revised its reserving process for long-term PIPP claims in 2017, which increased the case reserves for insurance years older than 24 months. Therefore, we lowered the loss development factors to avoid overstating the provision for incurred but not reported claims. Impact: Decrease of $30.7 million.

- We revised the loss development factors for Accident Benefits – Other (Indexed) to reflect the changes in reserving approach and recent experience. Impact: Decrease of $0.5 million.
- We revised the loss development factors for Accident Benefits – Other (Non-Indexed) to reflect recent experience. Impact: Increase of $1.7 million.

In summary, the changes to the loss development factors resulted in a decrease in APV unpaid claims of $31.7 million, including a decrease of $4.9 million in internal loss adjustment expense ("ILAE").

Methodology for Selecting Provision for Incurred But Not Reported (IBNR)

We reviewed the methodology for selecting provision for IBNR. The following is a list of changes made and the associated impact on the APV unpaid claims:

- For Accident Benefits – Weekly Indemnity and Accident Benefits – Other (Indexed), we selected the IBNR based on the higher of the Incurred Bornhuetter-Ferguson method and Paid Bornhuetter-Ferguson method for the most recent three years (Insurance Years 2015-2017) instead of the most recent four years as in last year's report. In 2017, MPI revised its reserving process for long-term PIPP claims by centralizing the process to a dedicated team. The team completed a review of all PIPP claims older than 24 months, ensuring that case reserves are adequate to cover claimants' long-term entitlement to PIPP benefits based on established reserving guidelines. As a result, the case reserves were increased significantly in 2017, which reduces the uncertainty of the case reserve levels. (PIPP claims incurred, excluding the current loss year, was $81 million over budget as of October 31, 2017) Therefore, for this valuation, we decided to reduce the number of years that uses the higher of the incurred BF method and Paid BF method to the most recent three years only. Impact: $25.5 million decrease in APV unpaid claims, including a decrease of $4.0 million in ILAE.

Change in Interest Rates

We reviewed the methodology for selecting discount rate used to derive the APV unpaid claims and premium liabilities. The following is a list of changes made and the associated impact on the APV unpaid claim and premium liabilities:

- We switched from duration adjusted yield to market value weighted yield in selecting the discount rate. The Corporation's asset liability management policy strives to minimize the impact to its income statement due to a change in market interest rates. This change was made to reduce the mismatch between the Corporation's assets and liabilities from fluctuations in market yield.

- We selected a different discount rate for unpaid claims and premium liabilities. This change was made to recognize the difference in the duration of unpaid claims and premium liabilities, and the market yields of the investment portfolio used to support these liabilities.

Discount rate for unpaid claims	2/28/2017 Appraoch	10/31/2017 Approach
Non Indexed Lines		
- Nominal Rate	3.21%	3.35%
Indexed Lines		
- Real Rate (Adj. for 2% Inflation)	1.19%	1.32%

Discount rate for premium liabilities	2/28/2017 Appraoch	10/31/2017 Approach
Non Indexed Lines		
- Nominal Rate	3.21%	0.97%
Indexed Lines		
- Real Rate (Adj. for 2% Inflation)	1.19%	1.32%

In summary, the changes in discount rate resulted in a decrease in APV unpaid claims of $25.6 million and an increase in premium liabilities of $3.8 million.

Margin for Adverse Deviation (MfAD)

Given that most weekly indemnity claims older than 24 months are now tabular reserved for life, as a result of centralized reserving, and the only claims development risk is improvement on mortality, we decided to reduce the claims development MfAD for Accident Benefits – Weekly Indemnity from 15.0% to 10.0% for all claims older than 2 years. We also decreased the claims development MfAD for Accident Benefits – Other (Indexed) from 15.0% to 10.0% for all claims older than 10 years. Impact: Decrease of $31.6 million in APV unpaid claims, including a decrease of $3.1 million in ILAEs.

Subsequent Event

Since the date of this opinion, I am not aware of any subsequent event that would materially affect the results of my valuation.

DISTRIBUTION AND USE

The report contains confidential information about MPI. It does not deal with the future financial condition or rate adequacy of MPI. Its sole purpose is to provide an opinion on the appropriateness of the Automobile Insurance Division – Universal Compulsory Automobile Insurance policy provisions for Manitoba Public Insurance Corporation as at October 31, 2017. The report is neither intended nor necessarily suitable for any other use.

This report may be distributed to the regulator in the jurisdiction where the Corporation operates. Furthermore, the Corporation may distribute this report to its external auditor.

It is our understanding that this report is also filed annually with MPI's General Rate Application, which is a public document. Nevertheless, any party other than the ones named in paragraph two should be considered as a third party.

Where the report is disclosed, it should be provided in its entirety.

VARIABILITY OF ACTUARIAL ESTIMATES

There is a limitation upon the accuracy of claim liabilities as there is an inherent uncertainty in any estimate of claim liabilities. This inherent uncertainty is present because future events could affect the ultimate claim settlement. Some examples of future events are:

1. High/low inflation
2. High/low investment return
3. High/low termination rate
4. Increase/decrease in benefit levels (other than regular indexation)
5. Introduction of new benefits applicable to all insurance years

Therefore, one must acknowledge that the actual ultimate claim amount may differ materially from our estimates. We have employed standard actuarial techniques and appropriate assumptions. In our judgment, the conclusions presented in this report are best estimates, given the information available while performing the valuation.

J. S. CHENG & PARTNERS INC.
JSCP
ACTUARIES Who Care™

SCOPE OF THE REPORT

The scope of this report is limited to the Universal Compulsory Automobile Insurance (Basic Insurance). We are asked to:

1. Estimate the unpaid claims on a gross, ceded and net basis as of the valuation date.
2. Estimate the premium liabilities on the unearned premium as of the valuation date.
3. Determine the maximum allowable deferred policy acquisition expense.

All valuations are done as of October 31, 2017.

DATA AND RELIANCE

We relied on the gross and net case incurred (loss and allocated loss adjustment expense paid plus case reserve), and loss and allocated loss adjustment expense payments by insurance year as provided by MPI.

Premium figures were provided by MPI. They included both earned premium and unearned premium.

All data is as at October 31, 2017. We have asked PricewaterhouseCoopers LLP (PWC), the external auditor for MPI, to verify the valuation data against the Corporation's records. We expect to receive PWC's report before the statement of financial position as of February 28, 2018 is finalized. The data utilized in this report is unaudited.

We did not audit the claims and premium data, but a reconciliation was performed to ensure that no material data was omitted (see Appendix H).

STANDARD OF MATERIALITY

The Corporation's financial statement items for Basic Insurance are as follows:

Item	Amount $000	%	Threshold $000
2017 Net Unpaid Claims	1,821,435	0.5	9,107
Selected for February 28, 2017 valuation			5,000
Auditor's materiality for MPI			16,000
Basic Insurance unpaid claims / Total MPI's unpaid claims			95.1%
This year's selected			5,000

For the purpose of this valuation, an omission or inexplicable difference of $5,000,000 or about 0.3% of the net unpaid claims would be considered as material.

However, this does not imply that the actuary's provision is accurate within 0.3%. In fact, the future claim payment could be significantly different from the actuary's provision due to adverse/favourable claim development as noted in the Variability of Actuarial Estimates section.

EXPRESSION OF OPINION

I have valued the Automobile Insurance Division – Universal Compulsory Automobile Insurance policy liabilities and reinsurance recoverables of Manitoba Public Insurance Corporation for its statement of financial position at October 31, 2017 and their changes in the statement of income for the eight months then ended in accordance with accepted actuarial practice in Canada including selection of appropriate assumptions and methods.

In carrying out this valuation, I plan to use the work of the external auditor of the Corporation to ensure that the valuation data is essentially accurate and complete. A formal audit of the Corporation's financial statements will not be completed until the February 28, 2018 fiscal year end. Unless the audit uncovers material errors in the financial data, I am satisfied that the data utilized for the valuation of these liabilities are reliable and sufficient. I verified the consistency of the valuation data with the Corporation's financial records.

In my opinion, the amount of policy liabilities net of reinsurance recoverables makes appropriate provision for all policy obligations and the financial statements fairly present the results of the valuation.

The results of my valuation are as follows:

Claims Liabilities	Appointed Actuary's Estimate $000's
(1) Direct unpaid claims and adjustment expenses:	1,822,545
(2) Assumed unpaid claims and adjustment expenses:	0
(3) Gross unpaid claims and adjustment expenses:	1,822,545
(4) Ceded unpaid claims and adjustment expenses:	1,110
(5) Net unpaid claims and adjustment expenses (3)-(4):	1,821,435

J. S. CHENG & PARTNERS INC.
JSCP
ACTUARIES Who Care™

Premium Liabilities	Appointed Actuary's Estimate $000's
(1) Gross policy liabilities in connection with unearned premiums:	461,763
(2) Net policy liabilities in connection with unearned premiums:	460,655
(3) Gross unearned premiums:	459,742
(4) Net unearned premiums:	455,978
(5) Premium deficiency:	4,677
(6) Maximum policy acquisition expenses deferrable [(4)+(5)]–(2) :	0

DEFINITIONS

Throughout this report, the term 'development' means a process in which claims of an insurance year (i.e. year in which the claims occur) progress from occurrence to settlement. As claims of similar nature have a similar development pattern over time, it is useful to know the age of the claims. The age of the claims is measured in months from the beginning of an insurance year to the valuation date. For example, claims valued at one year after the year in which they occur are said to be 24 months old or developed as of 24 months. Alternatively, they are said to be in development year '24 mos', or in the second development year. One year later, the same claims are said to be in development year '36 mos', or in the third development year. When all claims are settled, they are said to be in development year 'ultimate' or 'U'.

Development factors are ratios of values between two consecutive development years. They are named after the two development years. For example, in insurance year *N*, the ratio of cumulative incurred loss as of '36 mos' to cumulative incurred loss as of '24 mos' is called incurred loss development factor 36/24.

Development factors may be averaged only when they have the same name. In other words, if we want to have an average development factor 36/24, we can only do so by averaging development factors 36/24 from several insurance years, e.g. *N-1*, *N-2* and *N-3*.

The cumulative incurred loss development factor (incurred age-to-ultimate factor) is the chain product of the respective incurred development factors which would project the respective cumulative incurred at their present age to its ultimate value in development year 'U'. For example, the cumulative incurred loss development factor for incurred claims in development year '24 mos' would be the product of the incurred development factors 36/24, 48/36, 60/48, 72/60, 84/72, ..., U/108.

For a better understanding of the above definitions, refer to the Appendices.

Case reserve is the aggregate of all individual file estimates or tabular reserves as determined by the Corporation.

Deferred Policy Acquisition Expense (DPAE)

For a policy that has unearned premium at the valuation date, part of the paid expenses in acquiring the policy (e.g. commissions, premium tax, and investigation expense) may be deferred to reflect the unearned portion of that policy.

IBNR is the difference between unpaid and case reserve. It is a provision for incurred but not reported claims and deficiency in case reserve, and allocated loss adjustment expense.

Insurance years (policy years) are used in lieu of accident years. For MPI, the fiscal insurance year ends February 28th (February 29th in leap years). Therefore each insurance year is spread over two consecutive calendar years. 2017 insurance year means the period between March 1, 2017 to February 28, 2018.

Expenses incurred during the processing of claims that cannot be attributed to a specific claim are known as Internal Loss Adjustment Expense (ILAE). The sources of ILAE may be administrative expenses, in-house legal expenses or staffing costs.

Provision for Adverse Deviations (PFAD) is future payment provision that takes into account future adverse changes, such as claims development, uncollectible reinsurance, and investment return rate.

Unpaid is the difference between ultimate value and payments.

BASIS OF VALUATION

Undiscounted value is the sum of future payments without considering the time value of money.

Actuarial present value is the sum of future payments discounted at an interest rate determined from the balance sheet yield of the Corporation's portfolio with provisions for adverse deviations (i.e. claims development, uncollectible reinsurance and investment return rate). For the rest of the report, the term "actuarial present value" is abbreviated as "APV".

This valuation is done in accordance with generally accepted actuarial practice in Canada, meaning that claim liabilities are computed on an APV basis.

Salvage and subrogation are recorded as negative payments when they are received.

COMPANY OPERATIONS

MPI was incorporated as a Crown Corporation in 1970 under the Automobile Insurance Act. In 1974, the Automobile Insurance Act was revised and became the Manitoba Public Insurance Corporation Act. Under the provisions of this Act, MPI operates an automobile insurance division and a discontinued general insurance division.

On March 1, 1994, the province of Manitoba introduced the Personal Injury Protection Plan ("PIPP"). This plan eliminated bodily injury tort actions involving Manitoba drivers within Manitoba and increased payments under no-fault accident benefits coverage. For the coverages affected, we have segregated our analysis into pre-PIPP and PIPP eras.

The Automobile Insurance division provides Universal Compulsory Automobile Insurance (Basic Insurance), Special Risk Extension Insurance and Extension Insurance coverages. The Basic Insurance package includes third party liability with a $200,000 limit, no-fault accident benefits and all perils coverage with a $500 deductible. In addition, MPI writes optional coverage, for example increased liability limits and deductible buy-down coverage in competition with private insurers. This optional coverage is known as Extension Insurance. Other vehicle insurance coverages not offered by Basic Insurance or Extension Insurance are provided by Special Risk Extension Insurance (SRE Insurance).

On November 1, 1991, SRE Insurance was transferred from the General Insurance division to the Automobile Insurance division. The remaining portions of the General Insurance division have been in orderly run-off since 1990. All remaining portions of General Insurance division were transferred to the Automobile Insurance division under SRE in 2004.

This report is limited to Basic Insurance only.

REINSURANCE STRUCTURE

The Corporation uses excess of loss reinsurance to keep its net retention to a prudent level. The Corporation's net retention varies by calendar year, and is summarized in the table below:

Calendar Year	Reinsurance Coverage ($ million)
1994 - 1997	34.0 excess 1.0
1998	49.0 excess 1.0
1999 - 2001	74.0 excess 1.0
2002	73.0 excess 2.0
2003	38.0 excess 2.0
2004	47.5 excess 2.5
2005	47.0 excess 3.0
2006 - 2017	45.0 excess 5.0

The Corporation is also protected by a catastrophe program of $285 million excess of $15 million. The Corporation participates 33.3% of the $100 million excess of $200 million layer. Therefore the maximum recovery under the catastrophe program is $251.7 million.

For the Special Risks Extension Insurance coverage, the Corporation additionally uses a facultative excess of loss treaty covering $4.0 million excess of $1.0 million.

Reinsurance Disclosure

We wrote to Mr. Luke Johnston, Chief Actuary and Director of Pricing, Forecasting and Investments of MPI. Mr. Johnston confirmed that the Corporation had no ceded reinsurance agreements where there is not significant insurance risk transfer between MPI and the reinsurer as of October 31, 2017. Mr. Johnston also confirmed that the Corporation had no related party reinsurance as of October 31, 2017.

CLAIMS LIABILITY

1. Gross unpaid claims (undiscounted basis)

We employed four standard actuarial techniques described in the Description of Methodologies section and appropriate assumptions in estimating the unpaid claims and allocated (external) claims adjustment expense liability. The undiscounted IBNR was selected after reviewing the estimates from the four different methods. Adjustment factors are applied to the current insurance year by line of business to account for seasonality. All adjustment factors, except for Comprehensive, are based on a comprehensive study in 2008, and are relatively stable and not expected to change significantly over time. For Comprehensive, a seasonality adjustment factor of 84% was applied, similar to last year. The selected factors by line of business are in the table below.

	Incurred Losses During the Year	
Line of Business	First 8 months	Last 4 months
Bodily Injury	67%	33%
Property Damage	58%	42%
Collision	58%	42%
Comprehensive	84%	16%
Accident Benefits	67%	33%

The details of the undiscounted IBNR selection are as follows:

a) Bodily Injury (Appendix A)

As in prior reports, we selected the IBNR based on the Incurred Bornheutter-Ferguson method for all insurance years.

Loss development factors (both incurred and paid) were revised to reflect recent experience. The impact of these revisions is a decrease in undiscounted IBNR of $0.2 million.

b) Property Damage (Appendix B)

As in prior reports, we selected the IBNR based on the Incurred Bornheutter-Ferguson method for all insurance years.

Loss development factors (both incurred and paid) were revised to reflect recent experience. The impact of these revisions is an increase in undiscounted IBNR of $1.0 million.

c) Collision (Appendix C)

As in prior reports, we selected the IBNR based on the Incurred Loss Development method for all insurance years.

Loss development factors (both incurred and paid) were revised to reflect recent experience. The impact of these revisions is a decrease in undiscounted IBNR of $1.0 million.

d) Comprehensive (Appendix D)

As in prior reports, we selected the IBNR based on the Paid Loss Development method for all prior insurance years and the Incurred Loss Development method for the current year.

Loss development factors (both incurred and paid) were revised to reflect recent experience. The impact of these revisions is an increase in undiscounted IBNR of $2.9 million.

The data used is net of major hailstorm claims. As of October 31, 2017, there are no additional IBNR required for these major hailstorm claims.

e) Accident Benefits – Weekly Indemnity (Appendix E)

Historical payments and case reserves are restated to reflect current benefit levels prior to performing the analysis. Earned premiums are restated to match the indexing of loss costs.

Loss development factors (both incurred and paid) were revised to reflect the changes in reserving approach and recent experience. In respect of the reserving approach, MPI revised its reserving process for long-term PIPP claims by centralizing the process to a dedicated team. As a result, most weekly indemnity claims older than 24 months are now tabular reserved for life.

For the selection of the tail (116-month to Ultimate) factors;

- The incurred / paid tail factor was selected based on the observed ratios of the tabular reserve ultimate to the incurred/ paid at 116 months. The derivation of the tabular reserve ultimate is presented below.
- Incremental loss development factors after 116 months were revised to reflect the recent experience if there were at least five observed factors.

The impact of these loss development factor revisions is a decrease in undiscounted IBNR of $28.8 million.

As in prior reports, for insurance years that are at least 10 years old (2008 and prior), we determined tabular reserve ultimate for each insurance year as follows:

- Open weekly indemnity claims were identified.
- For open claims with tabular reserves, the tabular reserves were recalculated as of October 31, 2017. The calculation was done using a 0% interest rate so that only mortality and morbidity experience is reflected. These make up the majority of open claims.
- For open claims without tabular reserves;
  (i) 50% of the number of claims was assumed to ultimately be tabular reserved. These claims were multiplied by the average tabular reserves for open claims with tabular reserves.

(ii) 50% of the number of claims was assumed to remain non-tabular. These claims were multiplied by the average reserves for open claims without tabular reserves.

- The aggregate tabular reserve for all open claims is then used to determine the IBNR based on the tabular reserving method as presented in pages 20 and 21 of Appendix E.

In last year's report, we selected the IBNR based on the tabular reserving method for insurance years more than 10 years old. Some of the IBNR is intended for relapsed cases. For the six insurance years thereafter, we selected the IBNR based on the Incurred Bornheutter-Ferguson (BF) method. Finally for the four most recent insurance years, we selected the IBNR based on the higher of the Incurred BF method and Paid BF method. This "higher of" selection is to recognize the uncertainty among the actuarial methods in the more recent insurance years (especially as it pertains to the case reserve levels for serious losses). **For this valuation, we decided to decrease the higher of the Incurred BF method and Paid BF method from four to the three most recent years. The change is to recognize the change in reserving process for long-term PIPP claims, which increased the adequacy of case reserves for insurance years older than 24 months.** The impact of this revision is a decrease in undiscounted IBNR of $12.8 million.

f) Accident Benefits - Other Indexed (Appendix F)

Historical payments and case reserves are restated to reflect current benefit levels prior to performing the analysis. Earned premiums are restated to match the indexing of loss costs.

Loss development factors (both incurred and paid) were revised to reflect the recent experience. The impact of these loss development factors revisions is a decrease in undiscounted IBNR of $0.5 million.

In last year's report, the IBNR for the four most recent insurance years was selected based on the higher of the Incurred Bornheutter-Ferguson (BF) method and Paid BF method. For all other preceding insurance years, we selected the IBNR based on the Incurred Bornheutter-Ferguson method. **For this valuation, we decreased the higher of the Incurred BF method and Paid BF method from four to the three most recent years.** The impact of this revision is a decrease in undiscounted IBNR of $8.0 million.

In September 2010, a new claims management system (FINEOS/BI3) was implemented. The new system required that case reserves be set up to pay for expenses. However, the development on these expenses is already included in both the incurred and paid historical triangles. As such, the additional expense reserves (see Appendix F, page 8) were removed from the incurred triangle prior to analysis. The selected IBNR was then reduced by the current expense reserve of $16.6 million.

Further, the new claims management system was improperly handling the auto-reserving and auto-closing of new claims, resulting in excess reserves for certain benefits. The Corporation confirms that this issue was rectified as of November 2012. We have presented these excess reserves on page 9 of Appendix F. We have applied the same adjustment to these excess reserves as to the expense reserves; excess reserves were removed prior to analysis and the selected IBNR was reduced by $10.4 million.

g) Accident Benefits - Other Non-Indexed (Appendix G)

As in prior reports, we selected the IBNR based on the Incurred Bornheutter-Ferguson method for all insurance years.

Loss development factors (both incurred and paid) were revised to reflect recent experience. The impact of these revisions is an increase in undiscounted IBNR of $1.6 million

h) PIPP Enhancements (PE Exhibits)

Bill 36 was passed by the Manitoba legislature in October 2009 enhancing PIPP benefits for catastrophically injured claimants. The enhancements affect both past and future claimants. The enhancements are as follows (all figures at March 1, 2017 level):

(i) Increase income replacement indemnity to the industrial average wage (IAW) if claimant is not already receiving an amount equal to or greater than the IAW. (Income Replacement Indemnity)

(ii) Increase the maximum permanent impairment benefit to $243,580. (Permanent Impairment)

(iii) Increase the maximum personal care assistance monthly payments to $5,532. (Personal Care)

(iv) Provide the Corporation with the authority to reimburse expenses up to a lifetime limit of $1,132,934 per claimant.

(v) When permanent impairment benefits have been paid, and the claimant is later entitled to death benefits, the death benefits will not be offset by the permanent impairment benefits already paid (as was the previous practice). This enhancement applies to all injured claimants. (Death Benefits)

No provision was added for the fourth enhancement as it was estimated to have an immaterial effect. The estimation of the claim liabilities pertaining to the other four enhancements are presented in PE Exhibit 1.

Further, in August 2011, the Manitoba legislature passed additional PIPP benefit enhancements for catastrophically injured claimants, introduced as part of a reinterpretation of Section 138 of the Manitoba Public Insurance Corporation Act. These enhancements are as follows:

(i) Outright purchase and adaptation of a vehicle for the claimant once every five years. Previously, only the adaptation of a vehicle was

covered if a new vehicle was purchased by the claimant. (Vehicle Purchase)

(ii) Modification of a secondary residence e.g. a cottage owned by the claimant.

(iii) Reimbursement for extraordinary expenses to better support the claimant's continuation of pre-accident activities and new life event (e.g. marriage) requirements.

(iv) Provide attendant care coverage for employment if it reduces the total amount of PIPP benefits payable.

(v) Reimbursement for extraordinary expenses for leisure and recreational activities. Biannual limits ranging from $500 to $4,000 depending on the claimants' degree of permanent impairment. This enhancement applies to all injured claimants. (Annual Spending Allowance)

The estimation of the claim liabilities pertaining to the first and the fifth enhancements are presented in PE Exhibit 1. The estimation of the other three enhancements is presented in PE Exhibit 4.

On May 1, 2015, the Manitoba legislature further introduced another PIPP benefit enhancement. This enhancement provides caregiver weekly indemnity to the person responsible for the care of a deceased claimant's dependents (Caregiver Death Benefit). This enhancement affects only claimants with accident dates on May 1, 2015 and after. The estimation of the claim liabilities pertaining to this new enhancement is presented in PE Exhibit 1.

A summary of the undiscounted ultimate by enhancement is listed below. The ultimate in the February 28, 2017 report is provided for comparative purposes.

Enhancement	Ultimate as of February 28, 2017 $000	Ultimate as of October 31, 2017 $000
Income Replacement Indemnity	28,264	28,226
Personal Care	27,626	27,685
Permanent Impairment	26,173	26,457
Vehicle Purchase	21,716	21,772
Death Benefits	21,479	21,385
Annual Spending Allowance	5,207	5,166
Section 138 Enhancement	3,518	3,518
Caregiver Death Benefit	4,170	5,470
Total	**138,154**	**139,679**

There were no other changes, apart from increases resulting from the addition of one more insurance year.

A summary of all the impacts from the changes in assumption is listed below:

	10/31/2017 undiscounted IBNR based on 2/28/2017 assumptions	Change in LDFs Selection	*Changes in Other Assumptions	10/31/2017 undiscounted IBNR based on 10/31/2017 assumptions
	(1)	(2)	(3)	(4) = Σ[(1) to (3)]
Bodily Injury	6,514	-185	0	6,329
Property Damage	6,320	951	0	7,271
Accident Benefits				
Weekly Indemnity	222,677	-28,813	-12,849	181,015
Other (Indexed)	107,656	-450	-7,960	99,246
Other (Non-Indexed)	19,397	1,639	0	21,036
Collision	22,691	-1,012	0	21,679
Comprehensive	3,263	2,873	0	6,136
Sub-total before ILAE	388,519	-24,997	-20,809	342,713
ILAE	181,654	-4,600	-3,829	173,225
Sub-total after ILAE	570,173	-29,597	-24,638	515,938
PIPP Enhancement	45,042	0	0	45,042
Total IBNR	615,215	-29,597	-24,638	560,980

* Other assumptions include changes in method of selecting IBNR

2. Ceded unpaid claims

Ceded case reserves relate to Comprehensive hail losses and Accident Benefits (Accident Benefits - Weekly Indemnity and Accident Benefits - Other Indexed).

For Comprehensive hail losses, per section 1(d) above, we assume no further gross, and therefore net, undiscounted IBNR is required.

For Accident Benefits, we assume that no undiscounted IBNR is ceded i.e. the Corporation assumes the full undiscounted IBNR liability for these coverages.

3. Net unpaid claims

Net unpaid claims are equal to gross unpaid claims less ceded unpaid claims.

4. Internal Loss Adjustment Expense (ILAE)

We assumed a paid ILAE to paid claims methodology. The three year weighted average paid ILAE to paid claims[2] ratio was 18.2%. We selected a ratio of 18.4%, unchanged from the February 28, 2017 report, based on the recent three observed ratios and the indicated three year weighted average.

	As of Feb 16	As of Feb 17	As of Oct 17	3-Year Weighted Avg
Paid	644,211	681,113	457,442	1,782,766
ILAE Paid	118,614	120,972	84,499	324,085
ILAE factor	18.41%	17.76%	18.47%	18.18%

Selected in February 28, 2017 valuation	18.40%
Selected in October 31, 2017 valuation	18.40%

[2] Paid claims exclude payments made for PIPP Enhancements. It is assumed that the administration of these benefits do not change the ILAE paid.

As in prior reports, we apply one-half of the selected ratio (9.20%) to the total unpaid claims[3] as of valuation date. In addition, we apply one-half of the selected ratio to total IBNR as of valuation date.

The derivation of the ILAE provision is presented in Exhibit 5.

5. Mass Tort / Latent Liability Claims

According to the Corporation, there were no mass tort claims against the Corporation.

6. Summary of Undiscounted IBNR and Unpaid Claims

	IBNR			Unpaid Claims			Reference
Line	Gross	Ceded	Net	Gross	Ceded	Net	
Bodily Injury	6,329	-	6,329	17,629	-	17,629	Exh 2, Sheet 1

7. Actuarial Present Value

In this valuation, the required provision is determined using generally accepted actuarial practice, i.e. actuarial present value (APV). We started with the undiscounted case and IBNR provisions and followed the procedures on pages 41-46 to derive the APV provisions.

The case reserves by convention were kept at the undiscounted basis. By subtracting the case reserves from the APV unpaid claims, we obtained the IBNR on an APV basis.

[3] Exclude PIPP Enhancements; similar basis as that used to derive the selected ratio.

8. Income Tax Effect

The Corporation does not pay income taxes.

9. Summary

The claims liabilities on a gross, ceded and net basis are shown in tables 1-3 on the following pages.

REINSURANCE RECOVERY

No explicit provision is made for doubtful reinsurance recovery. However, a reinsurance margin of 5% for Accident Benefits and 2.5% for Comprehensive has been applied in the APV calculation.

PREMIUM LIABILITY

With respect to the policies/treaties in force as at October 31, 2017, MPI has the following liabilities:

1. Premium Deficiency

   Based on the results of our valuation, the Corporation is required to carry a premium deficiency of $4,677,000.

2. Reinsurance premium and Commission Due

   This is not applicable to the Corporation.

3. Unearned Premiums

   The gross and net unearned premiums as of October 31, 2017 were determined by the Corporation as $459,742,000 and $455,978,000 respectively. We did not do an independent validation of the above unearned premiums.

4. Premium Liability

   The derivation of the gross and net premium liability on the unearned premium is presented in Exhibit 6. The results are summarized in the following table.

Gross premium liability is as follows:		($000's)
(1)	Gross unearned premiums	459,742
(2)	Expected claims (Incl. PIPP Enhancement)	378,808
(3)	Expected claims expense	68,980
(4)	Policyholder Service Cost	13,975
(5)	Gross premium liability (2) + (3) + (4)	461,763
Recoverable from reinsurers is calculated as follows:		
(6)	Ceded unearned premiums	3,764
(7)	Expected claims and expense	2,990
(8)	Cost of excess and catastrophe reinsurance	1,882
(9)	Excess claims recoverable	0
(10)	Recoverable from reinsurers (7) + (9) - (8)	1,108
Net premium liability and DPAE is calculated as follows:		
(11)	Net premium liability (5) - (10)	460,655
(12)	Net unearned premiums	455,978
(13)	Maximum DPAE based on claims experience (12) - (11)	(4,677)
(14)	Deferrable expenses carried prior to the valuation	30,759
(15)	Allowable DPAE / (Premium Deficiency)	(4,677)

5. Deferred Policy Acquisition Expenses

The Corporation's Deferred Policy Acquisition Expenses (DPAE) include unearned commissions and deferred premium taxes. Based on the results of our valuation, the premium deficiency as of October 31, 2017 was estimated to be $4,677,000. Prior to this review, the Corporation has written down its DPAE by $29,692,000 and carried a net DPAE of $1,067,000. We expect the Corporation to write down the carried net DPAE to zero and book a premium deficiency of $4,677,000.

DESCRIPTION OF THE METHODOLOGIES TO ESTIMATE THE UNDISCOUNTED IBNR

Method I - Paid Loss Development Method (Paid Development Method)

This method assumes that the cumulative paid loss amount for each development period will progress to the next development period in a definite pattern, and the progression is independent of the corresponding rates of progression for the previous development periods. Therefore, by taking the product of a series of development factors, we can project the ultimate loss amount from the most recent paid loss amount for each insurance year.

If we denote the development factor from 12 months to 24 months development by $D_{24/12}$, from 24 months to 36 months development by $D_{36/24}$, etc., then the ultimate loss for insurance year N-2 valued at 31/12/N can be determined as:

(Paid loss at development month 36) × $D_{48/36}$ × $D_{60/48}$ × $D_{72/60}$… × $D_{U/(U-12)}$

where U is the ultimate period.

The ultimate loss for any insurance year X valued at development month M can similarly be determined as:

(Paid loss at development month M) × $D_{(M+12)/M}$ × $D_{(M+24)/(M+12)}$ × ... × $D_{U/(U-12)}$

The implicit assumptions are:

(1) the rate of claims payment and closure are constant in a development period; and

(2) the inflation rate is identical for identical development period.

Method II - Incurred Loss Development Method (Incurred Development Method)

This method assumes that the cumulative incurred loss (cumulative paid loss plus case reserve) for each development period will progress to the next development period in a definite pattern, and the progression is independent of the corresponding rates of progression for the previous development periods. Using a technique similar to Method I, the ultimate loss for any insurance year X valued at development month M

= (Incurred loss at development month M) × $D_{(M+12)/M}$ × $D_{(M+24)/(M+12)}$ × ... × $D_{U/(U-12)}$

The implicit assumptions are:

1. Case reserve level is constant; no major changes in reserving philosophy has taken place; and
2. The inflation rate is constant for a given development period.

Method III - Bornhuetter-Ferguson Incurred Method

In this method, ultimate loss = cumulative incurred loss + IBNR

where IBNR = IBNR factor × expected loss.

The expected loss can be determined by one of the following:

(a) Expected loss ratio × earned premium
(b) Average claim size × number of claims
(c) Ultimates from Method I, Method II, or Method IV
(d) Judgment

The IBNR factor can be determined by using a 1-1/incurred age-to-ultimate factor or from external sources.

The implicit assumptions are:

1. Incurred loss as reported is partially credible; and
2. IBNR emergence is dependent on the expected loss, not on reported claims.

Method IV - Bornhuetter-Ferguson Paid Method

In this method, ultimate loss = cumulative paid loss + unpaid loss

where unpaid loss = unpaid factor x expected loss.

The expected loss can be determined by one of the following:

(a) Expected loss ratio x earned premium
(b) Average claim size x number of claims
(c) Ultimates from Method I, Method II, or Method III
(d) Judgment

The unpaid factor can be determined by using a 1-1/paid age-to-ultimate factor or from external sources.

The implicit assumptions are:

1. Paid loss as reported is reasonably credible; and
2. Unpaid loss emergence is dependent on the expected loss, not on paid claims.

PAYMENT PATTERN

Objective

The purpose of this section is to estimate the proportion of unpaid claims which will be paid in the year after valuation, two years after valuation, etc., until all claims are paid.

Assumptions

For a given coverage, the unpaid ratio of every insurance year at the same stage of development is identical. For example, assume a coverage has unpaid ratios of 65%, 40%, and 20% in development years 1, 2, and 3, respectively. Then, the corresponding unpaid ratios, paid ratios, and incremental paid ratios for insurance year 2017 are:

Development Year beginning on March 1	Unpaid Ratio (%)	Cumulative Paid Ratio (%)	Incremental Paid Ratio (%)
2017	65	35	35
2018	40	60	25
2019	20	80	20
2020		100	20

If the unpaid amount for insurance year 2017 at the end of development year 1 is $13,000,000 then the estimated payment in 2018, 2019 and 2020 are as follows:

Fiscal Payment Year	Payment
2018	13,000,000 x 25/65 = 5,000,000
2019	13,000,000 x 20/65 = 4,000,000
2020	13,000,000 x 20/65 = 4,000,000

Unpaid ratio is the amount of unpaid claims to the ultimate losses as of the valuation date. Paid ratio is the cumulative amount of paid claims to the ultimate losses as of the valuation date. This ratio can be determined as 100% less the unpaid ratio. Incremental paid ratio is the difference between two consecutive paid ratios.

Methodology

The Corporation's experience was used to establish its payment pattern. The following method (shown in Exhibit 7) was used to derive the payment pattern.

The paid projection method produced age-to-ultimate factors that project the cumulative paid amount to ultimate, at each stage of development. Therefore, we could get an estimate of the ratio of unpaid amount to ultimate loss by taking 1.0 - (1.0/age-to-ultimate factor) for each stage of development. This procedure was done for all lines.

Once the unpaid ratio was established, the paid ratio was simply one minus the unpaid ratio at each stage of development. The incremental paid ratio was calculated as the difference between two consecutive paid ratios. This established the Corporation's payment pattern for each line. With the incremental paid ratio, a payment matrix showing the amount of payment by payment year and insurance year was tabulated. See Exhibit 7 for an illustration of the calculation.

Payments were assumed to occur, on average, in the middle of the year. Therefore, if i is assumed to be the rate of interest for discounting purposes, the discount factors are:

$$1/(1 + i)^{0.5}, 1/(1 + i)^{1.5}, 1/(1 + i)^{2.5}, \text{ ... for fiscal (payment) year 2018, 2019 ….}$$

See Exhibit 7 for more details.

The unpaid amount included case reserves as reported by the Corporation and IBNR reserve as estimated in this report. The ILAE provision was estimated as 9.20% of the gross case reserves and 18.40% of the gross IBNR estimate. In this report, ILAE was treated as a separate item.

All of the above undiscounted figures are identical to those in the Claims Liability section of this report.

DISCOUNT RATE & PROVISION FOR ADVERSE DEVIATIONS

In 2017, the Corporation's investments included cash, bonds, public equity, real estate, infrastructure, and venture capital. In our discount rate analysis, we used only short term investments and the bond portfolio because these assets were suitably matched to the claim and premium liability cash flow.

A summary of this partial portfolio is presented in the table below:

	B/S Value	B/S Yield	Duration Weighted Yield	Market Value	Duration Years
	$000			$000	
Govt Bonds	1,197,747	2.83%	3.01%	1,197,747	11.91
Corporate Bonds	62,961	3.03%	3.15%	62,961	12.37
Non-Marketable Bonds	622,378	4.58%	4.33%	622,378	5.87
Floating Rate Note	-	0.00%	0.00%	-	-
Total	1,883,086	3.42%	3.27%	1,883,086	9.93

Market value (MV) weighted yield	3.42%	
Investment management fees	0.07%	
Rounding	0.00%	
MV weighted yield less mgmt. fees	3.35%	for unpaid claims liabilities (non-indexed lines)
Inflation rate assumption	2.00%	for unpaid claims liabilities
MV weighted (real) yield less mgmt. fees #	1.32%	for unpaid claims liabilities (indexed lines)
Market yield for short-term investment	0.97%	for premium liabilities (non-indexed lines)
MV weighted (real) yield less mgmt. fees #	1.32%	for premium liabilities (indexed lines)

In this valuation, two changes were made to the approach in selecting discount rate:

- We switched from duration adjusted yield to market value weighted yield in selecting the discount rate. The Corporation's asset liability management policy strives to minimize the impact to its income statement due to a change in market interest rates. This change was made to reduce the mismatch between the Corporation's assets and liabilities from fluctuations in market yield.

- We selected a different discount rate for unpaid claims and premium liabilities. This change was made to recognize the difference in the duration of unpaid claims and premium liabilities, and the market yields of the investment portfolio used to support these liabilities.

For coverages that are not inflation-indexed, we discounted the unpaid claims at 3.35%, which is the market value weighted yield less management fees. For coverages that are inflation-indexed (Accident Benefits - Weekly Indemnity and Accident Benefits - Other Indexed), the unpaid claim liabilities were discounted at 1.32% (= 1.0335 / 1.0200 - 1), which is the market value weighted real yield less management fees. The inflation rate assumption of 2.0% represents the Corporation's long term forecast for inflation. In the February 28, 2017 report, the unpaid claims were discounted at 3.39% for non-indexed coverages and 1.36% for indexed coverages.

For premium liabilities, we discounted the coverages that are not inflation-indexed at 0.97%, which is the market yield for short-term investments. We used the yield from short-term investments because these coverages have an average duration of less than 1.5 years. For coverages that are inflation-indexed, we discounted the premium liabilities at 1.32%, same as the discount rate used for unpaid claims.

The investment management fees percentage is calculated as 0.07% ($1,284,000[4] / 1,883,086,000).

In the Standards of Practice of the Canadian Institute of Actuaries, three major valuation variables were identified – claim development, reinsurance recovery, and interest rate. For each of these variables, the Standards defined ranges for the selection of margins for adverse development (MFAD).

[4] $1,284,000 was the 2017 actual investment management fees for the bond portfolio.

The MFAD for claims development was selected by coverage based on the duration of the payments, the historical volatility in the development pattern, and reinsurance features. As mostly all weekly indemnity (WI) claims older than 24 months are tabular reserved for life, as a result of centralized reserving, and the only claims development risk is improvement in mortality, we decided to reduce the MFAD for WI from 15% to 10% for all WI claims older than 24 months. We also reduced the MFAD for AB – Other (indexed) from 15% to 10% for all claims older than 10 years. Other MFAD selections were unchanged from the February 28, 2017 report, and are within the range defined in the Standards of Practice between 2.5% and 20%. The selected MFAD for claims development by coverage are as follows:

Coverage	Margin for Adverse Deviations
BI-Pre-PIPP	12.50%
BI-Post March 1, 1994	15.00%
AB-Pre-PIPP WI	5.00%
AB-Pre-PIPP Other	5.00%
AB-PIPP WI (2016 & After)	15.00%
AB-PIPP WI (Prior to 2016)	10.00%
AB-PIPP Indexed (2008 & After)	15.00%
AB-PIPP Indexed (Prior to 2008)	10.00%
AB-PIPP Non-Indexed	10.00%
Collision	7.50%
Comprehensive	7.50%
Property Damage	5.00%
ILAE	10.95%

The MFAD for reinsurance recovery was selected to provide for possible future problems in the collectability of reinsurance. For coverages with potential reinsurance recovery, the selected MFAD were unchanged from the February 28, 2017 report, and are as follows:

Coverage	Margin for Adverse Deviations
AB-PIPP WI	5.00%
AB-PIPP Indexed	5.00%
Comprehensive	2.50%

The MFAD for interest rate was selected (similar for all coverage) to provide for possible adverse experience in yield rates, reinvestment, and/or asset defaults. For the current valuation, the MFAD for interest rate was selected at 50 basis points (bp), same as the selected margin in the February 28, 2017 report.

The following table shows the investment yield of MPI versus the Manitoba CPI from October 2011 to October 2017 (provided by MPI).

	Weighted Average Yield of Bond Portfolio	Manitoba CPI (year over year)	Real Return
31-Oct-11	3.69%	3.02%	0.67%
29-Feb-12	3.55%	1.71%	1.84%
31-Oct-12	3.55%	1.68%	1.87%
28-Feb-13	3.53%	2.18%	1.35%
31-Oct-13	3.90%	2.23%	1.67%
28-Feb-14	3.68%	2.22%	1.46%
31-Oct-14	3.55%	1.29%	2.26%
28-Feb-15	2.92%	0.72%	2.20%
31-Oct-15	3.42%	1.91%	1.51%
29-Feb-16	3.34%	1.12%	2.22%
31-Oct-16	2.96%	1.09%	1.87%
28-Feb-17	3.39%	2.29%	1.10%
31-Oct-17*	3.35%	1.55%	1.80%

* Prior to October 31, 2017, duration weighted yield was used instead of average market yield.

The provision for adverse deviations for interest rate was determined as the difference between the present value of the unpaid claim liabilities at the yield with margin and the present value of the unpaid claim liabilities at the yield without margin. The table below summarizes the yield with and without margin:

	Unpaid Claims		Premium Liabilities	
	Non-Indexed Benefits Gross/Net Basis	Indexed Benefits Gross/Net Basis	Non-Indexed Benefits Gross/Net Basis	Indexed Benefits Gross/Net Basis
Yield with margin	2.85%	0.82%	0.47%	0.82%
Yield without margin	3.35%	1.32%	0.97%	1.32%
Margin	0.50%	0.50%	0.50%	0.50%

SPECIFIC DISCLOSURE REQUIREMENTS

1. I was first appointed by the Corporation on October 28, 2011 and have been re-appointed annually since 2011.

2. I presented the February 28, 2015 report and the February 29, 2016 report to the Board of Directors in person on May 15, 2015 and May 26, 2016, respectively. Due to scheduling conflicts, Mr. Raul Martin, FCIA presented the February 28, 2017 report to the Board of Directors on May 18, 2017 on my behalf.

3. I am in compliance with the Continuing Professional Development requirements of the Canadian Institute of Actuaries.

4.

Disclosure of Compensation

I attest that all my direct and indirect compensation is derived using the following methodology:

Fixed fee basis, and without contingent compensation of any kind.

I confirm that I have performed my duties without regard to any personal considerations or to any influence, interest or relationship in respect of the affairs of my client or employer that might impair my professional judgment or objectivity.

I confirm that my ability to act fairly is unimpaired, that there has been full disclosure of the methodology used to derive my compensation to all known direct users of my services.

Trend in Losses Based on Exponential Regression (a):
0.24%
Selected Trend (b):
0.25%

Notes:
(3) Ultimate Losses from Page 7
(6) = Average [(4), (5)]
(10) = (8) * (9) + (7) * [1 - (9)]
(11) = Sum [Column (3)] / Sum [Column (2)] excluding current year
(a) Based on the Projected Ultimate Losses
(b) Based on the exponential trend rounded up to the nearest 0.25%; minimum 0.00%

Trend in Losses Based on Exponential Regression (a):
4.03%
Selected Trend (b):
4.25%

Notes:
(3) Ultimate Losses from Page 7
(6) = Average [(4), (5)]
(10) = (8) * (9) + (7) * [1 - (9)]
(a) Based on the Projected Ultimate Losses
(b) Based on the exponential trend rounded up to the nearest 0.25%; minimum 0.00%

416-Ult	1.0058	1,374.46	7.93	7.93	78.80%	86.21%	6.25	6.83	6.25	6.83	78.80%	86.21%	99.78%	99.86%

Notes:
(2) - Per comment in Page 19: *212-Ult Factor = 1.0175 ^ (17 + 1/3)
(3), (4) & (5) - Assuming Paid at 200 Months of 1,000
(14) = (12) / [(6) * (1 + Discount Rate Without Margin) ^ 0.5]
(15) = (13) / [(7) * (1 + Discount Rate With Margin) ^ 0.5]
[a] Assuming the Paid in Period is paid in the middle of the period:
Discount Rate Without Margin 1.32%
Discount Rate With Margin 0.82%
[b] As at 200 months
[c] Represents the discounting of the remaining unpaid at the beginning of the period back to the beginning of the period.
For example, the discount factor for the period 296-308 represents the remaining unpaid at 296 months discounted back to 296 months.

PIPP Enhancement: Quality of Life Enhancements

	213	Catastrophic claimants (PE Appendix G, Column 8)
	53	Paneled; Assume 25% of catastrophic claimants
	160	Remaining catastophic claimants

I) Cottage Modifications

	35,000	Manitobans with cottages
	1,200,000	Total Manitobans
	2.92%	Percent of Manitobans with cottages
	5	Expected number of cottages requiring modifications; 160 x 2.92%
$	150,000	Expected cost per cottage
$	**750,000**	**Estimated Ultimate Claims - Cottage Modifications**

II) Attendant Care (for Work)

		Per claimant cost:
$	20	Cost per hour
	8	Hours per day (above PCA and Home Care)
	240	Expected number of working days per year
$	38,400	Total per claimant cost per year
	20	Expected working life (in years)
$	768,000	Total expected per claimant cost
	1	Expected number of claimants utilizing benefit
$	**768,000**	**Estimated Ultimate Claims - Attendant Care**

III) Activity Cost

		Per claimant cost:
$	2,000	Total per claimant cost per year
	25	Expected life (in years)
$	50,000	Total expected per claimant cost
	40	Expected number of claimants utilizing benefit; 160 x 25.00%
$	**2,000,000**	**Estimated Ultimate Claims - Activity Cost**

$	**3,518,000**	**Estimated Ultimate Claims - All Cost [(I) + (II) + (III)]**	(a)
$	716,959	Paid	(b)
$	1,418,078	Case Reserves	(c)
$	2,135,036	Reported	(d)
$	1,382,964	Estimated IBNR [(a) - (d)]	(e)
$	2,801,041	Estimated Unpaid Claims [(c) + (e)]	(f)
	87.50%	Discount Factor With Margin [PE Exhibit 2, Sheet 2, Column 3]	(g)
	81.13%	Discount Factor Without Margin [PE Exhibit 2, Sheet 2, Column 4]	(h)
$	2,450,786	Discounted Unpaid With Margin [(f) x (g)]	(i)
$	2,272,485	Discounted Unpaid Without Margin [(f) x (h)]	(j)
$	178,301	Interest PFAD [(i) - (j)]	(k)
	12.11%	Claims Development Margin [PE Exhibit 2, Sheet 2, Column 8]	(l)
$	275,214	Claims Development PFAD [(j) x (l)]	(m)
$	**2,725,999**	**CIA Rules Unpaid Claims [(j) + (k) + (m)]**	(n)
$	**1,307,922**	**Required IBNR [(n) - (f) + (e)]**	(o)

Memo

To: / Location:	Patrick Green
From: / Location:	Pierre Bourassa
Date:	May 2nd, 2018
Subject:	Actuarial support for Manitoba Public Insurance Corporation (MPIC) – Basic

Background

MPIC was incorporated as a Crown Corporation in 1970 under the Automobile Insurance Act. In 1974, the Automobile Insurance Act was revised and became the Manitoba Public Insurance Corporation Act. Under the provisions of this Act, MPIC operates an automobile insurance division and a discounted general insurance division.

On March 1, 1994, the province of Manitoba introduced the Personal Injury Protection Plan (PIPP). This plan eliminated bodily injury tort actions involving Manitoba drivers within Manitoba and increased payments under no-fault accident benefits coverage.

The Automobile Insurance division provides Universal Compulsory Automobile Insurance (Basic Insurance), Special Risk Extension (SRE) Insurance and Extension Insurance coverages. The Basic Insurance package includes third party liability with a $200,000 limit, no-fault accident benefits and all perils coverage with a $500 deductible. In addition, MPIC writes optional coverage, for example increased liability limits and deductible buy-down coverage in competition with private insurers. This optional coverage is known as Extension Insurance. Other vehicle insurance coverages not offered by Basic Insurance or Extension Insurance are provided by Special Risk Extension Insurance (SRE Insurance).

On November 1, 1991, SRE Insurance was transferred from the General Insurance division to the Automobile Insurance division. The remaining portions of the General Insurance division have been in orderly run-off since 1990. All remaining portions of General Insurance division were transferred to the Automobile Insurance division under SRE in 2004.

This report is limited to Basic Insurance only.

Objective and Scope

We have been asked to provide actuarial support to the audit engagement team of MPIC as at February 28, 2018 for statutory reporting purposes. The objective of our work is to provide reasonable assurance that the policy liabilities reported by MPIC as at February 28, 2018 are fairly stated. The scope of our work

PricewaterhouseCoopers LLP
PwC Tower, 18 York Street, Suite 2600, Toronto, Ontario, Canada M5J 0B2
T: +1 416 863 1133, F: +1 416 365 8215, www.pwc.com/ca

relates to the examinations of the policy liabilities, namely claims liabilities, premium liabilities and other policy liabilities of MPIC on both a discounted and undiscounted basis.

Joe Cheng, a Fellow in good standing of the Canadian Institute of Actuaries (CIA), prepared the policy liabilities of MPIC. Our examination of the methods, procedures and assumptions used to evaluate the policy liabilities as at February 28, 2018 is based on the draft actuarial report as of February 28, 2018 as well as the final actuarial reports as at October 31, 2017 for Basic Insurance. The actuary's opinion is unqualified.

