

Security Warning in Adobe Reader

Depending on your Adobe Reader security settings, some users may receive one of the following Adobe Reader messages when attempting to open a PDF page in the 2016 Rate Application

Security Warning Window

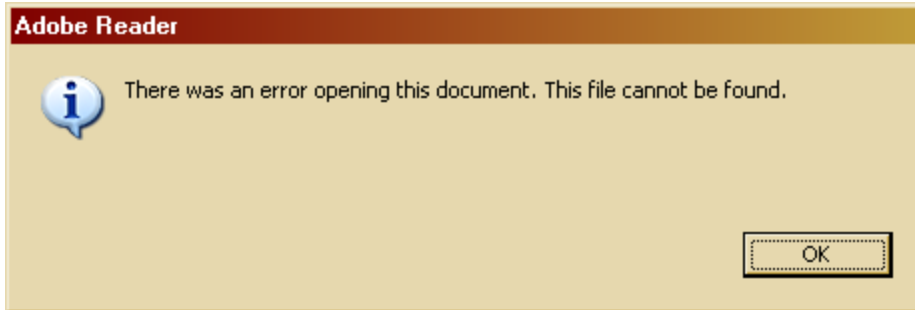

If you receive this error, please change your web browser **Page Display Preferences** as follows:

1. Click **Allow** in response to the warning message.
 - o The **Security Warning** window disappears.
2. Right click on the open PDF page.
 - o A menu appears.
3. Select **Page Display Preferences**.
 - o The **Preferences** window opens.
4. Select **Internet** in the Categories column.
5. Un-check the web browser option **Display PDF in browser**.
6. Click **OK**.
7. Restart your PC and insert the compact disc again.
 - o You can now select and open PDF pages without receiving the **Security Warning** window.

Note: You may have to reverse this procedure to resume standard viewing of other PDF files in future.

-OR-

Adobe Reader Window

If you receive this error message, please change your web browser **Page Display Preferences** as follows:

1. Click **OK** in response to the error message.
 - The **Adobe Reader** error message window disappears.
2. Right click on the open PDF page.
 - A menu appears.
3. Select **Page Display Preferences**.
 - The **Preferences** window opens.
4. Select **Internet** in the Categories column.
5. Click the check box to the right of the web browser option **Display PDF in browser**.
6. Click **OK**.