Professional Standards

For the purpose of this review, generally accepted actuarial principles and the Standards of the Canadian Institute of Actuaries (CIA) were used to evaluate the policy liabilities calculated by the actuary of MPIC, subject to any additional regulatory requirements.

These standards require a *best estimate approach* to the derivation of policy liabilities.

The Standards of Practice of the Canadian Institute of Actuaries require that policy liabilities be reported on a discounted value with appropriate provision for adverse deviations. Similarly, the current regulatory requirement is that policy liabilities must be discounted and include provisions for adverse deviations.

Valuation Results (Basic)

Policy Liabilities ('000)	Actuary
Claims Liabilities	
Direct	1,796,730
Assumed	0
Gross	1,796,730
Ceded	1,270
Other Amounts to recover	0
Other Net Liabilities	0
Net	1,795,460
Premium Liabilities	
Gross Policy Liabilities	472,051
Net Policy Liabilities	477,458
Gross Unearned Premiums	468,613
Net Unearned Premiums	468,613
Premium Deficiency	8,845
Other Net Liabilities	0
DPAC	0
Maximum Allowable DPAC	0

We rely on the auditor to ensure that the appropriate amounts are posted in the financial statements of MPIC.

Claims Liabilities (Basic)

We reviewed the derivation of the claims liabilities of the company for the year ending February 28, 2018. The report of the actuary answers the requirements of the Office of the Superintendent of Financial Institutions and the valuation adheres to Accepted Actuarial Practice of the CIA. We have independently re-performed seven lines of business. These seven lines of business (including the associated ULAE reserve) represent approximately 91.7% of the total undiscounted unpaid.

We also performed a review of methods and assumptions (M&A) for two additional lines representing another 6.7% of total unpaid. The review focused on both reasonability of selections and approach used by the AA, as well as consistency with the previous valuation. A completed methodology and assumption review checklist is attached as an appendix to this memo. We are satisfied the provision for these lines of business is reasonable and appropriate for the company.

Lines with relatively smaller volume have not been reviewed. We have not independently tested the IBNR on those lines; however, nothing has come to our attention that would lead us to believe that that IBNR is not reasonable.

Actuarial Database

The actuarial database is as at 2/28/2018 and the loss development exhibits are shown on this basis.

In his reports, the actuary provided an Appendix to show the reconciliation of paid and outstanding claim amounts to financial statements. We rely on the auditor to ensure this reconciliation is appropriate and balances to the financial statements of the company.

Methods and Assumptions

In general, the actuary retained the Incurred B-F method, with certain exceptions. For the shorter tailed collision and comprehensive lines, the Incurred Loss Development method was retained, with the exception of prior accident years for comprehensive, where the Paid Loss Development method was used. For the Accident Benefits – Weekly Indemnity and Accident Benefits – Other Indexed, multiple methods were used and certain adjustments to the data were applied, as discussed below.

Accident Benefits – Weekly Indemnity

As usual, incurred loss triangles are restated to reflect current benefit levels. This year, Loss Development Factors were also changed to consider MPI's revised reserving approach. For long-term PIPP claims, MPI centralized the process to a dedicated team, resulting in most weekly indemnity claims older than 24 months being tabular reserved for life. This was evident in the data triangles as the last calendar year had much higher incurred losses than historically. This resulted in a decrease in IBNR as a larger portion of unpaid claims is now captured in the case reserves.

The actuary used Tabular Reserve method for 2008 and prior. Tabular reserves are selected after considering the possibility of claims turning into tabular claims after 10 years, mortality and morbidity experience, and incurred development factors. We reviewed and agreed with this methodology.

For the following accident years, the actuary used the Incurred B-F method, with the exception of 2015 to 2017 where the maximum between this method and the Paid B-F was used. Last year, the maximum was used for the last 4 years. One year was removed to reflect the change in reserving process. We have used the average of the Incurred and Paid B-F methods in our re-performance.

Accident Benefits – Other Indexed

Incurred loss triangles were restated to reflect current benefit levels. Expense and excess reserves, which resulted from a new claims management system since 2010, were removed from the triangles to be consistent with the historical triangles. Because the development on these expenses is already included in both the incurred and paid triangles, the final IBNR was reduced by the current expense and excess reserves. The same methods were retained by the actuary as for Weekly Indemnity line.

Use of October 31, 2017 Report

On page 5 of the Basic report, the actuary states the following:

"This letter, opinion and attached exhibits provide an update to our Appointed Actuary Report as of October 31, 2017 using data as of February 28, 2018 for Manitoba Public Insurance – Universal Compulsory Automobile Insurance. All comments, caveats, limitations and explanations contained in our October 31, 2017 report continue to apply unless noted in this letter.

The update to our previous report adds four additional months experience. We reviewed our methodologies and assumptions used in our October 31, 2017 report. Our discount rate has changed from 3.35% to 3.47% (1.32% to 1.44% for indexed benefits). For Premium Liabilities our discount rate has changed from 0.97% to 1.10% (1.32% to 1.44% for indexed benefits). These changes were made to reflect an increase in the portfolio yield from October 31, 2017 to February 28, 2018.

All other previous methodologies and assumptions used to estimate the policy liabilities remain appropriate."

Reinsurance

On page 21 of the October 31, 2017 report, the actuary describes the reinsurance structure of MPIC. MPIC is protected by excess of loss and catastrophe reinsurance treaties. There have been no changes to the program over the past year.

Internal Loss Adjustment Expense

We have reviewed the derivation of the provision for ILAE associated with the settlement of unpaid losses. The appointed actuary estimates ILAE by applying the historical average ratio of expense payments to the

gross paid losses to 50% of the outstanding losses and 100% of the ratio to the selected IBNR. The selected paid to paid ratio of 18.4%, the same as used in the prior valuation.

Discount Rate

We reviewed the actuary's selection of an interest rate used to discount the policy liabilities. The discount rate used is 3.47%, compared to 3.39% in last year's evaluation. For the lines which are inflation indexed, AB Weekly Indemnity and AB Other – Indexed, a rate of 1.44% was used which is the real adjusted yield. We believe the approach used by the actuary is reasonable.

We used the weighted average market yield using both market value and duration as weights. Based on the calculation, the discount rate that we came up with is 3.64% (net of a 0.07% investment expense reduction). We consider the actuary's selection of the discount rate reasonable.

Provision for Adverse Deviations (PfADs)

In Exhibit 7 & 8 of the report, the actuary presents the margins for adverse deviations (MfADs) for each line of business. For Basic, the AB weekly indemnity claims development margin for years 2007 to 2015 was reduced from 15% to 10%. The MfADs used are listed below:

MfAD Claims Development

Basic Insurance	**MfAD**
Bodily Injury - Basic	15.00%
Pre-PIPP	12.50%
Accident Benefits:	
Weekly Indemnity (2016 & After)	15.00%
Weekly Indemnity (prior to 2016)	10.00%
Pre-PIPP	5.00%
Other (Indexed) (2008 & after)	15.00%
Other (Indexed) (Prior to 2008)	10.00%
Other (Non-Indexed)	10.00%
Pre-PIPP	5.00%
Collision - Basic	7.50%
Comprehensive - Basic	7.50%
Property Damage - Basic	5.00%

MfAD Reinsurance

Line of Business	MfAD
Basic:	
Accident Benefits – Weekly Indemnity	5.00%
Accident Benefits – Other (Indexed)	5.00%
Comprehensive – Basic	2.50%
Extension:	
Comprehensive - Extension	2.50%
SRE:	
Bodily Injury, Property Damage & Accident Benefits	5.00%
Collision & Comprehensive	2.50%

MfAD Interest Rate

The selected interest MfAD for the total portfolio is 0.50%, which is the same as last year, which reflects long tail nature of liability and relatively low risk fixed income portfolio.

We have reviewed the actuary's selection of interest rate, claims development and reinsurance recovery PFAD margins and deem them to be reasonable.

Variability in Estimates

As of February 28, 2018, MPIC experienced an unfavorable one year run-off of $37.4 million for Basic Insurance on a gross basis. We consider this to be within a reasonable range. The details are shown in Exhibit 3.

Line of Business	2017 Gross Redundancy/(Deficiency) ($000)
Bodily Injury	881
Property Damage	(2,142)
Collision	(1,252)
Comprehensive	3,109
AB – Weekly Indemnity	(64,148)
AB – Other (Indexed)	32,704
AB – Other (Non-indexed)	(6,573)
Total Basic Insurance	**(37,420)**

Premium Liabilities

We re-calculated the development of the premium liabilities related to the unearned premiums. The Basic coverage generates a premium deficiency, once all DPAC have been written off. We are satisfied that the AA's premium liabilities are reasonable and appropriate for MPIC.

Other Net Policy Liabilities

The actuary did not mention in the report if there are any other policy liabilities. In general, other policy liabilities relate to reinsurance agreements with sliding scale commissions or adjustable premiums. We rely on the auditor to confirm that there are no other policy liabilities related to reinsurance contracts with sliding scale commissions or adjustable premiums.

Minimum Capital Test

The Minimum Capital Test is not applicable for MPIC.

Incentive Compensation

In the October 31, 2017 report, the actuary discloses the basis of his compensation, including any incentive compensation. As stated above, this disclosure is assumed to continue to apply. This disclosure is in accordance with CIA directives and guidelines communicated by the Office of the Superintendent of Financial Institutions (OSFI).

Additional Disclosure

In the October 31, 2017 Basic report, the actuary discloses information on: Annual Reporting to the Board of Directors and Continuing Professional Development Requirements. As stated above, these disclosures are assumed to continue to apply. These disclosures are in accordance with CIA directives and OSFI guidelines.

Conclusion

The valuation, as performed by Joe Cheng for MPIC as at February 28, 2018, provides reasonable estimates of the policy liabilities of MPIC with the proviso that we rely on the auditor to verify the statements presented above.

MP.3 PUBLIC INVITATION

Manitoba Public Insurance

NewsRelease

June 15, 2018

Manitoba Public Insurance requests modest rate increase ─ 2.2 per cent

Manitoba Public Insurance announced it has requested a 2.2 per cent overall rate increase for the 2019/20 insurance year in its general rate application (GRA) filed with the Public Utilities Board today. If approved, the average passenger vehicle owner will pay about $27 more in premiums per year as a result of the requested increase, or $2.25 per month.

“The overall rate increase is required to maintain the Corporation’s Rate Stabilization Reserve which is used to absorb adverse financial results,” Ben Graham, president and chief executive officer of Manitoba Public Insurance said today.

“We fully recognize that our customers expect us to deliver comprehensive auto insurance coverage and service at rates that are affordable, predictable and stable over time. We believe this rate application continues to deliver on that mandate.”

Operationally, the Corporation continues to experience higher physical damage costs directly related to newer-model vehicles. Over the past five years, collision claim costs have been growing about five per cent annually, compared to the prior long term average of about two to three per cent annually.

“Newer vehicles have a wide-range of complex materials and driver assist technology features which are costly to repair or replace after a collision,” said Graham. “Understandably, newer vehicles of today are more expensive to repair than vehicles a decade ago.”

Manitoba’s weather can also have a major influence on the Corporation’s financial results. Fortunately, last year there was a significant reduction in vehicle hail claims ─ 2,100 claims filed in 2017, compared to 11,000 and 13,000 in 2016 and 2015, respectively.

The Corporation also continues its focus on fiscal prudence and cost containment, having lowered its expense forecast by $6 million, which builds on the forecasted staff and expense reductions identified in last year’s GRA.

“The combination of corporate cost containment, combined with a reduction of weather-related comprehensive claims both contributed to this modest rate increase,” said Graham.

Maintaining Adequate Capital
All insurance companies hold funds to pay claims, as well as to maintain a buffer of capital to endure unexpected adverse circumstances. Manitoba Public Insurance's 'buffer' is known as the Rate Stabilization Reserve and to remain effective it must grow with the business. For the 2019/20 insurance year, the Corporation is proposing a Capital Maintenance Provision which accounts for 2.1 per cent of the overall 2.2 per cent increase.

"This will ensure the financial strength of public auto insurance is maintained, and that the Rate Stabilization Reserve can continue to protect motorists against rate increases due to unexpected variations and adverse circumstances," said Graham.

Finalizing Vehicles For Hire Rates
The 2019 GRA will also seek final approval of the Vehicle for Hire (VFH) rates approved on an interim basis by the PUB in January 2018. VFH rates are available to private passenger vehicle and light truck owners interested in offering ride-share services in accordance to municipal by-laws starting March 1, 2018. VFH rates also apply to existing types of vehicles for hire such as taxicabs, limousines and accessible vehicles.

If approved by the Public Utilities Board, a total of 547,166 vehicles (excluding trailers and off-road vehicles) will receive a premium increase in 2019/20, with 39.5 per cent of these vehicles increasing by less than $50 per year. Approximately 37.7 per cent of all vehicle owners (excluding trailers and off-road vehicles) will see no change or a decrease in premium over 2018/19 rates.

Proposed rates will be effective March 1, 2019 but because renewal dates are staggered, some vehicle owners won't pay the new rates until February 28, 2020.

While individual rates will continue to vary based on the type of vehicle being insured, vehicle use, rating territory, and driving history, the following overall rate increases have been requested by major vehicle class.

Major Use	**Applied for Rate Changes**
Private passenger	2.4%
Commercial	2.4%
Public	0.6%
Motorcycles	3.1%
Trailers	-4.7%
Off-road Vehicles	-20.0%
Overall (applied for)	2.2%

Annual report

Manitoba Public Insurance also released its 2017/18 annual report this week. The Corporation reported a net income from operations of $91.1 million. The Corporation's overall claims costs decreased by approximately $72.5 million compared to the previous year due primarily to the fact that a significant actuarial adjustment was made in 2016/17. Fewer hail claims also contributed to the decrease in claims costs, although offset by increases in collision and property damage claims over the same period.

The increase in net income was also due to an increase of $65.3 million in revenues, and an increase of $38.2 million in investment income.

Last year, Manitobans filed an average of 1,203 claims every working day. This represents about $3.1 million in Autopac claims every working day.

Public Utilities Board

Régie des services publics

Notice of Public Hearing and Pre-Hearing Conference

Applicant: Manitoba Public Insurance Corporation

HEARING:

The Public Utilities Board (Board) anticipates holding a public hearing of an application from Manitoba Public Insurance Corporation (MPI) for approval of rates and premiums for compulsory vehicle and driver insurance as of March 1, 2019. The hearing would take place at the Board's Hearing Room, 4th Floor, 330 Portage Avenue, Winnipeg, MB (commencing at 9:00 a.m.) on October 15, 2018. A Pre-Hearing Conference is to be convened by the Board in its offices at 9:00 a.m. on June 25, 2018.

RATE IMPACT:

The Corporation is requesting approval for Basic Autopac vehicle insurance rates and premiums effective March 1, 2019, which, if approved, will result in 2.2% overall increase in MPI's Basic vehicle premium revenue (in addition to the revenue impact of vehicle upgrades and an increased overall driver and vehicle population).

MPI proposes that this rate increase be comprised of two elements: i) a 0.1% increase to the break-even cost of policies, and ii) a 2.1% increase for a Net Capital Maintenance Provision to maintain Basic's capital position through the rating year, as measured by the Minimum Capital Test. The Capital Maintenance Provision recognizes the impact of investment income on Basic's Rate Stabilization Reserve, and collects only the residual amount required to maintain Basic's capital position.

MPI is also seeking final approval of 2017/18 and 2018/19 Vehicles for Hire rates, approved by the Board on an interim basis by Order 11/18 on January 15, 2018. MPI is not proposing any changes to the Driver Safety Rating system in the 2019 General Rate Application.

Individual vehicle and driver premiums would vary depending on claim and driving experience, insurance use, territory and vehicle rate group. Full particulars, including the rate impact and application, can be found on the Manitoba Public Insurance website www.mpi.mb.ca.

PRE-HEARING CONFERENCE:

Those seeking Intervener status should notify the Board of their intention, by applying to the Board Secretary before the now scheduled Pre-Hearing Conference of June 25, 2018. Interveners may be entitled to financial assistance, and the Board's Rules of Practice and Procedure (Rules) provide the related guidelines, which can be seen at the Board's website: www.pubmanitoba.ca or obtained on request to the Board, by either emailing (publicutilities@gov.mb.ca), writing or calling the Board Secretary (204-945-2638 or 1-866-854-3698, toll free). Parties wishing to submit a brief or to express comments at the hearing should also contact the PUB via the Board's on-line comment tool.

GENERAL INFORMATION:

Interested parties should take note that the Board does not have jurisdiction over the MPI lines of business denoted as Extension or SRE, or as to MPI's Driver and Vehicle Licensing operation.

Persons seeking further information as to MPI's application, or with respect to the Board's process, and/or wishing to address the public hearing in French should notify the Board Secretary by September 1st, 2018. As well, interested parties may examine MPI's application and supporting materials, either at the offices of the Corporation, on its website, or in the Board's office.

The Manitoba Ombudsman has recently issued privacy guidelines for administrative tribunals. The Board is mindful of its obligations under those guidelines. Its decisions in respect of the application being considered will be sensitive to the guidelines. Personal information will not be disclosed unless it is appropriate and necessary to do so. However, the Board advises participants that these proceedings are public and that as a result, personal information protections are reduced.

Public Notice

You're Invited

to share your views about the proposed rate increases from Manitoba Public Insurance

The Manitoba Public Insurance Corporation (MPI) has applied to the Public Utilities Board (Board) for a 2.2 per cent increase to Basic Autopac vehicle insurance rates and premiums, effective on March 1, 2019.

Further details are available at the MPI website, **www.mpi.mb.ca** or the Board's website at **www.pubmanitoba.ca**.

A public hearing on the proposed increases will be held on:

Monday, October 15, 2018 at 9:00 a.m.
Public Utilities Board Hearing Room
4th Floor, 330 Portage Avenue, Winnipeg, MB R3C 0C4

If you are interested in learning about this rate increase, you are encouraged to attend the hearing, observe the hearing via live streaming, or provide your perspective through the Board's on-line comment tool.

If you wish to speak at the hearing or make a written submission, please contact the Board Secretary at 204-945-2638 or toll free 1-866-854-3698, no later than **September 1, 2018**.

For more information, visit **www.pubmanitoba.ca**.

FFM.3.3 Test Application 6
FFM.3.3.1 Update Investment Income from allocated to direct 7
FFM.4 TEST RESULTS AND ASSESSMENT 8

FINANCIAL FORECASTING MODEL UPDATE

FFM.1 PURPOSE

The purpose of this document is to identify any reporting or functional updates within the Financial Forecast Model (FM) from the prior year. Annually, Manitoba Public Insurance (MPI, or the Corporation) undertakes model updates or modifications at the request of the Public Utilities Board and MPI senior management. This document will outline all 2019 GRA changes to the FM.

FFM.2 SCOPE

An update has been defined as any change in automated calculation as a result of a change in forecasting assumption that is directly contained within or as an output of the FM. Any changes in forecasting assumptions or independent calculations not contained within the FM and which do not require an update are not considered an FM update and are beyond the scope of this document. Forecasting assumption changes are described within the applicable parts of the Rate Application.

FFM.3 FINANCIAL MODEL UPDATES

For the purposes of this document, an update has been classified as either a reporting update or a functional update. A reporting update, detailed in FFM.3.1, implies that an underlying calculation or functionality of the FM has not changed, but rather a change has occurred in the financial statement presentation or similar report output. These changes have no impact to calculated results. A functional update, detailed in FFM.3.2, implies a change in the actual formulaic calculation directly within the FM, which may influence an output or financial result.

FFM.3.1 Report Updates

A reporting update has no underlying change in financial calculation. Updates made to the FM have been tested, mainly by comparing financial results and impacts pre and post change.

FFM.3.1.1 Update Model MCT Calculation as per 2018 OSFI Guidelines

The FM provides a forecasted Minimum Capital Test (MCT) based on the Office of the Superintendent of Financial Institutions' (OSFI) MCT template. The inputs for the MCT calculation are primarily balance sheet items and have been functionally tested previously. To the extent of the input detail available, the FM MCT provides a close approximation of the Corporation's estimated actual target as well as further validation of the actual MCT it calculated. The FM includes the latest updates, as per OSFI guidelines and, as of the date of this writing, these updates did not have an effect on the FM.

FFM.3.2 Functional Updates

A functional update may have a financial impact or change in financial result. Updates of this nature have been unit and system tested.

Functional updates are as follows:

FFM.3.2.1 Update Investment Assets and Income from allocated to direct.

Prior to the update, Investment Assets and Income were allocated to each line of business through an allocation process. As a result of the recent Asset Liability Management (ALM) strategy, an update has been made whereby investment assets are directly assigned to each operating line of business (Basic and Non-Basic) as well as to Employee Future Benefits.

Please refer to *Part VI Investments* for further discussion regarding the recent ALM strategy.

FFM.3.2.2 New Investment Asset Classes

The following investment asset classes have been added to the investment portfolio:

-Global Equities

-Global Low Volatility Equities

-Private Debt

Please refer to *Part VI Investments* for more details.

FFM.3.3 Test Application

Internal testing was carried out as appropriate to the component parts of the FM. The nature and degree of testing will vary according to the extent of the change and the level of the financial impact.

The functional updates stated above did not require new calculations or model logic but rather were adopted from formulas and logic existing within the current FM. Emphasis was placed on unit and system testing whereby the component item has been tested to ensure it is functioning as expected (unit test) and that it has been incorporated correctly within the financial statement results (system test).

Given that reporting updates have no financial impact to the financial statement results and unit testing has been previously conducted, the application of testing has been contained to system testing, whereby the linkage between the reporting item or component and financial statement line item is tested for consistency, correctness and completeness.

FFM.3.3.1 Update Investment Income from allocated to direct

The figures below provide for a comparison between allocated and direct allocation of investment income:

Figure FFM-1 Investment Income Comparison - Allocated vs Direct

No.			Fiscal Year				
1		Line of Business	2018-19	2019-20	2020-21	2021-22	2022-23
2	Pre Change (Allocated)	Basic	85.76%	84.88%	83.77%	82.65%	81.42%
3		Non-Basic	14.24%	15.12%	16.23%	17.35%	18.58%
4	Post Change (Direct)	Basic	85.76%	87.30%	86.08%	84.12%	82.39%
5		Non-Basic	14.24%	12.70%	13.92%	15.88%	17.61%

Please refer to *Part VI Investments, INV.2.2.1* for a summary of financial impacts between pre and post ALM change.

FFM.4 TEST RESULTS AND ASSESSMENT

The determination of whether or not a test has passed depends on the type of test employed. For practical purposes, three types of unit and system tests were carried out: links; calculations; sensitivity.

The FM passed all of the links and calculations tests conducted, and was acceptably assessed in all sensitivity tests.

Corporate Bond Implementation Plan

Mr. Yien presented Agenda Item C.1 "Corporate Bond Implementation Plan" which was discussed by the Members.

The Committee supports the intention to purchase additional Corporate Bonds to increase the weight of the allocation from the current 2% to 4%. The purchase is accordance with the Investment Policy Statement approved in principle subject to due diligence of the Corporate Bond Implementation review. As part of the due diligence review it is the Committee's understanding that the purpose of the various investment funds will be clearly defined through the Asset Liability Management study that is currently underway.

Mr. DiNoto and Mr. Makarchuck of Mercer (Canada) Limited joined the meeting via teleconference.

Asset Liability Management Study

Mr. Yien presented Agenda Item C.2 "Asset Liability Management Study" which was discussed by the Members.

The Committee will meet in early December, 2017, to discuss the final report.

Mr. DiNoto and Mr. Makarchuck withdrew from the meeting.

President & CEO's Report	18-067	Mr. Graham presented Agenda Item 3.1 "President and CEO's Report" providing a report on the following items: • Public Utilities Board Technical Conferences • Capital Maintenance Provision • Asset Liability Management Study [redacted] [redacted]

Extension Transfer

18-071

Mr. Giesbrecht presented Agenda Item 4.4 “Extension Transfer”.

Moved by Mr. Grestoni and seconded by Mr. Bubis that the Members approve a transfer of excess retained earnings from the Extension line of business to the Basic line of business as at February 28, 2018 in the amount of $37,300,000 to ensure Basic exceeds the minimum requirement of $201 million for satisfactory financial condition and closes the 2017/18 fiscal year with the Rate Stabilization Reserve (RSR) in sound financial condition.

CARRIED

2019/20 Basic Autopac Program and Rates

18-072

Mr. Johnston presented Agenda Item 5.1 “2019/20 Basic Autopac Program and Rates”.

Moved by Ms. Schock and seconded by Mr. Grestoni

1. That the Members approve the 2019/20 General Rate Application forecast *before* the impact of proposed changes to the Corporation’s Asset and Liability Management program.

2. That the Members approve the methodology used to determine the 2019/20 Basic break-even rate indication per Accepted Actuarial Practice of +.02% on the understanding that minor changes to this indication may occur as a result of the Board’s decision on the ALM implementation strategy presented to the Investment Committee on April 30, 2018.

3. That the Members approve the methodology used to determine the 2019/20 Basic rate indication of 2.9% *after* inclusion of investment income on the Rate Stabilization Reserve and a Capital Maintenance Provision.

CARRIED

Ms. Kacher joined the meeting. Mr. Keith rejoined the meeting and Mr. Johnston withdrew from the meeting.

[redacted]

Ms. Kacher and Mr. Keith withdrew from the meeting. Mr. Wennberg joined the meeting.

PDR Business Case and Customer Claims Reporting System (CCRS) Next Steps

18-076

Mr. Wennberg presented Agenda Item 5.5 “PDR Business Case and Customer Claims Reporting System (CCRS) Next Steps”.

Moved by Mr. Grestoni and seconded by Mr. Bubis that the Members authorize Management to begin closing down activities for the Customer Claims Reporting System (CCRS) project effective immediately.

Following discussion, Members received the report as information.

CARRIED

Messrs. Wennberg and Giesbrecht withdrew from the meeting.

[redacted]

Investment Committee Report – Asset Liability Management Study Recommendations and Implementation Plan	18-104	Moved by Mr. Grestoni and seconded by Ms. Schock that the Members ratify the recommendation of the Investment Committee to approve for the Minister of Finance's consideration of the following: 1. Approval to invest in the listed new asset classes of private debt, global equity and global low volatility equities; 2. The creation of five segregated portfolios for Basic Claims Liabilities, Extension, SRE, Employee Future Benefits and RSR; 3. Adoption of asset allocations for each portfolio as shown in Figure 3 *Recommended Target Asset Allocations* (ALM Implementation Plan, April 30, 2018, found on page 10 of agenda item B.1 Attachment A); 4. Adoption of the Implementation Plan (as described in the ALM Implementation Plan, April 30, 2018, found on pages 12 to 22 of agenda item B.1 Attachment A); 5. Realization of gains in Canadian and U.S. equity portfolios in 2018/19; 6. Hire a consultant to assist with search for external managers; 7. Hire a transition manager to manage the transitions between public market asset classes as necessary (purchases and sales). CARRIED

Members identified the importance of notifying Department of Finance of the details of the ALM Implementation Plan.

2019/20 Basic Autopac General Rate Application

18-109

Mr. Johnston presented Agenda Item 4.2 “2019/20 Basic Autopac General Rate Application”.

Moved by Ms. Wowryk and seconded by Ms. Nabess that the Members approve the application to the Public Utilities Board for 2019/20 rates for the Basic Autopac Program as set out below:

1. Overall 2.2% increase to the average rate for Basic Autopac comprised of a 0.1% break-even rate change and a 2.1% net capital maintenance provision.

2. Rates for individual risk classifications to be adjusted based on statistically determined experience indicators.

3. Classification changes to be implemented on a revenue neutral basis.

4. No change to the driver premiums or vehicle premium discounts on the Driver Safety Rating (DSR) scale.

CARRIED

Dynamic Capital Adequacy Test (DCAT) and Minimum Capital Test (MCT)	18-110	Moved by Ms. Schock and seconded by Ms. Wowryk that the Members ratify the recommendation of the Audit, Finance & Risk Committee to approve a lower Total Equity Rate Stabilization Reserve (RSR) target of 36% MCT for the 2019/20 fiscal year based on the minimum capital required to achieve satisfactory future financial condition at the 1-in-40 year level under the 2018 Dynamic Capital Adequacy Test; an upper Total Equity RSR target of 85% MCT for the 2019/20 fiscal year based on a 1-in-40, 2-year operating range above the lower RSR target as calculated in the 2018 Dynamic Capital Adequacy Test report; and, the Corporation include these RSR targets in the 2018 GRA. CARRIED

Mr. Johnston withdrew from the meeting.

PUB (MPI) 1-2

Part and Chapter:	**Part V RM**	**Page No.:**	**15-16, 19 of 58 and RM Appendix 8**
PUB Approved Issue No:	**2. Rate Indication**		
Topic:	**Ratemaking in Accordance with Accepted Actuarial Practice**		
Sub Topic:	**Change Documentation**		

Preamble to IR (If Any):

In RM Appendix 8, the Corporation states: *There were no significant methodology or assumption changes made in the 2019 GRA (from the 2018 GRA).*

However, at a minimum, the basis of selection of the cash flow discount rate has changed to no longer include consideration of the expected new money yield on non-marketable bonds [p. 19].

Question:

Please identify, describe, and provide the rationale for any significant changes in methodology or basis of selection of assumptions being introduced with this Application (relative to the 2018 GRA). Please include the estimated impact of each such change, with supporting documentation.

Rationale for Question:

To assess the reasonableness of any significant changes in methodology or basis of selection of assumptions.

RESPONSE:

The Corporation maintains that its statement at *Part V, RM Appendix 8* is correct. The method of deriving the new money yield is based on PUB Order 130/17 (see page 28) issued within the 2018 GRA. This method was also adopted for the 2019 GRA.

The exclusion of non-marketable bonds is, with respect, neither a methodology nor an assumption change. It is a decision by the Corporation to refrain from purchasing non-marketable bonds in the future (i.e. the Corporation will allocate no "new money" for purchasing non-marketable bonds). Please also see *PUB (MPI) 1-3*.

PUB (MPI) 1-3

Part and Chapter:	**Part RM**	**Page No.:**	**19 of 58**
PUB Approved Issue No:	**2. Rate Indication**		
Topic:	**Ratemaking in Accordance with Accepted Actuarial Practice**		
Sub Topic:	**Cash Flow Discount Rate**		

Preamble to IR (If Any):

The Corporation states: *The investment return used to discount future payments is based on the market value weighted yield of MPI's marketable bonds portfolio i.e. the new money yield. The investment return of 3.21% reflects the projected yield as at the midpoint of rating year 2019/20 i.e. September 1, 2019.*

In its response to PUB (MPI) 1-12 a) of the 2018 GRA, the Corporation stated: *The Corporation has used the projected duration weighted investment return of the Corporation's fixed income portfolio as the basis for the discount rate selection on the assumption that this investment return is reflective of the assets that are expected to be acquired with the net cash flows.*, in effect explaining that the use of a portfolio yield rate was intended as an approximation of a new money yield rate.

Question:

a) Please provide supporting documentation for the derivation of the assumed 3.21% cash flow discount rate, linking to the Investment section as appropriate.
b) Given that non-marketable bonds also back the actuarial liabilities, why does the cash flow discount rate not also depend on the expected new money rate for non-marketable bonds?
c) Please show the derivation of an alternate cash flow discount rate based on an appropriately weighted average expected new money yield rate as at 1 September 2019 (consistent with the financial forecast) for the mix of fixed income

investments and durations expected to back the related actuarial liabilities, and prepare an alternate overall rate indication using this alternate cash flow discount rate, with supporting documentation.

d) Please repeat the response to part c) above reflecting the Board approved 50/50 interest rate forecast.

Rationale for Question:

To assess the sensitivity of the rate indication to the cash flow discount rate selection.

RESPONSE:

a) See Figure 1 for the supporting documentation for the derivation of the assumed 3.21% new money yield as of September 1, 2019. The Investment section does not provide this information.

Figure 1: New Money Yield Calculation

Line No.	New Money Yield Calculation	Q2 2019/20*
1	*(C$000s)*	
2	Market Value	
3	Provincial Bonds	977,873
4	Corporate Bonds	381,264
5	Total Marketable Bonds	1,359,137
6		
7	Percentage Allocation	
8	Provincial Bonds	71.9%
9	Corporate Bonds	28.1%
10	Total Marketable Bonds	100.0%
11		
12	Yield To Maturity	
13	Provincial Bonds	2.95%
14	Corporate Bonds	3.90%
15	New Money Yield	3.21%
16	* Forecast for August 31, 2019, which is used for the September 1, 2019 New Money Yield	

b) MPI does not intend to purchase non-marketable bonds going forward. As such, "new money" derived from policies issued in the 2019/20 rating year, will not be allocated for the purchase of non-marketable bonds. Given that the discount rate (for ratemaking) must represent the "*expected investment income to be earned on assets that might be acquired with the net cash flows resulting from the revenue at the indicated rate*" (see *Part V, Ratemaking, page 19*), the discount rate calculation excludes non-marketable bonds.

c) Per the response to (b) above, the discount rate of 3.21% "reflects the cash flow discount rate based on an appropriately weighted average expected new money yield rate as at September 1, 2019 for the mix of fixed income investments and durations" expected to back the policies issued in the 2019/20 rating year.

d) Based on the 50/50 interest rate forecast, the discount rate would increase from 3.21% to 3.50%. This would decrease the required overall rate (exclusive of Net CMP) to breakeven from 0.1% to -0.5% (see *Part V, Ratemaking, page 40*). The required overall rate (inclusive of Net CMP) would also decrease from 2.2 to 1.2% (see *Part V, Ratemaking, page 41*).

PUB (MPI) 1-4

Part and Chapter:	**Part V RM**	**Page No.:**	**29 of 58**
PUB Approved Issue No:	**2. Rate Indication**		
Topic:	**Ratemaking in Accordance with Accepted Actuarial Practice**		
Sub Topic:	**Vehicle Drift**		

Preamble to IR (If Any):

Question:

a) Please provide supporting documentation for the derivation of the estimated and projected annual overall vehicle drift assumptions for 2017/18 through 2019/20, including commentary on the relationship with the HTA vehicle drift assumptions documented in REV.1.2.
b) Please explain why it is necessary to apply vehicle drift adjustments through to the average earning date for the March 2019 rate (rather than the average written date for the March 2019 rate).

Rationale for Question:

To assess the reasonableness of Vehicle Drift assumptions.

RESPONSE:

a) Per *Part V, Ratemaking, page 29*, the annual overall vehicle drift for 2017/18 of 2.24% is "*determined per the rate model*".

Appendix 1 shows the derivation of the annual overall vehicle drift up to March 1, 2019 (in a format similar to *Part V, RM Appendix 7*). As indicated, the annual

overall vehicle drift up to March 1, 2019 is 2.71%. The annual overall vehicle drift for 2018/19 was determined by solving the following equation:

((1 + 2.71%) / ((1 + 2.24%) ^ (4/12))) - 1 i.e. 1.96%

Appendix 2 shows the derivation of the annual overall vehicle drift up to March 1, 2020 (per *Part V, RM Appendix 7*). The annual overall vehicle drift, up to March 1, 2020, is shown at 4.92%. The annual overall vehicle drift for 2019/20 was determined by solving the following equation:

((1 + 4.92%) / (1 + 2.71%)) - 1 i.e. 2.15%

b) MPI will review the appropriateness of using the average earned date in the 2020 GRA. If the Corporation used the average written date (instead of the average earned date) in the context of the 2019 GRA, the breakeven required overall rate change would increase from 0.1% to 1.4% but the required overall rate change inclusive of Net CMP would remain unchanged at 2.2%.

PUB (MPI) 1-5

Part and Chapter:	**Part V RM**	**Page No.:**	**31 of 58**
PUB Approved Issue No:	**2. Rate Indication**		
Topic:	**Ratemaking in Accordance with Accepted Actuarial Practice**		
Sub Topic:	**Expected Return on Investment Assets Supporting Basic Total Equity**		

Preamble to IR (If Any):

The proposed approach to recognizing the expected return on investment assets supporting Basic Total Equity draws on information shown in Figure INV-53 RSR Investment Income.

Question:

Please provide supporting documentation for the derivation of the information shown in Figure INV-53, with links to other GRA exhibits as appropriate.

Rationale for Question:

To assess the reasonableness of the proposed approach to recognizing the expected return on investment assets supporting Basic Total Equity.

RESPONSE:

Figure INV-54 provides the asset values for Basic RSR, which supports *Figure INV-53*.

Sections 3 to 11 of the Investment chapter of the Application show how the results of the investment portfolio for the Basic line of business were calculated. The basic line of business portfolio is a combination of the Basic Claims and the RSR portfolios. Where appropriate, the above sections contain discussions and assumptions for the

RSR portfolio that are separate and different from the assumptions used for the Basic Claims portfolio. For example:

- **Cash:** Section 3 discusses the cash holdings, which is forecasted to have $0 dollars over the four-year forecast for RSR.

- **Marketable Bonds**: Section 4 discusses how the interest income and capital return, which is the same process for Basic claims and Basic RSR, is calculated. Separate assumptions for the RSR portfolio are provided for yield to maturity and convexity.

- **Non-Marketable bonds:** Section 5 describes the calculation process for MUSH bonds. Asset values for MUSH in the RSR portfolio are included in *Figure INV-54*.

- **Private Debt and Growth Assets:** Sections 5 to 10 provide the assumption for private debt and all of the growth asset classes (Canadian equity, global equity, low volatility global equity, real estate and infrastructure). Note that there are no private debt and growth assets in the Basic Claims portfolio, so all assumptions and tables (for 2019/20 and thereafter) show information for the RSR portfolio only.

- **Rebalancing:** Separate rebalancing assumptions for RSR are provided in *Section INV.11.3*.

PUB (MPI) 1-6

Part and Chapter:	**I COM**	**Page No.:**	**9**
PUB Approved Issue No:	**3. Compliance with Board Orders**		
Topic:	**Compliance with PUB Orders**		
Sub Topic:	**Board Order 130-17 11.23**		

Preamble to IR (If Any):

Order 11.23 - A Technical Conference shall be held on road safety and loss prevention in early 2019, which shall be initiated by the Board but on such dates as are mutually agreed as between the Board and MPI.

MPI expects to begin preparations for this Technical Conference in Q3 of 2018.

Question:

Please advise as to what preparations MPI intends to undertake for the Technical Conference.

Rationale for Question:

To understand the progress of the response to Order 11.23.

RESPONSE:

In preparation for the Technical Conference in 2019, the Corporation intends to prepare progress summary reports, in consultation and collaboration with stakeholders, for each of the identified topics including:

- progress on the implementation of the Loss Prevention Strategy and Framework,
- activities of the External Stakeholder Committee on Loss Prevention and member feedback on the effectiveness of that committee;
- activities of the Provincial Road Safety Committee and progress on priorities noted within the Provincial Road Safety Plan - Road to Zero;
- progress on the 2017-2020 Road Safety Operational Plan;
- review of the Corporation's priorities for road safety and loss prevention;
- review of business case related to Experienced Rider Program;
- success of the Drug Impaired Driving Communication Strategy and any other efforts undertaken by the Corporation to address drug-impaired driving;
- the Corporation's ongoing efforts to address speed and distracted driving;
- progress on the High School Driver Education Program Redevelopment;
- an update on the Corporation's rural road strategy;
- a jurisdictional scan conducted by the Corporation of road safety measures; and
- an examination of safety for drivers and clients of Vehicles For Hire.

In the coming months, the Corporation will confirm with the PUB, the Technical Conference's objectives, its schedule of topics, and the expected approach for including the information on the public record; as well as establish the expected duration and potential dates of the Technical Conference.

The Corporation invited members of the External Stakeholder Committee on Loss Prevention to provide any additional road safety issues or subject matter that they wished to see discussed at the Technical Conference at the June quarterly meeting.

PUB (MPI) 1-7

Part and Chapter:	**VI INV**	**Page No.:**	**48**
PUB Approved Issue No:	**4.a. Financial Forecast- Financial Forecast Accuracy**		
Topic:	**Canadian Equities**		
Sub Topic:	**Turnover Assumption**		

Preamble to IR (If Any):

The average mid-point of the range for the manager's expected future turnover was 20%. Based on this information, a 20% turnover ratio was used in the model for 2018/19. However, after separation of asset classes in the financial model occurs … at the end of Q4 2018/19, the forecasted turnover rate thereafter will be 0% because it is expected that equity holdings will be held in pooled funds.

Question:

a) Why does the planned shift to pooled funds necessarily imply a turnover assumption of 0%?
b) Please summarize the accounting treatment of changes in unrealized gains/losses on such pooled funds.

Rationale for Question:

To assess the reasonableness of the Basic financial forecast assumptions.

RESPONSE:

a) When the Corporation holds units in a pooled fund only turnover of the pooled fund units results in a realization of gains. The Corporation does not plan to sell any units of the fund and therefore does not plan to realize any gains. Turnover of

holdings within the fund will not result in the realization of gains for the Corporation, as it is only turnover of the pooled fund units that results in the realization of gains.

b) The Corporation expects no change to the accounting treatment of the unrealized gains/losses on such pooled funds. The investments are anticipated to remain as Available for Sale.

PUB (MPI) 1-8

Part and Chapter:	**VIII FFM**	**Page No.:**	**6**
PUB Approved Issue No:	**4.a. Financial Forecast- Financial Forecast Accuracy**		
Topic:	**Financial Forecast Model**		
Sub Topic:	**Update for ALM Changes**		

Preamble to IR (If Any):

Prior to the update, Investment Assets and Income were allocated to each line of business through an allocation process. As a result of the recent Asset Liability Management (ALM) strategy, an update has been made whereby investment assets are directly assigned to each operating line of business (Basic and Non-Basic) as well as to Employee Future Benefits.

Question:

a) Please provide a complete list of the Corporation's investment portfolio "buckets" into which investment assets have been assigned for financial forecast modeling purposes.
b) Are financial forecast modeling assumptions separately specified for each of these investment portfolio buckets?

Rationale for Question:

To assess the reasonableness of the Basic financial forecast assumptions.

RESPONSE:

a) Starting in Q1 of 2019/20, the five financial portfolios modeled are: 1) Basic Claims, 2) RSR, 3) Employee Future Benefits, 4) SRE and 5) Extension.

b) Starting in Q1 2019/20 for fixed income, the yield to maturity and duration assumptions used in the financial model for Basic Claims are separate from those used for non-Basic Claims (including RSR and Employee Future Benefits). All portfolios containing growth assets (i.e. equities, real estate and infrastructure) use a single set of return assumptions for growth assets in the financial model. The Basic Claims portfolio contains no growth assets.

The asset mixes for Basic Claims, RSR and Employee Future Benefits each use different assumptions as shown in Figure INV-1, reproduced below for convenience.

Figure INV- 1: Asset Mix to be Implemented End of Q4 2018/19

PUB (MPI) 1-9

Part and Chapter:	**V REV 1.1-1.2; Figure REV-5**	**Page No.:**	**7-10**
PUB Approved Issue No:	**4.b. – Financial Forecast – Changes in Projected Financial Results**		
Topic:	**Motor Vehicle Premiums**		
Sub Topic:	**Volume and Upgrade Factors**		

Preamble to IR (If Any):

Question:

a) Please provide a restated PF.1, PF.2 and PF.3 and R.1 pages 5 and 6 "Motor Vehicle Premiums Written and Earned," to reflect a volume factor of 1.75% throughout the forecast period.
b) Please provide a restated PF.1, PF.2 and PF.3 and R.1 pages 5 and 6 "Motor Vehicle Premiums Written and Earned," to reflect a vehicle upgrade factor of 2.65% throughout the forecast period.
c) Please provide the impact of the changes in (b) on the indicated rate in accordance with accepted actuarial practice.

Rationale for Question:

To test the forecast's sensitivity to changes in the volume and upgrade factors.

RESPONSE:

a) Please see *Appendix 1* for PF.1, PF.2, PF.3 and REV.1. Changing the volume factor to 1.75% throughout the forecast period reduces the overall required rate change based on breakeven rates (inclusive of the net CMP), from 2.2% to 2.1%.

b) Please see *Appendix 2* for PF.1, PF.2, PF.3 and REV.1.

c) Changing the vehicle upgrade factor to 2.65% throughout the forecast period reduces the overall required rate change based on breakeven rates (inclusive of the net CMP), from 2.2% to 1.8%.

PUB (MPI) 1-10

Part and Chapter:	**V Pro Formas PF.1-PF.3**	**Page No.:**	**4-7**
PUB Approved Issue No:	**4.d. Financial Forecast – Justification for the use of Naïve Forecast**		
Topic:	**Interest Rate Forecast**		
Sub Topic:	**2.2% Rate Change**		

Preamble to IR (If Any):

Question:

a) Please provide an updated PF.1, PF.2, PF.3 and actuarially indicated rate (with supporting schedules) based on a 25-basis point increase in interest rates in 2018/19.

b) Please provide an updated PF.1, PF.2, PF.3 and actuarially indicated rate (with supporting schedules) based on a 50-basis point increase in interest rates in 2018/19.

c) Please provide an updated PF.1, PF.2, PF.3 and actuarially indicated rate (with supporting schedules) based on a 50-basis point increase in interest rates in 2018/19 and 50-basis point increase in interest rates in 2019/20.

Rationale for Question:

To understand the impact of changing interest rate on actuarial indicated rate and forecasted financial results.

RESPONSE:

To model the requested changes in interest rates, MPI will assume that the rate change will occur at the end of the year. For example, MPI will assume that the 25-basis point increase in 2018/19 for question (a) below will occur on March 1, 2019.

Further, to model the effect of the change in interest rates, MPI will also assume that the only other change is in the new money yield as at September 1, 2019, which is used to determine rates.

a) Please see *Appendix 1* for PF.1, PF.2 and PF.3. The change in interest rates increased the new money yield as at September 1, 2019 from 3.21% to 3.46%. This has the effect of reducing the overall required rate change based on breakeven rates from 0.1% to -0.4%. The effect on the overall required rate change based on breakeven rates (inclusive of the net CMP), is a reduction from 2.2% to 1.6%.

b) Please see *Appendix 2* for PF.1, PF.2 and PF.3. The change in interest rates increased the new money yield as at September 1, 2019 from 3.21% to 3.71%. This reduces the overall required rate change based on breakeven rates from 0.1% to -0.9% and the overall required rate change based on breakeven rates (inclusive of the net CMP), from 2.2% to 1.0%.

c) Please see *Appendix 3* for PF.1, PF.2 and PF.3. The change in interest rates increased the new money yield as at September 1, 2019 from 3.21% to 3.71%. This reduces the overall required rate change based on breakeven rates from 0.1% to -0.9% and the overall required rate change based on breakeven rates (inclusive of the net CMP), from 2.2% to 0.1%.

   Compared to (b), the effect of the net CMP on the overall required rate change is 0.9% lower. The 50-basis point increase in interest rates in 2019/20 results in a higher MCT ratio at fiscal year-end 2019/20 (compared to (b)) due to higher capital available. This means that a lower net CMP is required.

PF.1 STATEMENT OF OPERATIONS – 1.6% Rate Increase with Interest Rate Increase of +0.25% in Q4 2018/19

PUB (MPI) 1-11

Part and Chapter:	**VI INV**	**Page No.:**	**27-31**
PUB Approved Issue No:	**4.d. Financial Forecast – Justification for the use of Naïve Forecast**		
Topic:	**Interest Rate Forecasting**		
Sub Topic:	**Use of Naïve Interest Rate Forecast**		

Preamble to IR (If Any):

With respect to interest rate forecasting, in Board Order 130/17 the PUB stated: *The Board accepts the evidence of Dr. Simpson that the 50/50 interest rate forecast is the appropriate approach for rate-setting and target capital purposes at this time. The Board acknowledges that this is a departure from its findings in Order 162/16, and grounds its decision in this regard on the recent change in interest rates, the lack of accuracy in the SIRF, and the evidence of Dr. Simpson and Mr. Steski.* [p. 69]

In the current Application, the Corporation states: *MPI is required to base its rate application on best estimates, and for the 2019 GRA, MPI's management and Board of Directors continue to maintain that the naïve forecast is the best estimate.* [INV.2.3]

Question:

a) Please discuss the statistical significance of the cited improvement in standard error from using a Naïve Forecast (0.15%) over using a 50/50 Forecast (0.16%). [INV.2.3.1 Figure INV-11]
b) Please provide any other new evidence the Corporation has in support of its position that the Naïve Forecast represents a best estimate?
c) In his External Review Report of the prior Basic DCAT, Mr. Joe S. Cheng stated: In my opinion, a naïve interest rate assumption is appropriate for the base scenario. Notwithstanding the two recent rate hikes by the Bank of Canada, I do not see any material risk in assuming a naïve interest rate as a base case. My initial guess is

an increase in interest rates should strengthen the financial position of Basic. [DCAT Attachment A, p. 7] Please confirm that Mr. Cheng's opinion in this regard is provided in the context of a DCAT investigation of Basic's satisfactory financial condition, and specifically not in a Basic rate-setting context.

d) In reference back to PUB (MPI) 2-7 from the 2018 GRA, the Corporation notes that Mr. Cheng: *reviews over 30 DCAT reports annually, and a naïve forecast is the most common for the base scenario*. With respect to those 30 DCAT reports reviewed in 2017, please have Mr. Cheng provide a high level summary of the basis of interest rate forecast, the approximate annual written premium, and the approximate size of the fixed income investment portfolio for the five insurers reviewed with the largest fixed income investment portfolios.

e) Does the Corporation anticipate amending its Application to reflect an updated interest rate forecast reflecting market activity up to 30 September 2018 or thereabouts?

Rationale for Question:

To clarify the strength of the Corporation's position on interest rate forecasting.

RESPONSE:

a) The actuarial standards of practice establish that a best estimate should be unbiased.

Another useful attribute of an estimate is its efficiency, and for an estimate to be efficient it should have a low standard error. The standard error of a forecast does not measure how biased the forecast is, but how variable the forecast is relative to actual.

For example, a forecast that always produces an estimate that is 50 basis points higher than the true rate will have a very low standard error and therefore be efficient, but very biased. The Naïve forecast produces an estimate that is both efficient and less biased than the 50/50 forecast.

To determine if there is bias, a paired sample t-test on the sample mean was performed, which tested if the 50/50 forecast or the Naïve forecast produce statistically significant results from each other.

The test showed that the Naïve forecast produces a statistically significant forecast from the 50/50 forecast with less error (bias) at a 99% confidence level. See *Figure 1* below.

Figure 1: T-Test - Paired Two Sample for Means

	50/50	*Naïve*
Mean	0.0034	0.0015
Variance	3.58E-05	3.18E-05
Observations	14	14
Pearson Correlation	0.9743	
Hypothesized Mean Difference	0	
df	13	
t Stat	5.2635	
P(T<=t) one-tail	0.0001	
t Critical one-tail	2.6503	
P(T<=t) two-tail	0.0002	
t Critical two-tail	3.0123	

b) See the response to Part a), which indicates that the Naïve forecast produces a statistically significant forecast with less bias than the 50/50 forecast at the 99th confidence level.

c) Refer to Attachment A, letter from Joe S. Cheng, FCIA.

d) Refer to Attachment A, letter from Joe S. Cheng, FCIA.

e) The Corporation does not anticipate filing an Amendment to its Application at this time. The Corporation would consider doing so if a material change in circumstances required immediate action to rectify the present Application.

In deciding whether to amend, the Corporation must also consider the impact it could have on the regulatory process (particularly the possibility of publishing public notice, standing being granted to other interested parties, and additional round(s) of information requests). Given that the existing schedule leaves little room for delay in order to meet the requirement for an early December order, amending the Application will have procedural and financial costs, which require careful consideration.

As has been conventional practice for the last number of years, the Corporation responds to information requests, and/or gives undertakings at the Hearing, which require it to update the rate indication in consideration of the most current interest rate forecast. The Corporation will continue to provide this information to ensure the PUB has the means to assess the reasonableness of the Application.

However, the Corporation notes that re-running a rate indication is not a trivial amount of work and that it has already sensitivity analysis of the rate indication to interest rates.

The Corporation is cognizant of the PUB's preference for use of the most current information available, but notes that the PUB declined to adopt its proposed interest rate update (and final approval of rates) through an Order approving the compliance filing. Given that the rate setting methodology is identical in both approaches, the only technical difference is the timing of the forecast.

The Corporation prefers to set rates by adopting the correct methodology, based on current best estimate forecasts, rather than by choosing the preferred rates from a menu of varying approaches, across many points time.

July 20, 2018

Mr. Luke Johnston
Chief Actuary & Vice-President,
Risk Management
Manitoba Public Insurance
234 Donald Street,
Winnipeg, MB R3C 4A4

Dear Mr. Johnston,

RE: PUB (MPI) 1-11 Interest Rate Forecasting (Use of Naïve Interest Rate Forecast)

Per your e-mail from July 16, 2018, these are my responses to questions c) and d) posed by the Public Utility Board:

PUB: c) In his External Review Report of the prior Basic DCAT, Mr. Joe S. Cheng stated: *In my opinion, a naïve interest rate assumption is appropriate for the base scenario. Notwithstanding the two recent rate hikes by the Bank of Canada, I do not see any material risk in assuming a naïve interest rate as a base case. My initial guess is an increase in interest rates should strengthen the financial position of Basic.* [DCAT Attachment A, p. 7] Please confirm that Mr. Cheng's opinion in this regard is provided in the context of a DCAT investigation of Basic's satisfactory financial condition, and specifically not in a Basic rate-setting context.

JSCP: I can confirm that my above opinion was provided solely in the context of a DCAT investigation of Basic's satisfactory financial condition—not in a Basic rate-setting context.

1500 Don Mills Road, Suite 706, Toronto ON M3B 3K4 Canada

Any forecast other than a 0% change in interest rates (i.e. a naïve interest rate assumption) would require more work without necessarily providing any benefit. First, one would have to determine the change in accumulated other comprehensive income (AOCI); this would require a re-pricing of every bond in the portfolio. Most insurers do not forecast AOCI in their business plan and therefore implicitly use the naïve interest rate assumption. Second, one would have to accept that an incorrect estimate of the AOCI would understate or overstate the equity in each scenario, and could exacerbate any rate forecasting error. As I stated in the sentence immediately preceding that paragraph on p.7 of the DCAT external peer review: "Previous increasing rate assumptions have proved to be incorrect, compounding forecasting errors."

Depending on the timing of the DCAT, one can always—and it is a common practice—bring the yield curve to the latest one so that the naïve yield curve is most up to date. If the report should become stale, a disclosure (in the subsequent event section) can quantify the impact on equity if it is material.

PUB: d) In reference back to PUB (MPI) 2-7 from the 2018 GRA, the Corporation notes that Mr. Cheng: *reviews over 30 DCAT reports annually, and a naïve forecast is the most common for the base scenario*. With respect to those 30 DCAT reports reviewed in 2017, please have Mr. Cheng provide a high level summary of the basis of interest rate forecast, the approximate annual written premium, and the approximate size of the fixed income investment portfolio for the five insurers reviewed with the largest fixed income investment portfolios.

JSCP: Most insurers review what the large chartered banks and the Conference Board of Canada are forecasting in terms of future interest rates and make a subjective judgment. We note that most DCATs show a 5-year forecast, but insurers rarely forecast interest rates past 1 plus the stub-year (the year in which the DCAT is done).

JSCP®
ACTUARIES Who Care®
J. S. CHENG & PARTNERS INC

We ranked the five largest, unrelated insurers that we reviewed in the order of their fixed income investment portfolios. The five insurers conducted their respective 2016 DCAT reports in different quarters as noted in the following table. Therefore some were able to bring the implied yield curve in their DCAT model to the one after the Bank of Canada made a rate change (see footnote).

Insurer	DCAT Date	Annual Premiums	Fixed Income Portfolio	Interest Rate Forecast
1	Q4 2017	$3 billion	$4+ billion	2017: +0.25%[(1)] 2018: +0.25%
2	Q2 2017	$2 billion	$2+ billion	2017: +0.50% 2018: +0.50%
3	Q3 2017	$1 billion	$1+ billion	2017: no change 2018: no change
4	Q4 2017	<$1 billion	$1 billion	2017: +0.25%[(1)] 2018: no change
5	Q4 2017	<$1 billion	<$1 billion	2017: +0.25%[(1)] 2018: no change

[(1)] The Bank of Canada raised the key interest rate by 25 basis points on July 12, 2017. Therefore a 0.25% increase in 2017 was a known fact—rather than a forecast—by the time these DCATs were done. Although the BoC made another 25 bps increase on September 6, 2017, it was probably too late to change the DCATs due to each insurer's respective deadline to present their report to their Board of Directors.

I would be happy to elaborate on or clarify any points made in my responses.

Yours truly,

Joe S. Cheng, FCIA

JSC/sc

PUB (MPI) 1-12

Part and Chapter:	**VIII AR Appendix 1**	**Page No.:**	**20-21**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Financial Forecast**		
Sub Topic:	**Interest Rate Impacts**		

Preamble to IR (If Any):

IFRS 9 Financial Instruments was issued in July 2014 and is intended to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 is a three part standard aimed at reducing complexity in reporting financial instruments. The project has been divided into three phases: Phase 1 Classification and measurement, Phase 2 Impairment and Phase 3 Hedge accounting.

IFRS 9 is effective for annual periods beginning on or after January 1, 2021. The Corporation is currently evaluating the impact that this standard will have on its financial statements.

IFRS 17 is also going to be implemented at the same time. This change in accounting standard impacts the determination of the claims liability by requiring the use of a risk free discount rate plus a liquidity premium. The current approach is based on the discount rate inherent in the investment portfolio return.

Question:

a) Please file an update on the analysis of the Corporation's evaluation of the impact of the proposed accounting standard changes on its financial reporting.
b) Please file an update on the impact of the new standards on the risk of changes in interest rates on reported forecast net income.

Rationale for Question:

To understand the impact of changes in accounting standards on rate-setting.

RESPONSE:

a) and b)

MPI's evaluation of the proposed changes to IFRS 17 and 9 is still in progress, and the status report provided in the Annual Financial Statements remains unchanged. MPI is still collecting information on this topic with the intention of receiving an external opinion on the expected impact of IFRS 17.

At this time, the Corporation cannot commit to filing an external impact analysis of IFRS 17 with the PUB in the 2019 GRA proceeding.

Please note that IFRS 17 will have to be applied for reporting periods starting on or after January 1, 2021. MPI will apply IFRS 17 for the fiscal year beginning March 1, 2021.

PUB (MPI) 1-13

Part and Chapter:	**V EXP.6.1**	**Page No.:**	**59**
PUB Approved Issue No:	**6. Changes to Cost Allocation Methodology**		
Topic:	**Cost Allocation**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please indicate who undertakes the independent review of initiatives to determine how the cost is to be allocated among the Corporation's lines of business.
b) Please provide the criteria utilized to determine the allocation of initiative costs among lines of business.
c) How has the Corporation differentiated between core and non-core business functions in determining spending on deferred development?
d) Please provide an example of what projects are considered non-core, and why.

Rationale for Question:

To understand the allocation of costs, including the write-off of IT project costs among lines of business.

RESPONSE:

a) Members of the Budget-Project Accounting Team determine how initiatives are allocated among the Corporation’s lines of business. The Audit, Finance and Risk Committee reviews and approves the recommendations of this team on an annual basis.

b) Implementation initiatives can be specific to one or apply to many lines of business. The Budget-Project Accounting Team determines allocations on an initiative-by-initiative basis, based on similar past initiatives and utilizing the approved criteria identified in the Cost Allocation – AI-16-Attachment D, found in the 2013 GRA Application. An example would be the customer self-service project which is split between Insurance & Non-insurance based on WCCCCR then to Line of Business based on Claims Incurred then to Claims & Operating expenses based on FTE percentage (this is because the project benefits all lines of business).

c) The term "core project" refers to a project that is focused on insurance-activity capital projects rather than on other value added initiatives. The Executive, in consultation with the Board of Directors, determines which projects are core projects, as part of their strategic planning responsibilities.

d) Non-core projects are non-Basic projects.

PUB (MPI) 1-14

Part and Chapter:	**V EXP Appendix 13; Appendix 12 (2018 GRA)**	**Page No.:**	**47**
PUB Approved Issue No:	**6. Changes to Cost Allocation Methodology**		
Topic:	**Cost Allocation**		
Sub Topic:	**Changes to Cost Allocation**		

Preamble to IR (If Any):

The listing of physical properties allocated in Cost Category L has changed from the 2018 GRA. MPI has indicated that accounting unit 185 Brandon Testing Service Outlet has been discontinued.

Question:

a) Please indicate what properties that were included in the 2018 GRA for accounting units 117 and 187 do not appear in this year's schedule.
b) Please describe how the properties have been disposed of and the accounting for their disposal.

Rationale for Question:

To understand changes in Cost Allocation Methodology.

RESPONSE:

a) Accounting unit 117 was for the Pacific Avenue Service Centre and accounting unit 187 was for the Portage la Prairie Testing Centre. Pacific Avenue Service Centre was sold in early 2018 and the Portage la Prairie Testing Centre merged with the Portage la Prairie Service Centre in 2015.

b) Properties owned by the Corporation are disposed of using real estate agents and external legal counsel. Upon disposition, the sales price was offset by costs associated with sale and the asset value remaining to determine gain/loss on sale of property. For non-owned properties, when the Corporation determines that it no longer requires their use, it vacates and ceases to use the property, based on the terms associated with the lease.

Please refer to *CAC (MPI) 1-29* for additional information on the accounting for the disposal of Pacific Service Centre and Flin Flon Claims Centre.

PUB (MPI) 1-15

Part and Chapter:	**V EXP Appendix 19; Figure EXP App 19-2**	**Page No.:**	**2**
PUB Approved Issue No:	**6. Changes to Cost Allocation Methodology**		
Topic:	**IT Expenses**		
Sub Topic:	**Total IT Expenses**		

Preamble to IR (If Any):

Question:

a) Please provide an explanation for the forecasted increase in External Labour for AOL and CARS in 2018/19 for Data Processing.
b) Please explain the forecasted external labour increase of $1.5M under Implementation Expenses in 2018/19.
c) Please provide details of the agreement supporting the expense for the IBM Security Operations Centre.

Rationale for Question:

To assess the reasonableness of the change in allocation in expenses assigned to Basic.

RESPONSE:

a) The original budget for 2017/18 was $4.0M, but actual spend was lower than budget due to refocusing efforts on initiative work that required resources normally assigned to operational work. This year, the Corporation has reduced the budget from $4.0M to $3.6M as it resumes normal operations.

b) The approximate $1.5 million increase is primarily due to $2.0 million of external labour expenses related to the Legacy Modernization project in 2018/19. These expenses were previously classified as deferred development; however, upon further review they were determined to be in year expenses.

c) The service improves MPI's Cyber Security posture by providing better situational awareness and matures processes required to detect and respond to potential Cyber threat against Manitoban's data. The IBM Security Operations Centre agreement provides 24x7 Tier 1 (Threat Analyst Event Monitoring) and Tier 2 (Event Triage and Incident Classification) Cyber Security services. These services also include management of our Security Incident and Event Monitoring (SIEM) infrastructure and an automated ticketing bridge system between IBM's ticketing system and MPI's ticketing system. The service handles security alerts from MPI devices both at the IBM data centre and within the MPI Manitoba network, correlating security events which are investigated and escalated for potential mitigation or remediation.

PUB (MPI) 1-16

Part and Chapter:	**VI RSR**	**Page No.:**	**4**
PUB Approved Issue No:	**7. Update of DCAT**		
Topic:	**Basic Total Equity Target Range Thresholds**		
Sub Topic:	**2018 GRA Board Approved Methodology**		

Preamble to IR (If Any):

The methodology ordered by the PUB in the 2018 GRA produces a 2019 lower RSR target of $120 million …

Question:

a) Please provide the usual scenario statement exhibits resulting from the Board approved **lower** threshold iterative methodology as cited here for each of the base scenario, the modified base scenario, and the selected adverse scenario (before and after routine management / regulatory actions). Please include a summary of the adverse scenario assumed routine management / regulatory actions.

b) Please provide the usual scenario statement exhibits resulting from the Board approved **upper** threshold iterative methodology relative to the lower threshold as cited here for each of the base scenario, the modified base scenario, and the selected adverse scenario (before and after routine management / regulatory rate change actions, i.e. excluding such RSR rebuilding fee actions). Please include a summary of the adverse scenario assumed routine management / regulatory rate change actions.

c) In reference to its approved iterative methodology, in Board Order 130/17 the PUB stated: The Board agrees that such transfers are not best estimate expectations, but rather sees these transfers as a theoretical means to an end, that "end" being the testing of Basic's resilience to adverse circumstances when operating at about

the proposed threshold level. [p. 78] In this context, what specific concerns does the Corporation have with respect to the Board approved iterative methodology?

Rationale for Question:

To assess the Corporation's decision to deviate from the Board approved methodology.

RESPONSE:

a) Please see Appendix 1 and Appendix 2. The assumed routine management/regulatory rate changes are outlined in *Figure 20* of *Part VI DCAT.5.1*, which has been reproduced below for convenience.

Figure DCAT- 20: Assumed Management and Regulatory Action for Combined Scenarios

Line No.	Combined Scenarios	2019/20	2020/21	2021/22	2022/23
1	Base	0.1% Rate / 0% RSR			
2	1 year	0.1% Rate / 0% RSR	n/a	n/a	n/a
3	2 year	0.1% Rate / 0% RSR	0% Rate / 2% RSR	n/a	n/a
4	3 year	0.1% Rate / 0% RSR	0% Rate / 2% RSR	2% Rate / 2% RSR	n/a
5	4 year	0.1% Rate / 0% RSR	0% Rate / 2% RSR	3% Rate / 2% RSR	3% Rate / 2% RSR

b) Please see Appendix 3 and Appendix 4.

c) In *Part VI RSR.4*, the Corporation articulates its justification for the use of a different lower RSR target methodology than the one in PUB Order 130/17. The Corporation elaborates on these points below:

First, the Corporation cannot support a lower RSR target that is below the minimum amount required to maintain the future satisfactory financial condition of Basic, as calculated using accepted actuarial practice in Canada. For the fiscal year 2018/19, the Board of Directors (BoD) transferred $37.3 million from the Extension line of business to Basic, increasing the RSR balance from $173.5 million

to $210.8 million. This transfer exceeded the amount required for satisfactory financial condition of Basic ($201 million) by $9.8 million.

In Order 130/17, the PUB approved $180 million as the lower RSR target for 2018/19. Basic would have an unsatisfactory financial condition had the MPI Board of Directors been unwilling or unable to transfer funds from Extension as noted above. Further, under the present RSR framework, the Corporation could not have sought the full amount of RSR rebuilding fees to achieve satisfactory financial condition, as the lower RSR target was less than and the minimum capital required for satisfactory financial condition of Basic. The timing of a request for regulatory approval of an RSR rebuilding fee would have also been deeply problematic had the MPI Board not intervened.

The intent of the lower RSR target is to establish the level of total equity (measured as a Minimum Capital Target percentage) below which a rebuilding fee is required. From the Corporation's perspective, a lower RSR target that is below the minimum percentage required for satisfactory financial condition could compromise the financial standing of Basic. Equally important is the fact that operating with an RSR balance at or near the minimum RSR target defeats the purpose of the RSR (i.e. stable rates) and increases the likelihood that the Corporation will face the difficult regulatory scenario identified above. To prevent the occurrence of this scenario, the Corporation will bring forward a Capital Management Plan in the 2020 GRA. The Corporation anticipates that this Plan will include build/release provisions designed to ensure that Basic would operate within the limits of the established RSR range.

Second, the Corporation does not support the use of an RSR target methodology that uses improper/inaccurate forecasting assumptions (i.e. not best estimate assumptions). The Corporation has directed its collaborative efforts to date towards developing a universally acceptable lower RSR target methodology. RSR target methodologies must be based on best estimates, which the PUB recognized in Order 162/16, stating:

> *"The Board continues to favour the use of scenario testing adapted from the annual Basic DCAT investigation for purposes of setting Basic target capital levels, expressed in terms of Basic total equity.* ***This approach is consistent with the objective of setting Basic target capital levels to be specific to the risk profile of the Corporation's Basic insurance operations.***
>
> *…*
>
> ***It is the Board's expectation, and for that matter a requirement of accepted actuarial practice in Canada, that the Corporation's Basic Application, including the rate indications, the Basic DCAT investigation and the target capital analysis, be prepared on a best estimate basis. Doing otherwise complicates the regulatory review process."*** *[emphasis added]*

In Order 130/17, the PUB reversed its position, stating that the modelling approach did not reflect best estimate expectations, but provided no clear reasons for this conclusion The PUB did state however that it:

> *"…sees these transfers as a theoretical means to an end, that "end" being the testing of Basic's resilience to adverse circumstances when operating at about the proposed threshold level"*

With respect, it is inappropriate to view the establishment and maintenance of Basic's satisfactory financial condition as a theoretical exercise. Further, the PUB's interest in setting a lower RSR target (in the context of testing Basic to adverse circumstances when operating around the lower RSR target) ignores the purpose of the RSR (in essence, to stabilize rates and protect ratepayers from rebuilding fees). The Corporation does not understand why the PUB now believes the purpose of the RSR should be something other than what it identified its purpose as in Section 5.1 of Order 162/16.

Third, the lower RSR target methodology set out in Order 130/17 relies on a 50/50 interest rate forecast methodology. The Corporation cannot demonstrate that this interest rate forecast methodology is a best estimate, given the evidence available. The Corporation cannot support the use of an RSR methodology based on biased forecasting assumptions.

The RSR methodology in Order 130/17 produces a lower RSR target of $120 million for the 2019 GRA. This amount is well below the $143 million required to maintain satisfactory financial condition for Basic. For this reason and the reasons above, the Corporation cannot employ this methodology. The Corporation has opted instead to seek MCT based lower and upper RSR targets, based on DCAT modeling, using best estimate assumptions.

For 2019, The Corporation requests a lower RSR target of 34% MCT ($143 million based on current forecasts) for the 2019/20 fiscal year, as this target represents the absolute minimum MCT ratio required to maintain the financial condition of Basic.

PUB (MPI) 1-17

Part and Chapter:	**VI RSR**	**Page No.:**	**10-11**
PUB Approved Issue No:	**7.1. Update of DCAT**		
Topic:	**DCAT Modified Base Scenario**		
Sub Topic:	**Treatment of Capital Maintenance Provision (CMP)**		

Preamble to IR (If Any):

The Corporation has proposed a CMP in their 2019 GRA. However, the methodology and the proposed amount of this provision (+2.1%) have not yet been approved by the PUB. For the purposes of the DCAT analysis, MPI has assessed the satisfactory financial condition of Basic Insurance excluding the CMP. [RSR.4.5.1.1]

Question:

a) The Corporation states: *… the DCAT modeling assumption is that the maximum RSR rebuilding fee in response to an adverse event is 2.0% per year; however, this assumption would likely be eliminated (or reduced significantly) if the CMP was included in the base forecast*. Please explain.

b) The Corporation states: *… it is MPI's position that including the CMP in the calculation of the PUB's lower and upper RSR targets is not appropriate.* If a standard approach to determining a CMP is approved by the PUB, why would it not be appropriate to include a CMP in each year of the forecast period to reflect a best estimate forecast of Basic Insurance operations?

c) The Corporation states: The inclusion of the CMP, or a future capital build and release provision, should not impact the calculation of the actual RSR targets. Does the Corporation agree that the decision to include or exclude the CMP in the financial forecast used in the calculation of the lower and upper Basic Total Equity target range thresholds is of little significance when using the Board approved iterative methodology?

d) The Corporation states: The exclusion of any proposed capital adjustments in the calculation of the required RSR targets will also result in more consistent year-to-year assessments of the capital targets. Considering the Board approved iterative methodology, please explain.

Rationale for Question:

To assess the Corporation's position on excluding the CMP for DCAT purposes.

RESPONSE:

a) Under the previous approach to rate setting and capital management (i.e. 2017 GRA and prior), the Corporation's Basic rates were forecasted to essentially produce a net income of zero over the rating period. This approach, on average, would result in an RSR (capital) balance that was forecasted *by design* to remain constant in absolute dollar terms over time and *declining* in relative terms (as measured by the MCT ratio or by the size of the business in general). If the RSR balance fell below the minimum RSR target, it was then assumed in the DCAT that the Corporation would charge a maximum 2.0% additional RSR rebuilding fee each year until the minimum RSR balance was restored.

Under the Corporation's proposed approach to rate setting and capital management in the 2019/20 GRA, it has applied for Basic rates assuming zero profit (as in the 2018/19 GRA), but has also applied to for a capital maintenance provision to ensure that the capitalization rate of Basic does not decline over time. By *proactively* maintaining capital in each GRA (rather than allowing capitalization to decline), the need to *reactively* respond to adverse events with successive 2.0% surcharges and/or rate increases is reduced. Also, the policyholders contribution to maintaining capital is collected each year, rather than collecting monies from policyholders who happen to have policies in the year(s) after an adverse event occurs.

b) A capital maintenance provision and/or the capital build and release provision should <u>not</u> reduce/change the RSR capital targets. The lower and upper RSR

targets should be calculated based upon a best-estimate methodology *before* the application of any capital adjustments. The Corporation would then use its capital management plan to determine how to adjust capital *given* these RSR targets. Including the capital adjustments in the RSR target calculation exercise would result in a circular calculation.

c) The Corporation cannot support the Board approved RSR methodology for the reasons provided in *PUB(MPI) 1-16b* and *Part VI RSR.4*. The Board is asking the Corporation to accept a lower RSR target that is less than the minimum amount required for satisfactory future financial condition. The methodology that MPI has submitted does not suffer from this shortcoming. The inclusion of a capital maintenance provision will significantly lower the RSR capital targets in the Board approved RSR methodology.

d) See part c).

PUB (MPI) 1-18

Part and Chapter:	**VI DCAT**	**Page No.:**	**34-54**
PUB Approved Issue No:	**7. Update of DCAT**		
Topic:	**DCAT Adverse Scenarios**		
Sub Topic:	**Combined Scenario**		

Preamble to IR (If Any):

Question:

Please summarize the differences (and rationale for these differences) between modeling assumptions used in the Combined Scenario vs. those used in each of the Decline in Equity Markets Scenario, the High Loss Ratio Scenario, and the Interest Rate Decline Scenario.

Rationale for Question:

To assess the reasonableness of the DCAT and Target Capital Analysis scenario assumptions.

RESPONSE:

The assumptions used in the Combined Scenario are the same assumptions as used in each of the Decline in Equity Markets Scenario, the High Loss Ratio Scenario, and the Interest Rate Decline Scenario, with the inclusion of a modeled Canadian Corporate Bond default rate as outlined in *Part VI DCAT.5.6*.

PUB (MPI) 1-19

Part and Chapter:	**VI DCAT**	**Page No.:**	**65, 68**
PUB Approved Issue No:	**7. Update of DCAT**		
Topic:	**DCAT Adverse Scenarios**		
Sub Topic:	**Policy Liabilities Risk and Inflation Risk Scenarios**		

Preamble to IR (If Any):

Question:

a) The Corporation states: … the risk of unfavourable variations in policy liabilities does exist. The Corporation will conduct further research on this topic for the 2019 DCAT. Please outline the direction and nature of the planned research in this regard, and indicate whether this will include consideration of the DCAT prepared for Saskatchewan Auto Fund, if made available.

b) With respect to Inflation Risk, the Corporation states: We assumed that (i) the severity of all new claims in these periods would increase by the additional (compounded) inflation amount, (ii) PIPP claims from prior years would be indexed at the observed inflation, and (iii) the long term inflation projection of 2.0% would not change.

   i. What is meant by “observed inflation”?

   ii. What is the significance to the modeling results of assuming no change in the long term inflation projection?

   iii. Please summarize the assumed impact on Basic costs other than claims?

Rationale for Question:

To assess the reasonableness of the DCAT and Target Capital Analysis scenario assumptions.

RESPONSE:

a) The Corporation intends to:

i. Build a policy liability mis-estimation model based on historical 1, 2, 3, and 4 year percentage changes to policy liabilities relative to original booked/forecasted amounts, with appropriate adjustments for unique circumstances/outliers;

ii. Build a policy liability stochastic model based on the variability in the underlying loss experience *assuming* centralized reserving was in-place in all prior loss years (i.e. adjust prior loss years to reflect centralized reserving assumptions); and

iii. Use information from the above two analyses to create a single model for DCAT purposes.

While the Corporation is, open to having discussions with the Saskatchewan Auto Fund, it notes that the Saskatchewan Auto Fund will ultimately decide whether to share this potentially confidential information with the Corporation.

b)

i. The Corporation is referring to the observed inflation resulting from the sustained increase in inflation of 2.8% from 2019/20 to 2022/23;

ii. For forecasting purposes, the Corporation would continue to assume that claim liabilities would be discounted at the real rate assuming the long-run inflation expectation of 2.0%; and

iii. The Corporation assumed no other impacts beyond the impact to claims.

PUB (MPI) 1-20

Part and Chapter:	**VI DCAT Appendix 6**	**Page No.:**	**8-26**
PUB Approved Issue No:	**7. Update of DCAT**		
Topic:	**DCAT Adverse Scenarios**		
Sub Topic:	**Stochastic Modeling**		

Preamble to IR (If Any):

Question:

For each coverage (and all Basic coverages combined), please add information for the simulated mean values into the tables showing Cumulative Simulated Ultimate Losses and Cumulative Simulated Ultimate Losses minus Base Forecast.

Rationale for Question:

To assess the reasonableness of the DCAT and Target Capital Analysis scenario assumptions.

RESPONSE:

Please see *Appendix 1* for the updated tables.

PUB (MPI) 1-21

Part and Chapter:	**VI INV Investments; Figure INV-5**	**Page No.:**	**14**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investment Income Forecast**		
Sub Topic:	**Major Asset Class**		

Preamble to IR (If Any):

Question:

Please indicate how the Corporation determined the Global equity returns.

Rationale for Question:

To assess the reasonableness of forecast investment income.

RESPONSE:

The method for determining the equity return ordered by the PUB (as per Order No. 157/12) uses the 5th percentile 20 year annualized return of the S&P/TSX index. For this year's application, the total return for Canadian, U.S. and Global equities was calculated to be 7.0%.

For comparison, Mercer's Capital Market Assumptions used in the most recent ALM study used the same 6.5% return for Canadian, U.S. and Global equities.

PUB (MPI) 1-22

Part and Chapter:	**VI INV Investments; Figure INV-5**	**Page No.:**	**14**
PUB Approved Issue No:	**8. (i) Performance of the Investment Portfolio and the composition of the Portfolio**		
Topic:	**Investment Portfolio**		
Sub Topic:	**Major Asset Class**		

Preamble to IR (If Any):

Question:

a) Please provide details on the fixed income holdings for 2017/18, including issue amount and yield.
b) Please indicate the extent to which MPI has invested in Corporate Bonds and indicate the composition of those bonds, by rating.
c) Please provide a schedule indicating the actual yields on Corporate Bond investments, a comparison with the GOC 10 year bonds, and the spread.

Rationale for Question:

To assess the reasonableness of forecast investment income.

RESPONSE:

a) Please refer to *Appendix 1* attached.

b) As of June 30, 2018, the Corporation has invested a total of $116.9 million in corporate bonds, which represents 4.1% of the total investment portfolio. The composition of corporate bonds by credit rating is described in the table below.

Figure 1:

Rating	Amount ($)	%
AAA	2,961,887	2.5%
AA+	-	0.0%
AA	-	0.0%
AA-	7,472,701	6.4%
A+	36,675,260	31.4%
A	26,539,447	22.7%
A-	43,215,329	37.0%
Total	**116,864,624**	**100.0%**

c) The table below indicates the actual yields on corporate bond investments and their spreads relative to the Government of Canada 10 year bond as of June 30, 2018.

Figure 2:

As of June 30, 2018 Issuer	Rating	MV Plus Accrued Income ($)	YTM (%) (a)	GOC 10 YR (%) (b)	Spread (%) (a-b)	Term (in years)

PUB (MPI) 1-23

Part and Chapter:	**VI INV.2.1.1**	**Page No.:**	**16**
PUB Approved Issue No:	**8. Performance of the investment portfolio** **21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**ALM Study Outcomes**		

Preamble to IR (If Any):

The portfolio backing the Basic claims will consist of 100% fixed income, the portfolios backing Extension, SRE and RSR will be balanced (50% growth assets/50% fixed income assets), and the portfolio backing EFB will have a slightly higher allocation to growth assets at 60%. Currently, the portfolios recommended for RSR, Extension and SRE have the same asset allocations (50/50 growth/fixed income), but because the portfolios are unique (i.e. no assets shared between them) the asset allocations can be changed in the future if necessary.

Question:

Please explain how MPI intends to monitor its portfolio allocations to assess whether changes should be made in the asset allocations in the future.

Rationale for Question:

To understand possible future changes to asset allocations.

RESPONSE:

The process of monitoring the asset allocation will be very similar to the Corporation's current process. Specifically, the Corporation has a portfolio-rebalancing policy, which will be applied to the new portfolios. Each portfolio has target weights for each asset

class (as well as minimum and maximum weight). The Corporation will ensure that the asset classes remain within the approved ranges and rebalance as necessary. The Investment Department monitors actual portfolio weights on a monthly basis and provides reports to the Investment Committee Working Group at each meeting, recommending corrective action as necessary. Changes to the target weights are reviewed only when asset-liability management studies are completed.

PUB (MPI) 1-24

Part and Chapter:	**VI INV.2.2**	**Page No.:**	**23**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investments**		
Sub Topic:	**Accommodation of Commingled Portfolio**		

Preamble to IR (If Any):

Manager searches must be conducted and accounting systems and processes must be redesigned to accommodate the separation of the commingled portfolio.

Question:

a) Please provide a progress update on manager searches, redesigning of accounting systems and processes, and any other steps necessary to accommodate the separation of the commingled portfolio.
b) Please explain what options were considered to minimize transactional costs related to the portfolio segregation.

Rationale for Question:

To understand the details and impact behind the accommodations of the commingled portfolio.

RESPONSE:

a) The Corporation issued a request for proposals seeking a consultant to assist with the manager searches in early July. Responses are due in late July. The Corporation expects the consultant, once selected, to begin working in mid-August.

The Corporation has done the following to redesign its accounting systems and processes in order to accommodate the separation of the commingled portfolio:

a) reviewed existing allocations relating to the accommodation of sub-accounts;

b) completed additional training on the Portfolio Accounting Management (PAM) investment accounting system;

c) determined that PAM can adequately manage the five new portfolios; and

d) identified specific securities for each portfolio.

The Corporation plans to carry out the following in August or September:

a) determine new allocation methodology for balance sheet and investment income;

b) build new portfolios into PAM;

c) test the transfer of investments, interfaces & minimal allocation;

d) create new accounts in Lawson; and

e) obtain a license for a new PAM system module in order to reduce the requirement for manual processing and to allow for more robust testing.

b) The Corporation will fund the new asset classes, including private debt purchases, using MUSH bond maturities. MUSH bond maturities will not incur any transaction costs. Redemptions from the Greystone Real Estate Fund will not involve any transaction costs as the redemption will be funded largely by drawdowns from new investors to the fund. The Corporation estimates that these two items will total approximately $395 million or 52% of the withdrawals required to segregate the assets.

PUB (MPI) 1-25

Part and Chapter:	**VI INV.2.2.1; Figure INV-8**	**Page No.:**	**24-25**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investments**		
Sub Topic:	**Interest Rate Forecasting**		

Preamble to IR (If Any):

The projections in this table are based on a Naïve interest rate forecast.

Question:

Instead of using a Naïve interest rate forecast, please refile the Figure INV-8 table under each scenario using:

a) 50/50
b) Mercer's interest rate forecast - standard
c) Mercer's interest rate forecast – forward curve

Rationale for Question:

To understand the change in financial impact to the Basic line of business under different interest rate forecast approaches.

RESPONSE:

a) See the figure below for the March 50/50 forecast

Figure 1: Financial Impact to Basic Line of Business - March 2018 50/50 Forecast

PUB (MPI) 1-26

Part and Chapter:	**VI INV 10.5; INV Appendix 9; Figure INV-32**	**Page No.:**	**59; Appendix 9; 60**
PUB Approved Issue No:	**8. Performance of the Investment portfolio**		
Topic:	**Investments**		
Sub Topic:	**Allocation of Investment Income to Lines of Business**		

Preamble to IR (If Any):

The 2018-2019 fiscal year applies a methodology consistent to prior year's forecast; i.e. a net equity allocation formula. The 2019-2020 and subsequent forecast period applies investment income based on the direct proportion of investment assets available to each line of business.

Question:

a) What factors are contributing to Basic's relative share of corporate investment income declining into the forecast period?
b) Please compare and contrast the different methodologies used for the calculations supporting the forecasting of investment income.
c) Please provide the detailed calculations, analysis and commentary for the allocation of investment income into the forecast period.

Rationale for Question:

To understand the detailed calculations and analysis behind the allocations of investment income.

RESPONSE:

a) The decline of Basic's relative share of corporate investment income throughout the forecast period is primarily attributable to asset re-allocation, from alternative growth assets (namely Equity, Infrastructure and Real Estate Investments) to lower yielding fixed-income investments.

b) The recent ALM study focuses on the shift from the comingling of investment assets to the separation of these assets for the various lines of business. A comparison of the advantages and disadvantages of each approach is provided in Phase 1 of the ALM study which is found at *Part VI Investments, Appendix 12, pages 3-6* of the Application.

c) Detailed calculations for the investment income allocation of commingled investment assets in 2018/19 are provided at *Part VI Investments, Appendix 9* of the Application. Investment income in 2019/20 and subsequent years no longer use the formula as shown in Appendix 9, because investment assets are separated by line of business and any forecasted income is directly accounted for in each respective line of business.

PUB (MPI) 1-27

Part and Chapter:	**VI INV 14.1; Figure INV-42 & INV-43**	**Page No.:**	**74-75**
PUB Approved Issue No:	**8. Performance of the Investment portfolio**		
Topic:	**Investments**		
Sub Topic:	**Interest Rate Forecast**		

Preamble to IR (If Any):

Question:

a) Please provide the actual supporting forecast that was used to populate both INV-42 and INV-43.
b) Please update table INV-42 and INV-43 for the most current date (currently based on February 28, 2018) and also provide the supporting forecasts used for the updated tables.

Rationale for Question:

To understand the details that support the interest rate forecast tables and to obtain a most recent version.

RESPONSE:

a) See *Attachment A.*

[Attachment C Redacted. The Corporation is seeking confidential treatment of this response].

b) Figure 1 and 2 below are updates to INV-42 and INV-43. See *Attachment B* for the supporting forecasts.

[Attachment C Redacted. The Corporation is seeking confidential treatment of this response].

MARKET CALL

- We're sticking to our guns that the Bank of Canada will be on hold until July, and that a quarter point hike could be the last we hear from them until 2019. True, there's a bit more hope now that a NAFTA deal can be reached. But we still have the BoC needing enough evidence that the only 1.6% growth pace in the second half of last year has given way to much better times, and that there isn't too much of a drag from new mortgage regulation and rate hikes to date.
- Dollar-Canada came a long way towards our 1.32 target, but could lose a few cents if the BoC takes a pass on rate hikes in the next two months. We would see anything through that level as an opportunity to buy the Canadian currency, expecting a weaker general trend for the US$ to give it at least a stable track in the last half of this year.
- The very long end of both the US and Canadian curves looks rich, given our expectations for an upward creep in CPI in both countries. Long rates will also be pressured higher globally if, as we expect, markets start to focus on the upcoming end to QE in Europe and a potential for major central banks to begin tightening policy earlier than they now assert.

Monthly Fixed Income Monitor

Economics and Strategy

March 2018

Highlights

- With passage of the Bipartisan Budget Act, the odds of faster U.S. policy normalization have increased. However, the recent budget deal combined with the tax cuts voted late last year is projected to push the net supply of Treasury marketable debt above US$1 trillion in 2018, twice as much as in 2017, adding to the upward pressure on 10-year yields. In these circumstances, the FOMC will have to focus on overall financial conditions. Since long rates have more effect on the economy than short rates, we see the FOMC easing up on the brakes a bit. A combination of a 10-year rate trading around 3.17% and a target fed funds range of 2.00—2.25% by year end is what we see as the most likely scenario for the end of this year.

- In Canada, wages and salaries can be expected to accelerate further as the year progress, setting the stage for the Bank of Canada to normalize further. Yet we expect the Bank to move cautiously, since rapid policy normalization could trigger mortgage repricing (wider spreads on top of rising swap rates) at a time when the housing market faces tougher macro-prudential measures (B-20) and mortgage rates already higher than a year ago. We see the Bank hiking a quarter-point in May and again in October. If global interest rates lag our forecast, limiting the tightening of financial conditions in Canada, the Bank could still deliver one more rate hike in December. We see the overnight rate at 1.75% in December and 10-year Canadas trading around 2.68%.

FINANCIAL FORECASTS

Following a very tough week at the start of February, a relative calm returned to the markets, and stock indexes shed much of their losses. However, the markets remain a little edgy, with investors still concerned about the potential for a steeper rise in bond yields, and by the U.S. government's protectionist intentions. Despite the concerns, favourable economic outlooks and slightly stronger inflationary pressure suggest that interest rates will keep rising gradually. In the United States, the Federal Reserve seems certain to raise its key rates again on March 21st, and could signal a few more rate increases for the coming quarters, while continuing its gradual approach. Consequently, we are expecting slightly faster, steeper increases in U.S. rates in the coming years. Key rates are also expected to rise gradually in Canada, but some signs of slowing in the housing market and household debt, and the heightened risks associated with U.S. protectionism could convince the Bank of Canada (BoC) to wait until summer before tightening its monetary policy further. The BoC's slightly more cautious tone and fears of protectionism recently took the Canadian dollar to around US$0.77. These factors should curb the loonie's appreciation in the coming quarters, despite the fairly good outlook for commodity prices.

MARKET CALL

- Back in January, we argued that the moderate pace to economic growth since mid-2017 would put the Bank of Canada on the sidelines until July, expecting a firmer pace to growth in Q2. The numbers have cooperated, and a July hike looks very probable. But thereafter, we again see another half-year pause on rates, in line with our view that trade headwinds and tighter mortgage rules obviate the need for a faster pace to monetary tightening.

- In the past month, we shifted one of our 2019 forecast Fed hikes into 2018, in line with an upgraded near term growth outlook and on target inflation. That still leaves us with fed funds topping out just below 3% in 2019, and if fiscal policy tightens in 2020 to address the deficit, that might be a near term peak. Long yields still need to move higher as the term premium adjusts to modest momentum in inflation and supply pressures as global central banks step away from QE.

- Much of the pressure on the loonie in recent months has simply reflected global US dollar strength. Should the greenback shed some of that supremacy, that will keep a lid on how weak the Canadian dollar can get against its US counterpart even if, as we expect, the C$ weakens on other crosses when the Bank of Canada goes back on hold. A much softer C$ would be in the offing should the US go ahead with punitive tariffs on Canadian automotive products.

NATIONAL BANK OF CANADA
FINANCIAL MARKETS

Monthly Fixed Income Monitor

Economics and Strategy

July - August 2018

Highlights

- Assuming some limited further deterioration in trade talks between the U.S. and its major trading partners before year end, we expect the FOMC to be cautious taking the fed funds target range to 2.00%-2.25%. In the longer portion of the yield curve the market will face crosscurrents. International uncertainty will tend to limit rate increases while Fed balance sheet normalization, softer pension-fund demand and large borrowing requirements will tend to pull rates up. All things considered, we have revised our year-end forecast for the 10-year yield slightly downward, to 3.04% from 3.18%, but left it unchanged at 3.47% for year end 2019.

- While we see numerous yellow beeps on our radar screen, none are strong enough yet to turn outright bearish about the global outlook. In that context, our base case scenario (55% odds) is that the Bank will proceed with one more rate hike this year. Most likely in October when it will update its economic outlook. Looking at the longer end of the yield curve we see 10-year Canada trading around 2.57% by year end and around 3.09% in December 2019.

Paul-André Pinsonnault

PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investments**		
Sub Topic:	**Basic Interest Rate Risk with Naive Forecast**		

Preamble to IR (If Any):

Question:

a) Please provide an updated table of INV-47 for the most current date. Based on the updated table at the most current date, please provide the same table (Basic Investment and Claims Net Interest Rate Impact) for the following interest rate forecasting methods:
   i. Naïve
   ii. 50/50
b) Please provide additional commentary and analysis on each forecasting method, where possible.

Rationale for Question:

To understand and compare the Basic investment and claims net interest rate impact under different forecast approaches with current information.

RESPONSE:

a) See Figure 1 and 2 below.

i. Naïve

PUB (MPI) 1-29

Part and Chapter:	**VI INV.17**	**Page No.:**	**81-82**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investments**		
Sub Topic:	**Investment Policy Statement – Material Changes**		

Preamble to IR (If Any):

The Investment Policy Statement and associated governance documents attached to this application are current to the time of filing and material changes to the current Investment Policy Statement from the documents previously filed are explained below.

Fixed Income Portfolio (Section 8.4)

For interest rate risk management purposes the duration of the marketable bond portfolio (excluding MUSH bonds) will be matched to the duration of the claims liabilities.

Rationale: *This change is required because of the change in the calculation methodology of the claims discount rate (from duration weighted to dollar weighted) as discussed in INV.16.1.*

Minimum Credit Rating (Section 8.6)

The minimum credit rating was changed from "A (low)" to "BBB".

Rationale: *To conform to the standard definition of Investment Grade securities. This change was approved at the December 8, 2017 Investment Committee meeting.*

Question:

a) Please discuss the impact of the change made to matching the duration marketable bond portfolio (excluding MUSH bonds) to the duration of the claims liabilities.
b) Please discuss the impact on risk versus return of the change made to move the minimum credit rating from "A (low)" to "BBB".

Rationale for Question:

To better understand the details of any impact from the material changes to the Investment Policy Statement.

RESPONSE:

a) **Rationale for Change**

As background, the claims discount rate methodology was changed to use the dollar-weighted yield of the fixed income portfolio rather than the duration-weighted yield. Under the duration-weighted yield approach, capital gains/losses for marketable bonds were based on changes in the market weighted yield of the portfolio, whereas claims liabilities were being valued based on the duration-weighted yield of the fixed income portfolio, which created basis risk (i.e.: valuation on two different bases). The dollar-weighted (i.e. market-value weighted) claims discount rate methodology provided tighter tracking (less basis risk) and was easier to explain compared to the duration-weighted claims discount rate. Page 7 of the Actuarial Report as of October 31, 2017 states:

"We switched from duration adjusted yield to market value weighted yield in selecting the discount rate. The Corporation's asset liability management policy strives to minimize the impact to its income statement due to a change in market interest rates."

As a result of this change to the claims discount rate methodology, the marketable bond duration was required to match to the claims liability duration. MUSH bonds were removed from the duration matching calculation because MUSH bonds are a poor hedge against changes in interest rates. MUSH bonds are measured at amortized cost, and are not sensitive to changes in interest rates. This lack of sensitivity creates basis risk (valuation on two different bases). When there are fluctuations in market interest rates, marketable bond yields change and MUSH bond yields do not change.

The duration-weighted claims discount rate places a smaller weighting on MUSH bonds than the market value weighted claims discount rate. To illustrate (using **approximate, round numbers)**, for a 100 bps change in market interest rates:

- The duration weighted claims discount rate would change by approximately 80 bps. This is because marketable bonds have an **approximate** 80% weight and MUSH bonds would have a 20% weight in the claims discount rate on a duration weighted basis.

- The market value weighted claims discount rate would change by approximately 67 bps. This is because the market value weight of marketable bonds to non-marketable bonds is **approximately** 67%/33%.

In summary, changing the claims discount rate methodology to a market-value weighted basis decreased the impact of the interest rate-sensitive assets (marketable bonds) in the claims discount rate. As a result, matching the duration of the claims liabilities to the total fixed income portfolio (including MUSH bonds) did not provide sufficient protection from changes to interest rates when using a market value weighted claims discount rate. Matching the marketable bond duration to the claims duration ensures that interest rate-sensitive liabilities are duration matched to interest rate-sensitive assets.

Impact of the Change in the 2019 GRA

The removal of the MUSH portfolio from the duration-matching fixed income portfolio required the government bond duration to fall by 2.2 years from 11.9 years to 9.7 years in Q2 2018/19. Note that the corporate bond duration remained unchanged at 9.9 years, and the claims liability duration was 9.7 years in Q2 2018/19.

When the government bond duration fell by 2.2 years, it caused the government bond yield spread to fall by 7 bps (see INV.4.3.4 to see further discussion on the government bond yield spread). This in turn caused the claims discount rate to decrease by 4 bps, which increased the claims liabilities by $9.4M. Since there is no offsetting impact to the fixed income portfolio from the decline in the government bond yield, this change had a $9.4M negative impact on net income.

In 2018/19, two other factors impacted the claims discount rate/claims liabilities without an offsetting impact to the fixed income portfolio. First, a declining MUSH yield and declining allocation to MUSH bonds negatively impact net income. Second, the corporate bond allocation was forecasted to increase from $115.9M as of Q4 2018/19 to $619.0M as of Q4 2019/20. Also, a forecasted allocation to corporate bonds with added exposure to BBB bonds increased the corporate bond yield from 3.35% to 3.90%. A larger allocation to higher yielding corporate bonds more than offset the negative impact from government bonds and MUSH bonds in 2018/19.

For the 2019 GRA, the combined impact of 1) a lower government bond duration, 2) a declining MUSH yield and a declining exposure to MUSH bonds, and 3) an increasing corporate bond yield with increasing exposure to corporate bonds, resulted in an increase to net income in the amount of $8.2 million dollars.

b) A credit rating is an evaluation of the credit risk of a debtor, predicting their ability to repay their debt and the likelihood of defaulting on their financial obligations. A lower rated investment (e.g. BBB compared to A (low)) implies a higher probability of default by a debtor. Defaults by investment grade bonds in Canada (BBB or

higher credit rating) are rare, but occurred in the global financial crisis of 2008/2009. According to Moody's, the average cumulative default rates for corporate issuers over any 5 year period from 1989-2013 was 0.2% for A rated bonds and 1.8% for BBB rated bonds.

The table below shows yields, management fees, credit loss rates, total returns and volatility for long term corporate bonds with A and BBB credit ratings. Credit loss rates are the product of default frequency and loss severity (reflecting the fact that when an issuer defaults the borrower often recovers a portion of their investment, i.e. the loss severity is not necessarily 100%). Net yields represent gross yields after considering management fees and credit loss rates.

Figure 1: Corporate Bond Yields – February 28, 2017

Line No.	Bond Category	Yield	DOF fees	Management fees	Total fees	Average One Year Credit Loss Rates*	Net Yield	Yield Spread to Government Bonds	Volatility
1									
2	Long Term Corp A	3.79%	0.07%	0.13%	0.20%	0.00%	3.59%	0.77%	7.10%
3	Long Term Corp BBB	4.37%	0.07%	0.13%	0.20%	0.20%	3.97%	1.15%	8.10%
4	*Credit Loss Rates were calculated by Moody's and are the product of default frequency and loss severity								

The table above indicates that, even when considering the higher loss rates on long term corporate bonds rated BBB relative to corporate bonds rated A (0.2% vs.0.0%), BBB bonds provide a significant additional net yield (0.38%) with a relatively small increase in risk (as measured by volatility, from 7.1% to 8.1%).

Preamble to IR (If Any):

SGI and ICBC's fiscal 2017 returns have not yet been published. MPI will provide those returns when they are available.

Question:

Please refile the table in Figure INV-50 including the 2017 returns for SGI and ICBC, when available.

Rationale for Question:

To understand the relative performance of the Corporation's investment portfolio with other comparable organizations.

RESPONSE:

ICBC's returns will not be available until the corporation's annual report is filed with the BCUC; because ICBC's year-end is at March 31 the report has not yet been released. Last year we did not receive this information until early October.

The table below includes SGI's return information, which when adjusted to match MPI's asset allocation is slightly lower than MPI's return.

PUB (MPI) 1-31

Part and Chapter:	**VI INV Appendix 1**	**Page No.:**	**2**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investment Policy Statement**		
Sub Topic:	**Review of Investment Policy Statement**		

Preamble to IR (If Any):

The Investment Policy Statement is: *to be reviewed annually by the Investment Committee [of the Board]. The next scheduled review will occur in April 2019. The Investment Committee will be required to provide a written report on the results of its review, including assessment of the effectiveness of this Policy and recommendations for revisions.*

Question:

a) Please indicate the current composition of the individuals on the Investment Committee Working Group.
b) Please file the results of the most current review of the Investment Committee/ Investment Committee Working Group, including the effectiveness of the Investment Policy Statement, and any recommendations for revisions.

Rationale for Question:

To understand the forecasting of investment income.

RESPONSE:

a) The following individuals are members of the Investment Committee Working Group:

1. Ben Graham; President & CEO
2. Luke Johnston; Vice President, Product and Risk Management & Chief Actuary
3. Mark Giesbrecht; Vice President, Finance & Chief Financial Officer
4. Glenn Bunston; Manager, Investments
5. Cynthia Campbell; Corporate Controller
6. Diane Hopkins; Manager, Financial Forecasting
7. Garry Steski; Assistant Deputy Minister of Finance, Province of MB
8. Don Delisle; Director of Capital Markets, Province of Manitoba
9. Scott Wiebe; Director of Treasury Services, Province of Manitoba
10. Bob Block; Director of Risk Management & Banking, Province of MB

b) The Investment Policy Statement is still being reviewed by the Investment Committee. A copy of the revised policy and a list of the changes will be filed with the PUB, when available.

PUB (MPI) 1-32

Part and Chapter:	**VI INV Appendix 1; Appendix 17**	**Page No.:**	**Appendix 1 Appendix 17**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio and Composition** **14. Risk Assessment and Risk Management** **21. Asset Liability Management Study**		
Topic:	**Five Optimized Portfolios**		
Sub Topic:	**Definition of Risk**		

Preamble to IR (If Any):

Question:

Please articulate what is defined as "risk" in relation to the establishment of each of the five Optimized portfolios.

Rationale for Question:

To understand the definition of risk and how it is used in establishing optimal investment portfolios.

RESPONSE:

In each portfolio (except the RSR), the expected volatility of the funded position (assets/liabilities) was the primary risk measure and the expected excess return of assets over liabilities was the primary reward measure.

For the RSR portfolio, the primary risk measure was expected return volatility and the primary reward measure was the expected return. A mean-variance optimizer identified the portfolios with the maximum return, at each level of risk, which then formed the efficient frontier. By definition, all portfolios on the efficient frontier are optimal.

PUB Approved Issue No:	**8. Performance of the Investment Portfolio**		
Topic:	**Investment Income**		
Sub Topic:	**Investment Portfolio Composition**		

Preamble to IR (If Any):

Question:

a) Please provide an update to INV Appendix 6, indicating the current balance of Unrealized Gains and Losses on the equity portfolio, and the relative market value to book value ratio.
b) Please provide details of the changes in the forecast balance of AOCI for 2018/19 and 2019/20.

Rationale for Question:

To understand the current performance of the Investment Portfolio.

RESPONSE:

a) Please refer to *Appendix 1* attached.

b) Please refer to the schedule below.

Manitoba Public Insurance
Accumulated Other Comprehensive Income / (Loss)

Line No.	(C$ 000s)	*For the Years Ended February* 2019BF	2020F
1	**Beginning Accumulated Other Comprehensive Income (Loss)**	39,870	(52,111)
2	Unrealized Gains (losses) on Available for Sale Assets	16,852	11,887
3	Reclassification of net realized (gains) losses on Available for Sale Assets	(116,236)	(4,221)
4	Allocation adjustment on Employee Future Benefit Liabilities	7,589	-
5	Allocation adjustment on Available for Sale Assets	(186)	186
6	**Ending Accumulated Other Comprehensive Income (Loss)**	**(52,111)**	**(44,259)**

The change in value on Available for Sale Assets represents RSR and Basic's share of the employee future benefit assets. The allocation adjustment on Employee Future Benefit Liabilities in 2018/19 is due to the new ALM strategy whereby the primary allocator is now the payroll ratio and not the investment ratio.

PUB (MPI) 1-34

Part and Chapter:	**VI INV Appendix 17**	**Page No.:**	**10**
PUB Approved Issue No:	**8. Performance of the investment portfolio** **21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**Mercer ALM Alternatives & Board Risk Tolerance**		

Preamble to IR (If Any):

It was determined that the risk tolerance of MPI's Board of Directors for the assets backing the Basic claims liabilities was very low and that mitigating risk was more important that maximizing returns. The focus was on further reducing interest rate risk, with a willingness to take on modest credit risk (as long as it is diversified and cost effective).

Based on this risk tolerance, it was determined that the best way to mitigate the interest rate risk associated with the Basic claims liability was to develop an investment portfolio with 100% fixed income assets (i.e. no growth assets) and dollar and duration matching those assets to the claims liabilities.

Private debt was excluded from the Basic Claims portfolio as it was deemed to be incompatible with the Investment Committee's low appetite for risk for the Basic Claims portfolio. Similarly, leveraged bond funds and diversified growth funds (DGF) were excluded from consideration from all portfolios.

Question:

Please provide any support for the Board's discussion, analysis, conclusion, etc. that resulted in private debt, leveraged bond funds and diversified growth funds being excluded from consideration of all portfolios.

Rationale for Question:

To evaluate if there has been any significant changes or updates to efficient frontiers since the last Mercer report.

RESPONSE:

Private debt was not excluded from all portfolios; it was excluded from the Basic Claims portfolio but was included in the other portfolios. Leveraged bond funds and diversified growth funds were excluded because the Corporation was not comfortable with taking short positions in any securities. Diversified growth fund managers require full discretion to invest across a broad universe of asset classes and can use derivative instruments, similar to hedge funds. The Corporation was not comfortable with the use of derivatives in the asset class.

Both leveraged bond funds and diversified growth funds are considered growth asset classes. As a result of the Asset Liability Management study, the Corporation decreased the target weight of growth assets from 30% to 16% of the consolidated total portfolio. With allocations to infrastructure and real estate decreasing from 15% to 6%, and the equity allocation decreasing from 15% to 10%, there was little room to add meaningful allocations to growth asset classes to the asset mix (on a consolidated basis).

As discussed in *CAC (MPI) 1-96*, Board of Directors risk tolerance is shaped by the regulatory environment, the purpose of each of the funds, and the requirement to avoid negatively affecting the Province's consolidated financial statements

PUB Approved Issue No:	**8. Performance of the Investment Portfolio** **21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**Mercer's Interest Rate Forecasts**		

Preamble to IR (If Any):

Question:

Please provide the underlying assumptions and details in support of the Mercer interest rate forecasts in INV Appendix 17 Figure 2 (Standard) and Figure 3 (Forward Curve).

Rationale for Question:

To understand the source of the Mercer interest rate forecasts and assumptions for how the forecasts were determined.

RESPONSE:

[Redacted. This response has been filed in the confidential module pursuant to the Order No. 89/18.]

PUB (MPI) 1-36

Part and Chapter:	**IV SDM.1.6 Service Delivery Model**	**Page No.:**	**11**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Direct Repair Program**		
Sub Topic:			

Preamble to IR (If Any):

MPI implemented a straight through processing for high-performance repair shops. MPI has also implemented a Direct Repair Plus Program, which allows those enrolled to handle more perils and claims types that those solely in the Direct Repair Program.

Question:

a) Please explain what additional claims are handled under the Direct Repair Plus Program.
b) Please indicate how MPI has determined which repair shops have demonstrated a proven record of accomplishment on performance repairs.
c) How many body shops are eligible for the Direct Repair Program?
d) How many claims have been handled under the direct repair process?
e) How many post audits have been undertaken, and what have the results of the audits performed to date?

Rationale for Question:

To understand Direct Repair Program process.

RESPONSE:

a) The Direct Repair (DR) Plus program allows DR Plus eligible facilities to complete claims of increased complexity such as collision with animals, common carrier (rental and fleet vehicles) and out of province claims in addition to the claims allowed under the DR Program. Customers agreed to participate in the DR Plus program for 25% of eligible claims compared to 47% participation in the DR program.

Effective July 18, 2018, the DR and DR Plus programs were amalgamated to provide greater access to the DR program across Manitoba. Prior to the amalgamation, collision with animal claims were not eligible for direct repair as all the DR Plus shops were located in Winnipeg. It is expected that this amalgamation will increase the overall DR adoption rate.

b) Repair shops demonstrate a proven record of accomplishment based on performance by using Key Performance Indicators that align with MPI's objectives to control costs, improve efficiencies, encourage proper repair and enhance customer service. These scores are distributed to the shops monthly. Opportunities for improvement are reviewed by the Shop Relationship Advisor with the shops as deemed necessary.

c) As of February 28, 2018 there were 74 DR shops and 6 DR Plus shops. There were 15 additional shops that were eligible for the DR program based on KPI performance, but chose to not participate in DR at that time.

As of July 24, 2018, there are 90 DR shops in Manitoba after the amalgamation of DR and DR Plus.

d) For the period of March 1, 2017 to Feb 28th 2018, there were 14,233 claims completed within the DR Program.

e) MPI's physical damage claim audit process targets claims that fail to comply with specific estimating policies and procedures. Though all shops are subject to audit,

MPI focuses on shops with an earned approval limit which makes up 25% of all claims approved through automation. Earned Authority Limits (EAL) are provided to DR shops and non DR shops. Claims above EAL are reviewed by MPI estimating staff. The table below provides a summary of the results of claims audited in FY 2017/18.

Shop Type	Net $ Recovered	Claims With Recoveries	Total Claims Audited
Direct Repair	$192,983.89	1,303	9,932
Direct Repair Plus	$14,422.91	127	928
Non-Direct Repair	$311,305.55	2,222	12,008
Grand Total	**$518,712.35**	**3,652**	**22,868**

PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Cost Containment Measures**		
Sub Topic:			

Preamble to IR (If Any):

MPI has indicated that the current Light Vehicle Accreditation Agreement between MPI and the repair industry negatively impacts the financial viability of the Direct Repair (DR) program.

Question:

a) Please produce the Light Vehicle Accreditation Agreement, and if necessary, with a request for confidentiality under Rule 13.
b) Please provide the analysis that demonstrates that the $81 per DR claim premium exceeds the value saved by the Corporation related to preparing the first estimate.
c) Please file any analysis made that supported the establishment of the current premium.
d) Please indicate the amount paid in DR premiums to date and provide the analysis that supports the annual cost estimate of $6.3M.

Rationale for Question:

To understand the details and impact related to the current Light Vehicle Accreditation Agreement.

RESPONSE:

a) The 2017 Light Vehicle Accreditation Agreement (LVAA) is available on the MPI Partners website (as a reference for shops), along with policies and Estimating Standards. The 2017 LVAA is accessible at: http://www.mpipartners.ca/documents/Policies_Procedures/2017-LVAA.pdf

Although the question specifically requests production of the LVAA, a separate agreement negotiated with Automotive Trades Association and Manitoba Motor Dealers Association specifies compensation. A signed copy of this agreement is included at Appendix "A".

b) Please refer to the detailed cost benefit analysis in *PUB (MPI) 1-62*, for which the Corporation is seeking confidential treatment.

c) and d)

The Corporation initially established an amount of $6 million annually to be part of the LVAA payments for Direct Repair (DR) shops in the long run. The math used to support that estimate was that the Corporation expected 75% of the 98,000 annual repairable claims would be subject to the $81 premium over the long term. The $6 million in annual cost was not supported by established efficiencies to MPI, which are generated mainly through lower numbers of estimating staff. A key flaw in the $81 premium is that MPI is required to pay it on all jobs performed by a DR repair shop, not just DR jobs. Paying a premium for the roughly 80% of non-DR jobs creates a direct mismatch in costs and benefits, when no efficiencies are created. MPI is now relying on assessments of value, and NPV analysis in operational and claims management programs such as these. As significant efficiency gains have not materialized with DR, the Corporation has announced its intent to dramatically alter the $81 premium and other DR policies with its repair shop partner network. Future partner compensation negotiations better reflect the true cost incurred or value created, and also industry practice outside Manitoba, which is commonly not to remunerate repair shops for DR types of estimating.

To date, the Corporation paid $483,939 for 5,532 eligible claims in Q1 2018. The analysis supporting the annual cost estimate of $6.3M was subsequently revised it to $3.63M for 2018/19. As the DR program matures and adoption grows, the Corporation could expect that the DR premium could cost as much as $6 million per year if not changed and based on the percentage of MPI's repair capacity that DR shops process multiplied by the $81 premium. The variance from $6.3m down to $3.63m for 2018/19 resulted from the following:

i. The confirmation of DR Premium implementation criteria after negotiations to only include claims with a date of loss after December 31, 2017, and the claim's acceptance by a DR shop after February 28, 2018. 13,031 in claims paid by the Corporation in Q1 were excluded from the $81 payment due this change in criteria.

ii. The original estimate used a conservative scenario of 127 DR shops representing 71,989 claims being entitled to the premium.

iii. The estimate did not consider excluding claims for shops in corrective actions. DR shops must be in "good standing" to be entitled to the DR Premium. 264 claims were excluded from the DR Premium in Q1.

iv. DR Shops entering the operational phase of DR midway through Q1.

Figure 1: Annual Cost Estimate

	Q1	Q1	Q3	Q4
Original Estimate 2018/19 $6.3M	$1.57M	$1.57M	$1.57M	$1.57M
Re-Set Estimate $3.63M	$0.48M	$0.48M	$1.02M	$1.15M

Manitoba Public Insurance

THE MANITOBA PUBLIC INSURANCE CORPORATION

- and -

THE AUTOMOTIVE TRADES ASSOCIATION OF MANITOBA INC.

- and –

MANITOBA MOTOR DEALERS ASSOCIATION INC.

INDUSTRY AGREEMENT

March 1, 2017

An Agreement dated the 1st day of March, 2017.

BETWEEN:

THE MANITOBA PUBLIC INSURANCE CORPORATION
(called "**Manitoba Public Insurance**")

- and -

THE AUTOMOTIVE TRADES ASSOCIATION OF MANITOBA INC.
(called "**ATA**")

- and –

MANITOBA MOTOR DEALERS ASSOCIATION INC.
(called "**MMDA**")

WHEREAS:

The ATA and MMDA ("**Industry**") and Manitoba Public Insurance are entering into this agreement (the "**Industry Agreement**") in order to set out the agreed-upon labour rates and related fees and other compensation payable to accredited and non-accredited motor vehicle body shops in Manitoba, to establish an Accreditation Agreement template, and to address other issues within the collision repair industry in Manitoba.

NOW THEREFORE, the Parties hereto agree as follows:

1. DEFINITIONS

1.1. "**Accreditation Agreement**" means the agreement entered into between Manitoba Public Insurance and a motor vehicle repair shop covering Light Vehicle repairs that allows a motor vehicle repair shop to become an Accredited Shop, and entitled to the accredited rates and fees in the attached Schedule A – Compensation of this Industry Agreement. The template Accreditation Agreement in place as of the Effective Date is attached for reference only as Schedule E to this Industry Agreement.

1.2. "**Accreditation Program Administration**" is the Manitoba Public Insurance managed activity to coordinate and administer the initial enrollment, acceptance and ongoing accreditation requirements of each Accredited Shop and the industry overall.

1.3. "**Accreditation Requirements**" has the meaning given to it in the Accreditation Agreement.

1.4. "**Accredited Shop**" has the meaning given to it in the Accreditation Agreement.

1.5. "**Customer**" has the meaning given to it in the Accreditation Agreement.

1.6. "**Disputes**" has the meaning given to it in Schedule C – Governance.

1.7. "**DR Program**" has the meaning given to it in the Schedule 9.1 – Direct Repair

Program of the Accreditation Agreement.

1.8. "**DR Shop**" has the meaning given to it in the Schedule 9.1 – Direct Repair Program of the Accreditation Agreement.

1.9. "**Earned Approval Limit**" has the meaning given to it in Schedule B – KPI Program, Tiers and Earned Approval Limits, and MPI Service Level.

1.10. "**Effective Date**" means March 1, 2017.

1.11. "**Estimate**" has the meaning given to it in the Accreditation Agreement.

1.12. "**Estimating Standards**" has the meaning given to it in the Accreditation Agreement.

1.13. "**KPI**" or "**KPIs**" has the meaning given to it in Schedule B – KPI Program, Tiers and Earned Approval Limits, and MPI Service Level.

1.14. "**Light Vehicle**" has the meaning given to it in the Accreditation Agreement.

1.15. "**MPI Partners Website**" has the meaning given to it in the Accreditation Agreement.

1.16. "**Non-Accredited Shop**" means a motor vehicle repair shop which has not entered into an Accreditation Agreement with Manitoba Public Insurance.

1.17. "**OEM**" has the meaning given to it in the Accreditation Agreement.

1.18. "**Party**" or "**Parties**" means individually or collectively the ATA, MMDA, or Manitoba Public Insurance (as the case may be).

1.19. "**Policies & Procedures**" has the meaning given to it in the Accreditation Agreement.

1.20. "**Proper Repair**" has the meaning given to it in the Accreditation Agreement.

1.21. "**Quality Assurance Program**" has the meaning given to it in the Accreditation Agreement.

1.22. "**Tiers**" has the meaning given to it in Schedule B – KPI Program, Tiers and Earned Approval Limits, and MPI Service Level.

2. TERM AND TERMINATION OF INDUSTRY AGREEMENT

2.1. Term

This Industry Agreement comes into effect as of March 1, 2017, and shall continue until terminated, in accordance with the terms and conditions of this Industry Agreement.

2.2. Termination

A Party may terminate its involvement with this Industry Agreement by providing sixty (60) days prior written notice to all of the other Parties.

2.3. Effect of Termination

In the event this Industry Agreement is terminated, Manitoba Public Insurance may elect to continue to pay the rates and fees in the attached Schedule A – Compensation that were in effect prior to the termination of this Industry Agreement, or deem different rates and fees to be applicable.

3. SCOPE

3.1. Industry Member Representation

The ATA and MMDA warrant that they have the authority to negotiate for their collective member motor vehicle repair shops regarding the rates and fees, and obligations in this Industry Agreement, and the Accreditation Agreement.

3.2. Compensation

This Industry Agreement covers the process to administer fee increases to be paid by Manitoba Public Insurance to all Accredited Shops and Non-Accredited Shops in Manitoba as determined by Manitoba Public Insurance for Light Vehicle repairs. The details of these rates and fees and other compensatory items are outlined in the attached Schedule A – Compensation, and shall be paid to Accredited Shops and Non-Accredited Shops in accordance with the Accreditation Agreement, the Policies and Procedures, and this Industry Agreement. Where a particular service is not addressed by this Industry Agreement, the Accredited Shop or Non-Accredited Shop and Manitoba Public Insurance may negotiate the fees to be charged for such specialized services on a case-by-case basis. At the Effective Date of this Industry Agreement, rates and fees in Schedule A – Compensation are only for the duration indicated in Schedule A – Compensation. The Parties shall negotiate any renewal or updates to Schedule A – Compensation prior to the expiry date indicated in Schedule A – Compensation utilizing the governance process in Schedule C – Governance. In the event the Parties cannot agree on a revised Schedule A – Compensation prior to its expiry date, Manitoba Public Insurance shall continue to pay the rates and fees in Schedule A – Compensation that were in effect prior to its expiry. Changes to Schedule A – Compensation will be posted on the MPI Partners Website and Industry, and the Accredited Shops will be notified of such changes in accordance with Article 7.

3.3. Estimating Standards

Manitoba Public Insurance has established and published a series of Estimating Standards applicable to the repair of Light Vehicles in Manitoba by all Accredited Shops and Non-Accredited Shops. The current version(s) may be found on the MPI Partners Website. Manitoba Public Insurance and the Industry shall utilize the governance process in Schedule C – Governance to discuss potential changes to, or any Disputes regarding the Estimating Standards. Changes to the Estimating Standards will be posted on the MPI Partners Website and Industry will be notified of such changes in accordance with Article 7.

3.4. KPI Program and Earned Approval Limits

Manitoba Public Insurance has established and published a series of KPIs, Tiers, and Earned Approval Limits applicable to the repair of Light Vehicles in Manitoba by all Accredited Shops. The KPIs and Earned Approval Limits in effect as of the Effective Date are included in the attached Schedule B – KPI Program, Tiers and Earned Approval Limits, and MPI Service Level. Manitoba Public Insurance and the Industry shall utilize the governance process in Schedule C – Governance to discuss potential changes to, or any Disputes regarding the KPIs and Earned Approval Limits.

Changes to the KPIs and Earned Approval Limits will be posted on the MPI Partners Website and Industry will be notified of such changes in accordance with Article 7.

3.5. Quality Assurance, Accreditation Requirements and Program Administration
Manitoba Public Insurance has established a Quality Assurance Program, Accreditation Requirements, and Accreditation Program Administration rules, applicable to the repair of Light Vehicles in Manitoba by all Accredited Shops and Non-Accredited Shops. The current version(s) may be found on the MPI Partners Website. Manitoba Public Insurance and the Industry shall utilize the governance process in Schedule C – Governance to discuss potential changes to, or any Disputes regarding the Quality Assurance Program, Accreditation Requirements, and Accreditation Program Administration rules. Changes to the Quality Assurance Program, Accreditation Requirements, and Accreditation Program Administration rules will be posted on the MPI Partners Website and Industry will be notified of such changes in accordance with Article 7.

3.6. DR Program Requirements and Administration
Manitoba Public Insurance has established and published requirements and administrative procedures regarding the DR Program, applicable to the repair of Light Vehicles in Manitoba by all Accredited Shops accepted into the DR Program. The current version(s) may be found on the MPI Partners Website. Manitoba Public Insurance and the Industry shall utilize the governance process in Schedule C – Governance to discuss potential changes to, or any Disputes regarding the Direct Repair Program. Changes to the Direct Repair Program will be posted on the MPI Partners Website and Industry will be notified of such changes in accordance with Article 7.

3.7. Sustainable Industry Development Initiatives
Manitoba Public Insurance and Industry are committed to the long term viability and sustainability of the Manitoba repair industry for Light Vehicles. Schedule D – Sustainable Industry Development Initiatives outlines industry initiatives undertaken by the Parties.

3.8. Manitoba Public Insurance Mandate
Manitoba Public Insurance is undertaking its Physical Damage Re-engineering program in conjunction with the Industry to improve overall efficiency and effectiveness of the physical damage repair management process. These activities include efforts to streamline and adjust business practices to obtain savings for Manitoba Public Insurance and motor vehicle repair shops in administrative efficiency and overall cost savings in the completion of physical damage repairs.

Manitoba Public Insurance will consult with Industry in the development of new operating policies and procedures to implement the technology and improved business practices that the Physical Damage Re-engineering program will develop in accordance with Schedule C – Governance. The Parties recognize that changing business conditions require a co-operative and mutually beneficial approach to achieving an overall effective and sustainable collision repair industry in Manitoba that is also affordable to Manitoba Public Insurance's rate payers.

Manitoba Public Insurance retains the right to establish and update its own internal policies and strategic direction regarding the issues contemplated by this Industry Agreement generally, and without limiting the foregoing the issues contemplated by Sections 3.3 to 3.7, and reserves the right to effect any such decisions as it so requires.

3.9. Job Solicitations

Manitoba Public Insurance shall not directly or indirectly solicit any employee of the motor vehicle body shops in Manitoba who provide repair services to Manitoba Public Insurance. The foregoing prohibition shall not prevent Manitoba Public Insurance from publishing general advertisements for employees and subsequently hiring such employees who respond to such advertisements.

4. Governance

4.1. Governance

Manitoba Public Insurance and Industry agree to govern themselves, resolve any Disputes, and discuss any changes to this Industry Agreement as outlined in Schedule C – Governance.

5. DISCLOSURE OF INFORMATION

5.1. Industry acknowledges that *The Freedom of Information and Protection of Privacy Act* ("**FIPPA**") and *The Personal Health Information Act* ("**PHIA**") each impose obligations on Manitoba Public Insurance to collect, use or disclose "personal information" and "personal health information", as those terms are defined in FIPPA and PHIA (collectively called "**Personal Information**"), in the strictest of confidence, and in accordance with those Acts.

5.2. While this Industry Agreement is in effect, and at all times thereafter, the Parties agree to treat as confidential information and materials acquired by it, or to which it has been given access, in the course of the performance of this Industry Agreement (collectively called "**Confidential Information**"), excluding information that is in the public domain (for greater certainty, this does not include information in the public domain which was made public as a result of an unauthorized disclosure by a third party). For the purposes of this Agreement, Personal Information shall be considered to be Confidential Information.

5.3. The Parties agree that during the term of this Agreement and at all times thereafter:

(a) the Personal Information disclosed to a Party (a "**Receiving Party**") by a disclosing Party (the "**Disclosing Party**") may only be used by the Receiving Party in a manner expressly permitted by FIPPA, PHIA, *The Personal Information Protection and Electronic Documents Act* (Canada), or such other applicable privacy laws (as the case may be);

(b) the Receiving Party shall not disclose or permit the disclosure of Confidential Information, or any copies of it, in any format, to any third party that is not a Party's Representative without the express prior written consent of the Disclosing Party;

(c) Industry shall comply with all directives given to it by Manitoba Public Insurance with respect to safeguarding, or otherwise ensuring the confidentiality, of any Confidential Information disclosed to it by Manitoba Public Insurance;

(d) the Receiving Party shall ensure that access to the Confidential Information by the Representatives of the Receiving Party is on a "need-to-know" basis, and that access, when given, shall be to the minimum amount of Confidential Information necessary to accomplish the task;

(e) the Receiving Party shall use the Confidential Information only for those purposes that have been expressly permitted by this Industry Agreement, or by the Disclosing Party;

(f) the Receiving Party shall not reproduce Confidential Information, in any format, without the express prior written consent of the Disclosing Party, other than for the Receiving Party to perform its obligations under this Industry Agreement;

(g) Industry shall ensure that it, or its Representatives, do not transport or store any Personal Information collected, used or disclosed under this Agreement outside of Canada without the express prior written consent of Manitoba Public Insurance; and,

(h) after the Confidential Information has been used for its authorized purpose, or where destruction of the Confidential Information is requested by the Disclosing Party or is required by this Agreement, or upon expiration or termination of this Services Agreement, the Receiving Party shall destroy the Confidential Information (and all copies of the Confidential Information in any form) in a manner which adequately protects the confidentiality of the Confidential Information. If destruction of the Confidential Information is not possible or feasible the Receiving Party shall extend the confidentiality protections of this Article 5 to the Confidential Information indefinitely.

5.4. During the term of this Agreement and at all times thereafter, the Parties shall take reasonable precautions to prevent any unauthorized disclosure of the Confidential Information. The standard of such precautions taken by a Party shall be the greater of:

(a) the standards the Receiving Party has in place to protect its own Confidential Information; or,
(b) the standards imposed on the Receiving Party by the Disclosing Party.

5.5. A Party shall immediately notify the other Parties in writing upon becoming aware of any unauthorized use of, access to, disclosure of, or destruction of Confidential Information (a "**Confidentiality Breach**"). The written notification must include full details of the Confidentiality Breach. The Party shall immediately take all reasonable steps to prevent the recurrence of any such Confidentiality Breach and shall notify the other Parties in writing of the steps taken.

5.6. The Parties shall inform its applicable Representatives of the obligations imposed upon it in this Agreement with respect to Confidential Information, and shall take whatever steps are necessary to ensure that all of its Representatives comply with those obligations.

5.7. The Parties acknowledge that monetary damages may not be a sufficient remedy for a Confidentiality Breach, and that a Party may, without waiving any other rights or remedies, seek appropriate injunctive or equitable relief from a court of competent jurisdiction.

5.8. If a Party receives a subpoena or other validly issued administrative or judicial order seeking Confidential Information, the Party shall provide prompt notice to the other Parties and deliver to the other Parties a copy of its proposed response to the demand.

Unless the demand has been time-limited, quashed or extended, the Party shall thereafter be entitled to comply with the demand to the extent permitted or required by law. If so requested by a Party, and at the expense of that Party, the other Parties shall cooperate with that Party in the defence of the demand.

5.9. Industry undertakes not to publish any public statement or advertisement with respect to this Agreement and further undertakes not to seek publicity of this Agreement without the express prior written consent of Manitoba Public Insurance, except as otherwise required by law or by this Agreement.

5.10. A Party shall cooperate with the other Parties so that the other Parties or Party can verify that the Party has complied, and is complying, with the provisions of this Article 5.00.

6. General

6.1. Independent Parties

For the purposes of this Industry Agreement "Representatives" is defined as the directors, officers, shareholders, employees, subcontractors, partners, volunteers, agents, affiliates, members, delegates and other representatives of a Party. This Industry Agreement does not create the relationship of employer and employee, of principal and agent, of joint venture, or of partnership between Manitoba Public Insurance and Industry, or between Manitoba Public Insurance and any Representatives of Industry. The Representatives of one Party shall not be deemed or construed to be the Representatives of the other Party for any purpose whatsoever.

6.2. Assignment or Transfer

The ATA or MMDA shall not assign or transfer this Industry Agreement or any of their rights or obligations under this Industry Agreement without first obtaining written permission from Manitoba Public Insurance. This Agreement shall be binding upon the successors and any permitted assigns of the Parties.

6.3. Survival

The terms and conditions contained in this Industry Agreement that by their sense and context are intended to survive the performance of this Industry Agreement by the Parties shall so survive the completion and performance, suspension or termination of this Industry Agreement.

6.4. Entire Agreement

This Industry Agreement, including any schedules, along with any policies, procedures or directives referenced herein contain the entire agreement between the Parties with respect to the subject matter hereof, and supersedes and extinguishes all prior oral and written communications between the Parties about its subject matter. There are no undertakings, representations, or promises, express or implied, other than those contained in this Industry Agreement and none have been relied on.

6.5. Amendment

No amendment or change to, or modification of this Industry Agreement shall be valid unless it is in writing and signed by all Parties.

6.6. Invalidity

If any provision of this Industry Agreement is for any reason invalid, that provision shall be considered separate and severable from this Industry Agreement, and the other provisions of this Industry Agreement shall remain in force and continue to be binding upon the Parties as though the invalid provision had never been included in this Industry Agreement.

6.7. Applicable Laws

This Industry Agreement shall be interpreted, performed and enforced in accordance with the laws of Manitoba and the laws of Canada applicable therein. The Parties hereby irrevocably and unconditionally attorn to the exclusive jurisdiction of the courts of the Province of Manitoba and all courts competent to hear appeals therefrom.

6.8. Waiver

Any failure or delay by a Party to exercise or partially exercise any right hereunder shall not be deemed a waiver of any of the rights under this Industry Agreement. The waiver by a Party of a breach of any provision of the Industry Agreement shall not operate as, or be construed as, a waiver of any subsequent breach thereof. The election of any one or more remedies by a Party shall not constitute a waiver of that Party's right to pursue other available remedies.

6.9. Further Acts

The Parties agree to perform any further acts and execute and deliver any documents that may be reasonably necessary to carry out the provisions of this Industry Agreement.

6.10. Dollars

All dollar references in this Agreement and its schedules are in Canadian Dollars unless otherwise specified.

7. Notices

7.1. Addresses

Any notice or other communication under this Agreement shall be delivered:

To the ATA:

President
The Automotive Trades Association of Manitoba Inc.
112-1790 Wellington Avenue
Winnipeg, Manitoba, R3H 1B2
Email: ata@mts.net

To the MMDA:

Executive Director
Manitoba Motor Dealers Association Inc.
112-1790 Wellington Avenue
Winnipeg, Manitoba, R3H 1B2
Email: info@mmda.mb.ca

To Manitoba Public Insurance:

Director, Service Operations Control and Compliance
Manitoba Public Insurance
Box 6300
807-234 Donald St.
Winnipeg, Manitoba R3C 4A4
Email: serviceopscontandcomp@mpi.mb.ca

7.2. Notice Timing
Any notice or communication:

(a) sent by registered mail shall be deemed to have been received on the third business day following the date of mailing;
(b) sent by facsimile or other electronic transmission (including email) shall be deemed to have been received on the same business day it was sent if it was sent prior to 5:00 PM central time, or the next business day following the date it was sent if it was sent after 5:00 PM central time; and,
(c) sent by courier or personal delivery shall be deemed to have been received on the day that it was delivered.

This Industry Agreement has been executed on behalf of the Parties (by their duly authorized representatives) effective the date first above written.

* The designated repairs labour rate was previously named the mechanical specialty labour rate.

Accreditation Agreement Effective Date and Application to Rates:

Accredited Shops that sign a new Accreditation Agreement with an effective date on or after March 1, 2017:

- shall start being paid the rates under this schedule upon the effective date of their new Accreditation Agreement.
- shall have access to the rates, fees, Inflation Protection Index (as defined below), and Top Up Payments (as defined below) under this schedule during the effective term of this schedule.

Non-Accredited Rates
The Non-Accredited rates shall no longer be indexed to the Accredited rates. The Non-Accredited rates in place as of February 28, 2017 shall remain unchanged going forward. Manitoba Public Insurance will work with Industry to review and set these values as warranted by ongoing market conditions and customer need.

Administration Fee:
For completed repairs where the vehicle has been returned to the customer with body, frame, mechanical, and/or designated repair labour an administration fee may be charged as follows:

	As of Jan 1, 2016	As of Mar 1, 2017	As of Mar 1, 2018
Rate, per Repair	$15.00	$15.00	$15.00

In the event this schedule lapses or is terminated, Manitoba Public Insurance is not obliged to pay for any such administration fees incurred after the lapse or termination.

Inflation Protection for Labour Rates:
Labour rate increases shown throughout the tables in this schedule may indicate year over year percentage increases. The rates in this schedule with a year over year percentage increase are subject to the Inflation Protection Index defined below. Those rates set at the same rate for each year (i.e. there is no planned increase year over year) ("**Frozen Rates**") are not subject to the Inflation Protection Index and will be excluded from the calculations and rate adjustments

Inflation Protection Index Calculation:
The percentage rate increase will be protected against inflation in year two of this schedule. Inflation for a given year (March 1st to February 28th) will be calculated using:

- forty (40%) percent of the Industrial Average Wage ("**IAW**") increase for Manitoba from data provided by Statistics Canada, and
- sixty (60%) percent of the Consumer Price Index ("**CPI**") for Manitoba from data provided by Statistics Canada.

Referred to as the "**Inflation Protection Index**".

- For greater certainty, the Inflation Protection Index calculation for a given year will use the above-mentioned IAW and CPI Manitoba data from the twelve month period beginning January 1st and ending December 31 in the prior year.
- The Inflation Protection Index only applies to the second year of the term of this schedule.

As an example calculation: if the average industrial wage increase was 1.6% and the CPI increase was 1.4%, and the applicable annual increase was only a 1%, then:

- [1.6% (IAW increase) X 0.4] + [1.4% (CPI increase) X 0.6] =
  - 0.64% + 0.84% yields an Inflation Protection Index of 1.48%
- 1.48% Inflation Protection Index – 1% (annual increase) = 0.48%
- The proposed labour rate is increased by a further 0.48%.

In the event this schedule lapses or is terminated, Manitoba Public Insurance is not obliged to provide this Inflation Protection Index after the lapse or termination.

Labour Pool Increase Amount Guarantee:
The agreed annual increase to the labour pool is $2.5 million (the "**Labour Pool Increase Amount**") in each of the two years of this term of this schedule. The "**Actual Volume of Work**" equals the total amount of labour hours for Services performed by Accredited Shops in a year (ending February 28) for work paid in that year (work in progress does not count). The **"Agreed Baseline**" for March 1, 2017 is 1,631,753 labour hours for all labour types. The Labour Pool Increase Amount shall be distributed on a pro rata basis to those Accredited Shops that performed the Services in the year (ending February 28) as follows:

Labour Pool Increase Amount Calculation:
The Actual Volume of Work divided by the Agreed Baseline in the period equals the "**Labour Hour Ratio**".

- If the Labour Hour Ratio is ***greater than*** 1.0 then the Labour Pool Increase Amount has been fully consumed and there is no adjustment applied, and no further payments to Accredited Shops.
- If the Labour Hour Ratio is ***less than*** 1.0 then the Labour Pool Increase Amount has ***not*** been fully consumed and an adjustment shall be applied as follows:

Adjustment Pool Amount and Top Up Payment Calculation:
Accredited Shops, still in operation in the following Period, may receive a Top-Up Payment based upon the Adjustment Pool Amount as follows. The following definitions apply:

(a) The **"Adjustment Pool Amount"** in dollars equals the Current Period's Planned Total Labour Spend in dollars less the Actual Labour Paid in the Period.
(b) The "**Current Period's Planned Total Labour Spend"** equals the Prior Period's Actual Labour Paid plus the Labour Pool Increase Amount ($2.5 Million).
(c) "**Actual Labour Paid**" means the gross total amount of dollars paid by Manitoba Public Insurance to Accredited Shops for the Services in the Period.
(d) "**Period**" means the applicable year ending on February 28.
(e) "**Prior Period**" mean the twelve month period before the Period.

The following are examples of how to calculate the Adjustment Pool Amount:

1. ***Actual labour paid is above prior period, but below current period's planned labour spend***

Adjustment Pool Amount Example :		Totals
Prior Period (2016 in this case) Actual Labour Paid in $M	$	116.7
Plus :: Labour Pool Increase Amount $M	$	2.5
Current Period's Planned Total Labour Spend $M	$	119.2
Less :: Actual Labour Paid in Period $M	$	118.0
Adjustment Pool Amount $	$	1,200,000

This scenario is consistent with fewer repairable claims than the planned baseline and a corresponding under run of total hours of work paid in the period.

An Accredited Shop's "**Top Up Payment**" shall be calculated as the Individual Accredited Shop Amount Paid divided by the Actual Labour Paid, multiplied by the Adjustment Pool Amount.

The "**Individual Accredited Shop Amount Paid**" means the gross total amount of labour dollars paid by Manitoba Public Insurance to the individual Accredited Shop for the Services in the Period.

The following is an example of how to calculate an Accredited Shop's Top Up Payment:

Top Up Payment example:			
Actual Labour Paid to Industry in Period: **$118.0M**			
Adjustment Pool Amount: **$1.2M**	Shop A	Shop B	Shop C
Individual Accredited Shop Amount Paid $	$1,200,000	$200,000	$50,000
Individual Accredited Shop Amount Paid / Actual Labour Paid to Industry	1.2M/118M	200K/118M	50K/118M
Accredited Shop's Percentage of the Adjustment Pool Amount	1.02%	0.17%	0.04%
Accredited Shop's Top Up Payment $	$12,203	$2,034	$508

2. ***Actual labour paid is below prior period***

Adjustment Pool Amount Example :		
		Totals
Prior Period (2016 in this case) Actual Labour Paid in $M	$	116.7
Plus :: Labour Pool Increase Amount $M	$	2.5
Current Period's Planned Total Labour Spend $M	$	119.2
Less :: Actual Labour Paid in Period $M	$	115.0
Adjustment Pool Amount $	$	4,200,000

This scenario is consistent with fewer repairable claims than the planned baseline and a corresponding under run of total hours of work paid in the period; in this case the work is below the prior year base.

Top Up Payment example:			
Actual Labour Paid to Industry in Period: **$115.0M**			
Adjustment Pool Amount: max of **$2.5 M**	Shop A	Shop B	Shop C
Individual Accredited Shop Amount Paid $	$1,200,000	$200,000	$50,000
Individual Accredited Shop Amount Paid / Actual Labour Paid to Industry	1.2M/115M	200K/115M	50K/115M
Accredited Shop's Percentage of the Adjustment Pool Amount	1.04%	0.17%	0.04%
Accredited Shop's Top Up Payment $	$26,087	$4,348	$1,087

- Individual Top Up Payments of less than fifty ($50.00) dollars will not be made, will not accrue, will expire, and will not count for next year's Top Up Payments.
- Top Up Payments shall be completed by June 1 of the current year of the term of this schedule.

Nothing in this schedule or the Industry Agreement, or the Accreditation Agreement shall be construed as Manitoba Public Insurance guaranteeing the total or minimum number of labour hours required during the term of this schedule. The intent is to fully consume the incremental labour funding of $2.5 million in the first year and the second $2.5 million in the second year. In the event this schedule lapses or is terminated, Manitoba Public Insurance is not obliged to provide this Labour Pool Increase Amount guarantee after the lapse or termination.

DR Program Premium Structure:

1. The Premium Amount applies to all DR Shops in all regions of the Province of Manitoba.
2. The Premium Amount does not apply to jobs that have not been returned to the Customer.
3. For all DR Shops in good standing the Premium Amount shall be paid for all completed Eligible Repairs in the periods noted below in the Premium Amount table. "**Eligible Repairs**" are repairs done by a DR Shop where the vehicle has been returned to the Customer with body/refinish labour in accordance with the Accreditation Agreement.
4. Premium Amount payments will be calculated quarterly and distributed within thirty (30) days in accordance with the Accreditation Agreement.
5. Payments of less than fifty ($50.00) dollars shall not be made, will not accrue, and will expire.

Premium Amount:

	As of Jan 1, 2016	As of Mar 1, 2017	As of Mar 1, 2018
Rate, per eligible repair (job)	n/a	$0.00	$81.00

Total Premium Amounts:

- Manitoba Public Insurance anticipates that in the second year of the term of this schedule, the Premium Amount shall apply to approximately 31,000 Eligible Repairs (the "**Estimated Amount**") completed in qualified DR Shops. This equates to about $2.5 million in additional disbursements for the DR Program in the second year of the term of this schedule.
- Actual volumes of Services experienced by the industry are a function of market conditions; the Estimated Amount is neither capped nor guaranteed by Manitoba Public Insurance.
    - Manitoba Public Insurance shall pay the per job Premium Amounts as they are earned.
    - If the value of Eligible Repairs is less than the Estimated Amount Manitoba Public Insurance is not required to top up or guarantee the Estimated Amount of Services.

Manitoba Public Insurance

Effective March 1, 2017

Job Maximums:

- The first two instances of a windshield repair are included in the initial fee.
- Cracks are paid for units of 4 inches each.
- Cracks are capped at the amount for an 8 inch repair, made up of the initial 4 inches and up to 4 more inches.

Notes:

1. Starting March 1, 2017:
   a. The Non-Accredited rate for all glass repairs shall no longer be indexed to the Accredited rate.
      i. Manitoba Public Insurance will work with Industry to review and set the value as warranted by ongoing market conditions and Customer need.

Additional Items

Various additional items may be appended to this schedule as appendices.

Items may include but are not limited to:

- Lock Coding and Services: no changes contemplated in the period.
  - See Appendix 1: Lock Coding and Services
  - Manitoba Public Insurance and Industry will review this item on a regular basis through the governance process of this Industry Agreement and make adjustments as the marketplace and Customer need warrants.

- Court and Regulatory Appearance Fees:
  - See Appendix 2: Court and Regulatory Appearance Fees
  - To be set per Manitoba Public Insurance current allowances for such appearances.

- Alternative Transportation Rates (Loss Of Use & Courtesy Cars)
  - See the MPI Partners Website for the Alternative Transportation Rates.

Appendix 1: Lock Coding and Services

Lock Coding

	Initial Lock Coding – domestic and foreign	Each additional Lock Coding for **domestic**	Each additional Lock Coding for **foreign**	Coding sidewinder ignitions	Coding sidewinder door & trunk cylinders	OEM Lock Discount Rate (off of list)	On-site service charge
1-Jan-16	$50.00	$34.40	$41.40	$65.00	$55.00	26.0%	n/a
1-Mar-17	$50.00	$34.40	$41.40	$65.00	$55.00	26.0%	n/a
1-Mar-18	$50.00	$34.40	$41.40	$65.00	$55.00	26.0%	n/a

Appendix 2: Court and Regulatory Appearance Fees

Fees for Accredited Shops' Representatives attending internal Manitoba Public Insurance claim dispute resolution processes, civil, criminal, or other court or administrative proceedings in order to provide testimony related to their Estimates or services when required, shall be paid at an hourly rate of $37.50 per hour to the Accredited Shop, provided that this rate shall only apply to appearances and calls, and does not apply to any prep work or background actions required or performed by the Accredited Shop's Representatives. It is the Accredited Shop's responsibility to adequately compensate their Representatives for these services. These rates also do not apply to any Lock Coding rates in Appendix 1.

SCHEDULE B: KPI Program, Tiers and Earned Approval Limits, and MPI Service Level

Definitions:

"CE" (Collaborative Estimating) means Manitoba Accredited Shops which have installed and are using the Mitchell Products to work collaboratively with Manitoba Public Insurance to process physical damage claims. These Accredited Shops are not eligible to produce the First Estimate of physical damage related to a Manitoba Public Insurance physical damage claim.

"DR" (Direct Repair) means Manitoba DR Shops producing the First Estimate of physical damage related to a Manitoba Public Insurance physical damage claim.

"DR Criteria" is the term used to describe the performance criteria each Accredited Shop must meet or exceed to be eligible to apply for and continue to participate in the DR Program.

"DR Shop" means an Accredited Shop that meets the DR Criteria, and that has applied and has been accepted into the DR Program by Manitoba Public Insurance.

"EAL" (Earned Approval Limit) means the limit under which an Accredited Shop does not require Manitoba Public Insurance review and approval to proceed with repair work. EAL is based on total gross value of the estimate.

"FA-LOU Program" (Fair Allocation Loss of Use) means an optional program managed and set up by MPI to offer Customers alternate transportation in the event that the vehicle is unavailable to them and they also have coverage for its loss of use.

"Tier" means the specific operating level for EAL and any related premium value, its associated eligibility criteria, representing a defined range of options and performance parameters as contemplated in this schedule.

Part 1 - Key Performance Indicator ("KPI") Program ("KPI Program")

KPIs are a way to measure an Accredited Shop's performance against Manitoba Public Insurance's business standards and policies. A number of KPIs will be tracked to determine Tier level assignments. Accredited Shops will be able to influence their assignment to a Tier by the degree to which they meet or exceed target values for each indicator.

The KPI Program shall have a balanced approach reflecting performance against various criteria as follows:

KPI Structure		
Customer Satisfaction	Financial & Administrative	Quality Of Repair

The composition and particular measures shall be developed by Manitoba Public Insurance at its sole discretion to manage its operational risk and facilitate administrative efficiencies and desired business outcomes for the Parties.

Manitoba Public Insurance shall publish the latest KPI measures and current operating targets on the MPI Partners Website.

- The KPI measures shall each have a purpose, definition (what is being measured), formula (how is it calculated), interpretation, and applicability criteria.

Manitoba Public Insurance shall consult with Industry on updates and structural changes to the KPI Program such as changes, deletions or additions to the KPI set, adjustments to EALs, or other such amendments per Schedule C – Governance.

It is anticipated that future compensation methods may utilize the KPI Program to provide alternative means to assess and pay for particular service levels and desirable outcomes. Manitoba Public Insurance shall consult with Industry on the development and introduction of such compensation programs per Schedule C – Governance.

Part 2 - Tier Structure and Earned Authority Levels

All Accredited Shops must meet and maintain minimum criteria to become accredited, and are required to be capable of performing safe, Proper Repairs. In addition to facilities, equipment, and technician training to perform repairs, some Accredited Shops have also invested in their processes and training to maximize compliance to operating standards and policies, minimize cycle time, and ensure a cost effective repair.

Accredited Shops with consistently higher levels of performance will have different levels of privileges such as not requiring approval to proceed with repair work up to a certain EAL.

The following table depicts the Tier structure.

Tier	Tier Name	Earned Approval Limit (EAL)
4	EAL-3500	$3,500
3	EAL-2500	$2,500
2	EAL-1500	$1,500
1	Base	$0

The EAL limits shall be set and revised from time to time as Manitoba Public Insurance determines. Eligibility criteria for each Tier are determined by Manitoba Public Insurance at its sole discretion. Manitoba Public Insurance shall publish the latest criteria on the MPI Partners Website.

Tier Privileges:

Automated Approvals or EALs: A CE or DR Shop in a particular Tier may complete repairs without specific Manitoba Public Insurance approval where the cumulative total cost of the repair is less than the EAL for that Tier.

Base level or an EAL of $0 approval means that all submissions from the Accredited Shop (Estimate and/or Supplement) are subject to review and approval by Manitoba Public Insurance review staff. Tiers 2 through 4 have a review process where selected submissions will be assessed for compliance with the Estimating Standards and the Policies & Procedures. See the latest Policies & Procedures on the MPI Partners Website for the operating details for such reviews.

An Accredited Shop must apply for Tier Privileges (Earned Approval) and be accepted into the Program.

Part 3 – Manitoba Public Insurance Service Level

The Parties agree to introduce a new standard of performance for Manitoba Public Insurance relating to the review of first submissions.

First submissions are either the First Estimates if completed by an Accredited Shop, or the Accredited Shop's First Supplement.

The agreed to service standard is:

- A completed review within four (4) of Manitoba Public Insurance's normal business hours (8:30 AM to 4:30 PM Monday to Friday) excluding holidays of first submission by the Accredited Shop.

Actions:

- Accredited Shops are authorized to proceed with the repair work, including ordering parts as defined in such first submissions if Manitoba Public Insurance has not responded within four (4) business hours.

- Such first submissions are subject to Manitoba Public Insurance's review and audit processes, including but not limited to recovery of inappropriate charges or other items in question in accordance with the Accreditation Agreement.

This measure and related activities will be reported on a regular basis as part of the Executive Committee responsibilities under Schedule C – Governance.

Part 4 – Manitoba Public Insurance Optional Management Programs

Manitoba Public Insurance shall from time to time introduce optional programs to improve customer services in the local markets that the Manitoba repair industry may participate in. For those accredited shops that are interested and that qualify, an opportunity to expand their services into areas related to the work undertaken by shops for Manitoba Public Insurance paid repairs shall be offered.

Such programs are under Manitoba Public Insurance's sole discretion to implement and may be updated or modified (including but not limited to the orderly wind up of said program) at any time by Manitoba Public Insurance at its sole discretion. Manitoba Public Insurance shall review such proposed programs and the associated updates with Industry per the terms of Schedule C – Governance. Any such programs will be managed in an orderly manner, with scheduled updates and releases co-ordinated across the entire Province. The ongoing activities in the programs will be reviewed as part of the Executive Committee responsibilities under Schedule C – Governance.

In support of such reviews:

- The various committee structures in Schedule C – Governance, as directed by the Executive Committee, shall prepare the necessary criteria, reviews, policies, operating procedures, analysis etc... that shall allow the Parties to understand the intent and impact of the proposed optional management programs.
- Manitoba Public Insurance shall take such materials into consideration in establishing the individual program requirements and to accommodate those items it deems appropriate into the relevant program's ongoing management processes.

The structure of all such programs are as follows:

- They are voluntary (no Accredited Shop is obligated to apply to participate);
- They are open to any Accredited Shop that meets the eligibility criteria of each program;
    - Meeting the **entry** eligibility criteria is determined on a case by case basis and applies to each Accredited Shop that applies in its own right;
        - The entry criteria shall change from time to time; such changes will be managed in an orderly manner.
    - Each participating Accredited Shop is required to meet the **on-going** eligibility criteria of each program they have applied for;
        - Such on-going criteria shall change from time to time; such changes will be managed in an orderly manner.
- Programs will have varying promotion and marketing requirements that the participating shops will need to follow. Such promotion plans, will be as set out in the program's individual plans and on the MPI Partners Website.

Currently there are two optional management Programs contemplated under this schedule:

1. Direct Repair
    - For eligible claims, Customers can go direct to a DR Shop to obtain their First Estimate.
2. Alternative Transportation Management / Loss of Use
    - For eligible claims, Customers can have their alternative transportation needs met directly by the participating Accredited Shop.

The latest program plans can be found on the MPI Partners Website.

Schedule C – Governance
Effective March 1, 2017

1. Objectives

(a) Principal Objectives: The principal objectives of the governance structure are:

(i) facilitating the proper management of the relationship between Manitoba Public Insurance and the ATA and MMDA and to encourage co-operative and value-added behavior;
(ii) establishing clear lines of responsibilities and decision making accountability;
(iii) resolving issues as quickly as possible; and,
(iv) providing clear and centralized channels of communication so that the Parties both receive consistent and relevant information.

(b) Co-operation: Manitoba Public Insurance and the ATA and MMDA recognize that the success of the relationship will be dependent upon the timely sharing of information, co-operation and decision-making. The Parties recognize that the level at which information is shared between the Parties is dependent upon the nature of the information being shared. Each Party has the responsibility of ensuring that information is passed along within in its own organization as required and as appropriate.

2. Executive Committee:

(a) Composition: The Parties hereby establish a committee of eight (8) senior personnel (the "**Executive Committee**") as follows:

(i) Manitoba Public Insurance will assign four (4) senior executives to the Executive Committee; and,
(ii) the ATA and MMDA will each assign two (2) senior executive to the Executive Committee with the ability to represent their respective organization.

(b) Responsibilities: The functions and responsibilities of the Executive Committee include:

(i) setting direction and goals for the relationship and ensuring alignment between the Parties, including deciding on any changes to the composition of the committees established under this Industry Agreement;
(ii) conducting annual reviews of the Schedule A – Compensation and approving changes and amendments, including resolution of any outstanding set-offs or other considerations;
(iii) resolving proposals or disputes referred to the Executive Committee pursuant to this schedule and the Industry Agreement;
(iv) reviewing Manitoba motor vehicle repair industry cost drivers and recommendations from the Sustainability and Cost Control Committee to develop strategies for improved cost competitiveness of the Manitoba motor vehicle repair industry;
(v) developing joint positions on regulatory and economic issues that affect the long term competiveness and viability of the motor vehicle repair industry in Manitoba;
(vi) discussing motor vehicle repair industry trends;
(vii) creating and maintaining such joint committees, from time to time, as they mutually deem necessary in order to address issues of mutual interest that impact the motor vehicle repair industry in Manitoba, with a view to benefiting Manitobans; and,

(viii) monitoring compliance with the Industry Agreement and applicable laws.

(c) Meeting Dates: The Executive Committee will meet once every six (6) months or such other frequency as the Executive Committee may decide. In addition to the foregoing, the Executive Committee will be available for other meetings as requested by a Party and upon reasonable prior notice. The members of the Executive Committee will determine for each meeting whether it will be held in person, by telephone, or by video conference. Meetings to be held in person will be held at a location agreed by the Parties acting reasonably.

(d) No Meeting Chair: The Executive Committee shall work collaboratively in setting the agenda, scheduling meetings, and suggesting meeting locations or format.

(e) Meeting Attendance: The Parties will use commercially reasonable efforts to cause their personnel on the Executive Committee to participate in every meeting scheduled in accordance with this schedule. Each Party may, upon notice to the other Parties, designate an alternative person to participate as a committee member, and/or invite one or more of its personnel to attend meetings of the Executive Committee to provide reports and other support.

(f) Minutes: The Executive Committee shall decide if there will be any draft minutes recording the decisions of each Executive Committee meeting and who shall record and provide them. If minutes are recorded and provided, each Party will notify the other Parties of any errors or discrepancies in the minutes at or prior to the next scheduled Executive Committee meeting, failing which the minutes will be deemed to have been approved.

3. Sustainability and Cost Control Committee:

(a) Composition: The Parties hereby establish a committee of seven (7) personnel (the "**Sustainability and Cost Control Committee**") as follows:

(i) Manitoba Public Insurance will assign three (3) personnel to the Sustainability and Cost Control Committee;
(ii) the ATA and MMDA will each assign two (2) personnel to the Sustainability and Cost Control Committee with the ability to represent their respective organization; and,
(iii) the composition of the Sustainability and Cost Control Committee will be revised regularly to obtain a wider perspective on the issues and topics that present.

(b) Responsibilities: The Sustainability and Cost Control Committee reports to the Executive Committee. The functions and responsibilities of the Sustainability and Cost Control Committee will include:

(i) reviewing and making recommendations on any changes to Schedule A – Compensation to the Executive Committee;
(ii) reviewing issues and recommendations presented by the Technical Committee;
(iii) developing opportunities to control costs that affect the overall competiveness of the Manitoba motor vehicle repair vehicle industry:

(1) this may include instructing the Technical Committee to investigate options in parts and materials sourcing, administration processes, new operating practices, or improved training and technique development programs for technical and operational staff; and,
(2) the Sustainability and Cost Control Committee will make recommendations to the Executive Committee on opportunities to improve cost effectiveness for their consideration.

(iv) providing guidance to the Technical Committee on new review topics, priority, and focus of current and pending reviews;

(v) reviewing the Technical Committee's report(s) on items in the period and identifying:

(1) items closed in the last period;
(2) items in progress in the current period;
(3) new items added in the current period; and,
(4) for more complex items, individual work plans, and reports may be required.

(vi) updating Appendix 1 to this schedule listing the composition of the Executive Committee, Sustainability and Cost Control Committee, and Technical Committee;

(vii) managing and monitoring systemic and recurring issues;

(viii) discussing motor vehicle repair industry trends;

(ix) examining and evaluating ways and means in which new tradespersons can be encouraged to enter the motor vehicle repair industry and remain employed in the industry-includes oversight of Schedule D – Sustainable Industry Development Initiatives; and,

(x) monitoring compliance with the Industry Agreement and applicable laws.

(c) Meeting Dates: The Sustainability and Cost Control Committee will meet on a frequency determined from time to time by the Parties, but no less frequently than quarterly. The members of the Sustainability and Cost Control Committee will determine for each meeting whether it will be held in person, by telephone, or by video conference. Meetings to be held in person will be held at a location agreed by the Parties acting reasonably.

(d) Meeting Chair: Manitoba Public Insurance and the ATA and MMDA's personnel will co-chair meetings of the Sustainability and Cost Control Committee and will be responsible for: (i) directing the meetings; (ii) setting the agenda; (iii) scheduling meetings; and (iv) suggesting meeting location or format.

(e) Meeting Attendance: The Parties will use commercially reasonable efforts to cause their personnel on the Sustainability and Cost Control Committee to participate in every meeting scheduled in accordance with this schedule. Either Party may, upon notice to the other Parties, designate an alternative person to participate as a committee member, and/or invite one or more of its personnel to attend meetings of the applicable Sustainability and Cost Control Committee to provide reports and other support.

(f) Minutes: Draft minutes recording decisions of the Sustainability and Cost Control Committee meeting will be provided by the Party designated to provide minutes within five (5) business days of each meeting by e-mail to the other members of the Sustainability and Cost Control Committee. After the receipt of such draft copy, each Party will notify the other Parties of any errors or discrepancies in the minutes at or prior to the next scheduled meeting, failing which the minutes will be deemed to have been approved.

4 Technical Committee:

(a) Composition: The Parties hereby establish a committee of seven (7) personnel (the "**Technical Committee**") as follows:

(i) Manitoba Public Insurance will assign three (3) personnel to the Technical Committee; and,

(ii) the ATA and MMDA will each together assign two (2) personnel to the Technical Committee with the ability to represent their respective organization.

(b) Responsibilities: The Technical Committee reports to the Sustainability and Cost Control Committee. The functions and responsibilities of the Technical Committee will include:

(i) reviewing and making recommendations on any changes to Schedule A – Compensation to the Sustainability and Cost Control Committee;
(ii) reviewing and making recommendations on any changes to Schedule B – KPI Program, Tiers and Earned Approval Limits, and MPI Service Level to the Sustainability and Cost Control Committee;
(iii) reviewing and making recommendations on any changes to the DR Program;
(iv) reviewing and making recommendations on any changes to the Industry Agreement and schedules, the Accreditation Agreement or any other agreements;
(v) reviewing and making recommendations on the Estimating Standards including policies around alternative parts use;
(vi) reviewing and making recommendations on the quality assurance program;
(vii) reviewing and making recommendations on identified issues that offer an opportunity to improve the cost effectiveness of the motor vehicle repair industry in Manitoba;
(viii) reviewing aggregate Manitoba motor vehicle repair industry activity and trends including:

a. business volumes in Manitoba;
b. emerging technology impacts; and,
c. other items of interest (any Party can suggest other relevant items to consider).

(ix) Reviewing training and development program activity, including:

a. training curriculum, review and making recommendations;
b. apprenticeship programs;
c. allowance programs, scope, availability, and utilization;
d. training activity, enrollment, course completion, and feedback on courses; and,
e. developing goals and requirements for the training and development program, and making joint recommendations to the providing bodies.

(x) managing and monitoring systemic and recurring issues;
(xi) discussing motor vehicle repair industry trends; and,
(xii) monitoring compliance with the Industry Agreement and applicable laws.

(c) The foregoing shall not act as an alternative from Manitoba Public Insurance's normal day to day operations and procedures for resolving specific operational issues with a repair shop, or for any dispute covered under an Accredit Shop's Accreditation Agreement.

(d) Meeting Dates: The Technical Committee will meet on a frequency determined from time to time by the Parties, but no less frequently than quarterly. The members of the Technical Committee will determine for each meeting whether it will be held in person, by telephone, or by video conference. Meetings to be held in person will be held at a location agreed by the Parties acting reasonably.

(e) Meeting Chair: Manitoba Public Insurance's personnel will chair meetings of the Technical Committee and will be responsible for: (i) directing the meetings; (ii) setting the agenda in consultation with Manitoba Public Insurance; (iii) scheduling meetings; and (iv) suggesting meeting location or format.

(f) Meeting Attendance: The Parties will use commercially reasonable efforts to cause their personnel on the Technical Committee to participate in every meeting scheduled in accordance with this schedule. Each Party may, upon notice to the other Parties, designate an alternative person to participate as a committee member, and/or invite one or more of its personnel to attend meetings of the applicable Technical Committee to provide reports and other support.

(g) Minutes: Draft minutes recording decisions of the Technical Committee meeting will be provided by Manitoba Public Insurance's personnel within five (5) business days of each meeting by e-mail to the other members of the Technical Committee. After the receipt of such draft copy, each Party will notify the other Parties of any errors or discrepancies in the minutes at or prior to the next scheduled meeting, failing which the minutes will be deemed to have been approved.

5. Approval Process:

All issue resolutions and decisions made at meetings of the governance committees will be documented in the minutes of such meetings, and the implementation of such resolutions and decisions are subject to the internal approval procedures of each of the Parties. Notwithstanding any implication to the contrary by the foregoing, amendments to the Industry Agreement must be signed by all Parties in a document which clearly states it is an amendment to the Industry Agreement (e.g., not by email and email signature).

6. Managing Industry Agreement Schedules

(a) Purpose: The purpose is to ensure that the rates in the current period are known to the Parties and all schedules are kept up to date.

(b) Updating: The Industry Agreement's schedules, including this schedule, may be updated as required and mutually agreed to, based on the business circumstances that manifest.

(c) Annual Review of Issues: At a minimum, Schedule A – Rates, Schedule B – KPI Program, Tiers and Earned Approval Limits, and MPI Service Level, Schedule D – Sustainable Industry Development Initiatives, the DR Program, the quality assurance program, and the Mitchell Products list shall be reviewed and, if mutually agreed to, updated annually on or about the anniversary of the Effective Date of this Industry Agreement as part of the Executive Committee agenda.

(d) Signing: Updates or amendments to the Industry Agreement, Schedule A – Compensation, or Schedule C – Governance require signing by all Parties to place them in force. Such updated schedules are to be replaced in their entirety. These schedules will be dated and numbered in sequence. The version of such schedule with the most recent date and highest number sequence will take precedence over all preceding schedules of that type. For greater clarity, any other documentation provided on the MPI Partners Website that is updated or amended is not required to be signed by all Parties to become effective.

7. Dispute Resolution:

(a) Scope: This dispute resolution process shall cover any disagreement, claim, or dispute (a "**Dispute**") between the Parties regarding this Industry Agreement. For greater clarity, individual Accredited Shop Disputes shall be addressed through the dispute resolution process under the Accreditation Agreement.

(b) Amicable Resolution: Before commencing legal action, the Parties will attempt to resolve any Dispute between them arising out of or relating to the Industry Agreement in accordance with

the following provisions, provided that nothing shall prevent either Party from seeking an injunction or other equitable relief from a court:

(i) The Parties will in good faith attempt to resolve any Dispute promptly and in an amicable manner by referring the Dispute to the Executive Committee.

(ii) If the Executive Committee is unable to resolve the Dispute within thirty (30) days, then, upon request by a Party, the Dispute may be referred to arbitration as outlined in Section 8.

(c) Confidential Information: Any materials provided pursuant to this schedule shall be deemed to be Confidential Information.

(d) Without Prejudice: Offers of settlement and all documents or other materials created for the purposes of resolving a Dispute are made on a without prejudice basis. Evidence of any such offers of settlement, documents and materials shall not be admissible in any court proceeding or mediation and do not constitute an admission or waiver of rights.

(e) Continued Performance: Except where clearly prevented by the nature of the matter that is the subject of the Dispute and without limiting either Party's applicable rights of termination stated in the Industry Agreement, or right to seek injunction as provided in Section 7(b) above, each of the Parties shall continue performing its respective obligations under the Industry Agreement and while the Dispute is being resolved, unless and until such obligations are terminated or expire in accordance with the applicable provisions of the Industry Agreement. Additionally, any affected Accredited Shop must continue to comply with its Accreditation Agreement unless and until such obligations are terminated or expire in accordance with the applicable provisions of its Accreditation Agreement.

8. Arbitration

(a) In the case of any Dispute referred to arbitration in Section 7(b)(ii) above, between Manitoba Public Insurance and the ATA and MMDA as to their respective rights and obligations under this Industry Agreement, Manitoba Public Insurance and the ATA and MMDA shall appoint a single arbitrator within fifteen (15) days to arbitrate the matter in dispute and the decision of the said arbitrator shall be binding and final on the Parties. All such disputes shall be governed in accordance with the provisions of *The Arbitration Act* (Manitoba), as may be amended from time to time, insofar as the said Act is not inconsistent with the provisions of this Industry Agreement.

(b) If Manitoba Public Insurance and the ATA and MMDA are unable to agree upon one arbitrator within fifteen (15) days, Manitoba Public Insurance shall appoint one arbitrator within fifteen (15) days, and the ATA and MMDA shall jointly appoint one arbitrator within fifteen (15) days, and each arbitrator so selected shall jointly elect a third arbitrator within fifteen (15) days and they all shall hear the matter in dispute and deliver a decision, which decision shall be binding upon the Parties. In the event that the ATA and MMDA cannot agree on their joint arbitrator within fifteen (15) days, the arbitrator appointed by Manitoba Public Insurance shall become the sole arbitrator of the Dispute.

(c) If written notice of arbitration is given by a Party to the other Parties, naming an arbitrator, and the Receiving Party(ies) fail to name its arbitrator within fifteen (15) days of notice, the arbitrator first named shall be empowered to hear the matter in dispute and deliver a decision which decision shall be final and binding on the Parties.

(d) All costs with respect to the arbitration shall be born equally between Manitoba Public Insurance and the ATA and MMDA.

Schedule D – Sustainable Industry Development Initiatives

Manitoba Public Insurance and our industry partners are committed to the long term viability and sustainability of the Manitoba light vehicle repair industry. This schedule outlines industry initiatives undertaken by Manitoba Public Insurance and our partners to strengthen Manitoba's repair industry.

1. Centre Of Excellence ("COE") for Physical Damage

The services provided by the COE shall be available per the fee and service delivery schedule then in place to the repair industry overall. Preference is given to Accredited Shops.

Initiative	Impacted Stakeholder	Details
Centre of Excellence – state of the art training and research facility	Repair Industry	COE will increase apprenticeship opportunities, allow sharing of new technologies, and ensure the industry is able to respond to rapidly developing repair techniques. Manitoba Public Insurance welcomes Industry partners to invest in and participate in the COE physical damage ongoing programs.

- **Annual Activity Report:** Manitoba Public Insurance shall review the COE for physical damage activity with Industry at least annually at a place and time as the parties may agree. Such review will be in a format and style of Manitoba Public Insurance's choosing.

2. Training

The following outlines the scope of the current training offerings.

Initiative	Impacted Stakeholder	Details
Demo Nights and Tech Nights	Technicians	Provides technicians with the opportunity to test new tools, meet suppliers and learn new repair methods.
Skills Manitoba – Judging and Preparatory Course	Technician Trainees/Red River College	Manitoba Public Insurance hosts a prep day for participants; Research & Training (R&T) technicians judge at the competition and provide fleet vehicles/props.
I-CAR Course Instruction (City and Rural)	Technicians	6-8 classes/month taught primarily by Manitoba Public Insurance employees. Facility, equipment, tools and props provided by Manitoba Public Insurance.
I-CAR Independent Learning (Review)	Technicians/ Shops	Adopted US model based on review. Changed to online exams, eliminating travel time and decreasing course costs.
I-CAR Red Seal Exemption Schedule (Review)	Red Seal Technicians/ Shops	Applied seven exemptions for Motor Vehicle Body Repairer (MVBR) and Automotive Painter graduates based on review, saving graduates approximately $840/ea.
Welding Recertification Preparatory Course	Non-Structural and Steel Structural Key Role Technicians	Developed prep course to assist recertifying technicians & reduce failure rates. Implemented I-CAR credits for course.
Red Seal Challenge Examination Prep Courses	Technicians	Developed prep course to assist technicians and increase pass rates. Implemented I-CAR credits for course.

I-CAR Supplier Certification: Facility Donation	Technicians	Manitoba Public Insurance offers our facility and R&T staff for refinish technicians to complete their required I-CAR supplier certification
Other Initiatives Related to Training	Various	From time to time Manitoba Public Insurance and industry partners will undertake other activities to further the capability of Manitoba Industry as it pertains to training.

Manitoba Public Insurance, at its sole discretion, will update, change or expand the scope of training services to address new industry requirements. Such changes shall be reviewed with Industry per the terms of this Agreement.

- **Training Fees:** The various training services provided by the COE shall be available to the repair industry overall. Preference is given to Accredited Shops. Fees per course or activity will be per the latest in-force schedule.
- **Third Party Course and Events:**
  - Some courses are provided by third parties, but co-ordinated or otherwise facilitated by Manitoba Public Insurance for the benefit of industry.
  - Industry is responsible for meeting the pre-requisite criteria and paying such fees as required directly to the third party.
  - Manitoba Public Insurance will not process payments or resolve registration issues for any third party items or activities.

3. Proper Repair

The following outlines the current scope of the proper repair activities.

Initiative	Impacted Stakeholder	Details
Manitoba Public Insurance Estimating Standards – creation, awareness, training	Repair Industry	Creation/ training of 59 standards. Implemented two I-CAR exemptions for training completion (saving techs approximately $240/ea.)
Quality Control ("QC") Referrals and Inspections	Repair Industry	Manitoba Public Insurance administers QC referrals and performs inspections to ensure proper repairs.
Accredited Shop Search and Online Lookup Tool	Repair Industry	Search tool/service on Manitoba Public Insurance's website for customers to get listings of Accredited Shops (including complex vehicles).
Other Initiatives Related to Proper Repair	Various	From time to time Manitoba Public Insurance and industry partners will undertake other activities to further the capability of Manitoba Industry as it pertains to Proper Repair.

The Estimating Standards will, at Manitoba Public Insurance's sole discretion, be updated from time to time. Manitoba Public Insurance will review such changes with Industry per the terms of this agreement. **Manitoba Public Insurance provides the Estimating Standards to industry at no fee.**

4. Collaboration and Communication with the Industry

The following outlines the current scope of the collaboration and communications activities.

Initiative	Impacted Stakeholder	Details
Estimating Standards Working Group	Repair Industry	Collaborative working group with Manitoba Public Insurance and repair industry representatives to discuss estimating standards.
Partners Notices to the Trade ("NTT")	Repair Industry	Manitoba Public Insurance uses NTTs to keep the industry informed of rate information, tooling/equipment/training changes, etc.
Complex Materials Awareness	Repair Industry	Manitoba Public Insurance is supporting complex material knowledge/ awareness through a repairability study & video series development.
Mechanical/Technical Requests	Repair Industry	Shops are able to request assistance from Manitoba Public Insurance T&R technicians for technical expertise and OEM support.
MPI Partners site (www.mpipartners.ca)	Repair Industry	Website to house all business requirements and communications for the Manitoba repair industry.
Other Initiatives Related to sharing of technical information	Various	From time to time Manitoba Public Insurance and industry partners will undertake other activities to further the capability of Manitoba Industry as it pertains to sharing of technical information.

The scope of the collaboration and communications will, at Manitoba Public Insurance's sole discretion, be updated from time to time. Manitoba Public Insurance will review such changes with Industry per the terms of this Agreement.

- **Content Fees: Manitoba Public Insurance provides the materials and content to repair shops and the Industry at no fee.**

5. Financial Supports

Manitoba Public Insurance provides financial support for industry development.

Initiative	Impacted Stakeholder	Details
TAAG (Tool Allowance and Apprenticeship Grants)	Apprentices	Manitoba Public Insurance provides grants to assist qualifying apprentices in completing their education as follows: 1. Manitoba Public Insurance will provide a five thousand ($5,000) dollar tool allowance, available to each registered apprentice with Apprenticeship Manitoba either as a motor vehicle body painter or a motor vehicle body repairer (a "**Registered Apprentice**") based upon receipt of supporting invoices in accordance with procedures established by Manitoba Public Insurance; and, 2. Manitoba Public Insurance will provide a two thousand ($2,000) dollar grant available to each Registered Apprentice, who has successfully completed a level of the four-level Motor Vehicle Body Repairer Program or the two-level Motor Vehicle Body Painter Program in accordance with procedures established by Manitoba Public Insurance. The maximum amount that can be received by any Registered Apprentice under the Motor Vehicle Body Repairer Program is eight thousand ($8,000) dollars (4 levels x $2,000). The maximum amount that can be received by any Registered Apprentice under the Motor Vehicle Body Painter

		Program is four thousand ($4,000) dollars (2 levels x $2,000). This is in addition to other grant programs and is expected to be over and above the apprentice's wages. By design, the allowances do not cover the full cost of these categories; it is intended to make entering the trade more affordable.
I-CAR Gold Class/Gold Class in progress Store Recognition renewal certificate 1 fee Subsidy	Repair Industry	Manitoba Public Insurance reimburses annual I-CAR Gold Class/Gold Class in progress Store Recognition renewal certificate fee for Accredited Shops upon request up to a max of 50% of the annual renewal occurrence.
Manitoba Public Insurance Accredited Repairer Signage	Repair Industry	Manitoba Public Insurance covers costs for updated signage when a repair shop becomes accredited upon request up to a max of $90.00 lifetime. Approximately equalling $23,760.00 ($90/shop, 264 shops as of May 1, 2016)
Motor Vehicle Industry of Manitoba Scholarships	Technicians	Manitoba Public Insurance donates $1000 scholarships for qualifying repair technicians. The scholarship is non-refundable. Manitoba Public Insurance provides five $1000 scholarships annually. The technician must be a Manitoba resident, enrolled in either secondary or post secondary education. 1 per category of Mechanical AST, Collision Body Repair, and Refinisher.
Corporate Donations	Donor Recipients	Qualifying organizations aligned with the objectives of sustainable repair industry receive various donations and grants: Apprenticeship Manitoba ($3000 annually) Automotive Trades Association ($900 annually) Manitoba Motor Dealers Association ($14,550 annually) Motor Vehicle Industry of Manitoba ($1400 annually) Skills Canada Manitoba ($15,000 annually) Grants: Provided that these grants are not guaranteed or required to be renewed annually or be the same amounts.
Other Initiatives Related to supports	various	From time to time Manitoba Public Insurance and industry partners will undertake other activities to further the capability of Manitoba Industry as it pertains to supports.

The scope of the financial support will, at Manitoba Public Insurance's sole discretion, be updated from time to time. Manitoba Public Insurance will review such changes with Industry per the terms of this agreement (excluding corporate donations which are at Manitoba Public Insurance's sole discretion).

- Qualifications & Fees:
  - The qualifications for each financial support are per the terms of the then current program requirements.
  - Various administration or processing fees and cost sharing requirements may apply to specific items. The latest then current requirements of each item shall apply.

Manitoba Public Insurance

ACCREDITATION AGREEMENT

This Agreement made effective on the ____ day of _____, 20__ (the "Effective Date")

BETWEEN:

THE MANITOBA PUBLIC INSURANCE CORPORATION

- AND -

(INSERT SHOP'S FULL LEGAL NAME)

1.00 PURPOSE AND SCOPE:

1.01 Scope

Manitoba Public Insurance is committed to ensuring that its Customers receive Proper Repairs and excellent customer service from vehicle repair shops in Manitoba. Accordingly, Manitoba Public Insurance, together with the industry representatives, the ATA and the MMDA, have negotiated and agreed to standards, terms, and conditions that repair shops must adhere to in order to become accredited by Manitoba Public Insurance. These standards, terms, and conditions are contained within the following documents:

(a) this agreement and its schedules;
(b) the Policies & Procedures;
(c) the Accreditation Specifications and Application; and,
(d) your specific Transition Plan or QA-Corrective Action Plan, if applicable.

(all collectively referred to as the "**Agreement**")

Manitoba Public Insurance, the ATA and the MMDA have also agreed to labour and material rates and other fees that Accredited Shops may charge for vehicle repair services for Manitoba Public Insurance claims. By meeting the standards, terms, and conditions outlined in this Agreement, Accredited Shops are entitled to charge the rates and fees agreed upon by Manitoba Public Insurance, the ATA, and the MMDA.

This Agreement sets out the relationship between you and Manitoba Public Insurance with respect to your status as an Accredited Shop. By voluntarily signing the Accreditation Application and by signing this Agreement, you agree to adhere to the standards expected of an Accredited Shop and all of the terms and conditions in this Agreement.

1.02 ATA and MMDA Authorization to Negotiate

By signing this Agreement, you agree to allow the ATA and the MMDA, and any of their successor organizations, to negotiate on your behalf any and all changes to this Agreement. You further agree to abide by those changes upon your being notified of such changes in accordance with this Agreement. The ATA, MMDA, and Manitoba Public Insurance will review issues related to the labour and material rates and fees, the template accreditation agreement, and other issues within the collision repair industry in Manitoba in accordance with the Industry Agreement.

1.03 Order of Precedence

To the extent there is a conflict or inconsistency, the following is the order of precedence of documents comprising this Agreement:

(a) this agreement and its schedules;
(b) the Policies & Procedures;
(c) the Accreditation Specifications and Application; and,
(d) your specific Transition Plan or QA-Corrective Action Plan, if applicable.

provided that in a subordinate document that a specific provision contained in such subordinate document overrides a specific provision in a superior document but such agreement is only effective to the extent the subordinate document expressly refers to the provision in the document over which it is to prevail (or the intent is clear to any reasonable reading that a specific provision be overridden).

1.04 Transition Plan

Upon your initial entrance into this Agreement you may be required to follow a Transition Plan as established under Section 16.5.

2.00 DEFINITIONS:

"**Accredited Shop**" means a vendor which has signed an accreditation agreement with Manitoba Public Insurance;

"**Accreditation Application**" means the application for accreditation together with the initial shop profile information in accordance with the Accreditation Requirements.

"**Accreditation Requirements**" means the requirements as set out on the MPI Partners Website that each applicant must meet in order to be eligible for accreditation. There are continuing compliance criteria as well as initial eligibility criteria.

"**Accreditation Committee**" means the committee that is set out in Section 18.2;

"**ATA**" means the Automotive Trades Association of Manitoba Inc.;

"**Back-ordered Parts**" means any part not available at the time of repair required to complete the repair that is on order from a supplier;

"**Current ACV Threshold**" has the meaning set forth in Schedule 9.1 – Direct Repair Program.

"**Customer**" means the claimant that is insured by Manitoba Public Insurance and that has engaged you to perform repair work on their Light Vehicle;

"**DR Program**" has the meaning set forth in Schedule 9.1 – Direct Repair Program.

"**DR Shop**" has the meaning set forth in Schedule 9.1 – Direct Repair Program.

"**Estimate**" means an outline of proposed work required to place the Customer's Light Vehicle back into pre-loss condition in accordance with Proper Repair;

"**Estimating Standards**" means those defined parameters and terms that specify labour hours, or parts or material use, or other requirements that are unique to Manitoba Public Insurance's application of the estimating process as identified on the MPI Partners Website.

"**Finder-fee Cards**" means a card designed for the purpose of compensating a third party who refers work to a repair shop;

"**FIPPA**" means *The Freedom of Information and Protection of Privacy Act* (Manitoba), as amended from time to time;

"**Giveaways**" means any reduction or benefit which affects the true cost of repairs including monetary merchandise or benefits used to entice Customers;

"**I-CAR**" means Inter Industry Conference on Auto Collision Repair;

"**Industry Agreement**" means the agreement dated March 1, 2017 made between Manitoba Public Insurance, the ATA, and the MMDA to set labour rates and related fees and other compensation payable to Accredited Shops in Manitoba, to establish an accreditation agreement template for Accredited Shops, and to address other issues within the collision repair industry in Manitoba.

"**KPI**" or "**KPIs**" mean the key performance indicator(s) as set out on the MPI Partners Website.

"**Light Vehicle**" means any vehicle with a gross vehicle weight rating of less than 4500 kilograms;

"**FA-LOU Program**" has the meaning set forth in Schedule 9.2 – Fair Allocation Loss of Use Program.

"**Mitchell**" refers to Mitchell International Information Services Inc.

"**Mitchell Products**" includes all products licensed by Manitoba Public Insurance under the MPI-Mitchell Agreement.

"**MMDA**" means the Manitoba Motor Dealers Association;

"**Manitoba Public Insurance**" mean The Manitoba Public Insurance Corporation;

"**MPI Intellectual Property**" has the meaning set out in Section 12.3;

"**MPI-Mitchell Agreement**" means the in force agreement between Manitoba Public Insurance and Mitchell regarding an enterprise-wide license agreement to license Mitchell Products involved with repairing vehicles;

"**MPI Names**" means the words "Manitoba Public Insurance", "The Manitoba Public Insurance Corporation", "MPI", "MPIC", and "Autopac";

"**MPI Partners Website**" means the website administered by Manitoba Public Insurance located at http://mpipartners.ca, or as designated by Manitoba Public Insurance;

"**OEM**" means original equipment manufacturer of the Light Vehicle;

"**Parts/Service Credits**" means cash allowances to be applied towards the acquisition of parts or services;

"**Pattern**" means two (2) or more instances of actions or behaviour within a consecutive three hundred and sixty-five (365) day period;

"**PIPEDA**" means *The Personal Information Protection and Electronic Documents Act* (Canada), as amended from time to time;

"**Policies & Procedures**" means the policies and procedures applicable to Accredited Shops doing direct business with Manitoba Public Insurance, all of which are set out on the MPI Partners Website;

"**Probationary Period**" means a period during which an Accredited Shop's repair administration

and repair activities are under a QA-Corrective Action Plan per the Quality Assurance Program requirements, or your shop transition plan is still effective;

"**Proper Repair**" means that work completed is per the approved Estimate, that applies the needed parts, materials, repair methods, products, tooling, and equipment, by qualified and trained individuals such that the total repair is in compliance with OEM product/repair specifications for that Light Vehicle, and is performed in compliance with the requirements of this Agreement. For clarity OEM certified repairs are not necessarily Proper Repairs.

"**Quality Assurance Program**" is the program managed by Manitoba Public Insurance for the reliable outcome of a Proper Repair for all Light Vehicles covered by a Manitoba Public Insurance policy and for which Manitoba Public Insurance is requiring a repair per an approved Estimate.

"**QA-Corrective Action Plan**" means one of various options for resolving a current deficiency under the Quality Assurance Program or this Agreement, which may limit your benefits and obligations under this Agreement, in Manitoba Public Insurance's sole discretion.

"**Representatives**" shall mean the directors, officers, shareholders, employees, subcontractors, partners, volunteers, affiliates, agents, delegates and other representatives of a party.

"**refuse to do direct business**" (or such other similar phrase) means that Manitoba Public Insurance will not initiate or accept to do business or business communications with you;

"**suspension of accreditation**" (or such other similar phrase) means that you have lost your status as an Accredited Shop, and as such, have lost some or all of the rights and benefits associated with being an Accredited Shop, including but not limited to, the right to be reimbursed at the accredited rates, as decided in Manitoba Public Insurance's sole discretion. If your accreditation is suspended, you will only be reimbursed for repair work at the non-accredited rates;

"**Transition Plan**" means a plan developed to allow you to become compliant with the requirements of this Agreement which may limit your benefits and obligations under this Agreement, in Manitoba Public Insurance's sole discretion.

"**WHMIS**" means Workplace Hazardous Materials Information System; and,

"**you**", "**your**" and "**yours**" refer to the shop that has signed this Agreement;

3.0 MITCHELL PRODUCTS USE:

3.1 Software License Agreement

You may access and use the Mitchell Products in accordance with the terms and conditions in Schedule 3.1 – Mitchell Product Use Terms only while you are an Accredited Shop. You are required to use the Manitoba Public Insurance provided systems to do business with Manitoba Public Insurance.

3.2 Systems Security

You must comply with all procedures, technical requirements and security requirements related to your access to and use of any Mitchell Products or Manitoba Public Insurance computer systems, online systems, or other electronic systems, which may be used by you for your business operations. For greater certainty, Manitoba Public Insurance computer systems, online systems or

other electronic systems include systems that are owned by Manitoba Public Insurance, hosted by Manitoba Public Insurance, licensed by Manitoba Public Insurance or otherwise operated by or on behalf of Manitoba Public Insurance.

4.00 BUSINESS REQUIREMENTS AND CERTIFICATIONS:

4.1 Sharing Premises

Only you will be considered an Accredited Shop if you and any other entity operate a vehicle repair businesses on the same premises. Any other entities sharing the same premises as you would have to enter into an Accreditation Agreement with Manitoba Public Insurance to become an Accredited Shop.

4.2 Operational Hours

You shall post and maintain your then current hours of operation so that Customers know when they may receive service or contact you.

4.3 Business Licenses and Permits

You will maintain a valid business license if required to do so by the City or Municipality in which you operate. Additionally, you will maintain all valid permits and certificates as required by the City or Municipality, including but not limited to a health inspection certificate and a fire inspection certificate if applicable. You will maintain a valid certificate of good standing with the Worker's Compensation Board. Your business license, permits, certificates, and health and fire inspection certificates must be available for inspection at Manitoba Public Insurance's request.

4.4 Liability Insurance

You agree to maintain the following minimum insurance policies during the term of this Agreement:

(a) Comprehensive General Liability Policy with minimum limits of liability of two million Canadian dollars ($2,000,000.00); and,

(b) Garage or Dealers Liability Policy which includes third party liability, as well as damage to Customers' vehicles which are in your care, custody, or control (which includes collision or upset and specified perils coverage) with minimum limits of liability of two million Canadian dollars ($2,000,000.00).

Manitoba Public Insurance, acting reasonably, may require additional insurance coverage or amounts and shall provide notice to you of such new requirements in accordance with Section 20.10. At the request of Manitoba Public Insurance, you shall deposit certified copies of your original bonds, certificates, and renewals with Manitoba Public Insurance, and you agree that each such bond, policy or renewal shall be endorsed so that Manitoba Public Insurance shall be advised if altered or cancelled prior to expiry.

You may not cancel or allow required policies to lapse during the term of this Agreement unless they are being contemporaneously replaced by new, equivalent policies. Manitoba Public Insurance may suspend your accreditation if you lack any required insurance policy required under this Agreement.

4.5 Solvency

You shall ensure your business and operations are meeting all financial obligations to third parties as they become due. You shall promptly notify Manitoba Public Insurance in accordance with Section 20.10 if you enter into an assignment for the benefit of creditors, take any other action for

the benefit of creditors, become bankrupt or insolvent, or take the benefit of or become subject to any legislation in force relating to bankruptcy, insolvency, or tax arrears.

4.6 Credentials
You must meet and maintain the credentials required for the type of repairs that you undertake.

5.00 SHOP PROFILE AND UPDATES:

5.1 Maintain Shop & Staff Profiles
You understand that you are responsible for updating and maintaining your shop profile according to the requirements on the MPI Partners Website. If your shop profile record indicates that any work you've performed was not supported by your shop profile at the time you performed the work, such work may be subject to additional review as determined by Manitoba Public Insurance in a QA-Corrective Action Plan as identified in Article 16.

5.2 Records Keeping
All records associated with your shop profile are to be stored locally and be available to Manitoba Public Insurance for inspection within seven (7) days of Manitoba Public Insurance's request. Records related to your shop profile that are older than one year need not be held locally, but shall be made available to Manitoba Public Insurance for inspection within thirty (30) days upon request. Selected records may need to be forwarded to Manitoba Public Insurance in electronic format or scanned and then saved in an electronic format. Each such item shall be prepared and forwarded to Manitoba Public Insurance as set out on the MPI Partners Website or as required based on the circumstance.

5.3 Meet Accreditation Requirements
You agree to meet all of the Accreditation Requirements.

5.4 Changes Related to Your Business
You shall provide not less than thirty (30) days' prior written notice to Manitoba Public Insurance if your name, location of your business, or ownership is changing, or if you will no longer be engaging in the business of auto glass repair, or auto repair services.

5.5 Manitoba Public Insurance Review
Manitoba Public Insurance will review all submitted information in your shop profile and may accept or reject the submitted information, may require you to resubmit updated information or correct any information, and reserves the right to adjust it accordingly.

5.6 Operational Shop Data
You shall permit Manitoba Public Insurance to gather additional operational data regarding your shop characteristics, and understand that the data will form the basis for a shop profile. Such profile may be used in various Manitoba Public Insurance processes to support administration of business outcomes such as, proper repair and customer informed choice.

5.7 Surveys
You shall participate in online, telephone, or written surveys related to the Accreditation program and the DR Program if applicable to your shop.

6.00 STAFF TRAINING REQUIREMENTS:

6.1 Qualified for the work completed

Under Proper Repair requirements your Representatives performing the work must be trained and qualified prior to commencing repairs.

6.2 Training Program Requirements

You shall maintain I-CAR Gold Class designation and meet Manitoba Public Insurance's training program requirements on the MPI Partners Website. Regular welding recertification is a mandatory requirement. Shops entering the accreditation program, or transitionally obtaining their I-CAR Gold Class designation, any related specialized training, or other required training, may require a Transition Plan or QA-Corrective Action Plan to meet Manitoba Public Insurance's training program requirements on the MPI Partners Website. Additional or alternative training requirements for Accredited Shops qualified for accredited glass repairs are to be met. If applicable to you, you are responsible for ensuring you are in compliance with the latest training program requirements for glass as set out on the MPI Partners Website.

6.3 Journeyperson or Equivalent

All repair work needs to be completed or overseen by a qualified journeyperson with the appropriate credentials for the work at hand. All of your Representatives providing the services under this Agreement need to have a defined role as defined in Manitoba Public Insurance's training program requirements on the MPI Partners Website. Additional or alternative technician (staff) credentials or certifications or designations requirements for Accredited Shops qualified for accredited glass repairs are to be met. You are responsible for ensuring you are in compliance with the latest technician qualification requirements for glass as set out on the MPI Partners Website.

6.4 Staff Certification: Credentials & Training Records

You are required to maintain records of all completed staff training certificates. You shall provide updates on your staff training activity to Manitoba Public Insurance within thirty (30) days of confirmation of training completion. The procedures for updating staff training records shall be as set out on the MPI Partners Website.

7.00 REPAIRS:

7.1 Responsible for the Entire Repair

You understand that you are responsible for the entire repair that you undertake for Manitoba Public Insurance under this Agreement and that such repairs will meet the requirements of Proper Repair. Any work undertaken by a third party is still your responsibility. To minimize the impact to Customers and avoid inefficient repair procedures, any work you accept will be substantially completed by you. In this case substantially means more than 60% of all the work measured in labour hours is completed by you, unless another amount has been approved by Manitoba Public Insurance. Notwithstanding the forgoing certain makes or models of Light Vehicles, or specialized repair procedures may be subject to additional constraints by the OEMs in terms of who is actually performing the work, and you are responsible for knowing and complying with them. You have an obligation to find and report to Manitoba Public Insurance all damage to the Light Vehicle related to the Customer's claim.

7.2 Estimating Standards

You shall be expected to know and comply with the current Estimating Standards published and available on the MPI Partners Website.

7.3 Estimating Systems Exception

Actions or efforts not expressly required by an approved Estimate or Manitoba Public Insurance approved supporting materials or sources, is out of scope and shall not be reimbursed. If you make available to Manitoba Public Insurance information from Manitoba Public Insurance approved supporting materials or sources, those additional items need to be included in the authorized work. Manitoba Public Insurance at its sole discretion may direct you to update the Estimates with the additional details. Such items will be noted as being "Estimating Systems Exception."

7.4 Marginal Total Losses

If the total value of the completed Estimate including all Supplements is over the Current ACV Threshold, you shall follow the Policies & Procedures on the MPI Partners Website for contacting Manitoba Public Insurance for directions on the proper disposition of the Light Vehicle and await direction before proceeding with ordering any parts or commencing repairs. You understand that you may not be reimbursed for any unauthorized repair work and costs associated with repairs for a Light Vehicle where the total repair costs are in excess of the Current ACV Threshold amount for that Light Vehicle.

7.5 Confirmation of Repairs

One of your Representatives authorized to sign on your behalf must sign any documentation required by Manitoba Public Insurance to confirm that all the repairs you have performed have been completed and all itemized parts have been installed. You understand and accept that Manitoba Public Insurance may not pay you for your work unless and until this confirmation is provided.

7.6 Policies & Procedures

You agree to comply with all Policies & Procedures that are applicable to your business and operations. The Policies & Procedures can be found on the MPI Partners Website. You understand and accept that if you do not comply with any of the Policies & Procedures or if you have a Pattern of non-compliance with any the Policies & Procedures, then your accreditation may be suspended and/or Manitoba Public Insurance may refuse to do direct business with you. Any amendments to the Policies & Procedures will be developed by Manitoba Public Insurance in consultation with the ATA and MMDA, and you will be notified of the in accordance with Section 20.10. The following paragraphs highlight some of the key Policies & Procedures that apply to your accreditation. However, the following paragraphs do not cover all of the Policies & Procedures, and it is your responsibility to review and ensure that you are in compliance with all of the Policies & Procedures applicable to your business and operations.

(a) **Approval Required for Estimate changes**

You understand that Manitoba Public Insurance will not pay for changes to an Estimate that are not approved by Manitoba Public Insurance.

(b) **Proper signatures**

You will get the Customer's authorization where required by the Policies & Procedures.

(c) **Repair Delays**

You agree to complete repairs promptly upon receiving the Customer's authorization. You understand that prompt completion of repairs is necessary for providing quality customer service. Undue delays in repairs must be reported promptly to Manitoba Public Insurance and the Customer. Manitoba Public Insurance will give you written notice if it determines that you have caused an undue delay. If you cause a Pattern of undue delays,

Manitoba Public Insurance may recover from you the costs related to loss of use.

(d) **Temporary Repairs**
If the Customer's vehicle is safely drivable or temporary repairs can be made to make it safely drivable, you must allow the Customer to continue to drive the Light Vehicle until you can complete any outstanding repairs. Any costs to complete temporary repairs must be per an approved Estimate, or requires prior approval from Manitoba Public Insurance.

(e) **Collect deductibles, depreciation and taxes**
You shall collect all deductibles, depreciation and applicable taxes from Customers shown on the Estimate. You shall not waive or otherwise offset any deductibles, depreciation or applicable taxes. However, you may providing financing to the Customer for the cost of any deductible or depreciation owing on your account, on condition that you enter into a written contract with the Customer. The contract must include the following conditions:

(i) the full amount financed must be repaid to you in a period not exceeding ninety (90) days from the date repairs were completed (the "**Repayment Period**"); and,
(ii) failure to repay the full amount to you within the Repayment Period shall cause a fixed rate of interest to accrue on the amount owing, such rate to exceed the Bank of Canada's Prime lending rate.

(f) **Use of own registered account number**
You must always use your own registered account number, as provided to you by Manitoba Public Insurance, and you shall not use another repairer's registered account number. You also shall not permit any other repairer to use your registered account number.

(h) **Correct amounts to be invoiced**
You will correctly invoice Manitoba Public Insurance based upon the applicable Policies & Procedures. Manitoba Public Insurance reserves the right to adjust the invoiced amounts based on the Policies & Procedures.

7.7 Records Keeping

All records associated with the work you perform under this Agreement are to be stored in a readily accessible manner and be available to Manitoba Public Insurance for inspection within seven (7) days of Manitoba Public Insurance's request. Records that are older than one year need not be held locally, but shall be made available to Manitoba Public Insurance for inspection within thirty (30) days of Manitoba Public Insurance's request. You must retain records for the previous three (3) years. Selected records may need to be forwarded to Manitoba Public Insurance in electronic format or scanned and then saved in an electronic format. Each such item shall be prepared and forwarded to Manitoba Public Insurance as set out on the MPI Partners Website or as required based on the circumstance.

8.00 REPAIR WARRANTIES:

8.1 Provide a Repair Warranty

You agree to warrant all repairs (including all parts and all labour) for a minimum period of one year from the date that the repairs were completed and the work has been certified as complete by the Customer, and to inform the Customer of such warranty at the time they certify that work has been completed on their Light Vehicle. This warranty extends to repairs completed by a sublet

service provider at your request. If there are workmanship issues involving repairs by a sublet service provider, you are responsible for resolving the issue on behalf of the Customer. You understand and agree that a failure to properly provide or honour such warranties may result in suspension of your accreditation.

9.00 DIRECT REPAIR AND LOSS OF USE PROGRAMS:

9.1 Application to the DR Program

You may apply to become part of the DR Program, and if accepted, perform direct repairs in accordance with Schedule 9.1 – Direct Repair Program.

9.2 Application to the Fair Allocation Loss of Use Program

You may apply to become part of the FA-LOU Program, and if accepted, perform loss of use authorizations in accordance with Schedule 9.2 – Fair Allocation Loss of Use Program.

10.00 COMPENSATION:

10.1 Current and Future Compensation

At the Effective Date of this Agreement, the rates and fees on the MPI Partners Website cover only a limited duration. The ATA, MMDA and Manitoba Public Insurance will negotiate any renewal or updates to the rates and fees on the MPI Partners Website prior to the expiry date indicated on the MPI Partners Website. In the event the ATA, MMDA and Manitoba Public Insurance cannot agree on revised rates and fees prior to their expiry date, Manitoba Public Insurance may elect to continue to pay the rates and fees on the MPI Partners Website that were in effect prior to their expiry. Changes to the rates and fees will be posted on the MPI Partners Website and you will be notified of such changes in accordance with Section 20.10. All rates and fees referred to in this Agreement shall be in Canadian Dollars unless otherwise specified. You agree to comply with the current rates and fees on the MPI Partners Website that were agreed to by the ATA, MMDA and Manitoba Public Insurance, and that you will not charge either Manitoba Public Insurance or Customers more than those agreed upon rates. You agree to accept any rates and fees incurred under this Agreement via electronic funds transfer, or any other payment form as decided by Manitoba Public Insurance.

11.0 KEY PERFORMANCE INDICATORS:

11.1 Accreditation Program Key Performance Indicators

Manitoba Public Insurance and the ATA and MMDA have agreed upon certain KPIs to track and monitor ongoing work under this Agreement. This information shall form part of what Manitoba Public Insurance can measure and report on. Accredited Shops may have certain KPIs that apply specifically to them, and DR Shops may have KPIs which apply specifically to their DR Program work.

11.2 Individual Repair Shop Report

Manitoba Public Insurance will provide participants with their individual KPI results in the timelines outlined on the MPI Partners Website. The individual report allows you to see how you are doing against the targets for each of the KPIs.

12.00 PROMOTIONS, ADVERTISING, AND MARKETING:

12.1 No Giveaways

Giveaways of products or services related to repairs are not permitted. Manitoba Public Insurance may deduct the value of any Giveaways from the repair accounts which you submit.

12.2 Finder-fee Cards and Parts/Service Credits

You agree not to use Finder-fee Cards or issue Parts/Service Credits.

12.3 Advertisement, and Use of MPI Intellectual Property

You may advertise and market to Customers that you are an Accredited Shop or DR Shop only in accordance with the advertising policy on the MPI Partners Website. You shall not use any MPI Names, Manitoba Public Insurance logos, or any other trademark, logo, business name, or trade name which is owned and/or used by Manitoba Public Insurance (the "**MPI Intellectual Property**"), without complying with the advertising policy on the MPI Partners Website. You understand and accept that if you use any of the MPI Intellectual Property without complying with the advertising policy on the MPI Partners Website, your accreditation may be suspended and/or Manitoba Public Insurance may refuse to do direct business with you.

12.4 Badges & Signage

Any badges or signage of the MPI Intellectual Property that you create is at your expense and Manitoba Public Insurance shall not reimburse you for it.

12.5 Manitoba Public Insurance Promotion of the Accreditation Program and DR Program

Manitoba Public Insurance may promote the availability of the Accreditation program or the DR Program and advise qualifying Customers of these services by providing Customers a list of Accredited Shops and DR Shops in their area which are both qualified and have the technical expertise to complete the required repairs to their Light Vehicle.

12.6 Customer Satisfaction and Manitoba Public Insurance Use of Shop Details

Manitoba Public Insurance will be collaborating with Mitchell to provide Customer satisfaction information via AutoCheX of Estimates and repairs you do by polling Customers who have had a physical damage claim repaired by you. Your AutoCheX Customer satisfaction ratings, other KPIs, and details from you shop profile may be published to the Manitoba Public Insurance public website, or in any other place Manitoba Public Insurance decides to place the information, in rank order and by location.

13.00 COMPLIANCE WITH LAWS:

13.1 Compliance with laws

You must provide a working environment which is safe, healthy, free of hazards and complies with all applicable provincial building codes, municipal by-laws, environmental laws (including laws related to the disposal of hazardous waste), as well as workplace health and safety laws and regulations (including, but not limited to, Manitoba Regulation 217/2006, as amended from time to time). This regulation applies to controlled products that are used, stored and handled at the workplace. In addition, you and your Representatives shall at all times comply with all laws which are applicable to your business and operations.

13.2 Harassment

The parties shall ensure that the Customers and the parties' Representatives are safe and free from harassment in their dealings with the parties and their Representatives.

14. CONFIDENTIAL INFORMATION:

14.1 Personal Information

You acknowledge that FIPPA and The Personal Health Information Act ("**PHIA**") each impose obligations on Manitoba Public Insurance to collect, use or disclose "personal information" and "personal health information", as those terms are defined in FIPPA, PHIA and PIPEDA (collectively called "**Personal Information**"), in the strictest of confidence, and in accordance with those Acts. In performing the services under this Agreement, you acknowledge that you may collect, use, or have access to Customers' Personal Information and shall only do so in compliance with this Agreement.

14.2. Confidential Information

While this Agreement is in effect, and at all times thereafter, the parties agree to treat as confidential all information and materials acquired by it, or to which it has been given access, in the course of the performance of this Agreement (collectively called "**Confidential Information**"), excluding information that is in the public domain (for greater certainty, this does not include information in the public domain which was made public as a result of an unauthorized disclosure by a third party). For the purposes of this Agreement, Personal Information shall be considered to be Confidential Information.

14.3. Confidentiality Obligations

The parties agree that during the term of this Agreement and at all times thereafter:

(a) the Personal Information disclosed to a party (a "**Receiving Party**") by a disclosing party (the "**Disclosing Party**") may only be used by the Receiving Party in a manner expressly permitted by FIPPA, PHIA, The Personal Information Protection and Electronic Documents Act (Canada), or such other applicable privacy laws (as the case may be);

(b) the Receiving Party shall not disclose or permit the disclosure of Confidential Information, or any copies of it, in any format, to any third party that is not a party's Representative without the express prior written consent of the Disclosing Party;

(c) you shall comply with all directives given to you by Manitoba Public Insurance with respect to safeguarding, or otherwise ensuring the confidentiality, of any Confidential Information disclosed to you by Manitoba Public Insurance;

(d) the Receiving Party shall ensure that access to the Confidential Information by the Representatives of the Receiving Party is on a "need-to-know" basis, and that access, when given, shall be to the minimum amount of Confidential Information necessary to accomplish the task;

(e) the Receiving Party shall use the Confidential Information only for those purposes that have been expressly permitted by this Agreement, or by the Disclosing Party;

(f) the Receiving Party shall not reproduce Confidential Information, in any format, without the express prior written consent of the Disclosing Party, other than for the Receiving Party to perform its obligations under this Agreement;

(g) You shall ensure that you or your Representatives do not transport or store any Personal Information outside of Canada without the express prior written consent of Manitoba Public Insurance; and,

(h) after the Confidential Information has been used for its authorized purpose, or where destruction of the Confidential Information is requested by the Disclosing Party or is required by this Agreement, or upon expiration or termination of this Agreement, the Receiving Party shall destroy the Confidential Information (and all copies of the Confidential Information in any form) in a manner which adequately protects the confidentiality of the Confidential Information. If destruction of the Confidential Information is not possible or feasible the Receiving Party shall extend the confidentiality protections of this Article 14 to the Confidential Information indefinitely.

14.4. Standards

During the term of this Agreement and at all times thereafter, the parties shall take reasonable precautions to prevent any unauthorized disclosure of the Confidential Information. The standard of such precautions taken by a party shall be the greater of:

(a) the standards the Receiving Party has in place to protect its own Confidential Information; or,
(b) the standards imposed on the Receiving Party by the Disclosing Party.

14.5. Confidentiality Breaches

A party shall immediately notify the other party in writing upon becoming aware of any unauthorized use of, access to, disclosure of, or destruction of Confidential Information (a "**Confidentiality Breach**"). The written notification must include full details of the Confidentiality Breach. The party shall immediately take all reasonable steps to prevent the recurrence of any such Confidentiality Breach and shall notify the other party in writing of the steps taken.

14.6. Inform Representatives of Confidentiality Obligations

The parties shall inform their applicable Representatives of the obligations imposed upon them in this Agreement with respect to Confidential Information, and shall take whatever steps are necessary to ensure that all of their Representatives comply with those obligations.

14.7. Injunctive Relief

The parties acknowledge that monetary damages may not be a sufficient remedy for a Confidentiality Breach, and that a party may, without waiving any other rights or remedies, seek appropriate injunctive or equitable relief from a court of competent jurisdiction.

14.8. Demands for Confidential Information

If a party receives a subpoena or other validly issued administrative or judicial order seeking Confidential Information, the party shall provide prompt notice to the other parties and deliver to the other parties a copy of its proposed response to the demand. Unless the demand has been time-limited, quashed or extended, the party shall thereafter be entitled to comply with the demand to the extent permitted or required by law. If so requested by a party, and at the expense of that party, the other parties shall cooperate with that party in the defence of the demand.

14.9. Publicity

You undertake not to publish any public statement or advertisement with respect to this

Agreement and further undertake not to seek publicity of this Agreement without the express prior written consent of Manitoba Public Insurance, except as otherwise required by law or by this Agreement.

14.10. Compliance
You shall cooperate with Manitoba Public Insurance so Manitoba Public Insurance can verify that you have complied with, and are complying with the provisions of this Article 14.00.

15.0 MANITOBA PUBLIC INSURANCE'S OBLIGATIONS:

15.1 Standards of Service
Manitoba Public Insurance will:

(a) attempt to respond to Supplements within twenty-four (24) hours during Manitoba Public Insurance's regular business hours;
(b) attempt to provide marginal repair determinations within twenty-four (24) hours during Manitoba Public Insurance's regular business hours;
(c) provide a support line that will be available to you during Manitoba Public Insurance's regular business hours;
(d) acknowledge technical support requests within three (3) days; and,
(e) attempt to visit your shop at least once a year.

15.2 Pay accounts within 30 days
Manitoba Public Insurance will pay your valid invoices within thirty (30) days of receipt, provided you have submitted your invoice promptly and correctly according to this Agreement.

15.3 Deductibles/Depreciation
Where Manitoba Public Insurance performs the first estimate, except where the Customer is not present, Manitoba Public Insurance will explain or make information available to Customers about the contents of Estimates and the repair related procedures, including the requirement on the part of the Customer to pay any deductibles and/or depreciation. Manitoba Public Insurance will also clarify to the Customer any situations involving old damage or aftermarket and recycled parts if called for in the Estimate.

15.4 Industry Consultation
The ATA, MMDA, and Manitoba Public Insurance will review issues related to the labour and material rates and fees, the template accreditation agreement, and other issues within the collision repair industry in Manitoba in accordance with the Industry Agreement.

15.5 Up to date MPI Partners Website
Manitoba Public Insurance will attempt to make the MPI Partners Website available to you at all times, other than during scheduled outages. Manitoba Public Insurance will keep the MPI Partners Website up to date and will notify you of any changes negotiated on your behalf by the ATA and the MMDA to this Agreement, or to the Policies & Procedures in accordance with Section 20.10.

15.6 Centre of Excellence for Physical Damage
Manitoba Public Insurance's centre of excellence for physical damage will stay abreast of new repair techniques, equipment, methods, processes, and related training. You have access to Manitoba Public Insurance's centre of excellence services and products.

16.0 QUALITY ASSURANCE PROGRAM:

16.1 Quality Assurance & Performance Management Process

The objectives of Manitoba Public Insurance's Quality Assurance Program are to:

(a) ensure Proper Repair of Customers' damaged Light Vehicles before they are returned to Customers;
(b) ensure that Proper Repairs are performed in a fiscally responsible manner;
(c) evaluate Light Vehicle repair quality in a collaborative manner with the ATA and MMDA to reduce risk on the road;
(d) foster an effective business relationship with you, and the ATA and which strives for continuous improvement; and,
(e) assist the repair industry in meeting changing business environmental factors and Manitoba Public Insurance's goals.

16.2 Manitoba Public Insurance may inspect on-premises

You agree to allow Representatives of Manitoba Public Insurance to inspect your repair facilities from time to time to confirm that all Accreditation Requirements are being maintained, that you are following the Policies & Procedures, and that you are in compliance with the requirements of this Agreement. These inspections will occur during normal business hours without prior notice.

16.3 Inspection of In-Progress or Repaired Vehicles

Manitoba Public Insurance will inspect a number of vehicles in all areas of Manitoba on a continuing basis, in order to satisfy itself and Customers that, Proper Repairs are being completed in accordance with the Estimate's requirements. If deficiencies are found as a result of the inspection, you are responsible for correcting the deficiencies according to the Policies & Procedures on the MPI Partners Website.

16.4 Process Reviews

Manitoba Public Insurance may conduct process reviews from time to time to confirm that all Accreditation Requirements are being maintained, that you are following the Policies & Procedures, and that you are in compliance with the requirements of this Agreement.

16.5 QA-Corrective Action Plans and Transition Plans

The Quality Assurance Program may involve courses of action to resolve particular instances of unfulfilled Accreditation Requirements, breaches of this Agreement, one or more repair deficiencies, administrative methods and practices, or other such procedural matters. It may also involve a Transition Plan to achieve a certain outcome of shop credentials such as I-CAR Gold Class, or technical capability including such items as staff training and development, installation of equipments, or introduction of new processes. Shops following a QA-Corrective Action Plan or Transition Plan, agreed to by Manitoba Public Insurance, are considered in good standing per the terms of this Agreement. A QA-Corrective Action Plan or Transition Plan may note exceptions to and restrictions on certain provisions of this Agreement. Manitoba Public Insurance is the final arbiter of what constitutes an appropriate Transition Plan or QA-Corrective Action Plan. You are responsible for completing all actions/tasks in the QA-Corrective Action Plan or Transition Plan in the timelines required to resolve the matter(s). Failure to meet the requirements in the QA-Corrective Action Plan or Transition Plan in the timelines provided may be grounds for suspension of your accreditation. For clarity, Manitoba Public Insurance will normally attempt to correct deficiencies with QA-Corrective Actions Plans or Transition Plans; notwithstanding anything else in this Agreement, Manitoba Public Insurance is not required to utilize a QA-Corrective Action Plan or Transition Plan prior to suspending your accreditation or

terminating this Agreement.

17.00 SUSPENSION OF ACCREDITATION:

17.1 Reasons for Suspension

Your accreditation may be suspended by Manitoba Public Insurance for the following reasons:

(a) Failure to maintain the Accreditation Requirements, including failing to maintain your shop profile;
(b) Failure to produce to Manitoba Public Insurance any requested records required under this Agreement within the required time;
(c) Failure to collect deductibles;
(d) Submission of false invoices;
(e) Making false statements on applications and required submissions;
(f) Unauthorized surcharging on parts;
(g) Failure to comply with the stolen wrecked vehicle monitoring program rules and regulations in law or on the MPI Partners Website;
(h) Improper invoicing for substitute transportation;
(i) Conducting repairs for which you are not qualified or certified;
(j) Failing to agree to a Transition Plan or QA-Corrective Action Plan;
(k) Failure to follow or complete your requirements in the required timelines under any Transition Plan or QA-Corrective Action Plan;
(l) Failure to comply with any of the Policies & Procedures;
(m) Failure to comply with any term or condition of this Agreement, including any schedules;
(n) Failure to comply with any law which is applicable to your business and operations;
(o) Any attempt to defraud Manitoba Public Insurance;
(p) Conviction of fraud with respect to services under this Agreement;
(q) Any body integrity inspection station that has its ability to perform Body Integrity Inspections surrendered, revoked, suspended, or cancelled by Manitoba Public Insurance Vehicle Standards and Inspections;
(r) Use any of the MPI Intellectual Property without complying with the advertising policy on the MPI Partners Website;
(s) you have been convicted of a criminal offence; or,
(t) one of your Representatives has been convicted of a criminal offence in relation to the services related to this Agreement.

17.2 Reputational Protection

You agree that, in respect of the subject matter of this Agreement, you shall conduct yourself in a manner so as not to negatively affect either the public or business reputation, or community standing of Manitoba Public Insurance. If Manitoba Public Insurance determines, acting reasonably, that you or your Representatives' conduct has materially affected Manitoba Public Insurance's public or business reputation, or community standing, or that Manitoba Public Insurance's continued association with you would materially and negatively affect the operations of Manitoba Public Insurance, Manitoba Public Insurance may immediately suspend or terminate this Agreement upon written notice to you.

17.3 Written Notice of Suspension

You understand and agree that your accreditation will be suspended in accordance with the provisions of this Agreement within fourteen (14) days following receipt of written notice from Manitoba Public Insurance. Manitoba Public Insurance will provide the reasons for such suspension within the written notice. However, if you request a review of this suspension in

accordance with Section 18.4, the suspension (if ultimately upheld) will not commence until your receipt of the Accreditation Committee's decision.

17.4 Length of Suspension

Manitoba Public Insurance has the right to impose whatever length of suspension of your accreditation as Manitoba Public Insurance, in its sole discretion, acting reasonably, determines to be just in the circumstances. However, Manitoba Public Insurance agrees to limit first time accreditation suspensions to a period not to exceed six (6) months. For second suspensions, or if any suspension of your accreditation is due to any of the reasons in Sections 17.1(o) to 17.1(t), then there shall be no such limit on your period of suspension of accreditation. For clarity, upon the completion of the period of your suspension of accreditation, you do not automatically become accredited again. You must apply for reinstatement under Section 17.6.

17.5 Your Obligations Upon Suspension

Upon suspension of your accreditation for any reason, you cannot take on any new work under this Agreement, and you shall comply with Manitoba Public Insurance's directions which may include removing and ceasing to use all Manitoba Public Insurance permitted signage and advertising, ceasing to use any MPI Names and MPI Intellectual Property, ceasing to use the Mitchell Products, and any other requirements as decided by Manitoba Public Insurance. Any in-progress work is still subject to the requirements of this Agreement. Resolution of all in-progress work will be subject to a close out and reconciliation process. Failure to do so may result in Manitoba Public Insurance initiating legal proceedings against you, including but not limited to, proceedings requesting injunctive relief, Manitoba Public Insurance terminating this Agreement, and/or Manitoba Public Insurance refusing to do direct business with you.

17.6 Reinstatement of Accreditation

Upon suspension of your accreditation, you will only be eligible to regain your accreditation upon applying for reinstatement of your accreditation in accordance with the Policies & Procedures on the MPI Partners Website. Manitoba Public Insurance reserves the right to accept or decline your reinstatement of accreditation in its sole discretion.

18. DISPUTE RESOLUTION:

18.1 Issues Management

If you have any disputes related to this Agreement other than:

(a) suspension of accreditation;
(b) suspension or termination from the DR Program;
(c) termination of this Agreement; or
(d) refusal to do direct business,

you shall first try to amicably resolve them with Manitoba Public Insurance in accordance with the issues resolution policy on the MPI Partners Website prior to utilizing the dispute resolution process in Section 18.2. If you have a dispute identified in Sections 18.1(a) to (d) you may use the dispute resolution process under Section 18.2.

18.2 Resolving Disputes

Subject to Section 17.4, the parties agree that the committee set out in this section (the "**Accreditation Committee**") is the final arbiter of all disputes arising from this Agreement, and that the Accreditation Committee's decision shall be final and binding upon both parties. The Accreditation Committee is composed of five members, as follows:

(a) A chairperson with no board or employment connection to Manitoba Public Insurance, the ATA, or the MMDA and mutually agreed to by Manitoba Public Insurance, the ATA, and the MMDA;
(b) one member from the ATA;
(c) one member from the MMDA; and,
(d) two Manitoba Public Insurance appointees.

18.3 Disputes not subject to Review

You may not use the dispute resolution process in this Article 18 where:

(a) you have been convicted of a criminal offence;
(b) one of your Representatives has been convicted of a criminal offence in relation to the services related to this Agreement, or,
(c) this Agreement specifically states that specific issues and disputes are not subject to this Article 18.

18.4 Request for Review

Either you or Manitoba Public Insurance may ask the Accreditation Committee to review a dispute. You may ask the Accreditation Committee for a review of a dispute by applying to Manitoba Public Insurance in writing, as provided for in Section 20.10.

18.5 Time Limit for Request

Manitoba Public Insurance must receive a written request for review from you within ten (10) days after you have received written notice that your accreditation has been suspended, and/or that Manitoba Public Insurance refuses to do direct business with you, and/or that you have been suspended or terminated from the DR Program.

18.6 Notification of Review

Upon Manitoba Public Insurance's receipt of the above-mentioned request from you, you must wait for notification from Manitoba Public Insurance of the date, time, and location of the review, which shall be held in a reasonable amount of time. Upon notification of the date, time and location of the review, you must attend in person at the appointed date, time and location. You may represent yourself at the review or be represented by a representative of your choice.

18.7 Presentation of Information

You or your representative, as applicable, may present information at the review which you determine to be related to, and relevant for resolving, the dispute. Manitoba Public Insurance may also present information at the review which it determines to be related to, and relevant for, resolving the dispute. During the review, the Accreditation Committee may ask you to answer questions in order to clarify any facts or issues related to the dispute.

18.8 Minutes

Minutes will be taken during the presentation of information at the review and will be available to the Accreditation Committee, to you or your representative (as applicable), to Manitoba Public Insurance, and to representatives of the ATA and the MMDA. However, all discussions of the Accreditation Committee during its decision process will remain confidential and shall be treated in accordance with the terms and conditions of this Agreement.

18.9 Decision to be Rendered

The Accreditation Committee shall provide a written decision with respect to the dispute as soon

as possible after the review, but in any event not more than twenty (20) days from the date the review was completed.

18.10 Outcome of a Review
A decision rendered by the majority of the Accreditation Committee will be binding on the parties.

18.11 Continued Performance
During the dispute resolution process in this Article 18, you shall continue to perform all of your obligations required under this Agreement.

19.00 TERM AND TERMINATION:

19.1 Term
This Agreement shall come into effect on the Effective Date, and shall remain in effect until it is terminated by either of the parties in accordance with the provisions of this Agreement.

19.2 Termination for any Reason with Notice
Either party may terminate this Agreement for any reason with ninety (90) days' prior written notice to the other party.

19.3 Specific Rights of Termination
Manitoba Public Insurance may terminate this Agreement with ten (10) days' prior written notice to you if you fail to comply with any of the requirements of your suspension of accreditation.

19.4 Termination or Suspension of Schedules
Termination or suspension of this Agreement automatically terminates or suspends all schedules to this Agreement (as the case may be), including but not limited to Schedule 3.1 – Mitchell Product Use Terms, Schedule 9.1 – Direct Repair Program, and Schedule 9.2 – Fair Allocation Loss of Use Program.

19.5 Compensation after Termination
In the event this Agreement is terminated, Manitoba Public Insurance may elect to continue to pay the rates and fees on the MPI Partners Website that were in effect prior to the termination of this Agreement, or deem different rates and fees to be applicable.

19.6 Your Obligations Upon Termination
Upon termination of this Agreement for any reason, you shall remove and cease using all Manitoba Public Insurance permitted signage and advertising, cease to use any MPI Names and MPI Intellectual Property, and cease to use the Mitchell Products as required in Schedule 3.1 – Mitchell Product Use Terms. Failure to do so may result in Manitoba Public Insurance initiating legal proceedings against you, including but not limited to, proceedings requesting injunctive relief, and/or Manitoba Public Insurance refusing to do direct business with you.

20.00 GENERAL PROVISIONS:

20.1 Entire Agreement
This Agreement contains the entire agreement between the parties with respect to the subject matter hereof. There are no undertakings, representations, or promises, express or implied, other than those contained in this Agreement and none have been relied on. **For clarity, upon the Effective Date, this Agreement replaces and terminates any previous accreditation**

agreement between you and Manitoba Public Insurance, and any previous agreements between you and Manitoba Public Insurance regarding the use of the Mitchell Products such as the eGlassClaim agreement and the physical damage claims user agreement, and any distributed estimating pilot agreement.

20.2 Survival of Terms
The terms and conditions contained in this Agreement that by their sense and context are intended to survive the performance of this Agreement by the parties shall so survive the completion and performance, suspension or termination of this Agreement.

20.3 Independent Contractor
You are an independent contractor, and this Agreement does not create the relationship of employer and employee, of principal and agent, of joint venture, or of partnership between you and Manitoba Public Insurance or between Manitoba Public Insurance and any of your Representatives.

20.4 No Assignment
You shall not assign or transfer this Agreement or any of its rights or obligations under this Agreement without first obtaining written permission from Manitoba Public Insurance. This Agreement shall be binding upon the executors, administrators, heirs, successors and any permitted assigns of the parties.

20.5 Amendments
No amendment or change to, or modification of, this Agreement shall be valid unless it is in writing and signed by both parties.

20.6 Applicable Law
This Agreement shall be interpreted, performed and enforced in accordance with the laws of Manitoba and the laws of Canada applicable therein. The parties hereby irrevocably and unconditionally attorn to the exclusive jurisdiction of the courts of the Province of Manitoba and all courts competent to hear appeals therefrom.

20.7 Waiver and Remedies
Any failure or delay by either party to exercise or partially exercise any right hereunder shall not be deemed a waiver of any of the rights under this Agreement. The waiver by either party of a breach of any provision of this Agreement shall not operate as, or be construed as, a waiver of any subsequent breach thereof. The election of any one or more remedies by either party shall not constitute a waiver of that party's right to pursue other available remedies.

20.8 Performance of Necessary Acts
You agree to perform any further acts and execute and deliver any further documents that may be reasonably necessary to carry out the provisions of this Agreement.

20.9 Counterparts and Execution by Facsimile or Other Electronic Transmission
This Agreement may be executed in any number of parts. Each such part will have the same effect as if both parties had signed the same document. All parts shall be construed together and shall constitute one agreement. The execution and delivery of this Agreement by facsimile or other electronic transmission shall be sufficient to constitute proper execution and delivery of this Agreement.

20.10 Notice:

Any notice or other communication to you under this Agreement shall be in writing and shall be delivered personally, sent by facsimile or other electronic transmission, or sent by registered mail, postage prepaid to the address listed in your shop profile.

Any notice or other communication to Manitoba Public Insurance under this Agreement shall be in writing and shall be delivered personally, sent by facsimile or other electronic transmission, or sent by registered mail, postage prepaid, to:

Physical Damage Centre
Manitoba Public Insurance
Winnipeg, MB, R2C 5C7
Facsimile: 204-985-1661
Email: partners@mpi.mb.ca

Any notice or communication:

(a) sent by registered mail shall be deemed to have been received on the third day following the date of mailing;
(b) sent by facsimile or other electronic transmission (including email) shall be deemed to have been received on the same day it was sent if it was sent prior to 5:00 PM central time, or the next day following the date it was sent if it was sent after 5:00 PM central time; and,
(c) sent by courier or personal delivery shall be deemed to have been received on the day that it was delivered.

This Agreement has been executed on behalf of the parties effective the date first above written.

SCHEDULE 9.1 – DIRECT REPAIR PROGRAM

Background:

A. Manitoba Public Insurance is offering a DR Program to improve customer service and expand the working relationship with its partners in the motor vehicle repair industry in Manitoba. The DR Program is voluntary and available to all Accredited Shops that meet the DR Criteria, that apply to the DR Program, and are accepted into the DR Program by Manitoba Public Insurance.

1 Definitions

This schedule is in addition to, and subject to the terms of the Accreditation Agreement, and incorporates defined terms used in the Accreditation Agreement.

1.1 "**Accurate Estimate" and "Accurate Supplement"** mean the Estimate or Supplement as submitted by you is complete and compliant with Manitoba Public Insurance's Estimating Standards and guidelines as per Manitoba Public Insurance's Policies & Procedures.

1.2 "**Current ACV Threshold**" means the latest value, as published on the MPI Partners Website, over which the Total Loss Indicator value shall not exceed before obtaining Manitoba Public Insurance's guidance for that particular repair.

1.3 "**Direct Repair**" is the term used to describe DR Shops producing the First Estimate of physical damage related to a Manitoba Public Insurance physical damage claim.

1.4 "**DR Criteria**" is the term used to describe the performance criteria each Accredited Shop must meet or exceed to be eligible to apply for and continue to participate in the DR Program.

1.5 "**DR Program**" means Manitoba Public Insurance's Direct Repair program as contemplated under this schedule and the MPI Partner's Website.

1.6 "**DR Shop**" means an Accredited Shop that meets the DR Criteria, and that has applied and has been accepted into the DR Program by Manitoba Public Insurance.

1.7 "**Earned Approval Limit**" is a monetary limit associated with your then current Tier below which you are preapproved to do work, and are listed on the MPI Partners Website.

1.8 "**Exit Criteria**" means the process to be followed where a DR Shop is deemed no longer eligible to participate in the DR Program as indicated on the MPI Partners Website.

1.9 "**First Estimate**" means your initial preparation of an Estimate for the Light Vehicle under the physical damage claim in accordance with Manitoba Public Insurance's Estimating Standards, Policies & Procedures, guidelines, and the requirements of this schedule.

1.10 "**KPI**" or "**KPIs**" mean the key performance indicator(s) as set out on the MPI Partners Website.

1.11 "**MPI Authorized Contact**" is the designated individual within Manitoba Public Insurance assigned to help resolve operational and business issues related to the DR Program.

1.12 "**Supplement**" means an amendment, change, or update to an existing Estimate, processed and submitted using the Mitchell Products, such that the supplement number is increased.

1.13 "**Tiers**" means the various levels used to differentiate Accredited Shops based on their KPI scores, and are listed on the MPI Partners Website.

1.14 **"Total Loss"** means the total cost of the repair for the physical damage claim exceeds the net dollar value of the Light Vehicle's actual cash value as indicated by the Total Loss Indicator.

1.15 "**Total Loss Indicator**" means the value in the Mitchell Products that indicates percentage of cost of repairs compared to the then current actual cash value of the Light Vehicle.

2 DR Program

2.1 The purpose of the DR Program is three-fold:

(a) increasing customer service by allowing Customers to go directly to their preferred DR Shop for a First Estimate, and allowing them to proceed from the Estimate to repair without undue delay;
(b) increasing repair shop productivity and efficiency by lessening delays in the repair Estimate and Supplement approval process; and,
(c) increasing Manitoba Public Insurance's efficiency and effectiveness by decreasing reliance on line-by-line oversight of the physical damage repair process.

2.2 To participate in the DR Program an Accredited Shop must:

(a) meet or exceed the entry portions of the DR Criteria as described on the MPI Partners Website;
(b) be in good standing under its Accreditation Agreement;
(c) complete the DR Program application process as described on the MPI Partners Website; and,
(d) be accepted by Manitoba Public Insurance into the DR Program.

2.3 Manitoba Public Insurance reserves the right to:

(a) accept you into the DR Program;
(b) deny you entry into the DR Program; or,
(c) require you to agree to a transition plan prior to you entering into the DR Program.

If you are accepted into the DR Program, the following sections of this schedule will apply to you effective on the date determined by Manitoba Public Insurance in your application process.

2.4 If your participation in the DR Program is terminated in accordance with this schedule or the Accreditation Agreement, and you want to re-enter the DR Program, you will need to re-apply according to the current DR Program application process at the time of re-application, and re-qualify for all entry portions of the DR Criteria that are in place at the time of re-application.

3 Your Obligations

3.1 As a DR Shop in the DR Program, you will:

(a) maintain your Accreditation Agreement in good standing to continue your participation in the DR Program;
(b) continue to meet or exceed the DR Criteria;
(c) provide a comprehensive Accurate Estimate or Accurate Supplement of the damage incurred as part of a Customer's physical damage claim as required by Manitoba Public Insurance using the proper damage recording processes and applying the appropriate Manitoba Public Insurance Estimating Standards and business practices as per this schedule, and the Policies and Procedures on the MPI Partners website. This includes an obligation to find and report all damage to the Light Vehicle in accordance with the processes as set out on the MPI Partners Website;
(d) keep your appointment and client schedule up to date;
(e) ensure all your Representatives involved in the DR Program and supporting processes and practices undertake any training and review all documentation, Policies & Procedures, Estimating Standards, and processes as deemed necessary by Manitoba Public Insurance for each function that those Representatives perform for you in order for you to participate in the DR Program;
(f) comply with the parameters associated with your then current Tier;
(g) contact your assigned MPI Authorized Contact if you have any questions related to the DR Program, and follow the Policies & Procedures for contacting Manitoba Public Insurance regarding questions related to a specific physical damage claim;
(h) meet with your assigned MPI Authorized Contact in accordance with Section 4.5;
(i) ensure that your Representatives who have performed an Estimate are available and will work with Manitoba Public Insurance to explain their estimate to Manitoba Public Insurance, and to attend internal Manitoba Public Insurance claim dispute resolution processes, civil, criminal, or other court or administrative proceedings in order to provide testimony related to their Estimates or services when required; and,
(j) not turn away or refuse to take a Customer seeking a First Estimate from your shop.

3.2 There will be no additional compensation paid to you by Manitoba Public Insurance for provision of the First Estimate, other than for services provided under Subsection 3.1(i) of this schedule, which are listed on the MPI Partners Website. All other charges will be related to the repair functions as detailed on Manitoba Public Insurance's final, approved Estimate or Supplement.

3.3 The completion of the First Estimate is required to establish the following information:

a) which areas and associated damage are part of the current physical damage claim for which the First Estimate or Supplement is being created;
b) which areas and associated damage are not part of the current physical damage claim or prior damage which may or may not be part of a prior physical damage claim; and,
c) preparation of a complete Accurate Estimate for the purposes of establishing repairability or Total Loss determination.

3.4 Subject to Section 3.6, if the Light Vehicle is initially assessed as being repairable (i.e. not a Total Loss) you may proceed with the repair process per the conditions of your then current Tier and Earned Approval Limit, otherwise you may only proceed via the standard Manitoba Public Insurance review and approval process for physical damage claims.

3.5 Prior to commencing the First Estimate, if Total Loss is your initial assessment of the physical damage claim, you shall follow the regular Policies & Procedures on the MPI Partners Website for contacting Manitoba Public Insurance for directions on the proper disposition of the Light Vehicle.

3.6 If the total value of the completed Estimate including all Supplements is over the Current ACV Threshold, you shall follow the Policies & Procedures on the MPI Partners Website for contacting Manitoba Public Insurance for directions on the proper disposition of the Light Vehicle and await direction before proceeding with ordering any parts or commencing repairs. You understand that you may not be reimbursed for any unauthorized repair work and costs associated with repairs for a Light Vehicle where the total repair costs are in excess of the Current ACV Threshold amount for that Light Vehicle. In this instance unauthorized work includes activity that would normally fall under your then current Earned Approval Limit.

3.7 The First Estimate is to be prepared per Manitoba Public Insurance's then current Estimating Standards, guidelines, and Policies & Procedures that describe how to complete an Accurate Estimate and Accurate Supplement on the MPI Partners Website.

3.8 If the Customer's vehicle is safely drivable or temporary repairs can be made to make it safely drivable, you must allow the Customer to continue to drive the vehicle until you can complete any outstanding repairs. Any costs to complete temporary repairs must be per an approved Estimate, or requires prior approval from Manitoba Public Insurance, and will be exempt from the Earned Approval Limit.

3.9 You understand that the Customer is not obligated to proceed to a repair at your DR Shop even if you provide the First Estimate to the Customer.

4 Manitoba Public Insurance's Obligations

4.1 If available, Manitoba Public Insurance may provide you with additional information regarding the physical damage claim, including but not limited to loss details, with a view to assisting you to make informed decisions regarding the cause and extent of damage as described by the Customer.

4.2 Manitoba Public Insurance shall arrange for any training including providing all materials,

Estimating Standards, Policies and Procedures, and processes Manitoba Public Insurance identifies as necessary for you to participate in the DR Program. Any changes of use to the Mitchell Products will be communicated to you as required under the Accreditation Agreement.

4.3 Manitoba Public Insurance shall continue to utilize the established processes for processing and authorizing payment under the Accreditation Agreement. Your continued proper use of the Mitchell Products is necessary for timely and complete payment for your completed services.

4.4 Manitoba Public Insurance shall provide your individual DR Shop KPI results within the service standard time as indicated on the MPI Partners Website.

4.5 You shall be assigned an MPI Authorized Contact who will contact you on a regular basis per an agreed to schedule to review your KPI results and any other indicators describing your performance, the impact of the DR Program on your DR Shop, and to handle any questions you have regarding the DR Program.

4.6 Notwithstanding anything else in this schedule, Manitoba Public Insurance reserves the right to perform any First Estimates or Estimates in its sole discretion.

5 Tiers, Earned Approval Limits and Privileges

5.1 Upon joining the DR Program, you will be assigned to a Tier with an associated Earned Approval Limit. Manitoba Public Insurance reserves the right to make changes to the Tiers, Earned Approval Limits, and other privileges associated therewith in accordance with the Industry Agreement, and you may not use the Accreditation Agreement's dispute resolution provisions to appeal any issues related to them. You will be notified of updated versions in accordance with Article 9.

5.2 In accordance with the requirements in this schedule and the Accreditation Agreement, and up to your Earned Approval Limit, you have authority without additional approvals from Manitoba Public Insurance to:

(a) provide Manitoba Public Insurance with a First Estimate;
(b) order required parts;
(c) make changes to the First Estimate as per a normal Supplement;
(d) begin and complete the repair; and,
(e) submit request for payment.

5.3 Manitoba Public Insurance shall use the Mitchell Products, or other means, to automatically approve Estimates and Supplements based on the total value of the Estimate up to and including your current Earned Approval Limit. Manitoba Public Insurance's approval will be within the service standard time, as indicated on the MPI Partners Website, provided that the Mitchell Products are operational and functioning normally.

5.4 The Earned Approval Limit applies to the entire physical damage claim; if the latest Supplement increases the total value of the repair such that it is now higher than your then current Earned Approval Limit, the entirety of the Estimate including the changes from the latest submitted Supplement will be subject to Manitoba Public Insurance

review.

5.5 Any Estimate and Supplement that exceeds your current Earned Approval Limit will be reviewed by Manitoba Public Insurance and a response provided within the service standard time as indicated on the MPI Partners Website.

6 Performance Management and KPIs

6.1 Manitoba Public Insurance reserves the sole right to make changes to the KPIs, their weighting and calculation in accordance with the Industry Agreement and you may not use the Accreditation Agreement's dispute resolution provisions to appeal any issues related to them. You will be notified of updates to the KPIs in accordance with Article 9.

6.2 Manitoba Public Insurance shall regularly monitor and review your KPIs with you, and you may be reassigned to a different Tier based upon the criteria to maintain such Tier according to the processes as indicated on the MPI Partners Website.

6.3 You understand that the KPI results are based on the information recorded in the Mitchell Products and AutocheX, plus other Manitoba Public Insurance systems. Information not on file in the Mitchell Products or in other Manitoba Public Insurance systems at the time the reports are processed will not be included in the month's measures. Additional details on the calculation and distribution of the relevant KPIs can be found on the MPI Partners Website.

6.4 Your KPI results may be published to the Manitoba Public Insurance public website, or in any other place Manitoba Public Insurance decides to place the information, in rank order and by location, or in any other manner as determined by Manitoba Public Insurance.

6.5 In Manitoba Public Insurance's sole discretion, if there have been any events of force majeure beyond the control of either party, an event caused by Manitoba Public Insurance, or any other event that Manitoba Public Insurance determines has had a material impact on your KPIs, Manitoba Public Insurance may waive or make any adjustments to your KPIs to mitigate or reflect the impact of such event.

6.6 Throughout the DR Program, Manitoba Public Insurance solely determines your Tier, Earned Approval Limit, and KPIs, however if you have any disputes regarding your Tier, Earned Approval Limit, and KPIs you shall utilize Section 18.1 of the Accreditation Agreement.

6.7 Notwithstanding the above, Manitoba Public Insurance shall manage the Tiers and Earned Approval Limits in their own right as a companion program. If the then current versions of the Tiers and Earned Approval Limits program differ in detail or application from the material herein, the version as set out in the companion program shall be followed.

7 Inspections and Reviews

7.1 Any Estimate or Supplement you have prepared for the DR Program may be randomly selected by Manitoba Public Insurance for review at any point in the repair process, including but not limited to in-progress or completed repairs, as part of Manitoba Public

Insurance's ongoing quality assurance process.

7.2 An Estimate or Supplement you have prepared for the DR Program that has been approved by the Mitchell Products based on the total value of the Estimate, up to and including your current Earned Approval Limit, may be randomly selected by Manitoba Public Insurance for review as part of Manitoba Public Insurance's on-going quality assurance process. Manitoba Public Insurance shall notify you if you have not provided an Accurate Estimate.

7.3 Manitoba Public Insurance or its Representatives shall conduct regular reviews of a random sample of your DR Program physical damage claims approved by the Mitchell Products and paid to you.

7.4 Each month, Manitoba Public Insurance will conduct a review of a portion of all Estimates, the proportion being determined at Manitoba Public Insurance's sole discretion, submitted by your DR Shop to Manitoba Public Insurance where the total value of each Estimate is up to and including your current Earned Approval Limit, and where each Estimate is automatically reviewed and approved. Where the review determines any portion of an Estimate has been paid, which would otherwise not have been approved if reviewed manually, or identifies an amount has not been included by you in the Estimate for which you were entitled to be paid and would otherwise have been added to the Estimate and approved by Manitoba Public Insurance, Manitoba Public Insurance may in its sole discretion, seek reimbursement from or make payment to you, according to the process more fully described on the MPI Partners Website.

7.5 As part of the DR Program, parts invoices and Customer authorization signatures need to be uploaded to the Mitchell Products along with the Estimate. These documents must be retained in accordance with the Accreditation Agreement. Manitoba Public Insurance reserves the right to request copies of these documents at any time, with or without prior notification.

7. Termination

8.1 Manitoba Public Insurance may cancel the DR Program, or any portion thereof, at any time in its sole discretion in accordance with the Industry Agreement, and shall provide you notice of such, and the application of this schedule and your ability to perform Direct Repairs will be deemed to be terminated upon the receipt of such notice.

8.2 Manitoba Public Insurance may terminate or suspend the application of this schedule to your Accredited Shop for any reason by giving thirty (30) days' prior written notice to you.

8.3 You may withdraw from the DR Program by giving thirty (30) days prior written notice. Manitoba Public Insurance shall notify you in writing that your participation in the DR Program has been terminated.

8.4 In addition to its rights under Sections 8.1 and 8.2 above, and in the Accreditation Agreement, and without restricting any other remedies available, Manitoba Public Insurance may, at its sole option, immediately suspend or restrict your ability to participate in the DR Program, or any portion thereof, and/or terminate the application of this schedule if:

(a) you make an assignment for the benefit of creditors or take any other action for the benefit of creditors, become bankrupt or insolvent, or take the benefit of or become subject to any legislation in force relating to bankruptcy and insolvency; or,

(b) in the opinion of Manitoba Public Insurance, you have failed to comply with or breached any other term or condition of this schedule, or your Accreditation Agreement.

8.5 Upon written notice of suspension or termination of the application of this schedule, you shall cease to prepare First Estimates, cease to participate in the DR Program, and you shall follow all additional directions from Manitoba Public Insurance required to cease participation in the DR Program. If termination of this schedule is made pursuant to Section 8.4, Manitoba Public Insurance may also refuse to do direct business with you in accordance with the Accreditation Agreement.

8.6 If your Accreditation Agreement is terminated for any reason under the Accreditation Agreement, this schedule's application also terminates as of the date of the termination of the Accreditation Agreement.

8.7 Termination of the application of this schedule shall not terminate the Accreditation Agreement.

8.8 You may use the Accreditation Agreement's dispute resolution provisions to appeal a termination of your DR Shop's participation in the DR Program, but you may not appeal a decision to terminate under Section 8.1 of this schedule.

9 Notification

9.1 Notwithstanding anything else in this schedule, Manitoba Public Insurance may deliver updates to any Estimating Standards, guidelines, documentation, Policies & Procedures, processes, and advertising rules related to the DR Program to you electronically to an email address of your choosing, until the MPI Partners Website is established for dissemination of such updates, or in any other manner that Manitoba Public Insurance deems appropriate.

SCHEDULE 9.2 – FAIR ALLOCATION LOSS OF USE PROGRAM

1 **Definitions:**

This schedule is in addition to, and subject to the terms of the Accreditation Agreement, and incorporates defined terms used in the Accreditation Agreement.

(a) "**Fair Allocation LOU Program**" or "**FA-LOU Program**") means an optional program managed and set up by MPI to offer Customers alternate transportation in the event that the vehicle is unavailable to them and they also have coverage for its loss of use.

(b) "**LOU**" means loss of use.

(c) "**LOU Program**" means program for the services authorized for covered Manitoba Public Insurance Customers to provide alternative transportation in the event their Light Vehicle is not available to them during an insured loss event.

2 **Background for FA-LOU Program:**

2.1 Manitoba Public Insurance is offering the optional FA-LOU Program to Accredited Shops to improve customer service and expand the working relationship with the motor vehicle repair industry in Manitoba. The FA-LOU Program is voluntary and available to all Accredited Shops that apply to the FA-LOU Program by completing the FA-LOU Program application form, and are accepted into the FA-LOU Program by Manitoba Public Insurance.

3 **FA-LOU Program:**

3.1 The purpose of the FA-LOU Program is three-fold:

(a) increasing customer service by allowing Customers to have their rental or courtesy car needs provided directly by the Accredited Shop. The Accredited Shop is authorized to arrange for and deliver a vehicle meeting Manitoba Public Insurance's customer service standards for alternative transportation needs while the Customer's own Light Vehicle is being repaired;
(b) increasing Accredited Shop efficiency by allowing direct control over the administration of the rental; and,
(c) increasing Manitoba Public Insurance's efficiency by decreasing the day-to-day approvals and coordination between Accredited Shops and rental agencies and allowing this interaction to occur directly.

4 **FA-LOU Program Eligibility, Application and Operating Guidelines:**

4.1 Program eligibility, the application process, and the operating guidelines of the FA-LOU Program are as posted on the MPI Partners Website.

5 **Your Obligations under the FA-LOU Program:**

5.1 As an Accredited Shop in the FA-LOU Program, you will:

(a) maintain your Accreditation Agreement in good standing to continue your participation in the FA-LOU Program;
(b) explain Manitoba Public Insurance's LOU policies to Customers, including policy limits;
(c) manage the authorization for rental vehicles provided to Customers;
(d) only authorize rentals for Customers who have been authorized for LOU as per documentation provided to you by Manitoba Public Insurance on a claim by claim basis;

(e) ensure each eligible Customer receives a vehicle meeting the minimum rental vehicle requirements as posted on the MPI Partners Website;
(f) ensure each eligible Customer is provided a vehicle for the duration of the time they are entitled to one;
(g) manage the duration of repair of the Customer's Light Vehicle such that the rental duration is minimized;
(h) promptly apprise the Manitoba Public Insurance claims adjuster/processor in charge of the claim of any extra-ordinary delays, along with details on costs and customer service impacts and request direction;
(i) immediately inform the Manitoba Public Insurance claims adjuster/processor in charge of the claim if the Customer's Light Vehicle is deemed a total loss while under your care and the Customer has already been issued a replacement vehicle;
(j) where LOU coverage is provided as a result of a claim against a liable third party motorist, advise Customers that they have a duty to mitigate the costs of their LOU in accordance with the business rules posted on the MPI Partners Website. Manitoba Public Insurance will not pay for unauthorized upgrades;
(k) explain to Customers that they have a duty to minimize the length of time that they endure the loss of their Light Vehicle (e.g. repairs are undertaken in an expedient manner);
(l) contact your assigned Manitoba Public Insurance authorized contact if you have any questions related to the FA-LOU Program, and follow the Policies & Procedures for contacting Manitoba Public Insurance regarding questions related to a specific physical damage claim;

5.2 You will maintain records for all rentals you have authorized. These records will include the following information:

(a) claim number;
(b) rental agreement number;
(c) rental car provider name and address;
(d) Customer first and last name;
(e) class of vehicle supplied;
(f) rental vehicle license plate number;
(g) rental start and end dates, and rental duration;
(h) upgrade reason if an upgrade is provided;
(i) relationship between the renter and the policy holder for the damaged Light Vehicle (where they are different); and,
(j) amount and details of any additional charges.

5.3 Manitoba Public Insurance will provide you compensation based on the replacement vehicle rental rate structure (as posted on the MPI Partners Website) per eligible labour hour authorized and paid for each eligible claim. This compensation will be fixed regardless of the actual cost of the rental except where you have been specifically authorized for additional compensation by the Manitoba Public Insurance claims adjuster/processor in charge of the claim for extra-ordinary repair situations. Payment will be made along with and in the same fashion as payment for the Light Vehicle being repaired.

5.4 If the Customer's Light Vehicle is safely drivable or temporary repairs can be made to make it safely drivable, you must allow the Customer to continue to drive the Light Vehicle until you can complete any outstanding repairs and not authorize a rental vehicle. Any costs to complete temporary repairs must be managed according to the terms of the Accreditation Agreement.

5.6 If you provide Customers with a vehicle that is not from a Manitoba rental vehicle company, you will follow the business rules for rental vehicle companies on the MPI Partners Website, and need to meet the following business rules:

(a) your vehicles must meet the same criteria as those applicable to the rental vehicle companies in order to qualify for rental vehicle rates; otherwise, your vehicles will be deemed courtesy cars and you will be compensated based on the courtesy car rates; and,
(b) you must maintain the same record keeping and insurance requirements as applicable to rental companies and meet all regulations they are required to meet.

6 Manitoba Public Insurance's Obligations:

6.1 Manitoba Public Insurance will provide you with notification when a claim is eligible for the FA-LOU Program and will inform you of the type of LOU coverage available so that you may appropriately authorize the rental. This notification will also determine the daily rental rate applicable to this claim.

6.2 Manitoba Public Insurance reserves the right to revoke the authorization for LOU or for the duration of LOU for a specific claim if it receives additional information which brings coverage or liability into question. In such cases, Manitoba Public Insurance will allow the Accredited Shop twenty-four (24) hours to notify their Customer that Manitoba Public Insurance's authorization for LOU for their claim has been cancelled.

6.3 Manitoba Public Insurance will not authorize FA-LOU Program coverage until all of the following conditions have been met:

(a) the Customer has reported the claim to Manitoba Public Insurance;
(b) coverage has been confirmed; and,
(c) A customer has an entitlement for alternate transportation costs and as a result of a claim that the Customer is without their Light Vehicle.

6.4 Manitoba Public Insurance shall arrange for any training including providing all materials, Policies & Procedures, and processes Manitoba Public Insurance identifies as necessary for you to participate in the FA-LOU Program.

6.5 Manitoba Public Insurance will conduct audits on a random and structured basis to review the FA-LOU Program. You will cooperate with the audit by supplying records when requested in accordance with the Accreditation Agreement. Where the audit determines any irregularities with replacement vehicle authorizations, Manitoba Public Insurance may in its sole discretion, seek reimbursement from you for a portion of the amount up to and including the entire amount.

6.6 LOU services that have been initiated somewhere other than your shop will be handled by Manitoba Public Insurance.

7 Termination:

7.1 Manitoba Public Insurance may cancel the FA-LOU Program, or any portion thereof, at any time in its sole discretion, and shall provide you notice of such, and the application of this schedule and your ability to perform FA-LOU authorizations will be deemed to be terminated upon the receipt of such notice.

7.2 Manitoba Public Insurance may terminate or suspend the application of this schedule to your Accredited Shop for any reason by giving thirty (30) days' prior written notice to you.

7.3 You may withdraw from the FA-LOU Program by giving thirty (30) days prior written notice. Manitoba Public Insurance shall notify you in writing that your participation in the FA-LOU Program has been terminated.

7.4 In addition to its rights under Sections 7.1 and 7.2 above, and in the Accreditation Agreement,

and without restricting any other remedies available, Manitoba Public Insurance may, at its sole option, immediately suspend or restrict your ability to participate in the FA-LOU Program, or any portion thereof, and/or terminate the application of this schedule if:

(a) you make an assignment for the benefit of creditors or take any other action for the benefit of creditors, become bankrupt or insolvent, or take the benefit of or become subject to any legislation in force relating to bankruptcy and insolvency; or,
(b) in the opinion of Manitoba Public Insurance, you have failed to comply with or breached any other term or condition of this schedule, or your Accreditation Agreement.

7.5 Upon written notice of suspension or termination of the application of this schedule, you shall cease to authorize replacement vehicles, cease to participate in the FA-LOU Program, and you shall follow all additional directions from Manitoba Public Insurance required to cease participation in the FA-LOU Program. If termination of this schedule is made pursuant to Section 7.4, Manitoba Public Insurance may also refuse to do direct business with you in accordance with the Accreditation Agreement.

7.6 If your Accreditation Agreement is terminated for any reason under the Accreditation Agreement, this schedule's application also terminates as of the date of the termination of the Accreditation Agreement.

7.7 Termination of the application of this schedule shall not terminate the Accreditation Agreement.

7.8 You may use the Accreditation Agreement's dispute resolution provisions to appeal a termination of your participation in the FA-LOU Program, provided that you may not appeal a decision to terminate under Section 7.1 of this schedule.

8 Notification:

8.1 Notwithstanding anything else in this schedule, Manitoba Public Insurance may deliver updates to any Estimating Standards, guidelines, documentation, Policies & Procedures, processes, and advertising rules related to the FA-LOU Program to you electronically to an email address of your choosing, until the MPI Partners Website is established for dissemination of such updates, or in any other manner that Manitoba Public Insurance deems appropriate.

9 Rental Days and Coverage:

9.1 The actual covered rental days per repair are a function of the scope of the repair and typical durations to effect a proper repair. These parameters are set by Manitoba Public Insurance and will be updated on an annual basis. Such updates will be coordinated with other updates associated with Annual Rate changes. You shall receive notice of such changes and are expected to apply the latest in force rates for work completed in the period that qualify for the FA-LOU Program.

PUB (MPI) 1-38

Part and Chapter:	**IV SDM.1.9 Service Delivery Model**	**Page No.:**	**18-19**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Claims Expenses**		
Sub Topic:	**BI3 Claims Management**		

Preamble to IR (If Any):

Question:

a) Please file the jurisdictional review that supports the increase in staffing levels for managing claims.
b) Please indicate what additional case management capacity has been added to manage claims, in terms of FTE and annualized cost.

Rationale for Question:

To understand changes in claims expenses.

RESPONSE:

a) The increase in staffing levels is based on the operational needs of MPI, however similar pressures are being felt in other jurisdictions.

A January 2018 Operational Review[1] of ICBC by PWC specified an increase in the number of injury adjusters from 2011 to 2016 by nearly 20% (up from 555 in

[1] https://www2.gov.bc.ca/assets/gov/british-columbians-our-governments/organizational-structure/crown-corporations/pwc-review-icbc-jan-2018.pdf. Page 10.

2011 to 660 in 2016). The driving force behind this increase is ICBC's efforts to reduce claim durations.

The Corporation has a strong working relationship with the Transport Accident Commission (TAC) in Victoria, Australia and both participate as part of the Global Users Group through FINEOS. The TAC has increased their case management staff by 20%, and are reporting dramatic reduction in injury durations where they experiment with higher case management resources and proactivity.

The Corporation's thirteen (13) additional staff equates to an increase of less than 8% within injury claims management, which will increase the overall capacity of the 58.8 case managers within Rehabilitation Management, through the reduction of administrative functions.

b) MPI did not add any case managers. The additional resources are as follows:

- 10 Benefit Administrators (2 of which are French designated)
- 1 Data Steward
- 1 Injury Claims Analyst
- 1 Supervisor

Figure 1 identifies the total costs associated with this additional staff is $930,000 per year calculated as follows:

Figure 1: Additional FTE Costs

	FTE Cost
Annual salary	$55,000
FTEs	13
Additional benefit costs	30%
Annual FTE Costs	**$930,000**

The 10 benefit administrators will complete all new claims intakes (excluding catastrophic claims, fatality claims, and claims where the claimant is still in hospital). They will assess and triage these claims to the most appropriate level of case management, a function that was previously completed by case manager 2s. As part of this role, they will:

- Confirm coverage
- Initiate Income Replacement
- Arrange Personal Care Assessments (when required)
- Arrange for the completion of authorizations
- Complete all Permanent Impairment Calculations
- Additional insertions of work are anticipated over the ensuing months, such as monitoring the opioid policy, dry cannabis policy, dental claims, and potentially personal care only claims, and short term duration IRI claims.

Removing these functions from case managers increases their overall capacity to focus on rehabilitation efforts that return claimants to health and to work through the Corporation's active case management model.

The corporation projects a net savings to claims costs of over $2 million per year to be realized beginning in fiscal year 2020/21.

PUB (MPI) 1-39

Part and Chapter:	**IV SDM.2 Service Delivery Model**	**Page No.:**	**21**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Cost Containment Measures**		
Sub Topic:	**Customer Experience Framework**		

Preamble to IR (If Any):

MPI is establishing a Customer Experience framework, and expects it to be completed by the end of the current fiscal year.

Question:

a) What organizations has the Corporation identified for comparison purposes?
b) Please advise as to what benchmarks are being developed, and describe what they measure and where are they currently utilized.
c) Who is responsible for developing the framework, and at what cost?

Rationale for Question:

To understand the Customer Experience Framework.

RESPONSE:

a) The Corporation is currently seeking to compare Customer Experience (CX) metrics with other public insurers and to an overall benchmark for automobile insurance providers in Canada. The Corporation may also benchmark to other industries where relevant.

b) The Corporation is seeking to develop benchmarks for Customer Experience (CX) quality metrics such as: that the experience delivers value to customers; that it is

easy to do business with the Corporation; and, how the customer feels about the experience. Customer loyalty metrics such as: the likelihood of customers engaging the Corporation's services; and, the likelihood of speaking positively about the Corporation to other people will also have benchmarks established.

Metrics regarding CX quality and customer loyalty would feed into an overall CX Index Score. These metrics and the overall CX Index Score would be compared to similar organizations and to the automobile insurance industry overall in Canada or North America. The metrics would be gathered across important customer touchpoints with the Corporation, providing direction on what actions are needed to improve what the Corporation provides for Manitobans.

c) The COO and VP of Customer Service has overall authority for the development of the framework. The target budget for development purposes is less than $150,000, which excludes implementation costs (yet to be determined). Use of in-house staff and the selective use of external resources will keep costs low in the development phase.

PUB (MPI) 1-40

Part and Chapter:	**V EXP.3, Figure EXP-5**	**Page No.:**	**16**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Cost Containment**		
Sub Topic:	**Expense Variances**		

Preamble to IR (If Any):

Question:

a) Please provide a breakdown of the forecasted savings for 2018/19 for each of the items listed under EXP-5.
b) Please elaborate on the savings realized for the one-time deferral of department redevelopment.
c) Please explain why the Space Redevelopment Initiative was deferred.

Rationale for Question:

To understand the Corporation's cost containment efforts.

RESPONSE:

a) Please see *Figure 1* below for the reductions included in the 2018/19 budget:

Figure 1: Cost Containment

Line No.	Description	Savings
	(C$000s, except where noted)	
1	Telco Cell Phones	80
2	IBM Operations	200
3	Forward Collision Avoidance	164
4	Road Safety Promotion	424
5	Corporate Sponsorship - Business Partnerships	50
6	Corporate Sponsorship - Community Support	262
7	Impaired Driving Strategy	11
8	Vulnerable Road User Strategy	20
9	Entry Level Professional Truck Driver Training	650
10	Corporate Fleet Vehicles	490
12	Total Savings	**2,351**

b) The $1.3M one-time deferral for departmental redevelopments at Cityplace was reallocated to another area of the business in support of the flat budget requirement for the 2017/18 year. There are no long term savings realized from the one-time deferral as it only changed the year in which the expenses would occur. This is not a long term cost containment solution.

c) Same as b) above.

PUB (MPI) 1-41

PUB (MPI) 1-42

Part and Chapter:	**V EXP Appendix 4**	**Page No.:**	**1**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Basic Total Expenses**		
Sub Topic:	**Compounded Annual Growth Rates**		

Preamble to IR (If Any):

Question:

a) Please explain the compounded annual growth rates for 4 years from 14/15 to 17/18 in Compensation-Overtime, and explain the 19.6% compounded growth through the forecast period (in 18/19 through 20/21).
b) Please explain the compounded annual growth rates for 4 years from 14/15 to 17/18 in Furniture and Equipment, and explain the 18.6% compounded growth through the forecast period (18/19 to 20/21).
c) Please explain the compounded annual growth rates for 4 years from 14/15 to 17/18 in Travel & Vehicle Expense, and explain the 12.7% compounded growth through the forecast period (18/19 to 20/21).
d) Please explain the compounded annual growth rates for 4 years from 14/15 to 17/18 in Printing, Stationary and Supplies, and explain the 13.1% compounded growth through the forecast period (18/19 to 20/21).
e) Please explain the compounded annual growth rates for 4 years from 14/15 to 17/18 in Public Information/Advertising, and explain the 7.8% compounded growth through the forecast period (18/19 to 20/21).

Rationale for Question:

To understand growth in Corporation's expenses.

RESPONSE:

a) Overtime Expense has steadily declined from $2.45 million in 2013/14 to $0.8 million in 2017/18. This explains the average decline of 23.5% for this period and is in large part due to MPI's cost containment measures. However, the Corporation expects these expenses to grow slightly in 2018/19 and then to be below the 5-year average as cost containment measures continue. However, unexpected events (such as hail or winter storms) may increase the need for overtime. Please refer to *PART V, EXP, Appendix 3*, page 3, line 2, for a 10-year summary of Basic Total Overtime Expenses.

b) Furniture and Equipment Expense declined from $1.1 million in 2013/14 to $0.7 million in 2017/18. However, 2017/18 was lower than historical values due to a deferral of various IT equipment refreshment cycles into the forecast period. The drop in 2017/18 expenses followed by an increase in forecasted expenses resulted in an 18.6% Compound Annual Growth Rate (CAGR) from 2018/19 to 2020/21. Please refer to *PART V, EXP, Appendix 3*, page 3, line 18, for a 10-year summary of Basic Total Furniture and Equipment Expenses.

c) Travel and Vehicle Expense declined gradually from $1.2 million in 2013/14 to $0.7 million in 2017/18. However, while the 5-year forecast has increased from 2017/18, it has remained flat at approximately $0.9 million. This drop in expenses over the historical period followed by an increase in forecast expenses is mostly attributable to the Corporation's cost containment measures, which has resulted in a 13.2% CAGR between 2014/15 and 2017/18. Although the 2018/19 to 2020/21 CAGR reflects a 12.7% average annual increase, this is primarily attributable to the establishment of the budget / forecast based on historical levels and is, from a dollar perspective, minimal. Please refer to *PART V, EXP, Appendix 3*, page 3, line 15 for a 10-year summary of Basic Total Travel and Vehicle Expenses.

d) Printing, Stationary and Supplies Expenses declined from $1.8 million in 2013/14 to $1.1 million in 2017/18, mainly due to lower spending on computer accessories/supplies and stationery. However, while the 5-year forecast has increased from 2017/18, the forecast has remained flat at approximately $1.6 -

$1.7 million. This drop in expenses over the historical period followed by an increase in forecast expenses is mostly attributable to the Corporation's cost containment measures, which has resulted in a -11.9% CAGR per annum, between 2014/15 and 2017/18.. Although the 2018/19 to 2020/21 CAGR reflects an average annual increase of 13.1%, this is due to the establishment of the budget / forecast based on historical levels and is, from a dollar perspective, minimal. Please refer to *PART V, EXP, Appendix 3*, page 3, line 12, for a 10-year summary of Basic Total Printing, Stationary, and Supplies Expenses.

e) Public Information/Advertising Expense declined from $2.5 million in 2013/14 to $1.9 million in 2017/18. However, while the 5 year forecast has increased from 2017/18, the forecast has remained flat at approximately $2.3 - $2.4 million. This drop in expenses over the historical period followed by an increase in forecast expenses is mostly attributable to the Corporation's cost containment measures which has resulted in a -6.0% CAGR per annum, between 2014/15 and 2017/18. Although, the 2018/19 to 2020/21 CAGR reflects an average annual increase of 7.8%, this is due to the establishment of the budget / forecast based on historical levels. Please refer to *PART V, EXP, Appendix 3*, page 3, line 11, for a 10-year summary of Basic Total Public Information/Advertising Expenses.

PUB (MPI) 1-43

Part and Chapter:	**V EXP Appendix 7**	**Page No.:**	**7**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Expenses**		
Sub Topic:	**Other Expenses**		

Preamble to IR (If Any):

Question:

Please provide a breakdown of the strategies and savings that were realized as part of the $2.64M stretch target budget included in the 2018 GRA.

Rationale for Question:

To understand the Corporation's cost containment measures.

RESPONSE:

Please refer to the section *EXP.3.2 Cost Containment* of Part V Expenses, specifically *Figure EXP-5* on page 16.

PUB (MPI) 1-44

Part and Chapter:	**V EXP Appendix 9-11; PUB (MPI) 1-35 (2017 GRA)**	**Page No.:**	**1, 1-2, 1-2**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Expenses**		
Sub Topic:	**Staffing Levels**		

Preamble to IR (If Any):

Question:

a) Please provide an update to staff turnover in PUB/MPI 1-35 (2017 GRA).

b) Please file a copy of retirement statistics over the previous five years.

c) Please indicate the current number of staff eligible for retirement.

Rationale for Question:

To understand Corporation's attrition-based staff reduction strategy.

RESPONSE:

a) For the period March 1, 2018 – June 30, 2018:

Voluntary Turnover	Involuntary Turnover	Retirements	Total	Comments
16	2	37	55	
0.90%	0.11%	2.08%	3.10%	Percentage of overall permanent employee headcount.

b) Retirements over the past five fiscal years:

- 2013/14: 60
- 2014/15: 58
- 2015/16: 44
- 2016/17: 63
- 2017/18: 73

c) There are presently (as of June 30, 2018) 127 employees (including active and inactive employees) who are eligible to retire.

PUB (MPI) 1-45

Part and Chapter:	**V EXP Appendix 16**	**Page No.:**	**1-3**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Expenses**		
Sub Topic:	**Basic Capital Expenditures**		

Preamble to IR (If Any):

Question:

For Figure EXP App 16: Basic Capital Expenditures, please elaborate where possible on the root cause of the differences noted for the decreased spending by expenditure type (i.e. internal and/or external factors, change in policy, risk tolerance, etc.).

Rationale for Question:

To better understand the detail behind the significant differences noted for basic capital expenditures.

RESPONSE:

2017/18 Basic Capital Expenditures Variance Analysis

Automobiles

As part of the Fleet Vehicle Reduction Initiative in 2017/18, the Corporation replaced only 3 of the 29 vehicles that were disposed of during the year (as part of normal vehicle turnover/replacement practices), resulting in savings of approximately $733,000 to Basic.

Office Equipment / Systems Furniture

The favorable variance is mainly due to the cancellation of redevelopment projects at Cityplace and lower level space redevelopments at the Main, Bison and Gateway Service Centres. The service centre redevelopments were planned in order to accommodate the relocation of staff as a result of the closure of the Pacific Avenue Service Centre, however, prior to the redeployment of staff into alternate Service Centre locations it was later found that existing space was available and suitable with minimal changes. In addition, approximately $309,000 in savings to Basic were realized through the repurposing of existing inventory as part of the renovations to the Pembina, Brandon and Plessis buildings.

Data Processing

The review and optimization of purchasing resulted in actual spending on data processing equipment being lower than budgeted in 2017/18. The Corporation also moved from hardware appliances to virtual appliances, matched hardware upgrades to capacity and performance needs and, in some cases, deferred equipment upgrades, in favour of maximizing the life span of its current infrastructure.

Land and Building

Land and Building costs are lower than budgeted for 2017/18, as a result of the cancelled or deferred building projects at Cityplace. This was a cost containment initiative which saved Basic approximately $1.3M for the 2017/18 fiscal year. The remaining favorable variance is due to the cancellation of lower level space redevelopment projects at the Main, Bison and Gateway Service Centres.

PUB (MPI) 1-46

Part and Chapter:	**VII LP Loss Prevention**	**Page No.:**	**11**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures** **22. Road Safety Program Costs and Budget**		
Topic:	**Road Safety Expenses**		
Sub Topic:			

Preamble to IR (If Any):

Question:

Please indicate the anticipated savings from the use of Predictive Analytics.

Rationale for Question:

To understand the Corporation's success in reducing costs.

RESPONSE:

The Corporation currently applies the Predictive Analytics tool only to Total Loss claims, which accounts for less than 20% of all physical damage claims (approximately 35,000 annually). The Corporation originally projected savings from the use of Predictive Analytics for the Total Loss claim segment at $500,000 annually. This projection was based on a very small data set of savings identified during the pilot period and soft launch of the Tool in late 2017/early 2018. Since that time, and with a larger data set, the Corporation has amended the projection to an annual saving of $250,000 by the end of this fiscal year.

The additional benefits of the Predictive Analytics tool (i.e. stronger referrals, higher success rates and shorter investigation times) continue to trend positively. The Tool permits investigators to conduct their investigations sooner and to focus them through

the identification of better leads. The result is an increase in investigator productivity and an improvement in customer service levels.

The Corporation will continue to optimize its use of Predictive Analytics to reduce claims costs and improve results.

PUB (MPI) 1-47

Part and Chapter:	**VIII AR Appendix 4**	**Page No.:**	**15**
PUB Approved Issue No:	**9. Cost of Operations and Cost Containment Measures**		
Topic:	**Expenses**		
Sub Topic:	**Staffing Levels**		

Preamble to IR (If Any):

Question:

a) Please explain why number of management positions has decreased but employee positions have increased.
b) Please provide details of the improvement initiative efficiencies that will be implemented to reduce staff levels.

Rationale for Question:

To understand Corporation's staff reduction strategy.

RESPONSE:

a) Rationale for Management decrease: Please refer to *Volume I, Overview*, page 6 of the 2018 GRA. By December 2017, the Corporation was able to reduce its management FTE count by 15%. To achieve this reduction in management staff, the Corporation analyzed the span of control across the organization. Human Resources and business leaders then collaborated to identify opportunities to combine leadership portfolios/like functions in order to gain efficiencies and allow leaders to take on broader portfolios.

Rationale for Employee positions increasing: Section 5.1 of *AR Appendix 4* indicates that the number of FTE positions increased by 24 non-management FTEs (from 1757.90 FTEs in 2016/17 to 1781.90 FTEs in 2017/18), which represents a 1.35% change overall in the total number of employees. This increase was required to respond to the various business needs of the Corporation (i.e. increased seasonal demands on driver testing).

b) Please see table below for details of the staffing savings forecast through improvement initiatives

Figure 1: Improvement Initiatives Staffing Efficiencies

Line No.	Improvement Initiatives Staffing Efficiencies	2018/19FB	2019/20F	2020/21F	2021/22F

5	**Total**	**-**	**280**	**1,094**	**1,360**

PUB (MPI) 1-48

Part and Chapter:	**Part V CI**	**Page No.:**	**41-42, 53-54 of 82**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Claims Forecasting**		
Sub Topic:	**Comprehensive Hail**		

Preamble to IR (If Any):

Section CI.10.1.1 references the Corporation's Paintless Dent Repair initiative for minor hail claims which: *has greatly reduced the severity of hail claims.*

Question:

a) Please document the derivation of the forecasted Repair, Total Loss and Total Basic Comprehensive Hail Claim Counts Excluding $0 Claims (as shown in Figure CI-37) from the historical information shown in Figure CI-36 reflecting the Corporation having: *selected a ten-year average of claims and applied the latest repair and total loss ratios of 21% and 79% respectively.*

b) Please discuss the significant drop in Comprehensive Hail Severity Excluding $0 Claims in 2017/18 as shown in Figure CI-48, and how much of this decline is attributable to the Corporation's Paintless Dent Repair initiative. In this context, please also discuss the rationale for the Corporation having: *selected a weighted average severity (33%/67%) of the last two years giving the latest year the most weight.*

Rationale for Question:

To assess the reasonableness of the forecasted Comprehensive Hail frequencies and severities.

RESPONSE:

a) Calculations for the repair and total loss ratios for Basic Comprehensive Hail Claim Counts Excluding $0 Claims are set out below:

Repair ratio 79% = 1,559 / 1,972

Total Loss ratio 21% = 413 / 1,972

The Corporation selected the ten-year average total claims of 6,817 and applied the ratios to create the repair and total loss claim count forecast.

Repair claim counts 5,388 = 21% * 6,817

Total Loss claim counts 1,429 = 79% * 6,817

b) It is unknown how much the Paintless Dent Repair initiative will actually reduce claim severity in the forecast years. As it is not possible to repair all hail damage through the Paintless Dent Repair process (especially severe hail damage), the initiative may not significantly reduce claim severity in years with higher frequency or high intensity hailstorms. It would therefore be inaccurate to assume that claim severity will remain at 2017 levels going forward. As a result, the Corporation selected a weighted average severity between the two most recent years.

PUB (MPI) 1-49

Part and Chapter:	**IV BMK 4.1 , BMK 4.2**	**Page No.:**	**11, 17**
PUB Approved Issue No:	**11. Operational Benchmarking**		
Topic:	**Corporate and Claims Performance**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please file supplemental tables detailing the MPI data used to calculate each of the benchmarking measures.
b) Please provide the determination of MPI's Benchmarks for 2017/18 and 2018/19, based on the same calculations in (a).
c) Please file the trend analysis report prepared for MPI by Ward Group.

Rationale for Question:

To evaluate the benchmarking information presented and to assess trends.

RESPONSE:

a) Supplemental tables used to calculate benchmarking measures are provided below:

Figure 1: Benchmarking Measures

b) The Ward benchmarking process does not involve future forecasting of any metrics.

The tables in Part IV (i) BMK 4.1 and 4.2 of the 2019 General Rate Application provide performance measures for 2012/13 to 2016/17. The Corporation will provide the performance measures for 2017/18 and 2019/20 as part of the 2020 and 2021 General Rate Applications respectively.

c) [Redacted. The Corporation is seeking confidential treatment for this item]

PUB (MPI) 1-50

Part and Chapter:	**V REV Appendix 3**	**Page No.:**	**3-5**
PUB Approved Issue No:	**15. Results of the Service Fees Review**		
Topic:	**Adequacy of Current Service Fees**		
Sub Topic:	**Comparison of Total Service Fees Charged**		

Preamble to IR (If Any):

The table provides a comparison of the total service fees charged at MPI, SGI, and ICBC.

Question:

a) Please update the table noted in the GRA REV Appendix 3 (comparison of the total service fees charged at MPI, SGI, and ICBC) supplemented with the year the fees were last established.
b) To what extent has MPI performed cost/benefit analysis that relates to insurance service fees recovering costs of that service?

Rationale for Question:

To understand and evaluate an updated version of the comparison table.

RESPONSE:

a) Please see *GRA REV Appendix 2* for the year the fees were established.

b) This information is contained in *Part V Revenues Appendix 3*, identified in the question. The 2nd column identifies the fees recovered for the service and the 3rd, 4th and 5th columns identify the estimates costs associated with performing the

service. Any additional funds collected through a change in service fees would be offset by an equal reduction in funds collected through premiums, and so would have no effect on overall revenue requirement.

PUB (MPI) 1-51

Part and Chapter:	**V DSR.9**	**Page No.:**	**15**
PUB Approved Issue No:	**17. Driver Safety Rating**		
Topic:	**DSR Conclusions and Next Steps**		
Sub Topic:	**Public Consultation Efforts**		

Preamble to IR (If Any):

MPI presently anticipates that, by the 2020 GRA, it will be in a position to report on the results of its public consultation efforts, its preliminary research on the no or low cost options as well as on its decision on whether to proceed with data collection for the higher cost options.

Question:

Please provide the current status of the consultation process including any key dates, who will be engaged to assist, and expected timing of public consultation to take place.

Rationale for Question:

To understand details and receive an update on the next steps for DSR public consultation.

RESPONSE:

The DSR consultation process is in its initial stages and key dates and expected timing of public consultation have not been determined at this time.

PUB (MPI) 1-52

Part and Chapter:	**V VFH.7 Figure VFH-2**	**Page No.:**	**16**
PUB Approved Issue No:	**18. Vehicles for Hire**		
Topic:	**Data Collection – Rate Making**		
Sub Topic:	**Insured VFH Vehicles**		

Preamble to IR (If Any):

Question:

Please update Figure VFH-2 to include the detail on each time band, forecasted take-up vs. actual, and revenue expected to be earned vs. forecasted amounts based on experience to date.

Rationale for Question:

To understand the current status and detail related to VFH and insured VFH vehicles.

RESPONSE:

As of July 9, 2018, the numbers of insured vehicle for hire (VFH) vehicles (all territories) are as follows:

Figure 1 Insured VFH vehicles (all territories)

	Number of Time Bands				
VFH Category	1	2	3	4	**Total**
Accessible	1	1	5	78	**85**
Limo	5	1	0	58	**64**
Passenger	18	16	10	394	**438**
Taxi	2	3	5	536	**546**
Total	**26**	**21**	**20**	**1,066**	**1,133**

The Corporation did not forecast the take-up level for VFH vehicles.

PUB (MPI) 1-53

Part and Chapter:	**V VFH.10**	**Page No.:**	**22**
PUB Approved Issue No:	**18. Vehicle for Hire**		
Topic:	**VFH Stakeholder Engagement**		
Sub Topic:			

Preamble to IR (If Any):

Although discussions between MPI and stakeholders have been substantial to date, they remain ongoing, particularly with those in the taxi and TNC industries.

Question:

Please provide an update on the stakeholder consultation for each of the parties.

Rationale for Question:

To receive an update and understand the ongoing stakeholder discussions and progress.

RESPONSE:

The current status of stakeholder consultations is as follows:

- Taxi Industry Representatives – MPI continues to hold quarterly meetings with the taxi industry representatives, with the most recent meeting taking place on June 29, 2018. Topics of discussion have included loss prevention, insurance and downtime rates, taxi damage estimating and repairs.
- City of Winnipeg – MPI continues to work with the City in relation to information sharing and associated data framework.

- TappCar Inc. – MPI most recently met with the two principle owners of TappCar and their local representative on May 10, 2018. Discussions at this meeting centered on their successes in the Manitoba VFH market.

- Cowboy Taxi Ltd. – MPI has occasional telephone conversations with representatives of Cowboy Taxi to answer questions and obtain feedback. The most recent telephone conversation occurred on April 11, 2018.

- Lyft Inc. - Discussions continue with Lyft on opportunities to enter the Manitoba market and operate within the insurance framework established.

- Uber Technologies Inc. – There have been no recent discussions with Uber Technologies Inc.

PUB (MPI) 1-54

Part and Chapter:	**Part V VFH**	**Page No.:**	**Page 14 of 27 in VFH Appendix 1**
PUB Approved Issue No:	**18. Vehicles for Hire**		
Topic:	**Vehicles for Hire**		
Sub Topic:	**Passenger VFH**		

Preamble to IR (If Any):

Figure 2 provides a Summary of the Corporation's Jurisdictional Review of VFH Premiums

Question:

Please discuss the nature and origin of the information shown in Figure 2 for the "Base Rate" and the "TNC Endorsement", and whether the latter amounts are consistent with full time usage as a VFH.

Rationale for Question:

To assess the reasonableness of the foundation for the proposed Passenger VFH rates.

RESPONSE:

The Corporation reviewed rating models and pricing in Ontario, Alberta and Quebec as, at the time, these were the only jurisdictions in Canada permitting the operation of Transportation Network Companies (TNC). The Corporation contacted insurers and agents/brokers in these jurisdictions to obtain quotes and/or estimates. The TNC endorsement premiums are consistent with the premium for a TNC operator in Manitoba that has selected all four time bands.

PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Spending**		
Sub Topic:			

Preamble to IR (If Any):

MPI's outsourcing costs include a prepayment for future upgrades as part of a 'vitality' clause in the IBM contract, which avoids large single year increases, but presents a higher yearly cost than might be expected.

Question:

a) Please indicate the amount of spending that relates to the vitality clause.
b) Please indicate whether MPI is undertaking an assessment of the competitiveness of the outsourcing and maintenance agreement.
c) Please indicate what true-ups are done to determine any upgrades applied against the amounts determined to be pre-paid under the vitality clause.
d) Please provide the current term of the existing IBM contract.

Rationale for Question:

To understand third party IT vendor costs.

RESPONSE:

[Redacted. The Corporation is seeking confidential treatment for this response.]

PUB (MPI) 1-56

Part and Chapter:	**IV BMK Attachment A**	**Page No.:**	**PDF.14**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Spending**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please explain why the average cost per blended FTE increased from $72,103 in 2015/16 to $95,569 in 2016/17.
b) What analysis is prepared by MPI to determine insource versus outsource of IT functions when it relates to the IT functions that MPI has outsourced?
c) In near future years, the consultants appear to be fixed at 80%. Please explain further the rationale for the constant level.

Rationale for Question:

To understand changes in IT FTE costs.

RESPONSE:

a) In the review of the 2016/17 Infrastructure and Operations scorecard, it was identified that several resources were allocated to Infrastructure and Operations (MPI team) which were not part of the Infrastructure and Operations function (as defined by Gartner). In review of *BMK Attachment A, PDF Page 14* (left chart) you can see how this resulted in a reduction of 52.3 staff in 2015/16 to 35.7 staff in 2016/17. This affected the cost per FTE (right chart) as some of the FTEs that were removed from Infrastructure and Operations, and accounted for in other

areas (such as Security or Application Development / Support) had a lower cost. This is the major factor for the increase in cost per blended FTE from 2015/16 to 2016/17.

For consideration, Infrastructure and Operations is a subset of the overall CIO and Budget score card. This incorrect allocation of resources (between Infrastructure and Operations and other areas) would not impact the overall IT staff counts or cost metrics in the budget score card.

b) As part of the Value Management process, MPI creates business cases to support major change such as the outsourcing of an IT function. The Value Management process outlines the documentation required to support the decision. Please see *CAC (MPI) 1-63 (c)* for additional actions on current agreements. Please see 2017 GRA (Information Technology – IT), IT.1 for details on the usage of consultants.

c) This response assumes the question refers to the following quote: "MPI has embraced outsourcing for 8 of 10 I&O functions … ". These 8 I&O functions are received as part of the IBM data center agreement and are consistent over the duration of that agreement.

Part and Chapter:	**IV VM.1.1**	**Page No.:**	**9**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**Information Security Risk Management**		
Sub Topic:			

Preamble to IR (If Any):

Question:

Please provide the Board the Information Security Risk Management Projects including the timing of the associated spending and the cost of each initiative, and if necessary, with a request for confidentiality under Rule 13.

Rationale for Question:

To assess the reasonableness of IT Capital Spending.

RESPONSE:

The following project details were redacted from the Technology Risk Management Initiatives (2018/19) – Value Management Chapter, VM 1.1, page 9. Upon further review, the following information can be partially disclosed to the public, and it has also been provided as part of CAC (MPI)-1-56. Redactions bellow:

Project	**ITBT-2018-010 ITSM Identity and Access Management Self Service Password Reset Management**
Automate common password requests, providing a secure, self-service, password reset solution for requests which are traditionally handled by the MPI IT Service Desk.	

Project	ITBT-2018-025 Data Loss Prevention (DLP)
Implement information security improvements recommended in a 2017/18 DLP strategy, 2018/19 efforts will focus on: • Creation of an implementation and Organizational Change Management strategy for data tagging and classification • Roll-out of the tagging and classification solution to the organization • Creation of an implementation and Organizational Change Management strategy for DLP	
Project	**ITBT-2018-035 Network and Perimeter Security Enhancement**
Review and enhance current network protection processes and technologies with a focus on network and perimeter network security to protect MPI from current, emerging, and future threats. [Redacted. The corporation is seeking confidential treatment for this content].	
Project	**ITBT-2018-043 Security Awareness Activities for Brokers and Partners**
Formalize a Security Awareness Training Program for Brokers and Partners focused on raising awareness around securing and proper handling of MPI / client information as per industry best practices.	
Project	**ITBT-2018-045 Forensics and Vulnerability Assessment**
Acquire and implement tools and processes to enhance workstation forensics capabilities within MPI. Such tools include the ability to examine IT assets using forensics tools. Expand vulnerability assessments and penetration testing against MPI's Internet facing applications (ethical hacking) in order to identity weaknesses requiring remediation.	
Project	**ITBT-2018-046 Workstation Security Enhancement**
Enhance the workstation security through the implementation of a threat analytics software (second generation anti-virus technology) that provides the intelligence to learn, analyze, and identify normal and suspicious user or device behavior. Review the local administrative privileges on workstations in order to develop an approach to address associated risks.

PUB (MPI) 1-58

Part and Chapter:	**IV VM.1.2**	**Page No.:**	**12**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**Legacy Systems Modernization**		
Sub Topic:			

Preamble to IR (If Any):

MPI identified in the 2018 GRA that there are concerns regarding IT legacy systems, which are 20 to 30 years old. Replacing these systems could potentially have significant costs. On direction from its Board, Management retained two industry consultants to complete independent assessments of the MPI legacy system risks and to confirm the need for future action to mitigate the associated technical and business risks.

According to the proposed timeline for the project, vendor presentations were to occur in June and September.

Question:

a) Please provide details of the consultants engaged related to the independent assessment of MPI legacy systems.
b) Please file the respective consultants' reports/ presentations and/or resulting business cases dealing with legacy system issues, including details on each of the consultants' responses to the each of the mandate scope established for the project.
c) Please file any internal analysis that was prepared to support the consultants' reports or internally assess the AOL/ CARS replacement.

Rationale for Question:

To understand assessment performed of legacy systems.

RESPONSE:

a) [Redacted: The Corporation is seeking confidential treatment for this response.]

b) Development of the Legacy Modernization business case is still in early stages, and only Deloitte has completed its high level assessment report.

[Attachment A Redacted: The Corporation is seeking confidential treatment for this response.]

c) The Corporation provided background material to both Assessment Vendors but they requested no internal analysis and the Corporation did not prepare any for the assessment engagements. The Assessment Vendors were responsible for performing their own analysis.

PUB (MPI) 1-59

Part and Chapter:	**IV VM.1.4**	**Page No.:**	**23**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**Customer Self-Service – Phase 1, 2 and 3**		
Sub Topic:			

Preamble to IR (If Any):

Until a critical mass of over 300,000 users is met, the portal licensing is an operational costs driver. Once the 300,000 users threshold is reached, surpassed and maintained. The financial benefits of available customer self-serve services opposite the user licensing costs will be more financially viable.

Question:

a) Is there concern that this number will not be met, factoring in marketing costs to get users to use the portal?
b) How many transactions are processed in a year that could be potentially addressed by the self-service component, and what percentage would 300,000 users represent of that total? Please elaborate and provide supporting details where possible in the response.

Rationale for Question:

To understand the details of the cost/benefit analysis related to customer-self services.

RESPONSE:

[Redacted. The Corporation is seeking confidential treatment for this response.]

PUB (MPI) 1-60

Part and Chapter:	**IV VM.1.6**	**Page No.:**	**24-25**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**Credit Card Strategy**		
Sub Topic:			

Preamble to IR (If Any):

A funding envelope for the Credit Card Strategy was approved in the 2018/19 Capital Budget based upon a particular solution. An alternative, less costly, solution is presently being considered. Management is targeting a completed business case by the Fall 2018.

Question:

Please provide the referenced business case once completed (i.e. credit cards / credit card strategy).

Rationale for Question:

To obtain and understand the details from the business case as they apply to the credit card strategy.

RESPONSE:

MPI will provide the business case once it is completed. Please note that this business case may require confidential filing, but MPI will not know for certain until the document is finalized.

PUB (MPI) 1-61

Part and Chapter:	**IV VM.2**	**Page No.:**	**29-32**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**MPI's Cost Benefit Analysis of Customer Claims Reporting System (CCRS)**		
Sub Topic:			

Preamble to IR (If Any):

The Board of Directors directed the Value Management Process be applied to a number of these projects. Based upon the results, Management cancelled the Customer Claims Reporting System (CCRS) initiative.

Question:

a) Please file the detailed cost benefit financial analysis in support of the incremental, life cycle and terminate project perspective.
b) Please explain what was evaluated and determined to be "lite" scope and "full" scope of the CSSR project. Please describe the business solution in terms of lite and full scope.
c) Please provide any further financial analysis that was prepared to support the decision to cancel the CSSR, which has not been provided in the Application.
d) Please provide the amounts written off by major component, including detail of the spending by year, which formed part of the total impairment amount.

Rationale for Question:

To better understand analysis performed on CCSR initiative.

RESPONSE:

[Redacted. The Corporation is seeking confidential treatment for this response]

PUB (MPI) 1-62

Part and Chapter:	**IV VM.3**	**Page No.:**	**41**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**PDR Project**		
Sub Topic:	**IT Expenses**		

Preamble to IR (If Any):

Question:

a) Please update the Updated PDR NPV Analysis table including the NPV for PDR from Gartner last year, including the discount rate used by Gartner.
b) Please provide details of the project costs and ongoing costs, and provide a comparison with those costs forecast at the last GRA.
c) Please provide the detailed schedules supporting the NPV analysis this year.

Rationale for Question:

To understand changes in the cost benefit analysis related to PDR.

RESPONSE:

[Redacted. The Corporation is seeking confidential treatment for this response]

PUB (MPI) 1-63

Part and Chapter:	**IV VM.3**	**Page No.:**	**41**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**Deferred Development Costs**		
Sub Topic:	**Impaired Deferred Development Cost**		

Preamble to IR (If Any):

Question:

a) Please provide supporting documents for the $20.3M impairment of Deferred Development costs, including working paper files, business case and any analysis performed, as well as details of impairment amount per each project.
b) Please provide detail of the spending by year on each cancelled PDR project.

Rationale for Question:

To understand the impairment analysis performed.

RESPONSE:

a) During the year, the various components of key projects were reviewed in more detail and the following principles (standard practice) were applied to them:

- If there is no future value of the expenditures, then the expenditures were written off
- If the expenditures were research related, then the expenditures were written off
- If the expenditures were to investigate a platform/software that the company did not go forward with, then the expenditures were written off

The result of the review is outlined in the table below. Please see table below:

Figure 1: Impairment of Deferred Development Costs

PUB (MPI) 1-64

Part and Chapter:	**IV VM Appendix 2a**	**Page No.:**	**5**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**HSDE Business Case**		
Sub Topic:	**Cost Benefit Analysis**		

Preamble to IR (If Any):

MPI has provided a business case for the High School Driver Education (HSDE) Project and indicates a measurable financial benefit of a better prepared driver will result in a reduction of at-fault claims. MPI has stated an increase in supervised practice from 24 to 45 hours is estimated to decrease collision claim risk by two percent (2%) and is supported by evidence as an anticipated outcome for this project.

Question:

a) Please file PD and BI forecast Analysis - HSDE dynamic model vers3.xlsx and explain the forecast level of savings anticipated from the HSDE project.
b) Please file the PD and BI historical - HSDE at-fault claims and costs.
c) Please explain how the Corporation determined a targeted 2% improvement.
d) Please explain why MPI applied a 5% annual increase to claims severity for the years 2021/22 through 2029/30.
e) Please explain how a reduction in 3,000 second attempt in road tests leads to a reduction of 2 FTE.

Rationale for Question:

To understand the forecast of benefits from the HSDE program redesign.

RESPONSE:

a) PD and BI forecast Analysis – HSDE dynamic model vers3.xlsx consists of 20 separate worksheets that forecast PD and BI savings based on changing at-fault claim reduction assumptions from one to 10 percent. VM Appendix 2b (2% PD BI claims forecasting) and VM Appendix 2c (5% PD BI claims forecasting) represent the relevant excerpts of the PD and BI forecast Analysis – HSDE dynamic model vers3.xlsx file.

The forecast level of savings are based on attaining a two or five percent (2% or 5%) improvement in the rate of at-fault claims frequency for drivers who will complete Driver Z (the new program). The calculations as detailed in Appendix 2b and 2c are based on historical at-fault claims experience and related average claim costs for drivers between the ages of 15 to 24 who have previously participated in the High School Drivers Education program.

b) Please see Appendix 1 - PD and BI historical - HSDE at-fault claims and costs

c) The two percent (2%) improvement in the rate of at-fault claims frequency is a best estimate by management based on available evidence of collision reductions associated with the practices and methods that will be incorporated in the new program. Research conducted on the topic of Driver Education, including the "Global Analysis of Emerging, Promising and Best Practices in Driver Education" report conducted by the American Driver and Traffic Safety Education Association for the Corporation in 2013, found that increasing pre-licensing training hours correlates to reductions in automobile accidents. In addition, the Insurance Institute for Highway Safety has quantified the expected change in collision claims and fatal crashes associated with increasing supervised practice hours of driving.

Redesigning the curriculum to focus on the chief factors behind motor vehicle crashes among youth (visual search, hazard detection, speed adjustment, space management, risk perception, traffic safety culture and pro-social driver behaviour) is also anticipated to garner improved collision frequency outcomes.

It is the Corporation's belief that higher order learning methodologies, a focused curriculum on the root and practical causes of collisions, and greater requirements for on-road practice in different conditions will, by extension, produce an improvement in a tangible measurement of at-fault claims. Management will monitor results of this key performance measurement on an annual basis to quantify claims cost savings. Many other factors external to driver education may impact driver behaviour and risk in future (for example the use of personal communication devices or legalization of cannabis); therefore, the Corporation has taken a relatively conservative approach to estimating on the claims improvement front.

While the key benefit drivers for the new HSDE program initiative are primarily focused on delivering exceptional service and product given today's audience, it was important to determine if there would also be a measurable financial benefit for Manitobans. The two-five percent (2% to 5%) improvement in the rate of frequency of at-fault claims for drivers completing the new HSDE program represents such a benefit that we hope to achieve.

d) The five percent (5%) annual increase in claims severity is consistent with the Corporation's claim forecasting results.

e) The FTE reduction estimate assumes that a volume decrease of 1,500 road tests annually will result in enough additional system capacity to trigger one FTE saving. A Driver Examiner's annual capacity for testing can ran range from 400 to 1,000 road tests per year (dependent on multiple considerations, including travel time). By improving the first attempt pass rate we are reducing the number of second, third and, in some cases, multiple road tests that are currently demanded by novice drivers. It is important to note that an improvement in the first attempt pass rate will eliminate the need for road tests spread over multiple locations, hence a full FTE reduction will not be achievable until a decrease significantly exceeds annual capacity; therefore the FTE reduction calculation is conservative.

Total value of all at-fault claims for HSDE drivers in the 15-24 year old age range*

***There was a huge increase of incurred in 2016 as there is an open claim with $490K paid amount* and $4.3M in reserve amount (making the incurred $4.8M)

The definition of an HSDE Customer for this analysis is:

1. Students who passed In-Car and In-Class portion of the course
2. Age 15-24 years of age with Class 5 Learners
3. Removed students with "Dropped Out", "Cancelled" and "Unregistered" status.

PUB (MPI) 1-65

Part and Chapter:	**IV VM Appendix 6; PUB (MPI) I-34 (2018 GRA)**	**Page No.:**	**1-26**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**PDR Project**		
Sub Topic:	**IT Expenses**		

Preamble to IR (If Any):

At last year's GRA, MPI provided a Cost/Benefit analysis of the PDR program which indicated a Net Present Value for the Project of $13.5 million. The analysis was provided in response to PUB/MPI I-34 (2018 GRA).

Question:

a) Please provide an update to MPI Exhibit #33, providing a comparison of the forecast staff reductions associated with the PDR and the related change in forecast cost savings.
b) Please explain why MPI is forecasting higher levels of Internal Efficiencies/Process Improvements in 2017/18 through 2019/20 this year versus what was forecast by Gartner last year.
c) Please provide detailed calculations supporting the amounts forecast for reduction in benefits, by program component evaluation.
d) Please explain the changes in the marketplace and trade negotiation forecast behind the major reduction in benefits for Loss of Use.
e) Please provide an explanation of the forecast benefit for Claim Audit Recoveries.

Rationale for Question:

To understand the changes in benefits related to PDR.

RESPONSE:

a) See Below

Figure 1: PDR FTE Reductions Forecast

	FY 2017/18	FY 2018/19	FY 2019/20	FY 2020/21	FY 2021/22
PDR FTE Reductions (2018 GRA - MPI exhibit #33)	0	13	19	23	9
PDR FTE Reductions (2018 PDR Analysis & forecast)	3	10	16	21	0

b) In preparing the 2018 PDR financial analysis, the Corporation categorized the updated benefit streams in a manner consistent with the Gartner 2017 PDR evaluation, to ensure a valid comparison. The new claims audit recoveries benefits stream (as described in "e)" below) was not originally forecasted in the most current PDR financial analysis. It is however, an operational realization of the model and focuses on estimate audits. The remainder of the internal efficiencies variance is depicted in a) above with respect to future PDR FTE reductions.

c) Please see *PUB(MPI) 1-62 (c)*

d) Please see *PUB(MPI) 1-69 (d)*

e) The claims audit recoveries are claims costs which are reduced due to audits performed by the claims audit unit. These audit recoveries are claims expenses that would have otherwise been incurred and flowed through to overall claims costs. Initially, incremental claim expense recoveries were not anticipated in the creation of the Center of Excellence. The associated claims expense reductions are a byproduct of the unit's efforts and is therefore attributable as a value benefits stream for PDR.

PUB (MPI) 1-66

Part and Chapter:	**IV VM Appendix 6**	**Page No.:**	**VM Appendix 6**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**PDR**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) For each of the lessons learned in the PDR project, please indicate what specific changes have been made to improve the project evaluation process.

b) How has MPI incorporated changes to incorporate future software licensing, maintenance and operational support resource expenses are properly forecast? In particular, with respect to PDR, what changes were incorporated?

c) What project contingency was used in the PDR? Please describe the changes in project contingency that were incorporated in the evaluation of the PDR project.

d) Please provide the sensitivity analysis that has been performed on benefit streams in evaluating the PDR.

Rationale for Question:

To understand changes in project evaluation.

RESPONSE:

a) The Corporation has recently made very broad changes with respect to Value Management assessment and realization, project delivery governance and is more actively engaging with MPI business stakeholders as key business owners for corporate initiatives. For further information, please see *2018 GRA Volume I Value Management* and 2019 GRA Volume IV Value Management and CAC 1-031 b) for details on the BTO Project Delivery approach, methodology and governance.

Lesson Learned

- Large capital programs like PDR should have iterative business cases with no longer than 3-year project funding/value management period assessments

Actions

- Active engagement (review, approval) of Value Management Office in development of business cases
- Active engagement of business operations in development of business cases
- Formal application of BTO project 'gating' checkpoints and controls

Lesson Learned

- Future software licensing, maintenance and operational support resource expenses need to be properly forecasted and included in financial analysis

Actions

- Active engagement (review, approval) of Value Management Office in development of business cases
- Active engagement of IT operations and Enterprise Systems Support in the review of business case development

Lesson Learned

- Appropriate Discount Rate needs to be applied to financial analysis based on project risk

Actions

- Active engagement (review, approval) of Value Management Office in development of business cases
- Value Management Office has formalized a framework for the application of appropriate discount rates in business cases – See 2019 GRA Volume IV Value Management Appendix 7

Lesson Learned

- Appropriate project contingency percentages need to be incorporated into project cost estimates based on project risks and updated annually based on findings/realizations

Actions

- Active engagement (review, approval) of Value Management Office in development of business cases
- Active engagement of business operations in development of business cases
- Formal application of BTO project 'gating' checkpoints and controls and ongoing reviews of project budget forecast and risks

Lessons Learned

- A sensitivity analysis should be performed with respect to benefit stream projections

Actions

- Active engagement (review, approval) of Value Management Office in development of business cases
  - Include optimistic, realistic and pessimistic modeling of business stream benefits and costs aspects of the business case.
  - Discount rate sensitivity analysis as further explained in d) below.
- Active engagement of business operations in development of business cases

b) As per a) above

c) A project contingency of 20% was utilized as part of the estimating of each major PDR program component. No changes in project contingency were exercised during the execution of the PDR program. In evaluating the NPV and/or financial viability of PDR program components, it was assumed that project contingency would be utilized as part of the program spend.

d) The following sensitivity analyses parameters and scenario analyses were performed in evaluating the PDR program:

- NPV discount rate
- Cash flow (# of years) analysis
- Direct Repair premium paid to repair shops
- Direct Repair % of claims
- Parts – alternative parts utilization rates
- Loss of Use – Daily Allocation Factor (DAF) rates
- Predictive Analytics – loss prevention claims costs impacts and/or recoveries
- Labour rate differentials
- Mitchell licensing MPI vs. shop funded
- Customer Claims Reporting System (CCRS)
  - Customer adoption rates
  - Staff productivity gains
  - Scope alternative “lite” vs. “full”

The results of the sensitivity analysis for the PDR project in terms of discount rates of 6.5% and 9.5% as well as the impact of the cash flow analysis for the 10, 15 and 20 Cost/Benefit years are reported on page 41 of Part IV (ii) Value Management Chapter in the 2019 GRA. Similarly for the CCRS project sensitivity analysis results are reported on page 31 and 32 of said chapter. The supporting documents for the NPV calculations of the PDR project as a whole as well as the CCRS project have been submitted in the confidential filing of responses to PUB (MPI) 1-62 and 1-61 respectively.

PUB (MPI) 1-67

Part and Chapter:	**IV VM Appendix 6**	**Page No.:**	**3**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Spending**		
Sub Topic:	**PDR**		

Preamble to IR (If Any):

Question:

a) Please file the MPI Management presentation regarding the PDR Program to the MPI Board of Directors (dated April 19, 2018) which restated the PDR cost and benefit projections.
b) Please elaborate on the aspects of the agreements in place that limited the Corporation in achieving projected benefits.

Rationale for Question:

To understand changes in PDR project costs.

RESPONSE:

a) [Appendix 1 Redacted. The Corporation is seeking confidential treatment for this response]

b) The Corporation understands this question to pertain to overall net present value impact from agreements in place. While the projected benefits were not limited by the agreements in place, the costs of implementing PDR processes were impacted greatly by two key agreements. The first is the agreement made with the repair shop network in Manitoba that established an $81 premium payable for all claims

processed by a Direct Repair designated shop. This premium applied to all claims done by that shop, not just Direct Repair claims. The Corporation is currently negotiating a new compensation agreement with the repair community effective March 1, 2019. This new agreement will correct this issue, as industry standard is not to pay a premium for this type of estimating service. The second agreement that reduced the PDR net present value was the Mitchell licencing agreement for Collaborative Estimating. This was not included in the economic evaluation of PDR and should have been from the beginning. However, Mitchell estimating software is an industry standard tool for auto insurance and repair networks. Please see PUB (MPI) 1-062 Appendix 2 for Mitchell Licensing cost details.

PUB (MPI) 1-68

Part and Chapter:	**IV VM Appendix 6**	**Page No.:**	**4**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Spending**		
Sub Topic:	**PDR**		

Preamble to IR (If Any):

Question:

a) Please identify which costs were excluded from the NPV analysis that was prepared by Gartner last year.
b) Please identify and quantify the changed view on benefits from the project. Provide supporting assumptions behind the changed view.

Rationale for Question:

To understand changes in the PDR business case cost/benefit analysis.

RESPONSE:

a) Please see *PUB(MPI) 1-62 Appendix 1-8* for details. The primary categories of costs which were not included in the NPV analysis prepared by Gartner last year include:

- Direct Repair Operations
- Direct Repair Premium
- Mitchell software licensing
- CCRS software licensing
- Partner Portal software licensing

- Car Part software licensing
- Predictive Analytics software licensing and operations

b) Please refer to *Part IV Value Management Figure VM-1*, and the accompanying commentary.

PUB (MPI) 1-69

Part and Chapter:	**IV VM Appendix 6**	**Page No.:**	**4**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Spending**		
Sub Topic:	**PDR**		

Preamble to IR (If Any):

Gartner has reviewed the latest iteration of the PDR Value Management/Business Case data and related assumptions. It would appear that MPI has followed the advice provided by Gartner and applied a more rigorous approach to the PDR business case and application of the Value Management framework.

Question:

a) Please file as a document in this proceeding the Gartner prepared Cost / Benefit Analysis presented at the 2018 GRA.
b) Please indicate who was responsible for the preparation of the Gartner PDR report filed in the 2018 GRA and the report filed in this GRA.
c) Please indicate when the agreement with the repair shops was entered into and explain why Gartner did not review the agreement to inform its 2017 Cost / Benefit Analysis.
d) Please provide the underlying support for the Loss of Use Benefit forecast last year. Please explain what could not be negotiated with repair shops.

Rationale for Question:

To understand changes in the cost/benefit analysis for PDR.

RESPONSE:

a) In 2017, the program was showing a lengthy payback period, an Internal Rate of Return of 7% and a Net Present Value of $13.7M (using a 3% cost of capital), over the period from inception (2010/11) until 10 years after go-live when benefits start to accrue in 2016/17.

Gartner 2017 Analysis

Fiscal Year	Year 1 Actual 2010/11	Year 2 Actual 2011/12	Year 3 Actual 2012/13	Year 4 Actual 2013/14	Year 5 Actual 2014/15	Year 6 Actual 2015/16	Year 7 Actual 2016/17	Year 8 Forecast 2017/18	Year 9 Forecast 2018/19	Year 10 Forecast 2019/20	Year 11 Forecast 2020/21	Year 12 Forecast 2021/22
Benefits							$ 1,120	$ 4,280	$ 5,250	$ 7,970	$ 11,970	$ 13,650
Cost												
Actual and Forecast	$ 40	$ 1,346	$ 3,788	$ 11,831	$ 8,550	$ 7,304	$ 10,476	$ 9,790	$ 6,847	$ 1,547		
Unallocated Budget										$ 3,965		
Total	$ (40)	$ (1,346)	$ (3,788)	$(11,831)	$ (8,550)	$ (7,304)	$ (9,356)	$ (5,510)	$ (1,597)	$ 2,458	$ 11,970	$ 13,650

b) Martin Geffen, Vice President, Gartner Canada Co., authored the 2018 GRA Gartner PDR report. Charles (Chuck) Henry, Vice President, Solution & Pricing, authored the 2019 GRA Gartner PDR report with quality assurance provided by Mr. Geffen and Rand Guy, Senior Managing Partner, Western Canada Energy & Public Sector.

c) The Repair Shop Agreement came into effect on March 1, 2017 and expires on February 28, 2019. The Corporation did not share the repair shop agreement because it did not see the relevance in assessing the PDR program execution. The relevant aspects of the agreement however have been shared with Gartner (i.e. Direct Repair $81 premium, agreement duration, shop KPI's, qualification criterion, claim types eligible)

d) The Loss of Use (LOU) benefit stream projections assume that the Corporation and Manitoba repair shops will agree to transition from the 'touch time' Loss of Use allocation model to the more industry-prevalent Daily Allocation Formula (DAF) model. The DAF model presents an opportunity for repair shops to self-manage LOU expenses and incentivizes them to manage the repair process efficiently. At

this time, the transition remains under review and is the subject of ongoing negotiations with Manitoba repair shops. So as to not prejudice negotiations, and given the low likelihood of this benefits stream being realized, the Corporation removed the forecasted benefits from the 2018 PDR financial analysis.

Part and Chapter:	**IV VM Appendix 6**	**Page No.:**	**11**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Expenses**		
Sub Topic:	**PDR Project**		

Preamble to IR (If Any):

Question:

a) Please provide details the termination cost of $10.2 million.
b) Please provide the detail of the $16.08 million spent on the CCRS.
c) Please reconcile the difference between the spending used in the “go” vs. “no-go” analysis at $9.6M vs. $16.08M indicated by Gartner at March 31, 2018.

Rationale for Question:

To understand the details of the impairment charge for IT expenditures.

RESPONSE:

a) Please see PUB(MPI) 1-61 (d)

b) See table below:

Figure 1: Customer Claims Reporting System Cost Breakdown

Line No.	CCRS Cost Breakdown	LTD March 30, 2018
1	*(C$000s, except where noted)*	
2	Compensation	836
3	External Labour	12,633
4	Software	2,601
5	Miscellaneous	7
6	Travel	5
7	**Total CCRS**	**16,082**

c) The $9.6M referenced was the projected remaining spend for the CCRS project, whereas the $16.08M was the spend to-date (at March 31, 2018) on the CCRS project.

PUB (MPI) 1-71

Part and Chapter:	**IV VM Appendix 7**	**Page No.:**	**1-7**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**Capital Project Evaluation**		
Sub Topic:	**Impaired Securities**		

Preamble to IR (If Any):

MPI utilized a 9.5% discount rate in evaluation of the Cost Benefit of the Customer Claims Reporting System (CCRS) project. In establishing the 9.5% discount rate, MPI noted:

Using the industry average as a hurdle rate will encourage competitive decision making that is comparable to that in the private sector. There is an associated risk that will exist if the Corporation is attempting to meet its social mandate while trying to make decisions using a private sector hurdle rate.

Question:

a) Why was the CCRS project considered high risk?
b) Please indicate where other Corporations apply a similar high discount rate for internal IT projects.
c) Please explain what costs were excluded from the Net Present Value analysis.
d) Please provide the cost benefit analysis for the proposed solution to replace the CCRS.

Rationale for Question:

To understand CCRS framework.

RESPONSE:

a) The CCRS project was considered high risk because of the significant amount of innovation it required and because:

- it involved the development of a new online application to address sophisticated technical requirements not previously offered by the insurance industry, namely the automation of the adjudication claims process using pictures and not text scans;
- it required partnership with a vendor (Mitchell) with no prior experience in this field;
- of uncertainty regarding customer acceptance of the delivered product; and
- the forecasted benefits relied on assumptions regarding significant FTE reductions that were dependent on customer adoption rates and customer acceptance of the automated claims liability assessment provided which would have been 'innovative' in the industry at this time.

b) The Corporation did not classify the project as a purely "internal" IT project. As previously mentioned, Mitchell and other vendors contributed significantly to the development of the CCRS application. However, it is common financial practice to apply a discount rate for all projects a company may pursue, additionally it is common for private enterprises to use discount rates in excess of 10% given their shareholder return expectations and costs of capital. Given the level of identified risk and using the Corporation's discount rate methodology, it deemed the 9.5% rate appropriate. If the Corporation runs a low risk project in the future, it will assign it a lower discount rate following this logic. The rational for discount rate selection on projects going forward is provided in *VM Appendix 7*.

c) The NPV calculation for CCRS does not include $5,306,060 in costs that were incurred from 2012/13 to 2015/16 that were written off in 2018. The Corporation incurred these costs with Fineos in the early development of the Optimized

Adjusting project and should have been categorized separately from CCRS. All other relevant costs are included in this calculation.

d) There is no proposed solution to replace CCRS for online claims service at this time. The insurance industry is testing the ability to scan a customer's free-form text description of the accident and assign a liability score based on that information. As outlined in *IT Appendix 2*, the Corporation prefers to adopt proven mainstream technology in lieu of innovating new technology (essentially following best in class innovations to ensure they work efficiently, before offering them in Manitoba). In the interim, given customer demand, the Corporation will focus its attention on moving other service elements online.

PUB (MPI) 1-72

Part and Chapter:	**IV IT**	**Page No.:**	
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Management**

Preamble to IR (If Any):

Question:

a) Please file an update to PUB/MPI I-29 Appendix 1 and I-29 (c) from the 2018 GRA.

b) Please file an update to PUB/MPI 2-16 (a) & (b) from the 2018 GRA.

Rationale for Question:

To provide an update on project status.

RESPONSE:

[Redacted. The Corporation is seeking confidential treatment of this response].

PUB (MPI) 1-73

Part and Chapter:	**IV IT Appendix 2**	**Page No.:**	**4**
PUB Approved Issue No:	**19. Current IT Strategic Plan and IT Expenses and Projects**		
Topic:	**IT Strategy**		
Sub Topic:			

Preamble to IR (If Any):

Question:

What is the impact on staffing, processes, technology and cost of the new IT Strategy.

Rationale for Question:

To understand the impact of the new IT Strategy on the Corporation.

RESPONSE:

The financial and staffing impact of the IT strategy is included as part of the budgeting process and Value Management process (via individual business cases).

From a process perspective, there will be ongoing growth and improvement in business capabilities such as self-service to customers, driver education programming, financial reporting, and physical damage controls. These will be delivered through related projects (with associated business cases).

From a technology perspective, the future direction will be significantly influenced by the outcome of the Legacy Modernization Assessment. In the interim, initiatives will leverage / build upon pre-existing software solutions.

PUB (MPI) 1-74

e) MPI's decision to cancel the Customer Claims Reports System (CCRS) project resulted in 8 consultants being released from the MPI account and the reassignment of the remaining 17 consultant resources to new corporate or operational projects based on project resource requirements. The decision also decreased the number of external consultants added to the MPI account to initiate new projects in the corporate project portfolio.

PUB (MPI) 1-76

Part and Chapter:	**Part V RM**	**Page No.:**	**31 of 58**
PUB Approved Issue No:	**20. Capital Maintenance Provision** **2. Rate Indication**		
Topic:	**Capital Maintenance Provision**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please provide supporting documentation for the estimated Capital Maintenance Provision of 3.3%, which the Corporation defines as" *the required rate change to maintain capital adequacy in fiscal year 2019/20.* Please include a detailed derivation of the MCT ratios as fiscal year-ends 2018/19 and 2019/20 (before application of the CMP), including commentary on any significant differences causing a shift in the MCT ratio.

b) Please provide supporting documentation for the comparably derived Capital Maintenance Provisions for each year over the forecast period, with accompanying commentary on any observed changes or patterns starting from the 3.3% assumption used in the Application.

c) From what the Corporation knows of past and current practices followed by Saskatchewan Auto Fund in deriving its Capital Maintenance Provision, how does the Corporation's proposed approach compare?

d) Please prepare an estimated Capital Maintenance Provision, with supporting documentation, following the approach currently in use by Saskatchewan Auto Fund, suitably adapted to Manitoba's Basic Insurance program.

e) Please prepare an alternate overall rate indication, with supporting documentation, incorporating the results from part d) above.

f) Please prepare an alternate overall rate indication, with supporting documentation, incorporating the results from part d) above and the Board approved 50/50 interest rate forecast.

g) The Corporation states: *The Corporation is also in the process of developing a Capital Maintenance Plan, which may result in Capital Build and Release adjustments to the assumed base forecast in future year.* [RSR.4.5.1.1] Please describe the nature and purpose of a Capital Build and Release Provision in a rate setting context, and how this may be adapted to work with a Basic Total Equity target capital range.

Rationale for Question:

To assess the reasonableness of the proposed approach to estimating the Capital Maintenance Provision.

RESPONSE:

a) Please refer to *Appendix 1,* which shows the detailed derivation of the MCT ratios after applying the different required rate changes described in *Part V, Ratemaking, pages 30 and 31.*

The Corporation's approach to determining the Net Capital Maintenance Provision (CMP) is straightforward. Per *Part V, Ratemaking, page 30*, "*…the Net CMP ensures that the Minimum Capital Test (MCT) ratio… at fiscal year-end 2019/20 is unchanged from fiscal year-end 2018/19."* Per Figure 1, the MCT ratio at fiscal year-end 2019/20 based on breakeven rates is 63.5%. As such, a Net CMP equal to an additional 2.1% required overall rate increase is necessary to make the MCT ratio at fiscal year-end 2019/20 equal to 69.5% (i.e. the same MCT ratio as it was in the fiscal year-end 2018/19).

Per *Part V, Ratemaking, page 31*, "*The Net CMP of 2.1% is comprised of a 1.2% decrease in the required rate change from the investment income earned on the Rate Stabilization Reserve (RSR), offset by a 3.3% increase in the required rate change to maintain capital adequacy in fiscal year 2019/20.*" 3.3% is simply the

difference between the increase of 2.1% from the Net CMP and the decrease of 1.2% from the investment income earned on the RSR.

In respect of capital adequacy, per *Part V, Ratemaking, page 30*, "*The Net CMP is required to maintain capital adequacy in fiscal year 2019/20.*" (i.e. the increase of 2.1% from the Net CMP is required to maintain capital adequacy).

b) Per *Part V, ProFormas, page 6*, based on breakeven rates, including the Net CMP (of 2.1%), the MCT Ratio remains consistently at 70% over the forecast period except for fiscal year 2022/23. As such, no *additional* Net CMP is required for the rating years 2020/21 and 2021/22, assuming that the required overall rate changes for those two rating years is zero. For 2022/23, assuming that the required overall rate change is zero, an *additional* Net CMP rate increase of 1.2%is required.

The rates sought in 2019/20 include a 2.1% Net CMP. The Corporation assumed that this Net CMP amount would remain in the base rates over the forecast period. MPI will however recalculate the Net CMP in each GRA.

c) The Corporation's approach to capital maintenance increases available capital by the amount required to maintain the MCT ratio (i.e. 2019/20 MCT ratio = 2018/19 MCT ratio). In contrast, SAF's approach increases capital available based on the long-term average growth in capital required. The Corporation's approach charges current year policyholders for the cost of capital maintenance in the rating period, rather than basing this charge on the experience of the prior year.

d) Please refer to *DCAT Appendix 1, page 4*. Applying SAF's approach, the long-term annual growth in capital required is 5.98% [= ((382,621 / 303,315) ^ (1/4)) - 1]. This requires a Net CMP of $18.1M [= 303,315 * 5.98%], which is equal to an additional 1.8% required rate increase (compared to 2.1% per MPI's proposed approach).

e) See the response to (d) above.

f) Please see *Appendix 2* to this IR. Applying SAF's approach, the long-term annual growth in capital required is 6.03% [= ((381,891 / 302,191) ^ (1/4)) - 1]. This requires a Net Capital Maintenance Provision of $18.2M [= 302,191 * 6.03%], which equals an additional 1.8% required rate increase (compared to 1.7% per *PUB (MPI) 1-3(d)*).

g) On the assumption the Corporation and the PUB can agree on the methodology for the lower and upper RSR targets; the Corporation would expect the Capital Management Plan to act as follows:

1. Calculate the lower and upper RSR targets *before* the inclusion of any capital adjustments (i.e. 34% to 85% MCT for 2019/20 GRA).

2. Calculate the overall Basic rate indication based on Accepted Actuarial Practice (i.e. e.g. +0.1% for 2019/20 GRA).

3. Calculate the CMP for the rating year such that the MCT ratio remains constant over the rating period (i.e. 2018/19 MCT score is 70%; a 2.1% Net CMP is applied to ensure 2019/20 MCT score remains at 70%).

4. Calculate the Capital Build and Release Provision. The determination of an appropriate Capital Build and Release Provision is dependent on having appropriate RSR target and a Capital Maintenance Provision methodologies approved by the PUB. MPI cannot develop a Capital Management Plan without clarity and confidence in the underlying capital targets and rate setting methodologies that are the basis for the Capital Management Plan. There are multiple approaches to the Capital Build and Release Provision including (i) constantly moving to a target MCT level over a predetermined number of years (similar to SGI); (ii) only applying a Capital Build and Release if the RSR is outside of the approved range; etc. The Corporation will bring a Capital Management Plan to the 2020/21 GRA.

PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**Investment Policy Statement**		
Sub Topic:	**Revised Investment Policy Statement**		

Preamble to IR (If Any):

It is anticipated that the revised Investment Policy Statement will be provided as part of the answers to the first round of Information Requests.

Question:

Please provide the revised Investment Policy Statement (IPS).

Rationale for Question:

To note any significant changes to the IPS.

RESPONSE:

Please see the response to *PUB(MPI) 1-31 (b)*.

PUB (MPI) 1-78

Part and Chapter:	**VI INV Appendix 2**	**Page No.:**	**1**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**Operational Asset Liability Management Policy**		
Sub Topic:	**Changes to ALM**		

Preamble to IR (If Any):

The Corporation has made changes to the Investment Policy Statement by which:
Interest rate risk is managed by matching the duration of the fixed income portfolio, which includes marketable bonds and floating rate notes to the actuarially determined duration of the Corporation's claims liabilities. If an allocation to floating rate notes is designated by the Working Group to fund other asset classes, then the designated amount can be excluded from the duration calculation.

Question:

a) Please explain the rationale for the changes made to the Operational Asset Liability Management Policy.
b) Please advise as to the implications of removing nonmarketable bonds from the determination of duration matching of interest rate risk.

Rationale for Question:

To understand the changes in the Investment Policy Statement.

RESPONSE:

a) The changes to the Operational Asset Liability Management Policy involved the removal of MUSH bonds from the duration matching portfolio as stated in Section

8.4 of the Investment Policy Statement and in Section III Definitions. Please see *PUB(MPI) 1-29 (a)* for the full discussion.

b) Please see *PUB(MPI) 1-29 (a)* for the implications of removing non-marketable bonds from the duration matching portfolio.

PUB (MPI) 1-79

Part and Chapter:	**VI INV Appendix 13**	**Page No.:**	**9**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**Mercer ALM Study**		
Sub Topic:	**New Asset Allocations – Stochastic Modelling and Analysis**		

Preamble to IR (If Any):

Following a thorough review of the relative merits of the asset classes noted above and after considering the purpose of each business line and MPI's risk tolerance and return requirements, Mercer modeled multiple combinations of asset classes utilizing efficient frontier concepts as well as stochastic projections of both assets and MPI's obligations utilizing the economic assumptions outlined in Appendix B.

Question:

Please provide any analysis from the stochastic modelling and stress testing that support the portfolio allocations, if necessary, with a request for confidentiality under Rule 13.

Rationale for Question:

To obtain and understand the stochastic modelling and results of the stress testing.

RESPONSE:

The analysis was provided in *Part VI INV, Appendix 17*, and is reproduced below for convenience.

As provided by Mercer:

The above excerpt is from the Phase Two Report Section 2 Key Recommendations. Based on the analysis, management recommended the following Policy portfolios for each business line and Pension obligations with the supporting analysis below.

PUB (MPI) 1-80

Part and Chapter:	**VI INV Appendix 16**	**Page No.:**	**11**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**Completion of Recommendations Details**		

Preamble to IR (If Any):

Real Return Bonds (RRBs) have been designated by Mercer to have a strong ability to duration match the inflation-linked liabilities. MPI's proposed Basic Portfolio is based on 100% fixed income securities. Previously the portfolio contained real estate investments as a hedge against inflation.

MPI has a long-term inflation forecast of 2.0%, which is based upon historical inflation and the Bank of Canada's inflation target. RRBs were not considered for this reason, as well as because the real yields on RRBs are currently very low. In addition, the Dynamic Capital Adequacy Test (DCAT) report does not include a high inflation scenario as a significant risk.

Question:

a) Given that the fixed income portfolio is set to back claims liabilities which are impacted by inflation risk, please explain how MPI proposes managing inflation risk with its proposed fixed income portfolio design.
b) Please explain why MPI believes that inflation risk is not a significant risk requiring protection through the investment portfolio.

Rationale for Question:

To understand the new portfolio design.

RESPONSE:

a) The portfolio supporting Basic claims liabilities after February 28, 2019 will include only nominal bonds. Nominal interest rate risk is hedged instead of real interest rate risk.

b) As stated in the Corporation's Rate Application "MPI has a long-term inflation forecast of 2.0%, which is based upon historical inflation and the Bank of Canada's inflation target." Since the Bank of Canada (BoC) adopted its explicit inflation target in March 1991, inflation has averaged at 1.9%. The Corporation therefore believes that the risk of inflation significantly exceeding the BoC's 2% inflation target is low. Further, given the low real yields currently available on Real Return Bonds (RRBs), the cost of obtaining protection from a high inflation scenario is substantial.

Mercer states at page 7 of the Phase 2 Report, that dollar and duration matching of liabilities is "challenging with RRBs. The Canadian RRB market consists of 15 issues of which only 7 are liquid and all are government issued. Further, RRBs are traditionally indexed to Canadian Consumer Price Index, while Basic Liabilities are indexed to other drivers."

PUB (MPI) 1-81

Part and Chapter:	**VI INV Appendix 16 - Appendix F (Efficient Frontiers)**	**Page No.:**	**50-53**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**ALM**		
Sub Topic:	**Efficient Frontiers**		

Preamble to IR (If Any):

Question:

a) Please provide a narrative description of the results presented in the charts, and articulate how the selected portfolio mix represented the best alternative based on the risk reward profile for MPI.
b) Please indicate how the relative charts and portfolio may change if Mercer's SIRF was used in the analysis, rather than the implied forward rate.

Rationale for Question:

To understand the ALM results related to the efficient frontiers.

RESPONSE:

As provide by Mercer:

a) The following is a narrative description of the results presented in the charts.

Page 50: Basic Claims

The Efficient Frontier is based on the Nominal Liability Benchmark for the Basic Claims liability. The frontiers shown are constrained to allow only the fixed income asset classes shown in the table, in order to achieve MPI's objective of minimizing

interest rate risk. The Current mix that currently applies to all business lines, the RSR and Pension fund includes equities and alternatives and therefore appears well above the constrained frontier. The blue efficient frontier includes fixed income asset classes in Current. The green efficient frontier includes the classes included in the blue efficient frontier and private debt and mortgages.

After analyzing the stochastic projections and summary results (see INV Appendix 17 Appendix B), Basic portfolio #3 was selected because it had the highest yield but did not include private debt. Private debt was not included in the Basic Claims portfolio in order to limit risk within the portfolio and because including private debt could complicate the duration matching strategy.

Page 51: Rate Stabilization Reserve

The Efficient Frontier is based on asset only approach, given the nature of the RSR. The blue efficient frontier includes all asset classes in Current. The purple efficient frontier includes the classes shown in the table. After analyzing the stochastic projections and summary results (see INV Appendix 17 Appendix B), RSE.1 was selected because of the high Sharpe Ratio, high probability of positive real return, and relatively more upside than downside. In order for RSE.1 to place on the purple efficient frontier, a small private equity allocation is necessary. Given the size of that allocation and the materially more complicated oversight required, the slight improvement in moving to the purple frontier was not sufficient to warrant the implementation of a private equity mandate.

Page 52: Employee future benefits (primarily pension)

The Efficient Frontier is based on the Nominal Liability Benchmark for the EFB liability. The blue efficient frontier includes all asset classes in Current. The purple efficient frontier includes the classes shown in the table. The Current mix which currently applies to all business lines, the RSR and Pension fund is aligned to the liability characteristics of each component weighted on the size of the liability and therefore Current is more aligned to BASIC claim liabilities rather than EFB liability and therefore Current appears suboptimal when only EFB liabilities are considered. For illustrative purposes, the CSSB asset mix was plotted. In order to move the CSSB plot closer to the frontier, we would need to improve the asset mix

alignment with the liabilities (i.e., better duration match) and we would to use the additional asset classes which offer better expected rates of return and/or enhanced equity portfolio diversification. After analyzing the stochastic projections and summary results (see *INV Appendix 17 Appendix B*), Pension.1 was selected because it had the highest interest rate risk hedge, the probability of surplus and positive real return was not improved in Pension.2 or Pension.3 and relative to CSSB's 5-year projection, Penion.1 has less volatility with similar return.

b) *The **Operational Asset Liability Management Policy:** ICWG Policy #1, Effective March 23, 2016*, states that the objective of this policy is to "minimize the Corporation's interest rate risk, the duration matching portfolio will closely match the claims liabilities in both dollar amount and duration."

Accordingly, the specifics of an interest rate forecast are unlikely to impact portfolio construction unless the forecasts were significantly different (i.e. perhaps one forecasted a significant rise in base rates and the other forecasts a significant decline in base rates) AND the portfolio construction included significant emphasis on minimizing convexity risk.

Given the duration matching objective, the use of Mercer's interest rates forecast rather than the implied forward rates would not have impacted the proposed portfolio.

PUB (MPI) 1-82

Part and Chapter:	**VI INV Appendix 17**	**Page No.:**	**1**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**ALM**		
Sub Topic:			

Preamble to IR (If Any):

It was determined that the risk tolerance of MPI's Board of Directors for the assets backing the Basic claims liabilities was very low and that mitigating risk was more important that maximizing returns. The focus was on further reducing interest rate risk, with a willingness to take on modest credit risk (as long as it is diversified and cost effective).

Based on this risk tolerance, it was determined that the best way to mitigate the interest rate risk associated with the Basic claims liability was to develop an investment portfolio with 100% fixed income assets (i.e. no growth assets) and dollar and duration matching those assets to the claims liabilities.

IFRS 17 requires the discount rate for establishing claims liability to be based on the observable market rates of expected future returns.

In the 2018 GRA MPI indicated it was still assessing the full implications of IFRS 17. MPI anticipates it will provide an assessment of the impacts once the review is complete.

Question:

In light of IFRS 17, please discuss how the accounting changes required in IFRS 17 in determining the discount rate will impact the effectiveness of the current proposed portfolio on mitigating interest rate risk.

Rationale for Question:

To understand the impact of changes in accounting standards on interest rate risk.

RESPONSE:

MPI's evaluation of the proposed changes to IFRS 17 is still in progress. MPI continues to collect information on this topic with the intention of receiving an external opinion on the expected impact of IFRS 17.

At this time, the Corporation cannot commit to having an external impact analysis of IFRS 17 by October 2018.

Please note that the application of IFRS 17 for reporting periods must start on or after January 1, 2021. MPI will apply IFRS 17 for the fiscal year beginning March 1, 2021.

PUB (MPI) 1-83

Part and Chapter:	**VI INV Appendix 17**	**Page No.:**	**3**
PUB Approved Issue No:	**8. Performance of the Investment Portfolio** **21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**Inflation Volatility Assumption**		

Preamble to IR (If Any):

The inflation volatility assumption was 2.6%.

Question:

Please provide details on how the 2.6% inflation volatility assumption was arrived at.

Rationale for Question:

To understand the inflation volatility assumption.

RESPONSE:

As provided by Mercer:

Our inflation volatility assumption is based on our analysis of historical data on Canadian inflation going back to 1992. The historical distribution of inflation has tails fatter than a lognormal distribution (high kurtosis). It is also asymmetric (it is skewed to the right). Another key characteristic of inflation is its high serial correlation. Simply put, years of high inflation tend to be followed by years with similarly high inflation, and the same with periods of low inflation. Because of serial correlation, the modeled annualized volatility of a future period increases with the length of the period. 2.6% volatility corresponds to the compounded annualized volatility over the next 10 years.

PUB (MPI) 1-84

Part and Chapter:	**VI INV Appendix 17**	**Page No.:**	**4**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**ALM**		
Sub Topic:			

Preamble to IR (If Any):

Question:

Please explain how the portfolio composition changes relative to the efficient frontier, based on utilization of Mercer's interest rate forecast versus the implied forward rates. (i.e., would the use of Mercer's interest rate impact the proposed portfolio from 100% fixed income for Basic, or would it alter the relative distribution among fixed income instruments?)

Rationale for Question:

To understand the impact of utilizing Mercer's standard interest rate forecast on the optimization of the Basic investment portfolio.

RESPONSE:

Please see the response to *PUB(MPI) 1-81(b)*.

PUB (MPI) 1-85

Part and Chapter:	**VI INV Appendix 17 Attachment B**	**Page No.:**	**21-25**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**Minimum Risk Portfolios Assumptions**		

Preamble to IR (If Any):

Question:

Please provide a narrative description of the results of the asset mix analysis presented on pages 21 to 23 that support Mercer's portfolio recommendation.

Rationale for Question:

To understand the results of the asset mix analysis.

RESPONSE:

As provided by Mercer:

Page 21

The Current mix applies to all business lines, the RSR, and Employee Future Benefits (EFM) fund. The asset mix is fixed in light of the Basic Claims liabilities and given the duration matching policy, all suggested asset mixes are 100% fixed income. Basic.1 illustrates the impact of no MUSH and minimizing risk. Basic.2 continues to use only provincial bonds but also includes the 20% MUSH which is based on the illiquid nature of the existing investments. Basic.3 includes corporate bonds for yield enhancement. Basic.4 includes private debt for further yield enhancement.

Page 22

Current and alternative asset mixes are compared based on the return and risk metrics developed at the beginning of the project. Note that Current includes equities and alternatives and therefore is not directly suitable for the Basic Claims liabilities. Basic.3 has the highest 1-year Median Surplus and 5-year Median Surplus, as well as, the highest probability of 5-year positive real return.

Page 23

Current and alternative asset mixes are compared based on the projected surplus in 1 year. Note that Current includes equities and alternatives and therefore is not directly suitable for the Basic Claims liabilities. Basic.3 has the highest 1-year Median Surplus while the 1 in 40 year downside (the 2.5th percentile) is tolerable.

PUB (MPI) 1-86

Part and Chapter:	**VI INV Appendix 17 Attachment E**	**Page No.:**	**3**
PUB Approved Issue No:	**21. Asset Liability Management Study**		
Topic:	**Investments**		
Sub Topic:	**Min/Max Asset Allocation Constraints**		

Preamble to IR (If Any):

The portfolios based upon Mercer's standard interest rate forecast had 66% to 78% bond allocations with durations of 4.4 to 7.1 years; these portfolios had relatively low hedge ratios (43% to 69%).

The portfolios based upon the forward curve all had durations of 10.3 years and 100% hedge ratios.

Question:

a) Please explain how the forward curve interest rate forecast was determined and provide illustrative supporting calculations.
b) Explain why the forward curve interest rate forecast approach was utilized for modelling purposes, rather than Mercer's Standard Interest Rate Forecast (SIRF).
c) Please advise as to the composition of the optimal portfolio for Basic utilizing Mercer's SIRF.
d) Please provide a narrative description of the comparative risk return metrics and the results of the modelling in Attachment E (Current Asset Classes Only).
e) Please file the chart and related data table detailing its placement relative to the efficient frontier in similar format to that presented in Appendix 16 page 50, using Mercer's SIRF.

Rationale for Question:

To understand the assumptions and details underlying the determination of the minimum and maximum constraints.

RESPONSE:

a) Please see the response to *PUB(MPI) 1-35*.

b) Mercer's standard interest rate forecast assumed a rapid reversion to the long-term mean for interest rates, similar to the chartered banks forecasts. The Corporation believed that the more modest increase in interest rates reflected in Mercer's forecast based upon the forward curve was more realistic. Use of Mercer's standard interest rate forecast resulted in capital losses for the fixed income holdings. As a result of using the standard interest rate forecast, Mercer recommended minimal allocations to fixed income assets and reducing the duration of the fixed income holdings, which was not consistent with the Corporation's desire to hedge its exposure to interest rate changes.

c) Please see the response to *PUB(MPI) 1-81 (b)*.

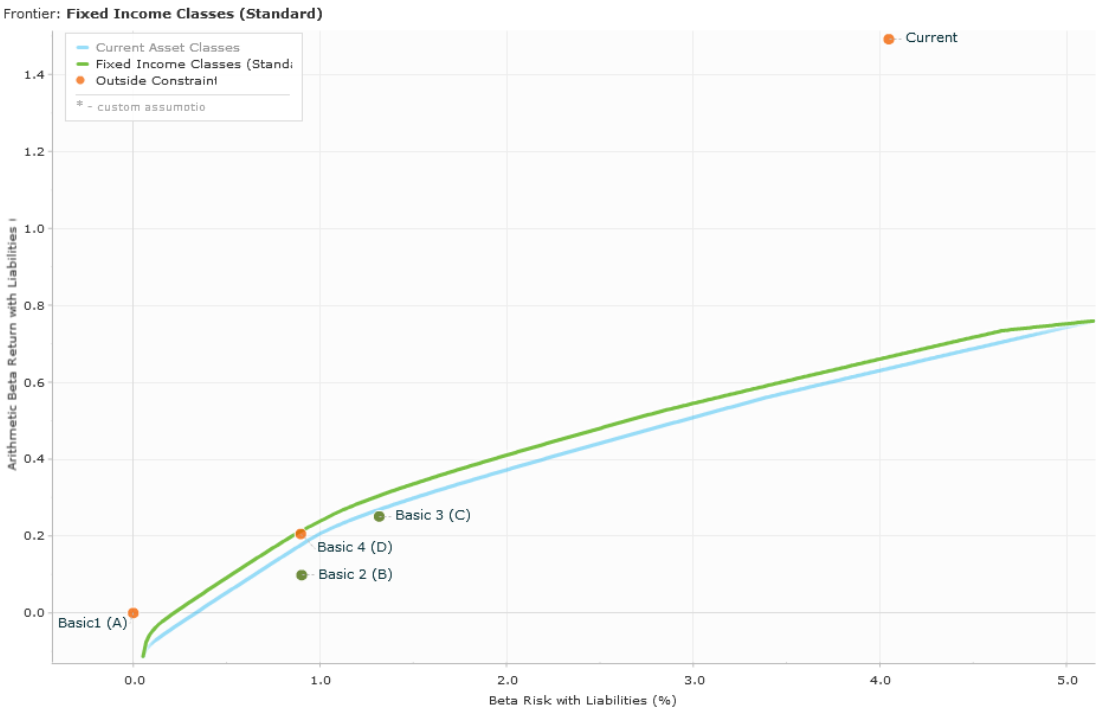
d) As provided by Mercer:

The efficient frontier is based on the Nominal Liability Benchmark for the Basic Claims liability. The frontier shown is constrained to allow currently used asset classes (provincial bonds, corporate bonds, MUSH bonds, Canadian equity, US equity, private equity, real estate and infrastructure). In addition, there was a 10% minimum allocation to MUSH bonds and 15% maximum allocation to alternatives. Portfolio B was selected to show what changes might be made to reduce the surplus volatility without reducing the expected return. Portfolio C was selected to show what changes might be made to increase the expected return without increasing the surplus volatility. Portfolios D and E were showing the impact of adding corporate bonds (higher expected return, but also higher risk). The Current portfolio appeared not very efficient (below the efficient frontier)

because no duration constraint was imposed on the frontier and given Mercer's SIRF (forecasting rising interest rates), the fixed income allocation on the frontier was dominated by mid-term bonds (except in the very low risk area.

e) As provided by Mercer:

The following chart illustrates the efficient frontier corresponding to the chart presented in Appendix 16 page 50, but using Mercer's standard interest rate forecast in place of the assumptions based on implied forward rates. Note that the related data table would be identical, since the composition of the plotted portfolios has not changed.



CAC (MPI)

CAC (MPI) 1-1

Part and Chapter:	**Part I, LA, OV**	**Page No.:**	**LA, page 2, OV, page**
PUB Approved Issue No:	**1. Requested vehicle rate and any changes to other fees and discounts** **14. Risk assessment and risk management** **20. Capital Maintenance Provision** **21. Asset Liability Management Study**		
Topic:	**Consumer/ratepayer engagement**		
Sub Topic:			

Preamble to IR (If Any):

In the 2019 GRA, MPI has requested:

A 2.2% overall increase in Basic vehicle premium revenue (including Vehicles for Hire rates for service) comprised of:

i. 0.1% increase to the break-even cost of policies
ii. 2.1% increase for a Net Capital Maintenance Provision to maintain MPI's capital position through the rating year, as measured by the Minimum Capital Test. The Capital Maintenance Provision accounts for the positive impact of investment income on Basic's Rate Stabilization Reserve, and collects only the residual amount required to maintain Basic's capital position

Question:

Please describe in detail all steps taken to engage with Manitoba consumers/ratepayers including, but not limited to, focus groups, stakeholder conversation, quantitative surveys and direct consumer conversations, related to:

a) the overall rate increase sought;
b) the concept of the capital maintenance provision; and

c) risk tolerances related to the basic and pension investment portfolios.

Rationale for Question:

To understand the extent and type of consumer engagement conducted by MPI prior to filing the 2019 GRA.

RESPONSE:

a) through c)

The Corporation did not consult ratepayers/consumers on any of the above noted issues for the following reasons:

- The General Rate Application is an open and public process. Anyone wishing to voice support or opposition to the requested rate change can do so through the PUB's online comment tool, in writing, or in person at the public hearing itself. Anyone wishing to test the rate request can apply for standing as an intervener or, presumably, seek to have an existing intervener advance any concerns on their behalf.

- The rate indication is itself generally treated as confidential by MPI until the time of filing, which necessarily precludes public consultation in advance of filing.

- Technical topics such as actuarial pricing, capital adequacy and investment risk tolerances are unlikely to garner constructive feedback through a public consultation process.

- The regulatory process affords an opportunity for the advancement of the interests of lay members of the public by subject matter experts. The Corporation has focused its effort on the regulatory process, and has taken steps to make its Application content more accessible to the public.

- The Corporation has also participated in technical conferences on matters related to Accepted Actuarial Practice (AAP) and a Capital Maintenance Provision (CMP), that were attended by registered interveners from prior proceedings (please see CAC (MPI) 1-72 for a discussion of the consensus reached at these technical conference).

- The Manitoba Government appointed a Board of Directors who have established the risk tolerance related to the Corporation's investments.

CAC (MPI) 1-2

Part and Chapter:	**PART V, Revenues**	**Page No.:**	**10**
PUB Approved Issue No:	**4. Revenue Forecasts**		
Topic:	**Upgrade Factors**		
Sub Topic:			

Preamble to IR (If Any):

"After remaining very stable at approximately 2.60% per year from 2011/12 to 2015/16, the vehicle upgrade factor fell to 2.23% in 2016/17 and 2.32% in 2017/18. The main cause of the decrease in vehicle upgrade is a drop in the number of customers that 'upgraded' their vehicles (i.e. purchased newer vehicles). From 2011/12 to 2015/16 the average age of an HTA vehicle was stable at approximately 9.92 years; however, in 2016/17 and 2017/18 the average age increased to 10.05 years and 10.21 years respectively. If the 'age of vehicle' distribution had remained the same in 2017/18, then the upgrade factor would have been approximately 2.55%. The Corporation does not anticipate vehicle age to continue this upward trend in future years."

MPI adjusted (decreased) the Upgrade Factor by 0.05% due to vehicle age increasing judgmentally (page 11)

Question:

a. Please provide MPI's rationale for "not anticipat(ing) vehicle age to continue this upward trend in future years".
b. Please assume that the average vehicle age trend will continue at the 2016/17 and 2017/18 pace into the forecasting periods, recalculate and reforecast the Upgrade Factor Forecast and compare to Figure Rev 7 on page 8 or Figure Rev

9 (whichever is correct) and calculate the financial impact based on the revised Upgrade Factor.

c. Please reconcile Figure Rev 7 to Figure Rev 9 and explain any differences.

Rationale for Question:

With improved vehicle technology it may be likely that the age of vehicles may increase and accordingly may impact projected basic insurance premiums due to a lower upgrade factor.

RESPONSE:

a) Throughout MPI's history, the average age of the vehicle fleet has generally fluctuated around 10 years. The Corporation believes that it is inappropriate, for this year's forecast, to assume that, after only a few years of increases in vehicle age, the current trend will continue indefinitely. This assumption would increase the average vehicle age to 11+ years, a figure not previously observed.

b) To model an assumed increase in the average vehicle age upward trend similar to 2016/17 and 2017/18, we have used an approximation of the recent two year average of 2.27% throughout the forecasting period. **Figure 1** below compares the revised upgrade factor to the original form figure Rev-7.The financial impact is a reduction to net income of approximately $4.9 million per year over the 2019/20 and 2020/21 rating years. Please see *Appendix 1* for the Statement of Operations with the revised upgrade factor.

Figure 1:

	Revised Total Upgrade	REV 7 Total Upgrade	Difference
2018/19	2.21%	2.39%	-0.18%
2019/20	2.36%	2.54%	-0.18%
2020/21	2.40%	2.58%	-0.18%
2021/22	2.33%	2.51%	-0.18%
2022/23	2.36%	2.54%	-0.18%

c) The figure REV 7 is the total upgrade factor, which is the sum of the vehicle upgrade factor and the DSR upgrade factor in REV 9. **Figure 2** below shows the relationship between these two tables.

Figure 2:

	(1) Vehicle Upgrade in REV 9	(2) DSR Upgrade in REV 9	(3)=(1)+(2) Total upgrade in REV 7
2018/19	2.45%	-0.06% *	2.39%
2019/20	2.45%	0.09%	2.54%
2020/21	2.45%	0.13%	2.58%
2021/22	2.45%	0.06%	2.51%
2022/23	2.45%	0.09%	2.54%

* Note: The 2018/19 DSR upgrade was adjusted to recognize the introduction of DSR discounts for taxi VFH, limousine VFH, and accessible VFH. The reduction is 0.1%.

CAC (MPI) 1-3

Part and Chapter:	**Part VIII, Annual Reports, Universal Compulsory Automobile Insurance Annual Report**	**Page No.:**	**6, 30**
PUB Approved Issue No:	**16. Other matters**		
Topic:	**Gross unearned premiums**		
Sub Topic:			

Preamble to IR (If Any):

For 2018, on page 6 of the Compulsory Automobile Insurance Annual report, it indicates a decrease in gross unearned premiums of $34,451,000. Per Note 13 on page 30, it indicates that the gross unearned premiums as at February 28, 2018 are $468,613,000 and at February 28, 2017 it is $434,162,000, an increase year over year of $34,451,000.

Question:

Please clarify the disclosure description in the Compulsory Automobile Insurance Statement of Operations.

Rationale for Question:

To clarify the disclosure description of unearned premium changes in the Statement of Operations.

RESPONSE:

On the Statement of Operations at page 6, the line in question should read:

"(Increase) decrease in gross unearned premiums"

CAC (MPI) 1-4

Part and Chapter:	**Part IV, INV.2.3.1**	**Page No.:**	**29, Fig INV-11**
PUB Approved Issue No:	**4 c. and 4d. Interest Rate Forecast**		
Topic:	**Historical Analysis of the Naive, 50 50 and SIRF Forecasts**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please confirm that the standard error of the naïve interest rate forecast is 0.015 for the period 2005-18 while the standard error of the 50/50 forecast is only marginally higher at 0.016.
b) Please confirm that the forecast differences for the SIRF and 50/50 forecasts are lower than the forecast difference for the naïve forecast for the 2017 GRA and 2018 GRA.
c) Please explain why the historical period from the 2005 GRA to the 2018 GRA was used to assess forecasting performance.
d) Please provide the results for any other historical periods considered to assess forecasting performance.

Rationale for Question:

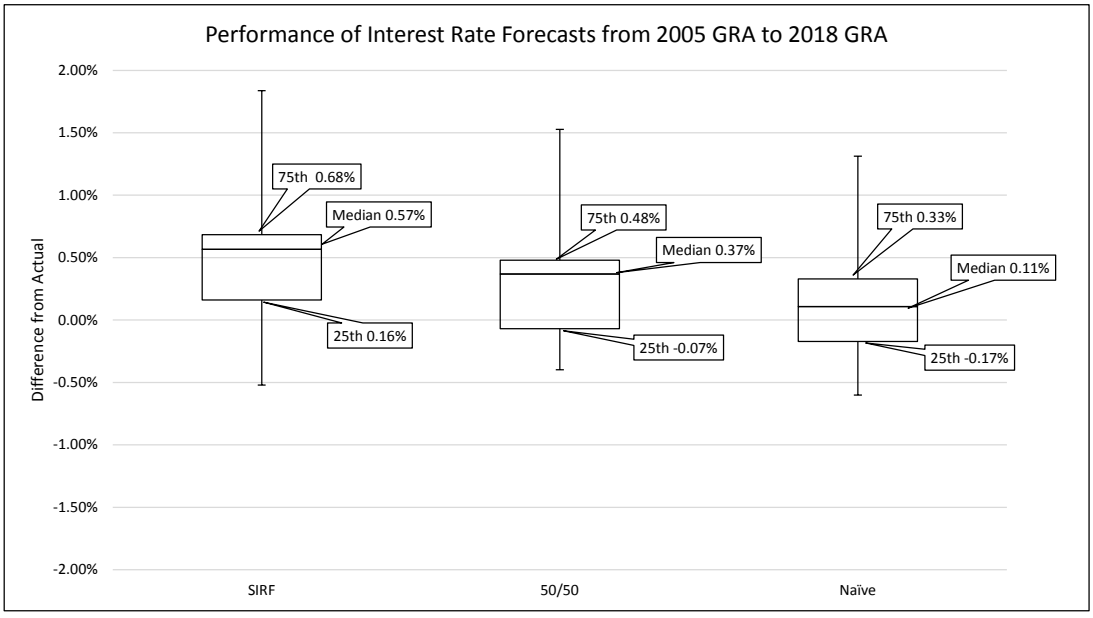
The interest rate forecast is an important component of the ratemaking process and the naïve forecast would replace the conventional practice of relying on a consensus forecast of financial institutions (SIRF), at least partially (50/50).

RESPONSE:

a) The standard error is a measure of variance of a sample. A similar forecast that is always 500 basis points higher than the naive forecast will produce a similar standard error as the naive forecast, even though it is an extremely biased forecast. Please also see the Corporation's response to *PUB (MPI)1-11 (a)*.

The figure below shows how each of the three interest rate forecasts differ from the actual. As indicated, there is marginal difference in the variance between the 50/50 and naïve forecast (as seen by the overall length of the 'whisker' in the box and whisker plot below). However, the naïve forecast is less biased than the 50/50 forecast (given the range of differences of the naïve forecast plots closer to the 'zero difference' line – that is, the 'box' in the box and whisker plot is more centered around the zero difference line) and, as seen in the Corporation's response to *PUB (MPI) 1-11 (a)*, the naïve forecast is statistically less biased than the 50/50 forecast.

Further, the middle line of the 'box', the median, is closest to 0.00% in the naïve forecast, while the 50/50 forecast produced forecasts that are at least 37 basis points higher than actual, 50% of the time.



b) While this is true, it should be noted that between the 2005 and 2018 GRA, the average difference between 1) the SIRF and actual; and 2) 50/50 and actual, is significantly higher than the average difference between the naïve forecast and actual. Specifically, the average difference is 0.54% for the SIRF and 0.34% for the 50/50 forecasts while only 0.15% for the naïve forecast.

c) The Corporation used the historical period from the 2005 GRA to the 2018 GRA to assess forecasting performance, because the Standard Interest Rate Forecast (consensus forecast from the Banks) was not available for the period prior to the 2005 GRA.

d) The Corporation cannot provide the results for any other historical periods considered to assess forecasting performance, as no other historical periods were available. As indicated above, this is because the data determining the Standard Interest Rate Forecast is unavailable for the period prior to the 2005 GRA.

CAC (MPI) 1-5

Part and Chapter:	**RSR.4**	**Page No.:**	**4**
PUB Approved Issue No:	**4 c. and 4d. Interest Rate Forecast**		
Topic:	**Best interest rate forecast estimate**		
Sub Topic:			

Preamble to IR (If Any):

"Further, the PUB ordered a 50/50 interest rate forecasting methodology which the Corporation cannot demonstrate to be a best estimate (based on the evidence observed to date)"

Question:

Please explain what steps MPI has taken to demonstrate that the 50/50 interest rate methodology does not produce a best estimate beyond Fig INV-11.

Rationale for Question:

An assessment of the best forecasting methodology should be robust to the choice of historical period.

RESPONSE:

The Corporation provides the following facts to support its position that the naïve forecast is a best estimate and, conversely, that the 50/50 interest rate methodology is not a best estimate:

1. In the 2017 GRA hearings, the Corporation presented Dr. Sean Cleary, CFA, as an expert witness. A principal finding of his analysis was that "Naïve forecasts

using existing 10-year Canada yields would have improved forecasting accuracy significantly, reducing percentage forecast error by close to 60%." (See 2017 GRA, MPI Exhibit 7, page 4);

2. There is no principled basis to use the 50/50 interest rate methodology over any other judgmentally based blending of the Naïve and SIRF forecasts;

3. In response to *PUB (MPI) 1-11 (a)*, the Corporation demonstrates that the Naïve forecast produces a statistically significant forecast with less error at a 99% confidence level, which the 50/50 forecast does not. In other words, the Naïve forecast produces an estimate that is not statistically different from the actual forecast;

4. The 50/50 forecast produces a forecast with statistically more bias than the Naïve forecast; and

5. MPI's external actuary, Mr. Joe Cheng, endorses the use of the naïve forecast for DCAT base case scenario and has stated that it is the most common approach amongst his property and casualty insurance clients.

CAC (MPI) 1-6

Part and Chapter:	**DCAT.1.7.4**	**Page No.:**	**16**
PUB Approved Issue No:	**4 c. and 4d. Interest Rate Forecast**		
Topic:	**Naïve interest rate forecast**		
Sub Topic:			

Preamble to IR (If Any):

"In my opinion, a naïve interest rate assumption is appropriate for the base scenario. Notwithstanding the two recent rate hikes by the Bank of Canada (BoC), I do not see any material risk in assuming a naïve interest rate as a base case. My initial guess is an increase in interest rates should strengthen the financial position of Basic.
Response: MPI agrees with this assessment."

Question:

a. Please explain whether MPI considers "two recent hikes by the Bank of Canada" to be immaterial to the choice of the naïve interest rate forecast, i.e. that interest rates will not rise again for the next four years.
b. Please explain whether MPI considers the interest rate increase by the Bank of Canada on July 11, 2018 (see: https://www.bankofcanada.ca/2018/07/fad-press-release-2018-07-11/) to be immaterial to the choice of the naïve interest rate forecast, i.e. that interest rates will not rise again for the next four years (even though they just have for the third time).
c. Please confirm that MPI considers the naïve interest rate forecast to be an unbiased forecast, i.e. that interest rates are as likely to fall as to rise over the next four years.

Rationale for Question:

The naïve interest rate forecast is no longer appropriate as interest rates begin to rise.

RESPONSE:

The rationale to this Information Request assumes facts not in evidence and is largely anecdotal. MPIC will confine its answer to the germane portion of the question, in a fair and accurate manner, while making note of the prejudicial effect of the premise.

a. Actual or expected changes in the BOC overnight rate are not material considerations in the selection of a best estimate interest rate forecast. Increases in the Bank of Canada (BoC) overnight rate do not necessarily result in increases in Government of Canada (GoC) 10-year bond yields. To illustrate, the Naïve forecast uses the February 28, 2018 GoC 10-year bond yield (2.24%). The BoC has increased the overnight rate once since then, from 1.25% to 1.50% on July 11, 2018. As of July 20, 2018 (the date of this writing), the GoC 10-year bond yield was 2.18%, 0.06% lower than it was on February 28, 2018 and is so despite the fact that the BoC increased the overnight rate.

   The reasons for selecting the naïve forecast as a best estimate are provided chiefly in *PUB(MPI) 1-11*, *CAC(MPI) 1-4*, and *CAC(MPI) 1-5*, among others.

b. The Naïve forecast is a *neutral* forecast – going forward, the GoC 10-year bond yield could increase, decrease or remain flat. As mentioned in the response to question a) above, it does not necessarily follow that increases in the BoC overnight rate result in increases in the GoC 10-year bond yield.

c. For the purposes of setting rates, the Corporation considers the naïve forecast to be an unbiased forecast. Using the last 14 years of interest rate forecasts as provided in the response to Information Request *PUB (MPI) 1-11*, the naïve forecast produces an estimate that is statistically the same as the actual forecast. That is, the average difference of the naïve to the actual forecast is between 0.48% and -0.17%, with 95% confidence. Contrast this to the 50/50 forecast,

which produces a rate forecast that is significantly more biased than the naïve forecast.

CAC (MPI) 1-7

Part and Chapter:	**PART VI, Investments**	**Page No.:**	**8, 27**
PUB Approved Issue No:	**4.d. Naïve interest rate forecast**		
Topic:	**Naïve interest rate forecast**		
Sub Topic:			

Preamble to IR (If Any):

"The Minimum Capital Test (MCT) ratio will increase by 16% at the end of 2018/19 from 54% to 69% because of lower capital requirements on the Basic line of business investment assets. Interest income is forecasted to increase by approximately $18.5 million on average from 2019/20 to 2021/22 as there will be more fixed income assets in the portfolio supporting the Basic line of business. These projections are based on a Naive interest rate forecast."

"11.19. The 50/50 interest rate forecast shall be used for rate-setting and target capital purposes." PUB Order #130/17 page 96.

Question:

a) Please explain and provide the rationale for MPI believing it has complied with PUB Order 130/17 order 11.19.
b) Please define "best estimate".

Rationale for Question:

To better understand MPI's rationale for not using the 50/50 interest rate forecast in the 2019 GRA

RESPONSE:
