1. Column (9) Reinsurance Recoveries Received means that MPI has billed the reinsurers, not necessarily collected the cheque. This is consistent with the GL.
2. With respect to the 2024/25 Treaty year, MPI does not have full participation in first and third layer of Cat treaty. If AAD is exceeded, then recoveries will need to be adjusted for this.

Manitoba Public Insurance
Report on the Valuation of Actuarial and Other Policy Liabilities
as at 31 March 2026

Appendix – Actuarial Items Used for MCT/BAAT Calculation

This page intentionally left blank.

Shape the future with confidence

Below is a summary of the information provided to support the Company's MCT/BAAT return and how the amounts were determined.

Actuarial item(s)	PC4 page number	Description/details
Liabilities for incurred claims (LIC)/Assets for incurred claims (AIC) for insurance contracts issued	50.00	Summary of LIC shown in Exhibit 1, with detail on the calculations in Section 14 of the report.
Liabilities for remaining coverage (LRC) / Assets for remaining coverage (ARC) for insurance contracts issued	50.00	Summary of LRC shown in the Executive Summary of the report.
AIC/LIC for reinsurance contracts held	50.00	Summary of AIC shown in Exhibit 1, with detail on the calculations in Section 14 of the report.
ARC/LRC for reinsurance contracts held	50.00	Summary of ARC shown in the Executive Summary of the report.
Modified or effective duration for LIC/LRC/AIC/ARC for insurance contracts issued	50.00	Effective duration calculated using selected payment patterns shown in line of business Appendices. See following table for resulting duration.
Modified or effective duration for AIC/ARC/LIC/LRC for reinsurance contracts held	50.00	Effective duration calculated using selected payment patterns shown in line of business Appendices. See following table for resulting duration.
LIC for insurance contracts issued less risk adjustment	40.00	Summary of LIC and RA by line of business shown in Exhibit 1, with detail on the calculations in Section 14 and Section 13 of the report respectively.
AIC for reinsurance contracts held less risk adjustment	40.00	Summary of AIC and RA by line of business shown in Exhibit 1, with detail on the calculations in Section 14 and Section 13 of the report respectively.
Unexpired Coverage for groups of insurance contracts issued measured using the GMM to determine their LRC/ARC	40.05	N/A
Unexpired Coverage for groups of insurance contracts issued measured using the PAA to determine their LRC/ARC	40.05	Selected loss ratio for onerosity assessment and calculation of unexpired coverage made by management.

Effective Durations	
Insurance contracts issued - Assets for incurred claims (AIC)	0.00
Insurance contracts issued - Assets for remaining coverage (ARC)	0.00
Reinsurance contracts held - Assets for incurred claims (AIC)	4.24
Reinsurance contracts held - Assets for remaining coverage (ARC)	0.00
Insurance contracts issued - Labilities for incurred claims (LIC)	8.64
Insurance contracts issued - Liabilities for remaining coverage (LRC)	0.00
Reinsurance contracts held - Liabilities for incurred claims (LIC)	0.00
Reinsurance contracts held - Liabilities for remaining coverage (LRC)	0.00

1 Executive Summary

This report explains updates to how MPI estimates the future cost of certain benefits paid to people injured in vehicle accidents under the Personal Injury Protection Plan (PIPP). These estimates are important because they determine how much money MPI needs to set aside today to pay for benefits that will be paid in the future.

This report focuses on methodology and assumption changes and does not address operational or system implementation details except where they materially impact actuarial estimates.

The focus of this work is on two major types of benefits:

- Weekly Indemnity (WI): ongoing income replacement payments for individuals who are unable to work due to injury; and
- Personal Care Assistance (PCA): payments to support individuals who require help with daily living activities due to injury.

To estimate the cost of these benefits, MPI must make assumptions about how long claims will continue. These assumptions are referred to as termination rates, which estimate the likelihood that a claim will end in a given period. Examples of a reason for termination include because the individual recovers, returns to work, or passes away.

The previous termination rates were based on external research from over 30 years ago and were not specifically designed for MPI's program. As a result, these assumptions were no longer considered to be representative of MPI's current experience.

This project updates those assumptions by using MPI's own historical data. Specifically, more than 30 years of claims information was analyzed to better understand how claims develop over time. A statistical method was used to translate this historical experience into updated termination rates.

The updated approach uses two different perspectives when estimating how long claims will last:

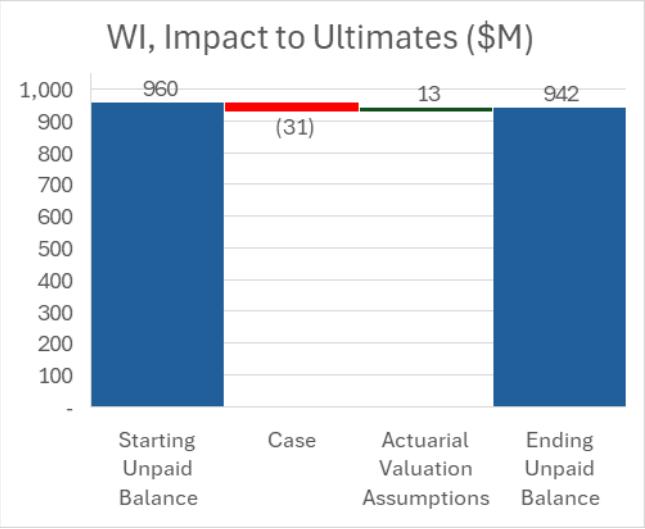
- In the early years of a claim, the model focuses on how long it has been since the injury occurred, reflecting the higher likelihood of recovery in the early period; and
- In the later years of a claim, the model focuses more on the age of the claimant, reflecting that long-duration claims are less likely to end due to recovery and are more influenced by long-term factors such as mortality.

Additional improvements were made to better reflect specific situations:

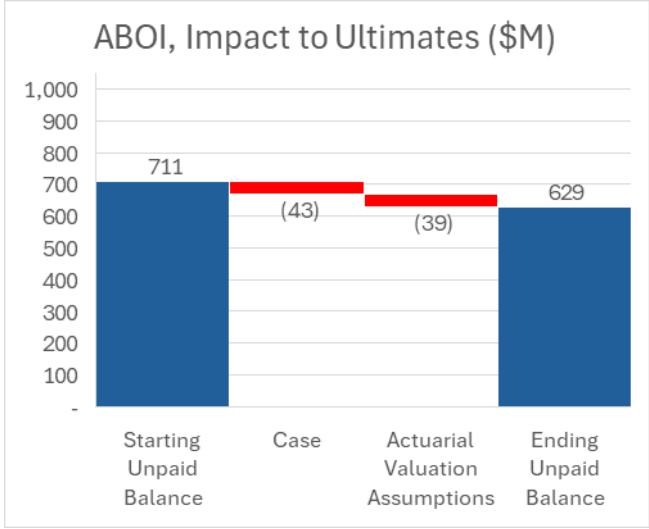
- For individuals with serious injuries, where recovery is unlikely, an approach is used that assumes claims will persist longer;
- Assumptions regarding the level retirement income benefit (RIB) entitlements were updated using MPI's actual payment experience; and

- A consistent and transparent approach to manage unforeseen volatility has been introduced, which adds a modest percentage buffer to reflect the fact that future experience is not known with certainty.

The overall estimated impact to liabilities of these case reserve changes relative to the previous method, measured as of March 31, 2026, are:



- $31 million decrease for Weekly Indemnity, and
- $43 million decrease for Personal Care Assistance.



In addition to updating these claim-level assumptions, related changes were made to the broader actuarial valuation process. This ensures that the methods used to estimate total future costs are consistent with the updated assumptions used in individual claim calculations. These updates include changes to the method of development based on past claims experience as well as how future payments are projected.

The overall estimated impact to liabilities of these valuation changes relative to the previous method, measured as of March 31, 2026, are:

- $13 million increase for Weekly Indemnity, and
- $39 million decrease for Personal Care Assistance.

The total impact to liabilities of both case reserves and valuation changes across Weekly Indemnity and Personal Care Assistance sums to a $100M reduction to reserves, as of March 31, 2026.

These changes do not represent a reduction in benefits. Rather, they reflect improvements in how future payments are estimated, based on data, assumptions, and methods reflective of MPI's experience.

Overall, the updated approach improves the accuracy, consistency, and transparency of MPI's estimates of future claim costs. It also ensures that the estimates are based on MPI's actual experience and are aligned with accepted actuarial standards of practice.

2 Technical Summary

This report documents updates to termination rate assumptions and valuation methodology for Accident Benefits. Specifically, Weekly Indemnity (WI) and Personal Care Assistance (PCA) were selected as the scope of the project due to the materiality and proportion of their case reserves; as of September 2025, these lines, respectively, comprise $855M (58%) and $354M (24%) of the $1,463M accident benefits gross, undiscounted case reserves. The changes are designed to improve the alignment of actuarial estimates with MPI's underlying claims experience and to enhance consistency between case reserving and actuarial valuation processes.

2.1 Methodology Overview

Termination rates have been developed using MPI's internal claims experience, replacing legacy assumptions derived from external studies. A Kaplan-Meier survival analysis framework has been applied to historical claims data to estimate termination probabilities, incorporating standard treatment of censored observations.

The resulting termination rates are segmented by duration since date of loss, claimant age, and gender.

A hybrid modeling approach is used whereby:

- Duration-based termination rates are applied in the early claim period of the first 10 years to capture recovery dynamics; and
- Age-based termination rates are applied in later durations to reflect the increasing influence of mortality and long-term persistence.

The transition point between these approaches is based on observed convergence in termination behaviour and is supported by comparative industry practices.

2.2 Key Assumptions and Judgments

The assumptions described in this report represent best estimate assumptions, defined as unbiased estimates of future experience based on available data and actuarial judgment.

Key assumption updates include:

- Termination rates: Derived from MPI experience using Kaplan-Meier estimation, with smoothing and parametric techniques applied where data credibility is limited (e.g., young ages, advanced ages);
- Serious injury treatment: Claims with credible indicators of non-recovery are modeled using age-based termination rates, reflecting a shift from recovery-driven to mortality-driven behaviour;
- RIB entitlement assumption: Updated to 50% of IRI entitlement based on empirical analysis of MPI payment data;

- Age smoothing assumptions: Credibility-based smoothing is applied in low-volume cohorts to stabilize estimates.

Where data limitations exist, actuarial judgment has been applied and noted in this report. These judgments are supported by sensitivity testing, consistency with observed experience patterns, and/or comparison to other data sources.

2.3 Data and Limitations

The analysis relies on internal claims and payment data, subject to standard validation and cleaning processes. Limitations include:

- Reduced statistical credibility in certain segments (e.g., early ages, late durations);
- Potential distortions in historical data arising from operational impacts (e.g., claims backlog, labour disruption); and
- Reliance on historical experience that may not fully reflect future trends.

These limitations have been considered in the selection of assumptions and are mitigated by using smoothing techniques, parametric adjustments, and the application of the factor for unforeseen volatility.

2.4 Unforeseen volatility

To account for unforeseen volatility, a 10% factor has been applied to best estimate reserves, reflecting actuarial judgment with respect to:

- Uncertainty in future termination experience;
- Data limitations and areas of reduced credibility;
- Model risk and simplifying assumptions; and
- Potential external variability affecting claim outcomes.

This factor is applied at an aggregate level to preserve the integrity of best estimate assumptions and ensure transparency in its application.

2.5 Valuation Methodology Updates

Corresponding changes have been made to the actuarial valuation framework to ensure consistency with updated case reserve assumptions. These include:

- Increased reliance on paid loss data, reflecting reduced reliability of incurred data following changes to case reserving methodology since historical diagonals were not restated due to data limitations;
- Adoption of a unified reserving approach combining Loss Development Factors (LDFs) and Cape Cod methods;

- Refinement of segmentation, payment patterns, and tail factor assumptions to improve stability and responsiveness of estimates.

Key valuation assumptions (e.g., decay rate, tail factors, payment patterns) have been selected using a combination of historical analysis and actuarial judgment, with consideration of recent operational impacts.

2.6 Validation and Governance

The methodology and assumptions have been subject to:

- Internal actuarial peer review;
- Comparison with peer organizations;
- Sensitivity testing across key assumptions; and
- Independent external review by Ernst & Young (EY).

Recommendations arising from these reviews have been incorporated where appropriate or identified as areas for future enhancement.

3 Overview of PIPP

MPI was incorporated as a Crown Corporation in 1971 under the Automobile Insurance Act. In 1974, the governing legislation was revised and became The Manitoba Public Insurance Corporation Act. Within Manitoba's public auto insurance framework, the Personal Injury Protection Plan (PIPP) serves as the province's statutory no-fault injury compensation system for people injured in motor vehicle accidents.[1]

On March 1, 1994, Manitoba introduced the no-fault PIPP system, replacing the previous combination of accident benefits and legal action for bodily injury claims. Under PIPP, compensation is based on specific economic losses arising from an automobile injury or death rather than on proving fault in court. For Manitoba residents, coverage follows them anywhere in Canada and the United States, regardless of if they own a vehicle. PIPP guarantees access to eligible benefits regardless of who caused the accident, which supports faster and more consistent compensation and reduces reliance on litigation. Visitors injured in Manitoba may also be covered, with the level of compensation depending on whether they were occupying a Manitoba-registered vehicle and, in some cases, on the degree of fault associated with the Manitoba vehicle involved.

Most benefits are indexed to the Consumer Price Index (CPI). Each injured person receives the full range of benefits for which they are eligible as accident-related costs or losses arise. For instance, someone unable to work due to their injuries may receive income replacement benefits[2] along with coverage for medical and rehabilitation expenses. They may also be reimbursed for caregiver and personal care costs.[3] If the injury results in permanent impairment, additional payment is provided for that as well.

[1] *Personal Injury Protection Plan, by Manitoba Public Insurance*
[2] *Income replacement, by Manitoba Public Insurance*
https://www.mpi.mb.ca/income-replacement/
[3] *Personal care assistance, by Manitoba Public Insurance*
https://www.mpi.mb.ca/personal-care-assistance/

The following is a non-exhaustive list of types of basic coverage provided under PIPP. All the below coverages under PIPP are indexed to the Consumer Price Index (CPI), ensuring that benefit amounts are adjusted for inflation and maintain their real value for claimants over time.

- **Income Replacement Indemnity (IRI)**: Provides compensation to claimants who cannot work due to injuries sustained in a vehicle accident. The benefit amount is calculated based on lost income and eligibility rules.
- **Retirement Income Benefits (RIB)**: Once a claimant reaches retirement age or fulfills eligibility requirements, RIB replaces IRI to provide ongoing financial support. Collectively, IRI and RIB are referred to as Weekly Indemnity (WI).
- **Personal Care Assistance (PCA)**: Covers costs for assistance with daily living activities when injuries prevent self-care. PCA benefits may include payments for caregivers or support services. The amount is determined by the degree of care required.
- **Permanent Impairment (PI)**: Provides a lump sum payment to those who suffer permanent physical or mental impairment because of an accident. The amount is determined by the degree of impairment.
- **Death Benefits**: Offers financial support to the families or dependents of individuals who die because of an accident. This includes funeral expenses and survivor benefits.
- **Medical and Personal Expenses**: Covers costs for medical treatment, equipment, and miscellaneous personal expenses related to accident injuries.
- **Rehabilitation Expenses**: Provides coverage for rehabilitation services, such as physical therapy, occupational therapy, and vocational retraining.
- **Caregiver Expenses**: Reimburses incurred costs when a caregiver is needed due to accident-related injuries, including support for dependents.
- **Lump Sum Indemnity for Students**: Provides a one-time payment to students who suffer injuries that impact their educational or career prospects.

As of September 30, 2025, the following are gross, undiscounted case reserves for Accident Benefits (Basic), split by valuation line and coverage, along with % of total:

Acc Ben (Sept 2025)	Coverage	$M	% Total
Weekly Indemnity	IRI	489	33%
	RIB	366	25%
	Other WI	5	1%
Other Indexed	PCA	354	24%
	Other Indexed	213	14%
Other Non-Indexed	Non-Indexed	45	3%
Total		1,473	100%

4 History of Reserving Methodology

4.1 Reserving Calculator

The original calculator was introduced around the year 2000, shortly after the introduction of PIPP. Its function was to calculate case reserves for most PIPP coverages by calculating the total estimated future benefit payments for a claim, using termination rates (recovery/death/other cessation), and adding a factor for unforeseen volatility.

The calculator used inputs such as date of evaluation, date of birth, date of loss, gender, base entitlement, and "serious injury" status to determine the case reserve. Other optional inputs, depending on the circumstances of a claim, include net Canada Pension Plan (CPP) disability payments, current and/or expected residual earnings, effective top-up / return-to-work date, and a deferred annuity start date, and, for PCA, age thresholds and entitlement percentages.

The calculator projected bi-weekly payments into the future, applying termination rates which vary by gender. The calculator assumed a maximum age of 100. The calculator also supported discounting, although this was not used in practice, as discounting and indexation was handled centrally by the actuarial team in the reserving process. The factor for unforeseen volatility was applied through application of a 0.9 scaling factor to the bi-weekly termination rate applied.

When calculating WI benefits, the calculator was programed to consider the legislated rules regarding eligibility. For example, a claimant receiving IRI becomes eligible to receive RIB on the latter of:

- The day of their 65th birthday.
- Five years after the day that their entitlement to receive income replacement commenced.

For example, a person who began receiving IRI at age 63 would continue to be eligible for a period of five years. If their entitlement to IRI continues until the fifth anniversary, coverage would transition to RIB.

There have been minimal developments to the calculator since its initial implementation around the year 2000. The only known historical changes to the calculator are noted below.

- Around January 2005, factors were developed to adjust the calculation for claims deemed as a serious injury, applying to the first 4 years following the date of loss. There is no available documentation regarding how these factors were derived.
- Around December 2020, a minor change introduced to support a new gender marker "X". This was consistent with MPI's news release announcing that new gender identity marker would be available on ID cards.[4] This change to the calculator was simply to support the input of the new marker but did not change the fundamental calculations.

[4] *New gender identity marker now available on Manitoba driver's licences/ID card, by Manitoba Public Insurance* https://www.mpi.mb.ca/new-gender-identity-marker-now-available-on-manitoba-drivers-licences-id-card-manitoba-public-insurance/

4.2 Termination Rates

The previous termination rates used in the reserving calculator were derived from a 1992 research paper published by the Canadian Institute of Actuaries (CIA).[5]

There have been considerable changes in morbidity, mortality, medical advancements, societal factors and government programs over the past 30+ years since this research paper was published.

The previous approach was not directly applicable to MPI, as Manitoba's PIPP coverages and rules differ significantly from those used then in Ontario's Statutory Accident Benefits Schedule (SABS) on which the paper was based. PIPP is a no-fault system, meaning benefits are paid regardless of who was at fault in the accident. While SABS, on the other hand, has a mix of no-fault and fault-based benefits. Further, PIPP provides universal coverage for all residents, including income replacement, medical expenses, and caregiver benefits. Ontario's system has similar benefits, but coverage limits and entitlements were not identical. For example, PIPP provides 90% of net income up to a maximum insurable gross annual income of $123,000 (as of 2026/27). SABS provides 70% of gross income, capped at $400 per week ($20,800 per year).

Additionally, the previous method directly took the termination rates published in the research paper with no comparison or adjustment for Manitoba-specific information. Hence, these previous termination rates were not based on MPI's own historical experience of over 30 years, limiting its relevance and accuracy, and usefulness for decision-making. With additional emphasis on actuarial analysis in recent years, and accompanying resources and full-time employees.

The research paper was also based on traditional long-term disability (LTD) coverage in the context of auto accidents, as opposed to specifically for automobile accidents. This is relevant as the cause and types of disability would vary, and this impacts the time to termination.

4.3 Operational Changes

In September 2010, a new claims management system was implemented. The new system required that case reserves be set up to pay expenses.

In 2017, MPI revised its reserving process for long-term PIPP claims by centralizing the process to a dedicated team in 2017. As a result, most weekly indemnity claims older than 24 months use the calculator to set reserves.

In 2018, MPI discovered a backlog in processing payments and reserves for Permanent Impairment for insurance years 2015–2017. MPI undertook a review of claims in those insurance years, and case reserves were increased significantly. A further review of insurance years 2015–2017 was performed by MPI in 2020, which led to the removal of excess reserves. In 2021, the backlog was cleared and case reserves returned to normal.

[5] *Accident Benefits Long-Term Disability Losses, by James Christie*

In late August to early November 2023, MPI experienced a labour interruption over a period of 10 weeks. During this time, there was a significant reduction in staff available for claims handling. This impacted MPI's ability to handle claims in a timely manner, leading to a lag in reporting and settlement patterns. As a result, the observed payment patterns over this period may be distorted for some coverages. As of March 31, 2025, MPI considers that this disruption has fully passed and effectively caught up to pre-labour interruption levels.

In April 2025, MPI implemented an e-form the claims management software to capture the annual reserve review process inputs and outputs. This creates an ongoing database that tracks changes made for each claim and coverage. This allows for easier validation of inputs, as well as creates a rolling set of information to inform the calculation of reserves for any claim at a given point in time.

In April 2026, the new reserving calculator began to be used for the coverages of PCA and WI.

5 Calculator Methodology Updates

This section describes the changes made to the case reserving methodology, including updates to termination rate assumptions and related modeling approaches. These changes address limitations in prior assumptions and improve the alignment of case reserves with MPI's observed experience.

The current changes modernize and strengthen the approach to termination rate estimation by leveraging over 30 years of data from MPI experience. This shift addresses previous limitations where older methods were based on external assumptions not tailored to MPI's unique PIPP framework. Incorporating MPI's historical experience enhances the accuracy and relevance of the models. The new methodology also improves capacity for internal analysis, supports more consistent forecasting, and promotes long-term financial stability through refined, evidence-based assumptions.

The assumptions described in this report are intended to represent best estimate assumptions, defined as unbiased estimates of future experience based on available data and actuarial judgment.

A separate factor for unforeseen volatility has been applied to reflect uncertainty, potential variability in experience, and limitations in the underlying data and modelling. The factor is applied at the aggregate level to preserve the integrity of best estimate assumptions and to provide a transparent and adaptable framework for future refinement.

5.1 Termination Rates

The new termination rates have been compared to those used by peers for similar coverages. In general, the methods used and resulting termination rates are similar.

5.1.1 Termination Rate Changes

The previous approach blended duration-based and age-based estimates. The duration of the claim is the amount of time that has passed since the date of the loss. In either case, the termination rates vary by gender.

When deriving the termination rates, claims with unknown or non-binary gender were excluded because the sample size was too small to support reliable analysis.

When calculating a case reserve, claims with non-binary gender are calculated using male termination rates because it is typically the more conservative reserving option. Male termination rates are lower than female termination rates for several key durations in early years, resulting in longer expected claim durations and therefore higher reserve estimates. While this relationship does not hold uniformly across all durations and coverages, the use of male rates as a default assumption is a practical approximation in the absence of more granular experience data for these cohorts.

The new termination rates are calculated using a statistical methodology called Kaplan-Meier estimation.[6] This is applied to calculate 4 outputs of termination rates based on 3 inputs: duration, age, and gender.

Duration-Based	Age-Based
Used during the first 10 years of a claim.	Used inyears 11+ of a claim.
Monthly duration-based estimates capture early duration recovery patterns.	Annual age-based estimates capture later duration mortality patterns.
In any event, the rates differ based on the claimant's gender.	
For any "serious injury" claim, the age-based termination rates always apply. (See Section 5.2.2)	

There are different termination rate tables used for each of WI and PCA. Each were derived separately, but in a comparable manner. The method of deriving these rates is outlined below. The derivation of termination rate assumptions is based on MPI's historical claims experience, as described below.

Claims and payment data were queried and filtered to only include those classified as Income Replacement or Personal Care. Data cleaning and processing occurred to remove extraneous or erroneous information. For example, false transactions in the system on a specific date were excluded because of a system transition and claims with incomplete or inconsistent data were removed. The length of time between the date of loss and the last transaction was calculated in days for each claim. A statistical approach, Kaplan-Meier estimation, was used to turn this experience data into an estimate of termination frequencies.

The Kaplan-Meier methodology incorporates standard treatment of censored observations, recognizing that not all claims have reached termination at the evaluation date. This allows for an unbiased estimation of termination probabilities based on observed experience.

In all cases, the same approach was used to derive the termination rates for WI and PCA.

The Canadian Institute of Actuaries notes in a media release that LTD insurance needs updating as Canada's demographics change.[7] This is explored further in an insight statement.[8] This could influence MPI's experience in the future but is outside the scope of this project.

5.1.2 Duration-based Termination Rates

Duration-based termination rates were developed separately for each of the first 120 months following the date of loss and for each gender, using MPI's observed historical claims experience within each monthly duration. This approach allows the model to reflect how termination behaviour changes

[6] *Understanding survival analysis: Kaplan-Meier estimate, by Manish Kumar Goel, Pardeep Khanna, and Jugal Kishore* https://pmc.ncbi.nlm.nih.gov/articles/PMC3059453/
[7] *Long-term disability insurance needs updating as Canada's demographics change, by the Canadian Institute of Actuaries* https://www.cia-ica.ca/publications/224108e/
[8] *The Evolution of Employer-Sponsored Long-Term Disability Plans, by Mathias Link and Joe Nune* https://www.cia-ica.ca/publications/224107e/

materially over the life of a claim, particularly in the earlier years when recovery patterns are most active. Monthly granularity was selected because the probability of termination can change meaningfully from one month to the next in the early stages of a claim, and a broader annual approach would mask this variation.

The resulting pattern is consistent with expectations for disability-related benefits: termination rates are highest in the early months and years after injury, when recovery, return to work, and other forms of benefit cessation are most likely, and then generally decline as claim duration increases. Claims that remain open for longer periods tend to represent more persistent or severe injuries and therefore are less likely to terminate due to recovery alone. For this reason, duration-based rates provide the most appropriate representation of claim behaviour in the first 10 years, before the methodology transitions to age-based rates in later durations when long-term persistence and mortality become more influential drivers. See Appendix A for a table showing these rates.

5.1.3 Age-based Termination Rates

For ages below 30, the limited volume of historical claims data results in low statistical credibility for directly observed termination rates. As such, termination rates are set equal to a weighted average of rates for ages 30 to 35, which provides a more stable estimate while maintaining consistency with observed experience in adjacent age groups. This approach reflects a standard actuarial practice of credibility-weighted smoothing, where data limitations necessitate reliance on broader groupings. The impact of this assumption is assessed to be immaterial due to the relatively small proportion of claims in these age ranges.

When creating age-based termination rates for ages 30 to 80 for each gender, the rate for a given age is equal to the average of the 5 nearest ages. For example, age 52 is the average of ages 50–54. This is to create stability in the termination rate curve and remove noise due to randomness.

When creating age-based termination rates for ages 80 to 100 for each gender, there is limited internal data. This also implies that assumptions for these ages are of smaller materiality. A parametric approach is applied where an exponential curve of termination rates is used for older ages, intended to mimic a mortality curve whereby the termination rate increases exponentially until 0.75 in age 99 and the model assumes a max age of 100 (or 1.00 termination at age 100). The curve is calibrated using both Statistics Canada mortality data[9] (whereas the termination rates are approximately a 3x factor larger than the general population) as well as a group long-term disability termination study published by the Canadian Institute of Actuaries.[10] Comparing the parametric curve to the limited internal data showed good consistency. See Appendix B for a table showing these rates.

5.2 Assumption Refinements

In addition to the overall termination rate framework, several assumption refinements were needed to better reflect observed claim characteristics. These refinements combine empirical analysis with actuarial judgment to keep the assumptions reasonable, stable, and aligned with MPI's experience. They were made where data credibility is limited or where claim-level information provides insight beyond the base model. The key refinements are outlined below.

In addition to the overall termination rate structure described above, several specific assumption refinements were required to better reflect observed claim characteristics. These refinements incorporate both empirical analysis and actuarial judgment to ensure that the resulting assumptions remain reasonable, stable, and aligned with MPI's experience. Adjustments were made in areas where data credibility is limited or where additional claim-level information provides insight beyond what is captured in the base model. The key assumption refinements are described below.

5.2.1 Estimation of RIB Entitlement

People who are receiving income replacement become eligible to receive the Retirement Income Benefit (RIB) on the latter of: (a) the day of their 65th birthday, or (b) five years after the day that their entitlement to receive income replacement commenced.

Income Replacement covers 90% of net employment insurance benefits, lost wages or salary based on gross yearly employment income, up to a maximum that is adjusted annually.

The RIB entitlement is based on 70% of net income minus any other pension income one might receive, including Canada Pension Plan and Old Age Security payments.

MPI does not have access to information on claimants' future retirement income streams. As such, it is difficult to estimate RIB entitlements for an individual claimant until the commencement of RIB benefits (coinciding with the end of IRI benefits). As such, an assumption must be made.

Previously, it was estimated that the unknown, future RIB entitlement would be 78% of the current IRI entitlement. This was knowingly conservative at the time of selection, citing unknown impacts of future relapse/reopened claims. That conservatism in RIB entitlement is no longer needed, as relapses are now implicitly reflected in the termination rate analysis by using the final payment date as the point of claim termination. In effect, relapsed claims are treated as a single continuous claim for conservative termination rate development.

To reflect MPI's actual experience, the new assumption is set to 50%; that is, if a claimant has an IRI entitlement of $1,000, the RIB entitlement is assumed to be $500.

The 50% RIB-to-IRI assumption is supported by analysis of MPI's historical payment data. Specifically, actual IRI and RIB payments were queried, filtered, and compared at the claimant level, using the most frequently observed payment amounts (subject to minimum credibility thresholds). This analysis produced an empirical RIB:IRI ratio and forms the basis for selecting 50% as a best estimate assumption.

Regardless, once the claimant's eligibility for IRI ends and eligibility for RIB begins, the actual RIB entitlement is then known and there is no need for the estimate. The actual RIB entitlement is determined and used for projections.

5.2.2 Serious Injury Adjustment

Previously, there was a "serious injury" adjustment to the termination rates in the first 4 years after the date of loss. If a claimant was deemed a non-serious injury, the following additional annualized termination percentages were added for each of the first 4 years respectively: 43%, 22%, 14%, and 10%. If the claimant was deemed seriously injured, these factors were not applied.

For serious injury claims, age-based termination rates are applied even within the first 10 years of the claim. This overrides the usual use of duration-based rates because, where recovery is not expected or is highly unlikely, age-based rates better reflect mortality-driven termination patterns.

The use of age-based termination rates for serious injury cases reflects actuarial judgment that, where there is credible information indicating that recovery is unlikely, termination behaviour is more closely aligned with mortality-driven decrements than recovery-driven decrements. While explicit empirical segmentation of serious injury claims is limited in the current study, this approach is supported by:

- The observed reduction in recovery likelihood for long-duration claims;
- The convergence of duration-based and age-based termination rates at later durations;
- The availability of claimant-specific information indicating permanence of injury, which provides additional predictive value beyond duration alone.

This approach is considered a reasonable application of actuarial judgment given available data limitations and is intended to improve the accuracy of projected cashflows for claims where recovery is not expected. Sensitivity testing indicates that this assumption has a directional impact consistent with the underlying claim characteristics.

5.2.3 Factor for Unforeseen Volatility

A factor is added to the best-estimate reserve calculations to help protect against uncertainty, volatility, and unexpected outcomes. It acts as a safety cushion by making the estimates more conservative. The current factor is set at 10%; that is if the best estimate for a case reserve is $1.0m, after applying the factor it becomes $1.1m. All figures used in valuations and otherwise are on a post-factor basis, as produced by the calculator.

Previously, a 10% factor was applied to each individual termination rate in the calculation. This is like the new approach; however, there were compounding effects over time, and it was difficult to ascertain what the previous true best estimate amount would have been. The new approach is both simpler and easier to understand and communicate. In addition, the new approach can be more easily modified if the factor percentage were to change in the future.

Incorporating a factor ensures that reserves for WI and PCA benefits are sufficient even under less favorable conditions, such as longer claim durations or delayed recoveries. This contributes to the long-term financial health of the plan, aligns with actuarial standards of practice, and supports MPI's commitment to delivering stable, reliable benefits to claimants.

The selected factor for unforeseen volatility of 10% reflects actuarial judgment considering:

- Uncertainty in future termination behaviour, particularly for long-duration claims;
- Limitations in historical data, including data sparsity at younger and older ages;
- Model risk, including the use of simplified assumptions (e.g., smoothing, parametric extrapolation); and
- External factors that may affect future claim emergence (e.g., changes in medical outcomes or claimant behaviour).

The factor is applied at the aggregate level to preserve the integrity of best estimate assumptions and to provide a transparent and adaptable framework for future refinement.

The factor also reflects, in part, the data limitations and areas of reduced credibility described previously, ensuring that uncertainty arising from these factors is appropriately reflected in the valuation.

5.3 Limitations

The analysis relies on internal claims and payment data extracted from MPI systems. Data processing included filtering, cleaning, and removal of anomalous records where appropriate.

The following limitations are noted:

- Limited credibility in certain cohorts (e.g., early ages, late durations);
- Potential distortions arising from operational disruptions (e.g., claims backlog and labour interruption);
- Dependence on historical experience, which may not fully reflect future conditions.

These limitations have been considered in the selection of assumptions and are partially mitigated through smoothing techniques, parametric adjustments, and the application of a factor for unforeseen volatility. The data has been reviewed for reasonableness and consistency for the purposes of this analysis and is considered appropriate for use, subject to the limitations described above.

6 Valuation Methodology Updates

In addition to changes to the case reserving calculator, corresponding and related updates were also made to the actuarial methodology for valuations, typically done quarterly. Given the updates to case reserving assumptions, corresponding changes to the actuarial valuation methodology were required to ensure consistency between claim-level estimates and aggregate reserve projections. These changes are described below.

6.1 Project Segments

Segmentation generally refers to calculating reserves by grouping similar coverages. These improve precision, deepen analysis, and allow the valuation team to draw better insights.

The segmentation of coverages within Accident Benefits has been refined.

<table>
<tr><th>AB Segments</th><th>Previous</th><th>New</th></tr>
<tr><td rowspan="3">Weekly Indemnity</td><td rowspan="2">Weekly Indemnity (non-enhanced)</td><td>IRI & RIB</td></tr>
<tr><td>Other WI</td></tr>
<tr><td>WI enhancements</td><td>Within coverages</td></tr>
<tr><td rowspan="4">ABOI</td><td rowspan="3">ABOI (non-enhanced)</td><td>PCA</td></tr>
<tr><td>Travel</td></tr>
<tr><td>Other Indexed</td></tr>
<tr><td>ABOI enhancements</td><td>Within coverages</td></tr>
<tr><td>Non-Indexed</td><td>Non-Indexed</td><td>Non-Indexed</td></tr>
</table>

The reason for the increased segmentation was to aid the analysis of updated case reserves based on new termination rates affecting IRI, RIB, and PCA. Discounting is now applied by segments within ABOI. Also, a new segment for Travel Expenses was created within ABOI Other because the indexation of travel costs as related to gasoline prices varies from the indexation for most other coverages.

Previously, PIPP Enhancements were segmented out; now, these are incorporated directly within the coverages which they are enhancing (i.e., IRI, RIB, PCA, etc.).

There are no changes to non-indexed lines.

6.1.1 PIPP Enhancements

In October 2009, PIPP Enhancements were enacted by the Government of Manitoba. These had previously been analyzed separately but are now incorporated into the analysis of the corresponding coverage for which they are enhancing.

One of the changes was that when permanent impairment benefits have been paid, and the claimant is later entitled to death benefits, the death benefits will no longer be offset by the permanent impairment benefits already paid (as was the previous practice). At the time, a provision of $30M for such a change was added to reflect that these types of payments were not captured in historical data at the time but

could now emerge in the future. As the data now adequately captures this in the development over time, there is no need for this explicit provision and the $30M provision has been removed.

6.2 Case Reserve Data

For both WI and PCA, the incurred data for the latest AY was replaced with the updated incurred loss experience (i.e., unchanged paids and new case) and placed into the actuarial reserving software which backs into the updated case. Figures in this section are as of March 31, 2026.

The claims existing in the system at the time of the valuation were evaluated with the new case reserving calculator to assess the impact of changing the calculators compared to the previous approach.

- For WI: $31M decrease in case reserves, or approximately 1.5% of total WI case reserves.
- For PCA: $43M decrease in case reserves, or approximately 11.5% of total PCA case reserves.

6.3 Unified Method

Ultimate loss estimates for Accident Benefits were calculated using a unified method consisting of multiplicative Loss Development Factors (LDFs) and the generalized Cape Cod method based on exposures and paid losses. These methods, including the combining of the methods in this fashion, are described in more detail in the paper "Reserving with Incomplete Exposure Information" by David R. Clark, including a technical description of how the Cape Cod mechanical methodology is applied.[11]

Before adopting the unified approach, ultimate losses were typically estimated using a pure multiplicative LDF (chain ladder) method, which projects outcomes based on historical observed development patterns in loss data. However, this approach can be unstable for immature accident year. The Cape Cod method is an improvement because it introduces an exposure-based expected loss ratio while still using development patterns, making estimates for recent years more stable and responsive. The unified method combines these approaches, using LDFs where development data is credible and Cape Cod where exposure data improves reliability. This results in a more balanced and statistically consistent estimate.

Following changes to the case reserving methodology via the new calculators, incurred loss experience is no longer a reliable basis for projection due to shifts in case and reporting consistency. The new reserving approach was not applied retroactively. As a result, the analysis relied more heavily on paid losses, which provides a more stable and objective measure.

[11] *Reserving with Incomplete Exposure Information, by David R. Clark*
https://www.casact.org/sites/default/files/database/forum_08fforum_4clark_reserves.pdf

6.3.1 Loss Development Factors

A loss development factor (LDF) is an actuarial multiplier used to project current reported or paid losses from a given valuation age to their estimated ultimate amount, based on historical claims development patterns.

For PCA and ABOI Other, LDFs were selected based on the volume-weighted average of the 7 previous accident years' relevant development periods (quarters) excluding the highest and lowest. Weekly Indemnity was selected similarly but using 5 instead of 7 accident years. Both were selected to limit volatility. These adjusted, incurred LDFs are applicable to accident years 2004/05 and prior.

Travel Expenses are a small portion of ABOI. For Travel Expenses, LDFs were selected based on the volume-weighted average of the previous 5 accident years' relevant development periods (quarters) excluding the highest and lowest to decrease volatility. However, Travel Expenses only sees development in the first year. These adjusted, incurred LDFs are applicable to all accident years.

6.3.2 Cape Cod Method

For Weekly Indemnity, PCA, and ABOI Other, this methodology was applicable to accident years 2005/06 onwards.

An assumption of the Cape Cod method is decay rate, which controls how much weight is given to historical loss ratios versus the latest observed ones. This essentially smooths out the initial expected loss ratios. This was set to 50% to reflect equal weighting.

The selection of a 50% decay rate reflects actuarial judgment intended to balance stability of long-term loss ratio assumptions and responsiveness to emerging experience. This equal weighting provides credibility to historical and recent experience, which is considered appropriate given the presence of structural changes in case reserving methodology and the potential volatility in recent experience arising from operational disruptions (e.g., backlog effects and labour interruption).

6.3.3 Tail Factors

A tail factor is an actuarial tool used to estimate the final, ultimate cost of insurance claims that continue to develop (i.e., get reported or paid) long after the initial data is collected, bridging the gap from the oldest available data in a loss triangle to the true final cost, accounting for long-tail claims. It helps project development beyond the typical observation period, ensuring a complete estimate for reserves.

Tail factors applied to all the paid methods. These were selected based on the model that best fits each line, all of which were the inverse power curve. The tail factor selections, which apply after a duration of 33 years, are 1.12 for Weekly Indemnity, 1.14 for PCA paid (1.02 for PCA incurred), and 1.01 for ABOI Other.

6.3.4 Loss Ratios

The “a priori” loss ratio is an insurer's initial, expected, or projected loss ratio for a future period, calculated before actual claims data emerges, serving as a baseline for reserving. An example is the Bornhuetter-Ferguson (B-F) method.

For Weekly Indemnity, the B-F method was changed to select a 50:50 weighting on the original “a priori” loss ratios and the loss ratio based solely on the paid developmental method.

For Indexed, a 50:50 weighting was used on the Incurred and Paid developmental methods for the loss ratios (there is no “a priori” for any of the individual segments).

6.3.5 Payment Patterns

Payment patterns are historical sequences that show when claims were paid and how it changes over time. These are used to project future payments for current reserves. This is often by analyzing data in loss triangles to find trends in how quickly claims develop from initial reporting to final settlement, adjusting for factors like inflation and when claim settlement speed changes.

Previously, payment patterns had been based on old LDFs.

The updated payment patterns are based on Implied Patterns (Paid as % of Ultimate), with a 5-year average selected excluding the highest and lowest (Travel Expenses uses a simple 3-year average). Payment patterns are "smoothed" to remove reversals; that is, linear interpolation replaces all reversals to ensure the trend is monotonic. Payment patterns are interpolated from the latest selected development period to the same period the tail factor selection is extended to. Separate payment patterns are selected for each of Weekly Indemnity, PCA, Travel Expense, and ABOI Other.

The implied payment pattern approach is better because it is directly tied to the selected ultimate losses, ensuring consistency between timing and valuation assumptions. It also provides a more accurate, stable, and transparent representation of actual cashflow emergence by removing distortion from development factors and smoothing volatility.

6.4 Tabular Reserves

No longer required in the future as a product of this project, this process is a detailed actuarial workflow aimed at determining reserves for IRI & RIB. It requires querying updated claim data from Business Objects for all claims over 10 years since the date of loss. The goal is to ensure claim information is accurate and consistent by identifying closed, reopened, or new claims, correcting discrepancies, and documenting changes. Once data alignment is complete, claims with changes to incurred amount are flagged and consolidated into a template that calculates biweekly entitlements using a reserve calculator. The process involves validating reserve changes, adjusting factors like CPP offsets and top-ups, and investigating anomalies through the claims management software. Final steps include updating templates, recalculating reserves, and documenting any manual adjustments or data issues. Ultimately, this ensures that reserve estimates reflect current claim statuses and financial obligations.

This process, for claims over 10 years since the date of loss, has previously been done with Excel, outside of the typical reserving software. This required immense manual work to complete this process each quarter; specifically, gathering info and calculating all claims could take up to 2 weeks.

This process has now been retired. Instead, this is now captured directly within the actuarial reserving software. This increases efficiency, reduces risk of manual error, and improves consistency in the approaches.

7 Financial Impact

The following section summarizes the financial impact of the combined changes to both case reserving assumptions and valuation methodology.

To assess the impact of the changes to methodology, data for each claim was required to be created/maintained to evaluate the case reserving dollar impact on a claim level. As of April 2025, a form in the claims management software captures reserve changes such that the change in a reserve, and its inputs, are captured for future analysis.

Other factors may also cause variance from this estimate. Macroeconomic factors such as Inflation, discount rates, and other contributing factors will change in future quarters, and are contributing factors to the differences in estimates between September 2025, December 2025, and March 2026.

Corresponding with the update to termination rates within the calculator, the valuation team also refined and updated its valuation methodology. There are 2 primary reasons for this change: (1) the change to the calculator makes it increasingly difficult and less precise to use the previous methodology, and (2) given the case reserves will be changing because of the termination rates, this is a natural time to reevaluate approaches including the split of valuation lines, the assumptions in payment patterns, tail factors, and development methods and factors. Termination rate (case) and valuation changes (actuarial assumptions) are combined when estimating impacts as they are closely related.

The project's overall impact relative to the previous method, estimated as of March 31, 2026, is a $100M reduction to liabilities. The split between valuation lines and contributing drivers of change are below.

Impact to Ultimates ($M)	WI	ABO-I	Total	Driver of Change
Case	(31)	(43)	(74)	Updated termination rates
Actuarial Valuation Assumptions	13	(39)	(26)	Updated assumptions (loss ratio, LDFs, etc.) Using Paid methodology Lengthening of settlement patterns
Total	**(18)**	**(82)**	**(100)**	
Impact as a %	*-1.9%*	*-11.5%*	*-6.0%*	

8 Review Process

8.1 Internal Peer Review

Comprehensive peer review was performed within MPI's actuarial team. Questions were raised regarding areas where documentation could be improved, identified potential process improvements, as well as critiqued methods. These have been reviewed, with some changes implemented and some ideas saved for later improvements. The nuances of these are beyond the scope of this report, however contributed to the internal checks and controls to ensure the case reserving calculators were ready for implementation.

Termination rates in the WI and PCA calculations have been assessed with sensitivity tests under a variety of assumptions for all age ranges. These were also shared with the external reviewer.

8.2 External Independent Review

Ernst & Young (EY) undertook an independent review of the termination rates development and produced a detailed report documenting findings and conclusions. Please refer to their report for more information. A portion of the recommendations are summarized below. This report was received by MPI prior to the finalization of the new termination rates and hence some of the recommendations were able to be incorporated into the final version.

8.2.1 Recommendations Incorporated

- Aligning time origin and censoring definitions
    - Recommendation: Use date of loss as the starting point and align censoring definitions.
    - MPI response: This changed the starting point of the calculation of duration of loss from using the first payment date to instead using date of loss. Ensured that the calculation of the duration is not dependent on claims handling procedures and timelines in the early stages of a claim.
- Correcting mapping and payment-floors (identified both by EY and the internal peer review)
    - Recommendation: Related to alignment on the definition of what a "payment" is in respect to WI and PCA coverages a payment.
    - MPI response: Ensured that only true WI and PCA payments were included in the analysis, and not reimbursements or cashflows unrelated to the coverage under analysis.
- Strengthening validation and documentation
    - Recommendation: Strengthening validation and documentation regarding the development of the termination rates and the calculators.
    - MPI response: The actuarial team conducted thorough peer review with findings clearly documented.
    - Validations were performed to ensure correctness, and documentation was added to ensure the work could be reproduced and understood by future users.

8.2.2 Recommendations Not Incorporated

- Broadening coverage filters
    - Recommendation: Future iterations of this work could explore the time to termination segmented by each specific coverage type (student, full-time employed, part-time employed, retired, etc.).
    - MPI response: Using an overall simplified approach is sufficient, especially for the first iteration of this analysis.
- Harmonizing gender logic
    - Recommendation: Future iterations could add extra controls to ensure the logic associated with the sorting of genders in the analysis is consistent across the various platforms.
    - MPI response: This is of immaterial overall financial impact but would be considered for future iterations.
- Calibrating graduation, especially at late ages
    - Recommendation: Future iterations could add increased attention to the approach to the older ages.
    - MPI response: This is of mild overall financial impact due to the limited number of claimants reaching older ages, and with limited data available and a goal to focus on more material factors, the simplifying assumption was retained.
- Aligning discounting and inflation frameworks
    - Recommendation: Align discounting and inflation frameworks within the case reserving calculators with the centralized approach.
    - MPI response: Discounting and inflation within the case reserving calculator are not relevant to the scope of the termination rate project, as discounting and inflation are handled centrally by the valuation team. This is was left unchanged.

8.3 External Auditor

Results of the project and a summary of the related methodology changes have been, and will continue to be, shared with PwC as part of the external audit process. This includes communicating the key updates to termination rate assumptions, case reserving methodologies, and valuation approaches, together with the rationale for those changes and their estimated financial impact. Ongoing communication with the external auditor supports transparency, facilitates review of the underlying methods and assumptions, and helps ensure that the resulting reserve estimates are appropriately understood in the context of MPI's financial reporting.

9 Implementation

Implementation of the termination rate changes, valuation methodology updates, and new reserving calculators have occurred in stages across financial reporting, operational claims handling, and actuarial valuation processes.

The initial estimated impact of the project was $104M as of September 30, 2025, and this amount was reflected in February month-end financial reporting. The estimate was subsequently updated to $97M as of December 31, 2025, and to $100M as of March 31, 2026. These revisions reflect the normal refinement of reserve estimates as updated claim information becomes available and assumptions are applied in practice, particularly discount and inflation assumptions.

Operational implementation began on April 1, 2026, when the Injury Claims Management team started applying the new calculators as claim files came up for renewal or review during the normal course of the year. This approach allows the revised reserve methodology to be incorporated gradually, practically, and naturally rather than attempting to estimate a one-time mass update of all claims. As updated reserves are established, the related input data and reserve amounts are recorded in the claims management software, creating a more consistent record for operational use, traceability, and future analysis. At the same time, the valuation team will continue using the new actuarial valuation methodologies in future quarterly reserve analyses so that claim-level reserving and aggregate valuation remain aligned under the updated framework.

Systems and data readiness are important enablers of the updated approach. The use of claims management software to capture revised reserve amounts and the associated input data creates a more structured foundation for operational use, validation, and future analysis. Continued attention to data completeness, input consistency, and usability of system-captured information will remain important, particularly as more claims are reviewed under the new methodology and the resulting experience is used to assess performance and support future refinements.

Post-implementation validation will be performed through ongoing comparison of expected and actual reserve movements at both the individual claim level and the aggregate valuation level. This review will help assess whether the updated termination rates, calculator logic, and valuation assumptions are producing outcomes that are directionally and quantitatively consistent with expectations. Where meaningful deviations emerge, the results will inform further review to determine whether they reflect normal experience variability, data quality issues, operational implementation differences, or areas where the methodology may require refinement.

Governance and ownership of the updated methodology will continue to reside across both the actuarial and claims functions. The actuarial team is responsible for maintaining the valuation methodology, monitoring aggregate reserve impacts, and recommending future assumption updates where warranted. The Claims Team remains responsible for the application of the calculators within operational case reserving and for maintaining the quality of claim-level inputs used in those calculations. This shared ownership structure is intended to ensure that methodology decisions, operational applications, and financial reporting remain aligned as the framework matures.

Training and change management have also been considered, as ongoing communication between the actuarial and claims teams help promote consistent application of the new approach, reduce the risk of interpretation errors, and make it easier to identify implementation questions early in the rollout period.

Future enhancements may be considered as additional implementation experience and claim data become available. Over time, these enhancements may improve precision, strengthen governance over assumption changes, and support the continued evolution of both the calculators and the related actuarial valuation methods.

10 Appendix A: Update to Duration-based Termination Rates

Old applied duration-based termination rate as additional multiplicative factor on top of age-based rates.
New duration-based termination rates are applied standalone; that is, in place of an age-based term rate.
Neither is typically used until 24 months after the date of loss (greyed out); these are largely irrelevant.

10.1 Duration-based Termination Rates – Table Format

Calculator	Old		New WI		New PCA	
Duration (M)	F	M	F	M	F	M
0	3.03%	3.03%	16.42%	17.64%	2.64%	1.83%
1	3.03%	3.03%	18.18%	17.74%	3.08%	2.08%
2	3.03%	3.03%	18.89%	17.03%	5.16%	3.23%
3	3.03%	3.03%	16.05%	15.58%	5.74%	5.43%
4	3.03%	3.03%	14.71%	12.76%	7.86%	6.32%
5	3.03%	3.03%	12.54%	11.28%	8.70%	8.38%
6	3.03%	3.03%	10.99%	8.93%	9.61%	8.45%
7	3.03%	3.03%	8.49%	7.71%	7.96%	7.40%
8	3.03%	3.03%	7.85%	6.94%	7.91%	7.91%
9	3.03%	3.03%	7.67%	6.48%	7.42%	6.51%
10	3.03%	3.03%	6.43%	5.62%	7.10%	5.29%

12 Appendix C: Updated to Termination Rates – Graphical Examples

The new curves (green and blue) are lower at later ages, reflecting the increase in life expectancy.

This is outweighed by the increase in recoveries in the early years, when the new rates are higher.

13 Inputs for Calculators

13.1.1 Common to Both Calculations

The following inputs are common between both the WI and PCA calculations.

Input Field	Description
Date of Evaluation	Serves as an anchor point for calculating the present value of future PCA payments. Ensure all projected benefits are consistently discounted to a single, defined date.
Date of Birth	The claimant's date of birth, used to determine age at specific time points for eligibility and payment calculations.
Date of Loss	The date of the accident that caused the personal injury.
Gender	Used when applying gender-specific Kaplan-Meier termination rates to estimate the longevity of the benefit.
Base Entitlement	A dollar amount representing full entitlement, before applying percentage reductions or adjustments by age.
Termination Rates Table	Although applied similarly, there are different termination rates within the table used for each of the WI and PCA calculations. See appendices.

13.1.2 Unique to WI Calculation

Further inputs required for this calculation are:

Input Field	Description
Net CPP Disability	The bi-weekly net amount of Canada Pension Plan (CPP) disability benefits received by the claimant. This amount is subtracted from the gross amount to determine the net payable benefit.
Current Residual Earnings	The amount the claimant is currently earning (e.g., through part-time work or modified duties). These earnings are used to offset benefits and reflect a partial return to work.
Effective Top-Up Date	The date that the claimant returned to work, for when there is a current residual earning input given. Alternatively, is the estimated future date to return to work when there is an expected residual earning input given.
Serious Injury	A Yes/No indicator to reflect the status of the claimant with respect to their status regarding serious injury adjustment previously discussed.
Expected Residual Earnings	The claimant's anticipated future earnings after injury, assuming they can return to any form of employment (not necessarily their pre-injury job).
Deferred Annuity Start Date	The future start date of a deferred annuity. Payments are set to zero before this date.

13.1.3 Unique to PCA Calculation

Further inputs required for this calculation are:

Input Field	Description
Age Thresholds	Age 1 and Age 2 thresholds correspond to changes in the level of assistance required or adjustments in payments.
Entitlement Percentages	Associated with each age threshold, these percentages represent the level of PCA entitlement applicable at or after a specified age threshold.
Deferred Annuity Start Age	The future starting age of a deferred annuity. Payments are set to zero before the birthday of turning to this age.

1 Executive Summary

1.1 Summary of Findings

Manitoba Public Insurance (MPI) conducted Financial Condition Testing (FCT) to evaluate the projected financial condition of the Basic Universal Compulsory Automobile (Basic) line of business under a range of plausible but severe adverse scenarios. As part of this process, a base scenario is modelled for the period 2026/27 through 2030/31. This base model is designed to closely replicate the organization's financial forecast as submitted to the Public Utilities Board (PUB) as part of the 2027 General Rate Application (GRA).

The base model is then subjected to a series of plausibly severe adverse scenarios. Based on the results of these scenarios, and in accordance with guidelines established by the Canadian Institute of Actuaries (CIA) and Office of the Superintendent of Financial Institutions (OSFI), the future financial condition of MPI's Basic line of business is satisfactory.

1.2 Guidance

International Financial Reporting Standard (IFRS) 17 Insurance Contracts became effective for annual periods beginning on or after January 1, 2023, with comparative financials produced for the immediate prior fiscal year.

OSFI issued its most recent guidance for the Minimum Capital Test (MCT) 2026 on November 20, 2025. Key revisions included in the 2026 MCT guidelines include:

- Simplification of the unexpired coverage formula
- Updates to regulatory adjustments to net assets available for insurance receivables
- Updates to capital confirmation requirements for user fees
- Minor adjustments and clarifications to apply the framework accurately

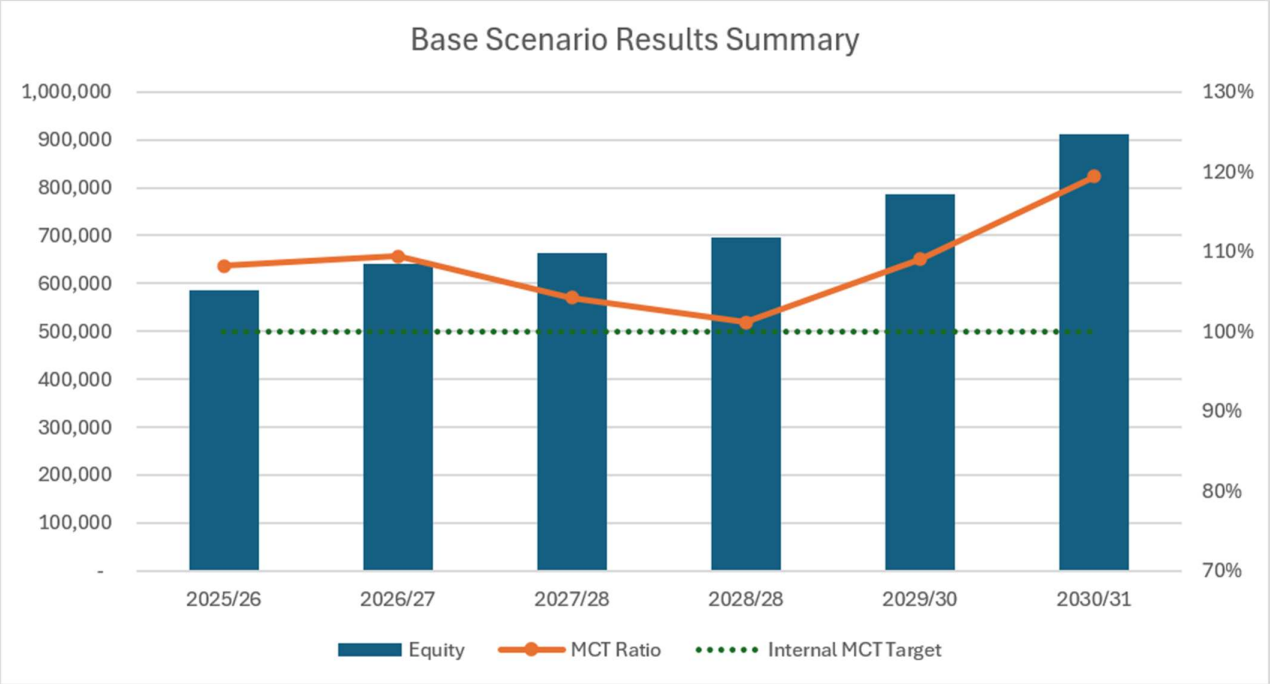
Also, the CIA published the recent version of its educational note on FCT in August 2025. Notable changes versus the prior version include:

- Expanded guidance around the definition and reporting of management actions related to the FCT
- Addition of minor clarifications on the usage of target capital ratios within the FCT process, when these ratios change close to finalization of the MCT
- Expanded references and examples in line with the Committee on Risk Management and Capital Requirements (CRMCR) 2025 Spring Letter (Guidance for the 2025 Reporting of Capital, Financial Condition Testing, and Own Risk and Solvency Assessment for Life and Health, Property and Casualty, and Mortgage Insurers) related to cyber and climate risk

- Updated wording to reflect IFRS17 as being in force and removal of implementation impacts on the FCT
- Wording updates to reflect current guidance from other educational notes

The contents of this report are prepared in accordance with the IFRS17 standard, the MCT 2026 guidelines and the CIA's 2025 Educational Note.

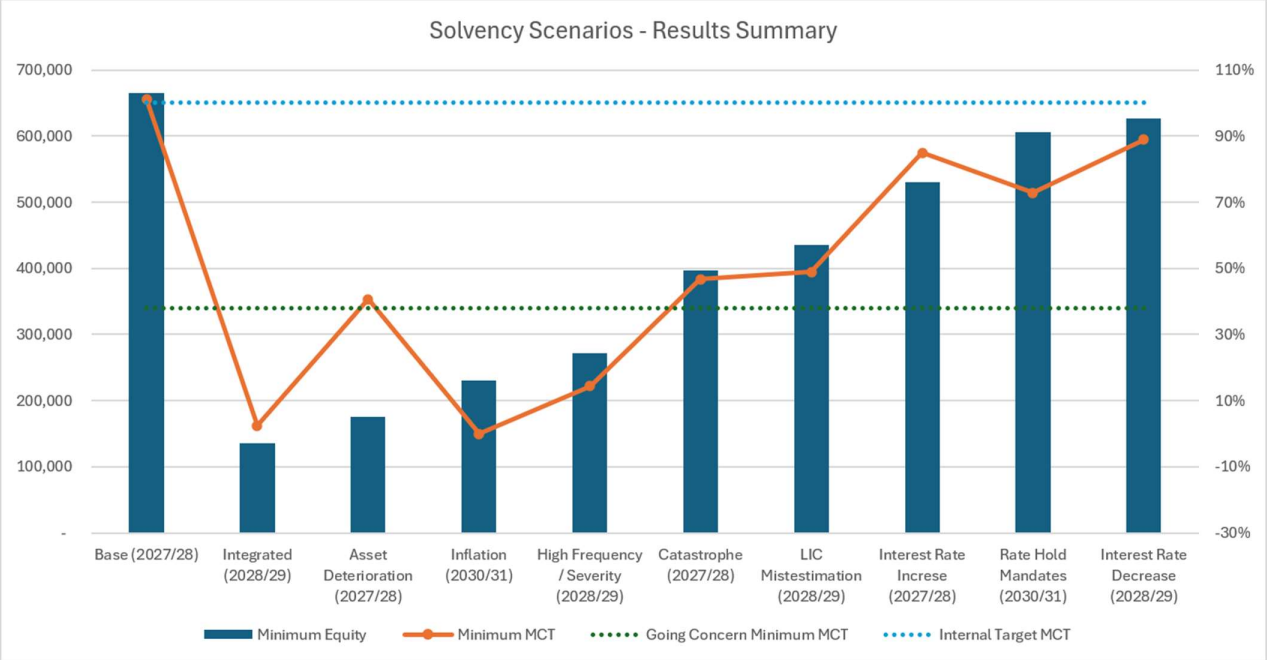
1.3 Selected Adverse Scenarios



Adverse scenarios were selected based on a review of scenarios tested in prior FCT analyses, an assessment of MPI's current internal risk identification and assessment processes, and consultation with senior management. The selected scenarios were evaluated on both a solvency and going-concern basis. Solvency scenarios were calibrated to approximate a 1-in-100-year return period, while going-concern scenarios were calibrated to approximate a 1-in-10-year return period.

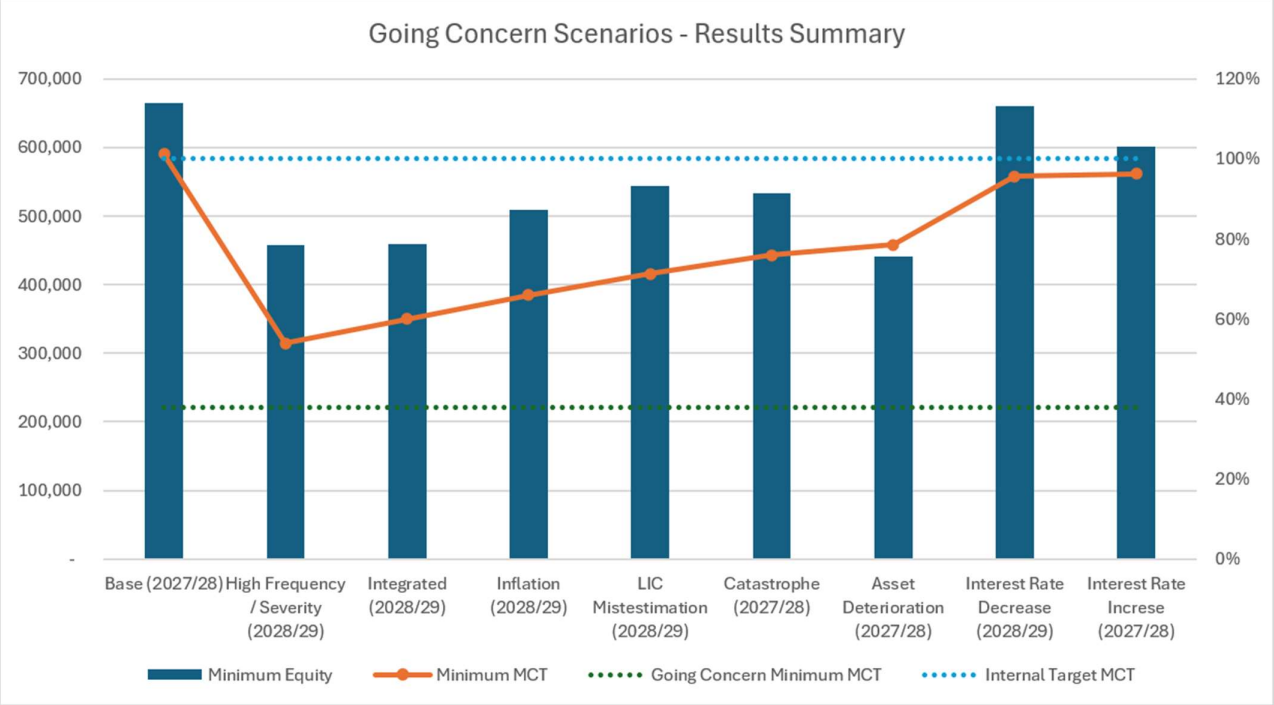
Selected scenarios include:

- High frequency/severity on new business and renewals
- Exceptional catastrophic events
- Liability for incurred claims (LIC) uncertainty
- High inflation
- Deterioration of asset values
- Increase in interest rates
- Decrease in interest rates
- Persistent rate hold mandates
- Insurance / market risk integrated scenario



1.4 Summary of Results

The forecasted MCT and equity results under the base scenario are shown in the following chart.



The MCT ratio remains above the internal target throughout the forecast period, indicating satisfactory financial condition under the base scenario.

The following chart summarizes the most severe projected outcome for each solvency scenario, where severity is determined by the lowest equity balance observed during the forecast period.

The equity balance remains positive across all solvency scenarios throughout the forecast period, indicating satisfactory financial condition.

The following chart summarizes the most severe projected outcome for each going-concern scenario, where severity is determined by the lowest equity balance observed during the forecast period.

The MCT ratio remains above the going concern minimum threshold across all going concern scenarios throughout the forecast period, indicating satisfactory financial condition.

1.5 Recommendations

Although MPI is in a satisfactory financial condition based on the findings of this report, it is nevertheless recommended that:

1. MPI continue to closely monitor its financial position through ongoing review of its liabilities, annual assessment of rate adequacy for its universal compulsory automobile insurance, monitoring of changes in the value of its asset portfolio, and periodic evaluation of the appropriateness of its investment policy relative to business needs.
2. If the MCT ratio falls below MPI's internal target capital ratio of 100%, management implement its proposed Capital Management Plan. For details on the proposed Capital Management Plan please see section 5.1.4 .

2 Expression of Opinion

To the Board of Directors of the Manitoba Public Insurance Corporation:

An investigation of the future financial condition of the Basic Universal Compulsory Automobile line of business has been completed as at March 31, 2026, in accordance with accepted actuarial practice in Canada.

The projected financial position over the forecast period has been evaluated under a range of adverse scenarios and assessed relative to the internal Minimum Capital Test (MCT) target ratio of 100%.

Based on this analysis, the future financial condition of the Basic Universal Compulsory Automobile line of business is satisfactory.

Cara Low September 25, 2026

Vice President & Chief Actuary

3 Introduction

In accordance with the guidelines as described in section *1.2 Guidance* the future financial condition of MPI has been evaluated. This report summarizes the assumptions, methodology, and results of that undertaking.

FCT analysis was done internally by MPI under the direction of Vice President and Chief Actuary Ms. Cara Low. Subsequent review of the FCT was performed by MPI's appointed actuary Mr. Cosimo Pantaleo of Ernst and Young LLP. Ms. Low and Mr. Pantaleo are available to answer any questions regarding this report and can be reached at the following addresses:

3.1 Purpose

FCT is a process used to analyze and project the evolution of a company's financial condition, considering its current position, recent experience, and intended business plan, under a range of potential future scenarios.

This process enables assessment of the implications of the business plan on capital adequacy and identification of the key risks to which MPI's Basic line of business is exposed. Its primary objective is to evaluate capital adequacy by providing insight into potential scenarios that could lead to capital deterioration, as well as the relative effectiveness of alternative corrective actions.

By identifying key sources of risk, FCT also supports MPI in strengthening its monitoring frameworks in areas of greatest vulnerability, thereby promoting timely and informed decision-making.

3.2 Scope

This FCT analysis assesses the prospective financial condition of MPI's Basic line of business over the selected forecast period, based on its current financial position, recent experience, and approved business plan. The analysis has been conducted in accordance with accepted actuarial practice in Canada, including the Standards of Practice of the Canadian Institute of Actuaries.

The scope of this report includes the development and analysis of a base scenario, developed to reflect closely the financial forecast as presented to the PUB in the 2027 GRA Application, as well as a series of plausible adverse scenarios intended to test MPI's resilience under stressed conditions. These scenarios consider a range of risks that may impact MPI's financial condition, including insurance, market, operational, and regulatory risks.

The results of the analysis are evaluated to assess the adequacy of capital under both expected and adverse conditions. The analysis also considers the potential impact and effectiveness of management actions that may be undertaken in response to emerging experience.

The scope of this report is limited to the assessment of financial condition under the scenarios described herein, and should be considered in conjunction with the assumptions, methodologies, and limitations outlined in this report.

3.3 Process

The FCT process consists of the following key steps:

1. Development of a base scenario reflecting management's best estimate of future operations. The base scenario has been developed to reflect closely the financial forecast for Basic as presented to the PUB in the 2027 GRA Application.
2. Identification and assessment of relevant risk categories, including a determination of which mandatory risk categories require no further analysis due to MPI's specific circumstances, and which categories are material.
3. Stress testing of each relevant risk category to evaluate its potential impact on MPIs financial condition.
4. Selection of scenarios that warrant further detailed analysis based on the results of the stress testing.
5. Evaluation and reporting of the results, including the implications for capital adequacy and potential management actions.

3.4 Method

We have used a financial forecast model developed for the purpose of completing the FCT to estimate financial positions and cash flows associated with various deterministic scenarios. The model is subdivided into four major modules, namely:

- Underwriting
- Investments
- Expense
- Financial Statements

3.4.1 Underwriting Module

The underwriting component of the model incorporates key parameters including premium levels, claims frequency and severity (i.e. projected ultimate losses), the occurrence of catastrophic events, reserve adequacy, payment and reporting patterns, commissions, premium taxes, and reinsurance arrangements.

This component produces projected results for insurance revenue (premium income) and insurance service expenses, including loss and loss adjustment expenses (both paid and unpaid), commissions, and premium taxes.

3.4.2 Asset Module

The assets module contains the parameters associated with each major class of investment, including:

- Provincial bonds
- Corporate bonds
- Municipal, University, School and Hospital (MUSH) bonds
- Private debt
- Commercial mortgages
- Real return bonds
- Canadian equities
- Global equities
- Global low volatility equities
- Pooled real estate
- Infrastructure

3.4.3 Expense Module

The expense module includes parameters associated with every category of general expenses and calculates these expenses by projection year. Additionally, non-premium sources of revenue (service revenue) are considered within the expense module.

3.4.4 Financial Statements Module

The financial statements module then uses the results of the underwriting, assets and expenses modules to produce:

- Exhibit 20.22 – Statement of Profit or Loss
- Exhibit 20.10 – Statement of Financial Position (Assets)
- Exhibit 20.11 – Statement of Financial Position (Liabilities and Equity)
- Exhibit 10.00 – MCT Ratio Summary Calculations
- Exhibit 20.00 – MCT Capital Available

3.5 Materiality

A precision threshold of $3,400,000 has been established for the data used in this analysis. The absolute value of any known data errors should not exceed this amount.

Given the prospective nature of the FCT analysis, a materiality standard of $34,000,000 has been adopted. This threshold represents approximately 5.8% of the Company's equity, 1.0% of assets and 2.6% of insurance revenue as of 31 March 2026.

Both the precision threshold and materiality standard are consistent with those applied in prior FCT analyses.

If the total impact of errors, alternative approaches, or other changes on the MCT margin within a given scenario is within $34,000,000 of the estimate the result will not be considered materially different.

This materiality standard does not apply to inherent sources of uncertainty in the estimation process, including:

- Parameter specification risk, including statistical error, arising from limitations in the ability of historical data and assumptions to accurately reflect future experience; and
- Process risk, defined as the variability of actual outcomes around expected values due to the stochastic nature of underlying risks

The materiality standard is intended solely as a guideline for assessing the significance of errors, alternative approaches, or other changes in this analysis.

3.6 Variability of Estimates

Future financial condition projections are inherently uncertain, and therefore no assurance can be provided regarding their ultimate accuracy. Proper interpretation of the results requires recognizing that the projected financial condition under various scenarios may deteriorate during the forecast period, particularly if management actions are not implemented in a timely manner as emerging results warrant. This caveat does not indicate current or expected financial difficulty. In the judgment of MPI, the methods and assumptions applied in this report are appropriate, and the conclusions drawn are reasonable.

4 Criteria for Assessing Future Financial Condition

4.1 Internal Capital Ratio Target

Section 18 subsection (3) of the Manitoba Public Insurance Corporation Act (MPIC Act) states:

"In addition to the reserves under subsection (2), the corporation must establish and maintain the following capital reserves:

(a) a rate stabilization reserve, with a target MCT ratio of 100%;
(b) an extension reserve, with a target MCT ratio of 200%
(c) a special risk extension reserve, with a target MCT ratio of 300%"

Note- section 18 subsection (1) of the MPIC Act defines *rate stabilization reserve* as "the corporation's capital reserve for universal compulsory automobile insurance".

For the purposes of this FCT the legislated target ratio of 100% MCT will be used as the internal capital ratio target.

4.2 Going Concern Minimum Capital Ratio Target

Section 18 subsection (5) of the MPIC act states:

"If the rate stabilization reserve's MCT ratio is less than, or is projected to be less than, its target MCT ratio at the beginning of a fiscal year, the corporation must ensure that its revenue from universal compulsory automobile insurance is sufficient to allow the reserve's target MCT ratio to be achieved within the five-year period beginning with that fiscal year."

Given this requirement, and that MPI's proposed Capital Management Plan limits any rate action within the capital build period to not more than 5%, MPI has historically estimated that an MCT ratio of 38% must be maintained to facilitate adequate capital build to re-establish the legislated target ratio of 100% within a five-year period.

Therefore, for the purposes of this FCT, the target ratio of 38% target will be used as the regulatory minimum capital ratio target.

4.3 Definition of Satisfactory Financial Condition

MPI's Basic line of business' financial condition is deemed satisfactory if, throughout the forecast period:

- For all solvency scenarios the statement value of assets is greater than the statement value of liabilities throughout the forecast period

- For all going concern scenarios the MCT ratio remains above the going concern minimum capital ratio target (38%) throughout the forecast period
- For the base scenario the MCT ratio remains above the internal capital ratio target (100%) throughout the forecast period

If the thresholds are not met but can be achieved through corrective actions within MPI's control, and both the signing actuary and appointed actuary are comfortable with those actions, the financial condition of Basic will be deemed satisfactory, subject to management action.

If the thresholds are not met and cannot be achieved with proposed management actions the financial condition of Basic will be deemed unsatisfactory.

5 Base Scenario

5.1 Background

5.1.1 Company Operations

MPI is a Crown corporation that delivers auto insurance, registration and licensing services to Manitoba drivers. Through its board of directors, MPI reports to the Minister of Justice. MPI also reports to the Manitoba Legislature via the Standing Committee on Crown Corporations and the Public Utilities Board.

MPI has provided Basic compulsory auto insurance coverage in the Province of Manitoba since November 1, 1971. In 2004, the province merged the operations of the former Division of Driver and Vehicle Licensing into Manitoba Public Insurance, and the Corporation became responsible for the administration of The Drivers and Vehicles Act (DVA).

MPI operates three insurance lines of business: Basic, Extension and Special Risk Extension (SRE). The Basic program is mandatory and includes third party liability with a $500,000 limit, no-fault accident benefits and all perils physical damage coverage with a $1,000 deductible.

MPI also writes optional coverages, such as increased liability limits and deductible buy-downs, through its Extension line, competing with private insurers. In addition, MPI provides specialized insurance products for Manitoba based commercial trucking through its SRE line of business, which is also in competition with private insurers.

5.1.2 Reinsurance

MPI's reinsurance program for Basic, Extension and SRE, in place for the 2026/27 fiscal year as at April 1, 2026 is as follows:

- MPI maintains a catastrophe reinsurance program designed to protect from severe convective storm events. The program is structured as an aggregate treaty and provides coverage for qualifying losses arising over the policy period. The program includes a $3 million per-occurrence deductible and a $50 million aggregate retention, above which reinsurance coverage applies. Total program protection extends to $400 million, structured as $350 million in excess of $50 million. Within this structure, the $100 million excess of $50 million layer is currently 81.8% placed. All other layers are 100% placed.
- MPI maintains a casualty reinsurance program with a retention of $20 million and a limit of $50 million.

5.1.3 Classification of Assets

MPI classifies all its financial assets as fair value through profit and loss (FVTPL).

5.1.4 Capital Management Plan Definition

Throughout this report, references to the proposed Capital Management Plan refer to the plan submitted to the PUB as part of the 2024 GRA. The plan has not been approved by the PUB and is therefore referenced in this report as a proposed capital management plan. For the purposes of this report, the plan includes transfers of capital from Extension to Basic when the Extension MCT ratio exceeds the 200% threshold and limits the Capital Build Provision such that it cannot increase the total rate indication to more than 5%.

5.1.5 Prior FCT Results and Recommendations

The table below provides a comparison of the 2025/26 actual financial results versus what was projected for the 2025/26 fiscal year in the 2025 FCT report.

($000s)	2025/26 Actual (1)	Prior FCT Projection (2)	Difference (1) - (2)
Total Insurance Revenue	1,321,738	1,316,313	5,425
Insurance Service Result	31,102	5,925	25,177
Net Investment Result	105,149	24,996	80,153
Other Income and Expenses	(139,562)	(103,546)	(36,016)
Net Income	(4,575)	(72,625)	68,050
MCT Ratio	108.2%	93.7%	14.5%

5.2 Base Scenario Results

The MPI base scenario has been developed to reflect closely the financial forecast as presented to the PUB in the 2027 GRA Application.

The table below provides a summary of selected financial information for the base scenario for the projection years 2026/27 through 2030/31.

Financial Information ($000s)	Actual 2025/26	2026/27	2027/28	2028/28	2029/30	2030/31
OPERATIONS						
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Total Insurance Revenue	1,321,738	1,449,028	1,554,377	1,660,923	1,777,526	1,902,755
Insurance Service Expenses	(1,279,631)	(1,366,123)	(1,470,076)	(1,579,193)	(1,649,107)	(1,754,718)
Net Expenses from Reinsurance Contracts Held	(11,005)	(21,821)	(20,773)	(20,888)	(21,129)	(21,146)
PROFITABILITY						
Insurance Service Result	31,102	61,085	63,527	60,842	107,291	126,891
Investment Income	105,149	133,761	142,274	153,741	166,441	180,372
Investment Yield[1]	3.48%	4.30%	4.39%	4.49%	4.55%	4.58%
Net Investment Result	103,884	37,609	42,365	48,366	54,985	63,511
Net Income (Loss)	-4,575	(7,991)	(4,465)	(5,399)	45,431	71,440
Return on Equity[2]	-0.84%	-1.30%	-0.68%	-0.79%	6.12%	8.41%
MCT						
Total Minimum Capital Required	406,210	422,486	452,980	485,077	518,366	563,491
Capital Available	439,616	462,077	472,024	490,657	565,294	672,999
Excess Capital	33,406	39,591	19,043	5,580	46,928	109,508
MCT Ratio	108.2%	109.4%	104.2%	101.2%	109.1%	119.4%
DISCOUNT RATE / DURATION						
Average Discount Rate for LIC	4.56%	4.56%	4.56%	4.56%	4.55%	4.55%
Average Duration of Bonds	8.73	8.98	9.30	9.29	8.90	8.84
Average Duration of LRC						
Average Duration of LIC	8.64	8.64	8.58	8.52	8.47	8.42

[1] Investment yield = investment income / ((prior year end investments balance + current year end investments balance) / 2)

[2] Return on equity = net Income / ((prior year end equity + current year end equity) / 2)

MPI's MCT ratio remains above the 100% internal capital ratio target throughout the forecast period.

The supporting exhibits for the base scenario are found in Appendix 1.

5.3 Modified Base Scenario: Subsequent Catastrophe Event

MPI experienced significant catastrophe events prior to finalization of the FCT. The FCT base scenario presented in this report does not contemplate these events.

This section presents an alternative base forecast that incorporates the estimated financial impact of the events. This alternative base forecast illustrates the potential effect of the events on projected results. However, all stress testing, scenario analysis, conclusions, and assessments presented elsewhere in the report remain based on the original base completed prior to the subsequent events.

Modelled impacts associated with the events in the modified base scenario include additional catastrophe losses, a reduction in the magnitude of capital transferred from Extension, and an increase in reinsurance costs. Specifically, the modified base scenario considers:

- Estimated direct ultimate losses associated with 4 catastrophe events occurring in June and July of 2026 totaling $359 M
- Estimated ceded ultimate losses attributable to the same events totaling $285.6 M
- An increase in the 2026/27 catastrophe reinsurance cost of $27.3 M
- An increase in total catastrophe reinsurance costs to Basic of $46.6 million starting in the 2027/28 forecast period

The table below provides a summary of selected financial information for the modified base scenario.

Financial Information ($000s)	Actual 2025/26	2026/27	2027/28	2028/28	2029/30	2030/31
OPERATIONS

Average Duration of LRC						
Average Duration of LIC	8.64	8.23	8.52	8.50	8.45	8.40

[1] Investment yield = investment income / ((prior year end investments balance + current year end investments balance) / 2)

[2] Return on equity = net Income / ((prior year end equity + current year end equity) / 2)

5.4 Comparison of the FCT Base Scenario and Financial Forecast Model

As per section *3.4 Method* the FCT model can be subdivided into the following major sections:

- Underwriting
- Investments
- Expense
- Financial Statements

The FCT base scenario was developed to reflect closely the financial forecast submitted to the PUB as part of the 2027 GRA Application. The Underwriting and Expense modules are calibrated to produce results that are exactly consistent with the corresponding outputs of the Financial Forecast Model.

The Investments module utilizes the same asset return assumptions as the Financial Forecast Model. However, differences in the treatment of portfolio rebalancing and asset allocation may produce minor variations in projected investment income and asset values over the forecast period.

Minor differences in investment modelling also affect the forecasted transfers from Extension. To model transfers that are conditional on Extension's projected financial position, the FCT Base Scenario uses transfer amounts determined by the Extension FCT model. Although the Extension FCT model aligns with the Financial Forecast Model in its underwriting and expense modules, minor differences in investment modelling result in marginally different projected financial positions and, consequently, transfer amounts.

The Financial Statements module consolidates the outputs of the Underwriting, Investments, and Expense modules and presents the resulting financial information using the exhibit structure of the P&C-1 Insurance Return prescribed by the Office of the Superintendent of Financial Institutions (OSFI). This differs from the Financial Forecast Model, which presents projected results using MPI's internal pro forma financial statement format.

Accordingly, while the FCT Base Scenario is intended to replicate the Financial Forecast Model as closely as possible, minor differences may arise due to variations in investment modelling, transfers from Extension, and financial statement presentation.

6 Adverse Scenarios

6.1 Overview

Selected scenarios were developed to assess MPI's financial resilience under a range of adverse but plausible conditions. The scenarios are intended to evaluate the potential impact of significant insurance, economic, regulatory, and combined stress events on MPI's earnings, capital adequacy, and overall financial condition over the projection period.

The scenarios reflect the principal risks facing MPI's Basic line of business, including adverse claims experience, reserve deterioration, catastrophe losses, sustained inflation, market volatility, interest rate movements, and constraints on rate adequacy. Individual scenarios are designed to isolate and assess the impact of specific risk drivers, while the integrated scenario evaluates the combined effect of multiple adverse events occurring within a coherent stress environment.

Standalone solvency scenarios were calibrated to approximate a 1-in-100-year event (99th percentile), while going-concern scenarios were calibrated to approximate a 1-in-10-year event (90th percentile). Integrated scenarios were calibrated differently to reflect the lower likelihood of multiple adverse stresses occurring simultaneously. The solvency integrated scenario applies 1-in-10-year (90th percentile) shocks. The going concern integrated scenario uses 1-in-4-year (75th percentile) shocks.

All shocks have been rounded to the hundredth decimal (nearest 1%) excepting yield curve shocks which are rounded to the thousandth decimal (nearest 0.1%).

Please note full scenario results, including the associated P&C-1 Insurance Return exhibits (20.00, 10.00, 20.22, 20.10, and 20.11), are provided in the appendices.

6.2 Management Actions

6.2.1 Rate Action

Management actions have been incorporated where appropriate to reflect realistic responses available to MPI during the projection period. The analysis considers premium rate adjustments as the sole management action.

Future rate increases during a capital build period are limited to 5% annually in accordance with MPI's proposed Capital Management Plan. To avoid overstating management's ability to mitigate adverse experience, the management action assumed in the adverse scenarios is limited to an additional 2.5% rate increase above the Base scenario. This assumption reflects that up to 2.5% of the available rate action capacity may already be utilized in the Base scenario forecast.

Where management action is noted a 2.5% rate increase is assumed to be implemented beginning in 2028/29, with a further 2.5% increase applied in 2029/30. For the inflation scenario, due to the impacts of inflation persisting into the latter forecast years, a third 2.5% rate increase is assumed to occur in 2030/31.

Premium rate action is applied to the written premium associated with the Basic line of business and has no impact on the magnitude of other sources of revenue including service revenue and Drivers premium.

6.3 Transfers from Extension

The magnitude of projected transfers from the Extension line of business to Basic is determined dynamically based on the financial condition of the Extension line of business under each scenario. Consistent with MPI's capital management framework, transfers are limited to capital in excess of that required to maintain the Extension line of business at its target capital level of 200% MCT.

To appropriately reflect the potential impact of adverse conditions on the availability of transfer capital, each adverse scenario developed for the Basic line of business was also developed and applied to the Extension line of business. The resulting Extension projections were then used to determine the amount of capital available for transfer in each year of the forecast period. As a result, adverse scenarios affecting the Basic line of business may also reduce the level of support available through transfers from Extension.

This approach recognizes that the financial capacity of the Extension line of business to provide capital support may be impaired during periods of adverse experience. Accordingly, projected transfers under stressed scenarios may be lower than those assumed in the Base Scenario and, in some circumstances, may be eliminated entirely if required to maintain the Extension line of business at its target capital ratio.

The methodology implicitly assumes perfect correlation between adverse experience affecting the Basic and Extension lines of business, as the same scenario is applied simultaneously to both operations. While actual experience may differ, this assumption provides a conservative assessment of MPI's financial resilience by recognizing that adverse events impacting Basic may also adversely affect the capital position of Extension and the availability of future transfers.

The following table summarizes the transfers from Extension to Basic presumed in the Base scenario and all Adverse Scenarios:

Scenario Name	Management Action	2026/27	2027/28	2028/29	2029/30	2030/31
BASE	n/a	42,854	26,875	38,126	44,235	53,001

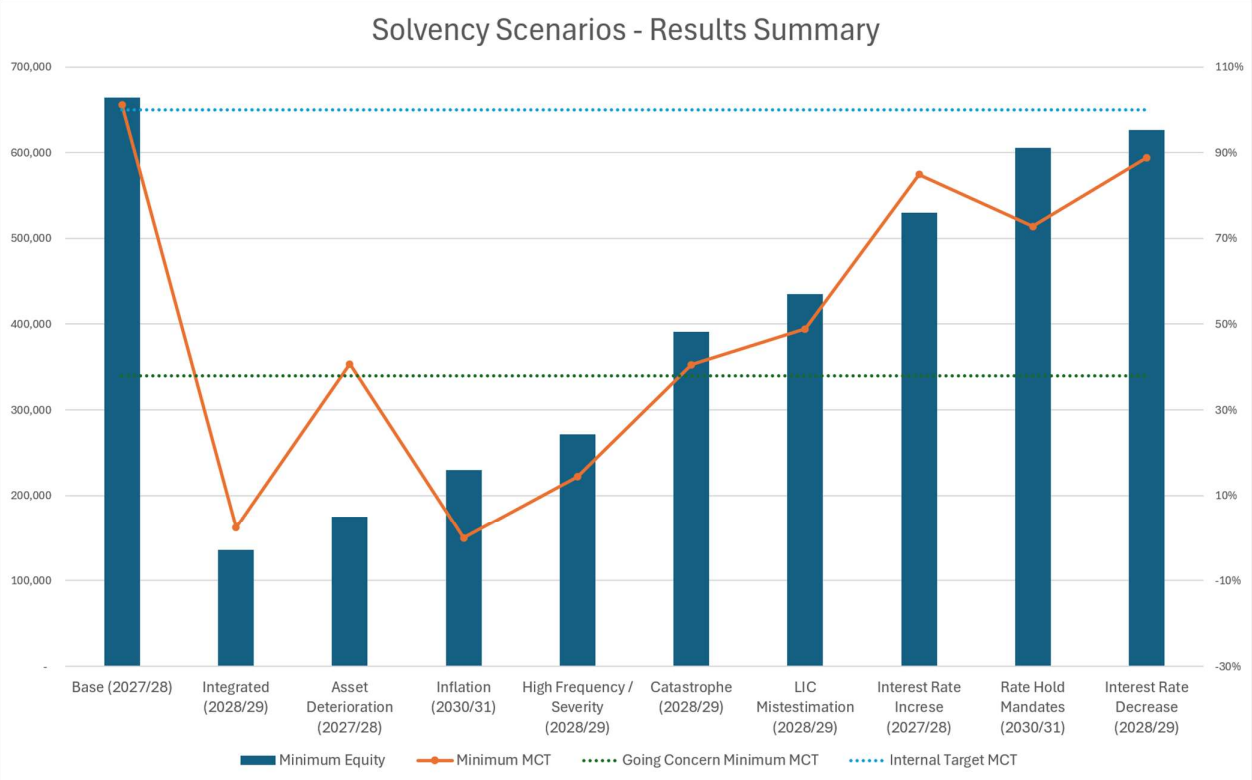
Interest Rate Decrease	No	42,854	29,477	35,193	44,220	52,999
Integrated	No	42,854	-	28,236	46,139	53,995

6.4 Economic Scenario Generator (ESG) Model Outputs



MPI has procured, for capital modelling purposes, Economic Scenario Generator (ESG) outputs from Moody's. The ESG produces stochastic projections of key economic and financial variables and provides a probability distribution of potential future outcomes. These distributions form the basis for calibrating economic stress scenarios used in this FCT.

Economic shocks were generally derived through percentile analysis of the ESG output distributions. Going Concern and Solvency scenario severities were calibrated by selecting adverse percentile outcomes corresponding to the target confidence levels and applying the resulting stresses to the relevant economic variables. This approach ensures that economic scenario calibrations are grounded in a consistent stochastic framework and reflect the range of outcomes produced by the underlying capital modelling assumptions.

6.5 Solvency Scenarios Posing the Greatest Risk to Satisfactory Financial Condition

The following table and chart summarize the results of all solvency scenarios, without management action, ranked by severity based on the lowest projected equity balance observed during the forecast period.

Solvency Scenarios ($000)	2027/28 Equity	2028/29 Equity	2029/30 Equity	2030/31 Equity	Minimum Equity	Year of Minimum Equity	Minimum MCT
Base	664,371	697,097	786,763	911,205	664,371	2027/28	101%
Integrated	244,791	135,599	204,572	296,604	135,599	2028/29	2%
Asset Deterioration	175,275	228,444	287,550	379,277	175,275	2027/28	41%
Inflation	399,992	296,305	266,927	230,127	230,127	2030/31	0%
High Frequency / Severity	410,463	271,283	322,375	421,722	271,283	2028/29	14%
Catastrophe	396,325	391,360	438,869	517,515	391,360	2028/29	41%
LIC Mistestimation	542,914	434,984	515,023	627,523	434,984	2028/29	49%
Interest Rate Increse	530,182	596,371	679,281	796,028	530,182	2027/28	85%
Rate Hold Mandates	648,798	630,533	626,513	605,717	605,717	2030/31	73%
Interest Rate Decrease	649,109	626,505	711,142	829,802	626,505	2028/29	89%

The equity balance remains positive for all scenarios throughout the forecast period, indicating satisfactory financial condition.

6.5.1 Integrated Insurance and Market Risk Scenario

Major Assumptions:

- An increase in forecasted ultimate losses of 9.0% in 2027/28 and 4.5% in 2028/29
- An increase in forecasted expenses of 2% in 2027/28 and 1% in 2028/29
- An increase in unpaid claims of 3.0% in 2027/28 and 1.5% in 2028/29
- A parallel increase in the yield curve of 1.3% in 2027/28 and 0.7% in 2028/29
- A decrease in the value of all equities of -15% in 2027/28

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Net Income	-4,575	-7,991	-4,465	-5,399	45,431	71,440
MCT Ratio	108.22%	109.37%	104.20%	101.15%	109.05%	119.43%

Adverse Scenario:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,157,543	3,340,987	3,658,848	3,901,661
Liabilities	2,880,979	2,882,938	2,912,752	3,205,387	3,454,277	3,605,057
Equity	585,068	639,818	244,791	135,599	204,572	296,604
Net Income	-4,575	-7,991	-397,170	-109,191	27,250	38,257
MCT Ratio	108.22%	109.37%	32.50%	2.43%	12.95%	28.00%

6.5.2 Deterioration of Asset Values

Major Assumptions:

- A decrease in the value of all equities of -35% in 2027/28
- A parallel shift in the yield curve of +2.2% in 2027/28

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Net Income	-4,575	-7,991	-4,465	-5,399	45,431	71,440
MCT Ratio	108.22%	109.37%	104.20%	101.15%	109.05%	119.43%

Adverse Scenario:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	2,857,651	3,429,752	3,641,644	3,894,777
Liabilities	2,880,979	2,882,938	2,682,376	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	175,275	228,444	287,550	379,277
Net Income	-4,575	-7,991	-467,365	10,673	14,869	38,743
MCT Ratio	108.22%	109.37%	40.70%	42.73%	51.98%	65.26%

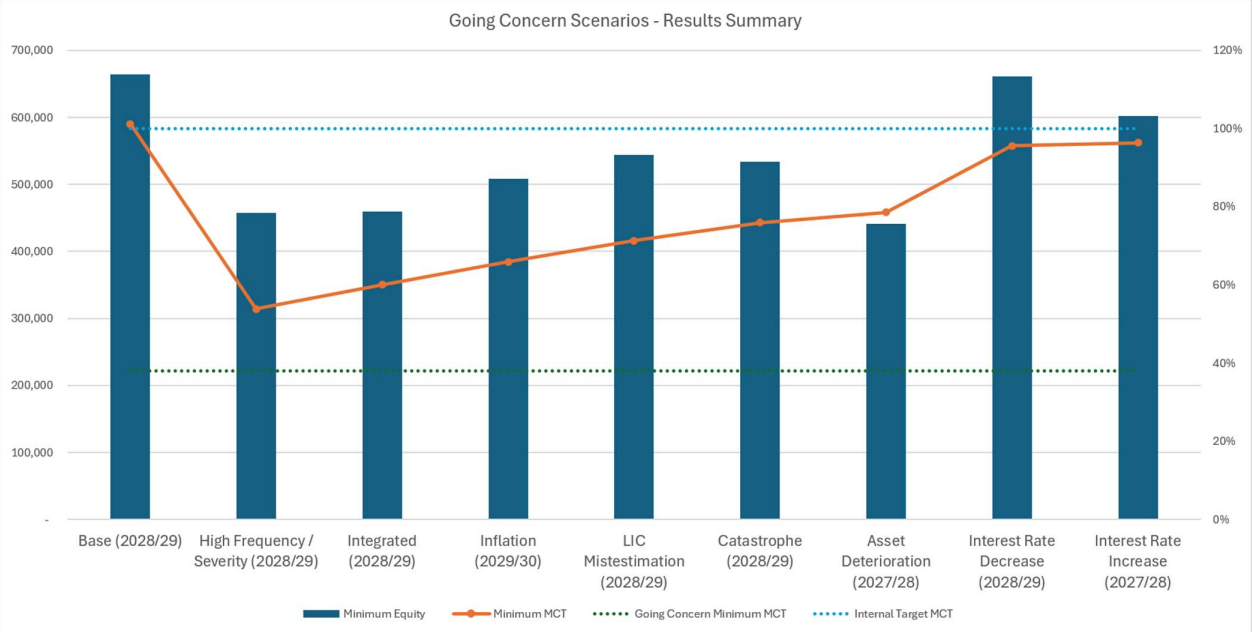
6.5.3 High Inflation

Major Assumptions:

- An increase in forecasted ultimate losses of 4% in 2027/28 and 6.08% in 2028/29, 2029/30 and 2030/31 (reflecting inflation 4% and 2% more than expectation in 2027/28 and 2028/29 respectively)
- An increase in forecasted expenses of 4% in 2027/28 and 6.08% in 2028/29, 2029/30 and 2030/31 (reflecting inflation 4% and 2% more than expectation in 2027/28 and 2028/29 respectively)
- An increase in the inflation vector applied to undiscounted benefits on indexed coverages of 4% in 2027/28 and 2% in 2028/29
- A parallel increase in the yield curve of 2% in 2027/28 and 2% in 2028/29

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Net Income	-4,575	-7,991	-4,465	-5,399	45,431	71,440
MCT Ratio	108.22%	109.37%	104.20%	101.15%	109.05%	119.43%



Adverse Scenario:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,204,934	3,283,375	3,773,139	3,905,497
Liabilities	2,880,979	2,882,938	2,804,942	2,987,070	3,506,212	3,675,370
Equity	585,068	639,818	399,992	296,305	266,927	230,127
Net Income	-4,575	-7,991	-253,818	-127,465	-63,401	-75,338
MCT Ratio	108.22%	109.37%	55.67%	27.22%	10.87%	-0.04%

6.6 Going-Concern Scenarios Posing the Greatest Risk to Satisfactory Financial Condition

The following table and chart summarize the results of all going-concern scenarios, without management action, ranked by severity based on the lowest projected equity balance observed during the forecast period.

Going Concern Scenarios ($000)	2027/28 MCT	2028/29 MCT	2029/30 MCT	2030/31 MCT	Minimum MCT	Minimum Equity	Year of Minimum MCT
Base	104%	101%	109%	119%	101%	664,371	2028/29
High Frequency / Severity	72%	54%	65%	77%	54%	457,859	2028/29
Integrated	73%	60%	71%	83%	60%	459,738	2028/29
Inflation	83%	68%	66%	67%	66%	508,848	2029/30
LIC Mistestimation	89%	71%	81%	93%	71%	543,581	2028/29
Catastrophe	77%	76%	85%	96%	76%	533,846	2028/29
Asset Deterioration	79%	79%	87%	99%	79%	441,323	2027/28
Interest Rate Decrease	98%	96%	103%	114%	96%	660,888	2028/29
Interest Rate Increase	96%	97%	105%	115%	96%	601,683	2027/28

The MCT ratio remains above the regulatory minimum threshold for all scenarios throughout the forecast period, indicating satisfactory financial condition.

6.6.1 High Frequency / Severity

Major Assumptions:

- An increase in forecasted ultimate losses of 9% in 2027/28 and 4.5% in 2028/29

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705

MCT Ratio	108.22%	109.37%	72.53%	60.02%	70.64%	83.02%

6.6.3 High Inflation

Major Assumptions:

- An increase in forecasted ultimate losses of 2% in 2027/28 and 3.02% in 2028/29, 2029/30 and 2030/31 (reflecting inflation 2% and 1% more than expectation in 2027/28 and 2028/29 respectively)
- An increase in forecasted expenses of 2% in 2027/28 and 3.02% in 2028/29, 2029/30 and 2030/31 (reflecting inflation 2% and 1% more than expectation in 2027/28 and 2028/29 respectively)
- An increase in the inflation vector applied to undiscounted benefits on indexed coverages of 2% in 2027/28 and 1% in 2028/29
- A parallel increase in the yield curve of 1% in 2027/28 and 1% in 2028/29

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705

7 Comprehensive Scenario Specifications and Results

7.1 Insurance Scenarios

7.1.1 High Frequency/Severity on New Business and Renewals

Future insurance losses can differ significantly from expectation due to unexpected increases in the frequency and/or severity of attritional losses together with inadequate pricing. This scenario examines the financial impact of a significant deviation from expectation with respect to the magnitude of losses arising from newly issued and renewal policies.

Historical trended ultimate loss costs were analyzed to calculate the sample mean and sample standard deviation of observed outcomes. A normal distribution was assumed for purposes of calibrating adverse outcomes.

The selected shocks were determined by applying a standard normal z-score corresponding to the target scenario severity level. For Going Concern scenarios, a z-score of 1.2816 was used to approximate a 90th percentile outcome, while for Solvency scenarios a z-score of 2.3263 was used to approximate a 99th percentile outcome.

The shock magnitudes were calculated as the product of the selected z-score and the sample standard deviation, divided by the historical mean ultimate loss cost. This produces a proportional deterioration relative to expected loss costs:

$$\text{Shock} = \frac{z \times \sigma}{\mu}$$

The resulting percentage was applied as an adverse multiplicative adjustment to projected ultimate loss costs for accident year 2027/28. A residual impact of 50% of the shock was used in accident year 2028/29.

7.1.1.1 Solvency

Major Assumptions:

- An increase in forecasted ultimate losses of 17% in 2027/28 and 8.5% in 2028/29

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205

Net Income	-4,575	-7,991	-124,659	-76,281	34,131	57,825
MCT Ratio	108.22%	109.37%	71.78%	53.88%	64.60%	77.18%

7.1.2 Exceptional Catastrophic Events

An unusually prolific hail season can result in material losses despite the reinsurance portfolio MPI has in place. This scenario examines the financial impact of a catastrophe season with abnormal frequency and/or severity.

Catastrophe loss shocks were derived using catastrophe modelling results provided by MPI's reinsurance broker. Aggregate Exceedance Probability (AEP) results were used to identify the gross losses, reinsurance recoveries, and net retained losses associated with the selected scenario calibration levels. The resulting loss amounts were incorporated into the scenario analysis in accident year 2027/28. Reinsurance recoveries reflect the structure and terms of MPI's catastrophe reinsurance program in force as at April 1, 2026.

For purposes of allocating scenario impacts between lines of business, both gross catastrophe losses and corresponding reinsurance recoveries were distributed 92% to Basic and 8% to Extension. This allocation is broadly consistent with MPI's historical catastrophe exposure profile and was applied in determining the financial impact of the scenario on each line of business.

7.1.2.1 Solvency

Major Assumptions:

- $485 M direct loss and $305 M ceded loss in 2027/28
- $26.8M additional annual reinsurance premium from 2028/29 through 2030/31
- Management action of 2.5% rate increases in 2028/29 and 2029/30

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705

7.1.3 LIC Misestimation

Ultimate claim costs and claim adjustment expenses required to settle unpaid claims are difficult to estimate with perfect precision, especially for particularly long tailed liabilities (e.g. PIPP benefits). This scenario examines the financial impact of significant adverse development on the unpaid liabilities (case reserves and IBNR) pertaining to prior accident years.

The LIC misestimation shock was calibrated using stochastic reserving results derived from an Over-Dispersed Poisson (ODP) bootstrap simulation applied to the aggregate Basic line of business paid loss development triangle. The bootstrap analysis produced an empirical distribution of unpaid loss outcomes reflecting uncertainty inherent in the claims development process.

Shock factors were derived by comparing selected adverse outcomes from the empirical loss distribution to the central estimate. Specifically, each shock factor was calculated as the ratio of the selected percentile outcome from the bootstrap distribution to the median of the simulated ultimate loss distribution. This approach produces multiplicative factors representing the degree of adverse reserve deterioration associated with the selected confidence levels. The resulting factors were applied as a proportional increase to outstanding claims for prior accident years in both 2027/28 and 2028/29.

7.1.3.1 Solvency

Major Assumptions:

- An increase in unpaid claims for all prior accident years of 5% in 2027/28 and 5% in 2028/29

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705

MCT Ratio	108.22%	109.37%	88.94%	71.31%	80.72%	92.50%

7.2 Economic Environment Scenarios

7.2.1 High Inflation

Inflation represents a significant risk to insurers, as it affects claim costs, operating expenses, reserve adequacy, and discount rates. This scenario assesses the financial impact of a sustained period of inflation materially exceeding current expectations.

Elevated inflation is assumed to increase future ultimate claim costs, unpaid claim liabilities, operating expenses, and future benefit payments associated with inflation-indexed accident benefit coverages. Inflation is also assumed to affect the yield curve, influencing both the discounting of insurance liabilities and the market value of fixed income assets.

Inflation shocks were derived using Moody's Canadian CPI ESG output. The shock was calculated as the difference between the relevant solvency or going-concern percentile inflation outcome and the corresponding forecast inflation assumption. These shocks were fully applied in the 2027/28 forecast year, with a residual impact equal to 50% of the initial shock assumed to persist into the 2028/29 forecast year.

The impact of inflation on interest rates is assumed to lag changes in inflation. Accordingly, only 50% of the inflation shock is reflected in the yield curve during 2027/28, with the full yield curve adjustment recognized in 2028/29.

7.2.1.1 Solvency

Major Assumptions:

- An increase in forecasted ultimate losses of 4% in 2027/28 and 6.08% in 2028/29, 2029/30 and 2030/31 (reflecting inflation 4% and 2% more than expectation in 2027/28 and 2028/29 respectively)
- An increase in forecasted expenses of 4% in 2027/28 and 6.08% in 2028/29, 2029/30 and 2030/31 (reflecting inflation 4% and 2% more than expectation in 2027/28 and 2028/29 respectively)
- An increase in the inflation vector applied to undiscounted benefits on indexed coverages of 4% in 2027/28 and 2% in 2028/29
- An parallel increase in the yield curve of 2% in 2027/28 and 2% in 2028/29
- Management action of 2.5% rate increases in 2028/29, 2029/30 and 2030/31

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031

7.2.2 Deterioration of Asset Values

Investment income and asset values are key determinants of MPI's financial strength, contributing to both ongoing profitability and long-term solvency. As a result, adverse movements in financial markets can materially affect capitalization levels, asset-liability matching, and the ability to meet future obligations. This scenario assesses the impact of a significant deterioration in financial market conditions through the combined effects of an equity market decline and an adverse interest rate movement.

Equity shock magnitudes were derived from Moody's Canadian Equity ESG results using the relevant solvency and going-concern percentiles. The resulting shock was applied to MPI's Canadian Equities, Global Equities, Global Low Volatility Equities, Infrastructure, and Real Estate asset classes.

The interest rate component of the scenario reflects an adverse movement in long-term interest rates. The shock was calibrated using the 10-year Canadian Government Bond ESG distribution and was determined as the difference between the selected adverse percentile and the median ESG outcome. The resulting yield curve movement affects both the valuation of fixed income assets and the discounting of insurance liabilities.

Both the equity market decline and interest rate shock were assumed to occur simultaneously and were applied in the 2027/28 forecast year.

7.2.2.1 Solvency

Major Assumptions:

- A decrease in the value of all equities of -35% in 2027/28
- A parallel shift in the yield curve of 2.2% in 2027/28

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Net Income	-4,575	-7,991	-4,465	-5,399	45,431	71,440
MCT Ratio	108.22%	109.37%	104.20%	101.15%	109.05%	119.43%

Adverse Scenario:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	2,857,651	3,429,752	3,641,644	3,894,777

Equity	585,068	639,818	175,275	228,444	287,550	379,277
Net Income	-4,575	-7,991	-467,365	10,673	14,869	38,743
MCT Ratio	108.22%	109.37%	40.70%	42.73%	51.98%	65.26%

7.2.2.2 Going Concern

Major Assumptions:

- A decrease in the value of all equities of -15% in 2027/28
- A parallel shift in the yield curve of 1.3% in 2027/28

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Net Income	-4,575	-7,991	-4,465	-5,399	45,431	71,440
MCT Ratio	108.22%	109.37%	104.20%	101.15%	109.05%	119.43%

Adverse Scenario:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,248,145	3,695,742	3,924,070	4,194,730
Liabilities	2,880,979	2,882,938	2,806,822	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	441,323	494,434	569,976	679,230
Net Income	-4,575	-7,991	-215,347	12,532	31,300	56,246
MCT Ratio	108.22%	109.37%	78.58%	78.88%	87.31%	98.87%

7.2.3 Interest Rate Increase / Decrease

Sudden changes in interest rates can significantly affect both the value of MPI's fixed income investment portfolio and the present value of its discounted insurance liabilities. These scenarios assess the financial impact of adverse movements in interest rates on MPI's net financial position.

The interest rate increase and decrease scenarios were calibrated using the 10-year Government of Canada bond yield distribution from Moody's ESG model. For each scenario, the shock was determined as the difference between the selected adverse percentile and the median ESG outcome. The resulting yield curve movement was then applied to both fixed income assets and insurance liabilities, capturing the combined effect on asset valuations and liability discounting.

7.2.3.1 Interest Rate Increase – Solvency

Major Assumptions:

- A parallel shift in the yield curve of 2.2% in 2027/28

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031

7.3 Political and Regulatory Environment Scenarios

7.3.1 Persistent Rate Hold / Decrease Mandates

This scenario assesses the potential for financial loss arising from newly issued and renewal policies when premium rate increases are lower than forecast. The applied shock eliminates all future planned premium rate changes assumed in the base scenario by reducing them to zero.

7.3.1.1 Solvency

Major Assumptions:

- Removal of forecasted rate increases in 2027/28 through 2030/31; specifically
  - Decrease of the 2027/28 forecasted rate change from 2.38% to 0%
  - Decrease of the 2028/29 forecasted rate change from 2.28% to 0%
  - Decrease of the 2029/30 forecasted rate change from 2.40% to 0%
  - Decrease of the 2030/31 forecasted rate change from 2.53% to 0%

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,692,096	3,898,406	4,140,857	4,426,705
Liabilities	2,880,979	2,882,938	3,027,725	3,201,308	3,354,094	3,515,500
Equity	585,068	639,818	664,371	697,097	786,763	911,205
Net Income	-4,575	-7,991	-4,465	-5,399	45,431	71,440
MCT Ratio	108.22%	109.37%	104.20%	101.15%	109.05%	119.43%

Forecasted Rate Changes Removed:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031
Assets	3,466,047	3,522,756	3,658,909	3,795,239	3,921,780	4,036,488
Liabilities	2,880,979	2,882,938	3,010,111	3,164,706	3,295,267	3,430,771
Equity	585,068	639,818	648,798	630,533	626,513	605,717
Net Income	-4,575	-7,991	-20,038	-56,391	-48,254	-73,797
MCT Ratio	108.22%	109.37%	101.54%	90.37%	83.50%	72.76%

7.4 Integrated Scenarios

7.4.1 Insurance and Market Risk Scenario

This scenario assesses the financial impact of a severe but plausible event affecting both insurance operations and financial markets simultaneously. The scenario combines adverse movements in key insurance risk drivers, including ultimate claim costs, unpaid claim liabilities, and operating expenses, with adverse market conditions affecting equity values and interest rates.

For solvency testing purposes, shocks are calibrated using the 90th percentile adverse outcome for each risk factor, while going-concern testing applies shocks based on the 75th percentile adverse outcome. The calibrated shocks are applied concurrently to reflect the potential for correlated adverse experience across multiple risk categories.

To capture the possibility of prolonged stress conditions, a residual impact equal to 50% of the calibrated shock applied in 2027/28 is assumed to persist into 2028/29.

7.4.1.1 Solvency

Major Assumptions:

- An increase in forecasted ultimate losses of 9.0% in 2027/28 and 4.5% in 2028/29
- An increase in forecasted expenses of 2% in 2027/28 and 1% in 2028/29
- An increase in unpaid claims of 3.0% in 2027/28 and 1.5% in 2028/29
- A parallel increase in the yield curve of 1.3% in 2027/28 and 0.7% in 2028/29
- A decrease in the value of all equities of -15% in 2027/28

Base:

	3/31/2026	3/31/2027	3/31/2028	3/31/2029	3/31/2030	3/31/2031

MCT Ratio	108.22%	109.37%	72.53%	60.02%	70.64%	83.02%

8 Conclusion

MPI's Basic line of business was adequately capitalized as at March 31, 2026, with an MCT ratio above the internal capital target of 100%. Under the Base Scenario, the MCT ratio remains above the internal capital target throughout the forecast period.

The adverse scenario testing indicates that Basic remains in satisfactory financial condition under both solvency and going-concern scenarios. Under all solvency scenarios, projected assets exceed projected liabilities throughout the forecast period. Under all going-concern scenarios, the projected MCT ratio remains above the 38% going-concern minimum capital ratio target.

The most significant risks to satisfactory financial condition arise from the integrated insurance and market risk scenario under solvency testing and the high frequency/severity scenario under going-concern testing. These scenarios produce the lowest projected capital positions over the forecast period.

MPI also reviewed a modified base scenario reflecting catastrophe events that occurred prior to finalization of this report. This modified scenario was included to provide context on the potential impact of these events on projected capital levels. While the modified base scenario shows a lower projected capital position than the original Base Scenario, it does not alter the conclusion that MPI's Basic line of business is in satisfactory financial condition over the forecast period. Formal adverse scenario testing and conclusions remain based on the original Base Scenario completed prior to the subsequent events.

Based on the FCT analysis, the associated assumptions, and the management actions available to MPI, the future financial condition of MPI's Basic line of business is satisfactory throughout the forecast period.

FFI – Financial Forecasting: Investments

Investments 2027
General Rate Application

June 24, 2026

Table of Contents

C.1 – Please provide a description of substantive changes to the Corporation's investment portfolios or process. 3

C.2 – Please provide a schedule of the Corporation's equity investment holdings and impaired investments, both written off and currently held and including original book value, revised book value and current book value. 4

C.3 – Update the table of investment income allocation weightings for Employee Future Benefits (Pension). 4

C.4 – Please provide a comparison by asset class of actual returns with the annual expected return benchmarks set out in the Investment Policy Statement for the last five years and provide detailed narrative commentary on the relative performance to benchmarks and the prior fiscal year and descriptions of any peer groups along with analysis reporting prepared by the corporation or a third party. 5

C.5 – Please provide a 5-year comparison of the Corporation's total annual investment return rates with the corresponding annual return rates of comparable peers and please provide commentary on any significant differences and descriptions of peer groups 7

C.6 – Please provide results indicating the performance of MPI's investment managers on MPI's reporting dashboard. 8

C.7 – Please provide an explanation of the nature and adequacy of inflation protection in MPI's investment portfolio. 8

H.5 – Please provide details of the assumed Government of Canada bond yield, with the duration equal to the expected claims duration as well as yields/spreads for all asset classes supporting the claims portfolio. Please include detailed calculations, including assumed weightings. 10

H.6 – Please provide a narrative explanation of the net impact of changes in interest rates impact to net income. Please provide the yield curve and implied average discount rate used for the calculation of the interest rate impact on claims incurred, and include the calculations used in the determination of the utilized yield curve 12

C.1 – Please provide a description of substantive changes to the Corporation's investment portfolios or process.

Substantive Changes to the Corporation's Investment Portfolios or Process

Effective October 1, 2025, MPI transitioned to an advisory investment model with WTW under which WTW acts as investment advisor to the Corporation.

Under this model, WTW provides analytical support, advice, reporting, and regulatory assistance to MPI's management, Investment Committee, and Board. WTW acts in a non-discretionary capacity and does not have the authority to make or implement investment decisions. All strategic decisions, approvals, and implementation actions remain the responsibility of MPI and are carried out through MPI's established governance processes.

This transition has resulted in a number of enhancements to MPI's investment process:

- **More structured asset-liability management and risk-appetite assessment**
  Investment analysis is increasingly framed around downside outcomes, capital adequacy, recovery dynamics, and volatility across a range of economic scenarios.
- **Formalized governance and decision-making process**
  Investment matters are progressed through a structured Working Group and Investment Committee framework, supporting clearer evaluation of trade-offs and alignment with MPI's mandate.
- **Clearer separation between risk-appetite setting and portfolio implementation**
  Current work is focused on establishing acceptable risk levels and governance guardrails, with portfolio structure and asset-mix decisions to follow through subsequent analysis and approval processes.
- **Enhanced investment monitoring and manager oversight**
  Performance measurement, risk monitoring, interest rate hedge analysis, and manager review processes have been further formalized and supported with independent analysis and reporting.
- **Structured support for regulatory processes**
  The investment process includes structured support for the development of investment-related materials for the General Rate Application and related proceedings, including explanation of methodology, assumptions, and analytical frameworks.

Other than the transition to this advisory model and the associated process enhancements described above, there have been no material changes to MPI's underlying governance framework or decision-making authority. MPI continues to retain full responsibility for investment strategy, risk decisions, and implementation.

C.2 – Please provide a schedule of the Corporation's equity investment holdings and impaired investments, both written off and currently held and including original book value, revised book value and current book value.

A schedule of the Corporation's equity investment holdings, including original book value, revised book value, and current book value, is provided in Appendix 2 – Equity Holdings.

As at the fiscal year-end, MPI holds equity investments within the Rate Stabilization Reserve (RSR) and Employee Future Benefits (EFB) portfolios. No equity investments are held within the Basic Claims portfolio.

All equity investments are classified as fair value through profit and loss (FVTPL) in accordance with IFRS 9. Under this treatment, the carrying value reflects fair market value at the reporting date, with realized and unrealized gains and losses recognized through net investment income.

There are no impaired equity securities, either written off or currently held. As investments are measured at fair value through profit and loss, declines in value are reflected directly in net investment income rather than through separate impairment charges. This treatment is consistent with MPI's accounting policy for financial instruments.

C.3 – Update the table of investment income allocation weightings for Employee Future Benefits (Pension).

Investment income generated by the Employee Future Benefits (EFB) portfolio is allocated to lines of business in accordance with MPI's Investment Income Allocation Policy, as approved by the Board of Directors (see Appendix 3).

For the purposes of this application, the following allocation weightings apply to investment income earned on EFB assets:

Figure INV-1 – allocation weighting

Line of Business	Allocation Weighting (%)
Basic Claims	69.3%
Extension	5.9%
SRE	7.9%
DVA	16.9%

The allocation reflects the proportionate share of pension obligations attributable to each line of business and is applied consistently throughout the forecast period.

This methodology is unchanged from prior General Rate Applications and continues to be applied in accordance with MPI's established policy.

C.4 – Please provide a comparison by asset class of actual returns with the annual expected return benchmarks set out in the Investment Policy Statement for the last five years and provide detailed narrative commentary on the relative performance to benchmarks and the prior fiscal year and descriptions of any peer groups along with analysis reporting prepared by the corporation or a third party.

2025/26 Portfolio Performance vs. Benchmark

- Performance outcomes are assessed in the context of MPI's liability-aware investment framework and the distinct objectives of each portfolio.
- Complete performance results by asset class and portfolio are provided in Appendix 4 and supporting appendices.
- For the year ended March 31, 2026, performance across MPI's portfolios was driven primarily by market conditions and asset allocation, with outcomes primarily reflecting asset allocation, market conditions, and portfolio design characteristics.

Basic Claims Portfolio

- The Basic Claims portfolio returned 1.6%, underperforming its benchmark by 0.4%.
- Performance reflects:
    - the liability-driven structure of the portfolio;
    - the composition of fixed income and real assets;
    - prevailing interest rate and credit market conditions.
- Given the portfolio's liability-driven structure, performance relative to benchmark is interpreted in the context of capital stability and alignment with liabilities, rather than total return maximization.

RSR Portfolio

- The RSR portfolio returned 9% underperforming its benchmark by 0.6%.
- Performance was primarily influenced by:
    - exposure to return-seeking assets (equities, private assets, real estate);
    - broader market conditions across equity and private markets.
- Given the role of the RSR as a return-seeking portfolio, performance variability relative to benchmark is expected over shorter periods.

EFB Portfolio

- The EFB portfolio returned 10.0%, underperforming its benchmark by 0.5%.
- Results reflect the long-duration nature of liabilities and the asset allocation decisions made in support of actuarial funding objectives.

Figure INV-2 Annual Actual vs Benchmark Return ending March 31, 2026

Line No.	Asset Class	Basic Claims Actual	Basic Claims Benchmark	RSR Actual	RSR Benchmark	EFB Actual	EFB Benchmark
1	**Fixed Income**						
2	Cash	2.7%	2.5%	3.1%	2.5%	3.1%	2.5%
3	Provincial Bonds	0.0%	2.3%	2.3%	2.1%	-	-
4	Real Return	-0.8%	-1.2%	-	-	-	-
5	Corporate Bonds	2.0%	2.2%	-	-	0.6%	0.6%
6	MUSH	2.3%	2.2%	-	-	-	-
7	Private Debt	-	-	2.2%	2.8%	-1.7%	-2.5%
8	Commercial Mortgages	4.7%	2.7%	-	-	-	-
9	**Public Equities**						
10	Canadian Large Cap	-	-	44.4%	34.8%	43.9%	34.8%
11	Canadian Small Cap	-	-	35.5%	66.8%	34.7%	66.8%
12	Global Equities	-	-	18.6%	14.6%	18.7%	14.6%
13	Global Low Volatility	-	-	5.0%	14.6%	4.5%	14.6%
14	**Alternatives**						
15	Canadian Real Estate	4.1%	0.4%	4.2%	0.4%	0.9%	0.4%
16	Infrastructure	-	-	10.5%	6.5%	8.7%	6.5%

4.3 Five-Year Trend Narrative

- Over the five-year period, MPI's portfolio outcomes over the period reflect:
  - the low starting yield environment transitioning to higher rates;
  - strong equity market performance in earlier periods;
  - more recent interest rate volatility and market concentration effects.

- MPI's results should be interpreted in the context of its deliberately conservative, liability-driven approach, which:
  - prioritizes capital stability and rate predictability;
  - results in lower expected returns relative to more growth-oriented peers, particularly in strong equity markets.
- Consistent with prior analysis, differences in performance relative to benchmarks and peers primarily reflect differences in asset allocation and overall risk posture, rather than persistent manager underperformance.

C.5 – Please provide a 5-year comparison of the Corporation's total annual investment return rates with the corresponding annual return rates of comparable peers and please provide commentary on any significant differences and descriptions of peer groups

The annual and five-year annualized returns for the MPI investment portfolio are provided in the table below.

Please note that ICBC's and SGI's returns are publicly available on their respective website. MPI is not comfortable commenting on the relative performance to either ICBC or SGI, as while there may be some similarities in the investment programs, the overall structure and rationale may differ substantially. As such, MPI believes it would be inappropriate to make inferences regarding either of the above's underlying data or performance.

Figure INV-3 – MPI historical performance

MPI Fund return	2026	2025	2024	2023	2022	2021	5-year (annualized)
Return	4.4%	8.9%	3.4%	-0.8%	0.8%	8.9%	4.1%

C.6 – Please provide results indicating the performance of MPI's investment managers on MPI's reporting dashboard.

Performance of MPI's Investment Managers on MPI's Reporting Dashboard

MPI's full investment manager performance dashboard results are presented in Appendix 6 (Basic Claims), Appendix 7 (RSR), Appendix 8 (EFB) and Appendix 9 (Performance Attribution Report) of the 2027 GRA. Monthly performance data is provided electronically as Appendix 10 – Monthly Performance Data.

Investment Manager Overview

MPI approved the switch to the iShares MSCI World ETF from Guardian as the new manager of global equities before the end of the 2024/25 fiscal year. The transition was implemented in April 2025.

C.7 – Please provide an explanation of the nature and adequacy of inflation protection in MPI's investment portfolio.

Inflation Protection

- MPI's investment portfolio incorporates inflation sensitivity through a combination of:
  - explicit inflation-linked assets; and
  - return-seeking asset classes with partial inflation sensitivity.
- This exposure is aligned with the objectives of each portfolio and is considered within MPI's broader asset-liability management framework.

Sources of Inflation Sensitivity

- Within the Basic Claims portfolio, inflation sensitivity is primarily provided through:
  - Real Return Bonds (RRBs); and
  - real estate assets.
- Real Return Bonds provide a direct contractual linkage to inflation, as both principal and interest payments are indexed to the Canadian Consumer Price Index (CPI).
- Real estate assets provide partial inflation protection over the longer term through:
  - rental income dynamics; and
  - property value adjustments.
- Across the broader portfolios, additional asset classes such as:
  - equities;
  - infrastructure; and
  - private assets;

  provide indirect or partial inflation sensitivity, reflecting their linkage to nominal economic growth and pricing dynamics.

Role of Inflation in the Investment Framework

- Inflation risk is explicitly recognized and incorporated in MPI's asset-liability modelling and investment framework.
- Inflation is not managed as a standalone driver of investment risk-taking, and is considered alongside other key factors, including:
    - interest rate risk;
    - capital stability; and
    - recovery behavior under adverse conditions.
- In particular:
    - certain components of inflation, such as claim-related costs, may be addressed over time through pricing mechanisms (subject to regulatory approval);
    - accordingly, inflation risk is managed using a combination of:
        - investment strategy;
        - pricing flexibility;
        - and governance processes.

Adequacy of Inflation Protection

- The adequacy of inflation protection is assessed within MPI's overall risk management framework, rather than against a standalone target.
- The current level of inflation-sensitive exposure is considered to support long-term resilience while avoiding undue complexity or additional sources of volatility.
- Consistent with prior PUB direction, MPI continues to incorporate inflation considerations within its ALM analysis and investment review processes.

Ongoing Monitoring

- Inflation exposure is monitored as part of MPI's regular investment and asset-liability management processes.

Figure INV- 4 Illustrative inflation sensitivity in the portfolio

Asset Class	Inflation Hedging Mechanism	Completeness of Hedge
Real Return Bonds (RRBs)	Coupon and principal indexed directly to CPI	100% hedge against CPI inflation
Real Estate	Property values and rental income tend to rise with inflation over the long term	Partial hedge — indirect, correlation-based
Equities	Corporate revenues and earnings tend to grow with nominal GDP/inflation over time	Partial hedge — variable, long-horizon
Infrastructure	Many infrastructure assets have contracted inflation-linked revenue streams	Partial hedge — asset-specific

H.5 – Please provide details of the assumed Government of Canada bond yield, with the duration equal to the expected claims duration as well as yields/spreads for all asset classes supporting the claims portfolio. Please include detailed calculations, including assumed weightings.

Government of Canada Bond Yield Aligned to Expected Claims Duration

The Government of Canada ("GoC") bond yield used in the valuation of claims is determined by aligning the GoC yield curve to the expected duration of MPI's claims liabilities. In contrast, the 10-year GoC yield is used to set yield assumptions for the assets supporting the claims portfolio.

The expected claims duration is determined based on MPI's actuarial projections of future claims cash flows. The corresponding GoC yield is derived from the observed nominal Government of Canada yield curve as of the valuation date. Where the claims duration does not align exactly with an observable maturity, the yield is determined using interpolation between adjacent maturities. The Government of Canada yield curve underpinning this calculation is illustrated in Figure INV-5 (Canadian Government Yield Curve), which reflects observed market yields as of the valuation date.

This approach ensures consistency between claims valuation, asset yield assumptions, and MPI's broader asset-liability management framework. WTW supports MPI by providing analytical support and explanation of the methodology. All underlying assumptions and valuation inputs are determined and approved by MPI.

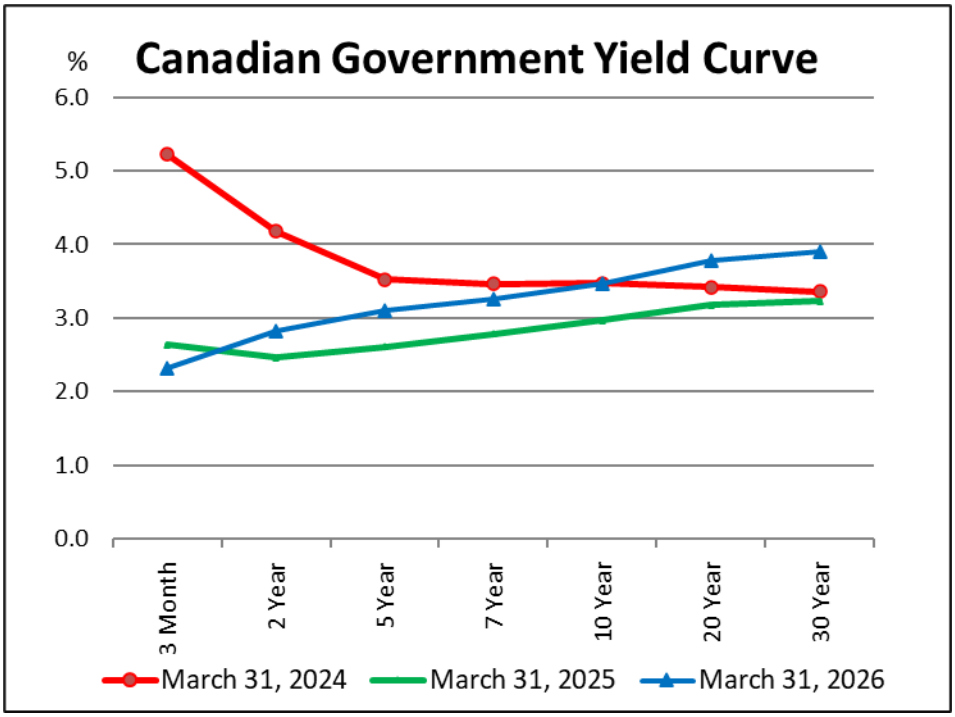
Assets supporting the claims portfolio are primarily fixed income in nature. For each asset class, the assumed yield is determined as the 10-year Government of Canada yield plus an assumed spread based on the duration of the asset class of March 31. These spreads reflect credit risk, liquidity characteristics, and structural features specific to each asset class, and are intended to remain market-consistent and aligned with MPI's liability-aware investment framework.

Provincial bond yields are determined by applying a provincial credit spread to the Government of Canada yield at the relevant duration. The assumed spread reflects prevailing market conditions and long-term historical relationships and is applied consistently with prior filings.

Corporate bond yields are derived by adding an assumed credit spread to the Government of Canada yield corresponding to the duration of the corporate bond portfolio. The spread assumption reflects the weighted-average credit quality and duration of the underlying holdings.

Real Return Bonds provide inflation-indexed cash flows and are included to support inflation-sensitive claims. The nominal yield for these assets is calculated as the sum of an assumed real yield and expected long-term inflation, applied consistently within MPI's asset-liability framework.

The overall yield for the assets supporting the claims portfolio is calculated as a weighted-average yield based on the assumed weightings of each asset class. These weightings reflect MPI's current investment policy framework and portfolio structure and are not intended to represent a finalized or optimized asset mix.



As part of ongoing investment strategy work, MPI is continuing to refine its investment risk appetite through its governance processes. Subsequent analysis will examine alternative portfolio structures and

asset mixes consistent with that risk appetite, with final asset allocation decisions to be determined following completion of that work.

In summary, the 10-year Government of Canada bond yield is derived from observed market yields, with asset class yields constructed using consistent spread assumptions. Portfolio yield assumptions are based on current policy-aligned weightings and are applied within MPI's broader asset-liability framework to support transparent and defensible assumptions for the General Rate Application.

The Government of Canada yield curve underpinning this calculation is illustrated in:

Figure INV-5 – Canadian Government Yield Curve

H.6 – Please provide a narrative explanation of the net impact of changes in interest rates impact to net income. Please provide the yield curve and implied average discount rate used for the calculation of the interest rate impact on claims incurred, and include the calculations used in the determination of the utilized yield curve

Changes in interest rates affect MPI's net income through two primary and offsetting channels: the impact on the value and income of investment assets, and the impact on the valuation of claims liabilities.

Changes in interest rates influence investment income through both the level of yield earned on fixed income assets and the mark-to-market value of those assets. At the same time, changes in interest rates affect the present value of claims liabilities through the discount rate applied to projected claims cash flows.

MPI manages interest rate risk through an asset-liability matching framework designed to align the interest rate sensitivity of fixed income assets with that of claims liabilities. As a result, changes in interest rates are expected to produce largely offsetting impacts between assets and liabilities.

For rate-setting purposes, MPI applies a simplified approach in which interest rates are held constant at the level observed as of the valuation date over the forecast period. Under this approach, no changes in interest rates are assumed between periods.

Accordingly, the forecasted net impact of changes in interest rates on net income is approximately neutral, as the impact on investment values and income is expected to be offset by changes in the valuation of claims liabilities.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Corporate Policy

INVESTMENT POLICIES MANUAL			
Policy No.	CP.6	**Policy Owner**	Manager, Investments
Date of Last Review	January 21, 2026	**Approval Date**	March 17, 2026
Effective Date	April 1, 2026	**Approver**	Board of Directors
Additional information about this policy: This is a corporate policy with a corporate-wide impact on Manitoba Public Insurance through the activities of the Investment Committee and the employees involved in investment decisions.			

1. Policy Statement

Manitoba Public Insurance ("MPI" or "Corporation") is committed to making investment decisions and conducting all investment-related procedures and practices in accordance with all applicable laws, regulations, investment principles and standards. The policies in this manual define the approach to managing the Corporation's investment portfolios in compliance with this commitment.

2. Background

Manitoba Public Insurance follows various legislative requirements, investment principles, and standards when making investment decisions to ensure compliance with The MPIC Act, The Financial Administration Act and other applicable laws and regulations.

This manual of assembled investment policies articulates MPI's approach to complying with the applicable statutes and regulatory standards related to corporate investment processes and practices. It assists the Corporation in grouping the various investment-related policies, principles, and guidelines into a single policy artefact for ease of administration, reporting, and audit purposes.

3. Policy Objective

The objective of this policy manual is to ensure that MPI's investments are managed in accordance with all applicable legislative requirements, investment principles, and ethical standards. The application of these policies should promote transparency and accountability and ensure efficient decision making that adheres with all compliance requirements.

4. Scope

The policies embedded in this manual apply to all members of MPI's Board, Investment Committee, Investment Committee Working Group (ICWG), MPI employees involved

in the administration of the Corporation's investment decisions, the MPI External Investment Consultant as well as all external investment managers. These policies include: (1) Investment Policy Statement, (2) Operational Asset Liability Management Policy, (3) Rebalancing Policy, (4) Active Manager Monitoring Policy, and (5) Trading Approval Policy .

5. Definitions

The meaning and intent of specific technical terms are as defined and applied within the Schedule of Policies section of this policy document. Most of the terms are defined as follows:

"alternative asset classes": There are three primary asset classes: equities, bonds, and cash. Alternative asset classes refer to any other types of investments or collections of investment strategies that can be used to diversify investment portfolios. These investment strategies are generally aimed to provide meaningful growth, low correlation with equity markets and lower volatility than equity markets. Some examples of alternative investments include: hedge funds, private equity, private debt, currencies, commodities, infrastructure and real estate.

"credit spread risk" is the possibility of losses due to changes in credit spreads (i.e., credit widening and credit tightening).

"credit spread hedge ratio" is defined as follows:

$$\frac{Duration_{Corporate}\ x\ Market\ Value_{Corporate} + Duration_{Mortgages}\ x\ Market\ Value_{Mortgages}}{Duration_{Liabilities}\ x\ Market\ Value_{Liabilities}\ x\ (Weight_{Corporate} + Weight_{Mortgages})}$$

Where $Weight_{Corporate}$ and $Weight_{Mortgages}$ are the target weights in the liability discount curve, i.e., the target weights in MPI's Investment Policy Statement divided by 90% to adjust for the 10% allocation to Real Estate.

"**duration"** is the weighted average time until the repayment of a fixed income instrument. In addition, it is also used to measure the price sensitivity of those instruments to changes in bond yields.

"dollar duration" is the product of duration and market value. Dollar duration is a measure of the sensitivity of the market value of fixed income assets and liabilities to changes in interest rates.

"fixed-income securities" are investments that provide a return in the form of fixed periodic payments (coupon payments) and the return of the principal at maturity. Unlike a variable-income security, the payment amounts and dates of a fixed-income security are known in advance.

"interest rate hedge ratio" is calculated by dividing the dollar duration of the fixed income assets by the dollar duration of the liabilities. Aiming for an interest rate hedge ratio of 100% between fixed income assets and liabilities helps minimize the dollar sensitivity of the surplus to interest rate fluctuations.

"interest rate risk" is the risk of economic loss resulting from market changes in interest rates and the impact on interest rate sensitive assets and liabilities.

"investment counsel" are appointed by the Province of Manitoba to invest certain funds of the Corporation in accordance with and subject to the terms of an agreement with the Provincial government.

"MUSH Bonds" are Manitoba rural municipality, university, school divisions and health-care facility bonds which are not tradable in the fixed income market and are managed by the Department of Finance at the Province of Manitoba.

"private market asset" classes include real estate, infrastructure, commercial mortgages, private debt and private equity. Assets traded in private asset markets are often illiquid.

"public market asset" classes include government bonds, corporate bonds, Canadian equities and global equities. Public markets are known for their accessibility and liquidity.

"risk" can be defined as the uncertainty of future outcomes. In a portfolio context, there is unsystematic risk which diversification can help to mitigate and systematic risk which cannot be eliminated. Systematic risk is essentially the risk inherent in securities markets. The minimum acceptable level of risk for the Corporation occurs when its assets have been sufficiently diversified so as to reduce the impact of unsystematic risk. Systematic risk may be controlled by investing in authorized asset classes and through the use of hedging strategies.

"total return" includes both the change in the price of a financial asset, over a set period of time, as well as any income or dividends paid by the asset. In a portfolio context, total return represents the weighted average of each asset's total return, based on its proportion in the portfolio. This captures the combined effect of price changes and income across all holdings.

6. Guiding Principles and Policy Requirements

The guiding principles and applicable requirements of the constituent policies of this manual are as described within the respective policies. For quick access to individual policies, please click the links below.

- Investment Policy Statement
- Operational Asset Liability Management Policy
- Rebalancing Policy
- Active Manager Monitoring Policy
- Trading Approval Policy

7. Roles and Responsibilities

Roles and responsibilities associated with the implementation of this policy manual are as defined within the constituent policies set out in the Schedule of Policies section of this document.

8. Related Documents

- Investment Committee Terms of Reference
- P.13 Code of Ethics and Business Conduct
- The Manitoba Public Insurance Corporation Act
- The Financial Administration Act

9. Exceptions to this Policy

Unless expressly provided within each of the constituent policies, there are no exceptions to this policy manual.

10. Owner/Inquiries

The owner of this policy is the Manager, Investments, who is responsible for enforcing and updating this policy manual or any of its constituent policies as may be required.

11. Transitions Provisions

No transition provisions are applicable as the policies within this manual become in force as of the effective date.

12. Periodic Review

Unless as specifically stated within each of the constituent policies of this manual, the Manager, Investments , will review and revise this policy manual annually and as required to ensure alignment with applicable organizational changes and regulatory developments.

Document Version Control

Version	Date	Summary of Changes	Author
1.0	March, 2024	Earlier version	
2.1	December, 2024	Annual review of policy with changes including: • benchmarks revised as follows: ○ Name of real estate benchmark updated. ○ Infrastructure benchmark changed to a blend of (BEIR +4%) + DJBGINAT. ○ Weights used in the blended benchmark for MUSH bonds & corporate bonds in Basic Claims adjusted. ○ Benchmark for Provincial bonds in SRE shortened. ○ Total min/max for each asset class adjusted so each asset class cannot simultaneously be at the min or max. • adapting to a new policy template. • updating titles.	Enes Jeina
2.2	June, 2025	IPS Section 5 – "Liability Characteristics" and Section 6 – "Investment Objectives" were revised to make them more clear. IPS Section 8.1 - revised the minimum weights for each asset class in the Basic Claims portfolio. The following changes were made to include the credit spread hedge ratio: • Section 5 of the Corporate Policy: Added definitions of credit spread risk and credit spread hedge ratio.	[redacted]

		• IPS Section 6.7: Replaced reference to section 9.4 with The Operational ALM Policy with regards to hedge ratios.
		• IPS Section 9.4: Removed the description of the hedge ratio and replaced with a reference to the Operational ALM Policy for more information.
		• Added references to credit spread risk/credit spread hedge ratio in these sections of the Investment Policy Statement:
		  ○ 1.1
		  ○ 5.1.1
		  ○ 6.3
		  ○ 6.4
		  ○ 6.7
		  ○ 6.8
		  ○ 6.9.1
		  ○ 9.4
		  ○ 11.5
		
		The Operational ALM Policy was revised to include a strategy for managing credit spread risk in the Basic Claims portfolio:
		
		• General housekeeping changes, including but not limited to date changes and grammatical edits.
		
		• Updated Section I and Section VI and added Section IV to include the strategy for managing credit spread risk in Basic Claims	

2.3	November 2025	Update for the Non-Discretionary OCIO	[redacted]
2.4	January 2026	Annual Review of policy	[redacted]

Part 2 – Operational Asset Liability Management Policy 24
Part 3 – Rebalancing Policy 27
Part 4 – Active Manager Monitoring Policy 28
Part 5 – Trading Approval Policy 33

Part 1 – Investment Policy Statement

I. Statement of Investment Beliefs

The Investment Committee and ICWG believe that:

1.1 For assets backing claims liabilities the most important measure of risk is surplus volatility (i.e.: the difference in the value of the assets and liabilities) rather than volatility of the market value of the assets alone. A liability sensitive approach to investing reduces the Fund's interest rate risk and credit spread risk by matching the size and duration of the Corporation's liabilities with fixed income securities.

1.2 For assets not backing claims liabilities the most important measure of risk is the volatility of the market value of the asset.

1.3 Asset allocation is an important factor in achieving the investment objective of each portfolio.

1.4 Market timing at the tactical asset allocation level is generally not an effective strategy for consistently increasing returns.

1.5 Identifying, measuring, and monitoring risks within the portfolio is important.

1.6 Passive management is used, when appropriate, to reduce active management risk and cost.

1.7 Over the long-term, equities are expected to provide a return premium over bonds, with higher expected volatility. A meaningful allocation to foreign equities will increase portfolio diversification and thereby decrease portfolio risk while, at the same time, providing the potential for enhanced long-term returns.

1.8 Private debt benefits the Corporation by enhancing and diversifying the return of the Fund's investment portfolio without degrading the quality.

1.9 Alternative asset classes such as real estate and infrastructure provide income and potential capital growth and are suited to partially offset inflation sensitive liabilities.

II. Overview

2.1 This Investment Policy Statement ("the Statement") applies to the assets held in the Fund in respect of the liabilities of the Manitoba Public Insurance Corporation ("the Corporation") under the Manitoba Public Insurance Corporation Act ("the Act"). The Statement contains investment objectives, investment guidelines, and monitoring procedures.

2.2 The Fund will be managed in accordance with all applicable legal requirements notwithstanding any indication to the contrary which might be construed from the

Statement. The purpose of the Fund is to pay the liabilities of the Corporation as they come due and to provide investment income from interest, dividends and capital gains that will assist in minimizing premiums payable by policyholders.

2.3 With respect to any portion of the Fund invested in pooled funds, provisions of the Investment Policy Statement of such pooled fund shall prevail over those of the Statement to the extent that they are in conflict.

2.4 Any investment counsel or other agent or advisor providing services in connection with the investment of the Fund shall accept and adhere to this Statement.

2.5 The Corporation is a Manitoba Crown Corporation and is not subject to provincial or federal income taxes but could be subject to withholding taxes in foreign jurisdictions.

III. Responsibilities

3.1 Section 12 of the MPIC Act requires the Corporation to pay to the Minister of Finance (the "Minister") the investment assets of the Corporation (the "Fund"), which assets the Minister then invests in accordance with The Financial Administration Act (the "Act"). It is understood that the Minister recognizes the unique investment goals of the Corporation and desires a close and cooperative working relationship between the Department of Finance (the "Department") and the Corporation to ensure that the investment strategies and policies of the Fund address their respective needs and objectives.

The Minister has charged the Province of Manitoba's Department of Finance – Treasury Division (the "Department") with the operational management of the Fund. Duties include establishing legal contracts with investment counsel, providing the Corporation with short-term cash and treasury management services, managing portions of the fixed income portfolio, and participating in the ICWG.

Any investment counsel, advisors or custodians that may be required to advise on the Corporation's investments will be engaged on a basis satisfactory to the Minister where applicable, subject to authorization by the Lieutenant Governor in Council.

In accordance with the Section 12 and 18 of the Act, The Minister of Finance is responsible for the investments of the Corporation. Specifically, the Act provides:

> **INVESTMENTS**
> 12(1) The corporation shall pay to the minister charged with the administration of The Financial Administration Act, for investment for the corporation, moneys in any reserve established under section 18 and such additional moneys as are not immediately required for the purposes of the corporation and are available for investment.

MONEYS TO BE CREDITED TO CORPORATION
12(2) Moneys paid under subsection (1) for investment shall form part of the trust and special division of the Consolidated Fund and may be invested in accordance with The Financial Administration Act, and the interest earnings thereon shall be credited to the account of the corporation in the trust and special division of the Consolidated Fund.

PAYMENT OF EARNINGS
12(3) Any earnings, whether alone or with the principal sum invested for the corporation under this section, or any part thereof, shall be paid over to the corporation by the minister charged with the administration of The Financial Administration Act on the request of the corporation."

RESERVES
18(2) The corporation must establish and maintain a reserve sufficient to pay future claims-related expenses associated with incurred claims under that line of insurance.

Investment counsels, advisers and custodians may be hired by the Minister of Finance subject to authorization by the Lieutenant Governor in Council under The Executive Government Organization Act, Section 16 and 16(d) as follows:

AGREEMENTS WITH OTHER AUTHORITIES
16 The Lieutenant Governor in Council may authorize a minister, for and on behalf of the government, or an agency of the government, to enter into an agreement with

(d) any person or group of persons; for the benefit or purposes of the residents of Manitoba or any part thereof.

3.2 The Act and the Minister establishes the role of the Department as:

3.2.1 managing the investment of the Fund and implementing investment direction and decisions consistent with approved investment policies and strategies.

3.2.2 through participation on the ICWG, developing proposed investment policies and strategies for the Fund for recommendation to the Committee; and

3.2.3 appointing a minimum of three (3) individuals as representatives of the ICWG.

3.3 The Board of Directors of MPI approve the retention and termination of investment managers and policies recommended by the Investment Committee

3.4 The purpose of the Investment Committee ("the Committee"), as appointed by the Board of Directors of the Corporation ("the Board") shall be to assist the Board in:

a) Recommending investment policies to the Board for approval;

b) reviewing matters relating to investment activities of the Fund;

c) providing oversight and monitoring performance of the Fund;

d) monitoring the implementation of investment decisions consistent with investment policies and strategies approved by the Board;

e) approving the retention and termination of investment managers.

3.5 The ICWG is a joint committee of the Department and the Corporation. The role of the ICWG is to:

a) function as liaison between the Department and the Committee;

b) review strategies for investment exposure for consideration by the Department and the Committee;

c) make recommendations to the Committee respecting the retention and termination of investment managers;

d) monitor the performance of investment managers;

e) approve investment policies and annual strategies for the Fund for review by the Committee

f) monitor investment policies and direction;

g) receive regular reports from MPI's External Investment Consultant and Internal Investment Team and

h) annually review the risk, return and diversification of all asset classes in the Fund as prepared by the External Investment Consultant and Internal Investment Team, and report the results to the Investment Committee.

3.6 Quorum for the ICWG is

- one of the Vice-President & Chief Financial Officer or the Vice-President, Chief Actuary of the Corporation; and
- one of the Assistant Deputy Minister of the Department of Finance or their respective designate.

3.7 MPI's Internal Investment Team

3.7.1 Monitors the outside investment counsel for compliance with the Statement and compliance with the Investment Policy Statement for their fund,

3.7.2 Monitors the External Investment Consultant to ensure all work is completed on a timely basis,

3.7.3 Supports the External Investment Consultant to ensure the investment objectives and risk appetite are met; and

3.7.4 Develops and maintains relationships with members of the investment community and other provincial Crown insurance companies.

3.8 MPI's External Investment Consultant

3.8.1 Completes quarterly reviews of the risk, return and diversification of all asset classes and managers in the Fund, and reports the results to the ICWG and the Investment Committee.

3.8.2 Proposes terminations and appointments of new investment managers.

3.8.3 Reviews investment objectives and risk appetite and proposes changes to investment mix as appropriate; and

3.8.4 Provides research and analysis as requested by the ICWG and IC.

IV. Conflict of Interest

4.1 Corporate Directive P.13 shall be followed by all individuals involved in the Corporation's investments. As per the policy:

4.2 "Individuals shall not have a financial interest which would conflict in any manner with the discharge of their duties. Individuals who have a financial interest in an outside business, or who can gain financially through their association with an outside business, must immediately disclose this relationship to the General Counsel and Corporate Secretary where the business intends or proposes to do business with Manitoba Public Insurance, or if the business enters into a contract with Manitoba Public Insurance."

4.3 A conflict of interest, whether actual, potential or perceived, is defined for the purposes of this Statement as any event in which the Corporation, an employee of the Corporation, an employee of the Department performing duties on behalf of the Corporation, any member of the Board or the Committee, any investment counsel or delegate, the Custodian, or any person or company directly related to any of the foregoing, may benefit materially from knowledge of, participation in, or by virtue of, an investment decision or holding of the Fund.

4.4 The Code of Ethics and The Standards of Professional Conduct adopted by the CFA Institute shall be applied to each investment counsel.

4.5 A fiduciary, according to the CFA Institute, is one who holds a position of trust or confidence. A conflict of interest is deemed to exist when a fiduciary has an interest of sufficient substance and proximity to its duties and powers with respect to the Fund to impair its ability to render unbiased advice or to make unbiased decisions affecting the Fund.

4.6 A fiduciary, as described in section 4.5, must immediately disclose any conflict of interest in writing along with all relevant details to the chairperson of the Committee who, in turn, discloses it to all Committee members at the appropriate time.

4.7 No part of the Fund shall be loaned to any member of the Board, the Committee, an employee of the Department performing duties on behalf of the Corporation, or employee of the Corporation or any legal entity owned or controlled by any of the aforementioned. In addition, the Fund may not enter into a transaction with a related party unless:

a) The transaction is required for the operation or administration of the Fund and the terms and conditions of the transaction are not less favourable to the Fund than market terms and conditions; or

b) The securities of the related party are acquired through a public exchange, with the exception of MUSH bonds as noted in section 7.3.

Related party includes any officer, director, or employee of the Corporation. It also includes the investment counsels and their employees, a union representing employees of the Corporation, a spouse or child of the persons named previously, or a corporation that is directly or indirectly controlled by the persons named previously, among others.

V. Liability and Retained Earnings Characteristics

5.1 Each of the Corporation's five investment portfolios back liabilities, retained earnings or a combination of both. The Corporation's liabilities include both short-term and long-term liabilities arising from its insurance business as well as employee future benefits liabilities. In its insurance business, short-term liabilities are a result of all perils coverage and minor injury claims, which have a short time frame between claim reporting and claim settlement while long-term liabilities are a result of both the Personal Injury Protection Plan (PIPP) coverage and tort coverage. The long-term nature of PIPP coverage arises mainly from lifetime benefits payable to eligible claimants. Tort coverage has a long-term nature mainly due to long settlement

periods, which is a result of the more complicated nature of these claims. The following is a description of liabilities and retained earnings by business line:

5.1.1 **Basic Claims Portfolio** supports the liabilities associated with claims covered under the universal compulsory automobile insurance for Manitoba drivers and vehicle owners. These obligations include a mix of long-term payments for PIPP coverages and short-term payments for physical damage repairs. The tort component (Third Party Liability – Bodily Injury and Property Damage) is minimal compared to the other coverages. Some of the PIPP coverages are indexed to the Manitoba Consumer Price Index (CPI). Claim liability estimates are influence by various risks including mortality, inflation, discount rate, technological improvements, and societal/legal/regulatory factors. These liabilities comprise the largest portion of the corporation's Liability for Incurred Claims. Most of these liabilities are long-term in nature and are subject to significant interest rate risk and credit spread risk; short-term liabilities represent approximately 10% of the total and require a high level of liquidity to pay claims.

5.1.2 **Rate Stabilization Reserve Portfolio** consists of Basic investment assets that exceed the Basic liabilities for incurred claims. These assets do not have direct associated liabilities but can be used to cover liabilities in case of unfavourable Basic claims experience. The purpose of these assets is to protect motorists from rate increases that would otherwise have been required due to unexpected deviations from forecasted results or losses from non-recurring events.

5.1.3 **Extension Portfolio** consists of assets backing the liabilities and retained earnings of the Extension line of business. This line includes optional products and coverages that Manitobans can elect to add to their compulsory auto insurance. The claims liabilities are primarily short-term, as the largest product being the all-perils deductible buy-down. However, there are some long-tail liabilities from the tort product arising from the Third- Party Liability Extension product. These liabilities are subject to low interest rate and inflation risk.

5.1.4 **Special Risk Extension Portfolio** consists of assets that support liabilities and retained earnings of the SRE line of business. This competitive line of business focuses on insuring the trucking industry. The liabilities are primarily short term due to physical damage claims, but there are some long-term liabilities from the Third-Party Liability coverage, especially for policies with USA exposure. These liabilities are subject to low interest rate and inflation risk. There is societal/legal risk and currency risk due to USA exposure.

5.1.5 **Employee Future Benefit Portfolio** consists of assets that support the accrued employee pension, post-retirement and severance benefits for all lines of business in conjunction with MPI's unfunded portion of the Civil Service Superannuation Board of Manitoba ("CSSB") pension obligations. Employee Future Benefit Liabilities are subject to interest rate risk, mortality risk and changes in actuarial assumptions from the external pension actuary.

5.2 The Corporation's cash needs are significant due to the uncertainties in the timing and amount of claims payments. This is offset by the high certainty of future premium income.

5.3 Some benefits of the Personal Injury Protection Plan (PIPP) paid by the Corporation are indexed to inflation through the Manitoba consumer price index.

VI. Investment Objectives

6.1 The purpose of the five portfolios defined in Section 5.1 (collectively "the Fund") is to pay the short and long-term liabilities of the Corporation as they come due and to provide investment income from interest, dividends and capital gains that will assist in stabilizing premiums payable by policyholders.

6.2 The Corporation must maintain adequate funds to ensure satisfaction with its obligations to claimants. These assets must be managed in a manner which will earn investment returns for an appropriate level of risk suitable for each portfolio. The Fund must also have sufficient liquidity to address all funding needs of the Corporation as they arise.

6.3 The Corporation considers the short-term volatility of premiums to be a primary concern. As such, mitigating short-term changes in the relative value of assets and liabilities is a major investment objective, particularly those generated by interest rate and credit spread variations. The mismatch in the changes in assets and liabilities, because of changes in interest rates and credit spreads, is expected to be minimized by defining a narrow range around the actuarially determined duration of the Corporation's claim liabilities.

6.4 Fixed income management will be governed by the accepted interest rate hedge ratio, credit spread hedge ratio, dollar gap and tracking error ranges as defined in the Operational Asset Liability Management Policy. The fixed income portfolio shall be diversified amongst nominal federal, Manitoba, other provincial, municipal, corporate issues and Maple bonds, real return bonds and commercial mortgages with a variety of maturities. It may include allocations to private placements (bonds and debentures) of various maturities to be funded over time.

6.5 To meet or exceed the Corporation's short-term and long-term liability commitments.

6.6 To maximize investment returns for an appropriate level of risk. Risk can be defined by the standard deviation of returns, the Sharpe Ratio, Value at Risk, Tracking Error, and other commonly used risk metrics for the total MPI portfolio, or any component of the total portfolio, which are compared to the same metrics for the relevant index.

6.7 For assets supporting claims liabilities, risk is also defined as surplus volatility, which is driven by the dollar duration gap (or mismatch) between fixed income assets and claims liabilities. Dollar duration is a measure of the sensitivity of the market value of fixed income assets and liabilities to changes in interest rates. Operational Asset Liability Management Policy describes the interest rate hedge ratio and credit spread hedge ratio that the Corporation applies to manage its interest rate and credit spread risk.

6.8 To mitigate interest rate and credit spread risk where applicable.

6.9 Given the different nature of liabilities, the investment objectives and risk tolerances for each portfolio (which are held to back liabilities, retained earnings or a combination of both) is as follows:

6.9.1. **Basic Claims Portfolio:** The objectives are to back policyholder claims ensuring funds are available as liabilities come due and to minimize interest rate and credit spread risk through dollar-duration matching. The funds are intended to pursue modest incremental returns while prioritizing risk management. Sufficient liquidity must be maintained to support the Basic line of business as required. Physical damage claims are typically settled within one year and are funded by cash from premiums. Payments on PIPP claims made in the short-term (0-12 months) represent approximately 5-10% of the overall PIPP liability and are funded from a combination of investment income and cash from premiums. The timing and amount of payments beyond 12 months are estimated and long-term investments are held to cover these liabilities.

6.9.2. **Rate Stabilization Reserve:** The objectives are to ensure sufficient levels of capital are maintained such that the Basic line of business meets the minimum capital target (MCT) of 100% and is in an actuarially determined state of satisfactory financial condition based on the Financial Condition Testing (FCT) report. The RSR portfolio must have sufficient capital to withstand plausible adverse events and to deliver rate stability and predictability. Given that there are no specific backing obligations, duration management does not apply, and the fund's objective is to generate real returns to facilitate stable premium rates. A moderate level of liquidity is required to ensure funds are available in the event the Corporation experiences a series of adverse events and resulting financial losses that deteriorate its capital base.

6.9.3. **Special Risk Extension Portfolio:** The assets backing the SRE line of business support both the claim liabilities and the retained earnings. The main objectives are to achieve a return target that maintains the capital target of 300% MCT and supports competitive and stable premium payable by policyholders. The SRE claims obligations are expected to be funded by cash generated from ongoing operations. The risk tolerance is moderate, given the nature of liabilities as SRE claims obligations have both short- and long-term durations. Moderate liquidity is required as large claims can arise from the Third- Party Liability coverage.

6.9.4. **Extension Portfolio:** The assets backing the Extension line of business support both the claim liabilities and the retained earnings. The objectives are to maintain the 200% MCT target, and to achieve returns that support competitive and stable premium payable by policyholders. Extension claim obligations are funded by cash generated from ongoing operations. The risk tolerance is moderate, given that liabilities are mainly short duration. Most assets backing Extension are backing surplus, therefore minimal liquidity is required.

6.9.5. **Employee Future Benefits Liabilities:** The objective is to ensure that pension and other obligations are paid as they become due. The liabilities are long-term in nature, so minimal liquidity is required.

6.10 To achieve a time-weighted total return, before all investment management fees, at least equal to the following indices and according to the target allocation defined in section 8.1. Passive management strategies are expected to earn a return in line with their respective benchmarks. The investment returns achieved by the investment managers will be measured and monitored on rolling four-year periods and compared against the appropriate benchmarks as defined below.

Asset Class	Annual Expected Return
Cash and Equivalents	FTSE 91-Day Treasury Bill Index
Canadian Provincial Bonds	
Provincial Short-term Bonds	FTSE Short Term Provincial Bond Index
Provincial Mid-term Bonds	FTSE Mid Term Provincial Bond Index
Provincial Long-Term Bonds	FTSE Long Term Provincial Bond Index
Real Return Bonds	100% FTSE Canada Real Return Bond Index
Canadian Corporate Bonds	
Corporate Bonds – Long-Term Pooled Fund	FTSE Canada Long Term Corporate Bond Index plus 25 basis points over a rolling four-year period annualized before management fees
Corporate Bonds – Basic Claims Separately Managed Account (SMA)	25% FTSE Canada Mid Term Corporate Bond Index and 75% FTSE Canada Long Term Corporate Bond Index plus 25 basis points over a rolling four-year period annualized before management fees

MUSH Bonds	50% FTSE Short Term Provincial Bond Index plus 50% FTSE Mid Term Provincial Bond Index
Commercial Mortgages	40% FTSE Canada Mid Term Bonds and 60% FTSE Canada Short Term Bonds plus 50 basis points per annum
Private Debt	
Private Debt - Universe	FTSE Canada All Corporate Bond Index plus 100 bps gross of investment management fees over a rolling four-year period annualized
Private Debt - Long	FTSE Canada Long Term Overall Bond Index plus 75 basis points gross of investment management fees over a rolling four-year period annualized

Canadian Equities	
Large Market Capitalization Equities	S&P/TSX Capped Composite Total Return Index
Small to Mid-Market Capitalization Equities	S&P/TSX Small Cap Total Return Index plus
Global Equities	
Global Equities	MSCI World Index in Canadian dollars
Low Volatility Equities	MSCI World Index in Canadian dollars
Alternative Investments	
Canadian Real Estate	MSCI Quarterly Property Fund Index90% x (5-year break-even inflation rate[1] + 4%) plus (10% x DJBGINAT[2])
Infrastructure	

In addition to the return targets above, the Global Low Volatility Equities shall target a reduced return volatility, by the amount of the objective shown below:

[1] The Break-even inflation rate (BEIR) is calculated as the difference in yield of a nominal government bond and a real return bond with the same term. The 5-year BEIR cand be found on Bloomberg (ticker CDGGBE05).
[2] DJBGINAT stands for Dow Jones Brookfield Global Infrastructure North American Listed index. This is the benchmark for our current liquid infrastructure investment, BMO Global Infrastructure Index ETF (ticker ZGI).

Benchmark	Return Volatility Objective Over 4 years
MSCI World Index in Canadian dollars	In general and in USD terms, up to 70% of Benchmark Return Volatility when benchmark return volatility is in the 14%-20% range and up to 80% of Benchmark Return Volatility, if benchmark return volatility is below stated range.

VII. Permitted Investments

7.1 The Fund may only be invested in the following asset categories:

a) Cash;

b) Demand or term deposits, or similar instruments issued or unconditionally guaranteed by banks;

c) Short-term notes;

d) Treasury bills;

e) Bank Deposit Notes;*

f) Commercial paper;*

g) Bonds and debentures or other debt instruments of government, government agencies, or corporations;*

h) Maple Bonds, which includes bonds issued in Canadian dollars by a supra-national agency, a foreign government, or a corporation*;

i) Inflation Linked Bonds issued by the Federal and provincial governments (Real Return Bonds) or the U.S. Treasury (Treasury Inflation Protected Securities);

j) Private placement bonds and debentures*;

k) Canadian and foreign publicly traded equities;

l) Private equity and venture capital;

m) Real estate;

n) Infrastructure;

o) Commercial Mortgages; and

p) Pooled funds consisting of assets listed in a) through o) above.

*See Section 9.6 for minimum credit ratings.

7.2 Cash and equivalent investments include cash and fixed income investments having a maturity of less than one year at the time of purchase.

7.3 Bonds include all fixed income securities having a maturity of one year or more at the time of purchase and include U.S. Treasury bonds & bills, Federal, Manitoba, provincial, municipal and corporate bonds, floating rate notes, and debentures as well as bonds issued in Canadian dollars by a supra-national agency ("Maple bonds"), a foreign government or a corporation that are tradable in the fixed income market and Manitoba rural municipality, university, school division and health care facility bonds and debentures (MUSH bonds) which are not tradable in the fixed income market.

7.4 Private Debt includes investment grade debt covering private corporate debt, infrastructure debt, power & energy debt, real estate debt and other forms of private debt.

7.5 Canadian equities include securities traded on the TSX or common stocks, preferred stocks, and convertible securities issued by Canadian issuers and Canadian equities exchange traded funds (ETFs)

7.6 Foreign equities include common stocks, preferred stocks, and convertible securities issued by foreign issuers.

7.7 Canadian Real Estate includes pooled funds, direct holdings of real estate and Canadian Real Estate Income Trusts exchange traded funds (ETFs).

7.8 Infrastructure includes pooled funds, segregated funds, direct holdings, co-investments, and infrastructure exchange traded funds (ETFs).

7.9 Private Equity is an investment in an unlisted company, which is typically long-term and unregulated. Venture capital is a form of private equity which focuses on small to medium sized business with strong growth potential. Venture capital is designed to help entrepreneurs start up or develop a new business where a high degree of risk is involved. The Corporation has capped its investments in Private Equity and will make no new investments in this asset class.

7.10 The Fund may purchase derivative financial, commodity or currency related instruments such as forward contracts, options, futures, or swaps provided that such participation is not for speculative purposes and are not purchased with the use of leverage. Use of derivatives should be consistent with the overall asset allocation and risk management of the Corporation. Use of a derivative is permitted only after the ICWG has reviewed the application of the derivative and determined that it meets or exceeds the defined investment objectives of this document. Derivative strategies also require the prior approval of the Committee. Derivatives may be used to mitigate investment risk or create a desired return (where no margin or borrowing is used).

7.11 Investment counsels shall not borrow money, pledge, or otherwise encumber any of the Fund's assets except to the extent that a temporary overdraft may occur in the normal course of day-to-day portfolio management. The use of leverage associated with real estate pooled funds and infrastructure investments is acceptable and will be defined in the investment manager's contract.

7.12 The Investment Counsel shall assess the financial strength of borrowers by reference to published credit ratings and by their own analysis. The investment counsel's analysis should include all material factors relevant to assess the ability of the borrower to repay the debt instrument, to discharge interest obligations on the specified payment dates and to endure periods of financial adversity. New investments may not be made in debt obligations that are in default of principal or interest.

7.13 The Minister may enter into a written agreement with the Custodian for securities lending provided that readily marketable securities having a market value of at least 105%, of the market value of the securities lent, are maintained on at least a daily basis.

7.14 Investment Counsels may use Soft Dollars (directed commissions) to pay for research related goods and services in accordance with the CFA Institute Soft Dollar Standards. Investment Counsels shall disclose to the Corporation at least annually the total amount of commissions and the products and services obtained through soft dollar arrangements from the Corporation.

VIII. Asset Allocation

8.1 After March 31, 2023, all investments are classified as Fair Value Through Profit and Loss.

On or after April 1, 2026 (or any other date determined by the Investment Committee) the target allocation for each portfolio is as follows:

Basic Claims

Asset Class	Benchmark	Minimum	Target	Maximum
Cash and Equivalents	FTSE Canada 91 Day T-Bill Index	0%	0%	5%
Fixed Income				
Provincial Bonds	20% FTSE Mid-Term Provincial Bond Index 80% FTSE Long-Term Provincial Bond Index	25%	35%	45%

Total Alternative Investments		**23%**	**33%**	**43%**

* The private debt fund contains a 20-50% allocation to public bonds, with the weight at the discretion of the fund manager

The target asset allocations have been determined in order to meet the objectives of the relevant portfolio. They reflect risk/return trade-offs selected by the Committee.

8.2 The actual allocation to MUSH bonds should not exceed 20% of the total fund. The aggregate allocation to MUSH bonds, Private Debt, Real Estate, Infrastructure and Commercial Mortgages should not exceed 35% of the total fund.

8.3 The ICWG will monitor the target asset allocation of the fund on a quarterly basis, at a minimum, and rebalance if necessary, in accordance with the ICWG's rebalancing policy.

8.4 Securities held in a pooled fund are classified on the basis of the assets comprising the major portion of such pooled funds.

8.5 Derivative instruments along with any collateral held thereon are included in the asset class comprising the securities whose return or price serves as the basis for the pricing of such derivative instruments.

8.6 The target allocation to illiquid growth assets (Real Estate and Infrastructure) as a proportion of total growth assets (Canadian Equity, Global and Global Low Volatility Equity, Real Estate and Infrastructure) should not exceed 50%. This does not apply to portfolios that do not contain equities.

IX. Investment Risk

9.1 Diversification between asset classes is provided through the asset allocation guidelines set forth in the Statement.

9.2 Diversification within each asset class is provided by limiting to 5% or less the percentage of the book value of Fund assets invested in a single security not issued or guaranteed by the Government of Canada, charged against the Consolidated Revenue Fund, issued by a Canadian province or a guarantee of a Canadian province. Minimum and/or maximum percentage weight targets may be developed and implemented for corporate and provincial bond issuers (Province of Manitoba excluded) to assist in the diversification of the fixed income portfolio.

9.3 Diversification in equity investments is achieved by contracting with investment counsels that concentrate on specific equity market segments (large cap and small/mid cap) as well as investment style (value, growth and core). Managers will be selected based on their investment philosophy and internal investment policies.

9.4 The Corporation employs an interest rate hedge ratio, and a credit spread hedge ratio to manage the interest rate risk and credit spread risks associated with the Basic Claims liabilities.

See the Operational Asset Liability Management Policy for additional information on managing interest rate risk and credit spread risk.

9.5 When investments are made outside of Canada, consideration will be given to limiting exposure to foreign exchange risk by hedging where practical.

9.6 Quality is ensured by requiring that 100% of the market value of short-term securities have a minimum credit rating of R-1 (low) as assigned by Dominion Bond Rating Service Limited (DBRS), or its equivalent, and that 100% of other fixed income securities have a minimum credit rating of BBB (low), or its equivalent, as

assigned by Dominion Bond Rating Service (DBRS), S&P Global Ratings (S&P) or Moody's Investors Service (Moody's), or is a security issued or guaranteed by the Government of Canada, charged against the Consolidated Revenue Fund, issued by a Canadian province or a guarantee of a Canadian province. In the event of one or more ratings differing from the others, the majority rating will prevail, or, in the event of all three ratings differing, the median rating shall prevail. In the event that there are only two ratings available, the more conservative rating will prevail.

9.7 In the event of a downgrade in the credit rating of a fixed income security by a recognized bond rating agency to a credit rating below the minimum as defined in Section 9.6, the Fixed Income Manager will follow the course of action set out below:

a) The ICWG will be notified of the downgrade at the earliest possible opportunity;

b) Within five business days of the downgrade, the Investment Counsel will advise the ICWG in writing of the course of action taken or to be taken by the Investment Counsel along with the rationales; and

c) The Investment Counsel will provide regular reporting to the ICWG on the status of the asset until such time as it matures, is sold, or is upgraded to a rating consistent with the minimum rating standards as defined in Section 9.6.

9.8 Trading and execution of the Fund will be done through the investment counsels who shall utilize their best efforts to obtain best execution of orders at the most favorable prices and competitive commission rates.

X. Voting Rights

10.1 The responsibility of exercising and directing voting rights acquired through Fund investments is delegated to the investment counsels, who shall at all times act prudently and in the best interests of the Fund.

10.2 In case of doubt as to the best interests of the Fund, the investment counsel must request instructions from the ICWG and act in accordance with such instructions.

10.3 Investment counsels shall maintain a record of how Fund voting rights have been exercised.

10.4 Investment counsels shall advise the ICWG and provide details when:

a) the results of the vote are contrary to the investment counsel's recommendations;

b) the vote is related to anti-takeover charter and bylaw amendments or shareholder rights;

c) the voting rights have not been exercised.

10.5 Investment counsels shall not delegate voting rights unless the policy and procedures to be used when voting has been filed with the Corporation and written approval of those policies and procedures have been granted.

XI. Monitoring

11.1 At the end of each quarter, the market value of each Fund investment is calculated. Investments that are not regularly traded are valued by the relevant manager or General Partner according to a methodology acceptable to the Committee. Any such investment that may represent more than 1% of the market value of the Fund is valued by a qualified independent appraiser or by the Committee through a resolution at least every three (3) years. The market value of the non-marketable bonds is calculated by the Province of Manitoba as the asset manager of this asset class.

11.2 Fund performance is evaluated at least quarterly in accordance with current Performance Presentation Standards established by the CFA Institute. Such evaluation is focused on objectives set in this document for the Fund and for the investment counsels.

11.3 Each quarter, investment counsels shall provide a letter indicating compliance with the Statement and the investment counsel's mandate and indicating all instances where the Statement and mandate were violated.

11.4 Investment counsels report to the internal and external MPI Investment Teams at least annually in order to:

a) provide information concerning new developments affecting the firm and its services;

b) review the transactions in the latest period and the assets held at the end of the period and explain how they relate to the strategy advocated;

c) explain the latest performance;

d) provide an economic outlook along with a strategy under such circumstances.

11.5 The Corporation employs an interest rate hedge ratio and credit spread hedge ratio in order to manage the interest rate and credit spread risk associated with the Basic Claims liabilities. The Corporation evaluates compliance with the defined interest rate hedge ratio, credit spread hedge ratio, dollar gap and tracking error ranges as defined in the Operational Asset Liability Management Policy on a quarterly basis.

Pooled fund managers are expected to comply with restrictions set out in the Investment Policy Statement of their respective pooled fund and must provide certificates indicating compliance on a quarterly basis. At each ICWG meeting, the compliance report certificates provided by each investment manager are presented before the Investment Working Committee Group for their review.

XII. Review

12.1 This Statement may be changed or modified at any time by action of the Board of Directors of the Corporation.

12.2 This Statement shall be reviewed at least annually. Non-annual reviews could be caused by:

a) a fundamental change in the business of the Corporation;

b) significant revisions to the expected long-term trade-off between risk and reward on key asset classes;

c) a major change in liabilities;

d) a significant shift in the financial risk tolerance of the Corporation;

e) shortcomings of the Statement that emerge in its practical application, or substantive modifications that are recommended to the Committee by an investment counsel;

f) applicable change in legislation.

Part 2 – Operational Asset Liability Management Policy

I. Background

The Corporation employs an interest rate hedge ratio, and credit spread hedge ratio to manage the interest rate risk and credit spread risk associated with the Basic Claims liabilities.

Interest rate risk is the risk of economic loss resulting from market changes in interest rates and the impact on interest rate sensitive assets and liabilities. This risk arises due to the volatility and uncertainty of future interest rates. Interest rate sensitivity is measured by dollar duration, which is the product of duration and market value. When the dollar duration of the assets and liabilities is equal, both will have the same sensitivity to interest rate movements.

Credit spread is the excess yield offered by a security relative to a risk-free security with the same maturity. Credit spread risk refers to the possibility of losses due to changes in credit spreads (i.e., credit widening and credit tightening).

Under IFRS 17, liability cash flow discounting is delinked from the asset portfolio, and the passthrough of portfolio credit to liability discounting is no longer applicable. This separation can lead to mismatches between the valuation of assets and liabilities. This impacts surplus, available capital, and the Minimum Capital Test (MCT) ratio.

II. Interest Rate Risk Management Objectives by Line of Business

Line of Business	Interest Rate Risk Management Objectives
Basic Claims	Minimize tracking error (hedge ratio) to be less than +/- 1% of the market value of the Basic Claims investment portfolio.
SRE & Extension*	Not part of the ALM strategy - Contains assets backing both surplus and claims. Fixed income assets approximately match the claims liabilities
RSR	No liabilities to match
Employee Future Benefits	Not part of the ALM strategy

*The Extension portfolio includes the retained earnings for the DVA line of business. DVA is not part of the ALM strategy.

III. Basic Claims Interest Rate Risk Management

Basic Claims Portfolio Assets	Maximum Difference	Interest Rate Sensitivity Target	Maximum Dollar Difference	Tracking Error
Marketable Bonds, MUSH Bonds & Real Estate*	+/- 5%	100% Hedge Ratio	+/- $100M	+/- 1% of the MV of Assets

*Real Estate is excluded in the hedge ratio calculation.

The objective of the immunization strategy is for the tracking error (hedge ratio) to be less than 1% of the market value of the Basic Claims investment portfolio. The tracking error (hedge ratio) is the surplus variation in dollars due to market factors relating to the immunization assets (i.e., excludes Real Estate). The Investment Manager will be responsible for the monthly calculation of the tracking error (hedge ratio). This objective is met by controlling two items:

1. **Basic Claims Interest Rate Hedge Ratio**
   The Corporation is to maintain a 100% hedge ratio within +/- 5% between the Basic Claims fixed income assets (including government bonds, corporate bonds, floating rate notes and short-term investments, mortgages, and non-marketable bonds) and Basic Claims liabilities.

   The hedge ratio is calculated by dividing the dollar duration of the fixed income assets by the dollar duration of the liabilities. Aiming for an interest rate hedge ratio of 100% between fixed income assets and liabilities helps minimize the dollar sensitivity of the surplus to interest rate fluctuations.

   The hedge ratio will be calculated and monitored by the investment manager on a daily basis.

2. **Basic Claims Dollar Matching**
   The market value of the Basic Claims total portfolio, including all marketable bonds (government bonds & corporate bonds non-marketable bonds, real estate, and floating rate notes, shall match the present value of the associated liability within +/- $100 million.

   Note: Delay In Receiving Liability Cash Flows
   Liability cash flows are typically delayed by approximately two months after the fiscal year-end due to normal year-end reporting, with cash flows for subsequent month-ends available approximately 2 – 3 weeks after the month-end. Because of this, the investment manager will use the most recent valuation cash flows available at the time.

   Month-end reporting will be based upon the dollar duration for assets as of the reporting date and dollar duration of the liabilities using the valuation cash flows that were available to the investment manager at the beginning of the month.

IV. Basic Claims Credit Spread Risk Management

The Corporation is to maintain a credit spread hedge ratio of 100% ±5% and the hedge ratio is defined as follows:

$$\frac{Duration_{Corporate}\ x\ Market\ Value_{Corporate} + Duration_{Mortgages}\ x\ Market\ Value_{Mortgages}}{Duration_{Liabilities}\ x\ Market\ Value_{Liabilities}\ x\ (Weight_{Corporate} + Weight_{Mortgages})}$$

Where $Weight_{Corporate}$ and $Weight_{Mortgages}$ are the target weights in the liability discount curve, i.e., the target weights in MPI's Investment Policy Statement divided by 90% to adjust for the 10% allocation to Real Estate.

The credit spread hedge ratio includes the commercial mortgages, which are incorporated as corporate credit in the liability discount curve.

The Investment Manager is responsible for reviewing the credit spread hedge ratio periodically and will advise MPI when the benchmark should be adjusted. Frequent changes are not expected as the ratio is relatively stable once the benchmark is defined.

Month-end reporting will be based upon the data for assets as of the reporting date and data of the liabilities using the valuation cash flows that were available to the investment manager at the beginning of the month.

V. Measurement

Modified duration will be used to determine the duration of the fixed income assets and claims liabilities unless effective duration is a more appropriate measure.

The claims liability duration will be updated by the Valuation Department on a monthly basis using the latest claims discount rate curve including the risk adjustment.

VI. Reporting

The interest rate hedge ratio, credit spread hedge ratio and dollar gap between the Basic Claims portfolio and the Basic Claims liabilities, and the Tracking Error (Hedge Ratio) will be reported to the Investment Committee and ICWG every fiscal quarter.

VII. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS. This policy may be changed or modified at any time by action of the Investment Committee.

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

Part 3 – Rebalancing Policy

I. Policy Details

The following requirements shall guide the practice of rebalancing asset classes:

- The Investment Committee Working Group (ICWG) has the responsibility to rebalance the portfolio(s) according to the asset class weights outlined in Section VIII of the Investment Policy Statement (IPS).
- The ICWG will monitor the target asset allocation of the investment portfolio(s), at a minimum, on a fiscal quarterly basis.
- Whenever an asset class is outside of its target range, it will be reported to the Investment Committee (IC) at the next meeting of the Committee within the Investment Activity and Performance Report. If the weight of any asset class falls outside the allowable range, then that asset class will be rebalanced back into the target range for that asset class within six (6) months.
- If the ICWG wishes to maintain an asset class outside of its specified minimum-maximum range for more than six months it must report the reasons for such variance to the IC and seek the Committee's approval. The IC may approve an asset class to remain outside of the rebalancing range for a limited period of time, to be defined by the ICWG at the time of the request, after the initial six (6) month period.
- Alternative asset classes, which includes real estate, private equity, private debt, commercial mortgages and infrastructure, can be highly illiquid and costly to rebalance. Therefore, special consideration will be given to rebalancing alternative asset classes. These asset classes will be rebalanced on a best efforts basis based upon available liquidity in the relevant fund and the liquidity policy of the relevant fund.

II. Compliance Obligation

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

III. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS.

Part 4 – Active Manager Monitoring Policy

I. Policy Objectives and Manager Expectations

This policy is intended to act as an operational guideline for the Investment Committee Working Group (ICWG). As per Section 3.5 (D) of the Investment Committee Terms of Reference, one of the responsibilities of the ICWG is to "monitor the performance of investment managers."

The decision to retain or terminate an investment manager can be a difficult and subjective process. Retaining an unskilled manager that consistently underperforms their benchmark or terminating a skilled manager that underperformed only in the short term can have a detrimental effect on the returns of the fund. The purpose of this policy is to provide a systematic framework for active manager retention, monitoring, and termination.

The process outlined in this policy takes into account both qualitative and quantitative factors to ensure that such decisions are made fairly and as objectively as possible when evaluating managers.

The guidelines in this document apply to all actively managed portfolios (independent of asset class), and are designed to:

i) Foster a long-term approach to manager evaluations that is forward looking.
ii) Provide a systematic quantitative and qualitative framework to assess the factors relevant to future performance.
iii) Improve client/manager communication by informing each manager of the standards by which they will be evaluated and the consequences of failing to meet these standards.
iv) Promote timely and appropriate responses to actual and potential performance issues

Active Manager Expectations

Active managers may have exposure to factors or an investment style that may occasionally fall out of favour for a period of time (Ex. Value vs. Growth for Active Equity Managers). Therefore, active managers, especially those managers that have high conviction (i.e.: a highly concentrated portfolio) in their process, can be expected to underperform from time to time over the short term as their factor exposure and/or style goes out of favour. However, over the long term (4 years), active managers must add value net of fees over their contractual benchmark index in order to justify their higher fees relative to a passive strategy.

Passive Manager Expectations
Passive managers are expected to have minimal tracking error relative to the contractual benchmark, and to match the benchmark's return gross of fees.

II. Monitoring

A written report for all managers will be presented to the ICWG on an annual basis, at a minimum, which will analyze the return and risk of the managers and discuss any major organizational changes within the firm. For additional oversight, a portfolio summary report will be prepared on a quarterly basis and will be sent to the ICWG to provide active manager's investment return updates.

Contributions & withdrawals to the portfolio can impact returns. Because the timing and amount of contributions & withdrawals are under the discretion of MPI, and not the manager, returns will be calculated without the impact of contributions & withdrawals when evaluating manager's performance.

Reporting Dashboard
All investment managers will be classified as follows:

1. Green: No Concerns
2. Yellow: Emerging Concerns
3. Red: Concerns - on the Watchlist

Yellow Criteria:

An active equity manager who:

1. Underperforms the contractual benchmark net of fees over the most recent two-year period by more than 1.0% **or**

2. Ranks in the bottom quarter of the relevant peer group over the most recent two-year period.

The dashboard report will list all managers and classify the managers as red, yellow, or green, indicating why the manager is classified as yellow or red (i.e.: which criteria was met).

Watchlist Status
If an active manager is not meeting performance expectations, or has undergone change(s) that may affect its performance going forward, the manager may be placed on the Watchlist. The purpose of placing a manager on the Watchlist is twofold. First, the action communicates to the manager the ICWG's concern about any issues. Second, the ICWG will begin a process to formally evaluate the continued retention of the investment manager. Placing a manager on the Watchlist is an

intermediate step toward either the expected levels of performance or terminating the manager.

An active manager will be automatically placed on the Watchlist if the manager meets **any one** of the following qualitative factors or **both** of the quantitative factors:

Qualitative

a) A change in ownership, or a change in the CEO, CIO, or relevant portfolio manager;

b) Change to an investment manager's philosophy or process it uses to implement the investment mandate;

c) Material litigation or fraud allegations involving the investment manager;

d) Significant account losses within the strategy in which MPI is invested of more than 25%, or account growth of more than 50% within the most recent 12-month period available.

Quantitative:

a) Active manager that underperforms the contractual benchmark net of fees over the most recent four-year period or since inception (minimum two years), whichever is shorter **and**;

b) Manager fails to generate above-median returns versus a style-specific peer group (where available) over the most recent four-year period, or since inception (minimum two years), whichever is shorter.

The ICWG may place an active manager on the Watchlist at its discretion at any time. Active managers will typically remain on the Watchlist for qualitative reasons for one year to ensure that outstanding issues have been resolved. When the manager is placed on the Watchlist, the Watchlist Timeline outlined below will be used for guidance.

Quarterly Watchlist reports will include tables of relevant performance data, any necessary clarifying remarks, and a recommendation.

New Managers

Normally performance is to be evaluated over 4 years, which is meant to cover a full market cycle. However, for new investment managers who underperform their benchmarks a formal Watchlist report will be prepared 24 months after their inception date and every 6 months thereafter until they are removed from the Watchlist.

Watchlist Timeline

A. Initial Annual Review

1. Calculate the manager's annualized performance (including absolute, relative, risk adjusted and other risk measures) over the most recent four-year period and since inception and compare the manager's performance to their benchmark;

2. If the manager falls short of expectations and is placed on the Watchlist:
   a) the manager will be formally notified, a copy of this policy will be provided to the manager for added transparency, and the Investment Department will seek an explanation from the manager;
   b) A written report with the reasons why the manager was placed on Watchlist status will be provided to the Investment Committee and to the Investment Manager.

B. Quarterly Reviews

3. The ICWG will re-evaluate the manager's performance to determine if it has improved over the most recent 3-month period; these reports will be prepared for the duration that the manager remains on the Watchlist.

4. If the manager's underperformance is ongoing and material, or if there continues to be concern about the organization, the manager will remain on the Watchlist ;

5. The manager will be notified of the result and will be provided with a copy of the report. If the manager remains on the Watchlist for more than 12 months the manager will be requested to present to the ICWG to discuss what action the manager plans to take to address their underperformance;

6. A written report will be provided to the Investment Committee (IC) that recommends either removing the manager from the Watchlist, or keeping the manager on the Watchlist.

7. If the ICWG has:
   a) lost confidence in the manager, and performance has not improved, the ICWG may recommend in a written report to the IC that the manager be terminated;
   b) confidence in the manager, the ICWG will recommend to the IC in a written report to keep the manager on the Watchlist.
      - the manager will be reviewed on a quarterly basis until the issue is resolved. A written report will be provided to the IC at each

subsequent three-month interval that recommends either removing the manager from the Watchlist, or keeping the manager on the Watchlist.

This process can be accelerated if the manager's performance deteriorates materially, if the manager makes significant organizational changes, experiences sizable redemptions or any other developments occur that cause the ICWG to lose confidence in the manager.

III. Termination

The following two broad questions are designed to help guide the decision to retain or terminate an active manager:

1. Does the ICWG accept the manager's rationale for underperformance; and,
2. Does the ICWG have continued confidence in the manager's ability to outperform the benchmark?

This policy provides guidance to the ICWG in reviewing the performance of the active managers. The active manager contracts allow the Department of Finance to terminate any manager, with or without cause, after 30 days' notice, whether or not the manager is on the Watchlist.

IV. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS. This policy may be changed or modified at any time by action of the Investment Committee.

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

Part 5 – Trading Approval Policy

I. Objective

The Trading Approval Policy establishes approval authority for trading activities undertaken within the MPI portfolios (Basic Claims, SRE, EXT, RSR, EFB). The policy aligns with the Investment Policy Statement and provides transparency and accountability for all trading completed within the MPI portfolios.

II. Public and Private Market Assets

Public market asset classes include government bonds, corporate bonds, Canadian equities and global equities.

Private market asset classes include real estate, infrastructure, commercial mortgages, private debt and private equity.

III. Types of Public Market Trading

This policy is set out to define authority regarding the following types of trading:

1. Rebalancing between asset managers;
2. Asset liability management (ALM) trading for controlling the duration of the fixed income assets or the dollar gap between fixed income assets & claim liabilities, or;
3. Reinvestment of equity dividends.
4. Transfers between portfolios (Basic Claims, SRE, EXT, RSR, EFB)
5. Initial funding of new asset classes or investment managers
6. Follow-on investments with existing managers (“re-ups”) and recapitalizations

All external investment counsels for public and private market investments have the discretion to make trades within their contracted mandate.

IV. Public Market Trading Authority

All public market trading must be approved by either 1) the ICWG, or 2) Either MPI’s Vice President & Chief Financial Officer or the Vice President & Chief Actuary plus the Assistant Deputy Minister from the Department of Finance, or their respective designates in their absence.

All trading activity done to maintain compliance with the IPS including meeting the MCT target and supporting the fund ALM objectives requires approval from the Vice President & Chief Actuary and Vice President and Chief Financial Officer. All such trades are to be reported at the following quarterly ICWG meeting.

Reinvestment of equity dividends can be approved by the Manager of Investments, up to $5 million dollars. Reinvestment of more than $5 million requires the approval of the Vice President & Chief Actuary, or the Vice President & Chief Financial Officer or their respective designates in their absence.

Initial funding of new asset classes or investment managers must be first approved by the ICWG and then taken to the Investment Committee for approval.

Follow-on investments with existing managers ("re-ups") and recapitalizations of existing investments of up to $50 million must be approved by MPI's Vice President & Chief Financial Officer and the Vice President & Chief Actuary plus the Assistant Deputy Minister from the Department of Finance, or their respective designates in their absence; Investment Committee approval is not required for follow-on investments or recapitalizations under $50 million. Follow-on investments over $50 million must be approved by the ICWG and Investment Committee.

V. Private Market Trading Authority

All private market trading must be approved by either: 1) the ICWG, or 2) MPI's Vice President & Chief Financial Officer; or the Vice President & Chief Actuary plus the Assistant Deputy Minister from the Department of Finance, or their respective designates in their absence.

VI. Segregation of Duties

Operational trade recommendations are prepared by the MPI Investment Team and reviewed by MPI's Vice President & Chief Financial Officer and Vice President & Chief Actuary. Upon approval, the trade request is submitted to the Department of Finance for execution.

VII. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS. This Policy may be changed or modified at any time by action of the Investment Committee.

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

Appendix 3:
Allocation of investment Income and Other Comprehensive Income

6.3 Policy on Allocation of Investment Income and Other Comprehensive Income (Loss)*

6.3.1 Policy Statement

This policy establishes the treatment for allocating investment income and other comprehensive income (loss).

6.3.2 Policy Details

This policy documents the accounting policy for the allocation of investment income and other comprehensive income (Loss). The allocation of investment income and other comprehensive income (loss) is based on the liabilities and equities that each of the five investment portfolios are backing.

The allocation of investment income for the five investment portfolios and other comprehensive income (loss) for the Employee Future Benefits (EFB) portfolio is as follows:

i) Basic Claims investment income is allocated 100% to the Basic line of business.
ii) Basic Rate Stabilization Reserve investment income is allocated 100% to the Basic line of business.
iii) Extension (which includes DVA) investment income is allocated to the Extension and DVA lines of business based on the proportionate amounts using prior month's equity position.
iv) Special Risk Extension (which includes Discontinued Operations for Personal and Commercial Lines) investment income is allocated to Special Risk Extension and Discontinued Operations (Personal and Commercial Lines) based on the proportionate amounts of the prior year-end's equity position.
v) EFB investment income and other comprehensive income (loss) is allocated to all lines of business based on the Payroll Ratio.

Finance performs the allocation to produce statements for each line of business.

(*) This is an excerpt of the overarching accounting policy manual.

Appendix 4:
Performance Commentary

1. Basic Claims Portfolio

1.1 Performance relative to expected benchmark return in Fiscal Year (FY) 2025/26

For FY 2025/26, the Basic Claims portfolio generated a return of ~~1.6~~1.62% and underperformed its annual expected return benchmark by ~~0.4~~0.33%. The underperformance was primarily driven by fixed income positioning, particularly within government and corporate bonds, in a rising and steepening yield curve environment.

Government bonds (Provincial bonds in Appendix 4) underperformed the benchmark by ~~0.8~~2.25% and were ~~overweight~~underweight by ~~1.2~~0.6% on average over 1-year. The longer duration positioning relative to the benchmark was negatively impacted by the upward shift in yields, particularly at the longer end of the curve. Government bonds underperformed and contributed -0.81% to the relative underperformance of 0.33% at the portfolio level. Corporate bonds underperformed by ~~0.3~~0.11% and were overweight by ~~0.6~~0.5%, contributing -0.30% to the relative underperformance of 0.33% at the portfolio level. Corporate bond returns were negatively impacted by both duration positioning and modestly adverse security selection effects, partially offset by income generation.

Non-marketable bonds outperformed the benchmark by 0.11~~1.1~~% and were underweight by 1.0~~0.5~~%. The asset class benefitted from its shorter duration relative to the benchmark in a rising yield environment. Commercial mortgages outperformed by 2.03~~0.6~~% and were broadly in line with target weights, with returns supported by stable income and a relatively low duration profile. Commercial mortgages positively contributed 0.11% to the relative

underperformance of 0.33% at the portfolio level. Real estate outperformed its benchmark by 3.67% and was broadly in line with target weights and contributed positively 0.36% to the relative underperformance of 0.33% at the portfolio level.~~Real estate underperformed its benchmark by 0.9% and was underweight by 0.3%, with performance negatively impacted by valuation adjustments within certain pooled funds.~~

Overall, the underperformance of the portfolio relative to its benchmark was primarily driven by duration positioning within public fixed income, with alternative fixed income providing partial offset.

1.2 Comparative performance FY 2025/26 vs. FY 2024/2025

Relative to FY 2024/25, the Basic Claims portfolio return declined by 6.4% (from 8.0% to 1.6%). Government bond returns decreased by approximately 7.9~~6.3~~% while corporate bond returns declined by approximately 8.16~~4.0~~%, reflecting the impact of higher yields relative to the prior year.

Non-marketable bonds and commercial mortgages provided stable year-over-year performance ~~with returns broadly consistent with the prior fiscal year~~. Real estate returns increased by approximately 3.9% relative to FY 2024/25~~declined modestly by approximately 1.0% relative to FY 2024/25~~.

The year-over-year decline in overall performance was primarily driven by lower public fixed income returns following the strong recovery observed in the prior year.

2. Rate Stabilization Reserve (RSR) Portfolio

2.1 Performance relative to expected benchmark return FY 2025/26

For FY 2025/26, the RSR portfolio generated a return of 8.9~~9.0~~% and underperformed its benchmark by 0.6~~0.8~~%. The relative underperformance was

driven primarily by equity positioning and private debt, partially offset by strong infrastructure, large Canadian equities and global equity performance.

Provincial bonds outperformed their benchmark by 0.150.4% but were underweight by 2.01.0%. Performance benefitted from shorter duration positioning relative to the benchmark in a rising yield environment. Private debt underperformed the benchmark by 0.5% and was overweight by 1.60.6%. Performance was negatively impacted by spread movements relative to public market benchmarks, partially offset by the yield premium embedded in the asset class.

Canadian large-cap equities outperformed by 9.6% and were broadly in line with target weights; the strong outperformance was entirely driven by stock selection in industrial (+4.0%), financials (+3.3%), and energy (+3.0%) rather than sector positioning (-0.6%). Canadian small cap equities underperformed by 31.3% and were broadly in line with target weights. Underperformance was primarily due to underweight exposure to the materials sector during a period of strong commodity-driven benchmark returns.~~Canadian large cap equities underperformed by 2.5% and were overweight by 1.5%, with performance negatively impacted by sector allocation effects. Canadian small cap equities underperformed by 6.0% and were underweight by 2.0%, primarily due to underweight exposure to the materials sector during a period of strong commodity-driven benchmark returns.~~

Global equities outperformed by 4.0% and were broadly in line with target weights, benefiting from broad market strength and favorable positioning. Low volatility global equities underperformed by 9.6% and were broadly in line with target weights. Relative underperformance is primarily driven by a structural underweight exposure to large-cap technology stocks, including the Magnificent 7.~~Global equities outperformed by 1.8% and were overweight by 0.8%, benefitting from broad market strength and favorable positioning. Low volatility global equities underperformed by~~

~~2.2% and were underweight by 0.5%, primarily driven by structural underweight exposure to large-cap technology stocks.~~

Canadian real estate outperformed by 3.7% and was was broadly in line with target weights %, supported by stronger performance in listed exposures. Infrastructure outperformed its benchmark by 3.9% and was broadly in line with target weights , reflecting strong underlying asset performance and valuation gains.~~Canadian real estate outperformed by 0.7% and was overweight by 0.6%, supported by stronger performance in listed exposures. Infrastructure outperformed its benchmark by 5.0% and was underweight by 0.4%, reflecting strong underlying asset performance and valuation gains.~~

Overall, equity allocation effects and private debt were the primary detractors from relative performance, partially offset by infrastructure and global equity outperformance.

2.2 Comparative performance FY 2025/26 vs. FY 2024/2025

Relative to FY 2024/25, the RSR portfolio return decreased by 0.5~~0.4~~% (from 9.4% to 8.9~~9.0~~%). Canadian large cap equity , Canadian small cap equity, and Global equities returns increased by 37.4%, 25.8%, and 8.6%, respectively, year over year. Low volatility global equities decreased by approximately 16.5% from the prior year. Infrastructure returns declined by approximately 10.2% relative to the prior fiscal year but remained a strong contributor overall. Fixed income returns declined by 5.5% relative to the prior year~~returns declined by approximately 5.0%, while Canadian small cap equity returns decreased by approximately 6.0%, reflecting lower relative performance despite strong benchmark returns.~~

~~Global equity returns remained broadly stable, declining marginally by approximately 0.5%, while low volatility global equities decreased by approximately 1.5% from the prior year. Infrastructure returns declined by approximately 5.7%~~

~~relative to the prior fiscal year but remained a strong contributor overall. Fixed income returns improved modestly relative to the prior year~~. Overall, the slight decline in total return reflects more moderate equity performance compared to the prior year.

3. Employee Future Benefits (EFB) Portfolio

3.1 Performance relative to expected benchmark return FY 2025/26

For FY 2025/26, the EFB portfolio generated a return of 9.99~~10.0~~% and underperformed its benchmark by 0.32~~0.5~~%. Strong absolute returns were driven by equities and infrastructure, while relative performance was impacted by small cap equities and low volatility strategies.

Corporate bonds outperformed by 0.02~~0.4~~% but were underweight by 3.5~~2.5~~%, benefitting from positioning in longer-duration pooled mandates in a declining yield segment of the curve. Private debt outperformed by 0.78~~1.2~~% and was broadly in line with target weights and contributed +0.11% to the relative underperformance of 0.32% at the portfolio level, driven by stable income and favorable spread dynamics~~overweight by 0.5%, driven by stable income and favorable spread dynamics~~.

Canadian large cap equities outperformed by 9.1~~2.0~~% and were broadly in line with target weights, supported by strong security selection across industrials, financials, and energy sectors. Global equities outperformed by 4.1~~1.5~~% and were overweight by 1.5~~1.0~~%, benefitting from broad-based market gains Infrastructure outperformed by 6.5% and contributing +0.69% to the relative underperformance of 0.32% at the portfolio level~~and was overweight by 0.3%, generating strong absolute and relative returns~~.

Canadian small cap equities underperformed by 32.15.5% ~~and were overweight by 0.5%,~~ primarily due to sector allocation effects, particularly underexposure to materials. Low volatility global equities underperformed by 10.02.5% and were overweight by 1.2%, reflecting stock selection and structural underweight exposures to technology, including the Magnificent 7.

Real estate outperformed by 0.460.8% and was broadly in line with target weights. Infrastructure outperformed its benchmark by 2.12% and was broadly in line with target weights, reflecting strong underlying asset performance and valuation gains. Infrastructure contributed +0.36% to the relative underperformance of 0.32% at the portfolio level~~underweight by 0.6%, with performance impacted by valuation adjustments in core funds~~.

Overall, underperformance relative to the benchmark was primarily driven by Canadian small-cap equities and low-volatility global equities.

3.2 Comparative performance FY 2025/26 vs. FY 2024/2025

Relative to FY 2024/25, the EFB portfolio return declined by 2.822.8% (from 12.8112.8% to 9.9910.0%). Canadian large cap equity and Canadian small cap equity returns increased by 35.71% and 25.13%, respectively, relative to the prior year~~decreased by approximately 5.2%, while Canadian small cap equity returns declined by approximately 5.4% relative to the prior year~~.

Global equity returns increased by approximately 8.15%, while low volatility global equities decreased by approximately 17.3%. Infrastructure returns declined by approximately 14.0% relative to the prior year but remained a key contributor to overall performance. Fixed income and private debt returns decreased by 9.42% and 10.63%~~remained broadly flat, declining by approximately 0.2%, while low volatility global equities decreased by approximately 1.0%. Infrastructure returns declined by approximately 6.0% relative to the prior year but remained a key contributor to~~

~~overall performance. Fixed income and private debt returns improved modestly~~ relative to FY 2024/25. The year-over-year change reflects more moderate equity market conditions relative to the prior fiscal year.

Appendix 4:
Performance Commentary

1. Basic Claims Portfolio

1.1 Performance relative to expected benchmark return in Fiscal Year (FY) 2025/26

For FY 2025/26, the Basic Claims portfolio generated a return of 1.62% and underperformed its annual expected return benchmark by 0.33%. The underperformance was primarily driven by fixed income positioning, particularly within government and corporate bonds, in a rising and steepening yield curve environment.

Government bonds (Provincial bonds in Appendix 4) underperformed the benchmark by 2.25% and were underweight by 0.6% on average over 1-year. The longer duration positioning relative to the benchmark was negatively impacted by the upward shift in yields, particularly at the longer end of the curve. Government bonds underperformed and contributed -0.81% to the relative underperformance of 0.33% at the portfolio level. Corporate bonds underperformed by 0.11% and were overweight by 0.5%, contributing -0.30% to the relative underperformance of 0.33% at the portfolio level. Corporate bond returns were negatively impacted by both duration positioning and modestly adverse security selection effects, partially offset by income generation.

Non-marketable bonds outperformed the benchmark by 0.11% and were underweight by 1.0%. The asset class benefitted from its shorter duration relative to the benchmark in a rising yield environment. Commercial mortgages outperformed by 2.03% and were broadly in line with target weights, with returns supported by stable income and a relatively low duration profile. Commercial mortgages positively contributed 0.11% to the relative underperformance of 0.33% at the

portfolio level. Real estate outperformed its benchmark by 3.67% and was broadly in line with target weights and contributed positively 0.36% to the relative underperformance of 0.33% at the portfolio level.

Overall, the underperformance of the portfolio relative to its benchmark was primarily driven by duration positioning within public fixed income, with alternative fixed income providing partial offset.

1.2 Comparative performance FY 2025/26 vs. FY 2024/2025

Relative to FY 2024/25, the Basic Claims portfolio return declined by 6.4% (from 8.0% to 1.6%). Government bond returns decreased by approximately 7.9% while corporate bond returns declined by approximately 8.16%, reflecting the impact of higher yields relative to the prior year.

Non-marketable bonds and commercial mortgages provided stable year-over-year performance. Real estate returns increased by approximately 3.9% relative to FY 2024/25.

The year-over-year decline in overall performance was primarily driven by lower public fixed income returns following the strong recovery observed in the prior year.

2. Rate Stabilization Reserve (RSR) Portfolio

2.1 Performance relative to expected benchmark return FY 2025/26

For FY 2025/26, the RSR portfolio generated a return of 8.9% and underperformed its benchmark by 0.6%. The relative underperformance was driven primarily by equity positioning and private debt, partially offset by strong infrastructure, large Canadian equities and global equity performance.

Provincial bonds outperformed their benchmark by 0.15% but were underweight by 2.0%. Performance benefitted from shorter duration positioning relative to the benchmark in a rising yield environment. Private debt underperformed the benchmark by 0.5% and was overweight by 1.6%. Performance was negatively impacted by spread movements relative to public market benchmarks, partially offset by the yield premium embedded in the asset class.

Canadian large-cap equities outperformed by 9.6% and were broadly in line with target weights; the strong outperformance was entirely driven by stock selection in industrial (+4.0%), financials (+3.3%), and energy (+3.0%) rather than sector positioning (-0.6%). Canadian small cap equities underperformed by 31.3% and were broadly in line with target weights. Underperformance was primarily due to underweight exposure to the materials sector during a period of strong commodity-driven benchmark returns.Global equities outperformed by 4.0% and were broadly in line with target weights, benefiting from broad market strength and favorable positioning. Low volatility global equities underperformed by 9.6% and were broadly in line with target weights. Relative underperformance is primarily driven by a structural underweight exposure to large-cap technology stocks, including the Magnificent 7.Canadian real estate outperformed by 3.7% and was was broadly in line with target weights %, supported by stronger performance in listed exposures. Infrastructure outperformed its benchmark by 3.9% and was broadly in line with target weights , reflecting strong underlying asset performance and valuation gains.Overall, equity allocation effects and private debt were the primary detractors from relative performance, partially offset by infrastructure and global equity outperformance.

2.2 Comparative performance FY 2025/26 vs. FY 2024/2025

Relative to FY 2024/25, the RSR portfolio return decreased by 0.5% (from 9.4% to 8.9%). Canadian large cap equity , Canadian small cap equity, and Global equities

returns increased by 37.4%, 25.8%, and 8.6%, respectively, year over year. Low volatility global equities decreased by approximately 16.5% from the prior year. Infrastructure returns declined by approximately 10.2% relative to the prior fiscal year but remained a strong contributor overall. Fixed income returns declined by 5.5% relative to the prior year. Overall, the slight decline in total return reflects more moderate equity performance compared to the prior year.

3. Employee Future Benefits (EFB) Portfolio

3.1 Performance relative to expected benchmark return FY 2025/26

For FY 2025/26, the EFB portfolio generated a return of 9.99% and underperformed its benchmark by 0.32%. Strong absolute returns were driven by equities and infrastructure, while relative performance was impacted by small cap equities and low volatility strategies.

Corporate bonds outperformed by 0.02% but were underweight by 3.5%, benefitting from positioning in longer-duration pooled mandates in a declining yield segment of the curve. Private debt outperformed by 0.78% and was broadly in line with target weights and contributed +0.11% to the relative underperformance of 0.32% at the portfolio level, driven by stable income and favorable spread dynamics.

Canadian large cap equities outperformed by 9.1% and were broadly in line with target weights, supported by strong security selection across industrials, financials, and energy sectors. Global equities outperformed by 4.1% and were overweight by 1.5%, benefitting from broad-based market gains Infrastructure outperformed by 6.5% and contributing +0.69% to the relative underperformance of 0.32% at the portfolio level.

Canadian small cap equities underperformed by 32.1% primarily due to sector allocation effects, particularly underexposure to materials. Low volatility global

equities underperformed by 10.0% and were overweight by 1.2%, reflecting stock selection and structural underweight exposures to technology, including the Magnificent 7.

Real estate outperformed by 0.46% and was broadly in line with target weights. Infrastructure outperformed its benchmark by 2.12% and was broadly in line with target weights, reflecting strong underlying asset performance and valuation gains. Infrastructure contributed +0.36% to the relative underperformance of 0.32% at the portfolio level.

Overall, underperformance relative to the benchmark was primarily driven by Canadian small-cap equities and low-volatility global equities.

3.2 Comparative performance FY 2025/26 vs. FY 2024/2025

Relative to FY 2024/25, the EFB portfolio return declined by 2.82% (from 12.81% to 9.99%). Canadian large cap equity and Canadian small cap equity returns increased by 35.71% and 25.13%, respectively, relative to the prior year.

Global equity returns increased by approximately 8.15%, while low volatility global equities decreased by approximately 17.3%. Infrastructure returns declined by approximately 14.0% relative to the prior year but remained a key contributor to overall performance. Fixed income and private debt returns decreased by 9.42% and 10.63% relative to FY 2024/25. The year-over-year change reflects more moderate equity market conditions relative to the prior fiscal year.

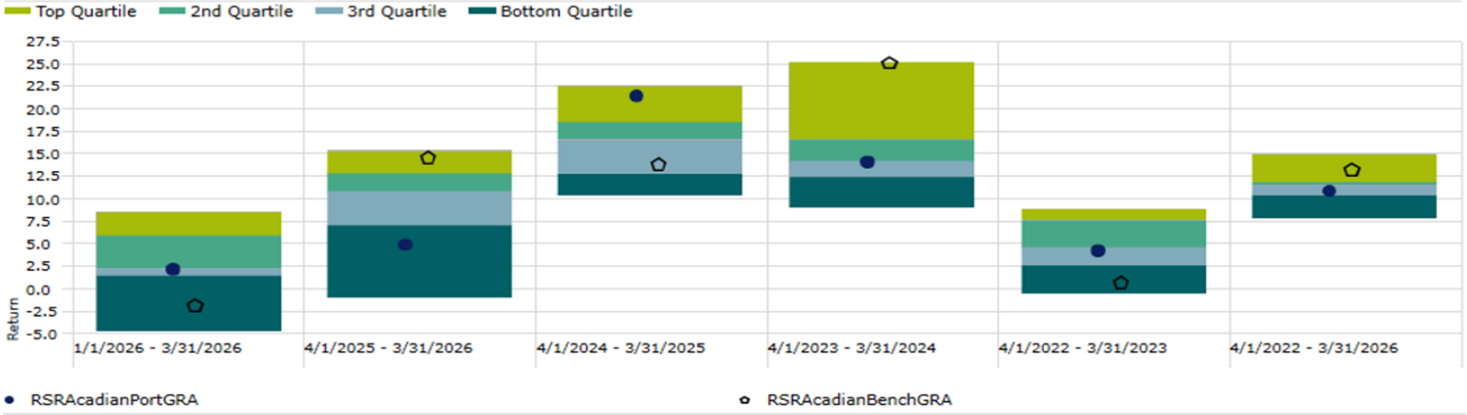
The Basic Claims portfolio underperformed the benchmark over 1-year but outperformed over 4-years as of March 31, 2026



Basic Claims portfolio underperformed the benchmark by 0.37% over a 1-year period. The main driver of this underperformance was the government bonds asset class, which underperformed its benchmark by 2.26% and detracted 0.79% from the total portfolio's relative return of -0.37%. The real estate funds asset class was able to offset some of the underperformance, as it outperformed its benchmark by 3.67% and contributed 0.36% to the total portfolio's relative return.

The Basic Claims portfolio outperformed the benchmark by 0.06% over a 4-year period (annualized fund return of 2.33% versus the benchmark of 2.28%). The key reason for the outperformance was the performance of MUSH bonds. MUSH bonds outperformed the benchmark by 2.35% in absolute terms (4.08% vs. 1.73%), whereas government bonds detracted, underperforming the benchmark by 2.09% in absolute terms (0.72% vs. 2.81%). Corporate bonds outperformed the benchmark by 0.18% in absolute terms.

Basic Claims portfolio returns were ranked in the second quartile for 1 year whereas in first quartile over 4 years.

The Acadian Fund underperformed the benchmark over 1 and 4 years as of March 31, 2026

Over 1 year (April 1, 2025 – March 31, 2026), the Acadian Fund underperformed the index by 9.62%. Stock selection drove the underperformance, which was compounded by adverse sector allocation effects. The primary driver of negative active returns was stock selection within the financials, communication services, and industrials sectors. This was compounded by the adverse allocation effect resulting from an overweight position in consumer staples. The fund was underweight the Magnificent 7 securities by 12.9%, detracting 1.81% from the active return. Low-risk equities were disproportionately penalized in the broad market rally, as an AI-driven technology rally produced outsized returns for higher-risk technology stocks in which low-risk strategies were typically underweight.

Over 4 years (April 1, 2022 – March 31, 2026), the Acadian Fund underperformed the index. Both stock selection and sector allocation effects detracted from performance. The primary driver of negative active returns was stock selection within the information technology, communication services, and financials sectors. This was compounded by the adverse allocation effect resulting from an overweight position in consumer staples. The portfolio was underweight in Magnificent 7 stocks by 11.1% compared to the index, detracting 6.93% from the

Acadian ranked in the bottom quartile relative to its peer universe over the 1-year period (88th percentile), with a return of 4.96% against the peer median of 10.90%. Over the 4-year period the fund ranked in the third quartile (66th percentile), with an annualized return of 11.00% against the peer median of 11.61%. In the most recent quarter (January 1 – March 31, 2026), Acadian returned 2.21%, ranking in the second quartile (47th percentile) and slightly ahead of both the peer median (2.14%) and its benchmark (−1.82%). The fund's peer ranking

The Acadian fund is a rule-based investment strategy that invests in low-volatility stocks, and the underlying holdings of the fund must be within +/- 2.5% of benchmark constituents' weights. In contrast, some peer group members have a wider latitude of +/-5.0%, which explains why Acadian funds' returns diverge from those of the benchmark and the peer group. In addition, the Acadian fund holds only a subset of the Magnificent 7 stocks, whereas the benchmark has exposure to all of them.

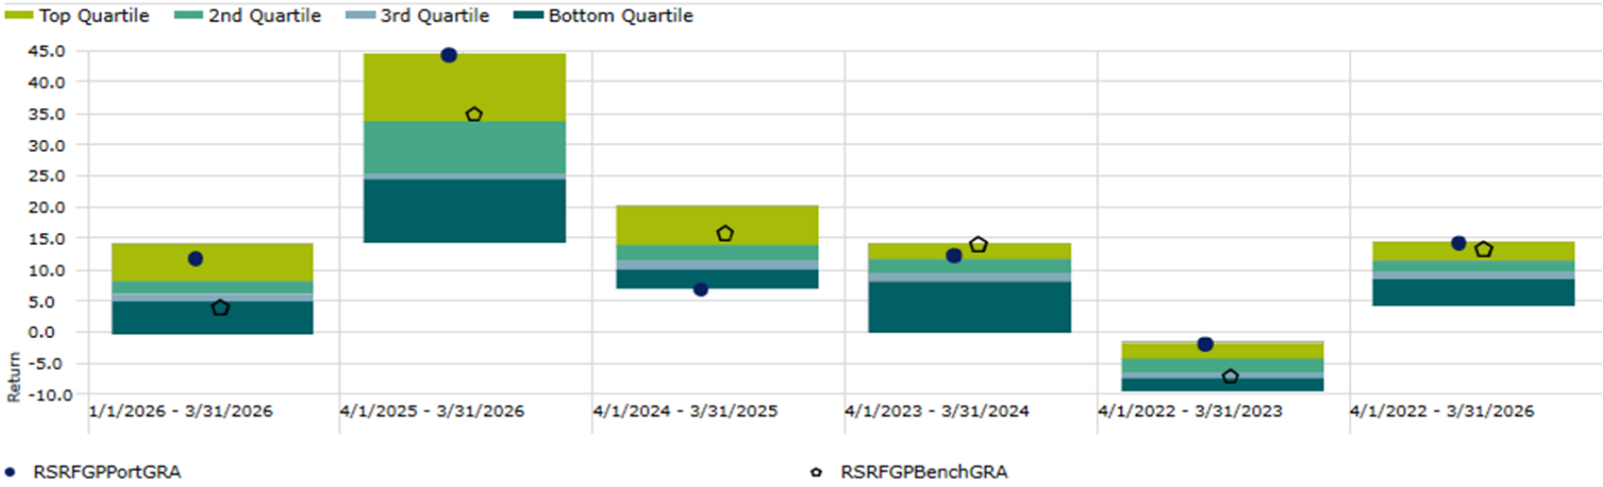
QV Investors (QV) underperformed over 1 year and 4 years as of March 31, 2026



Over 1 year as of March 31, 2026, QV underperformed by 31.30%, driven by negative sector allocation as security selection was also negative (−6.7%). The materials, consumer discretionary, and financials sectors were the main drivers of negative sector allocation (a combined −22.1%), with the fund's significant underweight to materials the single largest detractor as it missed a benchmark sector return fuelled by the gold and silver rally.

For 4-years as of March 31, 2026, QV underperformed the index, with an annualized return of 14.17% versus 16.54% for the index. The fund had been ahead of its benchmark over the earlier years of the period, so the four-year underperformance is attributable almost entirely to the most recent 12 months, over which QV underperformed by 31.30% (a return of 35.53% versus 66.83% for the benchmark). Negative sector allocation was the principal driver, led by the fund's significant underweight to the materials sector (by approximately 25.6%), which detracted 18.3% as it missed a 116.7% benchmark return fuelled by the gold and silver rally. Consumer discretionary, energy, and financials were the next-largest detractors, while negative security selection (−6.7%) added to the shortfall; real estate and health care were the main positive contributors.

QV ranked in the second quartile for both 1-year and 4-year returns as of March 31, 2025. A key reason for the divergence of returns from the benchmark is that QV is relatively overweight in the Financials, Consumer Discretionary, and Industrials sectors while being underweight in the Energy, Materials, and Real Estate sectors. AdditiQV ranked in the third quartile for the 1-year period and in the second quartile for the 4-year period as of March 31, 2026. A key reason for the divergence of returns from the benchmark is that QV is relatively overweight in the Financials, Consumer Discretionary, and Industrials sectors while being underweight in the Energy, Materials, and Real Estate sectors. Additionally, QV is a concentrated portfolio comprising 35-40 stocks, whereas the benchmark consists of around 240 stocks. QV returns differ widely from the peer universe as the peer universe is very small (5 funds only).onally, QV is a concentrated portfolio comprising 35-40 stocks, whereas the benchmark consists of around 240 stocks. QV returns differ widely from the peer universe as the peer universe is very small (5 funds only).

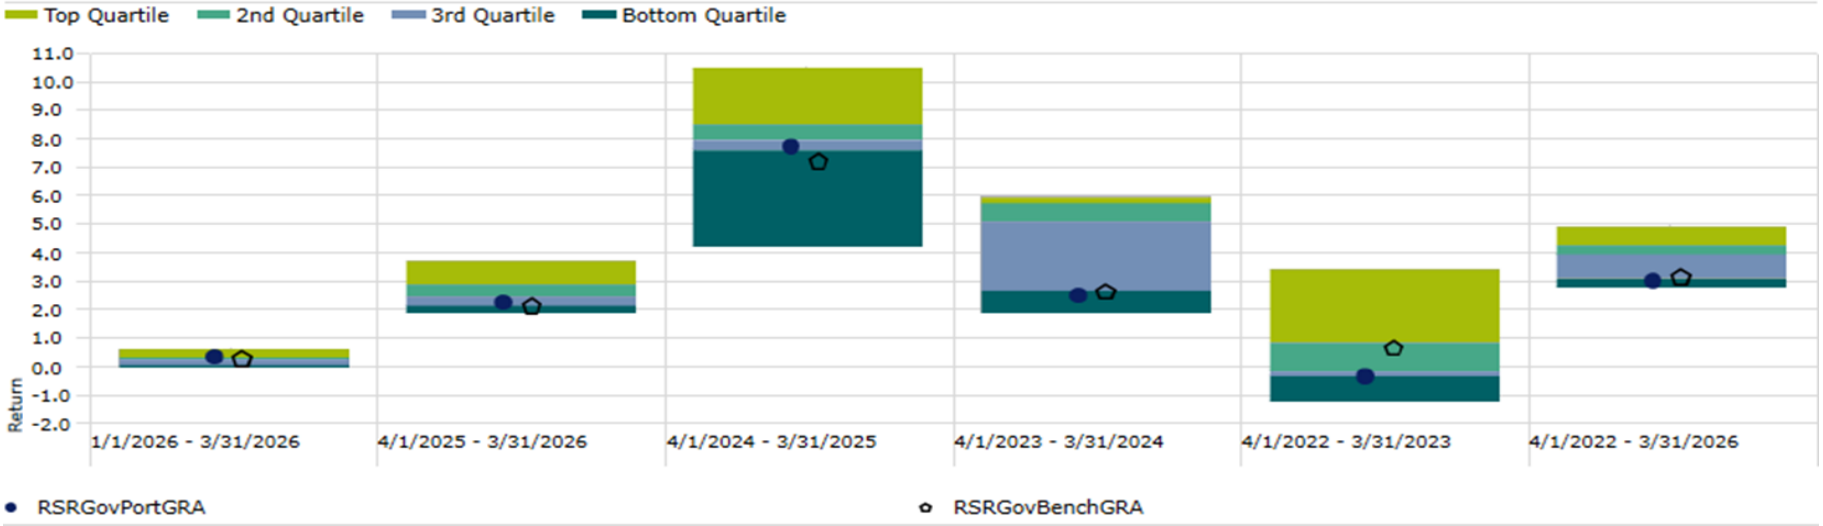
Foyston Gordon and Payne (FGP) fund outperformed the benchmark over both 1 year and 4 years as of March 31, 2026



Over 1-year as of March 31, 2026, FGP outperformance was mainly driven by positive security selection (+9.71%), with sector allocation slightly negative (−0.62%). Security selection was particularly positive in the Industrials, Financials, and Energy sectors, while the Materials sector was the main detractor to selection. Sector allocation was slightly negative overall, with the Materials and Communication Services sectors the main detractors. Finning International, Cenovus Energy, and Saputo were the top contributors to performance.

Over 4-years as of March 31, 2026, FGP outperformance was driven by positive security selection (+1.84%), partially offset by negative sector allocation (−0.52%). Security selection was robust in the Energy, Financials, and Communication Services sectors, while the Materials and Information Technology sectors were the main detractors to selection. Negative sector allocation was driven mainly by an overweight to Communication Services. Finning International, Imperial Oil, and Fairfax Financial Holdings were the top contributors to performance over the period

FGP ranked in the first quartile for both the 2-year and 4-year periods relative to its peer group as of March 31, 2026. A key reason for the divergence of returns from the benchmark is that FGP is overweight in Financials and Energy while being underweight in the Utilities and Information Technology sectors. Additionally, FGP is a concentrated portfolio comprising 30-35 large-cap stocks, whereas the benchmark consists of approximately 217 stocks.

The RSR portfolio underperformed the benchmark over both the 1-year and 4-year periods as of March 31, 2026

The RSR portfolio underperformed the benchmark by 0.60% over a 1-year period (a return of 8.94% versus the benchmark of 9.54%). The main driver of the underperformance was the equity sleeves: Canadian equities and global equities underperformed their benchmarks by 10.22% and 2.92% respectively, reflecting the weak relative results of QV in small cap and Acadian in global low-volatility. This was partially offset by positive relative returns elsewhere in the portfolio, including infrastructure, which outperformed its benchmark, and provincial bonds, which outperformed by 0.15% on a shortening of duration relative to the benchmark in a steepening yield curve environment.

The RSR portfolio underperformed the benchmark by 0.44% over a 4-year period (an annualized return of 5.95% versus the benchmark of 6.38%). Global equities were the largest detractor, underperforming the benchmark by 2.38% on an annualized basis, with Canadian equities also modestly behind (−0.34%).

RSR portfolio level returns were ranked in the second quartile for both 1 year and 4 years.

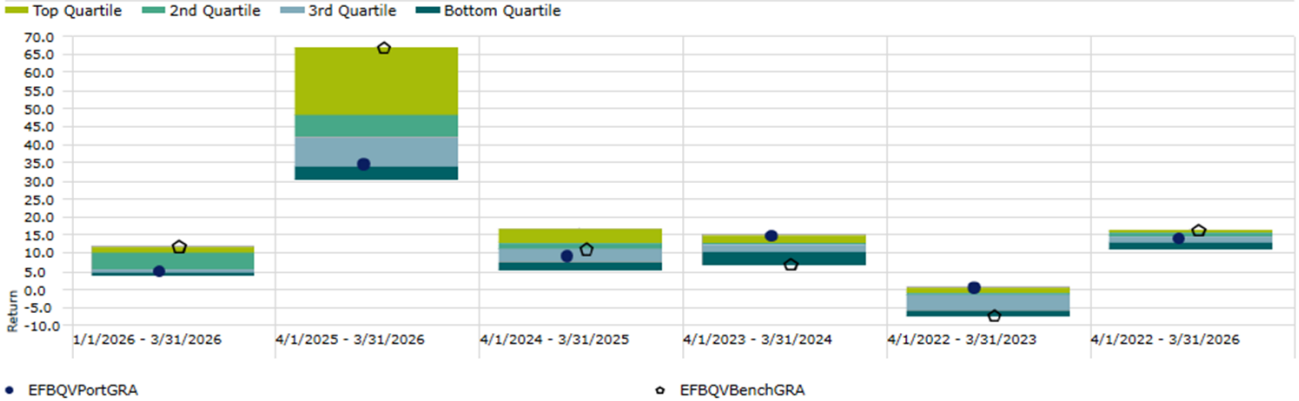
The Acadian Fund underperformed the benchmark over 1 and 4 years as of March 31, 2026

Over 1 year (April 1, 2025 – March 31, 2026), the Acadian Fund underperformed the index by 9.62%. Stock selection drove the underperformance, which was



Over 4 years (April 1, 2022 – March 31, 2026), the Acadian Fund underperformed the index. Both stock selection and sector allocation effects detracted from performance. The primary driver of negative active returns was stock selection within the information technology, communication services, and financials sectors. This was compounded by the adverse allocation effect resulting from an overweight position in consumer staples. The portfolio was underweight in Magnificent 7 stocks by 11.1% compared to the index, detracting 6.93% from the active return.

Acadian ranked in the bottom quartile relative to its peer universe over the 1-year period (88th percentile), with a return of 4.96% against the peer median of 10.90%. Over the 4-year period the fund ranked in the third quartile (66th percentile), with an annualized return of 11.00% against the peer median of 11.61%. In the most recent quarter (January 1 – March 31, 2026), Acadian returned 2.21%, ranking in the second quartile (47th percentile) and slightly ahead of both the peer median (2.14%) and its benchmark (−1.82%). The fund's peer ranking has varied across the individual annual periods, ranging from the top quartile in the year ended March 2025 (13th percentile) to the third quartile in the years ended March 2024 (54th percentile) and March 2023 (60th percentile).

The Acadian fund is a rule-based investment strategy that invests in low-volatility stocks, and the underlying holdings of the fund must be within +/- 2.5% of benchmark constituents' weights. In contrast, some peer group members have a wider latitude of +/-5.0%, which explains why Acadian funds' returns diverge from those of the benchmark and the peer group. In addition, the Acadian fund holds only a subset of the Magnificent 7 stocks, whereas the benchmark has exposure to all of them.

QV Investors (QV) underperformed over 1 year and 4 years as of March 31, 2026

Over 1 year as of March 31, 2026, QV underperformed by 31.30%, driven by negative sector allocation as security selection was also negative (−6.7%). The materials, consumer discretionary, and financials sectors were the main drivers of negative sector allocation (a combined −22.1%), with the fund's significant underweight to materials the single largest detractor as it missed a benchmark sector return fuelled by the gold and silver rally.

For 4-years as of March 31, 2026, QV underperformed the index, with an annualized return of 14.17% versus 16.54% for the index. The fund had been ahead of its benchmark over the earlier years of the period, so the four-year underperformance is attributable almost entirely to the most recent 12 months, over which QV underperformed by 31.30% (a return of 35.53% versus 66.83% for the benchmark). Negative sector allocation was the principal driver, led by the fund's significant underweight to the materials sector (by approximately 25.6%), which detracted 18.3% as it missed a 116.7% benchmark return fuelled by the gold and silver rally. Consumer discretionary, energy, and financials were the next-largest detractors, while negative security selection (−6.7%) added to the shortfall; real estate and health care were the main positive contributors.

QV ranked in the second quartile for both 1-year and 4-year returns as of March 31, 2025. A key reason for the divergence of returns from the benchmark is that QV is relatively overweight in the Financials, Consumer Discretionary, and Industrials sectors while being underweight in the Energy, Materials, and Real Estate sectors. AdditiQV ranked in the third quartile for the 1-year period and in the second quartile for the 4-year period as of March 31, 2026. EFB portfolio underperformed the benchmark over the 1-year period but outperformed over the 4-year period as of March 31, 2026

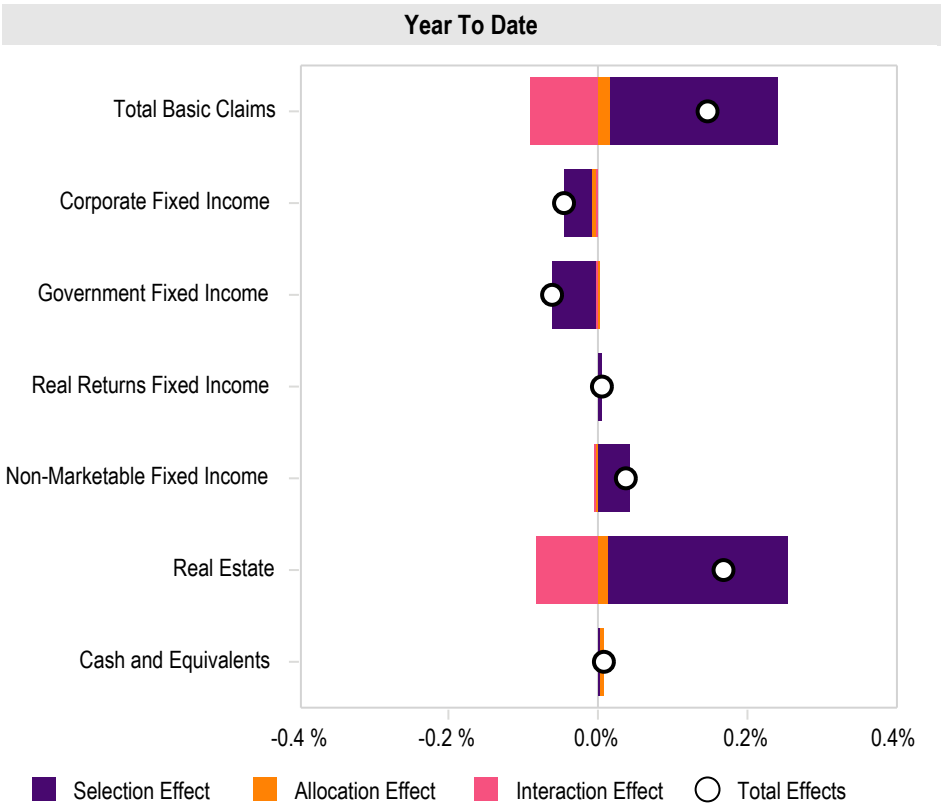
EFB portfolio underperformed the benchmark by 0.32% over a 1-year period (a return of 9.99% versus the benchmark of 10.31%). The main drag was the equity sleeves: Canadian equities and global equities underperformed their benchmarks by 11.07% and 3.26% respectively, reflecting the weak relative results of QV and Acadian. This was largely offset by positive relative returns from the credit and alternative asset classes, including private debt (the long-duration fund), which outperformed by 0.78%, corporate bonds, which outperformed by 0.03%, and infrastructure and real estate, which both outperformed their benchmarks.



EFB portfolio outperformed the benchmark by 0.64% over a 4-year period (an annualized return of 7.27% versus the benchmark of 6.63%). The outperformance was driven by the credit and alternative asset classes — corporate bonds outperformed by 0.36% on an annualized basis — which more than offset modest underperformance from the equity sleeves (global equities −1.89% and Canadian equities −0.10% annualized).

Executive Summary

Improving portfolio efficiency without materially increasing risk

The review identified opportunities to improve liability matching, portfolio efficiency and long-term flexibility while maintaining MPI's conservative risk profile.

CONFIRM

Strategic objectives remain appropriate

- Basic portfolio remains aligned with liability matching, capital strength and rate stability.
- Current RSA positioning remains appropriate given existing liquidity constraints.

REFINE

Improve portfolio efficiency

- Reduce excess MUSH exposure and eliminate RRBs.
- Increase use of provincial and corporate bonds to improve liability matching and portfolio yield.

IMPLEMENT OVER TIME

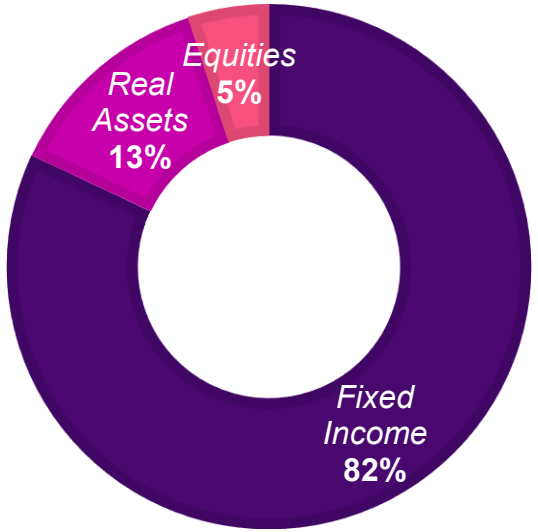
Phased implementation approach

- Redeploy shorter-dated MUSH holdings to SRE and RSR.
- Future RSA changes to occur gradually as liquidity becomes available.

The review supports targeted refinements that improve liability matching, portfolio efficiency and long-term flexibility while maintaining MPI's conservative risk profile.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Overview and Strategy Review Framework

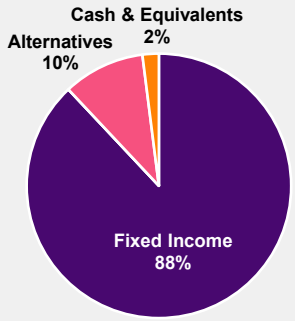


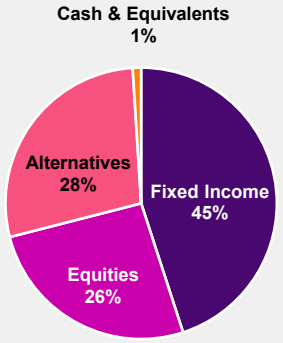
How the review assessed liability hedging, inflation considerations and broader portfolio efficiency

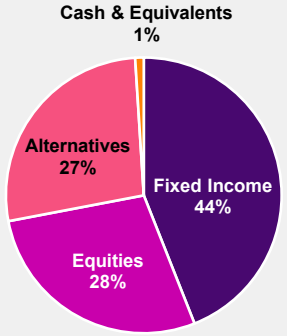
© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

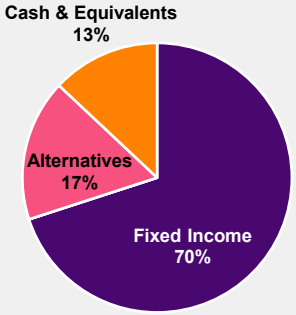
Starting point: A conservatively positioned portfolio

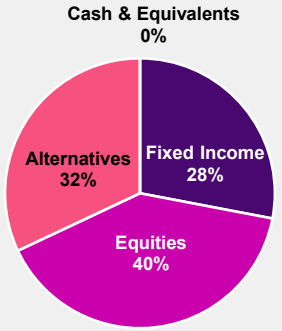
Current investment policy targets











March 31st, 2026	Basic ($2.2B)	RSR ($0.5B)	Total ($2.7B)
Government Bonds	35%	-	29%
Corporate Bonds	28%	-	23%
MUSH Bonds	18%	-	15%
RRB	4%	-	3%
Liability Hedging Assets	85%	-	70%
Short Term Provincial	-	22%	4%
Commercial Mortgages	5%	-	4%
Private Debt	-	23%	4%
Total Fixed Income	90%	45%	82%
Real Assets	10%	27%	13%
Equities	-	28%	5%
Total	100%	100%	100%

The combined Basic and RSR portfolios are conservatively positioned, with approximately 80% of assets allocated to fixed income. Given the dominant role of liability-hedging assets within the overall structure, improving the efficiency of the Basic portfolio represents the most significant opportunity identified through the review.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

MPI's portfolios have distinct objectives and constraints

Basic	RSR	EXT	SRE	EFB
$2,171.1 million	$488.1 million	$144.7 million	$290.7 million	$696.4 million
				
Backing compulsory auto-insurance liabilities (long-term PIPP + short-term physical damage)	Surplus assets supporting Basic rate stability and adverse event protection	Backing liabilities & surplus for optional coverages; mostly short-duration claims	Backing trucking-industry insurance; short-term physical damage + some long-tail TPL	Backing long-term pension, post-retirement & severance obligations
Support 100% MCT and minimal surplus volatility	Real return to maintain long-term rate stability	Support 200% MCT & stable premiums	Support 300% MCT & stable premiums	Meet long-term benefit obligations
Match duration to reduce interest-rate & credit-spread risk; maintain liquidity for claims	Preserve capital; provide buffer for adverse Basic results; no duration matching needed	Generate moderate return while maintaining capital adequacy	Maintain capital strength & manage moderate FX/legal risks	Align assets to long-duration liabilities; manage actuarial & interest-rate risk

The review focuses primarily on Basic and RSR, which represent the majority of MPI's assets and are most directly affected by the liability-hedging and return-seeking asset decisions considered.

Modeling constraints

Identifying maximum RSA content with capital requirement considerations

September 30th, 2025	Current	10% EQ (A)	10% EQ (B)	14% EQ (A)	14% EQ (B)	20% EQ (A)
Equities	6%	10%	10%	14%	14%	20%
Real Assets	13%	13%	9%	13%	5%	13%
Fixed Income	81%	77%	81%	73%	81%	67%
Resulting MCT Ratio on Sept 30, 2025	99.7%	93.1%	98.8%	87.4%	97.9%	82.0%

- Portfolios 10% EQ (A), 14% EQ (A), and 20% EQ (A) materially reduce the MCT ratio, as the increased equity allocation is funded from fixed income assets, which are subject to substantially lower capital requirements than equities.
- Portfolios 10% EQ (B) and 14% EQ (B) preserve the MCT ratio more effectively, as the increased equity allocation is funded from Real Assets with similar capital requirements to equities.
  - Portfolio 14% EQ (B) has implementation constraints due to the limited liquidity of the underlying real estate and infrastructure investments.
- Based on MCT and liquidity constraints, 10% was determined to be the upper limit for the equity allocation.

Review framework

A two-step review focused on liability matching, portfolio efficiency and long-term portfolio outcomes

01.

Basic Portfolio Liability Hedging Assets (LHA)

- The Basic portfolio drives the valuation of MPI's liabilities and remains the largest component of the overall investment structure.
- The review therefore began by assessing whether the existing liability-hedging portfolio remains the most efficient way to support MPI's liabilities and capital objectives.
- This analysis established the foundation for subsequent RSA recommendations.

02.

RSA and RSR Portfolio Allocation

- Following the liability-hedging review, we evaluated opportunities to improve expected portfolio outcomes through changes to RSA allocations.
- The analysis considered risk, return, liquidity, earnings volatility and capital implications at the total portfolio level.
- Particular attention was given to implementation constraints associated with existing real asset holdings.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Basic Portfolio Liability Hedging Assets

Assessing the liability-hedging structure and opportunities to improve portfolio efficiency

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Current structure creates a persistent return gap

March 31st, 2026	Basic Portfolio (LHA)
LHA Allocation	85%
Portfolio Yield	4.23%
Liability Discount Rate	4.54%*
Difference	-0.31%

-0.31% The yield of the LHA allocation falls short of the liability discount rate by 0.31%.

- Liability-hedging assets represent approximately 85% of the Basic portfolio and therefore have the greatest influence on long-term portfolio outcomes.
- The current liability-hedging portfolio yield is below the liability discount rate.
- Improving liability-hedging efficiency may provide a more immediate opportunity than increasing overall portfolio risk.

**The Liability Discount Rate represents the single discount rate to generate the Basic Liability after excluding commercial mortgages from the yield curve. It is different than the 4.15% Average Discount Rate disclosed by MPI appointed actuary which represent the discount rate on a duration of 9 years.*
***2-year annualized return due to limited history*

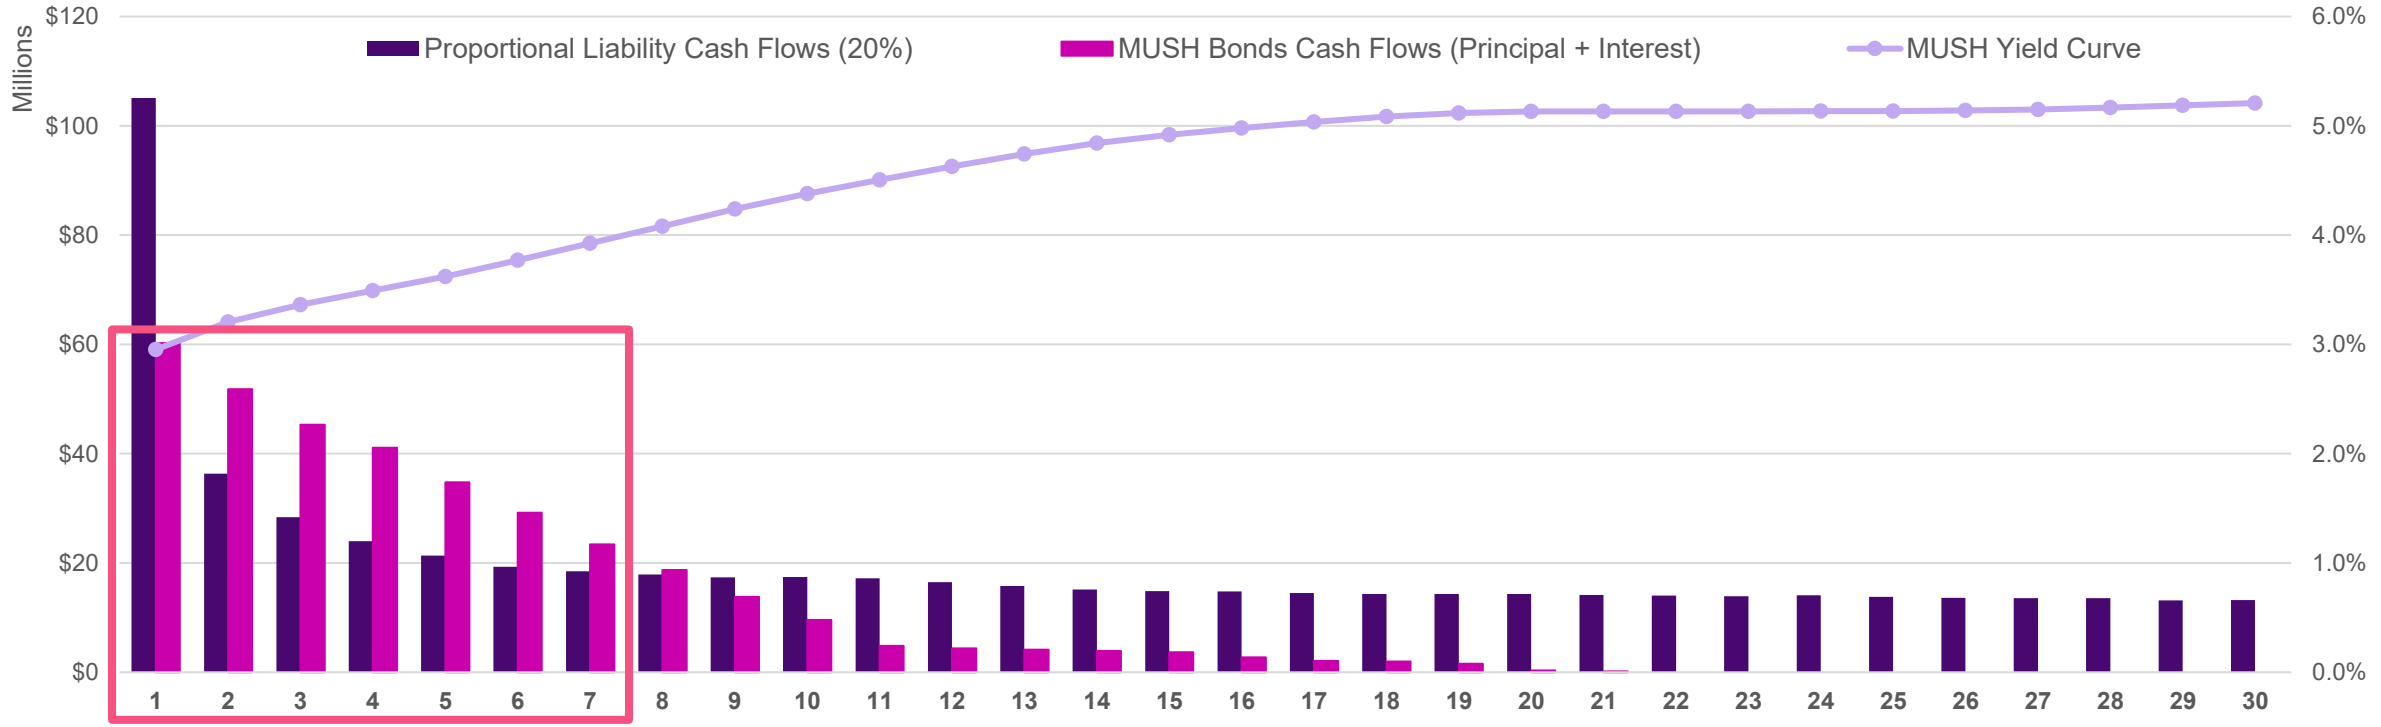
Understanding the liability-hedging portfolio

Current fixed income allocation

The Basic portfolio's liability-hedging assets are concentrated in government bonds, corporate bonds and MUSH bonds, which together represent approximately 80% of the portfolio. The allocation among these assets therefore has a significant influence on liability matching, portfolio yield and overall hedging effectiveness.

March 31st, 2026	Basic	Allocation	Yield/DR	Duration
Cash / Short Term	$51.3M	2.4%	0.00%	0.0
Government Bonds	$741.9M	34.2%	4.32%	11.9
Corporate Bonds	$607.3M	28.0%	4.58%	10.7
MUSH Bonds	$358.4M	16.5%	4.27%	4.3
RRB	$83.5M	3.8%	3.40%	10.7
Liability Hedging Assets (LHA)	**$1,842.4M**	**85%**	**4.23%**	**9.7**
Commercial Mortgages	$114.1M	5.3%	5.02%	2.3
Fixed Income	**$1,956.5M**	**90%**	**4.27%**	**9.2**



- Corporate bonds provide the highest yield within the liability-hedging portfolio while remaining broadly aligned with MPI's liabilities.
- MUSH bonds represent a meaningful allocation and have a significant influence on portfolio yield and liability-matching outcomes.
- Understanding the role of MUSH bonds is critical in assessing whether the current structure remains the most efficient approach.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Basic portfolio: Assessing the liability-hedging structure

MUSH cash flows are concentrated in earlier years than MPI liabilities

The analysis suggests that only a portion of the current MUSH allocation is required to support liability-hedging objectives, creating an opportunity to redeploy excess exposure without increasing overall portfolio risk.

- Liability cash flows extend over several decades, while much of the current MUSH cash flow is concentrated in the first 6-7 years.
- Approximately $255 million of the current MUSH allocation has characteristics that are not closely aligned with the liability profile.
- Retaining longer-dated MUSH bonds while redeploying shorter-dated holdings may improve liability-hedging efficiency and portfolio flexibility.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Observations on inflation risk

Different inflation exposures require different responses

Inflation is an important consideration, but maximizing explicit inflation hedging would not produce the strongest overall portfolio outcome. The appropriate strategy should balance inflation sensitivity with liability matching, portfolio yield, capital and liquidity.

Claims cost inflation

- Affects repair costs, earnings and the balance sheet.
- Principally addressed through pricing, subject to PUB approval.

PIPP benefit indexation

- Creates a long-term CPI-linked liability exposure.
- Relevant to the design of the Basic portfolio's liability hedge.

- MPI faces distinct pricing and liability-indexation exposures.
- PIPP indexation is the primary long-term inflation exposure relevant to investment strategy.
- The strategy review explicitly tested higher RRB allocations as a potential inflation hedge.
- Those alternatives were assessed against their broader effects on liability value, portfolio yield, capital and liability matching.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Inflation considerations assessed during review

Real Return Bonds (RRB)	• Evaluated as an explicit inflation-hedging tool. • Higher allocations generally increased liability values and reduced portfolio yield. • Not part of the preferred liability-hedging structure.
Treasury Inflation Protection Security (US-TIPS)	• Evaluated as a potential inflation hedge. • References U.S. inflation rather than MPI's Canadian liability exposure. • Currency hedging reduces expected benefits; remaining unhedged introduces unrelated currency risk. • The interest-rate profile is not closely aligned with MPI's liabilities.
Short term credit (RSA)	• Commercial mortgages and private debt provide attractive yields. • Shorter-duration assets allow portfolio yields to adjust more quickly as interest rates change.
Real Asset (RSA)	• Real assets continue to provide diversification and inflation sensitivity. • Future portfolio evolution may emphasize income-generating real assets as opportunities arise.

Neither RRBs nor TIPS provided a sufficiently attractive combination of inflation sensitivity, liability matching, portfolio yield and implementation practicality to form part of the preferred structure.

Alternative liability-hedging structures

Evaluation Framework

In collaboration with Addenda, a range of alternative liability-hedging structures were developed to evaluate trade-offs between key liability-driven investment metrics. The analysis focused on assessing how different LHA structures influence the following measures:

- **Liability Yield Curve and Discount Rate (DR)** – The resulting liability discount curve under each allocation scenario and the equivalent single discount rate.
- **Liability Value** – The present value of liabilities calculated using the corresponding yield curve.
- **LHA Yield** – The expected yield generated by each LHA portfolio.
- **Liability Tracking Error** – The degree to which the LHA portfolio tracks changes in liability values, measured as tracking error relative to the liabilities.

The analysis compared a range of liability-hedging structures incorporating different mixes of provincial bonds, corporate bonds, MUSH bonds and RRBs to evaluate trade-offs among liability matching, inflation sensitivity, portfolio yield and portfolio efficiency.

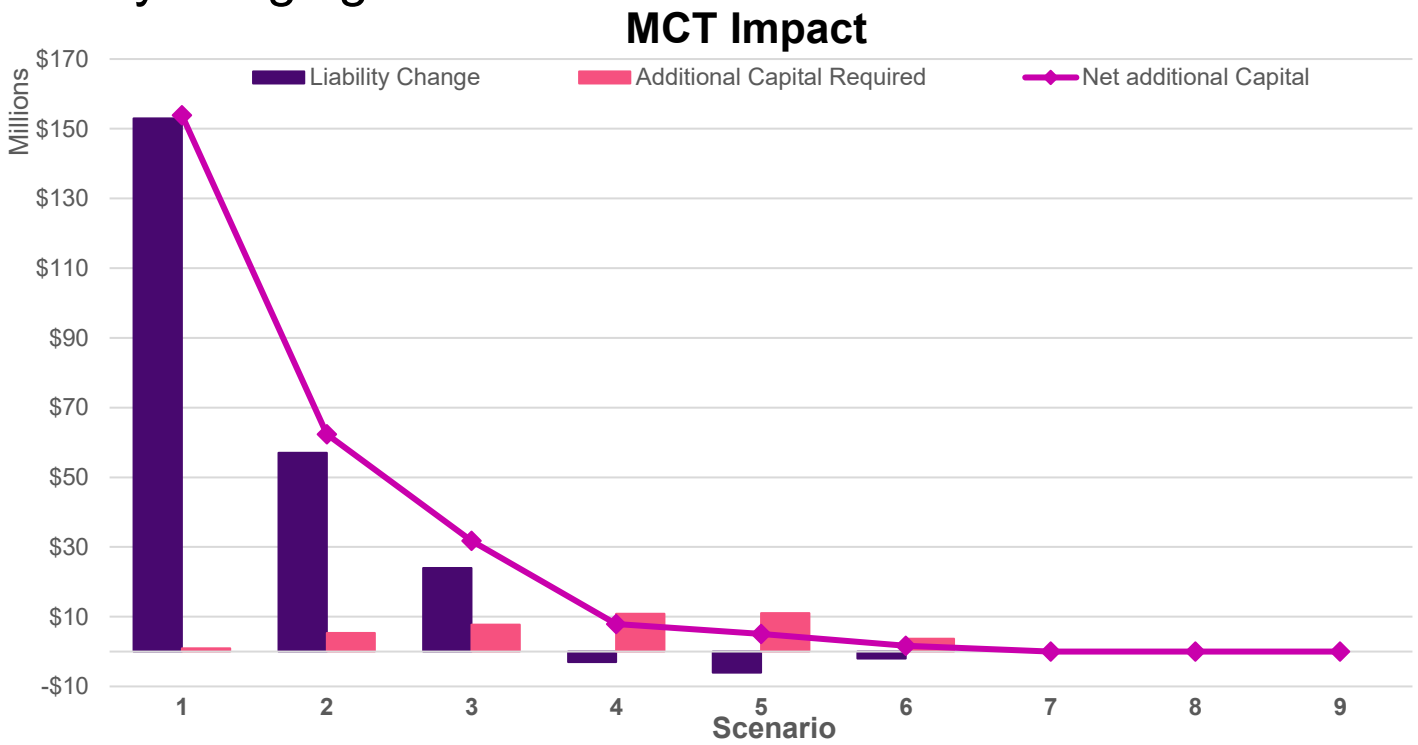
© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Alternative liability-hedging structures

Alternative structures evaluated to improve liability matching and portfolio efficiency

LDI/Completion Portfolio

Scenario		Description
1	60% Federal + 40% RRB	Baseline structure designed to hedge interest-rate and inflation risk
2	15% Provincial + 45% Corporate + 40% RRB	Replacing 60% Federal Bonds with unconstrained bond allocation to hedge liabilities
3	20% Provincial + 60% Corporate + 20% RRB	Reducing RRB to 20% with unconstrained bond allocation to hedge liabilities
4	25% Provincial + 75% Corporate	Unconstrained bond allocation to hedge liabilities
5	20% Provincial + 75% Corporate + 5% MUSH	Adding $100M MUSH Bond allocation representing approx. 5% of liabilities
6	45% Provincial + 50% Corporate + 5% MUSH	Reducing Corporate Bond allocation from 75% to 50%
7	65% Provincial + 30% Corporate + 5% MUSH	Reducing Corporate Bond allocation from 50% to 30%
8	65% Provincial + 30% Corporate + 5% MUSH	Replacing the Corporate Bond Allocation with Addenda Corporate Bond Fund
9	65% Provincial + 30% Corporate + 5% MUSH	Including Provincial Bonds from Manitoba Department of Finance



- Scenarios 1 to 3 evaluate progressively lower RRB allocations and therefore different levels of explicit inflation protection.
- Scenarios 4 to 7 evaluate alternative mixes of provincial, corporate and MUSH bonds without RRBs.
- Scenarios 1 to 7 assume the liability-hedging assets are implemented through an LDI or completion portfolio.
- All scenarios improve the matching of liability-curve characteristics relative to the current two-moment approach.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Evaluating alternative liability-hedging structures

Comparing outcomes under alternative liability-hedging structures

Scenario	Liability DR	Liability $Impact	LHA Yield	Yield Spread
1	3.82%	+$153M	3.50%	-0.32%
2	4.28%	+$57M	4.12%	-0.16%
3	4.45%	+$24M	4.42%	-0.03%
4	4.60%	-$3M	4.70%	0.10%
5	4.61%	-$6M	4.74%	0.13%
6	4.58%	-$2M	4.52%	-0.06%
7	4.54%	-	4.49%	-0.07%
8	4.54%	-	4.31%	-0.25%
9	4.54%	-	4.39%	-0.17%
Current	4.54%	-	4.23%	-0.31%

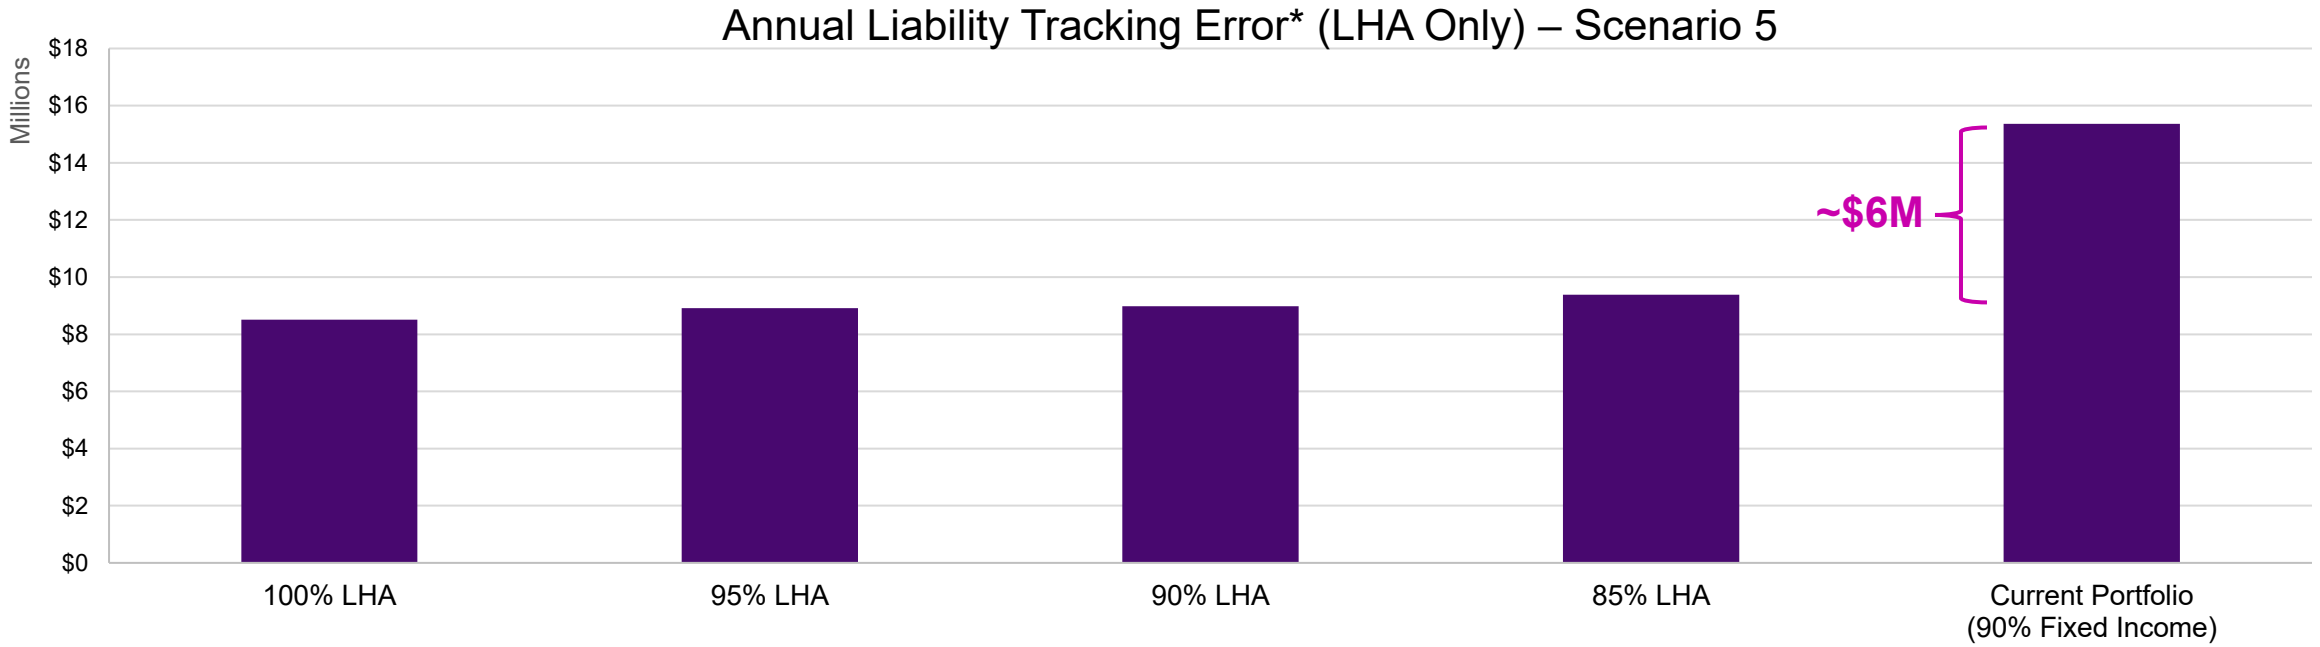
- Scenarios 1-3 provide greater explicit inflation protection through RRBs but result in lower liability discount rates and higher liability values.
- Scenarios 4-7 improve the relationship between portfolio yield and the liability discount rate while having only a modest impact on capital requirements and the MCT ratio, resulting in a change of less than 1% relative to the current MCT ratio.
- Scenarios 8-9 demonstrate the impact of the current structure compared to its LDI equivalent.
- The analysis indicates that a more concentrated provincial and corporate bond structure can improve liability matching and portfolio efficiency without materially increasing overall portfolio risk.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Evaluating alternative liability-hedging structures

Preferred LHA Structures

Across the structures evaluated, scenarios incorporating a smaller MUSH allocation and higher allocations to liability hedging assets generally produced the most attractive combination of liability matching and portfolio yield.



LHA	Scenario	Liability DR	Liability $Impact	LHA Yield	Yield Spread
100%	**#5:** 20% Provincial + 75% Corporate + 5% MUSH	4.61%	-$6M	4.49%	-0.12%
95%	**#5:** 20% Provincial + 75% Corporate + 5% MUSH	4.61%	-$6M	4.57%	-0.04%
90%	**#5:** 20% Provincial + 75% Corporate + 5% MUSH	4.61%	-$6M	4.66%	+0.05%
	#6: 45% Provincial + 50% Corporate + 5% MUSH	4.58%	-$2M	4.42%	-0.16%
85%	**#5:** 20% Provincial + 75% Corporate + 5% MUSH	4.61%	-$6M	4.74%	+0.13%
	#6: 45% Provincial + 50% Corporate + 5% MUSH	4.58%	-$2M	4.52%	-0.06%
Current		4.54%	-	4.23%	-0.31%

- Scenario 5 consistently provided the strongest balance between liability matching, portfolio yield and liability valuation outcomes.
- Alternative structures with reduced MUSH exposure generally outperformed the current structure across multiple measures.
- An 85% liability-hedging allocation was determined to be the most efficient and practical structure evaluated.

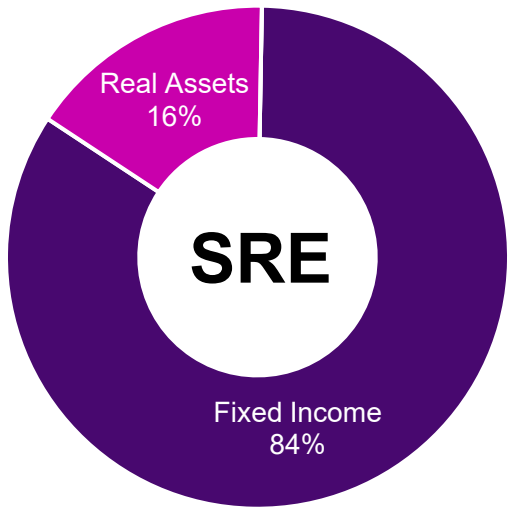
© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Improved liability matching

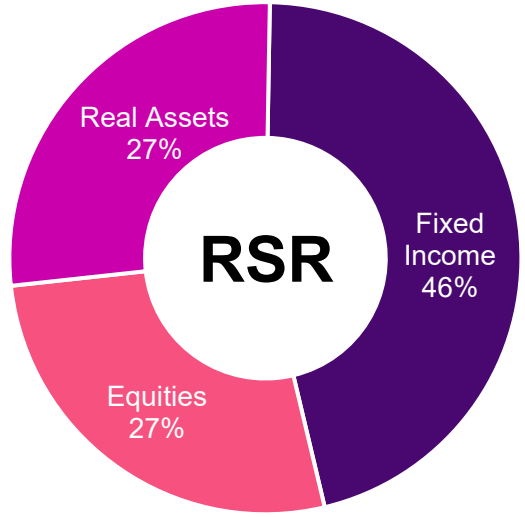
Scenario 5 reduces liability tracking error by approximately $6 million relative to the current structure, indicating closer alignment between asset and liability behaviour.

- Liability tracking error measures how effectively the liability-hedging portfolio responds to changes in interest rates and liability values.
- Scenario 5 improves liability matching while maintaining attractive portfolio yield characteristics.
- The improvement is achieved through more efficient portfolio construction rather than increased investment risk.

*Liability Tracking Error for all portfolios was provided by Addenda



© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.



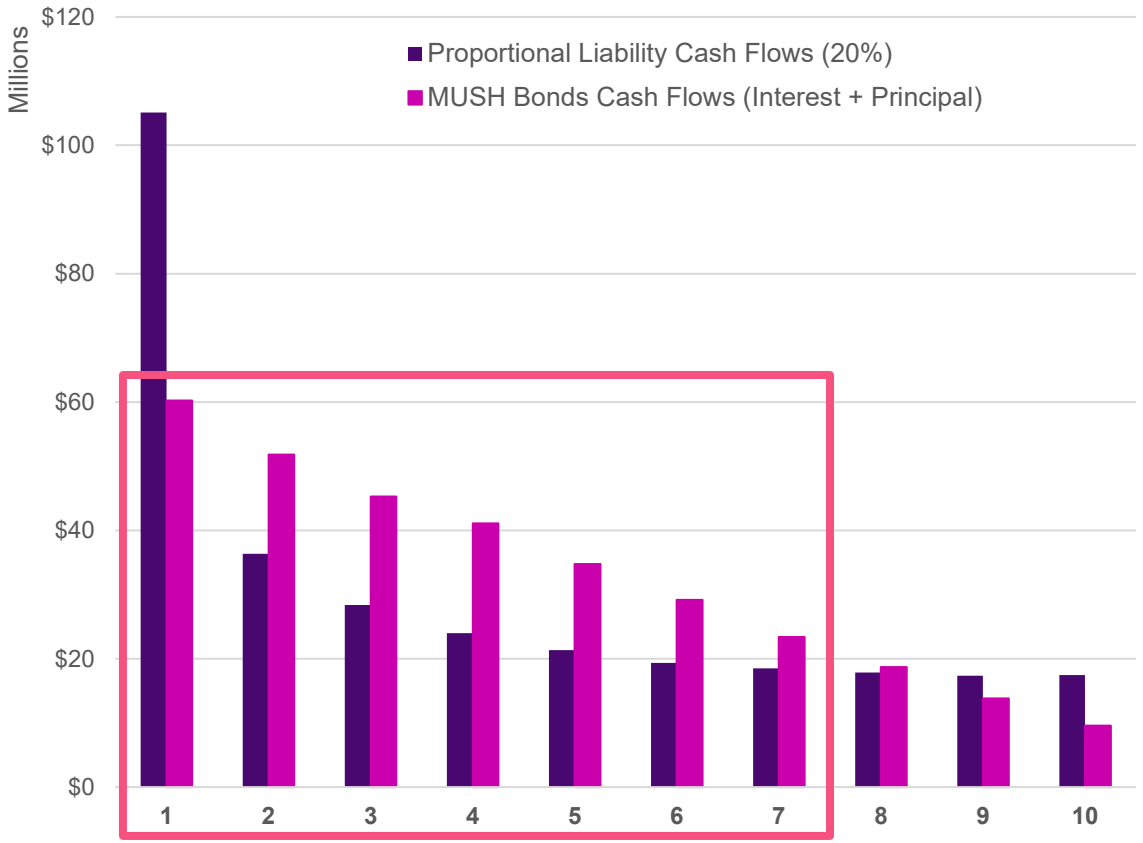
Recommended MUSH reallocation

Redeploying shorter-dated MUSH holdings

The analysis indicates that only a portion of the current MUSH allocation is required to support Basic portfolio liability-hedging objectives. Redeploying shorter-dated MUSH holdings to SRE and RSR improves alignment between asset characteristics and portfolio objectives while preserving value within MPI's overall fund structure.

March 31st, 2026	SRE	RSR
Cash	$37.1M	$1.5M
Government Bonds	**$203.1M**	**$96.9M**
Private Debt	-	$124.7M
Total Fixed Income	**$240.2M**	**$223.1M**
Real Assets	**$47.1M**	**$132.2M**
Equities	**-**	**$128.4M**
Total	**$287.3M**	**$483.7M**

Proposed reallocation



- Approximately $203M of shorter-dated MUSH bonds could be transferred to SRE.
- Approximately $55M of shorter-dated MUSH bonds could be transferred to RSR.
- Longer-dated MUSH holdings would remain in Basic to support liability-hedging objectives.
- SRE and RSR provide a more natural home for shorter-duration MUSH exposure.
- The proposed approach improves asset-liability alignment without increasing overall portfolio risk.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Recommended MUSH reallocation

Duration & Yield characteristics

The MUSH bonds identified for redeployment are concentrated in shorter maturities and exhibit duration characteristics that are more closely aligned with the objectives of SRE and RSR than with the long-dated liabilities of the Basic portfolio.

	SRE (Gov Bonds)	RSR (Gov Bonds)	MUSH
Duration	2.5	2.5	**~3.0**
Yield	2.9%	3.0%	**~4.0%**

- Approximately $258 million of MUSH exposure identified for redeployment is concentrated within the first 6-7 years.
- These cash-flow characteristics contribute less to long-term liability hedging within the Basic portfolio.
- The duration profile is more consistent with the investment objectives of SRE and RSR.
- SRE and RSR would benefit from enhanced yield without increasing capital requirements, as MUSH bonds receive government-bond capital treatment.
- SRE liquidity would remain supported by ongoing MUSH maturities and existing cash holdings.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Basic portfolio conclusions

The review identified an opportunity to improve liability-hedging efficiency through a more concentrated provincial and corporate bond structure, supported by a significantly reduced MUSH allocation.

Key takeaways

- The current liability-hedging structure generates a yield below the liability discount rate and includes a significant allocation to shorter-dated MUSH bonds that are not closely aligned with MPI's liability profile.
- Alternative structures improved liability matching, portfolio yield and tracking error without materially increasing portfolio risk.
- The preferred structure retains the MUSH exposure required for liability-hedging purposes while eliminating the current RRB allocation.
- Redeploying shorter-dated MUSH holdings improves alignment between asset characteristics and portfolio objectives across MPI's fund structure.

RSA and RSR Portfolio Allocation

Assessing portfolio positioning, future opportunities and implementation constraints

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

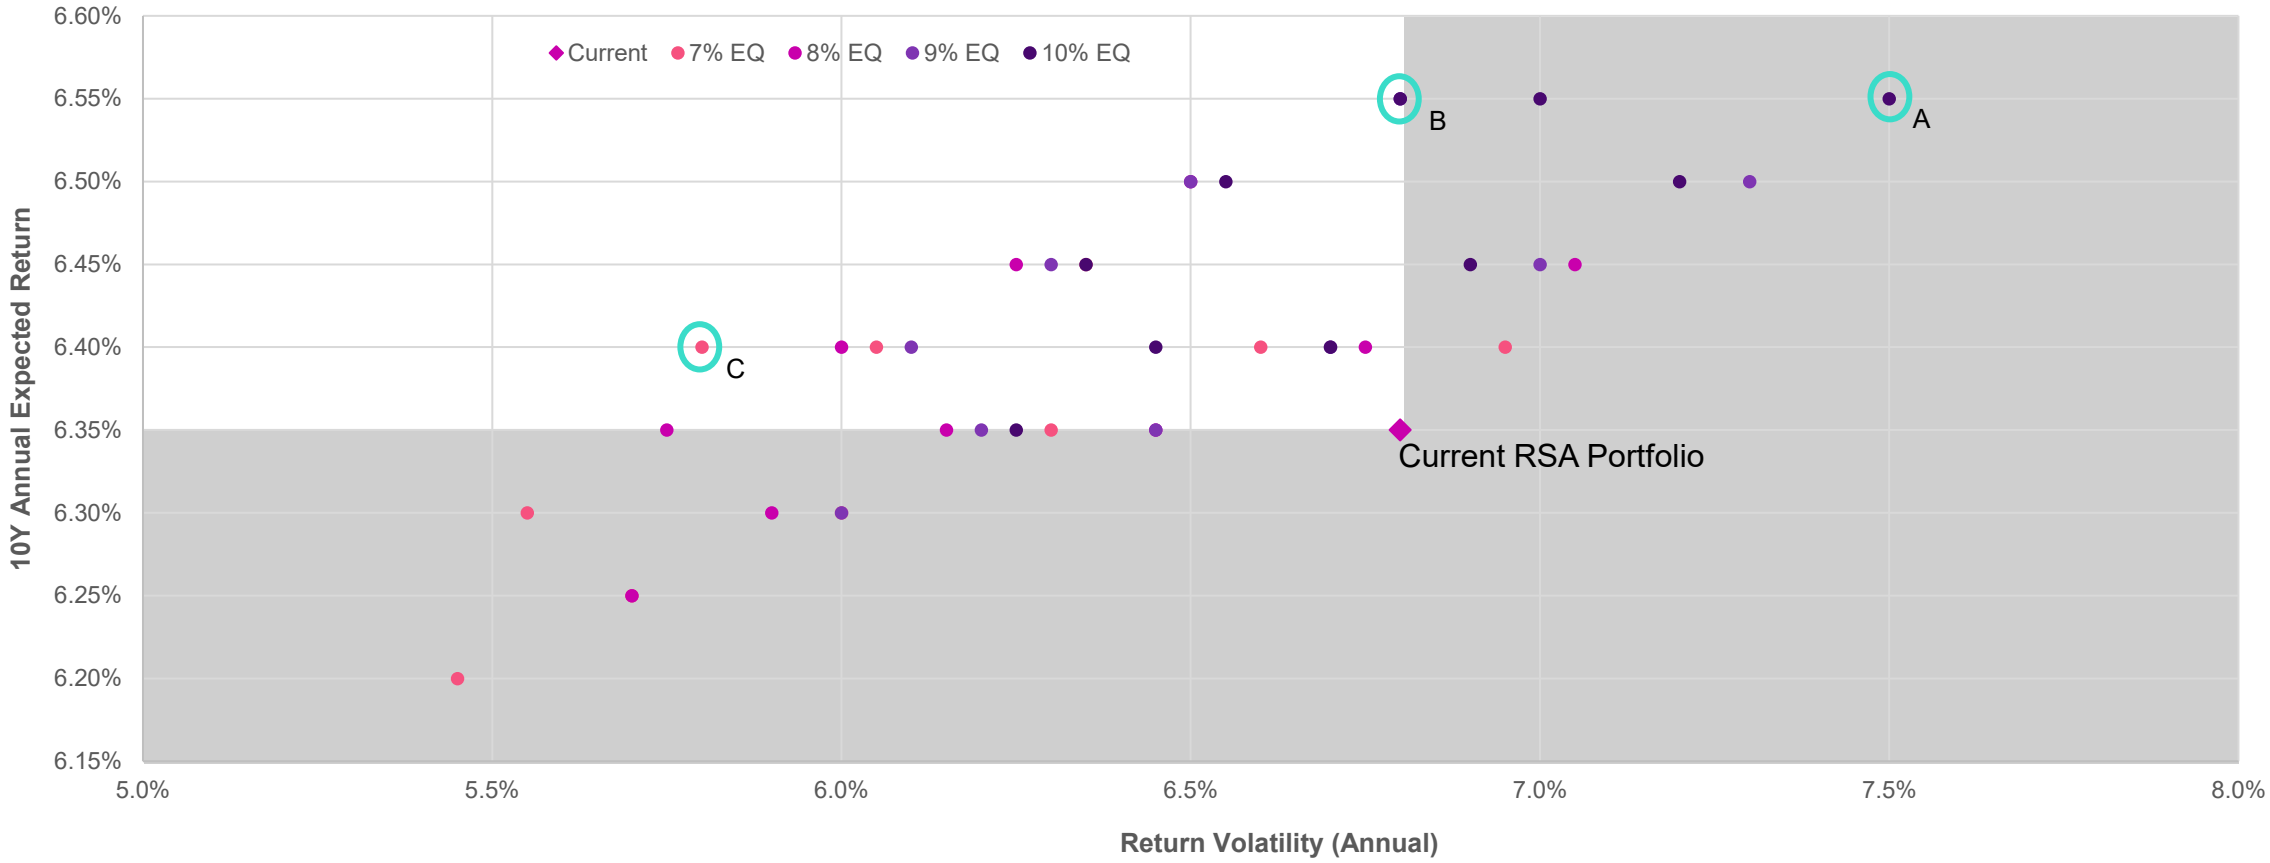
September 2, 2026

RSA portfolio constraints and preliminary direction

While opportunities exist to improve long-term portfolio outcomes, implementation flexibility is currently constrained by existing real asset holdings and available liquidity. As a result, any RSA changes are expected to occur gradually as capital is returned from existing investments.

Return Seeking Assets	$927M	COMMENTS
Equity	$162M	Current equity allocation maintained in all scenarios evaluated.
Real Assets	**$376M**	**Very illiquid and would take several years to redeem. Largest holding is TD Greystone (~$150M) and has an estimated redemption queue of approx. 2-3 years.**
Private Debt	**$147M**	**Good yield (5%) at low capital charge**
Commercial Mortgages	**$115M**	**Good yield (5.4%) at low capital charge**
Short Term Provincial + MUSH	$127M	~$50M will become MUSH with the remainder in Short Term Provincial Bonds

- Real assets represent the largest source of capital available to fund future RSA changes.
- Existing real asset holdings are relatively illiquid and may require several years to fully redeem.
- Commercial mortgages and private debt continue to offer attractive yield and capital-efficiency characteristics.
- A phased implementation approach is more practical than a significant near-term portfolio repositioning.



© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Legend:
A. Greater equity allocation
B. Greater alternative credit and equity allocation
C. Greater alternative credit allocation with lower overall volatility

Evaluating potential long-term RSA allocations

Efficient Frontier

The analysis identifies opportunities to improve long-term portfolio efficiency through the gradual redeployment of real asset capital toward private debt, commercial mortgages and, selectively, equities.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Potential long-term RSA direction

The analysis identifies opportunities to improve long-term portfolio efficiency by gradually reducing real asset exposure and increasing alternative credit, with equity increases considered selectively as liquidity becomes available.

RSA Portfolios	CURRENT	A	B	C
ST Prov	14% (5%)	14% (5%)	8% (2%)	8% (2%)
Commercial Mortgages	12% (4%)	12% (4%)	20% (7%)	24% (8%)
Private Debt	15% (5%)	15% (5%)	20% (7%)	24% (8%)
Real Assets	41% (13%)	28% (9%)	20% (7%)	23% (8%)
Equity	18% (6%)	31% (10%)	31% (10%)	21% (7%)
TOTAL	**100%** (33%)	**100%** (33%)	**100%** (33%)	**100%** (33%)
Expected Return (10y Median)	**6.35%**	**6.55%**	**6.55%**	**6.40%**
Annual Return volatility	6.8%	7.5%	6.8%	5.8%
Sharpe Ratio	**0.59**	**0.57**	**0.63**	**0.70**
5% VaR (1y)	-4.6%	-5.6%	-4.5%	-3.1%
5% CVaR (1y)	-9.3%	-11.5%	-9.9%	-7.2%
Average Real Return (RR)	**4.2%**	**4.4%**	**4.4%**	**4.2%**
Annual RR Volatility	7.1%	7.7%	7.0%	6.2%
RA capital to be redeployed	**-**	**~$120M**	**~$190M**	**~$165M**

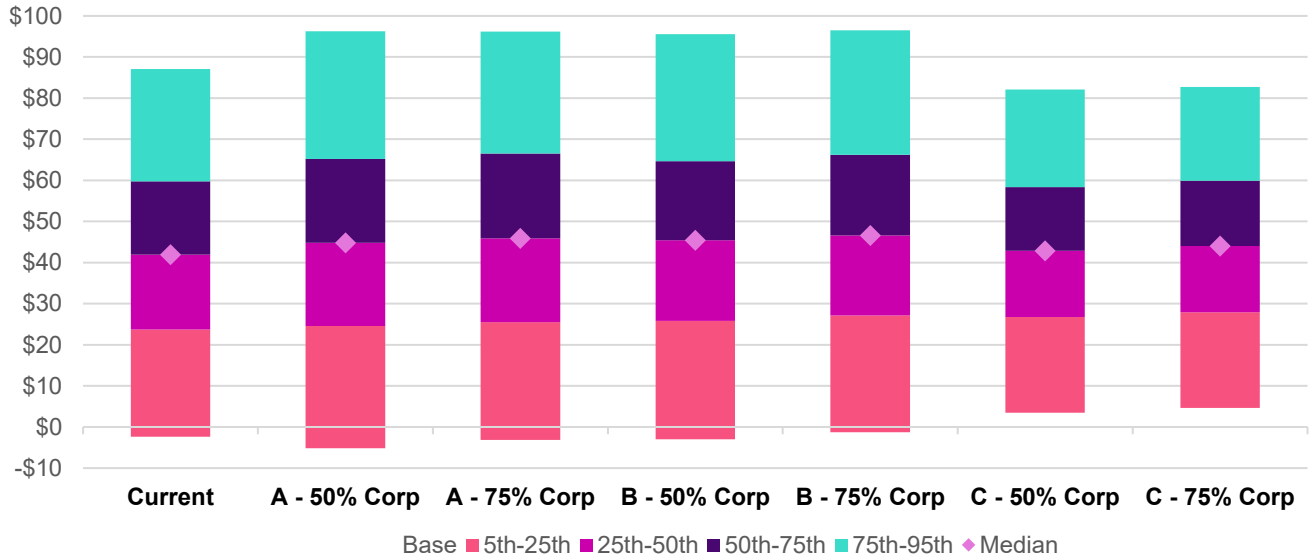
** All four portfolios RSA target reflect the capital transfer from EXT to RSR and the expected $70M-$80M capital impact to the basic portfolio.*

- Reducing real asset exposure provides the greatest opportunity to improve portfolio flexibility.
- Increasing commercial mortgages and private debt improves expected returns while maintaining attractive risk-adjusted outcomes.
- Modest equity increases may enhance expected returns but are not required to achieve meaningful improvements.
- RSA allocations A, B, and C have a minimal impact on the MCT ratio, with the ratio remaining within approximately 1% of the current portfolio.
- Alternative B provides the strongest balance of expected return, downside risk and portfolio efficiency among the alternatives evaluated.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Total portfolio allocations (Basic + RSR)

All evaluated alternatives improve expected portfolio outcomes relative to the current structure, driven primarily by a more efficient liability-hedging portfolio and the gradual redeployment of real asset capital.



Total Portfolio (Basic + RSR)	CURRENT	A 50% Corp	A 75% Corp	B 50% Corp	B 75% Corp	C 50% Corp	C 75% Corp

Total Portfolio earnings impact

Earnings Impact – 5 Year Average at year 5

All alternatives improve expected earnings relative to the current portfolio. Differences between alternatives are primarily driven by the balance among alternative credit, real assets and equities.

- Higher-return portfolios generally produce greater earnings variability and larger downside outcomes.
- Portfolios emphasizing alternative credit achieve many of the return benefits while maintaining more moderate risk characteristics.
- The trade-off between expected earnings and downside risk becomes increasingly important as equity exposure increases.

	Current	A 50% Corp	A 75% Corp	B 50% Corp	B 75% Corp	C 50% Corp	C 75% Corp

Implementation considerations and funding sources

Real asset considerations

Future RSA changes will be driven by the gradual redeployment of existing real asset holdings. While attractive opportunities exist, liquidity constraints support a phased implementation approach.

Real Assets	$ Allocation	% Allocation	Yield
TDAM – Direct	$137M	36%	2.5%
Crestpoint – Direct	$119M*	32%	6.2%
Harrison Street – Direct	$40M	11%	2.0%
XRE (ETF) – Listed	$10M*	2%	4.5%
City Place Parking	$5M	1%	-
Canadian Real Estate	**$311M**	**82%**	**3.9%**
Brookfield – Direct	$18M	5%	5.4%
GDIF – Direct	$26M	7%	6.0%
Voyager LP – Direct	$15M	4%	3.9%
BGI (ETF) – Listed	$6M	2%	2.2%
Infrastructure	**$65M**	**18%**	**5.0%**
Total Real Assets	**$376M**	**100%**	**4.1%**

*Reflects target allocation after all capital is called

- Real assets represent the primary source of capital available to fund future RSA changes.
- Existing real estate holdings, particularly TD Greystone, limit near-term implementation flexibility.
- Commercial mortgages and private debt remain attractive uses of capital given their yield and capital efficiency characteristics.
- Future reallocations are expected to occur gradually as capital is returned from existing mandates.
- The preferred implementation approach is evolutionary rather than transformational.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

RSA and RSR portfolio conclusions

Improving portfolio efficiency without increasing risk

Future improvements are expected to occur through the gradual redeployment of real asset capital while maintaining MPI's conservative risk profile and capital objectives.

Key takeaways

- The optimal RSA allocation identified through the modeling reflects a reduction in real assets and higher allocations to equities, commercial mortgages, and private debt.
- Transitioning to the optimal target RSA allocation will require a phased implementation approach and will occur gradually over the next several years due to the limited liquidity of the existing real asset portfolio.
- As liquidity becomes available, progressively rebalance the RSA portfolio by allocating new/future capital to equities, commercial mortgages, and private debt, targeting alignment with Portfolio B over the long term to to enhance the RSA's expected risk-adjusted return profile.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

September 2, 2026

Strategy review conclusions and direction

Summary of key findings and strategic direction

The preferred direction improves liability matching, portfolio yield and long-term flexibility without materially increasing overall portfolio risk.

01 BASIC PORTFOLIO

Preferred liability-hedging structure

- Maintain an 85% liability-hedging allocation.
- Reduce MUSH from approximately 17% to 5%, eliminate RRBs and increase corporate bonds.

02 MUSH REALLOCATION

Better align assets with portfolio objectives

- Redeploy approximately $203 million of shorter-dated MUSH bonds to SRE and $55 million to RSR.
- Retain longer-dated MUSH holdings in Basic to support liability matching.

03 RSA EVOLUTION

Implement gradually as liquidity permits

- Maintain current RSA targets in the near term.
- Over time, redeploy real asset capital toward commercial mortgages, private debt and selectively equities.

The proposed direction remains subject to MPI's established governance and implementation processes.

Appendix A: Supporting materials

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

MUSH bonds: Characteristics and liability hedging considerations

What are MUSH bonds?

- Debt issued by municipalities, universities, schools, and hospitals in Manitoba
- Typically issued through a centralized provincial borrowing framework (not directly into public markets)
- Non-marketable and held to maturity

MUSH Bonds Comparison

March 31, 2026	MUSH (Manitoba)	Provincials	Corporate
Credit Quality	Strong / public sector	AA–AAA	A
Yield	4.20%	3.70%	4.20%
Duration	4.3y	6.3y	6.0y
Liquidity	None – locked in	Daily	Daily
Access	Limited / program-driven	Broadly available	Broadly available

- MUSH Bonds provide similar yield as Corporate A Bonds but with a higher credit rating and at a lower duration
- However, MUSH Bonds are not liquid while Corporate A Bonds liquidity is daily

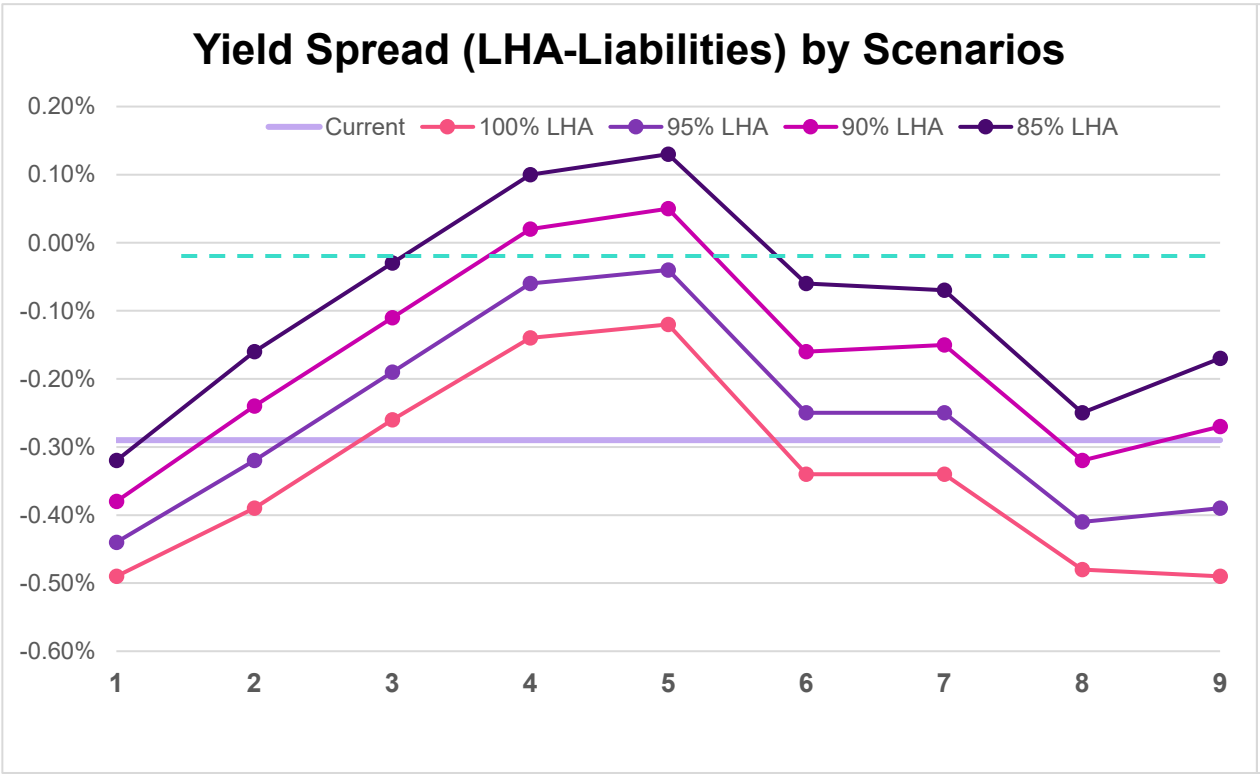
MUSH Structural Concerns

Depth of market :

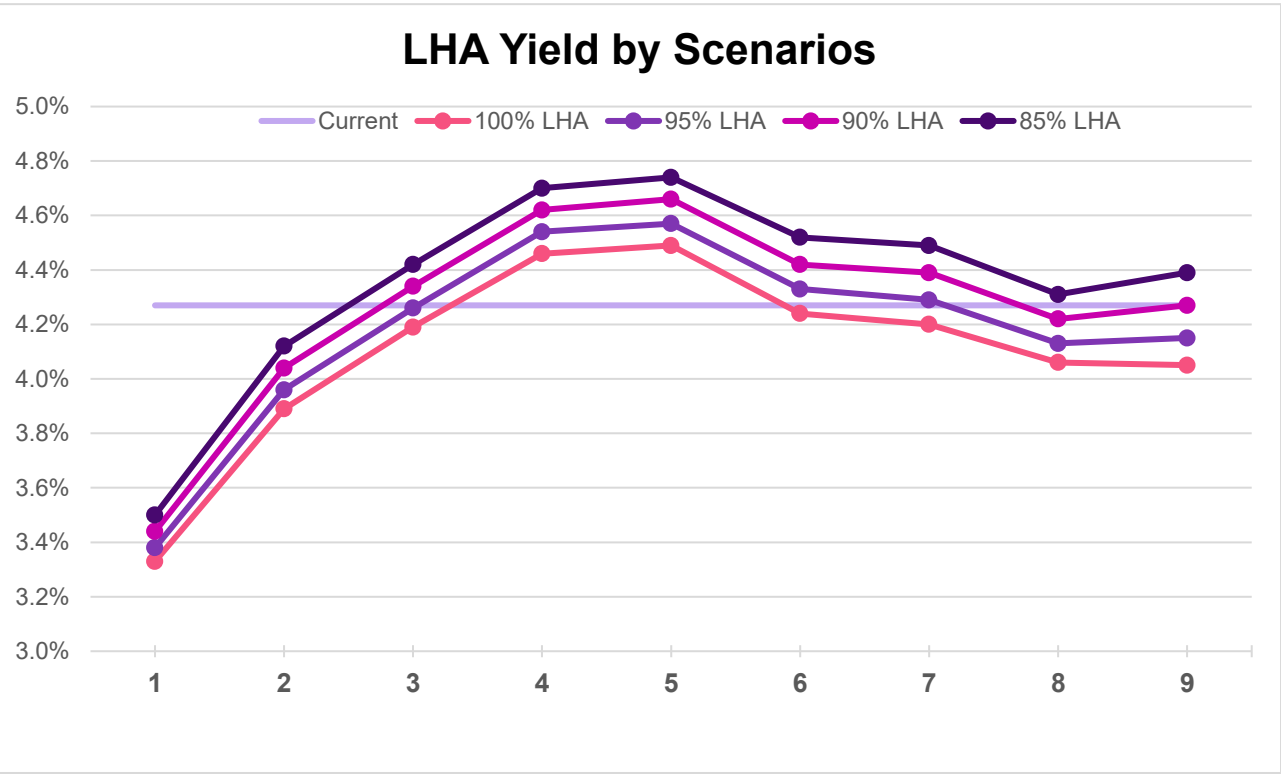
- **Niche:** Program-driven market – not a broad investable universe
- **Closed market:** Issuance controlled by province – allocation size is dictated by program availability

Structural Constraints :

- Mismatch with liability yield and duration
- Capital lock-up materially limits rebalancing and liability management



MUSH vs Liabilities:



- **Yield Curve:** MPI liabilities are long-duration – MUSH bonds do not align in term, structure, or convexity.
- **Duration:** Approximately 5 years shorter than MPI Basic liabilities.
- **Yield:** Due to their shorter duration, MUSH bond yield is materially lower than the liability single discount rate.

© 2026 WTW. Proprietary and confidential. For WTW and WTW client use only.

Alternative liability-hedging structures

85% to 100% Liability Hedging Assets

- Increasing RRB allocations improves inflation protection but generally reduces portfolio yield and increases liability values.
- Several alternative structures improve the relationship between portfolio yield and the liability discount rate.
- Improvements in liability matching are achieved primarily through more efficient portfolio construction rather than additional investment risk.
- Scenario 5 consistently produces the most attractive balance between liability matching, portfolio yield and overall efficiency across all four levels of LHA allocation.

*Reflects target allocation after all capital is called

- Illustrative real asset structures were evaluated as part of the broader review.
- Potential opportunities included greater infrastructure exposure and reduced reliance on lower-yielding real estate holdings.
- Any changes would require further analysis and are not part of the immediate recommended actions.
- Future implementation remains dependent on liquidity, redemption timing and MPI governance decisions

Capital market assumptions

Investment beliefs and modelling approach

- Economic conditions are highly uncertain over the near-term and do not in our view reflect equilibrium conditions
  - Our capital market assumptions reflect this instability and as a result are time-sensitive
  - Advice that is dependent on this set of investment beliefs is thus also time-sensitive
  - Alternative beliefs might well lead to different conclusions; thus it is important that investors consider whether their beliefs and ours are aligned
- The result of these assumptions is to make certain strategies more or less attractive over the short- to mid-term
- A natural outcome of our assumptions is to increase the time-dependency of our advice; we suggest that more frequent revisiting of the investment strategy will be necessary
- Asset classes are described by their expected returns, volatility, and correlation with other asset classes
- Asset class volatilities and correlations between return-seeking asset classes tend to increase during stressed markets – return distributions are therefore modelled under two sets of assumptions: a “normal” scenario and a “downside” scenario where correlations and volatilities are increased
- Simulated Government of Canada yield curves (full yield curve with pace of reversion) and simulated credit spreads are used both in developing liability proxy returns and the returns for fixed income asset classes
- Our central assumptions are based on the presumption that current policies with respect to climate change continue with no further attempt to incentivize further emissions reductions. This represents an orderly transition to a low carbon economy, albeit with a low level of action, where socioeconomic and technological trends do not shift markedly from historical patterns, leading inevitably to a larger than desired increase in global warming.

Investments

FFI.1 Executive Summary

With over $3.8 billion in investment assets, the Investment Income forecast is a major component of the financial forecast of Manitoba Public Insurance (MPI). At the 2025/26 fiscal year-end (FYE), the investment gain allocated to the universal compulsory automobile insurance line of business (Basic) was $105.2 million. In 2026/27, investment income is forecasted to be $135.8 million.

This chapter explains how MPI forecasts the investment income for the Basic line of Business for Fiscal Year-ends 2026/27 to 2030/31.

FFI.1.1 Investment Income Forecast – Summary

The financial model is used to forecast investment income for twelve asset classes. These asset classes include: cash, provincial bonds, corporate bonds, non-marketable bonds,[1] real return bonds, commercial mortgages, Canadian equities, global equities, low volatility global equities, real estate (Cityplace and a pooled fund), infrastructure, and private debt. The forecast also includes the impact of investment fees and pension expenses. This chapter details the capital and income return, turnover, and funding assumptions for each asset class. This chapter also provides a comparison of the investment income forecast from the current year's General Rate Application (2027 GRA) to the prior year's application (2026 GRA).

The tables below show figures for the Basic line of business, which includes 100% of the Basic Claims investment portfolio, 100% of the Rate Stabilization Reserve (RSR) investment portfolio and the 69.3% allocation assigned to Basic of the Employee

[1] Also called MUSH bonds or Municipal, School & Hospital bonds

Future Benefits (EFB) investment portfolio (based on the estimated payroll ratio in 2025/26 and over the forecast period).

- **Figure FFI-1** provides an investment income summary for the Basic line of business over a 10-year period (five years historical, current projected year-end and four years forecasted). See section *FFI.14* for a summary of investment income and asset allocation for the Basic Claims, RSR, and EFB portfolios over the five-year forecast period.
- **Figure FFI-2** provides the asset values and percentage of the total combined Basic line of business portfolio for each asset class over the same 10-year period.
- **Figure FFI-3** shows the naïve interest rate forecast for the present year based on the GoC 10-year bond rate as of March 31, 2026, compared to the naïve interest rate forecast used in the 2026 GRA.
- **Figure FFI-4** provides a summary of the major assumptions used in the 2026 and 2027 GRAs, and the corresponding section in this document where the current assumptions are supported.

FFI.2 Cash/Short Term

Cash and Short-Term holdings are defined as cash and fixed income investments having a maturity of less than one year at the time of purchase. Cash and short-term securities are managed by the Department of Finance.

The actual 2025/26 FYE cash balance represented 4.2% of the Basic line of business, which includes 100% of the Basic Claims portfolio, 100% of the RSR portfolio and the allocation of the EFB portfolio assigned to Basic. Cash has a target weight of 0% within Basic Claims, EFB and RSR portfolios. In this forecast, Corporate Operating Cash is included within the RSR portfolio. The projected Operating Cash Balance in 2026/27 is $85.8 million and is expected to grow to $100.0 million in 2030/31, the final year of the forecast. The projected weight for cash is under 3% throughout the forecast. See *Part VIII FFM Appendix 1 – Rebalancing* for more details on rebalancing assumptions used in the model.

FFI.2.1 Summary Table

Figure FFI- 5 Cash/Short Term Summary

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31

FFI.2.2 Return Assumption

The five year forecasted cash returns are based on the GoC three-month Treasury-bill yield from Bloomberg as of March 31, 2026.

FFI.3 Marketable Bonds

Marketable bonds include all fixed income securities with a maturity of one year or more at the time of purchase and include Canada, Manitoba, other Provincial, municipal, corporate bonds, floating rate notes, and debentures that are tradable in the fixed income market.

The Department of Finance manages a portion of the Provincial bonds. Addenda Capital manages all corporate bonds and some government bonds (in the completion portfolio which is used to implement the hedge ratio strategy).

Marketable bonds represented 49.1% of the Basic line of business as of 2025/26 FYE, which consisted of 26.0% Provincial bonds, 20.6% corporate bonds and 2.6% real return bonds (as per *Figure FFI-2*).

Currently, the target weights for Provincial bonds are 35% for Basic Claims, 22% for RSR and 0% for EFB. For corporate bonds, the target weights are 28% for Basic Claims, 0% for RSR and 16% for EFB. For real return bonds, the target weight is 4% in Basic Claims, and 0% for both RSR and EFB.

FFI.3.1 Basic Summary Tables

The tables below present a summary of projected investment income, market value, and yields for the total marketable bond portfolio and separate tables for provincial, corporate, and real return bonds.

FFI.3.2 Interest and Capital Return Assumptions

Income from the marketable bond portfolio is separated into two components: interest income and capital return (both realized and unrealized gains/losses).

FFI.3.2.1 Interest Income

Marketable bond interest income is calculated on a quarterly basis using the weighted average coupon rate for bonds currently within the portfolio, the yield for newly purchased bonds, and the forecasted bond turnover rate. In each quarter, the weighted average coupon yield of the previous quarter is adjusted by: (1) the marketable bond turnover rate; and (2) the forecasted marketable bond yield in order to calculate the new weighted average coupon yield for the entire marketable bond portfolio for that quarter. These components are discussed in further detail below.

The interest income calculation is the same for both provincial and corporate bonds. With that said, it is important to note that spreads have minimal impact on interest income, other than through the coupon yields of newly purchased bonds.

FFI.3.2.2 Weighted Average Coupon for Existing Bonds

The weighted average coupon is used to calculate the interest from the marketable bond portfolio (provincial bonds and corporate bonds). To illustrate the concept of the weighted average coupon, a theoretical $1 billion dollar bond held at par value with a weighted average coupon of 5.0% will generate $50 million dollars in interest within one year.

The weighted average coupon for provincial bonds was 3.80% in Basic and 2.84% in RSR as of March 31, 2026, whereas the weighted average coupon for corporate bonds was 4.67% in Basic and 4.53% in EFB. These coupon rates were used as the initial coupon rate in the financial model in Q1 2026/27. Coupon rate differentials are attributable to the compositional and durational differences of the underlying marketable bonds within the Basic, RSR, and EFB portfolios. Provincial bond yields are lower within the RSR portfolio due to shorter duration bonds held within the

portfolio. Provincial coupon rates were provided by Bloomberg for Basic and the FTSE Russell Bond Index for RSR as of March 31, 2026, whereas corporate coupon rates were provided by the corporate bond manager, Addenda, for the Basic and EFB portfolios as of March 31, 2026.

FFI.3.2.3 Turnover

The weighted average coupon of the marketable bond portfolio (provincial bonds and corporate bonds) for each successive quarter is calculated by adjusting the weighted average coupon of the previous quarter for the impact of turnover (i.e., buying and selling of bonds) in the current quarter. If new bonds are purchased at a lower (higher) yield than the weighted average coupon in the model, then the weighted average coupon of the marketable bond portfolio will decrease (increase).

Turnover indicates how often marketable bond holdings are sold in the portfolio. Turnover can be reported in two ways: the percentage of the portfolio holdings sold in one year (turnover ratio) or the number of years to turn over the entire portfolio (which is the inverse of the turnover ratio).

Since August 31, 2019, corporate bond management has been outsourced to Addenda Capital. Turnover within the provincial bond portfolio managed by the Province of Manitoba is projected to be 47% in the Basic Claims portfolio (see *Figure FFI-10*) and 0% in the RSR and EFB portfolios based on the minimal trading that has occurred within those portfolios. Corporate bond turnover was provided by Addenda Capital and is expected to be 71% for the corporate bonds within the Basic Claims portfolio, and 29% for the long-duration pooled fund within the EFB portfolio. In the 2026 GRA, the corporate bond turnover within the Basic Claims portfolio was expected to be 47%. The higher turnover in this year's GRA reflects the impact of managing the corporate bond portfolio at a longer duration. *Figure FFI-*11 shows the sensitivity of marketable bond turnover on Basic investment income.

Figure FFI- 10 ***Provincial Bond Turnover***

Line No.	Date*	Beginning	End	Average	Minimum Buys/Sells	Ratio	Years to Turnover the Portfolio

8	**1.00**	136,530	147,984	159,968	171,785	185,301

Assumption: The turnover ratio for provincial bonds is forecasted to be 0.47 within Basic Claims and 0.00 within RSR and EFB. Turnover for corporate bonds in Basic Claims is forecasted to be 0.71, and 0.29 within EFB over the five-year forecast period. Income generated due to turnover within the EFB portfolio over the forecast period is applied to the pension liability and not included within the Basic line of business. Real Return Bonds are only held in the Basic Claims portfolio, and there is no turnover assumed as MPI plans to hold the bonds to maturity.

FFI.3.2.4 Yield to Maturity Calculation

There are three marketable fixed income asset classes which are modeled separately for the Basic Claims and RSR portfolios: 1) provincial bonds; 2) corporate

bonds; and 3) Real Return Bonds. The bond spreads for each are used when forecasting Basic investment income.

Provincial Bond Spread for Basic Claims

The provincial bond spread over the GoC 10-year bond rate as of March 31, 2026 is calculated using the yield of the FTSE Russell Provincial Bond index (previously the PC Bond Index) at March 31, 2026 and then applying mean reversion based on the average yield going back to 2007. Spreads were gathered based on three-, five-, ten- and fifteen-year duration values and then linearly interpolated. The spread of provincial bonds over GoC 10-year bonds was used as a proxy for the provincial bond portfolio yield.

Given the sensitivity of the claims duration to changes in interest rates, marketable bonds that have duration between 3 years and 15 years are linearly interpolated by the model.

To illustrate how the provincial bond spread is calculated using the naïve interest rate forecast:

- At March 31, 2026 the actual duration of the Provincial bond portfolio was 11.93 years and the actual yield to maturity was 4.32%. The spread over the GoC 10-year bond at 11.93 years is 88 basis points and the adjustment for mean reversion is 14 bps. Therefore, the projected provincial bond yield to maturity for new purchases is 4.49% (3.47% GoC 10-year bond rate plus 0.88% for unadjusted spread plus 0.14% for the mean reverted spread).
    - See FFI.3.2.6 for an explanation of the increase in the fixed income portfolio's duration.

- In the 2026 GRA, the duration of the provincial bond portfolio was 9.12 years as of March 31, 2025. The spread over the GoC 10-year bond at 9.12 years was 58 basis points. The mean reversion adjustment was 11bps. Therefore, the forecasted provincial bond yield to maturity as at March 31, 2025 was 3.66% (2.97% GoC 10-year bond rate plus 0.58% for unadjusted spread plus 0.11% for the mean reverted spread).

Figure FFI- 12 Provincial Bond Yield Spread

Line No.	Duration	Provincial Bond Spread
1	**6.0 years**	27 bps
2	**7.0 years**	39 bps
3	**8.0 years**	52 bps
4	**9.0 years**	65 bps
5	**10.0 years**	78 bps
6	**11.0 years**	90 bps
7	**12.0 years**	103 bps

Provincial Bond Spread for RSR

The duration for provincial bonds in the RSR portfolio is based on 100% of the FTSE Russell Short-Term Provincial Bond Index which was 2.78 years as at March 31, 2026 (2.71 duration in 2025 GRA). The yield to maturity for provincial bonds in the RSR portfolio with the naïve forecast is 3.03%. In the 2026 GRA, the projected yield for provincial bonds was 2.66%.

Corporate Bond Spread for Basic Claims

The duration for corporate bonds in the Basic Claims portfolio was 10.74 years based on information received from Addenda as at March 31, 2026 (10.03 duration in the 2026 GRA). The weighted average yield of the corporate bond holdings was 4.58%, implying a spread of 111 bps over the GoC 10-year bond yield of 3.47%. In the 2026 GRA, corporate bonds had a projected yield of 4.40% (2.97% GoC 10-year bond yield plus 1.43% spread). The 32 basis points YoY decrease in spreads reflects that corporate bonds are being perceived as less risky compared to last year.

Real Return Bond Spread for Basic Claims

The duration of the Real Return Bonds in the Basic Claims portfolio was assumed to be 11.36 years, using the March 31, 2026 RRB Overall Index number within the FTSE Russell Provincial Bond index. The weighted average nominal yield on Real Return Bonds was 3.29% which is made up of two components: 1) The average real yield from the RRB Overall Index from FTSE Russell, and 2) the projected long-term inflation rate of 2.00% which the Real Return Bonds would pay as they are indexed to CPI. The total weighted average yield of 3.29% implies a spread of -18 bps over the GoC 10-year bond yield of 3.47%.

FFI.3.2.5 Capital Return

Rising interest rates and increased spreads result in unrealized losses in the marketable bond portfolio and falling interest rates and decreased spreads result in unrealized gains. The model uses the forecasted GoC 10-year bond rate to calculate the change in interest rates on a quarterly basis (which is zero since MPI assumes that the yield at March 31, 2026 is unchanged). Additionally, spreads are reverted to their long-term mean, based on their historical time required to revert. Historically most spreads revert to the mean within 1-2 years. Once the mean spread is reached, that spread is applied through the remainder of the forecast. The marketable bond duration, convexity, and change in interest rate are used to calculate the capital return.

FFI.3.2.6 Duration

Duration measures the impact of changes in interest rates on the market value of a fixed income asset. The higher the duration, the greater the interest rate sensitivity of a bond. The duration of the Basic Claims fixed income portfolio as of March 31, 2026, was 9.21 years as per Addenda (8.11 years in the 2026 GRA). The fixed income portfolio duration increased from the 2026 GRA to the 2027 GRA to better

align with longer liabilities following the PIPP Case Reserving & Valuation Update (*EAR Attachment B – Appointed Actuary Report Mar 2026)*.

As part of the Asset Liability Management (ALM) strategy, asset dollar duration is to match liability dollar duration (which is the product of market value/present value and duration).

As per Section 9.4 of the Investment Policy Statement (*INV Appendix 1 – Investment Policy Manual*), the dollar duration is matched to the Basic Claims dollar duration to minimize the interest rate risk to MPI.

Within the financial model the provincial bond duration is adjusted so that the hedge ratio stays within 100% ± 5%. The duration of the other fixed income assets in Basic Claims is assumed to be static for the entire five-year forecast.

Figure FFI-13 provides the forecasted marketable and non-marketable bond duration, the claims duration, which is held static throughout the forecast, and the duration gap that is calculated by the model at each year end.

It is expected that the asset duration exceeds the liability duration. In April 2024, MPI incorporated real estate into the Basic Claims portfolio. Since real estate is classified as a return-seeking asset with no duration, the duration of the fixed income assets was extended to offset this. This adjustment ensured that the dollar duration of the fixed income assets continued to match that of the liabilities, thereby reducing the surplus's sensitivity to interest rate fluctuations.

Figure FFI- 13 Duration Assumption in Model

Line No.	Year Ending	Marketable and Non Marketable Bond Duration	Claims Duration with RA	Duration Gap
1	**Mar 26**	9.5	8.6	(0.9)
2	**Mar 27**	9.5	8.6	(0.8)
3	**Mar 28**	9.9	8.6	(1.3)
4	**Mar 29**	10.0	8.6	(1.4)
5	**Mar 30**	9.6	8.6	(1.0)
6	**Mar 31**	9.7	8.6	(1.0)

Please see *INV Appendix 1 – Investment Policy Manual* and specifically the Operational ALM Policy for more detailed information on the Operational ALM Policy of the Investment Committee Working Group.

FFI.3.2.7 Convexity

Convexity[2] measures the changes in bond prices that are not explained by duration.

- Convexity of the Basic Claims provincial bond portfolio was 2.35 as of March 31, 2026, as calculated by Bloomberg (1.33 in the 2026 GRA).
- Convexity of the Basic Claims corporate bond portfolio was 1.76 as of March 31, 2026, as provided by the corporate bond manager (1.57 in the 2026 GRA).
    - The increase in convexity reflects the longer duration of the portfolio. Extending duration and holding longer maturity bonds, which are more sensitive to interest rate changes, generally increases convexity.

[2] Convexity accounts for the non-linearity of changes in bond prices due to changes in interest rates (i.e., the amount of curvature in the price/interest rate graph). It is the second order derivative of the change in bond price (it measures the curvature of the price-yield relationship beyond what is captured by duration).

- Convexity for provincial bonds within RSR was 0.11, based on 100% FTSE Russell Short Term Provincial Bond Index as at March 31, 2026 (0.10 in the 2026 GRA).

FFI.3.3 Forecast Details

In 2026/27, the market values of provincial and corporate bonds in the Basic line of business changed by +0.54% and -3.51% year over year, respectively. The modest increase in provincial bonds and decline in corporate bonds reflect a transfer of assets from Basic Claims to RSR to reduce the surplus in Basic Claims. Both provincial and corporate bonds were sold from Basic Claims and transferred to RSR, whereby the proceeds were reallocated between provincial bonds and equities. As a result, provincial bonds in the Basic line of business did not experience a larger decrease.

In the subsequent forecast years, the combined value of provincial and corporate bonds is projected to grow by approximately 9% or $156M annually. This growth is primarily driven by two factors:

- The Basic Claims portfolio is expected to generate an average of $127M in annual cash flow from 2027/28 to 2030/31. The model assumes this cash will be reinvested in provincial and corporate bonds.
- Annual capital transfers from Extension to RSR are projected to contribute an average of $15M per year to provincial bonds in RSR.

FFI.4 Non-Marketable Bonds (MUSH) and Private Debt

MUSH bonds are bonds and debentures issued by Manitoba rural municipalities, school divisions, and health care facilities which are not traded in the fixed income

market. All MUSH bonds are managed by the Treasury Division of the Province of Manitoba.

Non-marketable bonds represented 11.0% of the Basic line of business at March 31, 2026. Purchases of MUSH bonds are forecasted to be $20 million annually for each of the next five years and the average annual principal payment is projected to be $37.7 million. As a result the outstanding principle will fall each year and MUSH bonds are forecasted to represent 6.0% of the Basic line of business portfolio by the end of 2030/31.

Private debt is privately held debt that is not traded publicly in the market. Private debt is investment grade and managed by an external pooled fund manager (Sun Life).

Private debt funding began in July 2019; the initial commitments from MPI have been fully drawn by Sun Life and the follow-on commitments were fully drawn at May 31, 2022. Private debt comprised 6.3% of the Basic line of business at March 31, 2026. Private debt has a target weight of 0% for Basic claims, 23% for RSR and 17% for EFB.

FFI.4.1 Summary Table

Figure FFI- 14 MUSH Summary Table

Figure FFI- 15 Private Debt Summary Table

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31
1	*(C$000s, except where noted)*					
2	***Market Value (Mid-duration)***	140,890	143,254	159,077	177,357	206,770
3	**Market Value (Long-duration)**	79,343	83,599	88,084	92,810	97,789
4	**Total Investment Income**	10,860	11,961	12,319	13,425	14,678
5	**End of Period Yield (Mid-duration)**	5.36%	5.36%	5.36%	5.36%	5.36%
6	**End of Period Yield (Long-duration)**	5.26%	5.26%	5.26%	5.26%	5.26%
7	**% of Portfolio (Mid & Long-duration)**	6.8%	6.6%	6.7%	6.9%	7.2%

FFI.4.2 Interest Income Assumption

MUSH bonds provide additional yield over a GoC 10-year bond and the yield on the existing portfolio was forecasted for the next five years. Over the five-year forecast horizon, $20M in annual MUSH purchases are forecasted ($5M per quarter). These purchases are projected to be comprised primarily of municipal issuances which have attractive yields relative to regular MUSH bonds.

Private debt is forecasted to have a yield of 5.36% (5.36% in the 2026 GRA) for the mid-duration fund and a yield of 5.26% (4.97% in the 2026 GRA) for the long-duration fund (1.24% spread over the FTSE Russell Canada All Corporate Bond Index and 0.72% spread over the FTSE Russell Canada Long Term Overall Bond Index at March 31, 2026). Expected yields for both mid and long-term durations are a function of the credit composition of the underlying assets. The yield earned on private debt does not impact the new money yield used for rate setting purposes as private debt is not held in the Basic claims portfolio.

FFI.4.3 MUSH Book Value and Yield Forecasting

MUSH bond market values and forecasted MUSH bond yields were calculated over the five-year forecast and entered into the financial model. The ending book values were based on the forecasted principal amortization of the existing MUSH holdings as of Q4 2025/26.

FFI.4.4 Private Debt Capital Returns

Private debt has an assumed duration of 5.59 years (5.65 years in the 2026 GRA) within the RSR portfolio and 13.97 years (14.44 years in the 2026 GRA) within the EFB portfolio (based upon actual durations at March 31, 2026). Changes in the forecasted GoC 10-year bond yield are not forecasted to impact private debt capital returns as exposure to the asset class is held within a pooled fund investment vehicle, underlying debt issuances are held-to-maturity, and no turnover of the pooled fund units is assumed to occur over the forecast period.

FFI.4.5 Forecast Details

In 2026/27, a projected capital transfer to the RSR portfolio, combined with an underweight allocation to private debt (mid-duration fund), results in a 13% increase in market value. In 2027/28, private debt becomes overweight, and the financial model projects asset sales, limiting the market value increase to 2%. Over the subsequent three fiscal years, capital transfers into RSR and asset growth (assets purchashed with Extension money) are expected to drive average year-over-year increases in market value of 11%, 11.5%, and 16.6%, respectively.

FFI.5 Canadian Equities

The Canadian equity portfolio includes publicly traded common stocks and preferred shares which are listed on a Canadian stock exchange. The Canadian

equity portfolio is managed by two active managers under contract with the Province of Manitoba (Foyston, Gordon & Payne for large cap equities and QV Investors for small cap equities) as well as a passive investment of $3.6M in the iShares S&P/TSX 60 exchange traded fund.

In the RSR portfolio, Canadian equities currently have a 12% target allocation, with a range of 6% to 18%. Whereas, in the EFB portfolio Canadian equities have a 14% target allocation, with a range of 8% to 20%. Canadian equities have a 0% weight in the Basic Claims portfolio.

FFI.5.1 Summary Table

Figure FFI- 16 Canadian Equity Summary Table

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31
1	*(C$000s, except where noted)*					
2	**Dividend Income**	4,109	4,074	4,741	5,146	5,745
3	**Realized Gains/(Losses) (P&L)**	11,229	11,480	8,127	7,978	7,986
4	**Total Investment Income**	**15,338**	**15,554**	**12,867**	**13,124**	**13,731**
5	**Forecasted Dividend Yield**	2.52%	2.55%	2.68%	2.68%	2.68%
6	**Ending Market Value**	169,007	174,350	189,257	205,891	228,807
7	**% of Portfolio**	5.2%	5.1%	5.2%	5.2%	5.4%

FFI.5.2 Total Return Assumption

The annual total return on Canadian equity investments is forecasted to be 6.6% (6.6% in the 2026 GRA) over the five-year forecast period. The projected return of 6.6% is based on Willis Towers Watson (WTW) capital market assumptions, expressed as 10-year geometric mean returns.

The model splits total return into dividend yield and capital return:
Total Return = Dividend Yield + Capital Return.

FFI.5.3 Dividend Yield

The dividend yield is used to calculate the dividend income in the model. Dividend income for each quarter is calculated using the quarterly market value of the Canadian equity portfolio multiplied by the quarterly dividend yield. All dividends are re-invested back into the Canadian equity portfolio.

The dividend yield for Canadian equities is based upon a forecast obtained from Bloomberg. Bloomberg only forecasts dividend yields three years into the future. The forecasted dividend yield for the S&P/TSX index for the next three fiscal years is as follows:

- 2026/27: 2.52%
- 2027/28: 2.55%
- 2028/29 and thereafter: 2.68%

Assumption: The Canadian equity dividend yield is therefore forecasted to be 2.52%, 2.55% and 2.68% in 2026/27, 2027/28 and 2028/29 respectively. 2.58% is used for 2029/30 and 2030/31. (3.1%, 3.2% and 3.3% in the 2026 GRA)

FFI.5.4 Capital Return

The capital return determines the increase in the market value of the Canadian equity portfolio over each period. Increases in market value from the capital return are unrealized gains, which flow through the Statement of Operations. The capital return for each forecasted year is determined by subtracting the dividend yield from the total rate of return of 6.6%.

FFI.5.5 Turnover

The turnover ratio indicates how often equity holdings are sold. Since equities are classified as fair value through profit or loss (FVTPL), there will be no realized gains upon sale. All equity investments are held through pooled funds; no units of the pooled funds are expected to be sold. However, there will be turnover of the holdings within the pooled funds and any gains realized as a result of this turnover will be distributed at the FYE of the fund. The forecasted turnover rate is based on manager turnover expectations for the holdings within the fund over the forecast period.

Assumption: The forecasted equity turnover ratio is a weighted average based on the turnover expectations of the managers and is projected to be 19% in 2026/27 and thereafter. There will be turnover of the holdings within the pooled funds and any gains realized as a result of this turnover will be distributed at the FYE of the fund.

FFI.5.6 Forecast Details

In 2026/27 and 2027/28, rebalancing and a projected transfer from the RSR to the Basic Claims portfolio led to the sale of Canadian equities, increasing realized gains to an average of $11.4 million in those years. Realized gains are then projected to decline to an average of $8.0 million in the remaining forecast years.

Looking ahead, in 2028/29 and 2029/30, capital transfers into the RSR portfolio are projected, resulting in a 9% year-over-year increase in ending market value in these years. In 2030/31, a transfer from Basic Claims to RSR, combined with the projected capital transfer from the Extension line of business, results in a higher increase of 11% in ending market value.

FFI.6 Global Equities and Global Low Volatility

Global equities are publicly traded stocks, which are listed on a recognized stock exchange in the U.S., Europe, or Asia (developed markets predominately with potential for limited emerging market exposure).

Global low volatility equities are publicly traded stocks in the same markets as global equities. Low volatility stocks have less volatility than other stocks in their parent index.

For 2026/27, the target weights for global equities are 0% for Basic Claims, 8% for RSR and 10% for EFB. For low volatility global equities, the target weights are the same, 0% for Basic Claims, 8% for RSR and 10% for EFB.

FFI.6.1 Summary Table

Figure FFI- 17 Global Equities Summary Table

Figure FFI- 18 Global Low Volatility Equities Summary Table

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31
1	*(C$000s, except where noted)*					
2	**Dividend Income**	1,853	1,981	2,426	2,638	2,952
3	**Realized Gains/(Losses) (P&L)**	15,456	11,293	7,780	6,813	6,543
4	**Total Investment Income**	**17,309**	**13,273**	**10,206**	**9,451**	**9,495**
5	**Forecasted Dividend Yield**	1.80%	1.92%	2.12%	2.12%	2.12%
6	**Ending Market Value**	109,065	112,500	122,311	133,273	148,424
7	**% of Portfolio**	3.3%	3.3%	3.3%	3.4%	3.5%

FFI.6.2 Total Return Assumption

For Global equities, the total return is foreasted to be 7.3%, which is based on WTW's capital market assumptions, expressed as 10-year geometric mean returns (compared to 6.6% in the 2026 GRA). Similarly, for Global Low Volatility equities, the forecasted total return from WTW's capital market assumptions is 6.8% (compared to 6.0% in the 2026 GRA).

FFI.6.3 Dividend Yield

The dividend yield is used to calculate the global equity/ low volatility global equity dividend income in the financial model. Dividend income for each quarter is calculated by using the quarterly market value of the equity portfolio multiplied by the quarterly dividend yield. All dividends are re-invested back into the global equity/ low volatility global equity portfolio.

The dividend yield for the global equity/ low volatility global equity portfolio is based upon a forecast from Bloomberg. Bloomberg only forecasts 3 years into the future.

For the global equity and low volatility global equity, the MSCI World Index forecasted dividend yield was used for 2026/27 and thereafter.

Figure FFI- 19 Bloomberg Expected Dividend Yield Forecast

Line No.	Index	MSCI World
1	**2026/27**	1.80%
2	**2027/28**	1.92%
3	**2028/29**	2.12%
4	**Thereafter**	2.12%

Assumption: The global equity and low volatility global equity dividend yield is forecasted to be 1.80% for 2026/27, 1.92% for 2027/28 and 2.12% in 2028/29 and thereafter (2.0%, 2.1% and 2.3% thereafter in the 2026 GRA).

FFI.6.4 Capital Return

The capital return determines the increase of the global equity/ low volatility global equity portfolio in market value over each quarter. All equities are classified as FVTPL so there will be no unrealized gains upon the sale of equities. The capital return for each year is determined by subtracting the dividend yield (section *FFI.6.3*) for each forecasted year from the total equity return (7.3% and 6.8%) for global equity and low volatility global equity respectively (section *FFI.6.2*).

FFI.6.5 Turnover Ratio

The turnover ratio is based on manager turnover expectations and forecasted to be 2% for global equities and 55% for low volatility global equities in 2026/27 and thereafter. Both asset classes will be held within pooled funds; no units of the pooled fund are expected to be sold. However, there will be turnover of the holdings within the pooled funds and any gains realized as a result of this turnover will be distributed at the FYE of the fund. The forecasted turnover rate is based on manager turnover expectations for the holdings within the fund over the forecast period.

Assumption: The turnover ratio for global equity/ low volatility global equities for 2026/27 and beyond is forecasted to be 2% and 55% respectively.

FFI.6.6 Forecast Details

Similar to Canadian equities, in 2026/27 and 2027/28, rebalancing and a transfer from the RSR portfolio to the Basic Claims portfolio resulted in higher realized gains.

From 2028/29 to 2030/31, projected capital transfers are expected to drive increases in the market value of global equities.

FFI.7 Real Estate

Assets in the real estate portfolio are separated into two categories, the Real Estate Pooled Funds and Investment Properties, since they have different accounting treatments. Investment Properties (e.g., parking lots adjacent to Cityplace) are discussed in section *FFI.7.3*. The temporary investment into a real estate exchange-traded fund (ETF) is being treated as a Pooled Fund investment.

As of March 31, 2026, approximately $264.3M of assets within the Basic Line of business were invested in diversified Canadian real estate pooled funds (total portfolio), which are managed by TD Asset Management, Harrison Street and Crestpoint. The investment in the iShares S&P/TSX CAPPED REIT was valued at $66.4M.

Investment Property includes an investment in the parking lots surrounding Cityplace with an appraised value of approximately $21.9M . The parking lots have a book value of $12.0 million. The CityPlace building was reclassified from an investment asset to a corporate asset on March 31, 2022. Of the $21.9M, $9.4M is within the Basic Line of business portfolio.

As of March 31, 2026, the real estate portfolio had a weight of 10.5% within the Basic line of business. Currently, there are three components to the real estate

portfolio; first are holdings in pooled real estate funds managed by TD Asset Management, Harrison Street and Crestpoint which have a weight of 8.3%. The second is a temporary investment in the iShares S&P/TSX CAPPED REIT ETF which the corporation is using while waiting for Crestpoint to call MPI's capital committments. At 2025/26 FYE the investment in the real estate ETF had a total weight of 2.1%. The third component is the investment portion of Cityplace (MPI-owned parking lots adjacent to CityPlace), which have a weight of 0.2%.

As a result of the 2022 ALM study there have been major changes to real estate allocation within the IPS. For the first time, real estate was added to the Basic Claims portfolio. Target weights for real estate are 10% for Basic Claims, 16% for RSR (up from 10%), and 10% for EFB (down from 15%).

The income earned on real estate assets generally grows with inflation as some rental rates are directly indexed to increases in CPI while other rental rates are adjusted to reflect changes in inflation when leases expire. This provides the Basic line of business with some added protection against inflation.

FFI.7.1 Real Estate Summary Table

Figure FFI- 20 Real Estate Summary Table

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31

10	**Investment Property Income**	382	389	397	405	413

FFI.7.2 Real Estate Pooled Fund Return Assumption

The total return on MPI's Real Estate portfolio is 5.9%, based on WTW's capital market assumptions, expressed as 10-year geometric mean returns. In the 2026 GRA, forecasted pooled fund returns were 6.4% for 2025/26, 5.9% for 2026/27, and 6.0% thereafter, based on a Canadian Consumer Price Index (CPI) forecast plus a 4% spread.

FFI.7.3 Cityplace Return Assumption

The return forecast is based on projections provided by the property manager less capital improvements and associated depreciation.

FFI.7.4 Forecast Details

In 2026/27, a projected capital transfer to the RSR portfolio, combined with an underweight real estate allocation, results in a 14% increase in the market value of pooled real estate, driving higher unrealized gains in that year. In 2027/28, the real estate allocation becomes overweight and the financial model projects asset sales, limiting the increase in market value to 4%. Over the subsequent three fiscal years, capital transfers into the RSR and asset growth are expected to drive average year-over-year increases in market value of approximately 8%.

FFI.8 Infrastructure

Infrastructure is defined as an essential service with inelastic demand and high barriers to entry that often operate in a monopolistic and regulated environment. The assets typically have a long life and provide income that is sensitive to inflation rates. Infrastructure investment contracts are held by the Province of Manitoba.

The target allocations for infrastructure are 0% for Basic claims, 16% for RSR, and 23% for EFB. Like real estate, infrastructure is privately held and is not a liquid asset class.

FFI.8.1 Summary Table

Figure FFI- 21 Infrastructure Summary Table

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31

6	**% of Portfolio**	5.7%	5.5%	5.5%	5.6%	5.7%

FFI.8.2 Return Assumption

The total return on MPI's Infrastructure portfolio is 6.3%, based on WTW's capital market assumptions, expressed as 10-year geometric mean returns for the five-year forecast period. In the 2026 GRA, forecasted pooled fund returns were 6.2%, based on the portfolio's blended benchmark of 90% x [5-year break-even inflation rate (BEIR)[3]] + 4% + 10% x [DJBGINAT[4]].

The total infrastructure return is comprised of two components: yield and capital return. Capital return is projected to represent 80% of the total return on infrastructure and yield the remaining 20%, which is based on historical returns and unchanged from the assumption of the previous year.

[3] The BEIR is calculated as the difference in the yield of a nominal government bond and a real return bond with the same term. The 5 year BEIR can be found on Bloomberg under CDGGBE05.

[4] DJBGINAT stands for Dow Jones Brookfield Global Infrastructure North American Listed Index. This is the benchmark for MPI's current liquid Infrastructure Investment, ZGI.

FFI.8.3 Forecast Details

In 2026/27 a projected capital transfer to the RSR portfolio, together with an underweight position in infrastructure, leads to an 11% increase in the asset's market value, resulting in higher unrealized gains for the year. In 2027/28, the allocation shifts to an overweight position, and the model anticipates asset sales, moderating the increase in market value to 3%. Over the following three fiscal years, a combination of capital transfers and asset growth is expected to drive average annual increases in market value of approximately 8%.

FFI.9 Commercial Mortgages

The commercial mortgages portfolio includes predominantly first mortgages on income producing office, retail and multi-family residential properties located in major urban areas in Canada.

Commercial Mortgages has a target allocation of 5% within the Basic Claims portfolio. There is no allocation to commercial mortgages within the RSR or EFB portfolios.

For the forecast, MPI uses the actual yield of the TDAM Mortgage fund at March 31, 2026 which was 5.02%. This rate is applied throughout the five year forecast. In the 2026 GRA the actual yield of the TDAM mortgage fund at March 31, 2025 was 5.09%.

FFI.9.2 Forecast Details

Commercial Mortgages reinvests its distributions and both investment income and market value are growing at approximately 5% annually.

No transfers to or from other investments or portfolios are projected for this asset class.

FFI.10 Other Investment Income Impacts

This section discusses the other investment income impacts, including: investment management fees; pension expense; bond amortization; venture capital; and line of business allocations.

FFI.10.1 Investment Portfolio Performance in 2025/26

Performance is presented for the Basic Claims, RSR and EFB portfolios over the 12 months ended at March 31, 2026. See *INV Appendices 6, 7, & 8* for MPI's reports on the performance of the Basic Claims, RSR & EFB portfolios to March 31, 2026.

Commentary on the performance of each portfolio is provided in the INV Chapter provided by WTW.

FFI.10.2 Investment Management Fees

In order to forecast fees for the Basic line of business, investment management fees were split into four categories by type of manager. The first category includes the fees paid to the Province of Manitoba's Department of Finance. The second category includes the fees paid to the managers of corporate bonds, commercial mortgages and private debt. The third category includes fees paid to equity managers. The fourth category includes fees paid to all other managers (real estate and infrastructure managers).

Figure FFI- 23 Investment Management Fees

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31
1	*(C$000s)*					
2	**Fees to the Department of Finance**	1337	1383	1470	1566	1677

4	**Fees to the Equity Managers**	1192	1180	1311	1427	1596
5	**Fees to the Alternative Assets**	3691	4191	4344	4660	5008
6		**6,936**	**7,509**	**7,943**	**8,536**	**9,230**

FFI.10.2.1 Department of Finance

The Department of Finance charges a flat fee of 0.04% of the total carrying value of the fund investments as of March 31 each year.[5]

FFI.10.2.2 Fixed Income Manager (Addenda)

Addenda Capital manages the "completion portfolio" in order to ensure the dollar duration of the total fixed income portfolio matches the dollar duration of the liabiliites. The portfolio is composed of nominal provincial and federal bonds, as well as real return bonds.

The investment fees for the completion portfolio are based on the assets under management. For the first $200 million, the fee is 0.07%; for amounts greater than $200 million (on the excess) the fee is 0.05%. The weighted average investment fee is forecasted to be 0.06%.

The corporate bond portfolio is also managed by Addenda Capital. The investment management fees are based on assets under management. For the first $100 million the fee is 0.20%, on the next $100 million the fee is 0.14%, on the next $200 million the fee is 0.10%; for amounts greater than $400 million (on the excess) the fee is 0.08%. The weighted average investment fee is forecasted to be 0.12%.

FFI.10.2.3 Alternative Assets

The investment management fees are based on assets under management for public equities, infrastructure, commercial mortgages, real estate, and private debt.

[5] In May 2025 MPI reached a new agreement with the Department of Finance (DoF) which states that MPI will pay the DoF fees of .05% for the assets managed and .02% on all remaining assets.

FFI.10.2.4 Canadian Equities

A weighted average fee of 0.39% was used based on March 31, 2026, relative Canadian Equity manager weights and associated management fees charged by Foyston, Gordon & Payne, and QV Investors.

FFI.10.2.5 Global Equities/Global Low Volatility

MPI's global equities portfolio is invested in the iShares MSCI World ETF, with a forecasted management fee of 0.24%. For the global low-volatility equities portfolio, the forecasted management fee for Acadian is 0.31%.

FFI.10.2.6 Real Estate Pooled Fund

The investment management fees for the real estate portfolio managers are based on assets under management.

The sliding fee schedule for the real estate pooled fund managed by Crestpoint was used to forecast their investment fees. For the first $10 million the fee is 1.35%, for the next $10 million the fee is 1.15%, for the next $15 million the fee is 1.00%, on the balance over $35 million the fee is 0.85%.

The sliding fee schedule for the real estate pooled fund managed by Harrison Street was used to forecast their investment fees. For the first $25 million the fee is 1.10%, for the next $25 million the fee is 1.02%, for the next $25 million the fee is 0.93%, on balance over the $75 million the fee is 0.88%.

The sliding fee schedule for the real estate pooled fund managed by TD Asset Management was used to forecast investment fees. For the first $10 million the fee is 1.10%, for the next $25 million the fee is 1.00%, for the next $65 million the fee is 0.85%, on the balance over $100 million the fee is 0.65%.

The weighted average investment fees (existing and new allocation) for the real estate asset class are forecasted to be 0.87%.

FFI.10.2.7 Private Debt Manager

The private debt portfolio is managed by an external manager (SLC Asset Management, a subsidiary of Sun Life). The weighted average investment management fee is based on assets under management and is forecasted to be 0.37%. Fees are calculated based on invested capital.

FFI.10.2.8 Infrastructure

The infrastructure portfolio consists of assets held in funds and through direct investment. The weighted average investment fee for the infrastructure asset class is forecasted to be 0.64%.

FFI.10.2.9 Commercial Mortgages

The commercial mortgage portfolio is managed by TDAM. A sliding fee schedule will be applied to the assets under management ($114.1 million as of March 31, 2026). The investment fees are based on the assets under management. The fee is 0.6% for the first $10 million, 0.4% for the next $25 million, 0.3% for the next $65 million and 0.2% for any amount above $100 million. The weighted average investment fee is forecasted to be 0.34%.

FFI.10.3 Pension Expense

The pension expense line, in investment income, is calculated by applying the pension discount rate to the opening pension liability. The pension discount rate has been used in the March 31, 2026 actuarial analysis of the provision for EFB. The pension discount rate was determined by applying the pension liability cash flows to

the Canadian Institute of Actuaries Method Accounting Discount Rate Curve published by Fiera Capital; the rate was set at 5.11% (4.68% at March 31, 2025).

For 2019/20 and thereafter, investment assets and the underlying income have been segregated and are calculated independently for each investment portfolio. Investment assets on the Statement of Financial Position and investment income on the Income Statement for the Basic financial statements will include both Basic claims and RSR portfolio assets and investment income as well as the portion of the EFB portfolio assets and investment income relating to Basic.

The figure below represents the forecasted investment income earned on the EFB investment asset portfolio, net of the pension expense (or interest cost) requirement (which is not additive when compared with Basic line of business). Investment income is accounted for in the "Provision for EFB" within the Statement of Financial Position.

Figure FFI- 24 Investment Income on Employee Future Benefits

Line No.	Investment Summary During Period	2026/27	2027/28	2028/29	2029/30	2030/31
1	*(C$000s)*

8	**Investment Income**	**18,965**	**20,839**	**22,799**	**24,845**	**27,004**

FFI.10.4 Amortization of Bond Premium/Discount

The financial model calculates the amortization of the bond premium/discount for provincial and corporate bonds. The premium or discount is calculated as the difference between the face value of the bond and the actual purchase price. A bond

purchased at a higher (lower) price than its face value will have a premium (discount) that is amortized over the remaining time to maturity of the bond. The amortization of this premium (discount) effectively reduces (increases) the interest income received based on the coupon rate of the bond.

FFI.10.5 Allocation of Investment Income to Lines of Business

The allocation of investment income throughout the forecast period has been reviewed and approved by the Board of Directors. The 2026/27 and subsequent forecast period applies investment income based on the direct proportion of investment assets available to each line of business with the exception of EFB which uses the payroll ratio (with 69.3% allocated to Basic Claims). No changes have been made to the allocation methodology since March 1, 2019. The current Investment Income Allocation Policy is provided in *INV Appendix 3 – Investment Income Allocation Policy*.

FFI.10.6 Impaired Securities

As of March 31, 2026, there were no impaired securities due to the fact that all investments were reclassified as FVTPL or designated as FVTPL as of April 1, 2023 and as a result are reported at fair market value.

FFI.11 Comparison of Forecast

This section compares the forecasts of the current and previous years. *Figure FFI-25* provides detailed investment income information from the 2027 GRA forecast. *Figure FFI-26* provides information from the 2026 GRA and *Figure FFI-27* compares the difference between *Figure FFI-25* and *Figure FFI-26*.

FFI.11.1 Explanation of Major Differences between 2027 GRA and 2026 GRA Forecasted Years (2026/27 to 2030/31)

Long Term Bond Income

- Long-term bond income is projected to be, on average, $10.3 million higher over the five-year period compared to last year's forecast. This increase is driven by two factors: (1) higher yields on the marketable portfolio over the past year (the GCAN 10-year rate was 3.47% as of March 31, 2026, compared to 2.97% as of March 31, 2025), and (2) an increase in the fixed income portfolio duration (+1.1 years) to better align with longer liability duration, resulting in higher yields.

Marketable Bonds Losses

- There was a $57.3 million loss on marketable bonds in 2025/26, driven by increasing interest rates.

Equities & Alternatives

- Capital market assumptions for equities and alternatives are based on WTW, replacing the internal assumptions used by MPI last year. See *Figure FFI-4*. The capital market assumptions from WTW are higher than last year's resulting in increased projected investment income. Specifically, global equities, global low-volatility equities, and infrastructure assumptions are higher this year by 0.7%, 0.8% and 0.1% respectively.
    - WTW's assumptions for global equities and global low-volatility equities are higher than MPI internal assumptions due to differences in methodology. In last year's GRA, the internal assumption for global equities had the same return as Canadian equities and global low-volatility returned 0.6% lower than global equities. These are the same assumptions used by Mercer in the 2022 ALM study. In contrast, WTW uses asset specific return assumptions based on 10-year geometric mean returns.

- On average, equity investment income is $5.6 million higher compared to last year's forecast, while alternatives are $1.4 million higher.

Bond Amortization

Due to higher interest rates in 2025/26, bond amortization is positive in the 2027 GRA. Over the next five years, bond amortization is projected to be, on average, $2.8 million higher in the 2027 GRA.

FFI.11.2 Explanation of Major Differences in 2025/26 Actuals vs. Forecast

In the 2026 GRA, total Basic investment income for 2025/26 was forecast at $121.6 million. Actual investment income was $102.7 million, or $18.9 million lower than forecast. This variance was primarily due to lower-than-expected fixed income returns (a shortfall of $57.3 million, driven by rising interest rates), partially offset by higher-than-expected equity income of $47.7 million.

See the previous figure for the detailed breakdown – highlights are provided below.

- Dividends from equities were $6.6 million higher than forecasted.
- Realized gains on equities were $9.7 million higher than forecasted.
- Unrealized gains on equities were $31.3 million higher than forecasted.
- Total capital gains/losses for marketable bonds were $57.3 million lower than forecasted due to increasing interest rates.
- Long-term Interest income was $2.4 million higher than forecasted.
- Private debt investment income was $9.2 million lower than expected.
- Gains from the pooled real estate fund were $7.9 million lower than forecasted.
- Infrastructure investment income was $5.5 million higher than forecasted.

- Bond amortization was $1.0 million higher than forecasted.

FFI.12 Changes to the Investment Income Model

For 2026/27, no changes were made to the asset classes or target weights in the model.

Compared with the previous year, the only change was the adoption of WTW capital market assumptions for equities, real estate and infrastructure, replacing the internally developed assumptions previously used (see *Figure FFI-4*).

In addition, the total return assumption for real estate used in the financial model (5.90%) differs from the return used in the New Money Yield (NMY) calculation (3.74%). The NMY calculation uses the projected return based on the 10-year geometric mean return of the MSCI/REALPAC Canada Property Index (QPF), which is the benchmark for the portfolio. By contrast, the financial model uses WTW's 10-year geometric mean capital market return assumption for real estate.

FFI.13 Interest Rate Forecasts and CPI Forecast Detail

This section provides details on the interest rate forecasts and the CPI forecast. For the naïve interest rate forecast used in the 2027 rate application, see *Figure FFI-3* for the 91-Day T-Bill rate, 10-year GoC bond yield, the marketable bond yield and MUSH yield.

FFI.13.1 Interest Rate Forecast

The naïve interest rate forecast is based on the March 31, 2026 GoC 10-year bond yield, which was 3.47%. This interest rate is used throughout the entire five-year

forecast for the 2027 GRA. Additionally, the 90-day T-Bill yield on March 31, 2026 was 2.31%. This yield was used over the forecast period as well.

FFI.13.2 Canadian CPI Forecast

The Canadian CPI forecast is used in the calculation of real return bond returns.

15 Bloomberg, April 1, 2026
16 IHS Markit Global Insight, "Canadian Forecast and Analysis", March 2026

Assumption: Canadian CPI is forecasted to be 2.52% in 2026/27, 2.2% in 2027/28, and 2.0% in 2028/29 and thereafter.

FFI.14 Investment Income Summary by Portfolio

The investment income and asset allocation for Basic Claims, RSR, and EFB for 2026/27 to 2030/31 are covered in this section.

Within the Basic Claims, RSR and EFB portfolios, all asset classes are within the approved minimum and maximum weights.

Appendix 11: Top 7 Corporate Risk Profiles (Redacted)

Enterprise Risk Management Update

Manitoba Public Insurance (MPI) continues to incorporate the principles of Enterprise Risk Management (ERM) into its business practices. MPI has a dedicated ERM function that works closely with all business areas to identify, qualify, and monitor the risks that it faces. The ERM program at MPI is now well-established and oversight is provided by: 1) a committee referred to as the Executive Risk Management Committee (ERM Committee), which is comprised of all members of the executive management team, and 2) a dedicated Risk Committee of the Board of Directors of MPI. Please see below for information relating to MPI's Risk Appetite Statement (RAS), ERM Policy, and top corporate risks.

RMF.1 Risk Appetite Statement

The RAS is a key component of MPI's ERM framework. It articulates the level and type of risks the Corporation will accept while conducting its mission and carrying out its strategic plan. See *Appendix 2- Risk Appetite Statement (as of March 25, 2026).*

The RAS outlines the key categories of risks to which MPI is exposed and provides an outline of MPI's approach to managing these risks. The eight risk categories are:

- Strategy Risk
- Earnings Risk
- Solvency Risk
- Technology Risk
- People Risk
- Legal & Compliance Risk
- Operational Risk
- Reputation Risk

Consistent with guidance from the Committee of Sponsoring Organizations of the Treadway Commission, the purpose of setting and reviewing risk appetite is:

- to provide effective communication throughout the organization to drive the implementation of ERM;
- to change discussions about risk so that they involve questioning whether risks are properly identified and managed within the risk appetite; and,
- to provide a basis for further discussion of risk appetite as strategies and objectives change.

MPI's overall risk appetite has consistently been categorized as Low, with Very Low and Moderate risk appetites specified in certain areas.

The RAS includes:

- the objectives of the RAS, including positively impacting the defined risk culture of MPI;
- MPI's overall risk appetite, including category-specific appetites and definitions;
- expectations for communication and implementation of the risk appetite; and,
- the annual review and Board approval process of the RAS.

The MPI Board of Directors sets the risk appetite each year to ensure alignment with MPI's statutory requirements, strategic business objectives, and capital planning.

Following a structured review led by the ERM Committee, five risk appetite categories (Strategy, Technology, People, Legal & Compliance, and Operational)

were recently updated. These changes were approved by the Board of Directors on March 25, 2026.

The approved materials are included as: *Appendix 1: Risk Appetite Statement – Summary of Changes (as of March 25, 2026),* *Appendix 2: Risk Appetite Statement (as of March 25, 2026)* and *Appendix 3: Risk Appetite Statement - Blacklined (as of March 25, 2026).*

Since March approval, the ERM Committee has conducted further review and has identified and proposed refinements to the remaining risk appetite categories - Earnings, Solvency and Reputation risk.

These proposed updates are scheduled for consideration by the Board of Directors on June 24, 2026. Subject to approval, the updated materials will be reflected in Appendix 4: *Risk Appetite Statement – Summary of Changes (as of June 24, 2026),* *Appendix 5: Risk Appetite Statement (as of June 24, 2026)*, and *Appendix 6: Risk Appetite Statement – Blacklined (as of June 24, 2026).*

Once approved, the updated appendices will be filed as exhibits with the Public Utilities Board (pre-hearing conference).

RMF.2 Enterprise Risk Management Policy

MPI's ERM Policy outlines the key components of the ERM framework, including the governance structure, roles and responsibilities, risk management processes and its overall risk management principles and culture. It provides guidance for the effective management of potential opportunities and adverse consequences associated within the MPI business environment.

The ERM Policy was originally approved by the Board of Directors in October 2019 and is reviewed annually. The current version, approved March 25, 2026, is included as *Appendix 7: Enterprise Risk Management Policy*.

The most recent update included the adoption of a formal escalation process. Guidance on this was added as "Appendix 2 – Risk Escalation Process". This replaced the previous Appendix 2 ("Corporate Risk Reporting Requirements"), which contained outdated reporting requirements that no longer align with current reporting practices to the ERM Committee and the Risk Committee of the Board.

The new appendix introduces a structured escalation framework based on four key stages: 1) identify the risk, 2) analyze and evaluate the risk, 3) escalate the risk, and 4) implement risk treatment actions.

Additional non-material edits were made to enhance overall readability – refer to *Appendix 8: Enterprise Risk Management Policy - Blacklined* for a marked-up version.

RMF.3 Top Corporate Risks

The Corporation updates its top corporate risks in the first quarter of each fiscal year. These risks are closely monitored for any changes that could impact MPI's stated business objectives.

Following an established process, risks contained in MPI's ERM Risk Taxonomy are assessed at the directorate, divisional, and corporate levels. All corporate level risks assessed as "Critical" or "High" during the risk assessment process are brought forward to the ERM Committee for review and discussion. The results of this exercise lead to the identification of the top risks deemed to require priority monitoring throughout the current risk monitoring cycle. This list of risks is subject to change if new critical risks emerge.

- Please refer to *Appendix 9 (Redacted)* for detailed information on MPI's Top Corporate Risks for fiscal 2026/27.

- Please refer to *Appendix 10 – Comparison of Top Corporate Risks (Redacted)* for a comparison of the Top Risks from 2026/27 (this year) and 2025/26 (last year). This appendix also provides the rationales for change(s) in MPI's top corporate risks during the past eight (8) quarters.

- Please refer to *Appendix 11 – Top 7 Corporate Risk Profiles (Redacted)*, which includes risk profiles for each of the Top Risks for 2026/27. Each risk profile provides a detailed description of the risk MPI is facing and the potential consequences should the risk materialize. It also lists key controls that are in place to mitigate the risk, as well as high level risk treatments designed to reduce its residual risk level.

Appendix 1: Risk Appetite Statement – Summary of changes as of March 25, 2026

1. Strategy Risk

1.1. Two (2) risk appetite statements have been updated from "Very Low" to "Low".

Risk Appetite Statement	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Ineffective or inefficient decision making and execution.	**Very Low**	**Low**	Multi-year strategy addresses governance processes and change from Very Low to Low to allow flexibility for execution and trade-offs.
Ensuring companies that are not Manitoba owned in the Special Risk Extension ("SRE") Line of Business.	**Very Low**	**Low**	The risk is deviating from MPI's mandate to exclusively support the Manitoba market. A very low risk appetite suggests intensive enforcement that MPI cannot afford currently.

1.2. One (1) risk appetite statement has been updated from "Low" to "Moderate".

Risk Appetite Statement	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Inability to evolve and adapt.	**Low**	**Moderate**	MPI wants to be a fast follower in some cases. For inability to evolve and adapt - would like a measured and deliberate approach.

2. Technology Risk

2.1 One (1) risk appetite statement has been removed and replaced with a new risk appetite statement to set focus on infrastructure adaptability.

Prior Risk Appetite Statement (Removed)	Updated Risk Appetite Statement (New)	Risk Appetite Level
Unadaptable or nonagile technology infrastructure and performance (e.g., stability, reliability, capability, capacity, and duplicative systems) to respond to evolving technology legislation.	Lack of adaptability of technology systems particularly in terms of stability, reliability, capability, performance, and capacity when responding to evolving business requirements and strategic priorities.	**Moderate**

2.2 Three (3) risk appetite statements have been updated to reflect changes in wording for improved clarity.

Prior Risk Appetite Statement	Updated Risk Appetite Statement	Risk Appetite Level
Non-compliance with technology laws, regulations, policies, or procedures.	Non-compliance with applicable technology directives, policies, standards or procedures	No Change - **Very Low**
Non-availability of systems which support its critical business functions	Unplanned downtime impacting systems which support critical business functions	No Change - **Very Low**
Weaknesses in the information / data management process	Ineffective information/data management process	No Change - **Very Low**

2.3. One (1) risk appetite statement has been updated from "Low" to "Moderate".

Risk Appetite Statement	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Misalignment of information systems, data and practices	**Low**	**Moderate**	Technical architecture is aligned to business architecture. Prioritize system integration, data harmonization, and alignment of technology and business architectures to reduce fragmentation and ensure consistent, reliable outcomes across business units.

2.4. One (1) risk appetite statement has been divided into two (2) separate statements.

Prior Risk Appetite Statement	Updated Risk Appetite Statement	Rationale
Inability to meet user demands and support a mobile workforce.	1. Inability to meet internal user demands	To ensure that infrastructure, applications, and support services are optimized for mobility, scalability, and responsiveness - enabling seamless access, performance, and security for users regardless of location or device. Risk Appetite Level for both: No change – **Moderate**.
	2. Inability to support the mobile workforce	

3. People Risk

3.1 One (1) risk appetite statement has been updated from "Low" to "Moderate".

Risk Appetite Statement (RAS)	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Ineffective or inefficient enterprise workforce plan execution	**Low**	**Moderate**	MPI's workforce planning maturity is very low, and the Corporation is years away from an enterprise data driven approach. MPI is taking steps to improve resource planning. The Moderate description is better suited for a risk appetite at this time.

3.2 One (1) risk appetite statement's wording has been updated to reflect Manitoba-based hiring.

Prior Risk Appetite Statement (RAS)	Updated Risk Appetite Statement (RAS)	Risk Appetite Level
Stepping outside historical channels to acquire talent.	Acquire talent outside of Manitoba.	No change - **Low**

4. Legal and Compliance Risk

4.1 1 risk appetite statement has been updated from "Low" to "Moderate".

Risk Appetite Statement (RAS)	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Ineffective or inefficient interagency coordination.	**Low**	**Moderate**	This is important for MPI's success but not a driver of meeting MPI's mission. This is a shoulder check that is at the moderate risk appetite level.

5. Operational Risk

5.1 All 11 risk appetite statements for this risk category remain unchanged.

Manitoba Public Insurance

Risk Appetite Statement

Approved by the Board of Directors of Manitoba Public Insurance on March 25, 2026

Manitoba Public Insurance

1. INTRODUCTION

The business activities undertaken by MPI in fulfilling its mission are exposed to a variety of risks.

This risk appetite statement ("RAS") considers the most significant risks that MPI is exposed to and provides an outline of the approach to managing these risks.

MPI's risk appetite is set annually by the Board of Directors ("Board") with the goal of aligning risk-taking with the Corporation's statutory requirements, strategic business objectives and capital planning.

The Risk Committee of the Board (RCB) and the Executive Risk Management Committee (ERMC) monitor MPI's adherence to the RAS and make necessary updates to capture changes in MPI's strategic initiatives, operating environment, and risk profile.

The purpose of the RAS is to clearly state the general principles for MPI's risk-taking, to raise risk awareness across the organization, and to guide the staff regarding acceptable and unacceptable behaviour.

The RAS is implemented through MPI's policies, standards, procedures, monitoring metrics, tolerances and limit system and internal controls. The RAS is thereby embedded in the MPI's core processes and governs the business activities of MPI in a holistic way.

2. OBJECTIVES

The objectives of the RAS are the following:

- To provide a clear articulation of MPI's risk-taking, risk mitigation and risk avoidance, and to define risk-taking at the aggregate level. The RAS creates a foundation for effective communication of risk among internal and external stakeholders.
- To increase understanding of MPI's material risk exposures and raise risk awareness across the organization.
- To positively impact the defined risk culture of MPI.
- To support the Board and MPI Executive and the senior management in planning, formulating, and executing strategic business decisions to achieve the long-term objectives of MPI.
- To provide means for the Board of Directors and MPI Executive and senior management to engage in discussions on risk-taking, risk management, and business strategy, and their interlinkages.
- To provide tools for the Board of Directors and MPI Executive and senior management to continuously monitor and align MPI's actual risk profile with the risk appetite.

Manitoba Public Insurance

3. GENERAL STATEMENT OF APPETITE

MPI will act in accordance with its risk appetite statement to achieve its strategic goals and objectives in pursuit of its mission. MPI must employ sound risk management principles, including identifying, measuring, monitoring, and controlling risk; transparent decision making; effective communication; and prioritization of risk. MPI manages eight interrelated categories of risk to effectively reflect its responsibilities as the trusted auto insurance, motor vehicle registrar, and driving licensing services provider for every Manitoban. Where MPI has discretion, the Corporation is willing to assume certain risks to remain agile in meeting the business challenges of its evolving business landscape. Strong risk management practices will enable the Corporation to operate proactively while controlling risk.

4. THE RISK MANAGEMENT FRAMEWORK

A “three-lines of defence” governance model is used to allocate risk management responsibilities to particular areas of MPI. The first line of defence is made up of MPI’s business units or functions that perform the day-to-day operations. They are the primary risk-takers and are primarily responsible for identifying, assessing, controlling, and mitigating risks, and ensuring that the activities within their domains are consistent with MPI’s risk appetite and policies. The second line of defence are MPI’s Risk Management functional units, primarily, Enterprise Risk Management (ERM) function and the Compliance function. They are responsible for maintaining the risk management framework and performing oversight on risk management activities performed by the first line of defence. The third line of defence is provided by MPI’s Internal Audit function. It provides the Board and its Committees, and MPI Executive management with independent and objective assurance on the overall effectiveness of the risk governance framework (design and implementation), including the way the first and second lines of defence achieve risk management and control objectives.

Manitoba Public Insurance

5. OVERVIEW

About MPI's Risk Appetite

- Risk appetite is an integral part of MPI's Enterprise Risk Management Framework.
- Risk appetite articulates the level and type of risk the corporation will accept while conducting its mission and carrying out its strategic plan.
- Where MPI has discretion, the corporation is willing to assume certain risks to remain agile in meeting the challenges of an evolving auto insurance and driver licensing landscape.
- MPI has established risk appetite in eight categories.
- MPI has an overall Low risk appetite, and Very Low or Moderate risk appetites in specific areas.
- MPI will align its strategic decisions with its risk appetite statement.

Risk Appetite Definitions

Very Low Appetite

- Inflexible approach with very low possibility of failure.
- No willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will not accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Avoid trading off this objective against achievement of other objectives.

Low Appetite

- Cautious and intentionally conservative.
- Limited willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Prefer to avoid trading off this objective against achievement of other objectives.

Moderate Appetite

- Measured and deliberative approach.
- A degree of willingness to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Will accept selected risks but must be soundly justified.
- Willing to trade off this objective against achievement of other objectives in certain circumstances.

High Appetite

- Flexible approach with higher possibility of failure.
- Willing to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Willing to take risks when long-term benefits are foreseeable and outweigh risks.
- Willing to trade off this objective against achievement of other objectives.

Manitoba Public Insurance

Enterprise Risk Appetite

Strategy Risk

Risk that corporate strategy selection, prioritization, modification, and implementation jeopardize achievement of MPI's goals and objectives.

Low Risk Appetite

- Ineffective or inefficient decision making and execution.
- Insuring companies that are not Manitoba owned in the Special Risk Extension ("SRE") Line of Business.
- Executing and achieving of strategy and outcomes not in alignment with MPI's goals and objectives.
- Offering Basic products and providing services outside of MPI's legislated mandate.
- Non-responsiveness to changes in the internal and external operating environment.
- Exposure to non-auto products and services.

Moderate Risk Appetite

- Inability to evolve and adapt.

Earnings Risk

Risk that MPI's activities fail in achieving the desirable profitability. The risk arises from the uncertainties associated with net insurance cash flows, unexpected changes in the investment income, and from ineffective and inefficient use of resources.

Low Risk Appetite

- In the Basic Line of Business, deviating from the fiscal year's target value in more than the following percentage points: for the attritional loss ratio: +5, for expense loss ratio: +2, for catastrophe loss ratio: +4, for the prior year loss ratio: -5 to +2, and for the combined ratio: +10.
- In the Extension Line of Business, deviating from the fiscal year's target value in more than the following percentage points: for the attritional loss ratio: +10, for expense loss ratio: +5, for the prior year loss ratio: -5 to +2, and for the combined ratio: +15.
- In the SRE Line of Business, failing to avoid net losses.
- Net impact of changes in interest rates on the Basic Line of Business resulting in a variance relative to the fiscal year's budgeted net income after non-recurring items of more than +/- 1% of the current market value of the Basic Claims investment portfolio.
- Deviating by more than +/- 10% from the fiscal year's budgeted corporate net income.
- Deviating by more than +/- 10 % from the fiscal year's budgeted expenses.

Moderate Risk Appetite

- Exposure to interest rates for non-Basic portfolios.

Manitoba Public Insurance

Solvency Risk

Risk that MPI is unable to absorb losses generated by all types of risks with the available capital.

Very Low Risk Appetite

- Falling in the Basic line of business below a 35% Minimum Capital Test (MCT) ratio based on 1-in-10 year stress testing.
- Falling in the Extension line of business below a 100% MCT ratio.
- Falling in the SRE line of business below a 200% MCT ratio.
- Purchasing fixed income securities with a credit rating below BBB-.
- Failing in having enough cash and cash equivalents to meet our obligations.

Low Risk Appetite

- Contracting with reinsurers having financial ratings below A-.
- Concentrating the exposure to a reinsurer within a reinsurance layer to more than 25%.

Moderate Risk Appetite

- Exposure to changes in unhedged foreign currency.

Technology Risk

Risk that information technology processing, security, stability, capacity, and performance jeopardize core MPI's operations.

Very Low Risk Appetite

- Unauthorized access, use, or release of personally identifiable information, health data, or other sensitive data.
- Noncompliance with applicable technology directives, policies, standards or procedures.
- Lack of resiliency against cybersecurity threats.
- Unplanned downtime impacting systems which support critical business functions.
- Deliberate misuse of information/data.
- Ineffective information/data management process.

Low Risk Appetite

- Inefficient or ineffective business resiliency planning and execution.
- Untimely analysis and diagnosis of information/data collected.
- Lack of adaptability of technology systems particularly in terms of stability, reliability, capability, performance, and capacity when responding to evolving business requirements and strategic priorities.

Moderate Risk Appetite

- Misalignment of information systems, data, and practices.
- Inability to meet external user demands.
- Inability to meet internal user demands, including supporting a mobile workforce.

Manitoba Public Insurance

People Risk

Risk that resource use and employment practices do not align with MPI's mission and strategic objectives.

Very Low Risk Appetite

- Noncompliance with employee practices and with workplace safety laws and regulations.
- Noncompliance with equal employment opportunity principles, diversity principles, and ethical standards.
- Noncompliance with Employment and Labour law, rules, regulations, policy, or procedure, or other matters that could compromise MPI's integrity.
- Noncompliance with the collective agreement.
- Dishonest or fraudulent behaviour.
- Failing physical security measures.

Low Risk Appetite

- Failing in developing employees with the necessary skills and competencies, including critical thinking and sound judgment, retention, succession, leadership development, and training.
- Failing in aligning resource allocation and utilization with mission, strategic goals, and risk.
- Inefficient compensation policies.

Moderate Risk Appetite

- Ineffective or inefficient enterprise workforce plan execution.
- Delaying the recruiting and hiring of talent.
- Ineffective or inefficient employee performance management.
- Empowering staff within the appropriate delegation, oversight, and reporting parameters.
- Acquire talent outside of Manitoba.

Legal & Compliance Risk

Risk that the corporation does not fulfill its obligations under applicable laws, regulations, federal directives, mandates, or executive orders or has gaps in mission-critical functions to maintain a sound auto insurance, motor vehicle registration and driving licensing regime in the Province of Manitoba.

Very Low Risk Appetite

- Noncompliance with applicable laws, regulations, statutory reporting, tax filings, and Manitoba Government directives, mandates, and executive orders.
- Failing in abiding by contractual obligations.
- Poor employee or agent misconduct.
- Gaps in mission-critical functions required to maintain a sound auto insurance, motor vehicle registration, and driving licensing regime in the Province of Manitoba.
- Involvement in money laundering and terrorism financing.
- Having ineffective relationship with legislators.

Low Risk Appetite

- Lack of human resource guidance and practices.
- Failing in preparing for new, modified, or eliminated laws and regulations.
- Failing in managing third party relationships and risks appropriately.

Moderate Risk Appetite

- Ineffective or inefficient interagency coordination.

Manitoba Public Insurance

Operational Risk

Risk that people, processes, systems, or external events impede MPI's ability to meet its objectives.

Very Low Risk Appetite

- Failing physical security.
- Employee and agent misconduct.
- Failing in being able to operate and self-fund MPI.

Low Risk Appetite

- Lack of proper business continuity planning and information technology disaster recovery.
- Process inefficiency.
- Weak internal corporate governance processes.
- Ineffective or inefficient third-party oversight.
- Ineffective or inefficient portfolio management and program or project execution.
- Ineffective or inefficient modeling design and implementation.

Moderate Risk Appetite

- Outsourcing to third parties including activities that involve outsourced services and use of independent consultants.
- Failure when piloting in the adoption of transformation initiatives.

Reputation Risk

Risk that negatives perception jeopardizes MPI's credibility, achievement of mission and strategic objectives, or its ability to maintain MPI's business model.

Very Low Risk Appetite

- Failing in performing MPI's functions as assigned to it by law.
- Suffering breaches in information security.
- Poor employee and agent conduct.
- Failing in being fiscally responsible.
- Inefficient or ineffective internal and external communication strategies.
- Lack to issue escalation and response processes.
- Human resources malpractices.
- Tarnished MPI culture (external and internal view of MPI's vision, mission, values, and behaviours).
- Lack of responsibility and accountability.
- Not taking a leadership role in pursuing and/or defending issues supportive of MPI's core mission.

6. IMPLEMENTATION OF MPI'S RISK APPETITE

The ERM Function, headed by the Chief Risk Officer, is responsible for the implementation of the RAS across the corporation.

All leaders of divisions, directorates and departments, as well as the Enterprise Risk Owners are responsible for the complying with this Statement.

6.1. Communication

MPI's RAS is published on the MPI's Intranet through the ERM Share Point Site.

Manitoba Public Insurance

6.2. Risk Assessments

The risk appetites described in this RAS are the broad description of the amount of risk MPI is willing to accept or retain to achieve its objectives. The RAS comprises a series of statements that describe MPI's attitude towards risk taking. The divisions, the directorates, the departments, and the enterprise risk owners are required to manage their specific risks in a manner that is consistent with the RAS, and to manage and mitigate any risks outside the agreed risk tolerances.

6.3. Risk Tolerances, Risk Limits, and Risk Metrics

MPI's risk tolerances will use the risk appetite in the RAS to inform:

- expectations for mitigating, accepting, and pursuing specific types of risk;
- boundaries and thresholds of acceptable risk taking, and;
- actions to be taken or consequence for acting beyond approved tolerances such as escalation procedures.

Risk tolerances are set to identify the level at which the risk can be accepted, rather than needing further mitigation to reduce the risk and are established at different levels across MPI (i.e., division, directorate, department) as appropriate.

Risk limits are defined to monitor that actual risk exposures across MPI do not deviate too much from the defined risk tolerances. Exceeding risk limits will typically act as a trigger for a risk management action.

Risk tolerances and risk limits are measured and monitored as per the risk metrics identified below:

- *Key Risk Indicators (KRIs)*
  KRIs are metrics used by management to provide an early signal of increasing risk exposures in different areas of the corporation.
- *Key Control Indicators (KCIs)*
  KCIs are metrics that provide information on the extent to which a given control is meeting its extended objectives (in terms of loss prevention, reduction, treatment, and acceptance). In so doing, they can be used to measure the effectiveness of particular risk controls at a particular point in time.

6.4. Monitoring & Reporting

A primary benefit of using indicators lies in their ability to link current exposure levels to risk limits, risk tolerances, and risk appetites.

By monitoring a set of appropriate risk indicators and by checking their actual values and trends against agreed tolerances and limits, an organization is able to see whether its risk exposures remain within its appetite for risk or exceed it. Hence the monitoring of risk indicators is an important mechanism by which an organization's management can gain assurance that it remains within it stated risk appetite.

The use of risk indicators also supports effective governance by providing a transparent, repeatable, and consistent means for tracking both risk exposures and management activity.

Manitoba Public Insurance

Reporting provides assurance that the risk appetite is effectively incorporated into management decisions. By embedding risk appetite within the management processes of MPI, it directly contributes to the maintenance of a robust control environment and sound risk governance.

7. REVIEW

This RAS is reviewed annually, or whenever there is a significant change to the MPI's internal and external environments. This review is coordinated by the ERM Function.

The ERMC proposes changes to the RAS to the Risk Committee of the Board ("RCB").

The RCB reviews the proposed changes by the ERMC and recommends a revised RAS for the approval by the Board of Directors ("BOD"). The BDO approves the revised version of the RAS.

1. INTRODUCTION

The business activities undertaken by MPI in fulfilling its mission are exposed to a variety of risks.

This risk appetite statement ("RAS") considers the most significant risks that MPI is exposed to and provides an outline of the approach to managing these risks.

MPI's risk appetite is set annually by the Board of Directors ("Board") with the goal of aligning risk-taking with the Corporation's statutory requirements, strategic business objectives and capital planning.

The Risk Committee of the Board (RCB) and the Executive Risk Management Committee (ERMC) monitor MPI's adherence to the RAS and make necessary updates to capture changes in MPI's strategic initiatives, operating environment, and risk profile.

The purpose of the RAS is to clearly state the general principles for MPI's risk-taking, to raise risk awareness across the organization, and to guide the staff regarding acceptable and unacceptable behaviour.

The RAS is implemented through MPI's policies, standards, procedures, monitoring metrics, tolerances and limit system and internal controls. The RAS is thereby embedded in the MPI's core processes and governs the business activities of MPI in a holistic way.

2. OBJECTIVES

The objectives of the RAS are the following:

- To provide a clear articulation of MPI's risk-taking, risk mitigation and risk avoidance, and to define risk-taking at the aggregate level. The RAS creates a foundation for effective communication of risk among internal and external stakeholders.
- To increase understanding of MPI's material risk exposures and raise risk awareness across the organization.
- To positively impact the defined risk culture of MPI.
- To support the Board and MPI Executive and the senior management in planning, formulating, and executing strategic business decisions to achieve the long-term objectives of MPI.
- To provide means for the Board of Directors and MPI Executive and senior management to engage in discussions on risk-taking, risk management, and business strategy, and their interlinkages.
- To provide tools for the Board of Directors and MPI Executive and senior management to continuously monitor and align MPI's actual risk profile with the risk appetite.

Manitoba Public Insurance

3. GENERAL STATEMENT OF APPETITE

MPI will act in accordance with its risk appetite statement to achieve its strategic goals and objectives in pursuit of its mission. MPI must employ sound risk management principles, including identifying, measuring, monitoring, and controlling risk; transparent decision making; effective communication; and prioritization of risk. MPI manages eight interrelated categories of risk to effectively reflect its responsibilities as the trusted auto insurance, motor vehicle registrar, and driving licensing services provider for every Manitoban. Where MPI has discretion, the Corporation is willing to assume certain risks to remain agile in meeting the business challenges of its evolving business landscape. Strong risk management practices will enable the Corporation to operate proactively while controlling risk.

4. THE RISK MANAGEMENT FRAMEWORK

A “three-lines of defence” governance model is used to allocate risk management responsibilities to particular areas of MPI. The first line of defence is made up of MPI’s business units or functions that perform the day-to-day operations. They are the primary risk-takers and are primarily responsible for identifying, assessing, controlling, and mitigating risks, and ensuring that the activities within their domains are consistent with MPI’s risk appetite and policies. The second line of defence are MPI’s Risk Management functional units, primarily, Enterprise Risk Management (ERM) function and the Compliance function. They are responsible for maintaining the risk management framework and performing oversight on risk management activities performed by the first line of defence. The third line of defence is provided by MPI’s Internal Audit function. It provides the Board and its Committees, and MPI Executive management with independent and objective assurance on the overall effectiveness of the risk governance framework (design and implementation), including the way the first and second lines of defence achieve risk management and control objectives.

Manitoba Public Insurance

5. OVERVIEW

About MPI's Risk Appetite

- Risk appetite is an integral part of MPI's Enterprise Risk Management Framework.
- Risk appetite articulates the level and type of risk the corporation will accept while conducting its mission and carrying out its strategic plan.
- Where MPI has discretion, the corporation is willing to assume certain risks to remain agile in meeting the challenges of an evolving auto insurance and driver licensing landscape.
- MPI has established risk appetite in eight categories.
- MPI has an overall Low risk appetite, and Very Low or Moderate risk appetites in specific areas.
- MPI will align its strategic decisions with its risk appetite statement.

Risk Appetite Definitions

Very Low Appetite

- Inflexible approach with very low possibility of failure.
- No willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will not accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Avoid trading off this objective against achievement of other objectives.

Low Appetite

- Cautious and intentionally conservative.
- Limited willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Prefer to avoid trading off this objective against achievement of other objectives.

Moderate Appetite

- Measured and deliberative approach.
- A degree of willingness to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Will accept selected risks but must be soundly justified.
- Willing to trade off this objective against achievement of other objectives in certain circumstances.

High Appetite

- Flexible approach with higher possibility of failure.
- Willing to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Willing to take risks when long-term benefits are foreseeable and outweigh risks.
- Willing to trade off this objective against achievement of other objectives.

Manitoba Public Insurance

Enterprise Risk Appetite

Strategy Risk

Risk that corporate strategy selection, prioritization, modification, and implementation jeopardize achievement of MPI's goals and objectives.

Low Risk Appetite

- Ineffective or inefficient decision making and execution.
- Insuring companies that are not Manitoba owned in the Special Risk Extension ("SRE") Line of Business.
- Executing and achieving of strategy and outcomes not in alignment with MPI's goals and objectives.
- Offering Basic products and providing services outside of MPI's legislated mandate.
- Non-responsiveness to changes in the internal and external operating environment.
- Exposure to non-auto products and services.

Moderate Risk Appetite

- Inability to evolve and adapt.

Earnings Risk

Risk that MPI's activities fail in achieving the desirable profitability. The risk arises from the uncertainties associated with net insurance cash flows, unexpected changes in the investment income, and from ineffective and inefficient use of resources.

Low Risk Appetite

- In the Basic Line of Business, deviating from the fiscal year's target value in more than the following percentage points: for the attritional loss ratio: +5, for expense loss ratio: +2, for catastrophe loss ratio: +4, for the prior year loss ratio: -5 to +2, and for the combined ratio: +10.
- In the Extension Line of Business, deviating from the fiscal year's target value in more than the following percentage points: for the attritional loss ratio: +10, for expense loss ratio: +5, for the prior year loss ratio: -5 to +2, and for the combined ratio: +15.
- In the SRE Line of Business, failing to avoid net losses.
- Net impact of changes in interest rates on the Basic Line of Business resulting in a variance relative to the fiscal year's budgeted net income after non-recurring items of more than +/- 1% of the current market value of the Basic Claims investment portfolio.
- Deviating by more than +/- 10% from the fiscal year's budgeted corporate net income.
- Deviating by more than +/- 10 % from the fiscal year's budgeted expenses.

Moderate Risk Appetite

- Exposure to interest rates for non-Basic portfolios.

Moved [1]: Ineffective or inefficient decision making and execution. ¶

Manitoba Public Insurance

Solvency Risk

Risk that MPI is unable to absorb losses generated by all types of risks with the available capital.

Very Low Risk Appetite

- Falling in the Basic line of business below a 35% Minimum Capital Test (MCT) ratio based on 1-in-10 year stress testing.
- Falling in the Extension line of business below a 100% MCT ratio.
- Falling in the SRE line of business below a 200% MCT ratio.
- Purchasing fixed income securities with a credit rating below BBB-.
- Failing in having enough cash and cash equivalents to meet our obligations.

Low Risk Appetite

- Contracting with reinsurers having financial ratings below A-.
- Concentrating the exposure to a reinsurer within a reinsurance layer to more than 25%.

Moderate Risk Appetite

- Exposure to changes in unhedged foreign currency.

Technology Risk

Risk that information technology processing, security, stability, capacity, and performance jeopardize core MPI's operations.

Very Low Risk Appetite

- Unauthorized access, use, or release of personally identifiable information, health data, or other sensitive data.
- Noncompliance with applicable technology directives, policies, standards or procedures.
- Lack of resiliency against cybersecurity threats.
- Unplanned downtime impacting systems which support critical business functions.
- Deliberate misuse of information/data.
- Ineffective information/data management process.

Low Risk Appetite

- Inefficient or ineffective business resiliency planning and execution.
- Untimely analysis and diagnosis of information/data collected.
- Lack of adaptability of technology systems particularly in terms of stability, reliability, capability, performance, and capacity when responding to evolving business requirements and strategic priorities.

Moderate Risk Appetite

- Misalignment of information systems, data, and practices.
- Inability to meet external user demands.
- Inability to meet internal user demands, including supporting a mobile workforce.

Manitoba Public Insurance

People Risk

Risk that resource use and employment practices do not align with MPI's mission and strategic objectives.

Very Low Risk Appetite

- Noncompliance with employee practices and with workplace safety laws and regulations.
- Noncompliance with equal employment opportunity principles, diversity principles, and ethical standards.
- Noncompliance with Employment and Labour law, rules, regulations, policy, or procedure, or other matters that could compromise MPI's integrity.
- Noncompliance with the collective agreement.
- Dishonest or fraudulent behaviour.
- Failing physical security measures.

Low Risk Appetite

- Failing in developing employees with the necessary skills and competencies, including critical thinking and sound judgment, retention, succession, leadership development, and training.
- Failing in aligning resource allocation and utilization with mission, strategic goals, and risk.
- Inefficient compensation policies.

Moderate Risk Appetite

- Ineffective or inefficient enterprise workforce plan execution.
- Delaying the recruiting and hiring of talent.
- Ineffective or inefficient employee performance management.
- Empowering staff within the appropriate delegation, oversight, and reporting parameters.
- Acquire talent outside of Manitoba.

Legal & Compliance Risk

Risk that the corporation does not fulfill its obligations under applicable laws, regulations, federal directives, mandates, or executive orders or has gaps in mission-critical functions to maintain a sound auto insurance, motor vehicle registration and driving licensing regime in the Province of Manitoba.

Very Low Risk Appetite

- Noncompliance with applicable laws, regulations, statutory reporting, tax filings, and Manitoba Government directives, mandates, and executive orders.
- Failing in abiding by contractual obligations.
- Poor employee or agent misconduct.
- Gaps in mission-critical functions required to maintain a sound auto insurance, motor vehicle registration, and driving licensing regime in the Province of Manitoba.
- Involvement in money laundering and terrorism financing.
- Having ineffective relationship with legislators.

Low Risk Appetite

- Lack of human resource guidance and practices.
- Failing in preparing for new, modified, or eliminated laws and regulations.
- Failing in managing third party relationships and risks appropriately.

Moderate Risk Appetite

- Ineffective or inefficient interagency coordination.

Moved [4]: <#>Ineffective or inefficient interagency coordination.¶

Moved [3]: <#>Ineffective or inefficient enterprise workforce plan execution.¶

Moved (insertion) [4]

Moved (insertion) [3]

Deleted: Stepping outside historical channels to acquire

Manitoba Public Insurance

Operational Risk

Risk that people, processes, systems, or external events impede MPI's ability to meet its objectives.

Very Low Risk Appetite

- Failing physical security.
- Employee and agent misconduct.
- Failing in being able to operate and self-fund MPI.

Low Risk Appetite

- Lack of proper business continuity planning and information technology disaster recovery.
- Process inefficiency.
- Weak internal corporate governance processes.
- Ineffective or inefficient third-party oversight.
- Ineffective or inefficient portfolio management and program or project execution.
- Ineffective or inefficient modeling design and implementation.

Moderate Risk Appetite

- Outsourcing to third parties including activities that involve outsourced services and use of independent consultants.
- Failure when piloting in the adoption of transformation initiatives.

Reputation Risk

Risk that negatives perception jeopardizes MPI's credibility, achievement of mission and strategic objectives, or its ability to maintain MPI's business model.

Very Low Risk Appetite

- Failing in performing MPI's functions as assigned to it by law.
- Suffering breaches in information security.
- Poor employee and agent conduct.
- Failing in being fiscally responsible.
- Inefficient or ineffective internal and external communication strategies.
- Lack to issue escalation and response processes.
- Human resources malpractices.
- Tarnished MPI culture (external and internal view of MPI's vision, mission, values, and behaviours).
- Lack of responsibility and accountability.
- Not taking a leadership role in pursuing and/or defending issues supportive of MPI's core mission.

6. IMPLEMENTATION OF MPI'S RISK APPETITE

The ERM Function, headed by the Chief Risk Officer, is responsible for the implementation of the RAS across the corporation.

All leaders of divisions, directorates and departments, as well as the Enterprise Risk Owners are responsible for the complying with this Statement.

6.1. Communication

MPI's RAS is published on the MPI's Intranet through the ERM Share Point Site.

Manitoba Public Insurance

6.2. Risk Assessments

The risk appetites described in this RAS are the broad description of the amount of risk MPI is willing to accept or retain to achieve its objectives. The RAS comprises a series of statements that describe MPI's attitude towards risk taking. The divisions, the directorates, the departments, and the enterprise risk owners are required to manage their specific risks in a manner that is consistent with the RAS, and to manage and mitigate any risks outside the agreed risk tolerances.

6.3. Risk Tolerances, Risk Limits, and Risk Metrics

MPI's risk tolerances will use the risk appetite in the RAS to inform:

- expectations for mitigating, accepting, and pursuing specific types of risk;
- boundaries and thresholds of acceptable risk taking, and;
- actions to be taken or consequence for acting beyond approved tolerances such as escalation procedures.

Risk tolerances are set to identify the level at which the risk can be accepted, rather than needing further mitigation to reduce the risk and are established at different levels across MPI (i.e., division, directorate, department) as appropriate.

Risk limits are defined to monitor that actual risk exposures across MPI do not deviate too much from the defined risk tolerances. Exceeding risk limits will typically act as a trigger for a risk management action.

Risk tolerances and risk limits are measured and monitored as per the risk metrics identified below:

- *Key Risk Indicators (KRIs)*
  KRIs are metrics used by management to provide an early signal of increasing risk exposures in different areas of the corporation.
- *Key Control Indicators (KCIs)*
  KCIs are metrics that provide information on the extent to which a given control is meeting its extended objectives (in terms of loss prevention, reduction, treatment, and acceptance). In so doing, they can be used to measure the effectiveness of particular risk controls at a particular point in time.

6.4. Monitoring & Reporting

A primary benefit of using indicators lies in their ability to link current exposure levels to risk limits, risk tolerances, and risk appetites.

By monitoring a set of appropriate risk indicators and by checking their actual values and trends against agreed tolerances and limits, an organization is able to see whether its risk exposures remain within its appetite for risk or exceed it. Hence the monitoring of risk indicators is an important mechanism by which an organization's management can gain assurance that it remains within it stated risk appetite.

The use of risk indicators also supports effective governance by providing a transparent, repeatable, and consistent means for tracking both risk exposures and management activity.

Reporting provides assurance that the risk appetite is effectively incorporated into management decisions. By embedding risk appetite within the management processes of MPI, it directly contributes to the maintenance of a robust control environment and sound risk governance.

7. REVIEW

This RAS is reviewed annually, or whenever there is a significant change to the MPI's internal and external environments. This review is coordinated by the ERM Function.

The ERMC proposes changes to the RAS to the Risk Committee of the Board ("RCB").

The RCB reviews the proposed changes by the ERMC and recommends a revised RAS for the approval by the Board of Directors ("BOD"). The BDO approves the revised version of the RAS.

* * *

Appendix 4: Risk Appetite Statement – Summary of changes as of June 24, 2026

1. Earnings Risk

1.1. Three (3) risk appetite statements have been updated as follows:

Risk Appetite Statement (RAS) (Removed)	Updated Risk Appetite Statement by the Risk Category Owner (New)	Risk Appetite Level
In the Basic Line of Business, deviating from the fiscal year's target value in more than the following percentage points: • For the attritional loss ratio: +5% • For the expense loss ratio: +2% • For the catastrophe loss ratio: +4% • For the prior year loss ratio: -5% to +2%; and • For the combined ratio: +10%	1. Failing to achieve net income outcomes that are closely aligned with budgeted expectations, reflecting a preference for stability and predictability in financial performance. 2. Deviating from the equity-weighted average Return on Equity within ±5% of 0%, calculated over a rolling five-year period. 3. Deviating from the budgeted net income of no more than +/- $30 million on average calculated over a five-year historical period.	**Low**
In the Extension Line of Business, deviating from the fiscal year's target value in more than the following percentage points: • For the attritional loss ratio: +10% • For the expense loss ratio: +5% • For the prior year loss ratio: -5% to +2%, and • For the combined ratio: +15%	1. Failing to achieve positive net income outcomes that support sustainable profitability and long-term value creation, while remaining broadly aligned with budgeted expectations. 2. Deviating from the equity-weighted average Return on Equity within ±10% of 40%, calculated over a rolling five-year period.	**Low**

	3. Deviating from budgeted net income of no more than +/- $10 million on average calculated over a five-year historical period.	
SRE: Failing to avoid net losses	1. Failing to deliver positive net income over the long term, acknowledging that short-term results may fluctuate and include occasional losses. 2. Deviating from its equity-weighted average Return on Equity within +/- 10% of 0%, calculated over a rolling five-year period. 3. Deviating from budgeted net income of no more than +/- $20 million calculated on average over a five-year historical period.	**Low**

1.2. One (1) risk appetite statement has been added to this risk category as follows:

Updated Risk Appetite Statement by the Risk Category Owner (New)	Risk Appetite Level	Rationale
For DVA line: Incurring losses within a given fiscal period that is not fully funded in whole from the equity of the DVA Line of Business.	**Low**	Risk Appetite Statement is currently silent on DVA.

2. Solvency Risk

2.1 One (1) risk appetite statement has updated from "Very Low" to "Low"

Risk Appetite Statement (RAS)	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Falling in the SRE line of business below a 200% MCT ratio.	**Very Low**	**Low**	Balance between building capital and rate increases for trucking customers.

3. Reputation Risk

3.1 Four (4) risk appetite statements have been updated from "Very Low" to "Low".

Risk Appetite Statement (RAS)	Prior Risk Appetite Level	Updated Risk Appetite Level	Rationale
Inefficient or ineffective internal and external communication strategies.	**Very Low**	**Low**	Internal and external communications are key to the success of MPI. They ensure that all employees are informed and engaged, leading to increased productivity and reduced turnover. Effective internal communication fosters collaboration and transparency, while external communication builds brand reputation and trust. Both internal and external communication are

			fundamental to our organization's success, and both are essential in the public-sector environment.
Lack of issue escalation and response processes.	**Very Low**	**Low**	Recommend moving from very low to low to allow for some acknowledgement that it is an imperfect system.
Tarnished MPI culture (external and internal view of MPI's vision, mission, values, and behaviours).	**Very Low**	**Low**	Change this to low risk tolerance as a result of the dynamic environment that MPI works in. This risk is not solely focused on media but rather focused on trust. Low risk signals that MPI's Vision, Mission, Values and behaviors will be focused and conducted in a way that preserves transparency, accountability and public trust.
Not taking a leadership role in pursuing and/or defending issues supportive of MPI's core mission.	**Very Low**	**Low**	Change to low to support the reality of the corporation - we are sometimes at odds with our mandate, and we are also accountable to government and to the PUB. It is a balanced approach.

3.2 One (1) risk appetite statement has been removed to avoid duplication, with coverage appropriately addressed under other risk categories.

Risk Appetite Statement (RAS) (Removed)	Updated Risk Appetite Statement by the Risk Category Owner (New)
Poor employee and agent conduct.	Remove from category because employee and agent misconduct is already covered under two other categories (Operational and Legal & Compliance) and are best suited to be addressed under other risk categories. Reputational risk is more related to the actions taken by MPI to address poor employee and agent conduct vs. the conduct itself, which would be covered under “lack of issue escalation”.

Manitoba Public Insurance

1. INTRODUCTION

The business activities undertaken by MPI in fulfilling its mission are exposed to a variety of risks.

This risk appetite statement ("RAS") considers the most significant risks that MPI is exposed to and provides an outline of the approach to managing these risks.

MPI's risk appetite is set annually by the Board of Directors ("Board") with the goal of aligning risk-taking with the Corporation's statutory requirements, strategic business objectives and capital planning.

The Risk Committee of the Board (RCB) and the Executive Risk Management Committee (ERMC) monitor MPI's adherence to the RAS and make necessary updates to capture changes in MPI's strategic initiatives, operating environment, and risk profile.

The purpose of the RAS is to clearly state the general principles for MPI's risk-taking, to raise risk awareness across the organization, and to guide the staff regarding acceptable and unacceptable behaviour.

The RAS is implemented through MPI's policies, standards, procedures, monitoring metrics, tolerances and limit system and internal controls. The RAS is thereby embedded in the MPI's core processes and governs the business activities of MPI in a holistic way.

2. OBJECTIVES

The objectives of the RAS are the following:

- To provide a clear articulation of MPI's risk-taking, risk mitigation and risk avoidance, and to define risk-taking at the aggregate level. The RAS creates a foundation for effective communication of risk among internal and external stakeholders.
- To increase understanding of MPI's material risk exposures and raise risk awareness across the organization.
- To positively impact the defined risk culture of MPI.
- To support the Board and MPI Executive and the senior management in planning, formulating, and executing strategic business decisions to achieve the long-term objectives of MPI.
- To provide means for the Board of Directors and MPI Executive and senior management to engage in discussions on risk-taking, risk management, and business strategy, and their interlinkages.
- To provide tools for the Board of Directors and MPI Executive and senior management to continuously monitor and align MPI's actual risk profile with the risk appetite.

Manitoba Public Insurance

3. GENERAL STATEMENT OF APPETITE

MPI will act in accordance with its risk appetite statement to achieve its strategic goals and objectives in pursuit of its mission. MPI must employ sound risk management principles, including identifying, measuring, monitoring, and controlling risk; transparent decision making; effective communication; and prioritization of risk. MPI manages eight interrelated categories of risk to effectively reflect its responsibilities as the trusted auto insurance, motor vehicle registrar, and driving licensing services provider for every Manitoban. Where MPI has discretion, the Corporation is willing to assume certain risks to remain agile in meeting the business challenges of its evolving business landscape. Strong risk management practices will enable the Corporation to operate proactively while controlling risk.

4. THE RISK MANAGEMENT FRAMEWORK

A “three-lines of defence” governance model is used to allocate risk management responsibilities to particular areas of MPI. The first line of defence is made up of MPI’s business units or functions that perform the day-to-day operations. They are the primary risk-takers and are primarily responsible for identifying, assessing, controlling, and mitigating risks, and ensuring that the activities within their domains are consistent with MPI’s risk appetite and policies. The second line of defence are MPI’s Risk Management functional units, primarily, Enterprise Risk Management (ERM) function and the Compliance function. They are responsible for maintaining the risk management framework and performing oversight on risk management activities performed by the first line of defence. The third line of defence is provided by MPI’s Internal Audit function. It provides the Board and its Committees, and MPI Executive management with independent and objective assurance on the overall effectiveness of the risk governance framework (design and implementation), including the way the first and second lines of defence achieve risk management and control objectives.

Manitoba Public Insurance

5. OVERVIEW

About MPI's Risk Appetite

- Risk appetite is an integral part of MPI's Enterprise Risk Management Framework.
- Risk appetite articulates the level and type of risk the corporation will accept while conducting its mission and carrying out its strategic plan.
- Where MPI has discretion, the corporation is willing to assume certain risks to remain agile in meeting the challenges of an evolving auto insurance and driver licensing landscape.
- MPI has established risk appetite in eight categories.
- MPI has an overall Low risk appetite, and Very Low or Moderate risk appetites in specific areas.
- MPI will align its strategic decisions with its risk appetite statement.

Risk Appetite Definitions

Very Low Appetite

- Inflexible approach with very low possibility of failure.
- No willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will not accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Avoid trading off this objective against achievement of other objectives.

Low Appetite

- Cautious and intentionally conservative.
- Limited willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Prefer to avoid trading off this objective against achievement of other objectives.

Moderate Appetite

- Measured and deliberative approach.
- A degree of willingness to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Will accept selected risks but must be soundly justified.
- Willing to trade off this objective against achievement of other objectives in certain circumstances.

High Appetite

- Flexible approach with higher possibility of failure.
- Willing to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Willing to take risks when long-term benefits are foreseeable and outweigh risks.
- Willing to trade off this objective against achievement of other objectives.

Manitoba Public Insurance

Enterprise Risk Appetite

Strategy Risk

Risk that corporate strategy selection, prioritization, modification, and implementation jeopardize achievement of MPI's goals and objectives.

Low Risk Appetite

- Ineffective or inefficient decision making and execution.
- Insuring companies that are not Manitoba owned in the Special Risk Extension ("SRE") Line of Business.
- Executing and achieving of strategy and outcomes not in alignment with MPI's goals and objectives.
- Offering Basic products and providing services outside of MPI's legislated mandate.
- Non-responsiveness to changes in the internal and external operating environment.
- Exposure to non-auto products and services.

Moderate Risk Appetite

- Inability to evolve and adapt.

Earnings Risk

Risk that MPI's activities fail in achieving the desirable profitability. The risk arises from the uncertainties associated with net insurance cash flows, unexpected changes in the investment income, and from ineffective and inefficient use of resources.

Basic Line of Business

The Basic line operates on a break-even basis, prioritizing rate stability and capital adequacy over earnings.

Low Risk Appetite

- Failing to achieve net income outcomes that are closely aligned with budgeted expectations, reflecting a preference for stability and predictability in financial performance.
- Deviating from the equity-weighted average Return on Equity within +/- 5% of 0% calculated over a rolling five-year period.
- Deviating from the budgeted net income of no more than +/- $30 million on average calculated over a five-year historical period.

Extension Line of Business

The Extension line operates on a for-profit basis, with results intended to benefit the Basic line of business.

Low Risk Appetite

- Failing to achieve positive net income outcomes that support sustainable profitability and long-term value creation, while remaining broadly aligned with budgeted expectations.
- Deviating from the equity-weighted average Return on Equity within +/- 10% of 40%, calculated over a rolling five-year period.
- Deviating from budgeted net income of no more than +/- $10 million on average calculated over a five-year historical period.

Manitoba Public Insurance

Earnings Risk

Risk that MPI's activities fail in achieving the desirable profitability. The risk arises from the uncertainties associated with net insurance cash flows, unexpected changes in the investment income, and from ineffective and inefficient use of resources.

SRE Line of Business

The SRE line operates on a for-profit basis, and given its relatively small business volume, greater variability in net income is expected.

Low Risk Appetite

- Failing to achieve positive net income outcomes that support sustainable profitability and long-term value creation, while remaining broadly aligned with budgeted expectations.
- Deviating from the equity-weighted average Return on Equity within +/- 10% of 0%, calculated over a rolling five-year period.
- Deviating from budgeted net income of no more than +/- $20 million calculated on average over a five-year historical period.

DVA Line of Business

DVA line operates on a cost-recovery basis.

Low Risk Appetite

- Incurring losses within a given fiscal period that is not fully funded in whole from the equity of the DVA Line of Business.

Solvency Risk

Risk that MPI is unable to absorb losses generated by all types of risks with the available capital.

Very Low Risk Appetite

- Falling in the Basic line of business below a 35% Minimum Capital Test (MCT) ratio based on 1-in-10 year stress testing.
- Falling in the Extension line of business below a 100% MCT ratio.
- Purchasing fixed income securities with a credit rating below BBB-.
- Failing in having enough cash and cash equivalents to meet our obligations.

Low Risk Appetite

- Falling in the SRE line of business below a 200% MCT ratio.
- Contracting with reinsurers having financial ratings below A-.
- Concentrating the exposure to a reinsurer within a reinsurance layer to more than 25%.

Moderate Risk Appetite

- Exposure to changes in unhedged foreign currency.

Manitoba Public Insurance

Operational Risk

Risk that people, processes, systems, or external events impede MPI's ability to meet its objectives.

Very Low Risk Appetite

- Failing physical security.
- Employee and agent misconduct.
- Failing in being able to operate and self-fund MPI.

Low Risk Appetite

- Lack of proper business continuity planning and information technology disaster recovery.
- Process inefficiency.
- Weak internal corporate governance processes.
- Ineffective or inefficient third-party oversight.
- Ineffective or inefficient portfolio management and program or project execution.
- Ineffective or inefficient modeling design and implementation.

Moderate Risk Appetite

- Outsourcing to third parties including activities that involve outsourced services and use of independent consultants.
- Failure when piloting in the adoption of transformation initiatives.

Technology Risk

Risk that information technology processing, security, stability, capacity, and performance jeopardize core MPI's operations.

Very Low Risk Appetite

- Unauthorized access, use, or release of personally identifiable information, health data, or other sensitive data.
- Noncompliance with applicable technology directives, policies, standards or procedures.
- Lack of resiliency against cybersecurity threats.
- Unplanned downtime impacting systems which support its critical business functions.
- Deliberate misuse of information/data.
- Ineffective information/data management process.

Low Risk Appetite

- Inefficient or ineffective business resiliency planning and execution.
- Untimely analysis and diagnosis of information/data collected.
- Lack of adaptability of technology systems particularly in terms of stability, reliability, capability, performance, and capacity when responding to evolving business requirements and strategic priorities.

Moderate Risk Appetite

- Misalignment of information systems, data, and practices
- Inability to meet external user demands.
- Inability to meet internal user demands, including supporting a mobile workforce.

Manitoba Public Insurance

People Risk

Risk that resource use and employment practices do not align with MPI's mission and strategic objectives.

Very Low Risk Appetite

- Noncompliance with employee practices and with workplace safety laws and regulations.
- Noncompliance with equal employment opportunity principles, diversity principles, and ethical standards.
- Noncompliance with Employment and Labour law, rules, regulations, policy, or procedure, or other matters that could compromise MPI's integrity.
- Noncompliance with the collective agreement.
- Dishonest or fraudulent behaviour.
- Failing physical security measures.

Low Risk Appetite

- Failing in developing employees with the necessary skills and competencies, including critical thinking and sound judgment, retention, succession, leadership development, and training.
- Failing in aligning resource allocation and utilization with mission, strategic goals, and risk.
- Inefficient compensation policies.

Moderate Risk Appetite

- Ineffective or inefficient enterprise workforce plan execution.
- Delaying the recruiting and hiring of talent.
- Ineffective or inefficient employee performance management.
- Empowering staff within the appropriate delegation, oversight, and reporting parameters.
- Acquire talent outside of Manitoba.

Legal & Compliance Risk

Risk that the corporation does not fulfill its obligations under applicable laws, regulations, federal directives, mandates, or executive orders or has gaps in mission-critical functions to maintain a sound auto insurance, motor vehicle registration and driving licensing regime in the Province of Manitoba.

Very Low Risk Appetite

- Noncompliance with applicable laws, regulations, statutory reporting, tax filings, and Manitoba Government directives, mandates, and executive orders.
- Failing in abiding by contractual obligations.
- Poor employee or agent misconduct.
- Gaps in mission-critical functions required to maintain a sound auto insurance, motor vehicle registration, and driving licensing regime in the Province of Manitoba.
- Involvement in money laundering and terrorism financing.
- Having ineffective relationship with legislators.

Low Risk Appetite

- Lack of human resource guidance and practices.
- Failing in preparing for new, modified, or eliminated laws and regulations.
- Failing in managing third party relationships and risks appropriately.

Moderate Risk Appetite

- Ineffective or inefficient interagency coordination.

Manitoba Public Insurance

Reputation Risk

Risk that negative perception jeopardizes MPI's credibility, achievement of mission and strategic objectives, or its ability to maintain MPI's business model.

There are intentional overlaps with other risk categories, reflecting the interplay between other risk categories and reputational risk. Reputational risk may be directly impacted by a number of actions and/or inactions that are contemplated in other risk categories (reputational considerations are embedded across all areas of the organization), signaling the significance of reputational risk to MPI.

Very Low Risk Appetite

- Failing in performing MPI's functions as assigned to it by law.
- Suffering breaches in information security.
- Poor employee and agent conduct.
- Failing in being fiscally responsible.
- Human resources malpractices.
- Lack of responsibility and accountability.

Reputation Risk

Low Risk Appetite

- Inefficient or ineffective internal and external communication strategies.
- Lack of issue escalation and response processes.
- Tarnished MPI culture (external and internal view of MPI's vision, mission, values, and behaviours).
- Not taking a leadership role in pursuing and/or defending issues supportive of MPI's core mission.

6. IMPLEMENTATION OF MPI'S RISK APPETITE

The ERM Function, headed by the Chief Risk Officer, is responsible for the implementation of the RAS across the corporation.

All leaders of divisions, directorates and departments, as well as the Enterprise Risk Owners are responsible for the complying with this Statement.

6.1. Communication

MPI's RAS is published on the MPI's Intranet through the ERM Share Point Site.

6.2. Risk Assessments

The risk appetites described in this RAS are the broad description of the amount of risk MPI is willing to accept or retain to achieve its objectives. The RAS comprises a series of statements that describe MPI's attitude towards risk taking. The divisions, the directorates, the departments, and the enterprise risk owners are required to manage their specific risks in a manner that is consistent with the RAS, and to manage and mitigate any risks outside the agreed risk tolerances.

Manitoba Public Insurance

6.3. Risk Tolerances, Risk Limits, and Risk Metrics

MPI's risk tolerances will use the risk appetite in the RAS to inform:

- expectations for mitigating, accepting, and pursuing specific types of risk;
- boundaries and thresholds of acceptable risk taking, and;
- actions to be taken or consequence for acting beyond approved tolerances such as escalation procedures.

Risk tolerances are set to identify the level at which the risk can be accepted, rather than needing further mitigation to reduce the risk and are established at different levels across MPI (i.e., division, directorate, department) as appropriate.

Risk limits are defined to monitor that actual risk exposures across MPI do not deviate too much from the defined risk tolerances. Exceeding risk limits will typically act as a trigger for a risk management action.

Risk tolerances and risk limits are measured and monitored as per the risk metrics identified below:

- *Key Risk Indicators (KRIs)*
  KRIs are metrics used by management to provide an early signal of increasing risk exposures in different areas of the corporation.
- *Key Control Indicators (KCIs)*
  KCIs are metrics that provide information on the extent to which a given control is meeting its extended objectives (in terms of loss prevention, reduction, treatment, and acceptance). In so doing, they can be used to measure the effectiveness of particular risk controls at a particular point in time.

6.4. Monitoring & Reporting

A primary benefit of using indicators lies in their ability to link current exposure levels to risk limits, risk tolerances, and risk appetites.

By monitoring a set of appropriate risk indicators and by checking their actual values and trends against agreed tolerances and limits, an organization is able to see whether its risk exposures remain within its appetite for risk or exceed it. Hence the monitoring of risk indicators is an important mechanism by which an organization's management can gain assurance that it remains within it stated risk appetite.

The use of risk indicators also supports effective governance by providing a transparent, repeatable, and consistent means for tracking both risk exposures and management activity.

Reporting provides assurance that the risk appetite is effectively incorporated into management decisions. By embedding risk appetite within the management processes of MPI, it directly contributes to the maintenance of a robust control environment and sound risk governance.

Manitoba Public Insurance

7. REVIEW

This RAS is reviewed annually, or whenever there is a significant change to the MPI's internal and external environments. This review is coordinated by the ERM Function.

The ERMC proposes changes to the RAS to the Risk Committee of the Board ("RCB").

The RCB reviews the proposed changes by the ERMC and recommends a revised RAS for the approval by the Board of Directors ("BOD"). The BDO approves the revised version of the RAS.

Manitoba Public Insurance

1. INTRODUCTION

The business activities undertaken by MPI in fulfilling its mission are exposed to a variety of risks.

This risk appetite statement ("RAS") considers the most significant risks that MPI is exposed to and provides an outline of the approach to managing these risks.

MPI's risk appetite is set annually by the Board of Directors ("Board") with the goal of aligning risk-taking with the Corporation's statutory requirements, strategic business objectives and capital planning.

The Risk Committee of the Board (RCB) and the Executive Risk Management Committee (ERMC) monitor MPI's adherence to the RAS and make necessary updates to capture changes in MPI's strategic initiatives, operating environment, and risk profile.

The purpose of the RAS is to clearly state the general principles for MPI's risk-taking, to raise risk awareness across the organization, and to guide the staff regarding acceptable and unacceptable behaviour.

The RAS is implemented through MPI's policies, standards, procedures, monitoring metrics, tolerances and limit system and internal controls. The RAS is thereby embedded in the MPI's core processes and governs the business activities of MPI in a holistic way.

2. OBJECTIVES

The objectives of the RAS are the following:

- To provide a clear articulation of MPI's risk-taking, risk mitigation and risk avoidance, and to define risk-taking at the aggregate level. The RAS creates a foundation for effective communication of risk among internal and external stakeholders.
- To increase understanding of MPI's material risk exposures and raise risk awareness across the organization.
- To positively impact the defined risk culture of MPI.
- To support the Board and MPI Executive and the senior management in planning, formulating, and executing strategic business decisions to achieve the long-term objectives of MPI.
- To provide means for the Board of Directors and MPI Executive and senior management to engage in discussions on risk-taking, risk management, and business strategy, and their interlinkages.
- To provide tools for the Board of Directors and MPI Executive and senior management to continuously monitor and align MPI's actual risk profile with the risk appetite.

Manitoba Public Insurance

3. GENERAL STATEMENT OF APPETITE

MPI will act in accordance with its risk appetite statement to achieve its strategic goals and objectives in pursuit of its mission. MPI must employ sound risk management principles, including identifying, measuring, monitoring, and controlling risk; transparent decision making; effective communication; and prioritization of risk. MPI manages eight interrelated categories of risk to effectively reflect its responsibilities as the trusted auto insurance, motor vehicle registrar, and driving licensing services provider for every Manitoban. Where MPI has discretion, the Corporation is willing to assume certain risks to remain agile in meeting the business challenges of its evolving business landscape. Strong risk management practices will enable the Corporation to operate proactively while controlling risk.

4. THE RISK MANAGEMENT FRAMEWORK

A "three-lines of defence" governance model is used to allocate risk management responsibilities to particular areas of MPI. The first line of defence is made up of MPI's business units or functions that perform the day-to-day operations. They are the primary risk-takers and are primarily responsible for identifying, assessing, controlling, and mitigating risks, and ensuring that the activities within their domains are consistent with MPI's risk appetite and policies. The second line of defence are MPI's Risk Management functional units, primarily, Enterprise Risk Management (ERM) function and the Compliance function. They are responsible for maintaining the risk management framework and performing oversight on risk management activities performed by the first line of defence. The third line of defence is provided by MPI's Internal Audit function. It provides the Board and its Committees, and MPI Executive management with independent and objective assurance on the overall effectiveness of the risk governance framework (design and implementation), including the way the first and second lines of defence achieve risk management and control objectives.

Manitoba Public Insurance

5. OVERVIEW

About MPI's Risk Appetite

- Risk appetite is an integral part of MPI's Enterprise Risk Management Framework.
- Risk appetite articulates the level and type of risk the corporation will accept while conducting its mission and carrying out its strategic plan.
- Where MPI has discretion, the corporation is willing to assume certain risks to remain agile in meeting the challenges of an evolving auto insurance and driver licensing landscape.
- MPI has established risk appetite in eight categories.
- MPI has an overall Low risk appetite, and Very Low or Moderate risk appetites in specific areas.
- MPI will align its strategic decisions with its risk appetite statement.

Risk Appetite Definitions

Very Low Appetite

- Inflexible approach with very low possibility of failure.
- No willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will not accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Avoid trading off this objective against achievement of other objectives.

Low Appetite

- Cautious and intentionally conservative.
- Limited willingness to accept uncertain outcomes relative to achievement of MPI's mission, vision, or strategic objectives.
- Will accept risk if achieving an outcome is especially important to MPI's mission, goals, or strategic objectives and there is limited possibility of failure to achieve desired outcomes.
- Prefer to avoid trading off this objective against achievement of other objectives.

Moderate Appetite

- Measured and deliberative approach.
- A degree of willingness to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Will accept selected risks but must be soundly justified.
- Willing to trade off this objective against achievement of other objectives in certain circumstances.

High Appetite

- Flexible approach with higher possibility of failure.
- Willing to accept uncertain outcomes relative to achievement of MPI's mission, goals, or strategic objectives.
- Willing to take risks when long-term benefits are foreseeable and outweigh risks.
- Willing to trade off this objective against achievement of other objectives.

Manitoba Public Insurance

Enterprise Risk Appetite

Strategy Risk

Risk that corporate strategy selection, prioritization, modification, and implementation jeopardize achievement of MPI's goals and objectives.

Low Risk Appetite

- Ineffective or inefficient decision making and execution.
- Insuring companies that are not Manitoba owned in the Special Risk Extension ("SRE") Line of Business.
- Executing and achieving of strategy and outcomes not in alignment with MPI's goals and objectives.
- Offering Basic products and providing services outside of MPI's legislated mandate.
- Non-responsiveness to changes in the internal and external operating environment.
- Exposure to non-auto products and services.

Moderate Risk Appetite

- Inability to evolve and adapt.

Earnings Risk

Risk that MPI's activities fail in achieving the desirable profitability. The risk arises from the uncertainties associated with net insurance cash flows, unexpected changes in the investment income, and from ineffective and inefficient use of resources.

Basic Line of Business

The Basic line operates on a break-even basis, prioritizing rate stability and capital adequacy over earnings.

Low Risk Appetite

- Failing to achieve net income outcomes that are closely aligned with budgeted expectations, reflecting a preference for stability and predictability in financial performance.
- Deviating from the equity-weighted average Return on Equity within +/- 5% of 0% calculated over a rolling five-year period.
- Deviating from the budgeted net income of no more than +/- $30 million on average calculated over a five-year historical period.

Extension Line of Business

The Extension line operates on a for-profit basis, with results intended to benefit the Basic line of business.

Low Risk Appetite

- Failing to achieve positive net income outcomes that support sustainable profitability and long-term value creation, while remaining broadly aligned with budgeted expectations.
- Deviating from the equity-weighted average Return on Equity within +/- 10% of 40%, calculated over a rolling five-year period.
- Deviating from budgeted net income of no more than +/- $10 million on average calculated over a five-year historical period.

Deleted: Low Risk Appetite¶
In the Basic Line of Business, deviating from the fiscal year's target value in more than the following percentage points: for the attritional loss ratio: +5, for expense loss ratio: +2, for catastrophe loss ratio: +4, for the prior year loss ratio: -5 to +2, and for the combined ratio: +10. ¶
In the Extension Line of Business, deviating from the fiscal year's target value in more than the following percentage points: for the attritional loss ratio: +10, for expense loss ratio: +5, for the prior year loss ratio: -5 to +2, and for the combined ratio: +15. ¶
In the SRE Line of Business, failing to avoid net losses.¶
Net impact of changes in interest rates on the Basic Line of Business resulting in a variance relative to the fiscal year's budgeted net income after non-recurring items of more than +/- 1% of the current market value of the Basic Claims investment portfolio.¶
Deviating by more than +/- 10% from the fiscal year's budgeted corporate net income.¶
Deviating by more than +/- 10 % from the fiscal year's budgeted expenses. ¶
Moderate Risk Appetite¶
Exposure to interest rates for non-Basic portfolios.

Manitoba Public Insurance

Earnings Risk

Risk that MPI's activities fail in achieving the desirable profitability. The risk arises from the uncertainties associated with net insurance cash flows, unexpected changes in the investment income, and from ineffective and inefficient use of resources.

SRE Line of Business

The SRE line operates on a for-profit basis, and given its relatively small business volume, greater variability in net income is expected.

Low Risk Appetite

- Failing to achieve positive net income outcomes that support sustainable profitability and long-term value creation, while remaining broadly aligned with budgeted expectations.
- Deviating from the equity-weighted average Return on Equity within +/- 10% of 0%, calculated over a rolling five-year period.
- Deviating from budgeted net income of no more than +/- $20 million calculated on average over a five-year historical period.

DVA Line of Business

DVA line operates on a cost-recovery basis.

Low Risk Appetite

- Incurring losses within a given fiscal period that is not fully funded in whole from the equity of the DVA Line of Business.

Solvency Risk

Risk that MPI is unable to absorb losses generated by all types of risks with the available capital.

Very Low Risk Appetite

- Falling in the Basic line of business below a 35% Minimum Capital Test (MCT) ratio based on 1-in-10 year stress testing.
- Falling in the Extension line of business below a 100% MCT ratio.
- Purchasing fixed income securities with a credit rating below BBB-.
- Failing in having enough cash and cash equivalents to meet our obligations.

Low Risk Appetite

- Falling in the SRE line of business below a 200% MCT ratio.
- Contracting with reinsurers having financial ratings below A-.
- Concentrating the exposure to a reinsurer within a reinsurance layer to more than 25%.

Moderate Risk Appetite

- Exposure to changes in unhedged foreign currency.

Moved [1]: <#>Falling in the SRE line of business below a 200% MCT ratio. ¶

Moved (insertion) [1]

Manitoba Public Insurance

Operational Risk

Risk that people, processes, systems, or external events impede MPI's ability to meet its objectives.

Very Low Risk Appetite

- Failing physical security.
- Employee and agent misconduct.
- Failing in being able to operate and self-fund MPI.

Low Risk Appetite

- Lack of proper business continuity planning and information technology disaster recovery.
- Process inefficiency.
- Weak internal corporate governance processes.
- Ineffective or inefficient third-party oversight.
- Ineffective or inefficient portfolio management and program or project execution.
- Ineffective or inefficient modeling design and implementation.

Moderate Risk Appetite

- Outsourcing to third parties including activities that involve outsourced services and use of independent consultants.
- Failure when piloting in the adoption of transformation initiatives.

Technology Risk

Risk that information technology processing, security, stability, capacity, and performance jeopardize core MPI's operations.

Very Low Risk Appetite

- Unauthorized access, use, or release of personally identifiable information, health data, or other sensitive data.
- Noncompliance with applicable technology directives, policies, standards or procedures.
- Lack of resiliency against cybersecurity threats.
- Unplanned downtime impacting systems which support its critical business functions.
- Deliberate misuse of information/data.
- Ineffective information/data management process.

Low Risk Appetite

- Inefficient or ineffective business resiliency planning and execution.
- Untimely analysis and diagnosis of information/data collected.
- Lack of adaptability of technology systems particularly in terms of stability, reliability, capability, performance, and capacity when responding to evolving business requirements and strategic priorities.

Moderate Risk Appetite

- Misalignment of information systems, data, and practices
- Inability to meet external user demands.
- Inability to meet internal user demands, including supporting a mobile workforce.

Manitoba Public Insurance

People Risk

Risk that resource use and employment practices do not align with MPI's mission and strategic objectives.

Very Low Risk Appetite

- Noncompliance with employee practices and with workplace safety laws and regulations.
- Noncompliance with equal employment opportunity principles, diversity principles, and ethical standards.
- Noncompliance with Employment and Labour law, rules, regulations, policy, or procedure, or other matters that could compromise MPI's integrity.
- Noncompliance with the collective agreement.
- Dishonest or fraudulent behaviour.
- Failing physical security measures.

Low Risk Appetite

- Failing in developing employees with the necessary skills and competencies, including critical thinking and sound judgment, retention, succession, leadership development, and training.
- Failing in aligning resource allocation and utilization with mission, strategic goals, and risk.
- Inefficient compensation policies.

Moderate Risk Appetite

- Ineffective or inefficient enterprise workforce plan execution.
- Delaying the recruiting and hiring of talent.
- Ineffective or inefficient employee performance management.
- Empowering staff within the appropriate delegation, oversight, and reporting parameters.
- Acquire talent outside of Manitoba.

Legal & Compliance Risk

Risk that the corporation does not fulfill its obligations under applicable laws, regulations, federal directives, mandates, or executive orders or has gaps in mission-critical functions to maintain a sound auto insurance, motor vehicle registration and driving licensing regime in the Province of Manitoba.

Very Low Risk Appetite

- Noncompliance with applicable laws, regulations, statutory reporting, tax filings, and Manitoba Government directives, mandates, and executive orders.
- Failing in abiding by contractual obligations.
- Poor employee or agent misconduct.
- Gaps in mission-critical functions required to maintain a sound auto insurance, motor vehicle registration, and driving licensing regime in the Province of Manitoba.
- Involvement in money laundering and terrorism financing.
- Having ineffective relationship with legislators.

Low Risk Appetite

- Lack of human resource guidance and practices.
- Failing in preparing for new, modified, or eliminated laws and regulations.
- Failing in managing third party relationships and risks appropriately.

Moderate Risk Appetite

- Ineffective or inefficient interagency coordination.

Manitoba Public Insurance

Reputation Risk

Risk that negative perception jeopardizes MPI's credibility, achievement of mission and strategic objectives, or its ability to maintain MPI's business model.

There are intentional overlaps with other risk categories, reflecting the interplay between other risk categories and reputational risk. Reputational risk may be directly impacted by a number of actions and/or inactions that are contemplated in other risk categories (reputational considerations are embedded across all areas of the organization), signaling the significance of reputational risk to MPI.

Very Low Risk Appetite

- Failing in performing MPI's functions as assigned to it by law.
- Suffering breaches in information security.
- Poor employee and agent conduct.
- Failing in being fiscally responsible.
- Human resources malpractices.
- Lack of responsibility and accountability.

Reputation Risk

Low Risk Appetite

- Inefficient or ineffective internal and external communication strategies.
- Lack of issue escalation and response processes.
- Tarnished MPI culture (external and internal view of MPI's vision, mission, values, and behaviours).
- Not taking a leadership role in pursuing and/or defending issues supportive of MPI's core mission.

6. IMPLEMENTATION OF MPI'S RISK APPETITE

The ERM Function, headed by the Chief Risk Officer, is responsible for the implementation of the RAS across the corporation.

All leaders of divisions, directorates and departments, as well as the Enterprise Risk Owners are responsible for the complying with this Statement.

6.1. Communication

MPI's RAS is published on the MPI's Intranet through the ERM Share Point Site.

6.2. Risk Assessments

The risk appetites described in this RAS are the broad description of the amount of risk MPI is willing to accept or retain to achieve its objectives. The RAS comprises a series of statements that describe MPI's attitude towards risk taking. The divisions, the directorates, the departments, and the enterprise risk owners are required to manage their specific risks in a manner that is consistent with the RAS, and to manage and mitigate any risks outside the agreed risk tolerances.

Manitoba Public Insurance

6.3. Risk Tolerances, Risk Limits, and Risk Metrics

MPI's risk tolerances will use the risk appetite in the RAS to inform:

- expectations for mitigating, accepting, and pursuing specific types of risk;
- boundaries and thresholds of acceptable risk taking, and;
- actions to be taken or consequence for acting beyond approved tolerances such as escalation procedures.

Risk tolerances are set to identify the level at which the risk can be accepted, rather than needing further mitigation to reduce the risk and are established at different levels across MPI (i.e., division, directorate, department) as appropriate.

Risk limits are defined to monitor that actual risk exposures across MPI do not deviate too much from the defined risk tolerances. Exceeding risk limits will typically act as a trigger for a risk management action.

Risk tolerances and risk limits are measured and monitored as per the risk metrics identified below:

- *Key Risk Indicators (KRIs)*
  KRIs are metrics used by management to provide an early signal of increasing risk exposures in different areas of the corporation.
- *Key Control Indicators (KCIs)*
  KCIs are metrics that provide information on the extent to which a given control is meeting its extended objectives (in terms of loss prevention, reduction, treatment, and acceptance). In so doing, they can be used to measure the effectiveness of particular risk controls at a particular point in time.

6.4. Monitoring & Reporting

A primary benefit of using indicators lies in their ability to link current exposure levels to risk limits, risk tolerances, and risk appetites.

By monitoring a set of appropriate risk indicators and by checking their actual values and trends against agreed tolerances and limits, an organization is able to see whether its risk exposures remain within its appetite for risk or exceed it. Hence the monitoring of risk indicators is an important mechanism by which an organization's management can gain assurance that it remains within it stated risk appetite.

The use of risk indicators also supports effective governance by providing a transparent, repeatable, and consistent means for tracking both risk exposures and management activity.

Reporting provides assurance that the risk appetite is effectively incorporated into management decisions. By embedding risk appetite within the management processes of MPI, it directly contributes to the maintenance of a robust control environment and sound risk governance.

7. REVIEW

This RAS is reviewed annually, or whenever there is a significant change to the MPI's internal and external environments. This review is coordinated by the ERM Function.

The ERMC proposes changes to the RAS to the Risk Committee of the Board ("RCB").

The RCB reviews the proposed changes by the ERMC and recommends a revised RAS for the approval by the Board of Directors ("BOD"). The BDO approves the revised version of the RAS.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

1. Purpose

This policy documents the components of the Enterprise Risk Management (ERM) Framework. It provides guidance towards effective management of potential opportunities and adverse consequences within Manitoba Public Insurance's (MPIs) business environment.

2. Scope and Applicability

The scope of this policy is enterprise-wide and applies to all business units and functions of MPI at all levels of the corporation. It shall be applied to decision making throughout all levels of the Corporation as risk management is the responsibility of all MPI stakeholders (e.g. Board, employees, consultants, contractors).

3. Definitions

The Corporation has developed definitions primarily based on ISO 31000 (2018), the internationally accepted risk management standard, and COSO's Enterprise Risk Management: Aligning Risk with Strategy and Performance (2017).

Risk – The effect of uncertainty on the achievement of the organization's objectives. Risk typically refers to an event and related effects, and is often described in terms of the impact and the associated likelihood of occurrence. Risks may also arise from trends, changes, disruptions and emerging issues, and are not always negative, but may also present opportunities.

Risk Management – Coordinated activities to identify, assess and respond to risk.

Risk Management Framework – The plans, directions and guidelines to strengthen risk management practices within the Corporation.

Inherent Risk – The risk to an entity in the absence of any explicit or targeted actions that management might take to alter the risk's severity.

Residual Risk – The risk remaining after management has taken explicit or targeted action to alter the risk's severity.

Control – Measure or action to modify risk. Controls include the policies, procedures, reporting and initiatives performed by individuals to ensure that the desired risk response is carried out. These activities take place at all levels and functions of the Corporation.

Risk Owner – The person or group with the responsibility and authority to manage a risk.

Risk Appetite – The amount of risk on a broad level an organization is willing to accept in pursuit of value.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Risk Tolerance – Refers to the acceptable deviation from the level set by the risk appetite and business objectives. The risk tolerance may be different for different risks, and should be aligned with the risk appetite statement and the corporate, divisional and departmental objectives. Risk tolerance will inform the Corporation's approach to assess and eventually accept, mitigate, transfer, or avoid risk.

Risk Level – The magnitude of risk after combining the impact and likelihood scales of a given risk. The Corporation's risk level can be critical, high, medium or low, see Appendix I.

Likelihood – The chance that a given event will occur. For more context on how likelihood is measured on an enterprise-wide basis, see Appendix I.

Impact – The extent to which a risk event might affect the Corporation. For more context on how impact is measured on an enterprise-wide basis, see Appendix I.

Event – Occurrence or change of a particular set of circumstances. An event can have one or more occurrences, and can have several causes and several consequences.

Consequence – Outcome of an event affecting objectives. A consequence can be certain or uncertain and can have positive or negative direct or indirect effects on objectives.

Risk Register – Official recording of the identified risks facing the Corporation. A catalogue of the significant risks (with impact and likelihood assessed) forms the Corporation's risk register.

Communication and Consultation – Continual and iterative processes conducted to provide, share or obtain information regarding the management of risk.

4. ERM Risk Principles and Culture

4.1 Principles

Risk taking and risk management activities across MPI are guided by the following principles:

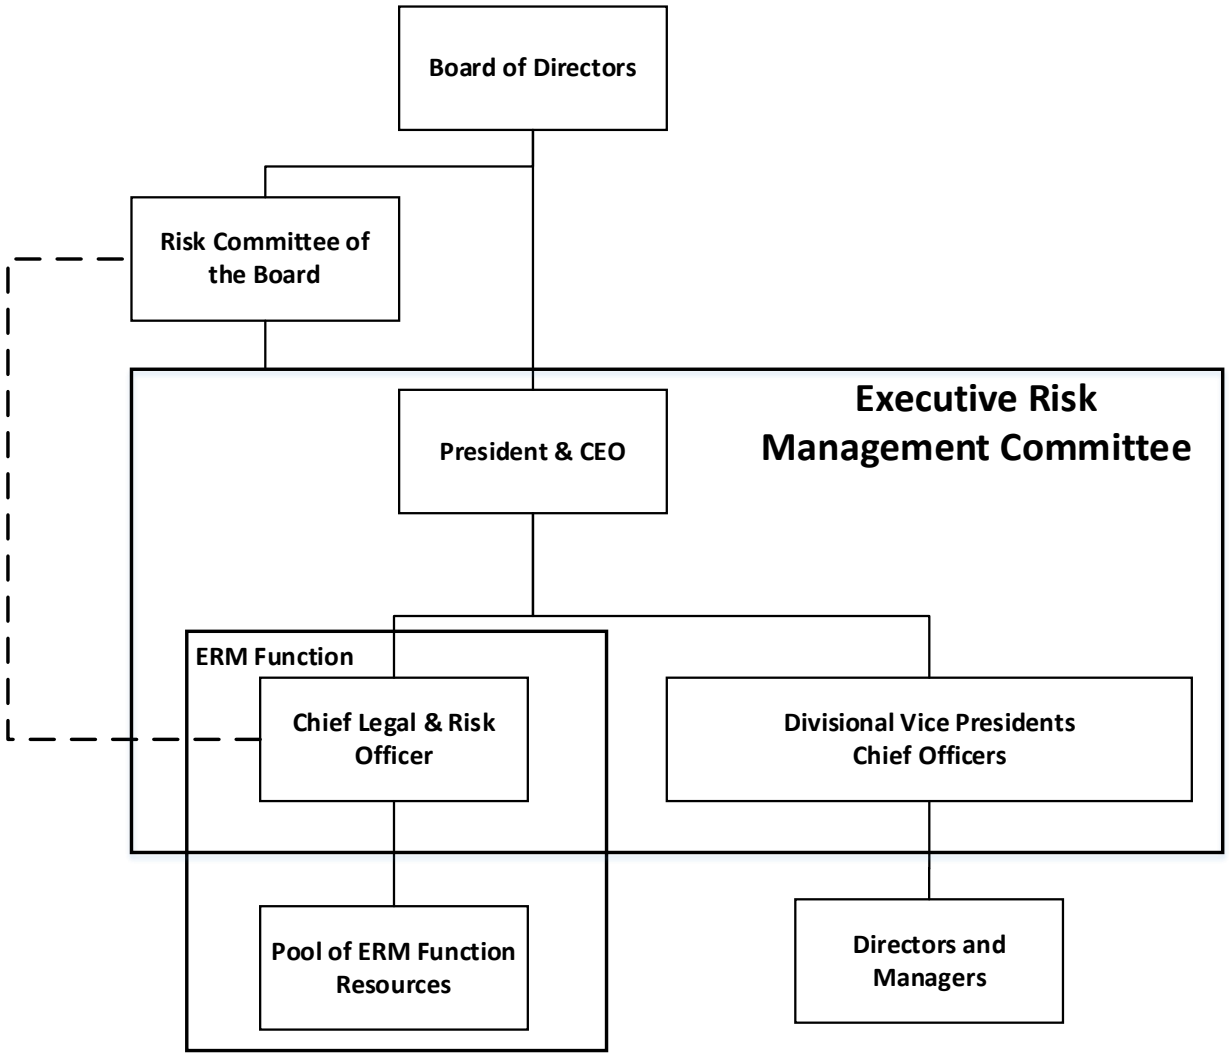
- Independent oversight will be performed on risk management and compliance activities across the organization;
- Management of risk is a responsibility at all levels of the organization following the three-lines-of-defense approach;
- Risks and compliance will be monitored to ensure that they are maintained within established thresholds that are aligned with business unit risk limits;
- All material risks and compliance issues to which the organization is exposed are identified, measured, managed, monitored and reported;
- Decision-making is based on a clear understanding of risk and compliance, accompanied by robust metrics and analysis; and
- A continuous improvement approach will be used to develop and sustain the risk culture.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

4.2 Culture

The organization will adopt a continuous improvement approach to develop and sustain its risk culture by continuously assessing and improving its behavior in the following areas:

Figure 1: Risk Culture with the Corporation



Risk Leadership: Clarity of Direction	• Senior management sets clear and consistent expectations for managing risks • Leaders model risk management thinking and actively discuss tolerance to risk issues
Responding to Bad News: Welcoming Disclosure	• Senior management actively seeks out information about risk events • Those that are open and honest about risks are recognized
Risk Governance: Taking Accountability	• Management is clear about their accountability for managing business risks • Role descriptions and targets include risk accountabilities
Risk Transparency: Risk Information Flowing	• Timely communication of risk information across the organization • Risk events are seen as an opportunity to learn
Risk Resources: Empowered Risk Function	• The risk function has a defined remit and has the support of leaders • It can challenge how risks are managed
Risk Competence: Embedded Risk Skills	• A structure of risk champions support those managing risks • Training programs are in place for all staff
Risk Decisions: Informed Risk Decisions	• Leaders seek out risk information in supporting decisions • The business' willingness to take on risks is understood and communicated
Rewarding Appropriate Risk Taking	• Performance management linked to risk taking • Leaders are supportive of those actively seeking to understand and manage risks

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5. Governance

The risk governance structure is shown below.

Figure 2: Risk Governance Chart

Dotted line indicates risk reporting structure of the CRO to the Risk Committee of the Board

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5.1 Roles and Responsibilities

This section sets out the roles and responsibilities of the Board of Directors, Risk Committee of the Board, President and Chief Executive Officer, the Executive Risk Management Committee, Executive Management, ERM Function, Enterprise Risk Owners, Directors and Management, and Employees to ensure appropriate management and mitigation of significant risks.

5.1.1 Board of Directors

The Board of Directors (Board) is responsible for overall oversight of the ERM Program, including direction, guidance, and monitoring. The Board may delegate some of the responsibilities outlined below to the Risk Committee.

Key risk responsibilities include:

- Provide risk management philosophy direction;
- Provide leadership and guidance with respect to the ERM Program implementation and maintenance;
- Promote high ethical and integrity standards and establish a culture within the Corporation that emphasizes to all levels of team members the importance of risk management;
- Develop and provide a strong environment to facilitate sound and prudent risk taking and risk managing activities;
- Facilitate open communication between management, Risk Committee of the Board, and the Board with respect to risk;
- Ensure integration of risk management into strategic objective setting, ongoing measurement processes and key decision-making points;
- Review the portfolio view of risks against its risk appetite;
- Approve risk appetite as recommended by the Risk Committee of the Board; and
- Approve the ERM policy as recommended by the Risk Committee of the Board.

5.1.2 Risk Committee of the Board (RCB)

In relation to enterprise risk, the RCB provides advice to the Board on enterprise risk oversight matters and escalates breaches.

Key risk responsibilities include:

- Advise the Board in its oversight of the Corporation's risks;
- Monitor the management of the Corporation's top enterprise risks along with any action plans to address risk mitigations and opportunities;
- Review of management's identification of new key risks, innovations, opportunities or risk assessments that have materially changed;

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Monitor the status of risk identification and risk management activities;
- Ensure risk treatments strategies selected are in alignment with the Corporation's risk appetite;
- Review risk appetite as recommended by the Executive Risk Management Committee and recommend for approval to the Board;
- Review the ERM policy as well as assess annually to ensure it remains relevant and recommend for approval to the Board;
- Ensure that effective processes are in place for the identification, measurement, prioritization, management, monitoring reporting, and oversight on existing and emerging risks;
- Ensure that appropriate risk systems and ERM function resources are in place to support execution of risk processes;
- Ensure that the ERM function has independence to discharge its oversight responsibilities;
- Review and assess compliance with the ERM Policy and the Risk Appetite Statement as reported by the ERM Function and escalate breaches to the Board;
- Monitor and oversee the effectiveness of the ERM Program;
- Monitor the risk treatment plans for corporate level risks assessed with critical and high residual risk level; and
- May engage a third party or Internal Audit to assess the adequacy and effectiveness of the ERM Program.

5.1.3 President and Chief Executive Officer (CEO)

The President and CEO is directly accountable to the Board for the management of all risks and the ERM Program. The President and CEO is also the ERM Sponsor.

Key risk responsibilities include:

- Promote high ethical and integrity standards and establish a culture within the Corporation that emphasizes to all levels of team members the importance of risk management;
- Oversee the establishment, implementation, and maintenance of the ERM Program, including ERM Framework, defining roles and responsibilities, and ERM Policy;
- Oversee the implementation and maintenance of an effective ERM Program;
- Oversee development and use of common risk management language that includes common measures around likelihood and impact, and common risk categories;

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Oversee that processes are in place for the identification, measurement, prioritization, management, monitoring reporting, and oversight on existing and emerging risk;
- Promote an ERM competence throughout the Corporation, including facilitating development of technical ERM expertise;
- Oversee integration of risk management into strategic objective setting, ongoing measurement processes and key decision-making points;
- Oversee the development of risk appetite and risk tolerances;
- Review the portfolio view of risks and consider it against the Corporation's risk appetite; and
- Ensure risk treatment strategies selected are in alignment with the Corporation's risk appetite.

5.1.4 Executive Risk Management Committee (ERMC)

The ERMC is the corporate executive level risk committee responsible for the management and oversight of all forms of risks and the ERM program within the Corporation. The ERMC is chaired by the CEO (or delegate), and members will be appointed by the CEO. Members are the executive heads of each division and the Chief Legal & Risk Officer (CLRO). Each member will be assigned as an Enterprise Risk Owner, to be directly responsible and fully accountable for managing on one or more risks and reporting to the ERMC. The CLRO will be responsible and accountable for providing on going reporting and escalating of compliance with ERM policy, standards, risk appetite, risk tolerances, and relevant processes to ERMC, and to RCB and the Board with and without the CEO and other members of ERMC present.

Key risk responsibilities include:

- Review ERM framework, risk appetites and ERM policy for Board approval;
- Review and approve enterprise risk tolerances proposed by enterprise risk owners, and ERM standards;
- Champion risk management within the Corporation to ensure that the organization remains focused on risk;
- Ensure integration of risk management into strategic objective setting, ongoing measurement processes and key decision-making points;
- Review and address non-compliances with ERM policy, standards, risk appetite, risk tolerances, and relevant processes;
- Review key risk exposures and associated action plans;
- Review risk appetite and risk tolerance breaches along with mitigating actions and residual risk levels;

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Review and approve the processes for the identification, measurement, prioritization, management, monitoring and reporting on existing and emerging risk;
- Approve and monitor the risk treatment plans for corporate level risks assessed with critical and high residual risk level; and
- Report and escalate to the RCB as deemed necessary.

5.1.5 Enterprise Risk Management (ERM) Function

The CLRO is the head of ERM function that has primary and overall responsibility for establishing the ERM Framework and performing risk oversight within the Corporation.

Key risk responsibilities include:

- Ensure that effective processes are in place for the identification, measurement, prioritization, management, monitoring and reporting on existing and emerging risk;
- Constructive review and challenge of the risk management activities within the corporation;
- Coordinate consistent enterprise risk identification practices across the corporation;
- Build and maintain a risk register that documents existing and emerging risk;
- Ensure that processes are in place to build and maintain models including processes for on-going assessment to ensure they continue to be fit for purpose;
- Define and maintain the ERM policy and risk appetite framework, including risk tolerances levels defined by risk owners and management;
- Measure and report aggregated and disaggregated enterprise risks using a consistent methodology;
- Ensure management's risk management operating guidelines are aligned with the ERM policy, ERM framework, process, standards, risk appetite and risk tolerances;
- Provide input on developing mitigation strategies;
- Independently monitor and provide ongoing ERM reporting and escalations to the ERMC, and the Board, including on reporting on compliance with the ERM policy, standards, risk appetite and tolerance and relevant processes and operating guidelines;
- Develop and maintain appropriate risks systems required to support the execution of risk processes;
- Develop and maintain a risk function with adequate resources;

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Provide advice to the enterprise risk owners, CEO, ERMC, RCB and the Board; and
- Coordinate risk management education and training.

5.1.6 Enterprise Risk Owner

Enterprise Risk Owners have primary responsibility and accountability for identification, measurement, management, monitoring, reporting and escalating of the enterprise-wide risks.

Key risk responsibilities include:

- Ensure risks are identified, assessed, managed and monitored for enterprise risks;
- Aggregate and clearly articulate enterprise risks;
- Recommend and acquire approval for the enterprise risk tolerances;
- Establish and monitor enterprise-wide controls for enterprise risks;
- Ensure treatment plans for enterprise risks are created, effectively executed, and monitored;
- Approve the risk treatment plans for corporate level risks assessed with medium and low residual risk level;
- Approve the risk treatment plans for divisional level risks assessed with critical and high residual risk level;
- Acquire the required approval by the ERMC of the risk treatment plans for corporate level risks assessed with critical and high residual risk level;
- Monitor the risk treatment plans for corporate level risks assessed with critical, high, medium and low residual risk level;
- Monitor the risk treatment plans for divisional level risks assessed with critical, high, medium and low residual risk level;
- Regularly report, escalate and communicate on enterprise risks to the ERM Committee, the Chief Legal & Risk Officer, and the Risk Committee of the Board, as applicable based on the risk tolerances; and
- Internal and external environments are scanned for emerging risks and opportunities.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5.1.7 Vice-Presidents, Directors, and Managers

Vice-Presidents are the ultimate risk owners at the divisional level. Directors and managers are the ultimate risk owners at the directorate/department level. Vice-Presidents, Directors, and Managers are primarily responsible and accountable for the identification, measurement, management, monitoring, reporting, and escalating of the risks within the areas they lead.

Key risk responsibilities include:

- Adhere to the ERM policy, standards, processes, risk appetite and risk tolerances;
- Establish, implement and execute risk management operating guidelines to identify, measure, monitor, manage, mitigate and report significant risk exposures;
- Recommend divisional and directorate/department level risk tolerance to the Enterprise Risk Owners;
- Acquire the required approval by the Enterprise Risk Owner of risk treatment plans for divisional level risks or by the Vice-President for directorate/department level risks, as applicable;
- Report and seek approval for risk tolerance levels for individual risks which exceed enterprise risk tolerance levels;
- Ensure an appropriate level of resources are allocated, in alignment with established risk tolerance targets, for assessing and managing risk;
- Integrate risk in all strategic planning and decision making;
- Monitor risk treatment plans for divisional or for directorate/department level risks for the divisions and/or departments unit they lead;
- Escalate and communicate on divisional or directorate/department level risks to the Enterprise Risk Owner, the divisional Vice President, the Manager of ERM, or the Director of Risk, Privacy & Compliance, as applicable based on the risk tolerances (see Appendix 2 Risk Escalation Process); and
- Internal and external environments are scanned for emerging risks and opportunities for their respective division and/or department; and
- Communicate risk management requirements to management and staff.

5.1.8 Employees

- All staff members are responsible for effective management of risk, particularly within their own areas of control; and
- Risk management processes should be integrated with ordinary business functions and activities. Employees are responsible for adhering to all applicable risk policies, standards, procedures and guidelines.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5.2 Three Lines of Defence

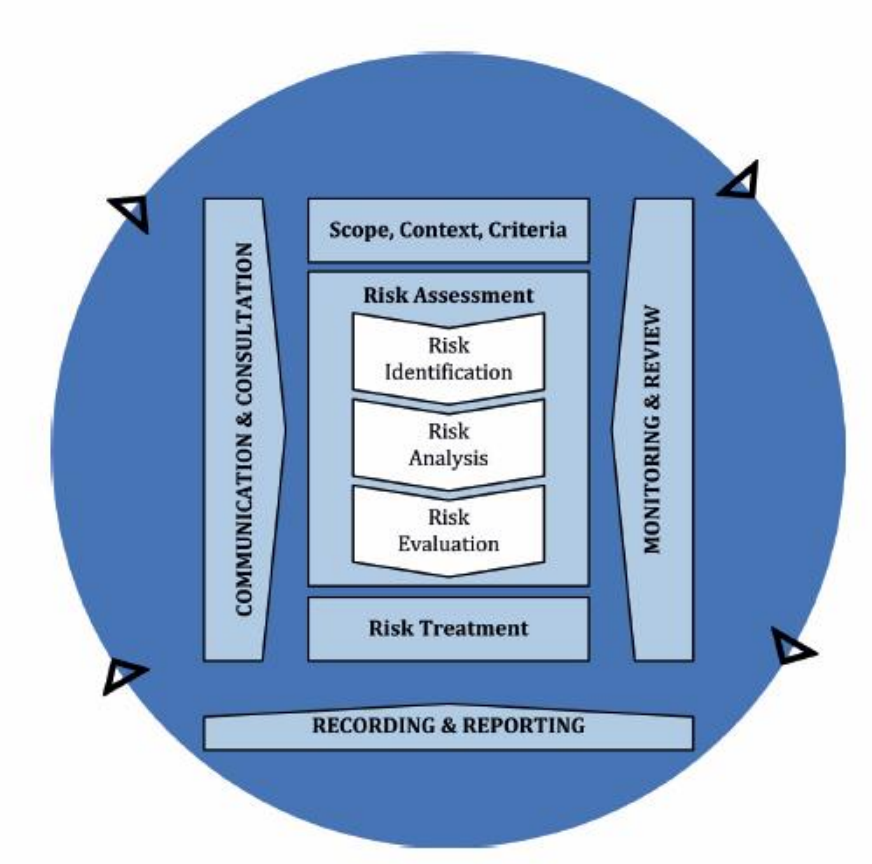
MPI operates a three lines of defence governance model for the Corporation as summarized below.

Figure 3: Three Lines of Defence

First Line of Defence	**Second Line of Defence**	**Third Line of Defence**
Business units or functions that perform the day-to-day operations.	An independent Risk Management function or unit that does not have responsibility for day-to-day operations.	An independent internal audit function or unit outside of the first two line of defence.
The primary risk takers, have primary responsibility for day-to-day risk management, follow a systematic risk process.	Responsible for maintaining the risk management framework and performing oversight and challenge to objectively assess first line activities.	Provide independent and objective assurance on the overall effectiveness of the first two lines of defence and advise how they could be improved.
Includes employees that perform the day-to-day operations, supervisors, managers, directors, and vice presidents.	Includes Enterprise Risk Management (ERM) Function, Compliance Office and other risk and other oversight groups in the Corporation.	Includes Internal Auditors

6. Risk Appetite

The Corporation's risk appetite refers to the level of risk that the corporation is willing to accept in pursuit of value, which influences how risks are assessed and treated. Risk appetite should be approved annually by the Board.



Risk tolerances are established for each identified significant risk and align with the level of risk appetite set by the Board. Risk Tolerances are the acceptable deviation from the level of the risk appetite, and are set to identify the level at which the risk can be accepted, rather than needing further mitigation to reduce the risk.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

7. Risk Management Processes

The Corporation's Risk Management Process is shown in Figure 4 below, which is a flow chart expression of the risk management activities.

Figure 4: Risk Management Process

Source: ISO 31000:2018

Five interrelated components form the basis for establishing and putting ERM into practice. Each component is described as follows:

7.1 Establishing the Context: Consists of an assessment of the internal and external environment of the Corporation. This forms the foundation for defining the Corporation's risk approach and risk appetite.

- Internal Environment comprises the Corporation's objectives, risk appetite, history, culture, values, organizational structure, strategy, policies or procedures.
- External Environment comprises the social, cultural, political, legal, regulatory, financial, economic or technological environment in which the Corporation operates.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

7.2 Risk Assessment: There are three steps in the risk assessment process

a. Risk Identification: Describes those developments either internal or external to the Corporation that could significantly affect its ability to meet its strategic objectives. To assure that the full scope of the Corporation is considered, event and trend identification is done broadly, engaging a cross-section of the Corporation.

b. There are two approaches utilized for identifying key risks at the Corporation:

i. Top-down approach: starts by identifying enterprise-wide risks that affect the Corporation's strategic objectives. This approach involves the Executive Committee and the Board.

ii. Bottom-up approach: starts by identifying business unit level or operational risks.

c. Risk Analysis: Describes the extent to which potential events and trends might affect the Corporation. Events and trends are assessed by two criteria – impact and likelihood. Appendix 1 ("Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales") displays the enterprise-level risk matrix that graphically represents the impact and likelihood of each risk, as well as the corresponding management action.

i. The colour gradient from green (low) to red (critical) provides a comparative level of priority when evaluating the Corporation's risks.

ii. This matrix is used to evaluate risk at both the inherent (without management or control) and residual (with management or control) levels.

d. Risk Evaluation: Is the process of prioritizing risks (based on the result of risk analysis) for deciding which risks require immediate treatment. The decision takes into consideration the risk appetite of the Corporation, along with the interrelation and aggregate effect of key risks.

7.3 Risk Treatment: Means that once the risks are clearly identified, assessed, and prioritized, it is essential to evaluate existing mitigation plans. ERM best practices suggest first listing any mitigation plans and controls that already exist, then, brainstorming and proposing additional mitigation plans. Typical risk response considered for a risk event includes avoidance, reduction, transferring, sharing, or acceptance.

7.4 Communication and Consultation: Effective ERM program requires information to be obtained from all levels of the Corporation for identifying, assessing and responding to risk. MPI staff will be encouraged to identify risks that are both internal and external to the institution. The knowledge gained through ERM will be communicated with stakeholders in a relevant and timely manner.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

7.5 Monitoring and Review Refers to managing risk during day-to-day operations. Management will complete periodic evaluations to assess the scope, methodology and frequency of risk assessment practices to ensure the accuracy of information in the Corporation's risk register.

7.6 Recording and Reporting: Regular risk reporting combines quantitative and qualitative risk information to enable management to take appropriate action to ensure risks are managed to a desired level. Reporting on enterprise risk will be performed as appropriate for the Board of Directors and its committees, ERMC, directors and managers, various other committees, and Risk Owners. The content of the reports should be tailored to the specific audience and meet requirements such as, but not limited to:

a. Dashboard summary of key messages;
b. Current risk profile compared to risk tolerances;
c. Notable internal risk events and relevant external risk events;
d. Detailed assessments across subcategories;
e. Summary of top emerging risks;
f. Updates on Major Programs;
g. Any topical reporting requested.

In addition to regular risk reporting, escalation reporting may be performed whenever a risk tolerance is breached, and/or a significant loss event occurs. Escalation will be reported to ERM Function, ERMC, Enterprise Risk Owner and management levels based on the severity of the breach or event. Appendix 2 ("Risk Escalation Process")_describes the risk escalation to be followed throughout MPI.

8. Standards and Guidelines

Additional details and specifications on the implementation and application of this policy shall be documented in supporting standards and guidelines as appropriate, and must be aligned with this policy.

Supporting standards and guidelines shall be reviewed and updated annually or whenever there are updates to this policy that may potentially alter their contents. It is the responsibility of the head of the ERM department to ensure that the operating standards and guidelines is developed, reviewed and approved.

9. Other Risk Policies

This policy acts as an umbrella policy and is supported by other specific policies to be defined in the future.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

10. Transition Provisions

Although this policy is effective from the date the policy is approved, it is understood that not all the requirements defined in this policy can be complied with until ERM at MPI is fully functional. The organization will comply with the policy to the greatest extent possible as ERM MPI evolves and matures.

11. Periodic Review

This policy will be reviewed and updated as appropriate by the ERMC and RCB and approved by the Board of Directors on an annual basis or more frequently if required.

Appendix 1:Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales (Cont.)

c. Likelihood Scale (over 1 year)

Rare 1	Unlikely 2	Possible 3	Likely 4	Almost Certain 5
< 5% Impact is likely to occur less than once every 20 years	5% to < 10% Impact is likely to occur once every 10 to 20 years	10% to < 20% Impact is likely to occur once every 5 to 10 years	20% to < 33% Impact is likely to occur once every 3 to 5 years	33% or greater Impact is likely to occur once in less than 3 years

d. Financial Impact Scale* (over 1 year)

Very Low 1	Low 2	Medium 3	High 4	Critical 5
<$5M	$5M to < $20M	$20M to <$50M	$50M to < $100M	$100M or greater

* Both financial and non-financial impacts (processes & service risks, safety & environment, reputation, and compliance & privacy) are considered when scoring risks.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Appendix 1: Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales (Cont.)

e. Non-Financial Impact Scale* (over 1 year)

Scale	Processes & Service	Safety & Environment	Reputation	Compliance & Privacy
Critical 5	•Unable to perform essential services for extended period (2 months or more) •Extended or permanent total loss of service group data •Inability to deliver newly identified essential service	•Death and/or significant permanent disability of public or staff •Irreparable, significant damage to environment	•Public/media outcry for change to private model	•Public officials charged criminally
High 4	•Significant improvement/disruption in delivery of essential services, service data or service knowledge •Significant over/underachievement of service/service group objectives	•Serious injuries to public or staff resulting in some permanent disability •Major environmental damage – extended clean-up required/some permanent damage	•Public/media outcry for change in Administration/Board	•A Public Inquiry/trial •Exposure of critical confidential information
Medium 3	•Moderate improvement/disruption in essential services •Some gain/loss of service data service knowledge •Some over/underachievement of service objectives	•Serious injuries to public/staff •Moderate environmental damage with moderate clean-up effort required, no permanent damage	•Public/media outcry for change in company officials/Board members •Significant loss of customer/supplier trust	•Strong praise/criticism by review agencies (i.e. Crown Corporation Council) • Strong praise/criticism by external or internal audit •Exposure of significant amount of confidential information
Low 2	•Minor improvement/disruption in services, projects, or processes •Limited gain/loss of service/service group data •Minor gain/setback in achievement of service objectives	•Minor injuries •Minor, non-permanent environment damage requiring very limited clean-up efforts	•Negative media attention •Some loss of customer/supplier trust	•Out-of-court settlement • Praise/criticism by review agencies (i.e. Crown Corporation Council) • Strong recommendations from external or internal audit •Exposure of limited amount of confidential/sensitive information
Very Low 1	•No or very minor improvement/disruption in services, project or processes •No or very minor gain/loss of service data	•Results in no injuries •Very minor, non-permanent environmental damage requiring no clean-up measures	•Some negative media attention •Minor gain/setback in building customer/supplier trust	•Threat of lawsuit •Some favourable/unfavourable observations by review agencies (i.e. Crown Corporation Council •Minimal improvements suggested by external or internal audit •Limited exposure of sensitive information

* Both financial and non-financial impacts (processes & service risks, safety & environment, reputation, and compliance & privacy) are considered when scoring risks.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Appendix 2: Risk Escalation Process

Identify the Risk	Analyze & Evaluate the Risk	Escalate the Risk	Risk Treatment
1. Any employee identifies a risk that they believe may need to be addressed by their manager/director. 2. The manager/director reviews and validates the information received.	3. The manager/director reviews the existing controls, likelihood, financial and non-financial impact, and urgency of the risk. 4. The Director validates the assessment using the Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales (Appendix 1A, 1C, 1D and 1E). If the assessment results in a high or critical rating, the Director informs the ERM function.	5. ERM Function validates the assessment and provides challenge where required. 6. If the residual risk is validated to be Low or Medium – it will be managed and recorded at the operational level. 7. If the residual risk is validated to be high or critical, risk treatment plans are required to be developed, approved, and monitored as per Appendix 1.b. (Required Approval and Monitoring for Enterprise Risk Treatment Plans).	8. The ERM function facilitates presentation of the validated risk treatments and approval is obtained from the ERM Committee members. 9. The ERM function records the approved risk treatments and updates the register.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

1. Purpose

This policy documents the components of the Enterprise Risk Management (ERM) Framework. It provides guidance towards effective management of potential opportunities and adverse consequences within Manitoba Public Insurance's (MPIs) business environment.

Deleted: This document

2. Scope and Applicability

The scope of this policy is enterprise-wide and applies to all business units and functions of MPI at all levels of the corporation. It shall be applied to decision making throughout all levels of the Corporation as risk management is the responsibility of all MPI stakeholders (e.g. Board, employees, consultants, contractors).

Deleted: This policy

Deleted: . R

3. Definitions

The Corporation has developed definitions primarily based on ISO 31000 (2018), the internationally accepted risk management standard, and COSO's Enterprise Risk Management: Aligning Risk with Strategy and Performance (2017).

Risk – The effect of uncertainty on the achievement of the organization's objectives. Risk typically refers to an event and related effects, and is often described in terms of the impact and the associated likelihood of occurrence. Risks may also arise from trends, changes, disruptions and emerging issues, and are not always negative, but may also present opportunities.

Risk Management – Coordinated activities to identify, assess and respond to risk.

Risk Management Framework – The plans, directions and guidelines to strengthen risk management practices within the Corporation.

Inherent Risk – The risk to an entity in the absence of any explicit or targeted actions that management might take to alter the risk's severity.

Residual Risk – The risk remaining after management has taken explicit or targeted action to alter the risk's severity.

Control – Measure or action to modify risk. Controls include the policies, procedures, reporting and initiatives performed by individuals to ensure that the desired risk response is carried out. These activities take place at all levels and functions of the Corporation.

Risk Owner – The person or group with the responsibility and authority to manage a risk.

Risk Appetite – The amount of risk on a broad level an organization is willing to accept in pursuit of value.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Risk Tolerance – Refers to the acceptable deviation from the level set by the risk appetite and business objectives. The risk tolerance may be different for different risks, and should be aligned with the risk appetite statement and the corporate, divisional and departmental objectives. Risk tolerance will inform the Corporation's approach to assess and eventually accept, mitigate, transfer, or avoid risk.

Risk Level – The magnitude of risk after combining the impact and likelihood scales of a given risk. The Corporation's risk level can be critical, high, medium or low, see Appendix I.

Likelihood – The chance that a given event will occur. For more context on how likelihood is measured on an enterprise-wide basis, see Appendix I.

Impact – The extent to which a risk event might affect the Corporation. For more context on how impact is measured on an enterprise-wide basis, see Appendix I.

Event – Occurrence or change of a particular set of circumstances. An event can have one or more occurrences, and can have several causes and several consequences.

Consequence – Outcome of an event affecting objectives. A consequence can be certain or uncertain and can have positive or negative direct or indirect effects on objectives.

Risk Register – Official recording of the identified risks facing the Corporation. A catalogue of the significant risks (with impact and likelihood assessed) forms the Corporation's risk register.

Communication and Consultation – Continual and iterative processes conducted to provide, share or obtain information regarding the management of risk.

4. ERM Risk Principles and Culture

4.1 Principles

Risk taking and risk management activities across MPI are guided by the following principles:

- Independent oversight will be performed on risk management and compliance activities across the organization;
- Management of risk is a responsibility at all levels of the organization following the three-lines-of-defense approach;
- Risks and compliance will be monitored to ensure that they are maintained within established thresholds that are aligned with business unit risk limits;
- All material risks and compliance issues to which the organization is exposed are identified, measured, managed, monitored and reported;
- Decision-making is based on a clear understanding of risk and compliance, accompanied by robust metrics and analysis; and
- A continuous improvement approach will be used to develop and sustain the risk culture.

4

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

4.2 Culture

The organization will adopt a continuous improvement approach to develop and sustain its risk culture by continuously assessing and improving its behavior in the following areas:

Figure 1: Risk Culture with the Corporation

Risk Leadership: Clarity of Direction	• Senior management sets clear and consistent expectations for managing risks • Leaders model risk management thinking and actively discuss tolerance to risk issues
Responding to Bad News: Welcoming Disclosure	• Senior management actively seeks out information about risk events • Those that are open and honest about risks are recognized
Risk Governance: Taking Accountability	• Management is clear about their accountability for managing business risks • Role descriptions and targets include risk accountabilities
Risk Transparency: Risk Information Flowing	• Timely communication of risk information across the organization • Risk events are seen as an opportunity to learn
Risk Resources: Empowered Risk Function	• The risk function has a defined remit and has the support of leaders • It can challenge how risks are managed
Risk Competence: Embedded Risk Skills	• A structure of risk champions support those managing risks • Training programs are in place for all staff
Risk Decisions: Informed Risk Decisions	• Leaders seek out risk information in supporting decisions • The business' willingness to take on risks is understood and communicated
Rewarding Appropriate Risk Taking	• Performance management linked to risk taking • Leaders are supportive of those actively seeking to understand and manage risks

6

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5.1 Roles and Responsibilities

This section sets out the roles and responsibilities of the Board of Directors, Risk Committee of the Board, President and Chief Executive Officer, the Executive Risk Management Committee, Executive Management, ERM Function, Enterprise Risk Owners, Directors and Management, and Employees to ensure appropriate management and mitigation of significant risks.

5.1.1 Board of Directors

The Board of Directors (Board) is responsible for overall oversight of the ERM Program, including direction, guidance, and monitoring. The Board may delegate some of the responsibilities outlined below to the Risk Committee.

Key risk responsibilities include:

- Provide risk management philosophy direction;
- Provide leadership and guidance with respect to the ERM Program implementation and maintenance;
- Promote high ethical and integrity standards and establish a culture within the Corporation that emphasizes to all levels of team members the importance of risk management;
- Develop and provide a strong environment to facilitate sound and prudent risk taking and risk managing activities;
- Facilitate open communication between management, Risk Committee of the Board, and the Board with respect to risk;
- Ensure integration of risk management into strategic objective setting, ongoing measurement processes and key decision-making points;
- Review the portfolio view of risks against its risk appetite;
- Approve risk appetite as recommended by the Risk Committee of the Board; and
- Approve the ERM policy as recommended by the Risk Committee of the Board.

5.1.2 Risk Committee of the Board (RCB)

In relation to enterprise risk, the RCB provides advice to the Board on enterprise risk oversight matters and escalates breaches.

Key risk responsibilities include:

- Advise the Board in its oversight of the Corporation's risks;
- Monitor the management of the Corporation's top enterprise risks along with any action plans to address risk mitigations and opportunities;
- Review of management's identification of new key risks, innovations, opportunities or risk assessments that have materially changed;

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Monitor the status of risk identification and risk management activities;
- Ensure risk treatments strategies selected are in alignment with the Corporation's risk appetite;
- Review risk appetite as recommended by the Executive Risk Management Committee and recommend for approval to the Board;
- Review the ERM policy as well as assess annually to ensure it remains relevant and recommend for approval to the Board;
- Ensure that effective processes are in place for the identification, measurement, prioritization, management, monitoring reporting, and oversight on existing and emerging risks;
- Ensure that appropriate risk systems and ERM function resources are in place to support execution of risk processes;
- Ensure that the ERM function has independence to discharge its oversight responsibilities;
- Review and assess compliance with the ERM Policy and the Risk Appetite Statement as reported by the ERM Function and escalate breaches to the Board;
- Monitor and oversee the effectiveness of the ERM Program;
- Monitor the risk treatment plans for corporate level risks assessed with critical and high residual risk level; and
- May engage a third party or Internal Audit to assess the adequacy and effectiveness of the ERM Program.

5.1.3 President and Chief Executive Officer (CEO)

The President and CEO is directly accountable to the Board for the management of all risks and the ERM Program. The President and CEO is also the ERM Sponsor.

Key risk responsibilities include:

- Promote high ethical and integrity standards and establish a culture within the Corporation that emphasizes to all levels of team members the importance of risk management;
- Oversee the establishment, implementation, and maintenance of the ERM Program, including ERM Framework, defining roles and responsibilities, and ERM Policy;
- Oversee the implementation and maintenance of an effective ERM Program;
- Oversee development and use of common risk management language that includes common measures around likelihood and impact, and common risk categories;

8

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Oversee that processes are in place for the identification, measurement, prioritization, management, monitoring reporting, and oversight on existing and emerging risk;
- Promote an ERM competence throughout the Corporation, including facilitating development of technical ERM expertise;
- Oversee integration of risk management into strategic objective setting, ongoing measurement processes and key decision-making points;
- Oversee the development of risk appetite and risk tolerances;
- Review the portfolio view of risks and consider it against the Corporation's risk appetite; and
- Ensure risk treatment strategies selected are in alignment with the Corporation's risk appetite.

Deleted: s

5.1.4 Executive Risk Management Committee (ERMC)

The ERMC is the corporate executive level risk committee responsible for the management and oversight of all forms of risks and the ERM program within the Corporation. The ERMC is chaired by the CEO (or delegate), and members will be appointed by the CEO. Members are the executive heads of each division and the Chief Legal & Risk Officer (CLRO). Each member will be assigned as an Enterprise Risk Owner, to be directly responsible and fully accountable for managing on one or more risks and reporting to the ERMC. The CLRO will be responsible and accountable for providing on going reporting and escalating of compliance with ERM policy, standards, risk appetite, risk tolerances, and relevant processes to ERMC, and to RCB and the Board with and without the CEO and other members of ERMC present.

Key risk responsibilities include:

- Review ERM framework, risk appetites and ERM policy for Board approval;
- Review and approve enterprise risk tolerances proposed by enterprise risk owners, and ERM standards;
- Champion risk management within the Corporation to ensure that the organization remains focused on risk;
- Ensure integration of risk management into strategic objective setting, ongoing measurement processes and key decision-making points;
- Review and address non-compliances with ERM policy, standards, risk appetite, risk tolerances, and relevant processes;
- Review key risk exposures and associated action plans;
- Review risk appetite and risk tolerance breaches along with mitigating actions and residual risk levels;

9

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Review and approve the processes for the identification, measurement, prioritization, management, monitoring and reporting on existing and emerging risk;
- Approve and monitor the risk treatment plans for corporate level risks assessed with critical and high residual risk level; and
- Report and escalate to the RCB as deemed necessary.

5.1.5 Enterprise Risk Management (ERM) Function

The CLRO is the head of ERM function that has primary and overall responsibility for establishing the ERM Framework and performing risk oversight within the Corporation.

Key risk responsibilities include:

- Ensure that effective processes are in place for the identification, measurement, prioritization, management, monitoring and reporting on existing and emerging risk;

Deleted: .

- Constructive review and challenge of the risk management activities within the corporation;
- Coordinate consistent enterprise risk identification practices across the corporation;
- Build and maintain a risk register that documents existing and emerging risk;
- Ensure that processes are in place to build and maintain models including processes for on-going assessment to ensure they continue to be fit for purpose;
- Define and maintain the ERM policy and risk appetite framework, including risk tolerances levels defined by risk owners and management;
- Measure and report aggregated and disaggregated enterprise risks using a consistent methodology;
- Ensure management's risk management operating guidelines are aligned with the ERM policy, ERM framework, process, standards, risk appetite and risk tolerances;
- Provide input on developing mitigation strategies;
- Independently monitor and provide ongoing ERM reporting and escalations to the ERMC, and the Board, including on reporting on compliance with the ERM policy, standards, risk appetite and tolerance and relevant processes and operating guidelines;
- Develop and maintain appropriate risks systems required to support the execution of risk processes;
- Develop and maintain a risk function with adequate resources;

10

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Provide advice to the enterprise risk owners, CEO, ERMC, RCB and the Board; and
- Coordinate risk management education and training.

5.1.6 Enterprise Risk Owner

Enterprise Risk Owners have primary responsibility and accountability for identification, measurement, management, monitoring, reporting and escalating of the enterprise-wide risks.

Key risk responsibilities include:

- Ensure risks are identified, assessed, managed and monitored for enterprise risks;
- Aggregate and clearly articulate enterprise risks;
- Recommend and acquire approval for the enterprise risk tolerances;
- Establish and monitor enterprise-wide controls for enterprise risks;
- Ensure treatment plans for enterprise risks are created, effectively executed, and monitored;
- Approve the risk treatment plans for corporate level risks assessed with medium and low residual risk level;
- Approve the risk treatment plans for divisional level risks assessed with critical and high residual risk level;
- Acquire the required approval by the ERMC of the risk treatment plans for corporate level risks assessed with critical and high residual risk level;
- Monitor the risk treatment plans for corporate level risks assessed with critical, high, medium and low residual risk level;
- Monitor the risk treatment plans for divisional level risks assessed with critical, high, medium and low residual risk level;
- Regularly report, escalate and communicate on enterprise risks to the ERM Committee, the Chief Legal & Risk Officer, and the Risk Committee of the Board, as applicable based on the risk tolerances; and
- Internal and external environments are scanned for emerging risks and opportunities.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5.1.7 Vice-Presidents, Directors, and Managers

Vice-Presidents are the ultimate risk owners at the divisional level. Directors and managers are the ultimate risk owners at the directorate/department level. Vice-Presidents, Directors, and Managers are primarily responsible and accountable for the identification, measurement, management, monitoring, reporting, and escalating of the risks within the areas they lead.

Key risk responsibilities include:

- Adhere to the ERM policy, standards, processes, risk appetite and risk tolerances;
- Establish, implement and execute risk management operating guidelines to identify, measure, monitor, manage, mitigate and report significant risk exposures;
- Recommend divisional and directorate/department level risk tolerance to the Enterprise Risk Owners;
- Acquire the required approval by the Enterprise Risk Owner of risk treatment plans for divisional level risks or by the Vice-President for directorate/department level risks, as applicable;
- Report and seek approval for risk tolerance levels for individual risks which exceed enterprise risk tolerance levels;
- Ensure an appropriate level of resources are allocated, in alignment with established risk tolerance targets, for assessing and managing risk;
- Integrate risk in all strategic planning and decision making;
- Monitor risk treatment plans for divisional or for directorate/department level risks for the divisions and/or departments unit they lead;
- Escalate and communicate on divisional or directorate/department level risks to the Enterprise Risk Owner, the divisional Vice President, the Manager of ERM, or the Director of Risk, Privacy & Compliance, as applicable based on the risk tolerances (see Appendix 2 Risk Escalation Process); and
- Internal and external environments are scanned for emerging risks and opportunities for their respective division and/or department; and
- Communicate risk management requirements to management and staff.

Deleted: Director

Deleted: Corporate Compliance and

Deleted: Access

5.1.8 Employees

- All staff members are responsible for effective management of risk, particularly within their own areas of control; and
- Risk management processes should be integrated with ordinary business functions and activities. Employees are responsible for adhering to all applicable risk policies, standards, procedures and guidelines.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

5.2 Three Lines of Defence

MPI operates a three lines of defence governance model for the Corporation as summarized below.

Figure 3: Three Lines of Defence

First Line of Defence	Second Line of Defence	Third Line of Defence
Business units or functions that perform the day-to-day operations.	An independent Risk Management function or unit that does not have responsibility for day-to-day operations.	An independent internal audit function or unit outside of the first two line of defence.
The primary risk takers, have primary responsibility for day-to-day risk management, follow a systematic risk process.	Responsible for maintaining the risk management framework and performing oversight and challenge to objectively assess first line activities.	Provide independent and objective assurance on the overall effectiveness of the first two lines of defence and advise how they could be improved.
Includes employees that perform the day-to-day operations, supervisors, managers, directors, and vice presidents.	Includes Enterprise Risk Management (ERM) Function, Compliance Office and other risk and other oversight groups in the Corporation.	Includes Internal Auditors

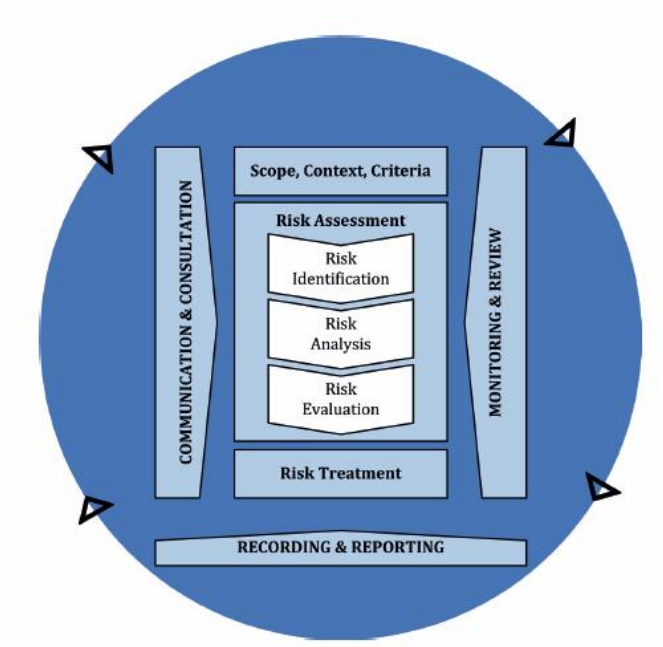
6. Risk Appetite

The Corporation's risk appetite refers to the level of risk that the corporation is willing to accept in pursuit of value, which influences how risks are assessed and treated. Risk appetite should be approved annually by the Board.

Risk tolerances are established for each identified significant risk and align with the level of risk appetite set by the Board. Risk Tolerances are the acceptable deviation from the level of the risk appetite, and are set to identify the level at which the risk can be accepted, rather than needing further mitigation to reduce the risk.



13

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

7. Risk Management Processes

The Corporation's Risk Management Process is shown in Figure 4 below, which is a flow chart expression of the risk management activities.

Figure 4: Risk Management Process

Source: ISO 31000:2018

Five interrelated components form the basis for establishing and putting ERM into practice. Each component is described as follows:

7.1 Establishing the Context: Consists of an assessment of the internal and external environment of the Corporation. This forms the foundation for defining the Corporation's risk approach and risk appetite.

- Internal Environment comprises the Corporation's objectives, risk appetite, history, culture, values, organizational structure, strategy, policies or procedures.
- External Environment comprises the social, cultural, political, legal, regulatory, financial, economic or technological environment in which the Corporation operates.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

7.2 Risk Assessment: There are three steps in the risk assessment process

a. Risk Identification: Describes those developments either internal or external to the Corporation that could significantly affect its ability to meet its strategic objectives. To assure that the full scope of the Corporation is considered, event and trend identification is done broadly, engaging a cross-section of the Corporation.

b. There are two approaches utilized for identifying key risks at the Corporation:

i. Top-down approach: starts by identifying enterprise-wide risks that affect the Corporation's strategic objectives. This approach involves the Executive Committee and the Board.

ii. Bottom-up approach: starts by identifying business unit level or operational risks.

c. Risk Analysis: Describes the extent to which potential events and trends might affect the Corporation. Events and trends are assessed by two criteria – impact and likelihood. Appendix 1 ("Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales") displays the enterprise-level risk matrix that graphically represents the impact and likelihood of each risk, as well as the corresponding management action.

i. The colour gradient from green (low) to red (critical) provides a comparative level of priority when evaluating the Corporation's risks.

ii. This matrix is used to evaluate risk at both the inherent (without management or control) and residual (with management or control) levels.

d. Risk Evaluation: Is the process of prioritizing risks (based on the result of risk analysis) for deciding which risks require immediate treatment. The decision takes into consideration the risk appetite of the Corporation, along with the interrelation and aggregate effect of key risks.

7.3 Risk Treatment: Means that once the risks are clearly identified, assessed, and prioritized, it is essential to evaluate existing mitigation plans. ERM best practices suggest first listing any mitigation plans and controls that already exist, then, brainstorming and proposing additional mitigation plans. Typical risk response considered for a risk event includes avoidance, reduction, transferring, sharing, or acceptance.

7.4 Communication and Consultation: Effective ERM program requires information to be obtained from all levels of the Corporation for identifying, assessing and responding to risk. MPI staff will be encouraged to identify risks that are both internal and external to the institution. The knowledge gained through ERM will be communicated with stakeholders in a relevant and timely manner.

Deleted: In order to

Deleted: making a decision

Deleted: Is required for an e

Deleted: and

15

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

7.5 Monitoring and Review Refers to managing risk during day-to-day operations. Management will complete periodic evaluations to assess the scope, methodology and frequency of risk assessment practices to ensure the accuracy of information in the Corporation's risk register.

7.6 Recording and Reporting: Regular risk reporting combines quantitative and qualitative risk information to enable management to take appropriate action to ensure risks are managed to a desired level. Reporting on enterprise risk will be performed as appropriate for the Board of Directors and its committees, ERMC, directors and managers, various other committees, and Risk Owners. The content of the reports should be tailored to the specific audience and meet requirements such as, but not limited to:

a. Dashboard summary of key messages;
b. Current risk profile compared to risk tolerances;
c. Notable internal risk events and relevant external risk events;
d. Detailed assessments across subcategories;
e. Summary of top emerging risks;
f. Updates on Major Programs;
g. Any topical reporting requested.

In addition to regular risk reporting, escalation reporting may be performed whenever a risk tolerance is breached, and/or a significant loss event occurs. Escalation will be reported to ERM Function, ERMC, Enterprise Risk Owner and management levels based on the severity of the breach or event. Appendix 2 ("Risk Escalation Process") describes the risk escalation to be followed throughout MPI.

8. Standards and Guidelines

Additional details and specifications on the implementation and application of this policy shall be documented in supporting standards and guidelines as appropriate, and must be aligned with this policy.

Supporting standards and guidelines shall be reviewed and updated annually or whenever there are updates to this policy that may potentially alter their contents. It is the responsibility of the head of the ERM department to ensure that the operating standards and guidelines is developed, reviewed and approved.

9. Other Risk Policies

This policy acts as an umbrella policy and is supported by other specific policies to be defined in the future.

10. Transition Provisions

Although this policy is effective from the date the policy is approved, it is understood that not all the requirements defined in this policy can be complied with until ERM at MPI is fully functional. The organization will comply with the policy to the greatest extent possible as ERM MPI evolves and matures.

11. Periodic Review

This policy will be reviewed and updated as appropriate by the ERMC and RCB and approved by the Board of Directors on an annual basis or more frequently if required.

Appendix 1: Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales (Cont.)

c. Likelihood Scale (over 1 year)

Rare 1	Unlikely 2	Possible 3	Likely 4	Almost Certain 5
< 5% Impact is likely to occur less than once every 20 years	5% to < 10% Impact is likely to occur once every 10 to 20 years	10% to < 20% Impact is likely to occur once every 5 to 10 years	20% to < 33% Impact is likely to occur once every 3 to 5 years	33% or greater Impact is likely to occur once in less than 3 years

d. Financial Impact Scale* (over 1 year)

Very Low 1	Low 2	Medium 3	High 4	Critical 5
<$5M	$5M to < $20M	$20M to <$50M	$50M to < $100M	$100M or greater

* Both financial and non-financial impacts (processes & service risks, safety & environment, reputation, and compliance & privacy) are considered when scoring risks.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Appendix 1: Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales (Cont.)

e. Non-Financial Impact Scale* (over 1 year)

Scale	Processes & Service	Safety & Environment	Reputation	Compliance & Privacy
Critical 5	•Unable to perform essential services for extended period (2 months or more) •Extended or permanent total loss of service group data •Inability to deliver newly identified essential service	•Death and/or significant permanent disability of public or staff •Irreparable, significant damage to environment	•Public/media outcry for change to private model	•Public officials charged criminally
High 4	•Significant improvement/disruption in delivery of essential services, service data or service knowledge •Significant over/underachievement of service/service group objectives	•Serious injuries to public or staff resulting in some permanent disability •Major environmental damage – extended clean-up required/some permanent damage	•Public/media outcry for change in Administration/Board	•A Public Inquiry/trial •Exposure of critical confidential information
Medium 3	•Moderate improvement/disruption in essential services •Some gain/loss of service data service knowledge •Some over/underachievement of service objectives	•Serious injuries to public/staff •Moderate environmental damage with moderate clean-up effort required, no permanent damage	•Public/media outcry for change in company officials/Board members •Significant loss of customer/supplier trust	•Strong praise/criticism by review agencies (i.e. Crown Corporation Council) • Strong praise/criticism by external or internal audit •Exposure of significant amount of confidential information
Low 2	•Minor improvement/disruption in services, projects, or processes •Limited gain/loss of service/service group data •Minor gain/setback in achievement of service objectives	•Minor injuries •Minor, non-permanent environment damage requiring very limited clean-up efforts	•Negative media attention •Some loss of customer/supplier trust	•Out-of-court settlement • Praise/criticism by review agencies (i.e. Crown Corporation Council) • Strong recommendations from external or internal audit •Exposure of limited amount of confidential/sensitive information
Very Low 1	•No or very minor improvement/disruption in services, project or processes •No or very minor gain/loss of service data	•Results in no injuries •Very minor, non-permanent environmental damage requiring no clean-up measures	•Some negative media attention •Minor gain/setback in building customer/supplier trust	•Threat of lawsuit •Some favourable/unfavourable observations by review agencies (i.e. Crown Corporation Council •Minimal improvements suggested by external or internal audit •Limited exposure of sensitive information

* Both financial and non-financial impacts (processes & service risks, safety & environment, reputation, and compliance & privacy) are considered when scoring risks.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Appendix 2: Risk Escalation Process

Deleted: Corporate Risk Reporting Requirements

Deleted: ¶
Description ...

Identify the Risk	Analyze & Evaluate the Risk	Escalate the Risk	Risk Treatment
1. Any employee identifies a risk that they believe may need to be addressed by their manager/director. 2. The manager/director reviews and validates the information received.	3. The manager/director reviews the existing controls, likelihood, financial and non-financial impact, and urgency of the risk. 4. The Director validates the assessment using the Enterprise-Level Risk Matrix, Likelihood Scale, and Financial and Non-Financial Impact Scales (Appendix 1A, 1C, 1D and 1E). If the assessment results in a high or critical rating, the Director informs the ERM function.	5. ERM Function validates the assessment and provides challenge where required. 6. If the residual risk is validated to be Low or Medium – it will be managed and recorded at the operational level. 7. If the residual risk is validated to be high or critical, risk treatment plans are required to be developed, approved, and monitored as per Appendix 1.b. (Required Approval and Monitoring for Enterprise Risk Treatment Plans).	8. The ERM function facilitates presentation of the validated risk treatments and approval is obtained from the ERM Committee members. 9. The ERM function records the approved risk treatments and updates the register.

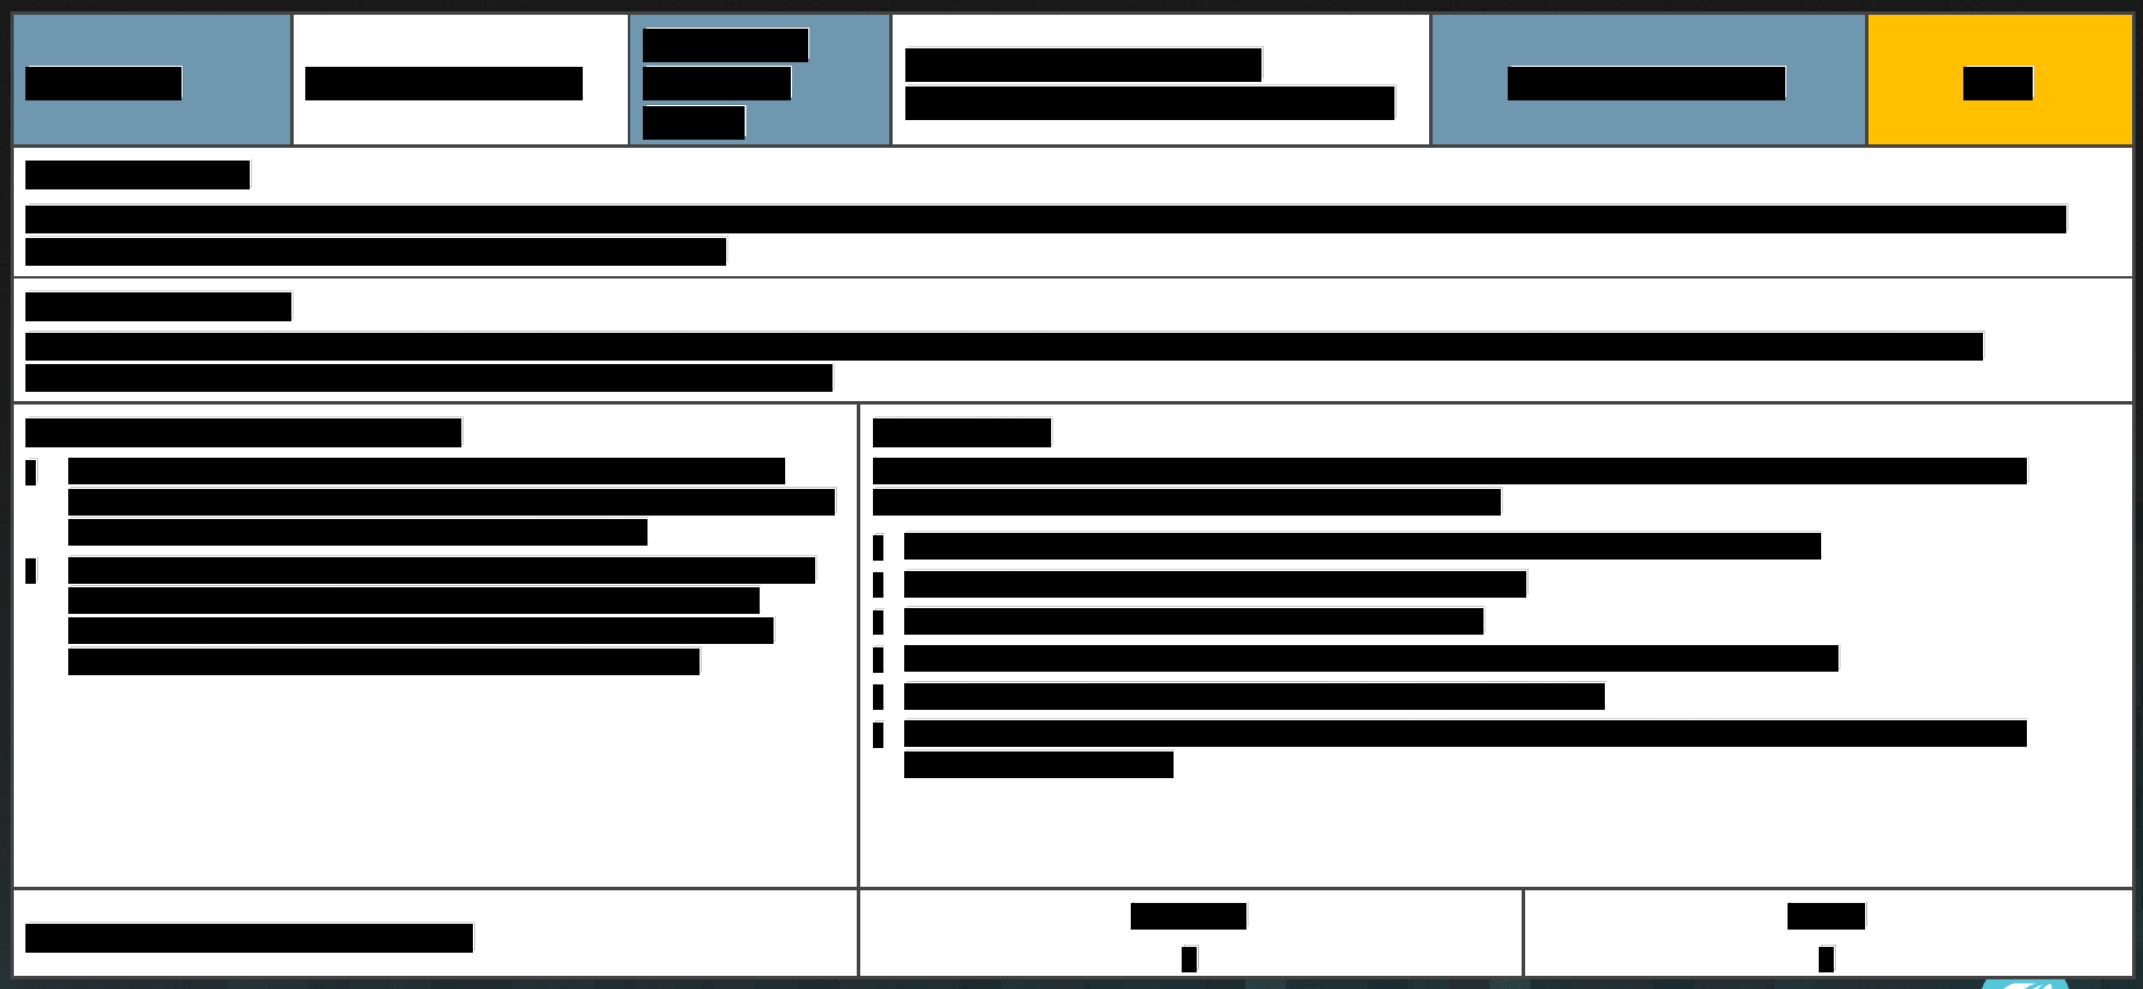
22

Top Corporate Risks for 2026/27

Rank #	Risk Name	Risk Description	Residual Risk Rating
1	**[REDACTED]**	**[REDACTED]**	High
2	**[REDACTED]**	**[REDACTED]**	High
3	Change/Transformation Execution Failure - Major Programs	Failure to successfully plan and deliver change from major programs ($3 million budgeted or more) into the operational environment.	High
4	**[REDACTED]**	**[REDACTED]**	High
5	**[REDACTED]**	**[REDACTED]**	High
6	**[REDACTED]**	**[REDACTED]**	High
7	External Fraud	Fraud attempted or perpetrated against the organization by an external party (i.e., a party without a direct relationship to the financial institution) without the involvement of an employee or affiliate of the organization.	High

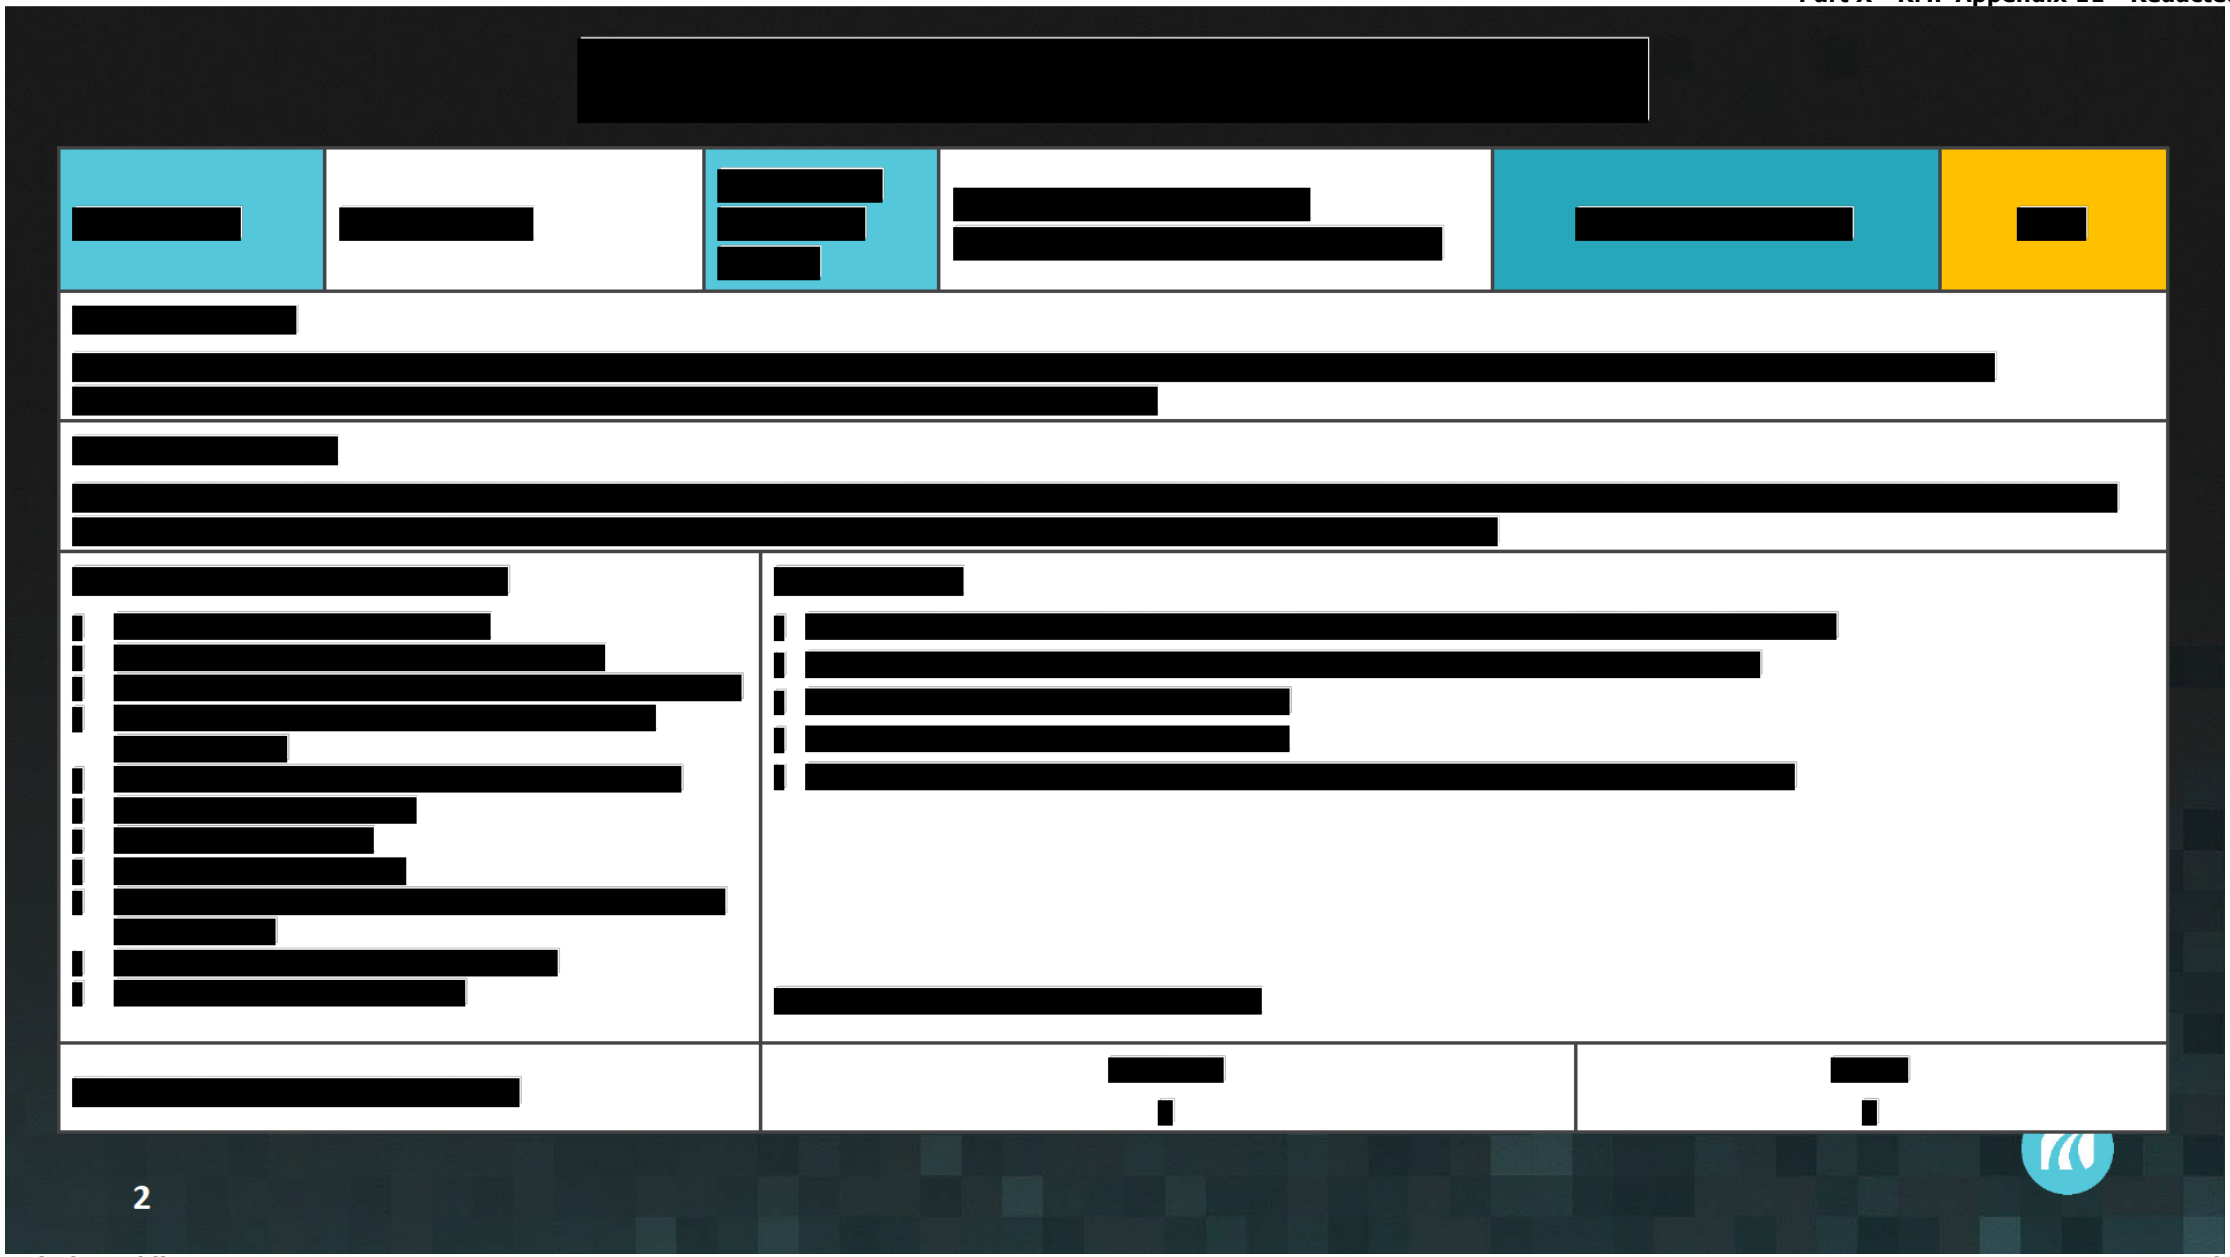
Appendix 10: Comparison of Top Corporate Risks

Risk Name	Risk Description	Was the Risk a Top Corporate Risk In				Residual Risk Level as a Top Corporate Risk				Comments on Quarter Changes
		Q1 26/27?	Q3 25/26?	Q1 25/26?	Q3 24/25?	Q1 26/27?	Q3 25/26?	Q1 25/26?	Q3 24/25?	
[REDACTED]										
[REDACTED]										
Change/Transformation Execution Failure - Major Programs	Failure to successfully plan and deliver change from major programs ($3 million budgeted or more) into the operational environment.	Yes	Yes	Yes	Yes	High	High	High	High	No Changes - Please see the Change/Transformation Execution Failure - Major Programs risk profile in RMF Appendix 7 Top Corporate Risk Profiles for the most recent information on this risk.
[REDACTED]										
[REDACTED]										
[REDACTED]										
External Fraud	Fraud attempted or perpetrated against the organization by an external party (i.e. a party without a direct relationship to the financial institution) without the involvement of an employee or affiliate of the organization)	Yes	Yes	Yes	No	High	High	High	Medium	**Q1 2025/26 - Entered List of Top Corporate Risks** SRE- related fraud and accelerating use of AI increased likelihood and potential impact of external fraud incidents. Please see the External Fraud Risk profile in RMF Appendix 7 Top Corporate Risk Profiles for further information.



Appendix 10: Comparison of Top Corporate Risks

Risk Name	Risk Description	Was the Risk a Top Corporate Risk In				Residual Risk Level as a Top Corporate Risk				
[REDACTED]										
[REDACTED]										
Pricing Risk	Pricing risk is the risk that the established premium is, or becomes, insufficient to cover expected claims, expense and underwriting profit. The risk in the losses relates to uncertainty in severity, frequency or even timing of claims incurring during the period, as well as to uncertainty related to operating expenses.	Yes	No	No	Yes	High	Medium	High	Medium	**Q1 FY2026/27 - Entered List of Top Corporate Risks** Pricing Risk has re-emerged as a high risk and is driven by the SRE line of business. The primary challenges include maintaining stable actuarial talent to support SRE pricing and limited data availability. These constraints contribute to uncertainty in pricing analysis, rate development, and forecasting.
Inflation Risk	Inflation risk refers to the reduction in real returns arising because of falling purchasing power of cash. Long term fixed dollar amount cash flows are most vulnerable to inflation. Unanticipated inflation need not be a major source of risk, if cash flows move in proportion, maintaining the real returns. The problem arises when net incoming cash flows are fixed in dollar terms, so that the impact of inflation reduces the value and therefore the real return.	Yes	Yes	Yes	No	High	High	High	Medium	No Changes - Based on the current economic environment of increasing Manitoba CPI that will result in a higher indexation fact than budgeted/reserved for but capped at 6%. Risk was accepted by MPI.



Appendix 10: Comparison of Top Corporate Risks

Risk Name	Risk Description	Was the Risk a Top Corporate Risk In				Residual Risk Level as a Top Corporate Risk				
Inadequate Capacity	Inadequate capacity planning and recruitment, leading to low productivity, limited ability to execute	Yes	No	No	Yes	High	High	N/A	Medium	**Q1 FY2026/27 - Entered List of Top Corporate Risks** Finance resources are stretched across day-to-day operations and multiple critical projects (ERP upgrade and replacement), resulting in sustained workload strain, extended hours, and limited ability to absorb additional demands. Insufficient capacity and challenges backfilling key financial roles increase the likelihood of project delays, inadequate go-live support, and potential loss of skilled staff before project completion.
[REDACTED]										
Loss of Corporate Knowledge	Loss of corporate knowledge due to excessive use of contractors in key roles and/or insufficient knowledge documentation and transfer within internal resources	No	Yes	Yes	No	Medium	High	High	N/A	**For FY Q1 26/27 Exited List of Top Corporate Risks** Significant mitigation efforts were undertaken in FY2025/26. Key improvements included implementation of succession planning, SCO development plans, SFIA assessments with targeted knowledge transfer actions, and a more structured approach to consultant utilization. Within the EPMO and Major Programs, enhanced resourcing strategies, strengthened documentation and governance, and improved knowledge transfer and transition-to-operations practices have increased organizational resilience and enabled effective management of residual knowledge risk.

2

3. Change/Transformation Execution Failure – Major Programs - Risk Profile

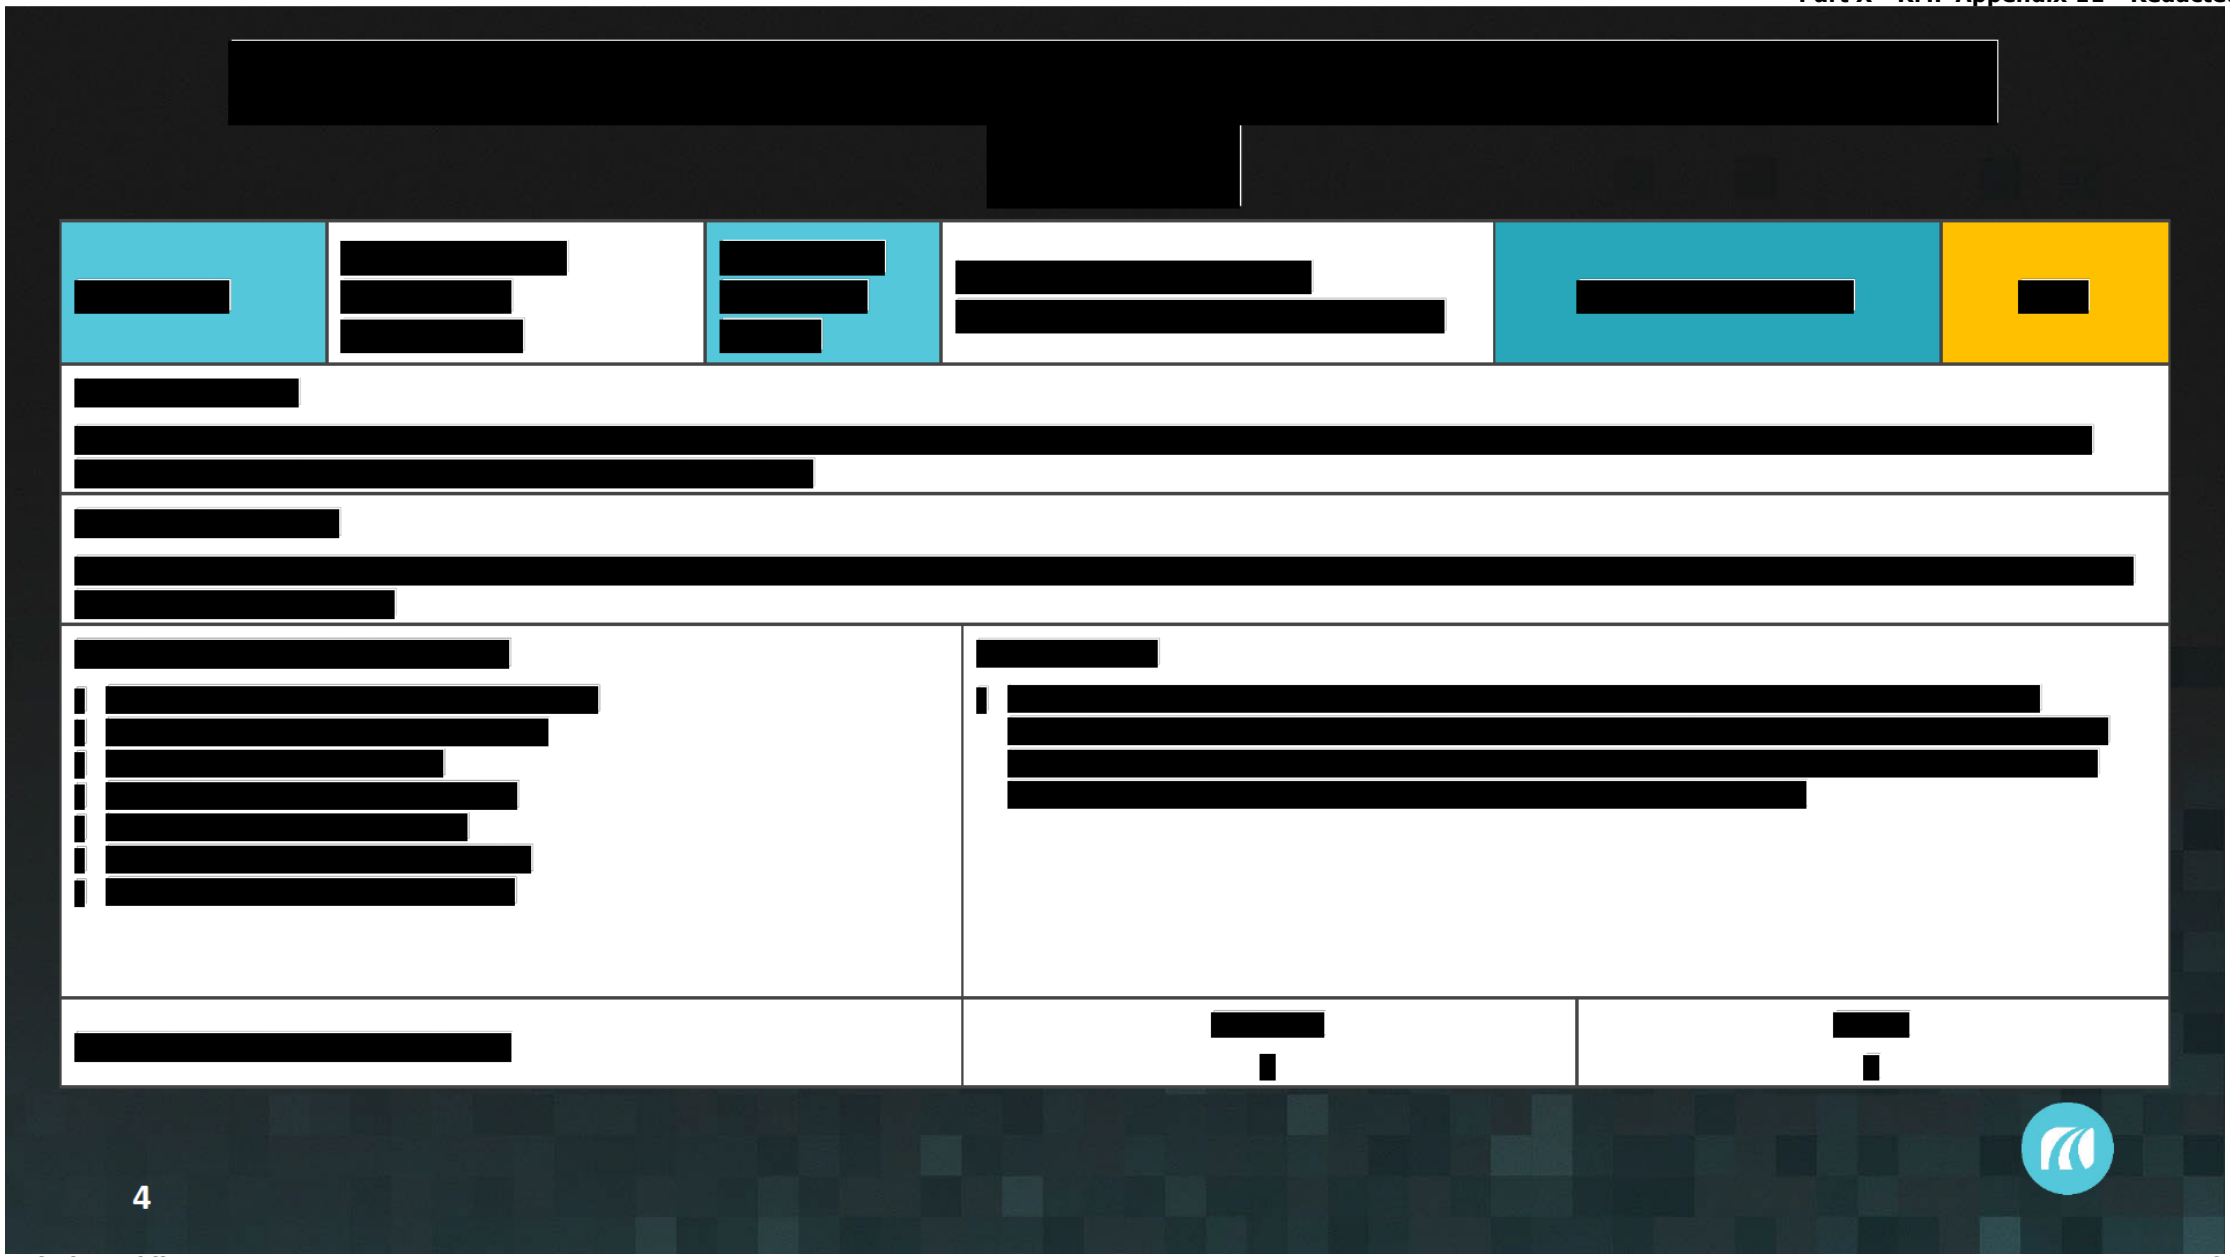
Risk Name	Change/Transformation Execution Failure – Major Programs	Enterprise-Wide Risk Owner	Vice President and Chief Customer & Product Officer	Residual Risk Level	High

Risk We Are Facing

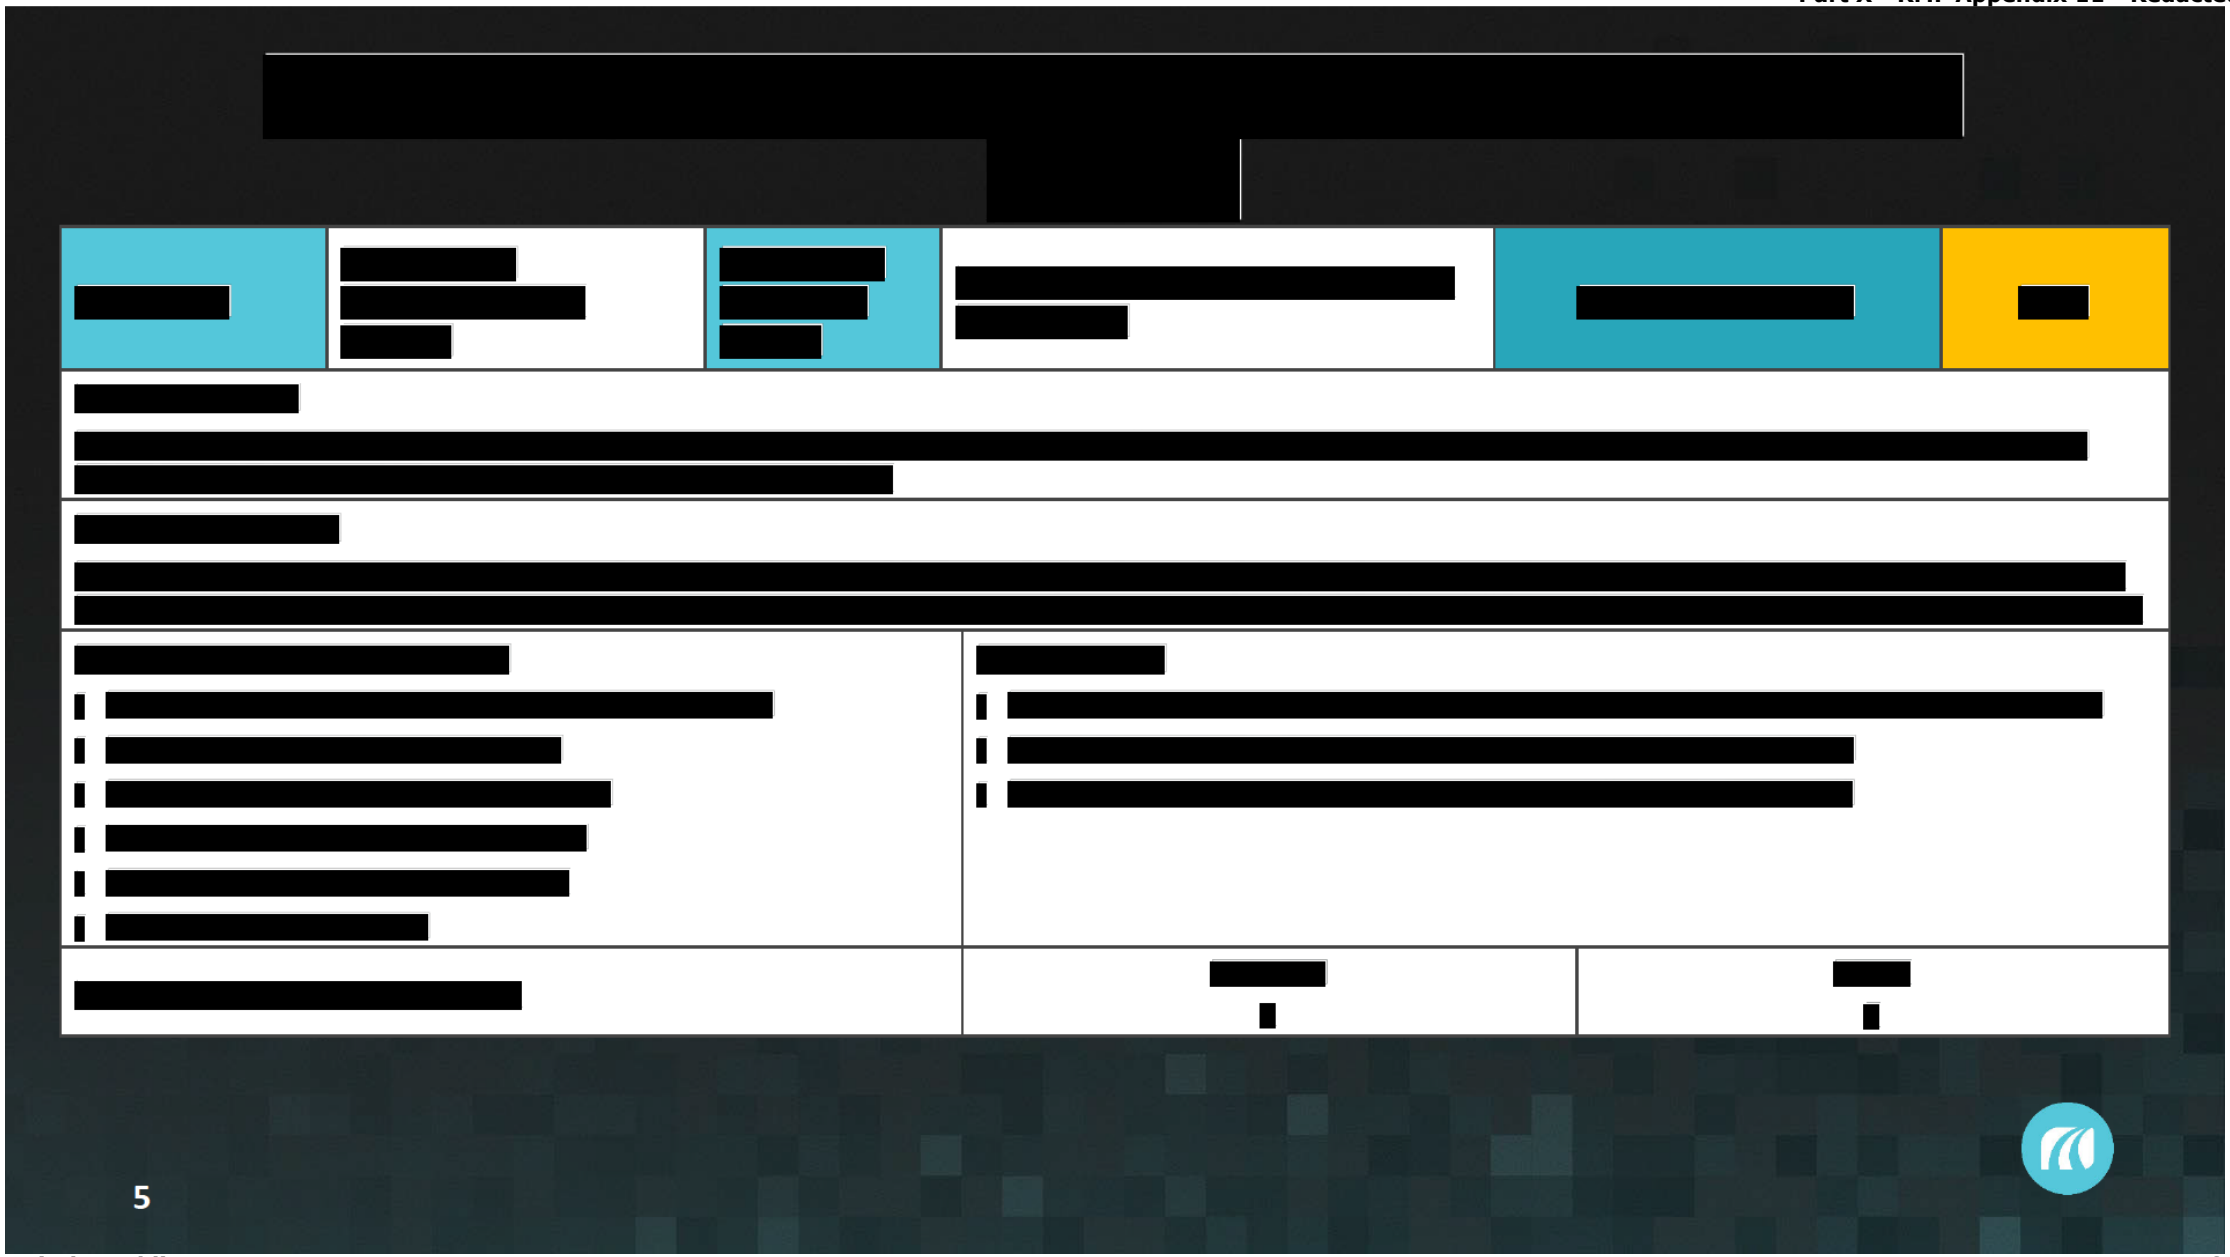
- We may fail to deliver the Major Programs commitments to the corporation on schedule and budget, due to vendors not delivering in the timelines expected, MPI resource capability and capacity constraints, underestimating complexities, or interdependencies not properly resolved.
- We may fail to deliver products and services that meet internal and external stakeholder expectations of scope and quality due to insufficient requirements.
- We may fail to deliver due to challenges related to organizational governance and decision-making accountabilities.

Potential Consequence

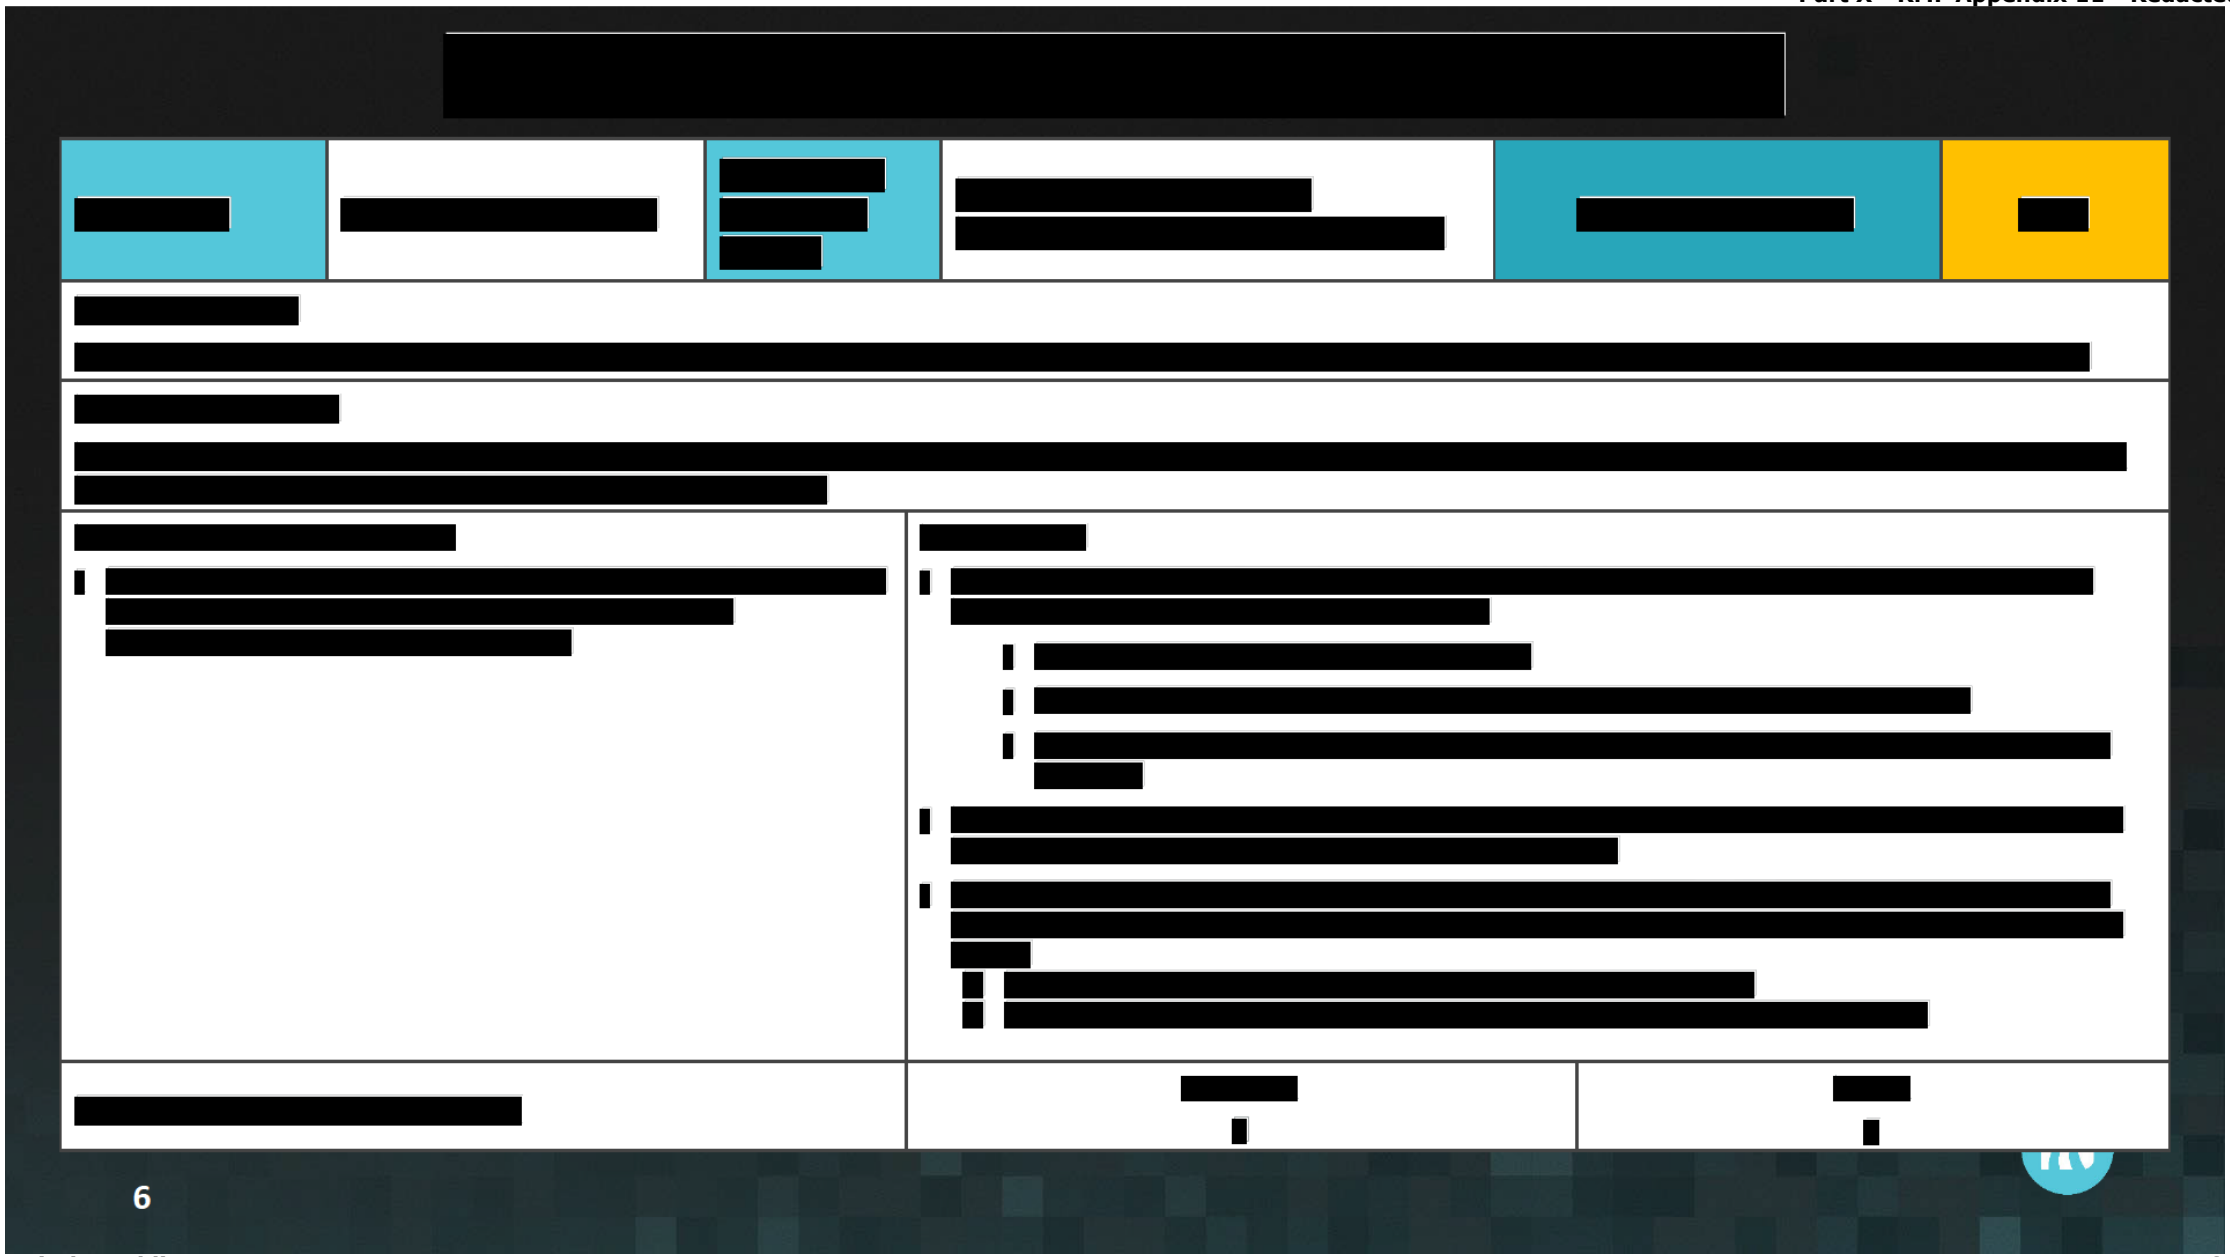
- Scheduling, delivery and resourcing failures could lead to:
- Financial impacts that exceed our approved budget including additional costs for external capability and capacity support, and extended timelines
- Loss of confidence in our ability to deliver, decrease in morale and engagement, damage to our corporate image and branding, and/or reputational damage



Existing Key Controls to Mitigate Risk



- Contract management framework is in place with defined outcome-based performance metrics and delivery milestone-linked payment mechanisms
- New Requirement Framework in place with traceability and formal impact assessment processes to support scope definition and change management
- Corporate resource capacity modeling and forecasting integrated into project planning with dedicated central management oversight.
- Major Programs governance framework is in place, including defined decision-making structures and escalation pathways.
- Data-driven continuous improvement of project management methodology with structured retrospectives and lessons learned integrated into forward planning
- New Transition to Operations process is being implemented in 2026



Risk Treatments

- Enhance procurement & vendor management processes
- Create tighter linkages across Project Control Log and new Requirements Management Framework artifacts
- Creation of new dedicated role focused on enterprise resource capacity planning and modelling for future workforce planning needs
- Implementation of enhanced reporting, including dashboards and leading indicators (KRIs) for early identification of emerging risks
- Implement an Enterprise Project Management Office function to centralize methodology and improve delivery discipline for all projects at MPI
- Improve and evolve Transition to Operations process through project/ops feedback

Residual Risk Level Supporting Data	Likelihood	Impact
	3	4

4

7. External Fraud Risk Profile

Risk Name	External Fraud	Enterprise-Wide Risk Owner	Vice President and Chief Claims Officer	Residual Risk Level	High

Risk We Are Facing

We may be exposed to external fraud perpetrated by organized or opportunistic actors seeking financial or material gain by exploiting weaknesses in business processes, identity verification, and claims or transaction controls. This includes claims fraud, identity and residency fraud, financial fraud, AI-enabled and scaled deception, and schemes involving the manipulation or cloning of vehicle identification numbers (VINs).

We have strong mature controls in claims and financial fraud, but other external fraud areas rely more on operational/manual controls, which is why the overall residual risk is high.

Potential Consequence

Potential impacts include financial losses resulting from fraudulent claims or transactions, increased operational costs related to detection, investigation, and recovery efforts, and misuse of identity or falsified information to obtain benefits or services. This may also lead to increased oversight and scrutiny from governing bodies, audit findings, and reputational damage, ultimately eroding public and stakeholder confidence.

Existing Key Controls to Mitigate Risk

Enterprise Controls
- Identity Verification and Data Integrity unit
- Established escalation to SIU
- Formal governance committees overseeing fraud-related claims decisions
- Ongoing monitoring of banking activity to detect fraudulent transactions
- Vendor verification processes

Operational/Transaction-Level Controls
- Review of bill of sale documentation
- VIN Link / IPRES checks
- Vehicle inspections
- Manual cheque reviews

Risk Treatments

- Establishment of centralized fraud committee for enterprise-wide oversight and control enhancement
- Centralized fraud committee to determine key gaps in processes and develop controls to close those gaps
- SIU working with Winnipeg Police Service to proactively identify vehicles with synthetic/misrepresented VINs
- New legislation to consistently define 'resident of MB' across MPI Act/Regulations - Legislative Proposal submitted.
- Enhance reminder training for financial control processes to be followed carefully

MANITOBA
PUBLIC INSURANCE
2025
Annual Report

We acknowledge that MPI operates throughout Manitoba on the Treaty territories and ancestral lands of the Anishinaabe, Ininiwak, Anisininew, Dakota, Dene and the National Homeland of the Red River Metis

We acknowledge that we work in Winnipeg and elsewhere in southern Manitoba on Indigenous ancestral lands in Treaty 1 territory and that our work extends to other Treaty territories in Manitoba, precisely territories to which Treaties 2, 3, 4 and 5 apply.

We acknowledge that northern Manitoba includes what were and are the ancestral lands of the Inuit.

We further acknowledge that our Winnipeg locations are sustained by water sourced from Shoal Lake and express our gratitude to the Shoal Lake 40 First Nation for their stewardship, and to the Peoples of Treaty 3 and 5, for their stewardship, where our power and electricity are generated.

We respect the spirit and intent of Treaties and Treaty Making, acknowledge the historic and continuing harms of colonization and remain committed to working in partnership with First Nations, Inuit and Métis People, in the spirit of truth, reconciliation and collaboration, by partnering with them and by ensuring that the services we provide are accessible and responsive to their needs.

We confirm that our land acknowledgement is a living document that represents our continued commitment to learning, understanding, healing and growing.

MANITOBA PUBLIC INSURANCE

July 31, 2026

Honourable Matt Wiebe

Minister of Justice and Attorney General
& Minister Responsible for the
Manitoba Public Insurance Corporation

Room 104, Legislative Building
Winnipeg, MB R3C 0V8

Dear Minister,

In accordance with Section 43(1) of *The Manitoba Public Insurance Corporation Act*, I am pleased to submit the Annual Report of the Manitoba Public Insurance Corporation for the fiscal year ended March 31, 2026.

Respectfully submitted,

Carmen Nedohin
CHAIRPERSON OF THE BOARD

Manitoba

July 31, 2026

Her Honour The Honourable
Anita R. Neville, P.C., O.M.

Lieutenant Governor of Manitoba

Room 235, Legislative Building
Winnipeg, MB R3C 0V8

May it please your Honour,

I am pleased to present the Annual Report for the Manitoba Public Insurance Corporation for the fiscal year ended March 31, 2026.

Respectfully submitted,

Matt Wiebe
MINISTER OF JUSTICE AND
ATTORNEY GENERAL & MINISTER
RESPONSIBLE FOR THE MANITOBA PUBLIC
INSURANCE CORPORATION

About Manitoba Public Insurance

Corporate Profile

Manitoba Public Insurance is a provincial Crown corporation that has provided automobile insurance coverage since 1971. We assumed a broader spectrum of services in 2004, when we merged driver and vehicle licensing into our operations. The Corporation is governed by *The Manitoba Public Insurance Corporation Act* and *The Drivers and Vehicles Act*.

Corporate Mission

Exceptional coverage and service, affordable rates and safer roads through efficient public auto insurance.

Corporate Vision

Manitoba's trusted auto insurer and driver services provider. Dedicated to road safety for all.

Corporate Values

As a public auto insurer, we hold ourselves accountable to all Manitobans to deliver value by fostering a culture of excellence. We achieve this through our four core values:

Striving for Excellence

We provide exceptional coverage and service. We adapt to meet evolving customer and industry needs, focusing on continuous improvement.

Providing Value to Manitobans

We maintain affordable rates and ensure accessible coverage. As a public auto insurer, fiscal responsibility is at the forefront of everything we do.

Doing What's Right

We act with integrity and accountability. We strive to be open and transparent.

Investing in People

We empower our employees to provide excellent service. We work together with business, community and road safety partners to fulfill our mission.

Message from the Chairperson

Manitoba Public Insurance (MPI) continues to play an important role in the everyday lives of Manitobans in pursuit of the Corporation's vision of being Manitoba's trusted auto insurer and driver services provider that is dedicated to road safety for all.

Guided by MPI's mission of providing exceptional coverage and service, affordable rates and safer roads through efficient public auto insurance, the Board continued to support decisions that reinforce MPI's corporate focus areas of affordability, financial stability, organizational effectiveness, customer value, and corporate responsibility. These principles help ensure the organization remains focused on serving Manitobans responsibly and sustainably.

At its core, MPI exists to serve the public. It is part of the fabric of this province, built on the idea that auto insurance should be fair, accessible, and there when it's needed most. As Board members, we approach this responsibility with care, recognizing that the decisions we make have a direct impact on the people and communities we are proud to be part of ourselves.

In Manitoba, this responsibility must also be understood through the lens of Truth and Reconciliation. For us, this is not separate from our work. It is fundamental to it. It shapes how we meet the needs of all Manitobans and ensure our products and services are accessible to all. It calls on us to listen to Indigenous people and communities, learn and understand the truth of our past, and ensure reconciliation is reflected in how we govern and make decisions.

Throughout the year, we remained focused on ensuring MPI continues to deliver on its public mandate in a way that balances affordability with long-term sustainability. Manitobans continue to benefit from comprehensive coverage that is universal, accessible, and dependable.

Transparency remains central to maintaining that trust. Manitobans deserve clarity on how decisions are made, how resources are managed, and how the organization is performing. Being open and accountable strengthens confidence in the system and reinforces the trust placed in MPI.

At the same time, we recognize that the environment around us continues to evolve. Advances in vehicle technology are increasing safety and complexity. Broader economic pressures, including global supply chain constraints and tariffs affecting sectors such as trucking, are contributing to rising costs. Claims trends are also shifting, with increased severity and more consequential injuries. These dynamics require disciplined oversight and careful, long-term stewardship.

In response, the organization continued sharpening its focus on operating effectively and responsibly, including strong claims management, prudent financial oversight, and thoughtful risk management practices that support long-term stability.

MPI's commitment to fiscal responsibility remains an important focus for us as a Crown corporation. It provides the stability needed to manage through volatility, support responsible risk management, and ensure the organization can continue delivering value for Manitobans over time.

Beyond insurance, MPI continues to contribute to the well-being of Manitoba communities through road safety initiatives and community partnerships. This reflects a broader understanding of service that recognizes the connection between safety, community, and quality of life.

As we reflect on the past year, we also see the foundation being set for what comes next. The organization is well positioned to move from a period of steady stability into one of more focused delivery and forward progress.

Looking ahead, the Board remains committed to supporting a clear and responsible direction – one that continues to prioritize safety, affordability, and value, while ensuring MPI is prepared to respond to emerging challenges and opportunities.

The Board also recognizes the importance of balancing the organization's operational responsibilities with the strategic work needed to prepare for the future. Continued progress will depend on maintaining that balance thoughtfully and responsibly.

On behalf of the Board, I want to thank MPI employees and leadership for their dedication, and Manitobans for the trust they place in the organization every day.

We look forward to the next phase of work and building on this foundation to ensure MPI continues to serve Manitobans well into the future.

At MPI, our purpose is clear: to serve Manitobans by providing affordable and reliable auto insurance, while helping keep our roads safe. It is work that connects all of us across our organization, and it is something that we, as Manitobans, take personally.

Looking back at 2025/26, I am truly proud of the meaningful progress we have made. Across the organization, our focus has been on delivering improvements while reinforcing the strength and reliability of the public insurance system Manitobans depend on.

This year marked an important step forward as it was the first under our Multi-Year Corporate Strategic Plan. Shaped by input from customers, partners, and employees, our strategy provides a clear and practical path for how we will continue to evolve and meet the needs of the people we serve. Our work is guided by five corporate focus areas: affordability, financial stability, organizational effectiveness, customer value, and corporate responsibility. These priorities are helping guide decisions across the organization and ensuring we remain focused on delivering value for Manitobans today while preparing for the future.

We are already seeing the impact of that focus.

In 2025/26 we maintained a strong financial position, enabling us to deliver affordable rates while supporting long-term sustainability. We also introduced a new $1,000 Basic deductible, giving customers more flexibility to choose the coverage that fits their needs while reinforcing our commitment to affordability. The Corporation ended the year reporting $55.6M net income, a favourable position that would have surpassed $100M if not for write-offs in the fiscal year related to the closure of Project Nova. This strength also allows us to responsibly manage risk and absorb volatility. In a changing environment shaped by rising costs and claims pressures, a 5.7 per cent rate increase was approved for 2025/26 by the Public Utilities Board.

We also continued to expand the number of services that can be accessed online, giving customers more convenience and choice. This included expanding online appointment booking, enhancing digital transaction capabilities, and simplifying key processes so that more customers can complete common tasks without needing to visit a service centre in person.

At the same time, we strengthened our claims operations. Our team remained focused on supporting customers with care and professionalism, while improving coordination, consistency, and repair outcomes. For example, we enhanced our approach to repair planning and supplier coordination to help reduce delays and ensure vehicles are repaired properly the first time. We also prioritized early and proactive customer communication, so individuals have a clearer understanding of what to expect throughout the claims process.

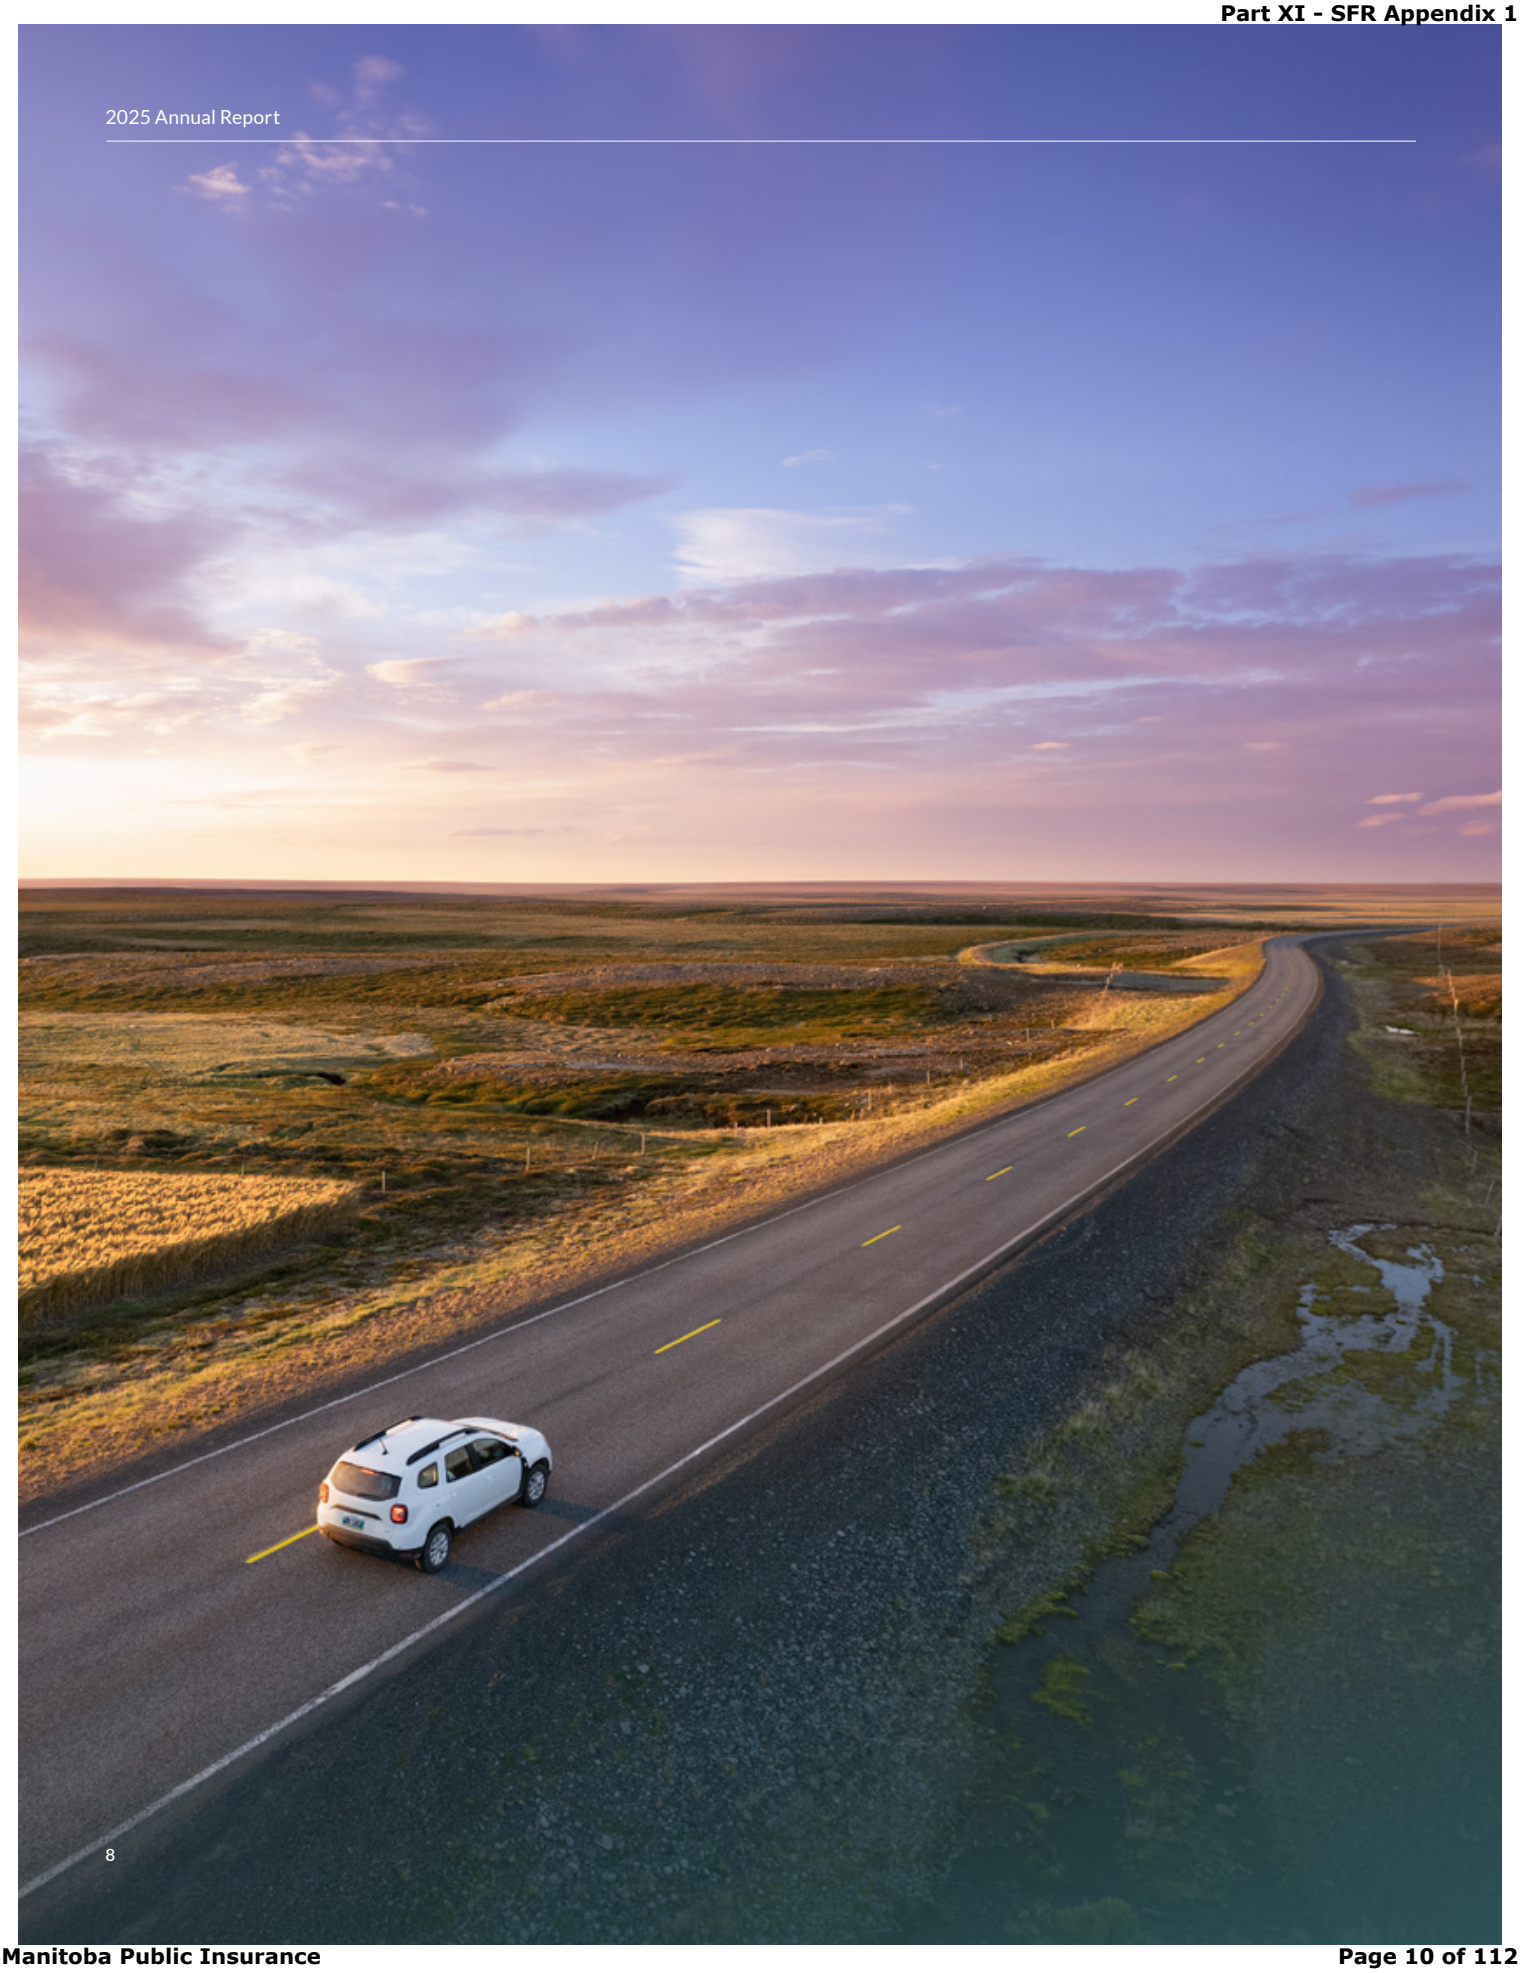
We are doing this work in an increasingly complex environment. Vehicles are more advanced, which improves safety but increases repair costs and complexity – from sensors and cameras to specialized parts that require more time and expertise to replace. External pressures continue to influence costs and contribute to broader rate pressures. We are also seeing increases in claims severity and more injuries across both our Basic and Special Risk Extension lines of business. These trends require a disciplined and thoughtful approach to how we manage operations and plan for the future.

An equally important part of our work is doing our part to reduce the number of collisions that happen on our roadways. This is why road safety remains central to our mandate. This year, we continued to concentrate our efforts on high-risk driving behaviours through targeted campaigns, programming and partnerships, including efforts aimed at reducing the top issues that cause injuries and fatalities, including impaired, distracted driving, speeding, and seatbelt use. These initiatives, alongside enforcement and education, are an important part of keeping people safe while reducing claims before they happen.

Our people continue to be at the centre of this progress. Engagement remains strong, with 83 per cent participation in our Be Heard employee engagement survey and a 75 per cent favourable engagement score, the highest we have seen outside of the pandemic. More importantly, employees are sharing their perspectives and leaders are taking action by reinforcing a culture where people feel heard and where their input helps shape how we improve our product and service delivery. That engagement is critical to delivering the strong customer experience Manitobans expect and deserve.

We are also continuing to strengthen how we reflect the communities we serve. Through our commitment to inclusion, diversity, equity, and accessibility, and our ongoing work towards Truth and Reconciliation, we are working to ensure our organization reflects Manitoba in a meaningful way.

Our partnerships have also continued to grow. Through open dialogue and a shared focus on outcomes that improve the cities and towns we operate in and beyond, we are strengthening relationships across our network. Beyond our core operations, we remain committed to supporting Manitoba communities through initiatives such as the United Way and long-standing road safety partnerships, like those with MADD and Operation Red Nose.



As we reflect on the past year, it is clear that we have made meaningful progress, but we also recognize that there is more to do.

Looking ahead, we are continuing to build on this momentum in a disciplined and thoughtful way. We will continue to strengthen service, advance modernization, enhance operational performance, and maintain our financial strength. At the same time, we are balancing the need to continue delivering on day-to-day operations while advancing the strategic initiatives that will prepare MPI for the future.

The environment around us will continue to evolve, and expectations will continue to grow. What will not change is our commitment to serving Manitobans with care, integrity, and accountability.

I want to thank our team members for their dedication and professionalism, and Manitobans for the trust they place in us every day. It is a responsibility we share, and we are proud to carry forward together.

Satvir Jatana
PRESIDENT & CHIEF EXECUTIVE OFFICER

Strategic Direction

As we look ahead, our focus is simple: keep building an organization that delivers real value for Manitobans while being open about where we're going and how we'll get there.

While we've built positive momentum over the past year, we have more work to do to ensure our long-term stability. Expectations are changing, technology is evolving quickly, and economic pressures continue to affect the people we serve. Our role is to stay responsive to those changes without losing sight of what matters most: affordable coverage, reliable service, and a strong, dependable presence in the lives of Manitobans.

In 2026/27, we're continuing to move forward with intention. That means choosing our priorities carefully, working within our capacity, and staying disciplined about what we take on. We're focused on delivering improvements without overextending our teams or compromising the day-to-day service people rely on.

Our direction is anchored in the strategic pillars of our Multi-year Corporate Strategic Plan.

Putting Customers First

We're making it easier for customers to interact with us. Whether someone is calling us, opening a claim, or completing a transaction, the experience should feel straightforward, timely, and accessible.

We're investing in tools that help our teams respond faster and more effectively, reducing wait times and improving consistency. At the same time, we're continuing to expand digital options. Improvements to online claims reporting will make it more intuitive to use, and broader use of e-signatures will allow more transactions to be completed remotely.

These aren't just technology upgrades – they're practical changes aimed at reducing frustration and saving time. For customers, brokers, and employees alike, the goal is a smoother, more connected experience.

We're also looking inward and improving how we work behind the scenes. By removing internal barriers and giving our teams clearer processes and better tools, we're enabling them to deliver the level of service Manitobans expect.

Building Engagement and Pride

The strength of MPI starts with our people. Creating an environment where employees feel supported and connected to their work is essential for workplace culture, and for the quality of service we provide.

We're continuing to invest in leadership development and in clarifying roles across the organization. When expectations are clear and leaders are equipped to support their teams, people can focus on doing their best work and growing their careers.

At the same time, building pride in our workplace means making sure it reflects the communities we serve. Our commitment to Truth and Reconciliation, employee wellness, and inclusion, diversity, equity, and accessibility is ongoing. We know this work requires more than statements; it requires sustained effort, accountability, and a willingness to listen and learn.

We're working to embed these priorities into how we operate every day, so employees feel respected, valued, and able to contribute fully. When people feel that sense of belonging, it strengthens everything we do.

Delivering on Our Promises

With the basic cost of living continuing to rise, affordability is top of mind for our customers. Ensuring our Basic and Extension products are priced responsibly reduces pressure on household expenses and delivers peace of mind to our customers. Enhancements to the Driver Safety Rating system are providing additional discounts for those with strong safety records, reinforcing good driving behaviour.

Strengthening Our Financial Foundation

Staying affordable over the long term requires strong financial discipline today. We're taking a closer look at how we manage costs and where we can operate more efficiently, without compromising service.

By making thoughtful decisions now, we can maintain a strong financial foundation while continuing to deliver value for Manitobans.

Our goal is to strike the right balance of keeping rates affordable for customers while ensuring MPI remains financially strong and able to invest in improvements where they matter most.

Getting Ready for What's Next

The pace of change around us isn't slowing down. Customers expect more digital options, faster service, and clearer information. At the same time, new technologies are creating opportunities to work smarter and deliver better outcomes. We're developing a clear technology roadmap to guide how we modernize our systems over time. This means making thoughtful choices about where to invest – upgrading existing platforms while introducing new capabilities that improve reliability, security, and ease of use.

Looking ahead, we're exploring how tools like artificial intelligence can support areas such as claims processing. Used responsibly, these technologies can help us improve efficiency and enhance the customer experience, while keeping people at the centre of decision-making.

Staying Focused on What Matters

We know we can't do everything at once. That's why focus is a key part of our strategy. By prioritizing the work that will have the greatest impact, and by supporting our teams to deliver it well, we're building momentum in a sustainable way.

We are committed to being transparent about our progress: what's working, where we're improving, and where challenges remain. Trust is built through consistency and openness, and we take that responsibility seriously.

At the end of the day, our direction is grounded in a clear purpose: to provide Manitobans with safer roads, value, and peace of mind. Everything we're working toward – better service, stronger teams, responsible financial management, and modern systems – supports that goal.

There's more ahead, and we're ready to keep moving forward, building an organization that helps Manitobans feel confident, protected, and supported wherever the road takes them.

Key Topics

Claims Control Strategies

MPI works diligently to ensure that the premiums entrusted to the Corporation by ratepayers are used efficiently and judiciously, while providing the best customer service possible when paying out on claims. This includes ongoing and active monitoring of claims costs. Our cost control measures with respect to claims management include efforts on multiple fronts to ensure cost effective repairs, fraud prevention, salvage and subrogation recovery, and the sound management of PIPP claims.

Each year, these initiatives contribute significantly to efficiencies in operations to help contain costs or generate revenue, as the case may be. Together, they contribute to keeping insurance premiums as low as possible for customers.

IT Roadmap

In 2025, MPI officially closed Project Nova after reviewing both the project and the organization's overall approach to technology modernization. While the project introduced new digital tools and made progress in some areas, the review found challenges with system complexity, connecting to older systems, timelines, and the overall size of the transformation.

The decision to close Project Nova also resulted in additional financial impacts in 2025/26, including approximately $15.1 million related to the write off of deferred development costs and $37.3 related to the recognition of a provision for an onerous contract for which the Corporation does not expect to receive economic benefit. While these costs affected MPI's reported financial results for the year, they were associated with the decision to conclude the project and establish a new path forward for modernization.

Closing Project Nova as a standalone project reflects MPI's commitment to a more practical, coordinated, and financially responsible approach moving forward. Lessons learned from the project helped shape a new direction focused on stronger oversight, clearer accountability, steady progress, and better alignment with annual planning and budgeting.

As part of this shift, MPI is developing an IT roadmap to guide technology stabilization, while building a foundation that allows systems to be changed in smaller, lower risk increments. Instead of relying on one large transformation project, the roadmap will modernize MPI's highest risk systems using a phased approach, introducing practical platforms that deliver the most value to customers. It will also give MPI more flexibility to adapt to changing business needs, new technology, and financial pressures over time.

The roadmap will improve online services for customers, strengthen cybersecurity and system reliability, update core systems, and improve how systems and service channels work together. It will also be designed to support stable day-to-day operations for the services Manitobans rely on, including insurance, driver licensing, and vehicle registration.

While Project Nova did not fully achieve its original goals, the work completed and lessons learned continue to guide MPI's modernization efforts. The decision to close the project and transition to a phased roadmap positions MPI to pursue technology investments in a more sustainable and financially disciplined way while continuing to build reliable, customer-focused technology that supports safe, accessible and efficient service for Manitobans.

Road Safety

Road safety is central to MPI's mandate. Through education, enforcement, and partnerships, MPI works to reduce serious and fatal collisions on Manitoba roads. In 2025/26, MPI advanced key initiatives that laid the groundwork for future enhancements to road safety strategy, public reporting and stakeholder collaboration.

Road Safety Strategy

In 2025/26, MPI took an important step forward in shaping the future of road safety in Manitoba by engaging stakeholders to inform the development of its new Road Safety Strategy, Safer Roads: A Shared Journey.

Built around the idea that safer roads are everyone's responsibility, the strategy was shaped by one of MPI's largest public and stakeholder engagement efforts to date. Throughout the process, MPI worked closely with communities, governments, law enforcement, industry partners, employees and Manitobans from across the province to better understand road safety concerns and priorities.

Between July 2025 and January 2026, MPI heard from 67 external organizations, conducted one-on-one sessions with 13 key stakeholder groups and gathered feedback from nearly 3,000 Manitobans through a public survey.

Engagement activities included workshops, surveys, direct outreach and public awareness campaigns through advertising and social media. MPI also prioritized engagement with Indigenous communities through its Indigenous Action Plan, supporting respectful, relationship-based conversations focused on collaboration and reconciliation.

Manitobans identified distracted driving, impaired driving and speeding among the province's top road safety concerns. Respondents also highlighted the importance of stronger driver education, improved infrastructure safety, enhanced enforcement and better access to road safety information.

The approach reflects MPI's commitment to listening to Manitobans, working collaboratively with partners and using data-informed approaches to help reduce serious injuries and fatalities on Manitoba roads.

Collision Dashboard

MPI also continued advancing transparency and access to road safety information through the development of the Manitoba Collision Dashboard, which is a publicly accessible platform designed to provide more timely, interactive collision data for Manitobans and road safety partners.

The project was developed in response to stakeholder feedback and Public Utilities Board direction calling for improved public access to collision information.

In 2025, MPI partnered with 11 external organizations through a stakeholder working group that included representatives from government, law enforcement, health and community organizations. Together, the group participated in multiple engagement sessions and additional surveys to help shape the dashboard's functionality, priorities and design.

Stakeholders emphasized the importance of timely, accessible data and flexible reporting tools that support collaboration and informed decision-making across sectors.

The goal of the dashboard is a shift toward more transparent, user-friendly reporting tools that provide Manitobans with easier access to important road safety information.

Other Road Safety Programs

Alongside its broader strategy work, MPI continued investing in targeted road safety programs focused on education, prevention and community partnerships across Manitoba.

One initiative launched in 2025 was the Let's Buckle Up pilot program, designed to improve seatbelt use among high school students in rural Manitoba. The three-week pilot combined observation, education and enforcement activities at four rural high schools.

Schools received posters, announcements and roadside message boards promoting seatbelt safety, while local law enforcement agencies participated through educational awareness and visibility efforts.

The pilot showed encouraging short-term improvements in seatbelt use. In Teulon, driver seatbelt compliance increased from 84.7 per cent before the program to 91.6 per cent afterward. In Gladstone, compliance increased from 90.4 per cent to 97.1 per cent.

The findings also reinforced the important role driver behaviour plays in influencing passenger safety habits, highlighting the need for continued education and awareness efforts.

MPI also continued investing in adult driver training partnerships aimed at reducing barriers to licensing and improving mobility for Manitobans.

Through partnerships with University College of the North, Assiniboine College and Citizens' Bridge, MPI supported accessible Class 5 driver training opportunities for adults facing financial, geographic or systemic barriers.

In northern Manitoba, more than 900 students have participated in the University College of the North program, which serves remote, northern and Indigenous communities. Citizens' Bridge in Winnipeg has supported more than 500 students and serves a high proportion of equity-deserving groups, including Indigenous participants, visible minorities, refugees and individuals with disabilities.

Feedback gathered through MPI's Road Safety Strategy engagement process reinforced the importance of adult driver education, with respondents identifying it as a key road safety priority.

MPI also continued supporting off-road vehicle safety education through workshops delivered in partnership with Safety Services Manitoba. Offered at schools and community centres across the province, the workshops focused on safe off-road vehicle operation and the proper use of safety equipment.

In 2025, the program reached more than 2,000 Manitobans and received positive feedback from students, teachers and communities.

Together, these programs reflect MPI's continued commitment to proactive, community-based road safety initiatives that support education, accessibility and safer driving behaviours across Manitoba.

Driver Education and Training

Driver Z Program Delivery

More Manitobans are accessing Driver Z training and road safety education across the province. In 2025, 433 Driver Z courses were delivered, supporting 9,781 students between the ages of 15 and 18, which is an increase of 49 courses and nearly 1,000 additional students compared to 2024.

To help meet demand, condensed summer courses were expanded, increasing course availability during peak months and helping students access training sooner.

These improvements support MPI's commitment to safer roads by making driver education more accessible, flexible and responsive to the needs of Manitobans.

Driver Z Instructor Recruitment and Capacity

MPI continued efforts to recruit Driver Z instructors across Manitoba, including in rural communities where finding qualified instructors remains more challenging. Support from schools, broker offices and community organizations helped expand awareness and increase applications for instructor positions.

In 2025, 28 new Driver Z instructors were hired across the province. As of early 2026, an additional 15 instructors had already been hired, helping expand course availability and reduce wait times for students.

Because of these efforts, MPI increased the number of courses offered by 14 per cent in 2025/26, resulting in over 1,300 more students enrolling in the program.

Driver Z Instructor Training and Development

In April 2026, Driver Z instructor training transitioned to an online format, giving instructors greater flexibility to complete training on their own schedules. Previously, training sessions were offered only a few times each year and required multiple instructors to participate at the same time.

The shift to online learning removed scheduling barriers, improved accessibility and allowed training to be completed on demand while maintaining accountability through interactive modules and completion requirements.

Driver Z Registration

Driver Z registration transitioned to a seasonal model in 2025, allowing customers to register for courses in three-month intervals instead of monthly releases. The change improved visibility into upcoming course options and helped reduce pressure during registration periods.

In early 2026, MPI also piloted a customer segmentation registration model, assigning registration windows by age rather than relying on a single provincewide registration date. The pilot helped reduce lineups at service centres and broker offices while improving the overall customer experience.

Together, these changes helped simplify registration, improve access to training and reduce pressure on frontline services.

Driver Testing

Route Redevelopment

MPI continued work on a provincial road test route redevelopment initiative aimed at improving consistency and fairness in road testing. A matrix-based scoring model was introduced to help standardize route assessments across Manitoba.

The model evaluates key driving maneuvers and road infrastructure elements to ensure routes fall within established scoring ranges while still reflecting local driving environments.

In 2025, the model was piloted for Class 5 road tests and helped reduce pass/fail variances between Winnipeg and rural locations from as much as 30 per cent to approximately six to eight per cent.

This work supports safer roads by helping ensure road tests are fair, consistent and reflective of real-world driving conditions across the province.

Class 1 Oversight

MPI expanded oversight activities for Class 1 training providers to help ensure students receive safe, high-quality instruction. In 2025, 24 compliance verification audits were completed, including reviews of student records, training equipment, instructional delivery and facility standards.

When non-compliance was identified, corrective action plans and follow-up inspections were completed to support accountability and continuous improvement. Administrative penalties introduced in 2025 further strengthened oversight expectations for training providers.

MPI also introduced enhanced course outline requirements to support unannounced inspections and help ensure consistent delivery of comprehensive training.

These efforts align with MPI's commitment to road safety by supporting stronger training standards and helping prepare safer, more capable commercial drivers for Manitoba roads.

Driver Testing Scheduling

Advanced booking for Class 1 road tests was expanded to include all Mandatory Entry-Level Training and Private Vocational Institution participants. The change allows eligible students to book road tests immediately following training completion and receive priority access over general bookings.

By reducing delays between training and testing, the updated approach helps improve access, reduce wait times and better support successful testing outcomes for future commercial drivers.

Campaigns

Using available data and stakeholder input, MPI developed 17 public awareness campaigns in 2025–26 focused on the driving behaviours and conditions that contribute most significantly to serious and fatal collisions, including impaired, distracted, careless and speeding-related driving.

These campaigns support MPI's mission of safer roads for all Manitobans by encouraging drivers to think differently about the choices they make behind the wheel and the impact those decisions can have on others.

Public safety awareness campaigns focused on advocating for safer roads and influencing behaviours through relatable, real-world scenarios. One campaign reminded Manitobans that "it's never just you on the road," reinforcing how quickly conditions can change and how even brief moments of distraction or speeding can have serious consequences – whether it's a child running into the street, a cyclist approaching or law enforcement around the bend.

Additional campaigns highlighted the many forms distracted driving can take beyond cellphone use. Everyday behaviours such as eating, searching for items or responding to notifications were positioned as distractions that can put all road users at risk. The campaign creative also emphasized the shared responsibility drivers have to one another on Manitoba roads.

MPI's familiar impaired driving message reminding Manitobans that "even if it's one or two, plan a safe ride home and never drink and drive" also returned throughout the year. Updated creative aired during high-visibility moments, including the spring Jets playoff run, the 112th Grey Cup and the holiday season, helping reinforce safe driving habits during times when impaired driving risks can increase.

Corporate Sponsorships and Presentations

MPI's corporate sponsorships support road safety initiatives, business priorities and communities across Manitoba. MPI is the provincial sponsor for Operation Red Nose, a free designated driver program that gets patrons and their vehicles home safely during the holiday season. In 2025, across Manitoba, there were seven communities who hosted the program. Over the holiday season 2,405 rides were provided across Manitoba, making sure people celebrating the season got home safely.

MPI is also the long-standing provincial sponsor of MADD Canada's high school program, which delivers critical messages related to impaired driving to high school students across the province. In 2025/26, funding supported the delivery of 109 presentations across Manitoba.

MPI employees raised $350,864 through the annual 2025 United Way campaign, supporting vital programs that strengthen communities across Manitoba. The generosity of our employees reflects their ongoing commitment to improving lives, supporting families, and creating opportunities for those in need.

In addition to guiding the Corporation's sponsorships, MPI's Community Relations team offers free, interactive presentations on road safety topics. All presentations are designed to help Manitobans gain the knowledge and awareness they need to protect themselves and others. Presentations are available in person or virtually and can be booked by individuals or groups directly on MPI's website.

Management Discussion & Analysis

The following management discussion and analysis (MD&A) is the responsibility of management and has been reviewed by the Board of Directors (the Board) for the year ended March 31, 2026. This MD&A is intended to enable the reader to assess the results of operations and financial condition of the Corporation for the year ended March 31, 2026, compared to the corresponding year ended March 31, 2025. It should be read in conjunction with the Corporation's annual audited financial statements and supporting notes for the year ended March 31, 2026, found herein. "MPI", the "Corporation", "we" and "our" are terms used throughout this document to refer to Manitoba Public Insurance Corporation. Further information about MPI may be found online at mpi.mb.ca.

Cautionary Note Regarding Forward-Looking Statements

Certain statements included in this MD&A about MPI's current and future plans, expectations and intentions, results, levels of activity, performance, goals, achievements, any other future events or developments constitute forward-looking statements. Forward-looking statements are based on estimates and assumptions made by management based on management's experience and perception of historical trends, current conditions and expected future developments, as well as other factors that management believes are appropriate in the circumstances. In addition to other estimates and assumptions which may be identified herein, estimates and assumptions have been made regarding, among other things, economic and political environments, and industry conditions. Many factors could cause the Corporation's actual results, performance, achievements, future events or developments to differ materially from those expressed or implied by the forward-looking statements.

Corporate Governance

Effective governance is key to creating value for Manitobans. The Corporation's Board of Directors provides oversight to our executive leadership team to ensure MPI has effective processes in place to deal with issues and concerns from staff, customers and other stakeholders.

Responsibilities of the Board

The Corporation's Board of Directors, appointed by the Government of Manitoba, ensures that corporate policies are consistent with its mandate and the laws of the Province of Manitoba. The Board of Directors is also responsible for overall policy direction of MPI and provides oversight and monitoring. Further duties, obligations and responsibilities of the Board of Directors are prescribed by *The Crown Corporations Governance and Accountability Act* and *The Manitoba Public Insurance Corporation Act*.

The Corporation is responsible for preparing an annual business plan which must be approved by the Board and submitted to the Minister responsible for the Manitoba Public Insurance Corporation (MPI) for their approval. The Board chairperson is required to provide the Minister Responsible for MPI and the Lieutenant Governor in Council with an annual report that includes audited financial statements, which is subsequently reviewed by the Standing Committee on Crown Corporations of the Legislative Assembly. With the approval of the Lieutenant Governor in Council, the Minister Responsible for MPI has the legislative authority to issue a mandate letter, and directives related to respecting matters of policy, conducting organizational reviews and ensuring consistency with other Crown corporations or prescribed government agencies.

Basic Autopac Rates

Under *The Crown Corporations Governance and Accountability Act*, MPI is required to submit Basic insurance rates to the Public Utilities Board (PUB) for approval. The Corporation generally files its rate application in June of each year for rates effective at the beginning of the following fiscal year.

On December 19, 2025, the PUB issued Order No. 126/25 that included a 1.77 per cent rate increase to Basic insurance for policies taking effect on or after April 1, 2026. The PUB also extended the Driver Safety Rating system to +20 as of April 1, 2026; and increased the vehicle premium discounts for all levels above +2, to a maximum of 53 per cent for Levels +19 and +20.

Whistleblower Report

The Corporation has established an independent, anonymous and confidential Whistleblower Reporting System to receive disclosures of wrongdoing, being actions or omissions that are potentially unlawful, injurious to life, health or to the safety of persons or the environment, or which constitute gross mismanagement. The Corporation promotes reporting by ensuring that employees who disclose wrongdoing in good faith are protected against reprisal for making such disclosures.

As fairness and accountability are of paramount concern, and recognizing that employees are more likely to disclose wrongdoing confidentially, valid disclosures are investigated by the Vice President, Chief Legal and Risk Officer, the senior official designated to receive and deal with disclosures, with the assistance of independent third parties, the results of which are reported to the Chair of the Audit & Finance Committee.

In the fiscal year ended March 31, 2026, the Whistleblower Reporting System received a total of eight disclosures. Of the disclosures received, three were accepted for investigation. In this past fiscal year, the Corporation completed two investigations, one of which related to an existing disclosure from 2024/25 and the other related to one of the disclosures received in 2025/26. Of the two investigations completed in this fiscal year, neither resulted in findings of wrongdoing. One of the two disclosures made in 2025/26 that was being investigated was recently closed with no finding of wrongdoing. The other disclosure accepted for investigation remains active.

Fair Practices Office

The Fair Practices Office (FPO) is an avenue for customers and other interested parties to bring issues and concerns of a systemic nature to the attention of MPI. The FPO generally deals with concerns related to corporate policy, or issues involving complex or unusual situations where the correct interpretation of policy may seem unclear. The FPO may initiate its own investigations or respond to inquiries referred by others. It is free to scrutinize MPI's policies and procedures in an objective and constructive manner. As required, it can make recommendations about an operational decision on a specific case and alert senior management of any systemic concerns or policies that should be addressed.

Business Continuity

Over a number of successive years now, MPI has built up robust business-continuity capabilities. These have been developed as a "made-for-MPI" solution leveraging industry best practices, and are aligned to the needs of our staff, customers and business partners. Our Business Continuity Management Program creates corporate plans and responses that ensure continued customer service in the event of a business disruption. It includes emergency response, crisis management, business recovery, IT service continuity, catastrophe, contingency and pandemic responses, and the processes used to ensure ongoing readiness in all phases of our operations. The program is focused on creating and implementing corporate business continuity planning through a strong understanding of our products and services, our people, and our delivery processes and technology.

Business continuity includes planning, prevention, preparedness and a proactive program approach to crisis responses and business delivery. This approach leverages the prevention and proactive aspects of business continuity that provide continuous service during business disruptions as opposed to suspension and recovery.

Results Of Operations

Manitoba Public Insurance's mandate is to ensure affordable and stable rates and provide value to Manitobans.

The Corporation reported Net income from operations of $55.6 million for the year ended March 31, 2026, as compared to a Net loss of $19.7 million for the prior year. The Insurance service result was $121.7 million as compared to $35.8 million for the prior year. This reflects the underlying performance of the Corporation's individual lines of business. More specifically,

- The Basic insurance line of business reported a Net loss of $4.6 million as compared to a Net loss of $39.6 million for the prior year. The Insurance service result was $31.1 million as compared to ($27.1) million for the prior year;
- The Extension line of business reported Net income of $70.2 million as compared to Net income of $53.7 million reported in the prior year. The Insurance service result was $75.2 million as compared to $62.1 million for the prior year;
- The Special Risk Extension (SRE) line of business reported Net income of $2.2 million as compared to a Net loss of $4.1 million in the prior year. The Insurance service result was $15.4 million as compared to $0.8 million for the prior year; and,
- *The Drivers and Vehicles Act* operations (DVA) line of business reported a Net loss of $12.2 million as compared to a Net loss of $29.7 million in the prior year.

Insurance Revenue

Insurance revenue is comprised of Revenue from premiums and Other insurance revenue (fees related to policy administration). Insurance revenue for the Corporation increased by 5.7 per cent or $93.7 million and is reported at $1,738.5 million for the year ended March 31, 2026. It is comprised of Insurance revenue from the Corporation's three insurance lines of business: Basic, Extension and SRE. The revenue attributable to each of these lines of business is approximately 76 per cent, 14 per cent and 10 per cent respectively.

The Basic line of business reported $1,321.7 million in Insurance revenue for the year ended March 31, 2026, an increase of $86.1 million or 7.0 per cent over the prior year. Insurance revenue includes a 5.7 per cent increase in premiums charged for the Basic line of business that took effect April 1, 2025, in accordance with a Public Utilities Board ("PUB") order. The 5.7 per cent increase consisted of a 7.9 per cent increase to vehicle premiums and a 2.04 per cent decrease related to changes in the Driver Safety Rating Scale.

Insurance revenue for the Extension line of business increased by 10.3 per cent or $22.9 million to $246.0 million for the year ended March 31, 2026, as compared to the prior year. The growth in revenue includes impacts from an increase of 2.0 per cent in rates charged within the Extension product portfolio, as approved by the Corporation's Board of Directors, that came into effect during the 2025/26 fiscal year. The increase in revenue also relates to stronger demand for certain products such as reduction to deductible, loss of use coverage and maximum insured vehicle coverage.

Insurance revenue for the SRE line of business decreased 8.2 per cent or $15.3 million to $170.8 million for the year ended March 31, 2026, as compared to the prior year. The decreased revenue reflects a reduction in the number of policies issued and the exposures underwritten, driven in part by deliberate non renewals of accounts with adverse claims experience.

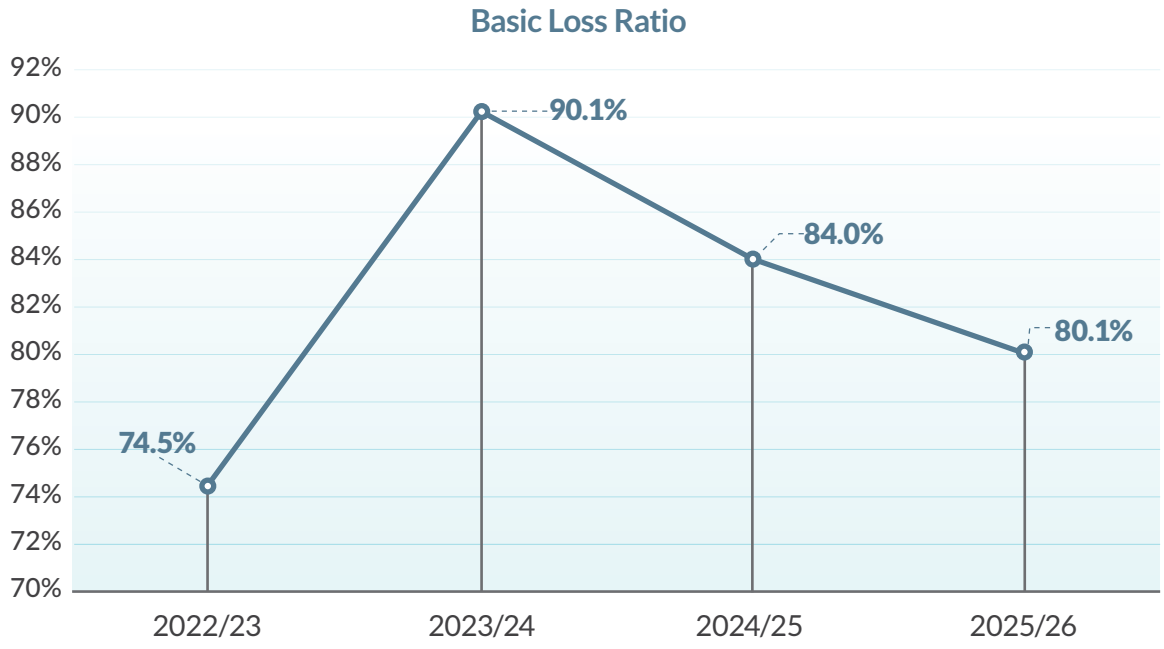
Regulatory Environment and Rate Setting

The PUB has sole authority over reviewing and approving premiums and service fee charges for the Basic line of business. MPI participates in an annual general rate application ("GRA") process to establish rates and fees which take effect April 1. As such, changes in revenue outside of a PUB order reflect underlying changes in policy volume, timing of renewals and shifts in the mix of insured vehicles over the period. As part of the application process, the PUB provides directives or orders that the Corporation is required to follow.

The Corporation is subject to PUB Order 145/23 that provides a directive for MPI to exclude initiative expenses for rate setting purposes; and Directive 8 of PUB Order 2/25 that directs MPI to continue to accumulate deferred initiative costs within a Regulatory Deferral Account (RDA) balance. The RDA only exists in the venue of the Public Utilities Board for rate setting purposes, and is not applicable for external reporting purposes. Under these PUB orders, MPI excludes initiative amounts for rate setting purposes and is prohibited from recovering the cost of initiatives through rates until such time as approved by the PUB in its annual GRA. Adjustments to the RDA directly impact Basic insurance rates (increases to the RDA reduce the rate requested by MPI and vice versa).

In MPI's 2025 GRA $15.4 million (2024 GRA $24.1 million) of forecasted initiative expenses for the rating year (2 year average) was excluded. The exclusion of initiative expenses from recovery in rates resulted in rate deficiency that must be funded or offset by a reduction in operating expenses, reduced claims incurred trending, increased revenue from sources other than Basic insurance premiums, investment income, or transfers of capital from another line of business, or a combination of these. Where these sources fall short, in whole or in part, the remaining rate deficiency is funded by the Rate Stabilization Reserve fund.

Incurred Claims



Incurred claims are a function of frequency (the number of claims submitted), severity (how expensive are the actual or expected injuries, repairs, or total loss), and the timing of when claims are settled and paid. Frequency is affected by several factors, such as driving patterns, weather, and individual decisions to advance a claim or not. Severity is impacted by several factors such as supply chain availability of parts and service, prevailing market conditions for new and used vehicle pricing, and complexity of the vehicle requiring repair. Timing related to claims settlement is impacted by several factors, such as inflation, discount rates, risk adjustments, and investment yields.

Incurred claims for the Corporation increased by 2.9 per cent or $34.4 million to $1,236.5 million for the year ended March 31, 2026, as compared to the prior year, with all insurance lines of business reporting increases from the prior year. The following graph illustrates the trend in the corporate loss ratio over the four years reported in accordance with IFRS 17 – Insurance Contracts. Loss ratio is a key performance measure that reflects the relationship between claims costs and premium revenue. It is calculated as incurred claims divided by revenue from premiums.

Basic Line of Business

Incurred claims for the Basic line of business increased by 2.2 per cent or $22.3 million to $1,034.5 million for the year ended March 31, 2026, as compared to the prior year. Despite this increase, the loss ratio improved to 80.1 per cent from 84.0 per cent reported in the prior year, driven by the year over year increase in Revenue from Premiums. The following graph illustrates the trend in the Basic loss ratio over the past four years reported in accordance with IFRS 17.

Autopac claims reported for the year ended March 31, 2026, decreased slightly by 0.5 per cent or 1,458 claims to 278,842.

Physical damage incurred claims (excluding discount rate impact and risk adjustment) increased by 6.7 per cent or $55.7 million to $882.9 million for the year ended March 31, 2026, as compared to the prior year. More specifically,

- Comprehensive (non-catastrophic) increased by 32.7 per cent or $35.3 million to $143.1 million;
- Comprehensive (catastrophic) decreased by 73.3 per cent or $51.7 million to $18.8 million;
- Collision increased by 11.5 per cent or $67.2 million to $650.8 million. For the year ended March 31, 2026, the estimated cost for Collision claims is 50.4 per cent of the earned premium; and,
- Property damage increased by 7.5 per cent or $4.9 million to $70.2 million.

Bodily injury incurred claims (excluding inflation, discount rate impact, and risk adjustment) increased by 14.4 per cent or $44.4 million to $353.7 million for the year ended March 31, 2026, as compared to the prior year. Changes in economic assumptions had a significant favourable impact on bodily injury obligations in the current year. The effect of inflation assumptions reduced outstanding bodily injury liabilities by $375.5 million and contributed to a recovery of $318.9 million for the year ended March 31, 2026.

Changes in discount rates for the Basic line of business were favourable by $444.7 million and impacts from risk adjustments were favourable by $9.2 million for the year ended March 31, 2026, as compared to the prior year.

Enhancements in Measuring Case Reserves for Personal Injury Protection Plan (PIPP)

As of February 28, 2026, the Corporation implemented enhancements in calculating case reserves for the Personal Injury Protection Plan, with improvements to data quality and refinements in actuarial assumptions. These changes were adopted to more accurately reflect the experience of Manitobans, and to strengthen the Corporation's reserving methodologies for this program.

The implementation of the enhancements in measuring case reserves for PIPP resulted in a $97.3 million reduction to Insurance contract liabilities reported by the Corporation in the Statement of Financial Position as at February 28, 2026. The impact from the change in measuring the reserves provided a $62.3 million decrease to Incurred Claims, a favourable impact of $35.0 million to Net insurance financial result, and an increase of $97.3 million to Net Income reported in the Corporation's Statement of Operations for the eleven-month period ended February 28, 2026.

Extension Line of Business

Incurred claims for the Extension line of business increased by 10.7 per cent or $9.8 million to $101.6 million for the year ended March 31, 2026, as compared to the prior year. The increase reflects unfavourable developments in prior year claims; the loss ratio remained consistent with the prior year at 42.4 per cent.

Special Risk Extension Line of Business

Incurred claims for the SRE line of business increased by 2.2 per cent or $2.2 million to $100.4 million for the year ended March 31, 2026, as compared to the prior year. More specifically,

- Public liability (excluding discount rate impact and risk adjustment) decreased by 3.1 per cent or $2.4 million to $75.5 million; and,
- Physical damage (excluding discount rate impact and risk adjustment) increased by 5.8 per cent or $1.8 million to $33.1 million.

The increase reflects unfavourable developments in prior year claims compared to the previous fiscal year, with claims settling, or expected to settle, for more than originally estimated. The loss ratio for this line of business for the year ended March 31, 2026, was 58.8 per cent as compared to 52.8 per cent for the prior year.

Net Income (Expense) from Reinsurance Contracts Held

The Corporation follows a practice of obtaining reinsurance coverage for both casualty and catastrophic events to limit its exposure to losses. Net expense from reinsurance contracts was $20.1 million for the year ended March 31, 2026, $15.7 million lower than net expense of $35.8 million reported in the prior year, primarily attributable to the volume of claims incurred that were eligible for recovery from reinsurers. A significant hail event in August 2023 continued to drive reinsurance claims submitted by the Corporation in the fiscal year ended March 31, 2026. Premiums paid by the Corporation under the reinsurance program were $37.7 million for the year ended March 31, 2026 ($40.0 million—March 31, 2025).

Comprehensive coverage for catastrophic weather events was $51.7 million lower compared to the prior year. This coverage has declined year over year since the significant hail event in 2023. MPI mitigates exposure to catastrophic weather events through reinsurance on an annual basis. The net financial exposure to MPI in the year ended March 31, 2026, was $50.0 million, same as prior year.

Net Insurance Financial Result

Net insurance financial expense was $9.1 million for the year ended March 31, 2026, a decrease of $157.6 million from $166.7 million in the net expense reported by the Corporation in the prior year. This reflects the change in discount rates applied in the measurement of claims, along with the unwinding of discount rates (a process of recognizing the increase in the present value of a liability over time as it moves forward in time). The change was mainly due to the increase in the discount rates applied to value net liabilities for incurred claims reported during the fiscal year ended March 31, 2026, which moved more favourably than in the prior year.

Corporate Operating Expenses

The Corporation leverages an integrated service delivery model wherein its lines of business benefit from sharing costs amongst themselves, resulting in lower costs overall than if each were operated on a stand-alone basis. Corporate operating expenses are not presented or readily identifiable under IFRS 17 reporting. They are reported as a separate line item or in aggregate as Acquisition, Maintenance, or Operating expense on the Statement of Operations by line of business. The table below illustrates a traditional view of corporate operating expenses prior to being classified as Acquisition, Maintenance, or Operating expense.

$ in '000's	March 31, 2026	March 31, 2025
Compensation	$228,999	$220,396
Data processing	131,905	139,147
Special services	13,231	19,746
Merchant fees & bank charges	12,226	11,255
Buildings	8,768	8,453
Other	6,197	7,216
Postage	6,119	5,530
Driver education program	5,611	5,451
Printing, stationery, supplies	4,819	4,770
Regulatory/appeal	4,612	4,678

Travel and vehicle	1,106	1,188
	435,341	440,726
Commissions-policy	115,084	107,107
Commissions-non-policy	6,606	6,541
Premium taxes	53,356	48,823
	175,046	162,471
Amortization of deferred development costs	6,372	9,935
Depreciation of operating property and equipment	6,956	6,574
	13,328	16,509
Total	623,715	619,706

Total corporate operating expenses increased 0.6 per cent or $4.0 million to $623.7 million for the year ended March 31, 2026. The current year expenses were impacted by the recognition of a provision for onerous contracts, asset impairments, and continued postal service disruption; the prior year's results include recognition of more significant asset impairments and write-offs, impacts from fire damage incurred at the Gateway Service Centre in June 2024, and interruption in postal services.

Compensation expense increased over the prior year primarily due to higher rates provided by the collective bargaining agreement.

Impairment Losses and Write Off of Assets Reported as Deferred Development Costs

As part of the Corporation's annual impairment assessment of intangible assets, certain technology assets that had been foundational to development under Project Nova were assessed as no longer meeting the criteria for asset recognition, subsequent to the project's formal closure in June 2025. As a result, the Corporation recognized a write-off of $15.1 million in deferred development costs.

The write-offs recognized in the current year are reported as a reduction of $15.1 million in assets presented as Deferred development costs in the Corporation's Statement of Financial Position at March 31, 2026. The impacts of the write-offs are reported as Data processing expense of $14.0 million within Operating expense, and $1.1 million in Acquisition expense, in the Statement of Operations for the year ended March 31, 2026. In the prior fiscal year ended March 31, 2025, the Corporation reported $62.1 million in impairments and write-offs to Deferred development costs (Maintenance expense $6.2 million; Acquisition expense $11.6 million and Operating expense $44.3 million).

Recognition of Onerous Contract

As at March 31, 2026, the Corporation recognized a provision for onerous contracts, representing the estimated unavoidable costs to satisfy contractual obligations in respect of rights and services that are not expected to provide future economic benefit to the Corporation. The provision is reported in the Statement of Financial Position as at March 31, 2026, at $37.3 million, as the present value of the Corporation's estimated remaining contractual commitments until the contract's expiry in July 2030. The provision will be assessed by the Corporation each year until the contract expiry date. Assets that were associated with the contract had been written down to nil by the Corporation prior to recording the provision at March 31, 2026. The impact of the recognition of the provision for onerous contracts was recorded as $37.3 million in Data processing expense, reported within Operating expense in the Corporation's Statement of Operations for the year ended March 31, 2026.

Investments and Investment Income

Investments are held within five separate portfolios internally. The purpose of the five portfolios is to pay the short and long-term liabilities of the Corporation as they come due and to provide investment income from interest, dividends and capital gains that will assist in stabilizing premiums payable by policyholders. The Basic line of business has two investment portfolios. The first is the Basic Claims Liabilities Portfolio which backs policyholder claims and ensures funds are available as liabilities come due. The secondary objective of the Basic Claims Portfolio is to minimize interest rate risk with modest returns. The second Basic portfolio is the Rate Stabilization Reserve (RSR) portfolio which has an objective to ensure sufficient levels of capital are maintained to withstand plausible adverse events to deliver rate stability and predictability. The Extension and SRE lines of business portfolios back both liabilities and retained earnings and have objectives to achieve target returns and stabilize premiums. The last portfolio backs liabilities for employee future benefits and has an objective to ensure these obligations are paid as they become due.

The Operational Asset Liability Management (ALM) strategy aims to align the dollar duration of Basic Claims fixed income assets—including government bonds, corporate bonds, short-term investments, mortgages, and non-marketable bonds—with the dollar duration of Basic Claims liabilities, within a tolerance of +/- 5 per cent. In addition, the market value of the Basic Claims investment portfolio (fixed income assets plus real estate) is targeted to match the present value of the associated liabilities within +/- $100 million. Maintaining this alignment helps minimize the sensitivity of the surplus to interest rate fluctuations.

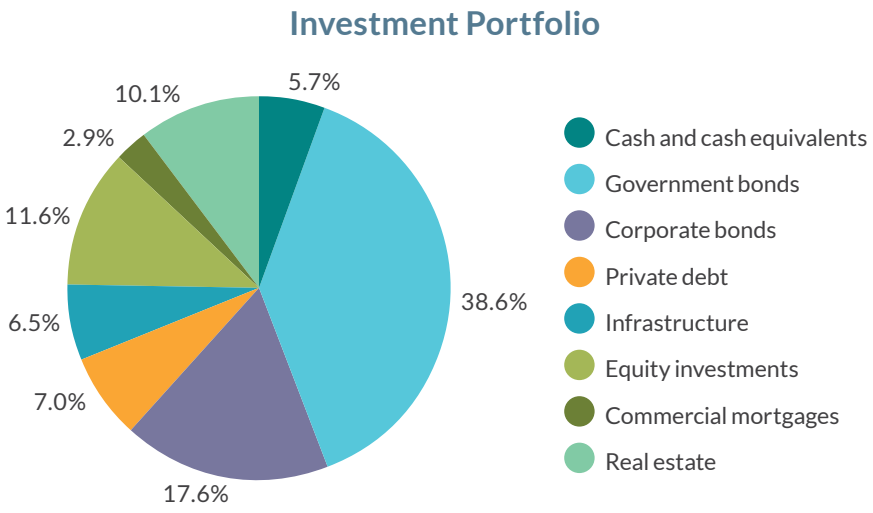
As of March 31, 2026, the dollar duration match was 97.6 per cent and was within the acceptable +/- 5 per cent tolerance range. This measure was calculated using February 2026 liability cash flows, as March 2026 cash flows were not yet available. This timing lag is typical following fiscal year-end due to standard reporting processes and the investment manager therefore relies on the most recent available liability valuation data.

At March 31, 2026, the market value of the Basic Claims investment portfolio exceeded the present value of the liabilities by $109.0 million (March 31, 2025—$21.0 million). A transfer from Basic Claims to the Rate Stabilization Reserve is expected to occur after the fiscal year-end to bring the difference back within the target range of +/-$100 million.

The SRE and Extension lines of business are excluded from the ALM strategy. Their portfolios contain assets backing both surplus and claims, and the market value of the fixed income assets generally approximates the present value of claims liabilities.

The Employee Future Benefits portfolio is also outside the scope of the ALM strategy. This portfolio follows a balanced asset allocation approach—including fixed income, equities, and alternative assets—to support accrued employee pension, post-retirement, and severance benefit obligations.

The approximate impact of an increase of 100 basis points in interest rates as at March 31, 2026, would decrease the Liabilities for incurred claims by $168.4 million (March 31, 2025—$148.6 million decrease) and decrease Investments by $224.6 million (March 31, 2025—$204.6 million decrease) resulting in a decrease to Net income (loss) attributable to Owner of the Corporation of $56.2 million (March 31, 2025—$56.0 million decrease).



An increase of 100 basis points would increase Other Comprehensive Income (OCI) by $58.7 million (March 31, 2025—$62.6 million increase) as it relates to the employee future benefits liabilities.

The approximate impact of a decrease of 100 basis points in interest rates as at March 31, 2026, would increase the Liabilities for incurred claims by $205.1 million (March 31, 2025—$175.1 million increase) and increase Investments by $225.3 million (March 31, 2025—$205.3 million increase) resulting in an increase to Net income (loss) attributable to Owner of the Corporation of $20.2 million (March 31, 2025—$30.2 million increase).

A decrease of 100 basis points would decrease OCI by $65.8 million (March 31, 2025—$70.4 million decrease) as it relates to the employee future benefits liabilities.

Investment income, net of investment management fees, decreased 52.1 per cent or $151.1 million to $139.1 million for the year ended March 31, 2026, as compared to the prior year.

The fair value of the Corporation's combined investments was $3,872.8 million for the year ended March 31, 2026. The investment portfolio is made up of the below investments:

The total portfolio, on a market value basis, had a positive 4.4 per cent return during the fiscal year (holding period return over the 12 months ended at March 31, 2026). The portfolio return is reported on a market value basis for all assets.

Marketable bonds returned 1.1 per cent while non-marketable bonds returned 2.3 per cent during the annual period. The private debt portfolio returned 0.6 per cent. The total Canadian equity portfolio increased by 39.5 per cent; large cap Canadian equities returned 44.1 per cent and small cap Canadian equities returned 35.0 per cent. Global equities returned 11.4 per cent in Canadian dollars. The real estate portfolio returned 3.7 per cent while the infrastructure portfolio returned 9.3 per cent in fiscal 2025/26. Commercial mortgages returned 4.7 per cent during the period. Over a four-year period, the investment portfolio achieved an annualized return of 3.9 per cent.

Canadian equity markets had a very positive performance during the period with the S&P/TSX index increasing by 34.8 per cent and the S&P/TSX Small Cap Index increasing by 65.8 per cent. Global equity markets were also positive with the MSCI World index rising by 18.3 per cent.

Government bond yields were volatile during the period with the Government of Canada 10-year bond reaching a low of 2.88 per cent on April 4, 2025, a high of 3.60 per cent on July 15, 2025, while ending the fiscal year at 3.47 per cent.

During the year, the yield curve steepened while presenting a normal upward sloping structure, with yields on short-term bonds decreasing by 32 basis points (from 2.64 per cent to 2.32 per cent) and yields on long-term government bonds increasing by 50 basis points (from 2.97 per cent to 3.47 per cent).

Inflation was quite volatile during the period, declining in the first quarter of the fiscal year (from an annual 2.3 per cent by March 2025 to an annual 1.9 per cent by June 2025) and rising in the last three quarters of that period (from an annual 1.9 per cent by June 2025 to an annual 2.4 per cent by March 2026). Overall, from March 2025 to March 2026, inflation slightly increased (from an annual 2.3 per cent to an annual 2.4 per cent). The decline in the average annual inflation rate in fiscal 2025/26 relative to prior fiscal year (from an annual 2.2 per cent to an annual 2.0 per cent) supported the Bank of Canada's decision to continue reducing its overnight interest rate—as they did in the prior fiscal year—which was cut twice by 25 basis points at each of the two consecutive meetings (September 2025 and October 2025) from a high of 2.75 per cent as of March 31, 2025 to a low of 2.25 per cent as of October 31, 2025.

Retained Earnings

At March 31, 2026, retained earnings are $777.2 million (March 31, 2025—$721.6 million). This is an accumulation from four lines of business: Basic $564.0 million; Extension $85.9 million; SRE $102.9 million; DVA $24.4 million (March 31, 2025—Basic $496.6 million; Extension $87.7 million; SRE $100.7 million; DVA $36.6 million).

Transfer of Capital Between Lines of Business

The Corporation transferred $72.0 million (March 31, 2025—$52.9 million) from the Extension line of business to the Basic line of business during the year ended March 31, 2026.

Responsibility for Financial Statements

The financial statements are the responsibility of management and are prepared in accordance with International Financial Reporting Standards. The financial statements necessarily include amounts that are based on careful assessment of data available through Manitoba Public Insurance Corporation's (the Corporation) information systems and management. In the opinion of management, the accounting practices utilized are appropriate in the circumstances and the financial statements fairly reflect the financial position and results of operations of the Corporation.

In carrying out its responsibilities, management maintains appropriate systems of internal and administrative controls designed to ensure that transactions are accurately recorded on a timely basis, are properly approved and result in reliable financial statements. The adequacy and operation of the control systems are monitored on an ongoing basis.

The financial statements were approved by the Board of Directors, which has overall responsibility for their contents. The Board of Directors is assisted with this responsibility by its Audit and Finance Committee (the "Committee"), which consists primarily of Directors not involved in the daily operations of the Corporation.

The general responsibilities of the Committee are categorized into the following: review of financial reporting, review of internal controls and processes, review of actuarial functions, monitoring of corporate integrity, compliance with authorities and review of performance reporting. The Committee's role is that of oversight in these areas in order to ensure management processes are in place and functioning so as to identify and minimize risks to the business operations.

In carrying out the above responsibilities, this Committee meets regularly with management, and with both the Corporation's external and internal auditors to approve the scope and timing of their respective audits, to review their findings and to satisfy itself that their responsibilities have been properly discharged. The Committee is readily accessible to the external and internal auditors.

The Committee is responsible for the review of the actuarial function. As well, the Committee recommends, for approval, the appointment of the external actuary and their fee arrangements to the Board of Directors. The Appointed Actuary is responsible for ensuring that the assumptions and methods used in the valuation of policy and claims liabilities are in accordance with accepted actuarial practice, applicable legislation and associated regulations or directives. In addition, the Appointed Actuary provides an opinion regarding the valuation of policy and claims liabilities at the balance sheet date to meet all policyholder obligations of the Corporation. Examination of supporting data for accuracy and completeness of assets and their ability to meet the policy and claims liabilities are important elements in forming the Appointed Actuary's opinion.

PricewaterhouseCoopers LLP, the Corporation's appointed external auditor, have audited the financial statements. Their Independent Auditor's Report is included herein. Their opinion is based upon an examination conducted in accordance with Canadian generally accepted auditing standards, performing such tests and other procedures as they consider necessary in order to obtain reasonable assurance that the financial statements are free of material misstatement and present fairly the financial position of the Corporation in accordance with International Financial Reporting Standards.

Actuary's Report

To the Board of Directors of Manitoba Public Insurance Corporation:

I have valued the policy liabilities of the Manitoba Public Insurance Corporation for its financial statements prepared in accordance with International Financial Reporting Standards for the year ended 31 March 2026.

In my opinion, the amount of policy liabilities is appropriate for this purpose. The valuation conforms to accepted actuarial practice in Canada and the financial statements fairly present the results of the valuation.

Independent auditor's report

To the Board of Directors of Manitoba Public Insurance Corporation

Our opinion

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Manitoba Public Insurance Corporation (the Corporation) as at March 31, 2026 and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards.

What we have audited

The Corporation's financial statements comprise:

- the statement of financial position as at March 31, 2026;
- the statement of operations for the year then ended;
- the statement of comprehensive income (loss) for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, comprising material accounting policy information and other explanatory information.

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

PricewaterhouseCoopers LLP
Richardson Building, 1 Lombard Place, Suite 2300
Winnipeg, Manitoba, Canada R3B 0X6
T.: +1 204 926 2400, F.: +1 204 944 1020
Fax to mail: ca_winnipeg_main_fax@pwc.com

"PwC" refers to PricewaterhouseCoopers LLP, an Ontario limited liability partnership.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Corporation in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Other information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

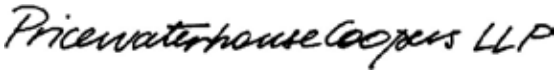
Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Corporation's financial reporting process.

Auditor's responsibilities for the audit of the financial statements



Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Corporation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Corporation to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to Financial Statements

March 31, 2026

1. Corporate Information

The Manitoba Public Insurance Corporation (the Corporation) was incorporated as a Crown corporation under *The Automobile Insurance Act in* 1970. The Corporation is owned by the Province of Manitoba and the financial results of the Corporation are included in the consolidated financial statements of the Province of Manitoba. In 1974, *The Automobile Insurance Act* was revised and became *The Manitoba Public Insurance Corporation Act* (Chapter A180 of the continuing consolidation of the Statutes of Manitoba). In 1988, the Act was re-enacted in both official languages as Chapter P215 of the Statutes of Manitoba. The address of the Corporation's registered office is 234 Donald Street, Winnipeg, Manitoba.

Under the provisions of its Act and regulations, the Corporation operates an automobile insurance division and a discontinued general insurance division. The lines of business for the automobile insurance division provide for Basic Universal Compulsory Automobile Insurance, Extension and Special Risk Extension coverages. For financial accounting purposes, the lines of business for the automobile insurance division and the discontinued general insurance division are regarded as separate operations and their revenues and expenses are allocated on a basis described in the summary of material accounting policies. For financial reporting purposes, due to the immateriality of the financial results of the discontinued general insurance operations, the operations are reported as part of the Special Risk Extension line of business. The Basic Universal Compulsory Automobile Insurance line of business rates are approved by the Public Utilities Board of Manitoba.

Under *The Drivers and Vehicles Act* (DVA), the Corporation is responsible for DVA operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services.

2. Basis of Presentation

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS). They were approved for issue by the Manitoba Public Insurance Corporation Board of Directors on June 24, 2026.

These financial statements are presented in thousands, unless as otherwise noted, and in Canadian dollars which is the Corporation's functional and presentation currency. The Corporation presents its Statement of Financial Position broadly in order of liquidity and, Statement of Financial Position line items may include both current and non-current balances, as applicable.

The material accounting policies applied in the preparation of these financial statements are described in Note 3. These policies have been applied consistently to all periods presented.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

2.1 Seasonality

The automobile insurance business, which reflects the primary business of the Corporation, is seasonal in nature. While revenue from premiums is generally stable from quarter to quarter, underwriting results are impacted by weather conditions which may vary significantly between quarters.

2.2 Material Estimates, Assumptions and Judgments

The preparation of these financial statements in accordance with IFRS requires management to use estimates, assumptions and judgments that affect the amount reported for certain assets, liabilities, and disclosures as at the reporting date, as well as recognized amounts of revenues and expenses during the reporting period. Actual results could differ significantly from these estimates and assumptions.

The key sources of estimation uncertainty and areas where significant judgments have been applied are discussed in material accounting policies summarized in Note 3 and other notes to these financial statements including:

- Determination of the fair value of level 3 financial instruments – Note 5
- Assessment and measurement of deferred development costs – Note 8
- Measurement of employee future benefits and underlying actuarial assumptions - Note 13
- Determination of insurance contract liabilities – Note 14
- Assessment and measurement of onerous contract – Note 29

3. Summary of Material Accounting Policies

A summary of the material accounting policies followed by the Corporation are outlined below.

3.1 Financial assets and liabilities

Financial assets and financial liabilities are recognized in the Statement of Financial Position when the Corporation becomes a party to the contractual requirements of the instrument.

3.2 Investments

Funds available for investments are managed by the Manitoba Department of Finance or administered by external managers that are under contract with the Manitoba Department of Finance, on behalf of the Corporation, in accordance with Section 12(1) of *The Manitoba Public Insurance Corporation Act*.

Investments include cash, cash equivalents and short-term securities, debt securities, equity securities, investments in pooled funds, private debt, infrastructure debt and venture capital.

The Corporation's directly held real estate investments are recorded at cost and are depreciated over their estimated useful life in accordance with IAS 40 Investment Property (IAS 40).

The Corporation classifies and measures financial instruments in accordance with IFRS 9.

All financial instruments are measured at initial recognition at fair value and are classified and subsequently measured as fair value through profit or loss (FVTPL), fair value through other comprehensive income (FVOCI), or amortized cost based upon the Corporation's business model for managing its assets and the contractual cash flow characteristics of the asset.

The Corporation's business models are determined at the level that reflects how its groups of financial assets are managed together to achieve business objectives.

The Corporation accounts for the purchase and sale of securities on settlement date. Transaction costs associated with the acquisition of financial instruments classified or designated as FVTPL are expensed as incurred.

Financial Assets

A financial asset is classified as FVOCI if it meets the following criteria and is not designated as FVTPL:

- It is held in a business model whose objective is to hold to collect contractual cash flows and sell financial assets, and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

A financial asset is classified as amortized cost if it meets the following criteria and is not designated as FVTPL:

- It is held in a business model with the objective to hold to collect contractual cash flows, and
- Its contractual terms give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.

Financial assets that are managed on a fair value basis and do not meet the objectives of a hold to collect or hold to collect and sell business model, such as financial assets that are held for trading, are measured at FVTPL.

A financial asset is classified as held-for-trading if it is acquired principally for the purpose of selling in the near term. Cash, cash equivalents and short-term securities are held to meet short-term cash requirements, as such, they are held for trading and are measured at FVTPL.

The Corporation may make an irrevocable election, on an instrument-by-instrument basis, at initial recognition of the instrument, to assign the 'Designated at fair value through profit and loss' measurement category (designated at FVTPL) to the financial instrument, if doing so eliminates or significantly reduces an accounting mismatch. Financial assets that the Corporation has voluntarily assigned to the designated at FVTPL measurement category include investments in bonds, debt securities and private debt that are held and managed in backing insurance contract liabilities.

Business model assessment

The Corporation's business models are determined at the level that best reflects how the Corporation manages portfolios of financial assets to achieve its business objectives. They therefore reflect whether cash flows will result from collecting contractual cash flows, selling financial assets or both. Determining business models requires the use of judgment and is based on all relevant evidence that is available to the Corporation at the time of the assessment including:

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

- How the economic activities of the business model generate benefits and how such economic activities are evaluated and reported to key management personnel; and
- The frequency, volume, and timing of sales in prior periods, the reasons for the sales and expectations about future sales activity. Information about sales activity is not considered in isolation, but as part of an overall assessment of how the stated objective for managing the financial assets is achieved and how cash flows are realized.

The Corporation's business models fall into two categories, which are indicative of the key strategies to generate returns:

- The Corporation's primary business model is held-to-collect and sell which provides flexibility aimed at supporting the cash flow required in managing insurance contracts.
- The Corporation also carries certain financial assets under the held-to-collect business model where the emphasis is to collect contractual cash flows. Sales are incidental to this objective and are expected to be insignificant or infrequent. The Corporation maintains a portfolio of financial assets to manage its liabilities and obligations for employee pension and retirement benefits.

Investments in Equity

Financial assets that are investments in equity securities are classified at FVTPL, unless an irrevocable designation is taken at initial recognition to designate the asset at FVOCI.

Investments in Debt Instruments

The Corporation's investments in financial assets that are debt securities, investments in private debt, venture capital, partnerships, pooled commercial mortgages, and pooled funds are classified at FVTPL because these investments either fail the SPPI test or are individually designated at initial recognition as FVTPL because they support insurance contract liabilities.

Investments in financial assets that are classified as FVTPL or designated at FVTPL are recorded at fair value in the Statement of Financial Position, with gains or losses including interest or dividend income and foreign exchange gains and losses, recognized in Investment income in the Statement of Operations.

Cash and Cash Equivalents

Cash and cash equivalents are comprised of cash, current operating accounts, provincial short-term deposits with maturities of 90 days or less from the date of acquisition, and funds held in trust on behalf of other insurance companies.

Cash equivalents are highly liquid investments that are subject to insignificant changes in value and are readily convertible into known amounts of cash. These are classified as held for trading for the purpose of meeting short-term cash requirements for insurance contracts and are accounted for at FVTPL. Cash and cash equivalents values are assumed to approximate their carrying values, due to their short-term nature or because they are frequently repriced to current market rates.

Accounts Receivable

Accounts receivable represents receivables from customers for products and services that are not insurance contracts, amounts due from third parties, and amounts to be collected from employees of the Corporation.

Accounts receivable are initially recognized at cost, being the fair value. Subsequent to initial measurement they are measured at amortized cost. Accounts receivable do not contain a significant financing component. For financial assets that are not held at fair value through profit or loss, the Corporation assesses at each reporting date whether to recognize a loss allowance for expected credit losses (ECL). The ECL is estimated as the difference between the contractual cash flows due in accordance with the contract and all cash flows the Corporation expects to receive.

The Corporation applies a simplified approach in calculating ECL for accounts receivable, where changes in credit risk are not tracked, and loss allowances are based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Derecognition of Financial Assets

The Corporation derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

If the Corporation neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Corporation recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Corporation retains substantially all the risks and rewards of ownership of a transferred financial asset, the Corporation continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

When a financial asset is derecognized in its entirety, a gain or a loss is recognized in the Statement of Operations for an amount equal to the difference between the carrying amount of the asset and the value of the consideration received.

The Corporation applies judgment to determine whether the contractual rights to the cash flows have expired, have been transferred or have been retained with an obligation to pay them to a third party. With respect to the transfer of substantially all the risks and rewards of ownership of the assets, the Corporation evaluates its exposure before and after the transfer as well as the changes in the amount and timing of the net cash flows of the transferred asset.

Financial Liabilities

Financial liabilities include accounts payable and accrued liabilities, which are all current liabilities, are recorded in the Statement of Financial Position at amortized cost which approximates their fair value. Financial liabilities are derecognized when the related obligation is discharged, cancelled, or expires. The difference between the carrying amount of the transferred financial liability and the consideration paid is recognized in Investment income in the Statement of Operations.

Fair Value Determination

The fair values of financial instruments are obtained from external pricing services and are based on available bid prices for Level 1 financial assets. Level 2 and Level 3 fair value determinations are based on availability of inputs other than bid prices as there is not a quoted market price.

The Corporation maximizes the use of observable inputs when measuring fair value. The Corporation obtains quoted prices in active markets, when available, for identical assets at the reporting date to measure equity securities at fair value in its fair value through profit or loss portfolio.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Valuation techniques used by the Corporation's independent pricing service providers and third-party broker-dealers include use of prices from similar instruments where observable market prices exist, discounted cash flow analysis, option pricing models, and other valuation techniques commonly used by market participants. The Corporation assesses the reasonableness of pricing received from these third-party sources by comparing the fair values received to recent transaction prices for similar assets where available, to industry accepted discounted cash flow models (that incorporate estimates of the amount and timing of future cash flows and market observable inputs such as credit spreads and discount rates) and to option pricing models (that incorporate market observable inputs including the quoted price, volatility and dividend yield of the underlying security and risk-free rate).

Detailed valuations are prepared for those financial instruments that are priced internally, while external pricing received from independent pricing service providers and third-party broker-dealers are evaluated by the Corporation for reasonableness. The Corporation's Chief Actuary and Chief Financial Officer oversee the valuation function and regularly review the valuation processes and results, including at each quarterly reporting period. Significant valuation matters, particularly those requiring extensive judgment, are communicated to the Corporation's Investment Committee and Audit & Finance Committee.

3.3 Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Replacement costs are capitalized when incurred and if it is probable that future economic benefits associated with the item will flow to the Corporation and the cost of the item can be measured reliably. All repairs and maintenance costs are recognized in Net income (loss) attributable to Owner of the Corporation during the period in which they occur.

Depreciation is provided on a straight-line basis which will depreciate the cost of each asset to its residual value over its estimated useful life:

Land & Buildings

- HVAC systems 20 years
- land improvements 25 years
- roofing systems 30 years
- elevators/escalators 30 years
- buildings 40 years

Furniture & Equipment

- computer equipment 3 years
- vehicles 5 years
- furniture and equipment 10 years
- demountable wall systems 10 years

Buildings held under a long-term lease arrangement are depreciated on a straight-line basis over 40 years. Leasehold improvements are carried at cost and are depreciated over the term of the lease plus the first renewal period.

Tenant improvements are carried at cost and are depreciated over the term of the lease plus the first renewal period.

Depreciation of construction in progress will begin, in accordance with the above policy, when construction has been completed and the property is deemed available for use.

Land is not subject to depreciation and is carried at cost.

3.4 Investment Property

The Corporation applies IAS 40 in the recognition, measurement and disclosure of investment property.

In the determination of what constitutes investment property relative to property and equipment the Corporation considers only property that is 100 per cent utilized as investment property to be classified as investment property.

The Corporation's investment property, which is property held 100 per cent to earn rentals and/or capital appreciation, is measured initially at its cost, including transaction costs. The Corporation has elected to use the cost model to subsequently value its investment property. Therefore, the investment property's carrying amount is valued at cost less accumulated depreciation and impairment losses. Depreciation is based on the useful life of each component of the investment property along with the property's residual value.

The fair value of the investment property is disclosed based on an external valuation that occurs, at a minimum, every other year. The fair value disclosed is based on the most recent valuation which was conducted for March 31, 2026.

The Corporation assesses its investment property for impairment on an annual basis in accordance with the impairment test guidance set forth in IAS 36, Impairment of Assets. Based on this assessment it was determined the investment property was not impaired as at March 31, 2026.

Depreciation is provided on a straight-line basis which will depreciate the cost of each asset to its residual value over its estimated useful life:

- parkade 40 years
- surface parking lot held at cost

3.5 Deferred Development Costs (Intangible Assets)

The costs of developing major information systems that are expected to provide an economic benefit to the Corporation are deferred to future periods. These information system expenditures are stated at cost net of accumulated amortization and accumulated impairment losses and are amortized on a straight-line basis over five years unless the useful life is deemed to be longer, but in no case shall the useful life exceed 10 years, starting the month after the asset becomes available for use.

An internally generated intangible asset arising from development (or from the development phase of an internal project) is recognized if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;

- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognized for internally generated intangible assets is the sum of the expenditure incurred, including directly assigned employee costs, from the date when the intangible asset first meets the recognition criteria listed above. Where no internally generated intangible asset can be recognized, development expenditures are recognized in Net income (loss) attributable to Owner of the Corporation in the period in which they are incurred. Subsequent to initial recognition, internally generated intangible assets are reported at cost less accumulated amortization and accumulated impairment losses.

3.6 Impairment of Tangible and Intangible Assets (Other Than Financial Assets)

When specific events or circumstances arise, the Corporation reviews the carrying amount of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Corporation estimates the recoverable amount of the cash generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognized as an expense immediately in the Net income (loss) attributable to Owner of the Corporation.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years. A reversal of an impairment loss is recognized as income immediately.

The Corporation is required to assess appropriate metrics and sources of information for evidence that intangible assets may be impaired. Further, the Corporation may be required to estimate the recoverable amount of the asset. Performing these assessments and developing the estimate of recoverable amounts requires the Corporation to make estimates and assumptions. The main estimates and assumptions used in calculating the recoverable amount are future cash flows estimated based on internal financial forecasts, expected future earnings and the discount rate.

3.7 Leasing

The Corporation as a Lessee

The Corporation, as a lessee, recognizes a right-of-use asset and a lease liability at the lease's commencement date. The right-of-use asset is initially measured at cost which is comprised of the amount of the initial lease liability and any lease payments made at or before the commencement date less any lease incentives received, initial direct costs and restoration costs. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term plus renewal options expected to be exercised on a straight-line basis.

The lease liability arising from the lease is originally measured on a present-value basis. Lease liabilities include the net present value of fixed payments (including in-substance fixed payments), less any lease incentives receivable, variable lease payments that are based on an index or a rate, amounts expected to be payable by the lessee under residual value guarantees, the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and payment of penalties for terminating a lease if the lease term reflects the lessee exercising that option. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be determined, or the Corporation's incremental borrowing rate. Generally, the Corporation uses its incremental borrowing rate as the discount rate.

The Corporation as a Lessor

The Corporation leases retail, office and parking space in buildings and parking facilities owned by the Corporation. Revenue from lease payments is recognized on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Revenue from leases is reported in the Net income (loss) attributable to Owner of the Corporation, reported on the Statement of Operations within Service fees and other revenue.

3.8 Insurance revenue

Insurance revenue is comprised of Revenue from premiums and Other insurance revenue.

The Corporation measures insurance contracts using the Premium Allocation Approach (PAA) provided under IFRS 17 *Insurance Contracts* (IFRS 17). Revenue from premiums is the amount of expected premium receipts from groups of insurance contracts issued, net of cancellations and promotional returns, allocated to each period over the coverage period provided by the contracts, based on the passage of time as this approximates the pattern of release of risk over the coverage period.

Other insurance revenue represents fees charged to policyholders for costs incurred under the Corporation's billing and payment plans, payment processing charges and transaction fees for the administration of policies.

3.9 Total Insurance Service Expense

Insurance service expense includes contract fulfilment and acquisition costs that are directly attributable to insurance contracts. Insurance service expenses are comprised of the following:

- Claims incurred in the period;

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

- Expenses incurred that are directly attributable to fulfilling the insurance contracts;
- Losses on onerous contracts and reversals of those losses, if any;
- Changes related to past service (e.g., changes in the liability for incurred claims in periods subsequent to the claim being incurred); and
- Insurance acquisition costs incurred in the period.

3.10 Net Income (Expense) from Reinsurance Contracts Held

The Corporation has elected to present income and expenses arising from reinsurance contracts held as a single line item in the Statement of Operations. Income comprises the amounts recoverable from reinsurers for incurred claims and other incurred insurance service expense, impacts from changes in the risk of non-performance by the reinsurer, when relevant, and changes in the loss recovery component for groups of onerous contracts, if any. Reinsurance expenses is the expected reinsurance premiums expense allocated to the period, based on the passage of time.

3.11 Investment Income (Loss)

Investment income is recorded as it accrues. Dividend income from investments is recognized when the Corporation's rights to receive payments is established. Dividend income on common and preferred shares is recorded on the ex-dividend date and usually the notification date or date when the shareholders have approved the dividend for private equity instruments. Distributions on pooled funds are recorded on the income distribution date. Gains and losses are determined and recorded as at the settlement date and are calculated on the basis of average cost. The effective interest rate method is used to amortize premiums or discounts on the purchase of bonds.

- Interest revenue is recognized when it is probable that the economic benefits will flow to the Corporation and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.
- The realized gain or loss on disposal of an investment is the difference between the proceeds received, net of transaction costs, and its original cost or amortized cost as appropriate.
- The realized gain or loss on disposal of property and equipment is the difference between the proceeds received, net of transaction costs and its original cost or depreciated cost as appropriate.
- Unrealized gains and losses represent the difference between the carrying value at the period end and the carrying value at the previous period end or purchase value during the period, less the reversal of previously recognized unrealized gains or losses in respect of disposals during the period.

3.12 Insurance Finance Income (Expense)

Insurance finance income or expense reports the change in the carrying amount of the group of insurance contracts arising from the effect of unwinding of discounting applied in measuring insurance contracts and the change in discounting from changes in discount rates. The Corporation has elected to present all Insurance finance income (expense) in the Statement of Operations rather than in the Statement of Comprehensive Income (Loss).

3.13 Service Fees and Other Revenue

Service fees and other revenue includes fees charged to customers for products and services other than insurance products or services, rental income, and incidental income from operations. The income is recognized when services have been provided or the products have been delivered.

3.14 *The Drivers and Vehicles Act* operations for the Province of Manitoba

Under *The Drivers and Vehicles Act* (DVA), the Corporation is responsible for DVA operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services.

3.15 Operating Expense

Operating expense is comprised of corporate operating expenses after allocation of expenses to insurance service expense. Expenses that are attributable to the fulfillment of insurance contracts including costs of premium collection, claims adjudication and processing, actuarial calculations, and policy pricing and administration are assigned to maintenance and acquisition expense reported within insurance service expense on the Statement of Operations. Expenses are allocated based on the Corporation's internal expense allocation methodology including expense and activity-based costing analysis.

3.16 Provisions

Provisions are recognized when the Corporation has a present obligation (legal or constructive) as a result of a past event, it is probable that the Corporation will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received, and the amount of the receivable can be measured reliably.

Provision for Employee Current Benefits

The provision for employee current benefits includes accruals for vacation pay and sick pay determined in accordance with the Collective Agreement and Corporate policy.

Provision for Employee Future Benefits

Included in the provision for employee future benefits are the pension benefit plan and other benefit plans.

i. **Pension Benefit Plan**

The employees of the Corporation are members of a defined benefit pension plan administered under The Civil Service Superannuation Act. Included in the accounts is a provision for the employer's future pension liability calculated on an indexed basis. The provision for pension is actuarially determined on an annual basis using the projected benefit method prorated on services. The actuarial present value of the accrued pension benefits is measured using the Corporation's best estimates based on assumptions relating to market interest rates at the measurement date based on high quality debt instruments, salary changes, withdrawals and mortality rates. Changes in experience gains and losses are recognized in the current period. Current service costs and interest costs are recognized in Net income (loss) attributable to Owner of the Corporation in the current period. Actuarial gains and losses are recognized in OCI in the current period.

ii. **Other Benefit Plans**

Other benefit plans consist of two post-retirement extended health plans and severance pay benefits.

The provision for post-retirement extended health benefits is actuarially determined on an annual basis using the projected benefit method prorated on services, which includes the Corporation's best estimates based on assumptions relating to retirement ages of employees and expected health costs. Changes in experience gains and losses are recognized in the current period. Current service costs and interest costs are recognized in Net income (loss) attributable to Owner of the Corporation in the current period. Actuarial gains and losses are recognized in OCI in the current period.

Employees of the Corporation are entitled to severance pay in accordance with the Collective Agreement and Corporate policy. The provision for severance pay is actuarially determined on an annual basis using the projected benefit method prorated on services, without salary projection, which includes the Corporation's best estimates based on assumptions relating to the proportion of employees that will ultimately retire.

3.17 Salvage and Subrogation

Recoveries from salvage and subrogation are recorded as an offset to claims costs. Expected salvage recoveries and subrogation reimbursements are included in the measurement of the liability for incurred claims reported within Insurance contract liabilities on the Statement of Financial Position.

3.18 Structured Settlements

In the normal course of tort claims adjudication, the Corporation settles certain long-term claims losses through the purchase of annuities under structured settlement arrangements with life insurance companies. As the Corporation does not retain any interest in the related insurance contract and obtains a legal release from the claimant, any gain or loss on the purchase of the annuity is recognized in the Statement of Operations at the date of purchase and the related claims liabilities are derecognized. While the Corporation remains exposed to the credit risk that the life insurance companies may fail to fulfill their obligations, management believes this risk to be remote.

3.19 Allocation of Revenue, Incurred Claims and Expenses

Revenue from premiums and incurred claims are allocated directly to the division writing the insurance risk.

Other insurance revenue is allocated to the automobile insurance division lines of business on the following basis:

- Identifiable other insurance revenue is allocated to each line of business.
- Where direct allocation is not possible, other insurance revenue is prorated to each line of business based mainly on factors such as premiums written ratios, expense allocation ratios and payroll allocation ratios. The formulas developed for the allocation of other insurance revenue are approved by the Board of Directors.

Service fees and other income are allocated to the automobile insurance division lines of business and *The Drivers and Vehicles Act* operations on the following basis:

- Identifiable direct service fees and other revenue are allocated to each line of business.
- Where direct allocation is not possible, service fees and other revenue are prorated to each line of business based mainly on factors such as premiums written ratios, expense allocation ratios and payroll allocation ratios. The formulas developed for the allocation of service fees and other revenue are approved by the Board of Directors.

Investment income is allocated to the automobile insurance division and *The Drivers and Vehicles Act* operations and the discontinued general insurance division based on a direct attribution of each segments unique portfolio returns and a pro-rata share of the portfolio backing the corporate employee future benefits obligation.

Expenses, including Corporate Operating expenses, are allocated to the automobile insurance division lines of business and *The Drivers and Vehicles Act* operations on the following basis:

i. Identifiable direct expenses are charged to each line of business.
ii. Where direct allocation is not possible, expenses are prorated to each line of business based mainly on factors such as space, number of employees, time usage, Contact Centre statistics, and metrics such as revenue from premiums and incurred claims. The basis for allocation of indirect shared expenses is approved by the Board of Directors.
iii. The allocation of improvement initiative costs is based on a review of each project to determine which line of business will benefit from the project. The allocation basis for each project is approved by the Board of Directors.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

3.20 Foreign Currency

Monetary items denominated in foreign currencies are adjusted to reflect the exchange rate in effect at the year end. Revenue and expense items in foreign currencies are translated at the exchange rate in effect at the transaction date. Unrealized gains or losses arising on translation are reported in the Statement of Operations in the current year.

3.21 Comprehensive Income

Comprehensive income consists of Net income (loss) attributable to Owner of the Corporation and Other comprehensive income (loss). Actuarial gains and losses on employee future benefits amounts are recorded in Other Comprehensive Income (OCI) and included in Accumulated Other Comprehensive Income (AOCI). AOCI is included on the Statement of Financial Position as a separate component.

3.22 Insurance Contracts

Classification of Contracts

Insurance contracts are comprised of insurance contracts issued and reinsurance contracts held.

Insurance contracts issued by the Corporation are arrangements where the Corporation accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder for specified uncertain future events that adversely affect the policyholder and whose amount and timing is unknown. The Corporation determines whether it has accepted significant insurance risks by comparing the benefits that could become payable under various possible scenarios relative to the premium received from the policyholder for insuring the risk.

Reinsurance contracts held are insurance contracts under which the Corporation transfers insurance risk to another entity that issues the contract (the reinsurer).

Measurement of Insurance Contracts

The carrying value of insurance contracts is comprised of the liability for remaining coverage (LRC) and the liability for incurred claims (LIC). Measurement of these two components is based on the application of an appropriate measurement model provided under IFRS 17.

A simplified measurement model, the Premium Allocation Approach (PAA), can be applied to contracts that are one year or less or contracts longer than one year if the liability for remaining coverage determined under the PAA is not materially different than the result provided under the general measurement model (GMM).

The insurance contracts the Corporation issues and reinsurance contracts it holds meet the requirements for measurement under PAA. The Corporation applies the PAA in measuring all insurance contracts reported in these financial statements.

The GMM measures groups of contracts based on estimates of the present value of future cash flows that are expected to arise over the term of the contracts, plus an explicit risk adjustment for non-financial risk. The LIC is measured by applying the GMM requirements.

Significant judgment and assumptions are required in measuring assets or liabilities for insurance contracts. Application of different assumptions may result in significantly different measurement results. Actual experience may differ from assumptions, and estimates may change from period to period based on future events or revisions of assumptions. Key assumptions and considerations in selecting these assumptions are discussed in Note 14. The sensitivity of the measurement of insurance contracts to changes in risk variables are discussed in Note 14.

Level of Aggregation

Insurance contracts that are subject to similar risks and are managed together are assigned to portfolios of insurance contracts.

Insurance contracts issued by the Corporation are aggregated into portfolios that are reported and measured separately from portfolios of reinsurance contracts held by the Corporation.

The Corporation uses judgment in establishing its various portfolios, consideration is given to the lines of businesses and distribution channels.

Portfolios are further disaggregated into groups of contracts that are issued within a 12-month period. These annual cohorts are further divided into groups of contracts based on expected profitability: onerous contracts, contracts that do not have a significant possibility of becoming onerous subsequently, and other contracts.

An insurance contract is onerous if, at the date of initial recognition, the estimated fulfillment cash flow expectations determined on a probability-weighted basis is a net outflow. The Corporation's evaluation of whether contracts are onerous is based on reasonable and supportable information including historical experience and forward-looking information that is available without undue cost or effort.

In determining groups of contracts, the Corporation has elected to include in the same group, contracts where the ability to set prices or levels of benefits for policyholders with different characteristics is constrained by regulation.

Reinsurance contracts held by the Corporation provide cover for underlying contracts that are reported in different groups. The Corporation reports portfolios of reinsurance contracts by nature of risk covered by the contracts (Casualty, Facultative and Catastrophe). Groups of reinsurance contracts held that are entered into within an annual period (typically a financial year) are divided into groups based on whether they present a net gain or net loss position at initial recognition.

Combination and Separation of Components from Contracts

Insurance and reinsurance contracts are assessed to determine whether they contain components which must be accounted for under an IFRS other than IFRS 17. The Corporation's insurance and reinsurance contracts do not include such components.

Service components of insurance contracts are treated as separate service contracts only if the service component is not highly interrelated with the insurance component. Service components that are not separated, such as payment plan services provided to policyholders, are accounted for with insurance contracts.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

The Corporation applies judgment when particular facts and circumstances require the separation of its insurance contracts into distinct insurance components. The Corporation considers interdependency between the different risks covered, whether components lapse together and whether components can be priced and purchased separately.

Contract Recognition and Derecognition

The Corporation recognizes a group of insurance contracts that it issues from the earliest of:

- The beginning of the coverage period of the group of contracts;
- The date when the first payment from a policyholder in the group becomes due or when the first payment is received if there is no due date; and
- For a group of onerous contracts, when the group becomes onerous if facts and circumstances indicate there is such a group.

A group of reinsurance contracts is recognized at the earliest of:

- The beginning of the coverage period;
- The date an onerous group of underlying insurance contracts is recognized, to the extent that a reinsurance contract applying to these contracts is entered into at that date.

Contract Boundaries

Contract boundaries are identified to determine which future cash flows are included in the measurement of an insurance contract (or reinsurance contract held). Cash flows are within the boundary of a contract if they arise from substantive rights and obligations that exist during the reporting period in which the Corporation can compel the policyholder to pay the premiums (or is compelled to pay amounts to a reinsurer), or in which the Corporation has a substantive obligation to provide the policyholder with services (or receive services from a reinsurer).

A substantive obligation to provide services ends when:

- The Corporation has the practical ability to reassess the risks of the particular policyholder and, as a result, can set a price or level of benefits that fully reflects those risks, or
- Both the following criteria are satisfied:
    - The Corporation has the practical ability to reassess the risks of the portfolio of insurance contracts that contain the contract and, as a result, can set a price or level of benefits that fully reflects the risk of that portfolio; and
    - The pricing of the premiums for coverage up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date.

Liabilities or assets relating to expected premiums or claims outside the boundary of the insurance contract relate to future insurance contracts and are not recognized in measuring or reporting insurance contracts in effect. Premiums payments received outside the contract boundary are reported as Deferred Revenue in the Statement of Financial Position or in accordance with other IFRS that appropriately report the nature and substance of the amounts involved.

For reinsurance contracts, a substantive obligation to receive services under a reinsurance contract ends when the reinsurer has the practical ability to reassess the risk transferred to it and, as a result, can set a price or level of benefits that fully reflects those risks, or the reinsurer has the substantive right to terminate the coverage.

Initial Measurement

On initial recognition, the insurance contract liability for a group of insurance contracts is the liability for remaining coverage.

In applying the PAA and the option to expense acquisition costs as incurred, the Corporation measures the liability for remaining coverage at initial recognition as the premium received when the contract is initially recognized, and the coverage period commences.

The Corporation assumes that no contracts in a portfolio are onerous at initial recognition unless facts and circumstances indicate otherwise.

Subsequent Measurement

The carrying amount of a group of insurance contracts at the end of each reporting period is the sum of the liability for remaining coverage and the liability for incurred claims.

i. Liability for Remaining Coverage

The liability for remaining coverage is the Corporation's obligation to provide insurance services over the remaining unexpired portion of the coverage period. This liability is measured at each reporting period as:

- the carrying amount of the liability for remaining coverage at the beginning of the period,
- plus the amount of premium received in the period,
- minus the amount recognized as revenue for the insurance services provided in the period,
- plus the remaining loss component for groups of contracts that are onerous, if any.

Under the PAA, the Corporation elects to not adjust the liability for remaining coverage for the time value of money and the effects of financial risk because the time between providing coverage and the related premiums is expected to be no more than one year.

Also, under the PAA, the Corporation elects to recognize insurance acquisition expenses in the Statement of Operations as incurred, rather than including these expenses within the measurement of liability for remaining coverage.

ii. Liability for Incurred Claims

The liability for incurred claims is the measurement of the Corporation's obligation to investigate and pay valid claims for insured events that have already occurred, including events that have occurred but for which claims have not been reported, and other incurred insurance expenses. The liability is measured as the fulfillment cash flows expected to occur in fulfilling the contract. These are probability-weighted estimates of future cash flows, discounted to reflect the time value of money and the associated financial risks, plus a risk adjustment for non-financial risk. These fulfillment cash flows are measured using current estimates of future cash flows, current discount rates, and current estimates of risk adjustment for non-financial risk.

In measuring the liability for incurred claims, the Corporation estimates future contractual cash flows within the contracts' boundary by considering evidence from current and past conditions as well as possible future conditions including market and non-market variables impacting the valuation of the cash flows.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

The liability for incurred claims is discounted to consider the time value of money. The PAA provides an option to not adjust future cash flows for the time value of money and the effect of financial risk if the cash flows are expected to be paid or received in one year or less from the date the claims are incurred. Upon adoption of IFRS 17, the Corporation has elected to discount all liabilities for incurred claims.

The risk adjustment is the compensation the Corporation receives in fulfilling an insurance contract that arises from uncertainties surrounding the amount and timing of cash flows for non-financial risks. Estimates and assumptions are reviewed periodically for appropriateness in reflecting current, past, and future conditions.

When estimating fulfillment cash flows, the Corporation includes all cash flows that are within the contract boundary including:

- Premiums and related cash flows;
- Claims and benefits, including reported claims not yet paid, incurred claims not yet reported and expected future claims (within the contract boundary);
- Premium taxes; and
- Commissions expense.

Onerous Insurance Contracts

The Corporation assumes that no contracts in a portfolio are potentially onerous at initial recognition unless facts and circumstances indicate otherwise.

The Corporation's process for identifying indicators of possible onerous contracts includes assessing internal management reports and information from planning and pricing activities, forecast information and historical experience.

During the coverage period, if facts and circumstances indicate that a group of insurance contracts is or becomes onerous, the Corporation considers information available including experience loss reports, metrics such as loss ratios, and forecasts to determine whether the group is in an onerous position.

When a group of insurance contracts is assessed as onerous, the Corporation recognizes the net outflow of fulfillment cash flows as a loss in the Statement of Operations and records a loss component within the liability for remaining coverage. The loss component is reported to Net income (loss) attributable to Owner of the Corporation over the remaining coverage period.

If such losses on onerous contracts are recoverable under coverage provided by reinsurance contracts, the Corporation reports a loss recovery in the Statement of Operations within Net income (loss) from reinsurance contracts held. A loss recovery component is established within assets for remaining coverage for reinsurance contracts held, the loss recovery component is reported to Net income (loss) attributable to Owner of the Corporation over the remaining term of the contract.

Discount Rates

Measurement of the liability for incurred claims requires discounting the estimated future cash flows to reflect the time value of money and financial risks associated with the insurance contract liabilities. The Corporation applies discount rates that are consistent with observable market prices and reflect the characteristics of the liabilities and the duration of the portfolio. The rates exclude the effect of factors that influence such observable market prices but do not affect the future cash flows of the insurance contract liabilities (e.g., credit risk).

The Corporation applies a top-down approach to determine appropriate discount rates for measuring insurance contracts it issues and reinsurance contracts it holds. Under this approach, the Corporation determines appropriate discount rates from a yield curve that provides the expected returns of a reference portfolio of assets that closely reflects the duration and liquidity characteristics of the cash flows for the insurance contract liabilities.

The reference portfolio of assets is comprised of a combination of fixed income assets that closely reflect the duration and liquidity characteristics of the cash flows for the portfolio of insurance contract liabilities. Adjustments are applied to eliminate impacts from risks and factors for the financial instruments in the reference portfolio, that are not relevant to the insurance contract liabilities.

In constructing the discount yield curves, a portion of the curve is based on observable market information that is available going out 30 years (the observable period) and beyond that point, the discount rates are estimated (the unobservable period). The portion of the curve in the unobservable period has been determined using a linear interpolation technique between the last observable point and the ultimate rate, which was set at 70 years. The ultimate rate at 70 years was determined using a bottom-up approach according to Canadian accepted actuarial practice.

Judgment is applied in selecting the appropriate discount rates. Judgment and estimates are applied in determining the yield curves, the asset mix within the reference portfolio, and the adjustments to the yield curve for factors such as credit risk and liquidity risk when appropriate. In addition, judgment is applied in developing yield curves beyond the last observable point and in determining the ultimate rate.

Risk Adjustment

The measurement of insurance and reinsurance contracts includes a risk adjustment for non-financial risk. The risk adjustment represents the compensation the issuer requires for bearing the uncertainty about the amount and timing of cash flows that arise from non-financial risk as the issuer fulfils the insurance contracts.

The Corporation applies the Quantile approach in determining the risk adjustment by coverage, for each line of business. The risk adjustment for insurance contracts issued by the Corporation includes an adjustment for the benefits of diversification across the lines of business. Under the Quantile Approach, a range of claims development scenarios are simulated and the future claims payments of each of the scenarios are discounted to the measurement date. The risk adjustment for non-financial risk is determined as the difference between the discounted unpaid claims at the selected percentile and the best estimate of the unpaid claims' liability averaged across the scenarios. The Corporation's target confidence level for the risk adjustment is the 90th percentile.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Measurement of Reinsurance Contracts Held

Reinsurance contracts held are measured in a manner consistent with the associated underlying insurance contracts and in accordance with the terms of each reinsurance contract held. As such, the Corporation applies the PAA in measuring reinsurance contracts held when that method is applied in measuring the underlying groups of insurance contracts.

The basis of measurement and reporting is adapted to reflect the features of reinsurance contracts held that differ from insurance contracts issued. For example, reinsurance contracts generate expenses or a reduction in expenses rather than revenue, and the risk adjustment for reinsurance contracts held represents the amount of risk transferred from the Corporation to the reinsurer.

Measurement of reinsurance contracts held includes a provision for risk that the reinsurer will not fulfill its obligations under the contract. The Corporation selects well-established, highly rated reinsurers to engage with in reinsurance contracts and treaties.

Contract boundaries are identified to determine which future cash flows are included in the measurement of a reinsurance contract held. A substantive obligation to receive services under a reinsurance contract ends when the reinsurer has the practical ability to reassess the risk transferred to it and, as a result, can set a price or level of benefits that fully reflects those risks, or the reinsurer has the substantive right to terminate the coverage.

A group of reinsurance contracts is recognized at the earliest of:

- the beginning of the coverage period; or
- the date an onerous group of underlying insurance contracts is recognized

When a loss on onerous contracts is recognized for a group of insurance contracts in which there are one or more contracts underlying a reinsurance contract held, the Corporation calculates a loss-recovery component and adjusts the amount of the asset for remaining coverage of the group of reinsurance contracts held.

3.23 Presentation on the Financial Statements

The Corporation presents separately in the Statement of Financial Position, the carrying value of portfolios of insurance contracts that are assets, portfolios of insurance contracts that are liabilities, portfolios of reinsurance contracts that are assets and portfolios of reinsurance contracts that are liabilities.

4. Changes in Accounting Policies

4.1 Future Changes in Accounting Policy and Disclosure

Accounting standards and amendments issued by the IASB, that may be applicable to the Corporation but are not effective as at March 31, 2026, are presented below.

4.1.1 IFRS 7 – Financial Instruments: Disclosures (IFRS 7) and IFRS 9 – Financial Instruments (IFRS 9)

In May 2024, the IASB issued amendments to IFRS 7 – Financial Instruments: Disclosures and IFRS 9 - Financial Instruments. The amendments to IFRS 9 include additional guidance and disclosure relating to the settlement of certain financial liabilities through electronic payment systems, as well as providing additional guidance for assessing whether the cash flows of a financial asset are solely payments of principal and interest on the principal amount outstanding. The classification of the Corporation's financial assets will not be affected by these amendments.

The Corporation will adopt the amendments of IFRS 9 as of April 1, 2026, retrospectively. However, restatement of comparative periods is not required, in accordance with transition requirements for amendments to the Standard. Accordingly, the retrospective impact of the application of the amendments to IFRS 9 will be recognized in the Statement of Financial Position as at April 1, 2026, the effective date of the amendments.

The amendments to IFRS 9 seek to clarify the recognition and derecognition date for certain financial assets and liabilities, including the introduction of a new exception for the derecognition of financial liabilities before the settlement date when they are settled in cash through an electronic payment system if and only if a payment order has been issued and certain criteria are met. The Corporation expects to apply this election to all settlements made through electronic payment systems meeting the criteria, effective April 1, 2026.

Coinciding with the amendments to IFRS 9, the IASB modified IFRS 7 to add new disclosures for certain instruments whose contractual terms could change cash flows as well as to improve the disclosures about equity instruments designated as at fair value through other comprehensive income.

The Corporation does not expect these amendments to have a material impact on its financial statements.

4.1.2 IFRS 18 – Presentation and Disclosure in the Financial Statements

In April 2024, the IASB issued IFRS 18 - Presentation and Disclosure in Financial Statements which will replace IAS 1 – Presentation of Financial Statements.

The standard provides a defined structure for the statement of profit or loss, with three main categories for reporting revenue and expenses (operating, investing, and financing) to improve the comparability of the income statement between companies. IFRS 18 introduces specified subtotals in the statements of income, new disclosures for management defined performance measures, and additional requirements for the aggregation and disaggregation of information. IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027. The Corporation is assessing the impact of this new standard on the presentation and disclosure of its financial statements.

(in thousands of Canadian dollars, except as otherwise noted)

5. Cash, Cash Equivalents and Investments

Cash and cash equivalents are comprised of cash, current operating accounts, provincial short-term deposits with maturities of 90 days or less from the date of acquisition, and funds held in trust on behalf of other insurance companies.

Cash equivalent investments have a total principal amount of $114.5 million (March 31, 2025—$121.9 million) comprised of provincial short-term deposits with effective interest rates of 2.14 per cent to 2.22 per cent (March 31, 2025—2.39 per cent to 2.59 per cent), with interest receivable at varying dates.

The Corporation has an unsecured operating line of credit with its principal banker in the amount of $10.0 million (March 31, 2025—$10.0 million). The unsecured operating line of credit remained unutilized at March 31, 2026 (March 31, 2025—nil).

Fair Value Measurement

Financial assets that are measured at fair value are classified by their level within the fair-value hierarchy. The fair-value hierarchy consists of three levels that are defined on the basis of the type of inputs used to measure fair value. The classification cannot be higher than the lowest level of input that is significant to the measurement:

Level 1—Fair value is determined based on unadjusted quoted prices of identical assets in active markets. Inputs include prices from exchanges where equity and debt securities are actively traded.

Level 2—Level 2 valuations utilize inputs other than quoted market prices included in Level 1 that are observable, directly or indirectly, for the asset. These inputs include quoted prices for similar assets in active markets and observable inputs other than quoted prices, such as interest rates and yield curves. The fair values for some Level 2 securities were obtained from a pricing service. Pricing service inputs may include benchmark yields, reported trades, broker/dealer quotes and bid/ask spreads.

Level 3—Fair-value measurements using significant inputs that are not based on observable market data are Level 3. This consists of private equity, and units in pooled fund investments. In these cases, prices may be determined by internal pricing models utilizing all available financial information, including direct comparison and industry sector data. For some investments, valuations are obtained annually. For periods between valuations, management assesses the validity of the valuation for current reporting purposes.

Transfers between fair value hierarchy levels are considered effective from the beginning of the annual reporting period in which the transfer is identified.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Valuation techniques used by the Corporation's independent pricing service providers and third-party broker-dealers include use of prices from similar instruments where observable market prices exist, discounted cash flow analysis, option pricing models, and other valuation techniques commonly used by market participants. The Corporation assesses the reasonableness of pricing received from these third-party sources by comparing the fair values received to recent transaction prices for similar assets where available, to industry accepted discounted cash flow models (that incorporate estimates of the amount and timing of future cash flows and market observable inputs such as credit spreads and discount rates) and to option pricing models (that incorporate market observable inputs including the quoted price, volatility and dividend yield of the underlying security and risk-free rate).

Detailed valuations are prepared for those financial instruments that are priced internally, while external pricing received from independent pricing service providers and third-party broker-dealers are evaluated by the Corporation for reasonableness. The Corporation's Chief Actuary and Chief Financial Officer oversee the valuation function and regularly review the valuation processes and results, including at each quarterly reporting period. Significant valuation matters, particularly those requiring extensive judgment, are communicated to the Corporation's Investment Committee and Audit & Finance Committee.

No investments were transferred between levels in the year ended March 31, 2026 (March 31, 2025—nil).

The following table presents financial instruments measured at fair value in the Statement of Financial Position, classified by level within the fair value hierarchy.

As at March 31, 2026	Level 1	Level 2	Level 3
FVTPL financial assets			
Cash and cash equivalents	220,200	-	-
Bonds	105,790	1,735,515	358,391
Private debt	-	271,728	-
Other investments	-	-	587
Infrastructure	35,394	-	216,411
Equity investments	122,028	327,394	-
Pooled commercial mortgages	-	-	114,063
Pooled real-estate fund	73,423	64,322	252,775
Total assets measured at fair value	556,835	2,398,959	942,227

As at March 31, 2025	Level 1	Level 2	Level 3
FVTPL financial assets			
Cash and cash equivalents	188,691	-	-
Bonds	91,408	1,772,828	368,953
Private debt	-	270,086	-
Other investments	-	-	421
Infrastructure	90,645	-	147,303
Equity investments	3,566	382,866	-
Pooled commercial mortgages	-	-	108,956
Pooled real-estate fund	113,225	31,132	229,254
Total assets measured at fair value	487,535	2,456,912	854,887

Accrued interest in the amounts of $7.0 thousand (March 31, 2025—$8.0 thousand) and $25.2 million (March 31, 2025—$23.5 million) are included above in Cash and cash equivalents and Bonds respectively. These amounts are included in Accounts receivable reported on the Statement of Financial Position.

Unobservable Inputs and Sensitivity for Level 3 Assets

The assets reported as Level 3 consist primarily of MUSH bonds that are designated as FVTPL, and investments in private debt, infrastructure and pooled investments classified as FVTPL.

The fair value of investment in MUSH bonds is marked-to-market (i.e. the present value of all future cash flows is calculated) monthly by the Province of Manitoba based on a yield curve published by the province. These cannot be corroborated with observable market transactions. Due to the unobservable nature of these quotes, the Corporation does not assess whether applying reasonably possible alternative assumptions would have an impact on the fair value of these Level 3 assets.

The fair value of infrastructure and pooled investments is based on net asset values provided by the investment manager, using valuation methods such as discounted cash flow analysis and multiples of relevant metrics (for example, regulated asset base and earnings before interest, taxes, depreciation and amortization) for comparable assets and transactions.

The following tables present the fair-value measurement of instruments included in Level 3.

As at March 31, 2026	Bonds at FVTPL	Other Investments at FVTPL	Infrastructure at FVTPL	Pooled Commercial Mortgages at FVTPL	Pooled Real-Estate Fund at FVTPL	Total at FVTPL

Investment Income and Net Insurance Financial Result

The tables below provide analysis of investment income recognized in the years ended March 31, 2026, and March 31, 2025, and the composition of the net insurance financial result reported in the Statement of Operations.

Net Insurance Financial Result and Investment Result

For the years ended March 31	2026	2025
Investment income from interest, dividends and investment property	**128,838**	125,014
Net gain on investments	**18,758**	172,530
Investment management fees	**(8,538)**	(7,420)
Investment Income	**139,058**	290,124
Insurance finance expense	**(10,171)**	(172,675)
Reinsurance finance income	**1,050**	5,919
Net insurance financial result	**(9,121)**	(166,756)
Net insurance financial result and investment result	**129,937**	123,368

Investment Income

For the years ended March 31	2026	2025
Interest and similar income from securities classified as FVTPL	**18,528**	21,276
Interest and similar income from securities designated as FVTPL	**81,256**	81,078
Interest income	**99,784**	102,354
Dividend income from equities at FVTPL	**27,885**	21,748
Income from investment property	**1,169**	912
Investment income from interest, dividends and investment property	**128,838**	125,014
Net unrealized gain from financial instruments classified as FVTPL	**19,158**	56,596
Net unrealized (loss) gain from financial instruments designated as FVTPL	**(58,478)**	85,480
Net unrealized (loss) gain on investments	**(39,320)**	142,076
Net realized gain from financial instruments classified as FVTPL	**54,648**	29,356
Net realized gain from financial instruments designated as FVTPL	**3,430**	1,098
Net realized gain on investments	**58,078**	30,454
Net gain on investments	**18,758**	172,530
Investment management fees	**(8,538)**	(7,420)
Investment income	**139,058**	290,124

Investment income is net of investment management fees paid to the Department of Finance in the amount of $8.5 million (March 31, 2025—$7.4 million). This includes $6.2 million (March 31, 2025—$6.0 million) of fees the Province paid to outside managers on the Corporation's behalf.

Net Insurance Financial Result

Net insurance financial result is comprised of insurance finance income (expense) from insurance contracts issued and reinsurance contract held and are provided in the table below.

Changes in the carrying value of insurance contracts that arise from the unwinding of discounting and changes in financial assumptions (including discount rates) applied in measuring insurance contracts, are reported as insurance finance income (expense). Changes in the carrying value of reinsurance contracts that arise from the unwinding of discounting and changes in financial assumptions (including discount rates) applied to measuring reinsurance contracts, are reported as reinsurance finance income (expense).

For the years ended March 31	**2026**	2025
Change in carrying amount of insurance contracts issued due to:		
Unwinding of discounting	**(101,267)**	(111,801)
Changes in discount rate and other financial assumptions	**91,096**	(60,874)
Insurance finance expense from insurance contracts issued	**(10,171)**	(172,675)
Change in carrying amount of reinsurance contracts held due to:		
Unwinding of discounting	**1,410**	4,661
Changes in discount rate and other financial assumptions	**(360)**	1,258
Reinsurance finance income	**1,050**	5,919
Net insurance financial result	**(9,121)**	(166,756)

6. Investment Property

Investment property is reported in accordance with IAS 40.

	Surface Parking Lot	**Parkade**	**Total**

Balance at April 1, 2026	**232,623**
Carrying Amounts	
At March 31, 2025	54,262
At March 31, 2026	**39,351**

Deferred development costs represent costs accumulated in the ongoing development of technology assets. Deferred development costs of $6.5 million (March 31, 2025—$13.7 million) are not yet available for use and are currently not being amortized.

Annually, the Corporation assesses information available for evidence that intangible assets such as deferred development costs may be impaired. Performing the assessment and developing an estimate of recoverable amounts requires the Corporation to make estimates and assumptions. The main estimates and assumptions used in calculating the recoverable amount are future cash flow estimates based on internal financial forecasts, expected future earnings, and the discount rate to apply to the future cash flows. Actual values and results could be significantly different than estimates developed by the Corporation.

Write Down for Impairment in Assets Reported as Deferred Development Costs

The Corporation performed the assessment for indications of impairment in intangible assets reported by the Corporation as at the third quarter reporting date December 31, 2025. The assessment identified technological assets that had been foundational to future and ongoing developments under Project Nova, that were assessed as not meeting the criteria to be recognized as assets in light of the formal closure of Project Nova in June 2025.

The write down relates to assets associated with the February 2023 implementation of Release 1 (R1) as well as additional assets capitalized but not implemented related to Release 3 (R3). The results of the assessment lead to the Corporation recognizing $15.1 million in write downs for assets that had been previously reported under Project Nova that were identified in the current year as offering reduced value or no future economic value.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

The impacts from the recognition of $15.1 million in write downs due to impairment in Deferred development costs, are reported in the Corporation's Statement of Operations for the year ended March 31, 2026, as Acquisition expense and Operating expense of $1.1 million and $14.0 million respectively. The Corporation reported $62.1 million in impairments and write-offs to Deferred development costs in the prior fiscal year ended March 31, 2025, reported as Maintenance expense, Acquisition expense, and Operating expense of $6.2 million; $11.6 million; and $44.3 million respectively.

The Deferred development costs after write downs for impairment are expected to provide the Corporation with future value that exceed or equal the carrying values reported, based on planned future use of the assets and financial budgets and forecasts.

9. Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities are comprised of the following:

	2026	2025
Commission	**401**	366
Due to the Province of Manitoba	**22,219**	22,856
IT Services	**463**	1,608
IT Projects	**3,281**	1,555
Other payables and accrued liabilities	**13,697**	20,277
Payroll	**6,816**	5,335
Taxes	**942**	800
Balance at March 31	**47,819**	**52,797**

10. Lease Obligation

The Corporation has elected not to recognize lease liabilities for short-term or low value leases. Lease payments associated with such leases are expensed on a straight-line basis over the lease term. During the year ended March 31, 2026, $328.8 thousand was recognized as an expense for short-term and low value leases (March 31, 2025—$402.0 thousand).

None of the Corporation's leases are subleased and no contingent rent is payable for any lease arrangements.

The Service Centre built on land in Winnipeg at 1284 Main Street and the land on which it is built are owned by a third-party and are leased to the Corporation. The provisions of the lease include an initial term of 25 years and, at the Corporation's option, three further terms of five years each. The Corporation also recognizes the right-of-use asset for a building in Brandon, for which the Corporation has a lease agreement.

The details of the lease obligations are as follows:

Balance at April 1, 2024	6,921
Lease payments	(506)
Interest	450
Balance at March 31, 2025	6,865
Lease payments	**(530)**
Interest	**446**
Balance at March 31, 2026	**6,781**

Main Street—Building Lease

	March 31, 2026	March 31, 2025
Interest rate	**6.70%**	6.70%
Interest expense for the year	**357**	360
Lease obligations at year end	**5,299**	5,355

The minimum lease payments are as follows:

	Minimum Lease Payments		**Present Value of Minimum Lease Payments**	
	March 31, 2026	March 31, 2025	**March 31, 2026**	March 31, 2025
Not later than one year	**413**	414	**399**	399
Later than one year and not later than five years	**1,674**	1,654	**1,368**	1,354
Later than five years	**8,895**	9,328	**3,532**	3,602
Total	**10,982**	11,396	**5,299**	5,355

Main Street—Land Lease

	March 31, 2026	March 31, 2025
Interest rate	**5.95%**	5.95%
Interest expense for the year	**88**	89
Lease obligations at year end	**1,473**	1,492

The minimum lease payments are as follows:

	Minimum Lease Payments		**Present Value of Minimum Lease Payments**	
	March 31, 2026	March 31, 2025	**March 31, 2026**	March 31, 2025
Not later than one year	**107**	107	**104**	104
Later than one year and not later than five years	**433**	428	**362**	358
Later than five years	**2,302**	2,414	**1,007**	1,030
Total	**2,842**	2,949	**1,473**	1,492

Brandon—Royal Canadian Legion Branch #3

	March 31, 2026	March 31, 2025
Interest rate	**5.20%**	5.20%
Interest expense for the year	**1**	1
Lease obligations at year end	**9**	18

The minimum lease payments are as follows:

	Minimum Lease Payments		**Present Value of Minimum Lease Payments**	
(in thousands of Canadian dollars)	**March 31, 2026**	March 31, 2025	**March 31, 2026**	March 31, 2025
Not later than one year	**10**	10	**9**	9
Later than one year and not later than five years	**-**	10	**-**	9
Total	**10**	20	**9**	18

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

11. Operating Leases

As A Lessor:

The Corporation owns the Cityplace property located in downtown Winnipeg including the Cityplace building, one adjacent parking lot and one adjacent parkade. The Cityplace building includes five floors of office space, three floors of parking and two floors of retail space. The Corporation leases out portions of the Cityplace building.

None of the leases in which the Corporation acts as a lessor are sub-leased.

Future minimum lease payments under non-cancellable leases to be received are:

	March 31, 2026	March 31, 2025
Not later than one year	**7,237**	6,358
Later than one year and not later than five years	**25,959**	27,141
Later than five years	**20,671**	26,468
Total	**53,867**	59,967

During the year ended March 31, 2026, other revenue includes gross rental income from operating leases of $15.8 million (March 31, 2025—$14.0 million) and gross rental expenses pertaining to operating leases of $13.1 million (March 31, 2025—$13.4 million). Income contingent on retail sales included in rental income at March 31, 2026 was $192.7 thousand (March 31, 2025—$183.3 thousand).

12. Provision for Employee Current Benefits

The provision for employee current benefits includes accrued vacation and sick leave liabilities. The determination of expenses and liabilities associated with the sick leave plan requires the use of key assumptions such as discount rates and expected sick leave.

	2026	2025
Balance at beginning of year	**31,149**	29,660
Provisions incurred	**23,459**	21,966
Payments	**(21,267)**	(20,477)
Balance at March 31	**33,341**	31,149

13. Provision for Employee Future Benefits

The Corporation has a defined benefit pension plan, severance benefit plan and post-retirement extended health benefit plan available to eligible employees. The defined benefit pension plan is based on years of service and final average salary whereas the severance benefit plan is based on years of service and final salary.

The Corporation uses an actuarial valuation, on an annual basis, to measure the accrued provision for its benefit plans. The most recent full actuarial valuation was conducted by an external actuary as at December 31, 2025, with the next scheduled actuarial valuation being December 31, 2026. Additionally, the Corporation had the external actuary extrapolate the benefit plans at the Corporation fiscal year end of March 31, 2026.

The actuarial valuation of the Corporation's benefit obligations is exposed to actuarial risks such as mortality risk which represents life expectancy and impacts the calculation of the obligations; interest rate risk which impacts the discount rate used to calculate the obligations; and inflation rate risk which impacts the calculation of the obligations.

The actuarial valuation is based on the Corporation's best estimate of various economic assumptions. On a yearly basis the Civil Service Superannuation Board provides an approval of the cost-of-living adjustment which is factored into the pension valuation. With respect to the demographic assumptions, the Corporation relies on and uses the assumptions adopted by the Civil Service Superannuation Board. The weighted average duration of the defined benefit obligation is 12.9 years (March 31, 2025—13.5 years). Results from the most recent actuarial valuations, projected to March 31, 2026, and the corresponding economic assumptions are as follows:

Assumptions:

	Pension Benefit Plan		Other Benefit Plans	
	March 31, 2026	March 31, 2025	**March 31, 2026**	March 31, 2025
Discount rate - December Actuarial Valuation	**4.96%**	4.71%	**4.96%**	4.71%
Discount rate - March Actuarial Valuation	**5.11%**	4.68%	**5.11%**	4.68%
Discount rate on benefit costs	**5.11%**	4.68%	**5.11%**	4.68%
Inflation rate	**2.33%**	1.80%	**N/A**	N/A
Expected salary increase	**2.00%**	3.60%	**N/A**	N/A
Expected health care cost increase (out of scope)	**N/A**	N/A	**4.30%**	4.20%
Expected health care cost increase (in scope)	**N/A**	N/A	**2.33%**	1.80%

Change in benefit obligations:

	Pension Benefit Plan		Other Benefit Plans	
	March 31, 2026	March 31, 2025	**March 31, 2026**	March 31, 2025
Balance at beginning of period	**435,361**	403,542	**50,700**	48,027
Current service cost	**15,805**	14,451	**5,008**	5,643
Interest cost	**20,287**	19,664	**1,147**	1,128
Benefits paid	**(19,566)**	(18,917)	**(2,875)**	(4,452)
Remeasurement gains recognized in other comprehensive income	**(25,023)**	16,621	**(989)**	354
Balance at March 31	**426,864**	435,361	**52,991**	50,700
Employee contribution for the period	**14,590**	13,278	**-**	-

Funding

The Employee Future Benefits (EFB) investment portfolio is a separate investment portfolio established to support the liabilities for Pension, Employee Post Retirement Benefits and Severance. The EFB portfolio has a unique asset allocation strategy in order to meet its objective of ensuring pension and other future employee benefit obligations are paid as they become due. When the portfolio requires funding to match an increase in the employee future benefit liabilities, it is funded by all lines of business.

The carrying value of the assets in the EFB investment portfolio as at March 31, 2026, and March 31, 2025, which are included in Investments in the Statement of Financial Position, are as follows:

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Employee Future Benefits Investment Portfolio

	March 31, 2026		March 31, 2025	
	Carrying Value	**Percentage of Portfolio**	Carrying Value	Percentage of Portfolio
Cash & cash equivalents	**902**	**0.1%**	1,314	0.2%
Bonds	**82,908**	**11.9%**	82,377	12.9%
Private debt	**108,659**	**15.6%**	110,586	17.3%
Infrastructure	**158,760**	**22.8%**	152,602	23.9%
Equity investments	**280,400**	**40.3%**	235,967	36.9%
Pooled real-estate funds	**64,881**	**9.3%**	56,288	8.8%
Total	**696,510**	**100.0%**	639,134	100.0%

The Corporation contributes the employer's share of the cost of employee future benefits to the Civil Service Superannuation Fund (CSSF) on a pay-as-you-go method of funding. The interest cost associated with the various benefit plans is based on market interest rates at the most recent valuation date.

Benefit Plan Expenses

	Pension Benefit Plan		Other Benefit Plans	
	March 31, 2026	March 31, 2025	**March 31, 2026**	March 31, 2025
Current service cost	**15,805**	14,451	**5,010**	5,643
Interest cost	**20,287**	19,664	**1,147**	1,128
Total	**36,092**	34,115	**6,157**	6,771

Sensitivity Analysis

Based on the March 31, 2026, actuarial valuation, changes to the actuarial assumptions would change the benefit obligation as follows:

Pension Benefit Plan

Gain due to discount rate increasing from 5.11% to 5.61% (plus .50%)	**(27,515)**
Loss due to discount rate decreasing from 5.11% to 4.61% (minus .50%)	**30,794**
Loss due to mortality life expectancy at age 65 up one year	**11,009**
Loss due to inflation indexing (2/3rd COLA) increasing .25%	**11,745**
Gain due to inflation indexing (2/3rd COLA) decreasing from .25%	**(11,237)**

Other Benefit Plans

Gain due to discount rate increasing from 5.11% to 5.61% (plus .50%)	**(289)**
Loss due to discount rate decreasing from 5.11% to 4.61% (minus .50%)	**322**
Loss due to mortality life expectancy at age 65 up one year	**131**
Loss due to health care cost inflation indexing increasing .25%	**156**
Gain due to health care cost inflation indexing decreasing .25%	**(148)**

Out-of-Scope Retirement Benefits

Gain due to discount rate increasing from 5.11% to 5.61% (plus .50%)	**(1,555)**
Loss due to discount rate decreasing from 5.11% to 4.61% (minus .50%)	**1,761**
Loss due to mortality life expectancy at age 65 up one year	**746**
Loss due to health care cost inflation indexing increasing .25%	**835**
Gain due to health care cost inflation indexing decreasing .25%	**(789)**

The sensitivity to the significant assumptions has been determined, assuming all other assumptions remain unchanged. If multiple assumptions were to change at the same time, there may be correlations between the assumptions that could result in different impacts than simply adding the individual sensitivities above.

Expected maturity analysis of undiscounted pension benefit and other benefit plans:

	Less than a year	Between 1 & 2 years	Between 2 & 5 years	Over 5 years	Total
Pension benefit plan	**21,121**	**21,569**	**68,036**	**927,181**	**1,037,907**
Other benefit plans	**815**	**868**	**2,969**	**63,797**	**68,449**
At March 31, 2026	**21,936**	**22,437**	**71,005**	**990,978**	**1,106,356**

	Less than a year	Between 1 & 2 years	Between 2 & 5 years	Over 5 years	Total
Pension benefit plan	20,098	20,447	64,075	901,136	1,005,756
Other benefit plans	751	804	2,746	58,784	63,085
At March 31, 2025	20,849	21,251	66,821	959,920	1,068,841

14. Insurance Contract Liabilities and Reinsurance Contract Assets

The net carrying amounts of insurance and reinsurance contracts is summarized as follows:

For the years ended March 31	2026	2025
Liability for remaining coverage	**424,857**	379,647
Liability for incurred claims	**2,450,979**	2,526,250
Insurance contract liabilities	**2,875,836**	2,905,897
Asset for remaining coverage	**2,160**	1,740
Asset for reinsured claims	**54,934**	72,303
Reinsurance contract assets	**57,094**	74,043
Net insurance and reinsurance contracts	**2,818,742**	2,831,854

Insurance Contract Liabilities

Insurance contracts analysis by remaining coverage and incurred claims

The following tables present the change in the net liability reported for insurance contracts, showing the movement in the liability for remaining coverage and the liability for incurred claims over the period. The insurance contracts are measured under PAA, and the Corporation applies the accounting policy choice to expense acquisition cash flows as they arise.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

For the year ended March 31, 2026	Liability for Remaining Coverage	Liability for Incurred Claims		Total
		Present Value of Future Cash Flows	Risk Adjustment

Insurance contract liabilities, end of year	379,647	2,406,519	119,731	2,905,897

Material Estimates, Assumptions and Judgments

Estimate of future cash flows

The liability for incurred claims includes the estimate of loss for reported claims, a provision for claims incurred but not reported, and other insurance service expenses that are expected to be incurred to settle those claims. The ultimate cost of settling claims liabilities is estimated by applying a range of generally accepted standard actuarial techniques.

These techniques assume that the Corporation's own claims experience is indicative of future claims development patterns and therefore ultimate claims cost. The ultimate cost of settling claims is estimated separately for each line of business.

The main assumption underlying these methods is that the Corporation's past claims development can be used to project future claims development patterns and ultimate claims cost. Additional qualitative judgments are made to assess the extent to which past trends may not be applicable to the future, which future trends are expected to emerge and then incorporate the necessary adjustments to adequately determine the liability for incurred claims that represents the probability-weighted mean of the possible outcomes for future claim payments. The assumptions used to develop this estimate are selected by lines of business and type of coverage.

The significant assumptions applied in estimating the liability for incurred claims include: the Corporation's experience with similar cases, historical claim payment trends and claim development patterns, characteristics of each line of business, claim severity and frequency, effect of inflation on future claim settlement costs, relevance of recent court decisions, and economic conditions. Timely settlement is also a factor in determining the provision because delays in settling and paying a claim can increase the risk of variation in settlement amounts. Accordingly, short-tail claims such as physical damage or collision claims tend to be more reasonably predictable than long-tail claims such as liability claims.

There is uncertainty inherent in the estimation process. The actual value of ultimate claims can only be ascertained once all claims are closed. The unpaid claim liabilities for Personal Injury Protection Plan (PIPP) benefits represent the majority of the Corporation's claim liabilities. PIPP claim liabilities are also the most uncertain because of the long-term nature of these benefits.

As a result, the establishment of the liability for incurred claims relies on a number of factors, which necessarily involves risk that actual results may differ materially from the estimates.

The estimates of future cash flows are adjusted to reflect the time value of money and financial risks.

Discount Rates

The Corporation measures time value of money using discount rates that are consistent with observable market prices and reflect the liquidity characteristics of the insurance contracts. The discount rates exclude the effect of factors that influence such observable market prices but do not affect the future cash flows of the insurance contracts (e.g., credit risk).

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

The top-down approach is followed to determine appropriate discount rates applied in measuring the Corporation's portfolios of insurance contract liabilities. Under this approach, discount rates are estimated by starting from the yield curve implied in a reference portfolio of assets that closely reflects the duration and liquidity characteristics of the insurance cash flows. The yield from the reference portfolio is then adjusted to exclude the effects of risks, such as credit risk, that are inherent in the cash flows of the financial instruments within the reference portfolio but are not applicable to the cash flows of the insurance contracts.

In applying the top-down approach, the Corporation selected a reference portfolio that is based on the composition of the marketable bond portfolio in the asset portfolio for the Basic line of business. The Corporation considers this portfolio as suitably matched with the duration and liquidity characteristics of the insurance claims it carries. The reference portfolio is used as a basis to develop a yield curve that is then adjusted for market risk and credit risk (including default risk and downgrade risk), and both expected and unexpected credit, to arrive at the Corporation's yield curve for discounting its insurance contract liabilities. The observable period implied from the reference portfolio and the corresponding credit risk adjustments is 30 years. The Corporation has reserving lines extending beyond 30 years and extrapolates yields to determine discount rates for claims reaching beyond 30 years, called the unobservable period. For this period, the Corporation applies a straight-line interpolation from the last observable period (30 years) to the ultimate rate at the 70-year term of 5.22 per cent (March 31, 2025—5.22 per cent), consistent with the Canadian Institute of Actuaries (CIA) reference curve. The interest rate remains constant beyond the defined ultimate point. The Corporation applies judgement in selecting a reference portfolio; and applies judgement and the use of estimates in determining a yield curve and adjustments to that yield curve.

The discount rates applied in discounting future cash flows in the measurement of insurance contracts are listed below:

March 31, 2026	**1 year**	**3 years**	**5 years**	**10 years**	**20 years**	**30 years**
Discount rates	**2.92%**	**3.32%**	**3.58%**	**4.27%**	**4.89%**	**4.84%**

March 31, 2025	1 year	3 years	5 years	10 years	20 years	30 years
Discount rates	2.82%	2.94%	3.21%	3.97%	4.41%	4.27%

Risk Adjustment

The measurement of insurance and reinsurance contracts includes a risk adjustment for non-financial risk. The risk adjustment represents the compensation the Corporation requires for bearing the uncertainty about the amount and timing of cash flows that arise from non-financial risks as the Corporation fulfils insurance contracts.

The risk adjustment for non-financial risk is determined at the corporate level, including benefits from risk diversification across lines of business. The risk adjustment is then allocated and applied in measuring the liability for incurred claims for insurance contracts, by coverage and line of business.

The diversified risk adjustment is allocated to coverage level for bottom-up reporting and disclosure purposes based on the relative proportion of each segment's undiversified risk adjustment.

The risk adjustment is determined using a quantile technique. The Corporation's target confidence level for this risk is the 90th percentile. At March 31, 2026, the confidence level for the Corporation's risk adjustment is at the 90th percentile for insurance risk and reinsurance risk (March 31, 2025—90th percentile for insurance risk and reinsurance risk).

Assessment for groups of onerous contracts

For each portfolio, the facts and circumstances indicating that a group of insurance contracts is or becomes onerous are based on review of loss ratios. Loss experience monitoring may also be used to identify situations and variances to be investigated.

Sensitivity analysis

It is not possible to quantify the sensitivity to certain assumptions such as legislative changes or uncertainty in the estimation process. The analysis is performed for possible movements in the assumptions with all other assumptions held constant, showing the impact on Net income (loss) attributable to Owner of the Corporation. Movements in these assumptions may be non-linear and may be correlated with one another.

A five per cent increase in the best estimate of future cash flows for net PIPP claim liabilities is equal to approximately $78.1 million (March 31, 2025—$82.3 million). Such a change could occur if the actual future development of lifetime PIPP claimants was higher than expected.

A 100 basis point (bps) decrease to the yield curve used to discount the best estimate of future cash flows claims liabilities would increase the balance by approximately $205.1 million (March 31, 2025—$175.1 million), while a 100 bps increase to the yield curve used to discount the best estimate of future cash flows claims liabilities would decrease the balance by approximately $168.4 million (March 31, 2025—$148.6 million). However, this impact would be largely offset by gains/losses on the Corporation's fixed income portfolio as described in the Interest Rate Risk section of Note 25.

Prior-Year Claims Development

The following claims development table demonstrates the extent to which the original claim cost estimates in any one accident year has subsequently developed favorably (lower than originally estimated) or unfavorably. This table illustrates the variability and inherent uncertainty in estimating the claims estimate on a yearly basis. The ultimate claims cost for any accident year is not known until all claim payments have been made. For physical damage insurance, payout of claims liabilities generally occurs shortly after the occurrence of the loss. For casualty (long-tailed) coverages, the loss may not be paid, or even reported, until well after the loss occurred. The estimated ultimate claims payments at the end of each subsequent accident year demonstrate the extent to which the original estimate has been revised over time.

The following tables show the development of the estimated gross and net liability for incurred claims for the 10 most recent accident years as estimated at each reporting date. The Corporation adopted IFRS 17 on April 1, 2023, however actuarial valuations were previously performed under IFRS 4. As such, in the claims development tables below, for years 2022 and prior, net ultimate losses are valued using IFRS 4 while 2023 onwards, net ultimate losses are valued under IFRS 17.

Development of Ultimate Claims

The following tables show the development of the estimated gross and net liability for incurred claims for the 10 most recent accident years as estimated at each reporting date.

Current Ultimate Loss Estimates

Gross	Accident Year										
	2017	2018	2019	2020*	2021	2022	2023	2024	2025	2026	Total
Estimate of ultimate claims costs for the most recent 10 years:											
At end of accident year	849,115	850,714	903,009	929,436	729,074	922,297	1,022,324	1,302,904	1,281,470	1,336,964	
One year later	868,568	862,666	912,378	855,664	741,785	950,592	1,094,795	1,283,399	1,293,984		
Two years later	883,231	871,953	903,754	842,449	742,642	956,881	1,089,923	1,324,100

** The Corporation changed its year end from February 28/29 to March 31, effective March 31, 2020. Current loss estimates (gross and net) are based on the 12-month (April to March) accident year and are shaded. Due to the year-end transition, the March 31, 2020, accident year estimates are for a 13-month period of March 1, 2019, to March 31, 2020. All other accident years are for the 12-month period of March 1 to February 28/29.*

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Reinsurance Contract Assets

The Corporation purchases reinsurance to limit its exposure to low frequency and high severity events which may result in significant losses to the Corporation.

As at March 31, 2026, the Corporation's casualty reinsurance treaty limits its net exposure on any one occurrence to $20.0 million for all claims (March 31, 2025—$10.0 million for PIPP claims; $5.0 million for SRE claims), with an upper limit of $50.0 million (March 31, 2025—$50.0 million).

In addition, the Corporation's catastrophe reinsurance treaty provides aggregate protection for a fiscal year accumulation of catastrophe events, with losses from each event first reduced by a $2.0 million per event deductible (March 31, 2025—$2.0 million), and aggregate coverage attaching once cumulative net losses exceed $50.0 million (March 31, 2025—$50.0 million). Under this arrangement, the Corporation's retained maximum is $50.0 million (March 31, 2025—$50.0 million), with reinsurance protection available up to $400.0 million (March 31, 2025—$400.0 million).

Certain lines of insurance are subject to lower coverage limits. In addition, due to a limited number of reinstatements, losses could exceed the stated maximums. While reinsurance is used to mitigate the impact of large losses, the Corporation remains liable to its policyholders.

The Corporation applies the PAA to measure reinsurance contracts it holds. The following tables present the change in the net asset reported for reinsurance contracts, reporting the movement in the assets for remaining coverage and the assets for incurred claims over the period.

	Assets for Remaining Coverage	Assets for Incurred Claims		Total
For the year ended March 31, 2026		Present Value of Future Cash Flows	Risk Adjustment

Reinsurance contract assets, end of year	1,740	68,041	4,262	74,043

15. Capital Management

The Corporation's objectives for managing capital are to ensure the Corporation is capitalized in a manner which provides a strong financial position, to protect its ability to meet policyholder obligations, and to maintain stable rates.

The capital structure of the Corporation is comprised of retained earnings and AOCI. Retained earnings are comprised of the accumulation of Net income (loss) attributable to Owner of the Corporation for the Basic and non-Basic lines of business. Non-Basic lines of business consist of Extension and SRE lines of business and *The Drivers and Vehicles Act* operations.

The capital backing Basic is comprised of the total equity position of the line of business, referred to as the Rate Stabilization Reserve (RSR). The purpose of the RSR is to protect motorists from rate increases made necessary by unexpected events and losses arising from non-recurring events or factors.

The Corporation's expectations of fulfilment cashflows (FCF) are based on providing sufficient working capital for operations. The cash flow forecasts consider the probability of the Corporation experiencing a period of sustained surplus beyond working capital requirements. When such surplus may benefit insured members, a liability for FCF attributable to current or future insured policyholders will be recognized and measured within insurance contract liabilities.

The Corporation follows the capital management framework of the Office of the Superintendent of Financial Institutions Canada which includes a Minimum Capital Test (MCT). MCT is a standardized measure of capital adequacy for an insurance company and represents the ratio of available capital to required capital as derived from a risk-based formula.

The Corporation has established minimum capital adequacy targets for each of its insurance lines of business that reflects the underlying risk and the competitive nature unique to that line of business. Higher risk equates to a higher minimum capital requirement. More specifically,

- The Basic Insurance line of business has an established minimum MCT target of 100 per cent. MCT as at March 31, 2026, was 108 per cent (March 31, 2025—107 per cent). The target MCT is set out in The Manitoba Public Insurance Corporation Act.
- The Extension Insurance line of business has an established minimum MCT target of 200 per cent. MCT as at March 31, 2026, was 200 per cent (March 31, 2025—200 per cent). The target MCT is set out in The Manitoba Public Insurance Corporation Act.
- The SRE Insurance line of business has an established minimum MCT target of 300 per cent. MCT as at March 31, 2026, was 247 per cent (March 31, 2025—226 per cent). The target MCT is set out in The Manitoba Public Insurance Corporation Act.

Annually, the Corporation's external actuary provides a Financial Condition Test report for the Basic line of business to assess capital adequacy under adverse financial conditions.

16. Accumulated Other Comprehensive Income (Loss)

Changes in AOCI by type of asset are presented below.

	Employee Future Benefits	Total AOCI
Balance as at April 1, 2024	21,343	21,343
Items that will not be reclassified to income		
Remeasurement of employee future benefits	(16,975)	(16,975)
Balance as at March 31, 2025	4,368	4,368
Items that will not be reclassified to income		-
Remeasurement of employee future benefits	**26,012**	**26,012**
Balance as at March 31, 2026	**30,380**	**30,380**

17. Insurance Revenue

For the years ended March 31	**2026**	2025
Revenue from premiums	**1,702,598**	1,608,200
Other insurance revenue		
Transaction fees	**1,033**	1,086
Time payment fees	**2,894**	2,816
Time payment interest	**30,129**	31,328
Late payment fees	**1,279**	816
Dishonoured payment fees	**584**	504
	1,738,517	1,644,750

18. Service Fees and Other Revenue

For the years ended March 31	2026	2025
Transaction fees	**9,025**	8,833
Time payment fees	**352**	364
Time payment interest	**9,700**	9,877
Late payment fees	**427**	276
Dishonoured payment fees	**734**	672
Identity card/enhanced identity card fees	**564**	565
Rental income	**1,809**	101
Proceeds from insurance claim	**-**	4,319
Other miscellaneous revenue	**4,736**	4,493
	27,347	29,500

19. *The Drivers and Vehicles Act* Operations Recovery

Under *The Drivers and Vehicles Act* (DVA), the Corporation is responsible for DVA operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data-processing services.

The Province of Manitoba provides funding to the Corporation to defray the costs of DVA operations. The annual payment, beginning April 1, 2017, was $30.2 million per year. Beginning April 1, 2023, the Province increased the payment to $40.2 million per year. The revised funding level has been sustained in subsequent years and remains subject to future determination by the Province. For the fiscal year ended March 31, 2026, funding provided was $40.2 million (March 31, 2025—$40.2 million).

The Corporation, on behalf of the Province of Manitoba, collects and transfers motor vehicle registration fees and driver licensing fees to the Province of Manitoba.

Fees collected on behalf of and transferred to the Province of Manitoba include:

For the years ended March 31	2026	2025
Vehicle registration fees	**182,697**	181,190
Driver licensing fees	**29,618**	30,213
Total	**212,315**	211,403

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

20. Operating Expenses by Nature

Overall operating expenses are comprised of corporate operating expenses, which are allocated to the categories, Maintenance, Acquisition, and Operating on the Statement of Operations as well as Commissions related to both policy and non-policy transactions and Premium taxes. The nature of these expenses are as follows:

For the years ending March 31	**2026**	2025
Commissions-policy	115,084	107,107
Commissions-non-policy	6,606	6,541
Premium taxes	53,356	48,823
Compensation	228,999	220,396
Data processing	131,905	139,147
Special services	13,231	19,746
Buildings	8,768	8,453
Safety/loss prevention programs	3,095	3,409
Telephones	2,007	1,734
Public information/advertising	2,760	2,522
Printing, stationery, supplies	4,819	4,770
Postage	6,119	5,530
Regulatory/appeal	4,612	4,678
Travel and vehicle	1,106	1,188
Driver education program	5,611	5,451
Grants in lieu of taxes	1,903	1,787
Furniture & equipment	1,983	3,444
Merchant fees & bank charges	12,226	11,255
Other	6,197	7,216
Amortization of deferred development costs	6,372	9,935
Depreciation of operating property and equipment	6,956	6,574
	623,715	619,706

For the years ending March 31	**2026**	2025
Maintenance expense	178,145	188,788
Acquisition expense:		
Commission	115,084	107,107
Premium taxes	53,356	48,823
Other	13,615	26,365
Commission expense - non-policy	6,606	6,541
Operating expenses	256,909	242,082
	623,715	619,706

During the year ended March 31, 2026, the Corporation recognized $15.1 million in write offs in assets reported as Deferred development costs (March 31, 2025—$62.1 million in write downs and write offs). The total impacts of these write offs is recorded in Data processing expense, and reported as Acquisition expense and Operating expense, $1.1 million and $14.0 million respectively, in the Statement of Operations for the year ended March 31, 2026.

The Corporation recognized a provision for onerous contracts in the Statement of Financial Position as at March 31, 2026. The impact of the recognition of the provision is reported as Data processing expense of $37.3 million within Operating expense in the Statement of Operations for the year end March 31, 2026 (March 31, 2025 – nil).

22. Discontinued General Insurance Operations

The Corporation discontinued writing reinsurance assumed business effective November 18, 1987, and personal and commercial insurance policies effective October 1, 1990.

As of February 28, 2001, the Corporation accepted a third-party offer to purchase the reinsurance assumed business from the Corporation. Under the terms of the agreement, the Corporation transferred and assigned to the third party the title, interest and all of the obligations resulting from the un-commuted reinsurance assumed treaties written by the Corporation for the period July 1, 1975, to November 18, 1987, including retrocessional treaties. The obligations include all known or unknown liabilities. The primary liability to the treaty holders remains with the Corporation in the event of the third party's insolvency.

Claims costs and expenses on personal and commercial policies will be incurred until all claims on existing policies are settled.

Discontinued operations resulted in a net loss of $290.9 thousand (March 31, 2025—$371.6 thousand net loss) which is reported as part of the SRE line of business (Note 21). Included in the insurance contract liabilities is $2.2 million (March 31, 2025—$2.3 million) relating to discontinued operations.

23. Commitments

As of March 31, 2026, the Corporation has material commitments related to Administrative Service Contracts, Operations Service Agreements, and Information Technology Systems Contracts as follows:

	2026/27	2027/28	2028/29	2029/30	2030/31	Thereafter
Administrative service contracts	8,515	567	352	316	53	-
Operations service agreements	94,589	92,000	21,785	5,623	2,888	1,937
Information technology systems contracts	36,712	21,734	15,109	11,090	6,943	14,220
	139,816	114,301	37,246	17,029	9,884	16,157

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

24. Related-Party Transactions

Key Management Personnel

Key management personnel are comprised of all members of the Board of Directors and the named Executive management team. The summary of compensation of key management personnel for the years are as follows:

For the years ended March 31	**2026**	2025
Short term benefits	**2,819**	2,605
Post-employment benefits	**180**	392
Other long-term benefits	**42**	39
Termination benefits	**-**	421
Total	**3,041**	3,457

Key management personnel and their close relatives may have insurance policies and driver's licences with the Corporation as required by *The Manitoba Public Insurance Corporation Act* and *The Drivers and Vehicles Act*. The terms and conditions of such transactions are the same as those available to clients and employees of the Corporation.

Province of Manitoba

Investment management fees paid to the Department of Finance are disclosed in Note 5.

Accounts payable and accrued liabilities include $22.2 million (March 31, 2025—$22.3 million) due to the Province of Manitoba. Additionally, Insurance contract liabilities include premium taxes due to the Province of Manitoba of $14.6 million (March 31, 2025—$13.6 million).

25. Insurance and Financial Risk Management

As a provider of vehicle insurance products, effective risk management is fundamental in protecting earnings, cash flow and ultimately the financial stability of the Corporation. The Corporation is exposed to various types of insurance and financial risks.

Insurance Risk

The principal risk that the Corporation faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance contract liabilities. This could occur when the frequency or severity of claims and benefits are greater than estimated. Insurance events have an element of randomness and the actual number and amount of claims and benefits will vary each year from the level established using statistical techniques.

Frequency and Severity of Claims

Frequency is the average number of claims per policy, calculated by dividing the total number of claims by the total number of policies. Severity is the average cost of a claim calculated by dividing the total costs of claims by the total number of claims. There are a number of factors that influence the frequency and severity of claims.

Some factors are affected by the actions of the Corporation and a number of strategies are used to try to reduce cost pressures created by those factors, including claims operational changes, road safety programs, programs to influence driver behaviour such as impaired driving and distracted driving prevention, public awareness campaigns, auto crime reduction initiatives and fraud detection and investigation.

There are other factors that the Corporation has little or no control over, including weather, demographics, pandemic events and economic changes, including vehicle parts/repair inflation and medical expense inflation that influences the cost of claims.

Sources of Uncertainty in the Estimation of the Policy Liabilities

To manage the uncertainty associated with estimating the policy liabilities, the Corporation's Chief Actuary employs standard actuarial methods. The estimation of the policy liabilities is determined in accordance with accepted actuarial practice in Canada and is based on reasonable assumptions and appropriate methods that are consistently applied, giving appropriate consideration to relevant changes in circumstances and product changes.

There is inherent uncertainty regarding the assumptions to estimate the amount and timing of future claims payments that make up the insurance contract liabilities. Actuarial assumptions in the insurance contract liabilities include: length of time of settlement with impacts to predictability, experience with similar cases, historical claim payment trends and development patterns, line of business characteristics, effects of inflation on future claim settlement costs and economic decisions. Additionally, the Corporation's insurance contract liabilities can be affected by the frequency and severity of claims and the discount rate.

The Corporation is liable for all insured events that occurred during the term of the insurance contract, even if the loss is reported after the end of the contract term. In addition, injury claims can be long-tailed.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Injury claims include income replacement income, care benefits, medical and death benefits, which account for approximately 25 per cent of total incurred claims net of reinsurance. The timing of payments of injury claims can be extended due to delayed reporting, and the timing and amount of injury payments can exhibit considerable uncertainty because of the complex bodily injury claims environment and internal claims operational changes.

The frequency and severity of claims is discussed above, while the discount rate and actuarial methods and assumptions are discussed in Note 14.

Concentration of Insurance Risk

The Corporation has a diverse customer base as the sole provider of Basic insurance to all drivers in Manitoba. The Corporation operates in one provincial jurisdiction and provides vehicle insurance only, so there is a concentration of insurance risk with respect to geography, jurisdiction and product type.

The impact of the concentration of insurance risk is quantified through catastrophe modeling that the Corporation's reinsurance broker updates annually. This testing allows the Corporation to assess, monitor and manage these risks effectively. The concentration of insurance risk is also managed through a catastrophe reinsurance treaty, road safety programs, the graduated licensing program and distracted driving campaigns. As the sole provider of Basic insurance, the Corporation invests in and benefits the most from these programs.

Premium Pricing Risk

The Corporation is the sole provider of Basic insurance and is not subject to competitive risk for its Basic insurance product. Basic insurance rates are set to breakeven after considering investment returns. Because the insurance rates are determined based on forward looking estimates of costs, the unfavourable variance in costs, in particular claims costs, may result in Basic insurance premiums not being sufficient to cover costs.

The Corporation is subject to legislative requirements and applies to the Public Utilities Board annually to establish rates for the Basic insurance line of business.

The Corporation's Extension line of business products compete with other insurers and are subject to underwriting risk and competitive risk.

Financial Risk

Investments carry certain financial risks including market risk, credit risk and liquidity risk. In accordance with Section 12(1) of The Manitoba Public Insurance Corporation Act, the Minister of Finance is responsible for the investments of the Corporation. The Minister has charged the Department of Finance with the operational management of the investments. The Corporation, through the Investment Committee of the Board, and the Department jointly determine appropriate policies and strategies to mitigate risk. The investment objectives and goals of the Corporation are embodied in an Investment Policy document, which sets target asset allocation and portfolio concentration limits as well as defining the credit quality of the counterparties and the percentage of highly liquid investments required to meet cash flow needs.

Market Risk

Market risk is the risk that changes in foreign exchange rates, market interest rates and other changes in market prices will result in fluctuation of the fair value or future cash flows of a financial instrument.

Currency Risk

Currency risk is the risk that changes in foreign exchange rates will result in fluctuation of the fair value or future cash flows of a financial instrument. The Corporation has low exposure to currency risk because the Corporation has limited non-Canadian financial instruments. As of March 31, 2026, total foreign denominated financial instruments were approximately 9.34 per cent (March 31, 2025—5.52 per cent) of the Corporation's investment portfolio and had carrying values noted below.

A 10 per cent change in the USD exchange rate as at March 31, 2026, would change the fair value of the USD investments below and result in a change to Net income (loss) attributable to Owners of the Corporation of $34.1 million (March 31, 2025—$19.8 million).

March 31, 2026	**March 31, 2026**	March 31, 2025	March 31, 2025
$244.8 million USD	**$341.3 million CAD**	$137.8 million USD	$198.2 million CAD

Interest Rate Risk

Interest rate risk is the risk of economic loss resulting from market changes in interest rates and impact on interest rate sensitive assets and liabilities.

The market valuation of the Corporation's fixed income portfolio is directly impacted by fluctuations in interest rates and will have a larger impact on instruments with a long duration.

	Average Effective Rate—%	
	2026	**2025**
Federal	**2.14**	**1.76**
Provincial	**3.86**	**3.28**
Municipal	**4.69**	**4.19**
Schools	**3.84**	**3.45**
Corporations	**4.27**	**3.93**

The Operational Asset Liability Management (ALM) strategy aims to align the dollar duration of Basic Claims fixed income assets—including government bonds, corporate bonds, short-term investments, mortgages, and non-marketable bonds—with the dollar duration of Basic Claims liabilities, within a tolerance of +/-5 per cent. In addition, the market value of the Basic Claims investment portfolio (fixed income assets plus real estate) is targeted to match the present value of the associated liabilities within +/-$100 million. Maintaining this alignment helps minimize the sensitivity of the surplus to interest rate fluctuations.

As at March 31, 2026, the dollar duration match was 97.6 per cent, within the acceptable +/-5 per cent tolerance range. This measure was calculated using February liability cash flows, as March cash flows were not yet available. This timing lag is typical following fiscal year-end due to standard reporting processes, and the investment manager therefore relies on the most recent available liability valuation data.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

At March 31, 2026, the market value of the Basic Claims investment portfolio exceeded the present value of the liabilities by $109.0 million (March 31, 2025 - $21.0 million). A transfer from Basic Claims to the Rate Stabilization Reserve will occur after the fiscal year-end to bring the difference back within the target range of +/-$100 million.

The Special Risk Extension and Extension lines of business are excluded from the ALM strategy. Their portfolios contain assets supporting both surplus and claims, and the market value of fixed income assets generally approximates the present value of claims liabilities.

The Employee Future Benefits portfolio is also outside the scope of the ALM strategy. This portfolio follows a balanced asset allocation approach—including fixed income, equities, and alternative assets—to support accrued employee pension, post-retirement, and severance benefit obligations.

The approximate impact of an increase of 100 basis points in interest rates as at March 31, 2026, would decrease the Liabilities for incurred claims by $168.4 million (March 31, 2025—$148.6 million decrease) and decrease Investments by $224.6 million (March 31, 2025—$204.6 million decrease) resulting in a decrease to Net income (loss) attributable to Owner of the Corporation of $56.2 million (March 31, 2025—$56.0 million decrease).

An increase of 100 basis points would increase OCI by $58.7 million (March 31, 2025—$62.6 million increase) as it relates to the employee future benefits liabilities.

The approximate impact of a decrease of 100 basis points in interest rates as at March 31, 2026, would increase the Liabilities for incurred claims by $205.1 million (March 31, 2025—$175.1 million increase) and increase Investments by $225.3 million (March 31, 2025—$205.3 million increase) resulting in an increase to Net income (loss) attributable to Owner of the Corporation of $20.2 million (March 31, 2025—$30.2 million increase).

A decrease of 100 basis points would decrease OCI by $65.7 million (March 31, 2025—$70.4 million decrease) as it relates to the employee future benefits liabilities.

Equity Price Risk

The fair value of equity securities held by the Corporation can be affected by changes in market prices, other than currency and interest rate risks, which may be caused by factors specific to the individual financial instrument or factors affecting all similar financial instruments. General economic conditions, political conditions and other factors affect the equity market. As at March 31, 2026, a 10.0 per cent change in the fair value of the Corporation's equity portfolio would result in a $44.9 million change in Net income (loss) attributable to Owner of the Corporation (March 31, 2025—$38.6 million).

The Corporation has policies in place to limit and monitor its exposure to individual issuers and classes of issuers of equity securities.

The Corporation's investment portfolio is exposed to changes in equity prices in Canadian and global markets. At March 31, 2026, equities comprised 12.3 per cent (March 31, 2025—10.8 per cent) of the carrying value of the Corporation's investment portfolio.

Equity risk results from movements in and/or the volatility of equity markets, including equity prices and indices. Diversification techniques are employed to minimize risk including exposure to various investment styles. The Corporation's investment policies limit total investment in any entity to a maximum of five per cent of the Corporation's assets. The Corporation's stock portfolio is benchmarked to the indices noted in the table below. A 10 per cent movement in the indices, with all other variables held constant, would have the following estimated effect on the fair value of the Corporation's stock holdings as at March 31, 2026, and March 31, 2025.

Stock Portfolio	Benchmark	March 31, 2026	March 31, 2025
Canadian common	S&P/TSX Capped Composite Index & S&P/TSX Small Cap Index	**20,024**	15,309
Global equities	MSCI World Index	**24,918**	23,334
Total		**44,942**	38,643

Credit Risk

Credit risk is the potential for the Corporation to incur a financial loss due to the failure of the other party to discharge an obligation. Financial instruments that give rise to potential credit risk for the Corporation include fixed income securities, accounts receivable, reinsurance receivables and structured settlements.

The following table summarizes the Corporation's maximum exposure to credit risk on the Statement of Financial Position. The maximum credit exposure is the carrying value of the asset net of an allowance for loss. Cash and cash equivalents carry minimal exposure to credit risk.

As at March 31	2026	2025
Cash and cash equivalents	**220,193**	188,683
Bonds	**2,174,469**	2,209,660
Private debt	**271,728**	270,086
Pooled commercial mortgages	**114,063**	108,956
Accounts receivable	**162,072**	148,404
Reinsurance contract assets	**57,094**	74,043
Maximum credit risk exposure on the Statement of Financial Position	**2,999,619**	2,999,832

Fixed Income Securities Credit Risk

Fixed Income Securities Credit Risk includes Bonds, Private Debt, and Pooled Commercial Mortgages. The Corporation mitigates its exposure to credit risk by placing fixed income securities with high-quality institutions with investment grade ratings. The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings, where available, or to historical information about counterparty default rates. The following table highlights the fixed income securities by credit quality according primarily to Moody's Investors Service, with additional inputs from Standard & Poor's and Dominion Bond Rating Service, at the period end date. All Manitoba municipal and school bonds are backed by the Province of Manitoba and, as such, have been assigned the credit rating of the Province of Manitoba Bonds.

	March 31, 2026		March 31, 2025	
	Carrying Value	Percentage of Portfolio	Carrying Value	Percentage of Portfolio
Aaa	**157,249**	**6.1%**	129,623	5.0%
Aa	**793,566**	**31.0%**	797,956	30.8%

Baa	**259,358**	**10.1%**	287,552	11.1%
Not Rated	**468,698**	**18.3%**	461,418	17.8%
Total	**2,560,260**	**100.0%**	2,588,702	100.0%

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

Accounts Receivable Credit Risk

All significant past due receivables are fully provided for due to the uncertainty of collection. Substantially all remaining receivables are deemed to be collectible within 12 months. The credit risk pertaining to premiums receivable is mitigated as a customer's policy may be cancelled for default of payment.

The following table highlights the Corporation's accounts receivable by major category.

	2026	2025
Customer and broker non-policy	**130,781**	122,967
Accrued interest	**25,233**	23,537
Other receivables	**8,365**	3,954
Estimated expected credit losses	**(2,307)**	(2,054)
Balance at March 31	**162,072**	148,404

Accounts receivable are primarily from customers, along with amounts from brokers across the province of Manitoba.

	2026	2025
Current	**160,180**	148,029
31-60 days	**-**	245
61-90 days	**376**	307
Greater than 90 days	**3,823**	1,877
Subtotal	**164,379**	150,458
Estimated expected credit losses	**(2,307)**	(2,054)
Balance at March 31	**162,072**	148,404

Reinsurance Receivable Credit Risk

The Corporation evaluates the financial condition of its reinsurers to minimize the exposure to significant losses from reinsurer insolvency. The Corporation holds collateral in regard to unregistered reinsurance in the form of amounts on deposit and letters of credit of which nil was outstanding as of March 31, 2026 (March 31, 2025—nil).

Furthermore, a corporate guideline requiring reinsurers to have a minimum credit rating of A– from A.M. Best and BBB+ credit rating from S&P Global Ratings is in place.

For the year ended March 31, 2026, six reinsurers share the Corporation's casualty reinsurance coverage, ranging from 0.4 to 25.0 per cent (March 31, 2025—1.0 to 31.0 per cent) on any one layer. The reinsurer exposed to 25.0 per cent (March 31, 2025—31.0 per cent) of the losses is licensed in Canada by OSFI and, therefore, subject to minimum capital requirements.

For the year ended March 31, 2026, 14 reinsurers (March 31, 2025—14 reinsurers) share the Corporation's catastrophe reinsurance coverage, none holding more than 25.0 per cent (March 31, 2025 – 25.0 per cent) of the reinsurance exposure on any one layer.

No material amount due from reinsurers was considered uncollectible during the fiscal year ended March 31, 2026 (March 31, 2025—nil) and no estimated expected credit loss was recorded as at March 31, 2026 (March 31, 2025—nil).

Structured Settlements Credit Risk

The Corporation has obligations to provide certain fixed amounts to claimants on a recurring basis and has purchased annuities from various Canadian life insurers to provide for those payments. In the event any of the life insurers are in default, the Corporation may have to assume a financial guarantee obligation. Therefore, the net risk to the Corporation is any credit risk related to the life insurers underwriting the annuities the Corporation has purchased to provide for these settlement payments. This risk is reduced to the extent of coverage provided by Assuris, the life insurance compensation insurance plan. Assuris is an independent not-for-profit, industry-funded compensation organization founded in 1990. Assuris is designated by the federal Minister of Finance under *The Insurance Companies Act of Canada* to protect policyholders.

As at March 31, 2026, the present value of expected payments the Corporation has purchased to provide for settlement arrangements totals $108.5 million (March 31, 2025—$102.6 million), based on various dates of purchase. Of this total, $107.1 million (March 31, 2025—$96.3 million) is placed with insurers with a financial strength rating of AA- or AA (Very Strong) and the remaining $1.4 million (March 31, 2025—$6.3 million) is placed with insurers with a financial strength rating of A or A+ (Strong), as assessed by Fitch and S&P.

Liquidity Risk

A significant risk of the insurance industry is the ability to match the cash inflows of the investment portfolio with the cash requirements of the policy liabilities and operating expenses. The Corporation has taken the overall historical liability settlement pattern as a basis to define diversification and duration characteristics of the investment portfolio. To meet the cash requirements for claims and operating expenses, the Corporation has policies to ensure that assets and liabilities are broadly matched in terms of their duration.

Cash and cash equivalents are essential components of the Corporation's financial liquidity management. Cash flows are monitored to ensure sufficient resources are available to meet our current operating requirements. Excess funds not needed to meet current operating requirements are invested in long-term instruments to generate additional revenue for future obligations.

The amount reported as "within one year" for the year ended March 31, 2025 has been revised to increase by $53.6 million in order to be consistent with presentation in the current year.

26. Non-Current Assets and Liabilities

The following table presents assets and liabilities on the Corporation's Statement of Financial Position that the Corporation expects to recover or settle in 12 months or more. During the year, the Corporation revised the comparative figures presented for lease obligations and insurance contract liabilities.

This is reported as follows:

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

	March 31, 2026	March 31, 2025 as previously reported	Revision of Prior Year	March 31, 2025 Revised
Assets				
Bonds	**2,091,561**	2,020,464	-	2,020,464
Private debt	**271,728**	270,086	-	270,086
Pooled commercial mortgages	**114,063**	108,956	-	108,956
Pooled real-estate fund	**390,520**	373,611	-	373,611
Infrastructure and other investments	**252,392**	238,369	-	238,369
Reinsurance contract assets [(1)]	**30,014**	33,556	(3,915)	29,641
	3,150,278	3,045,042	(3,915)	3,041,127
Liabilities				
Lease obligations [(2)]	**6,269**	7,315	(962)	6,353
Provision for onerous contracts	**28,003**	-	-	-
Provision for employee future benefits	**457,919**	465,212	-	465,212
Insurance contract liabilities [(3)]	**1,724,885**	2,655,883	(880,253)	1,775,630
	2,217,076	3,128,410	(881,215)	2,247,195
Net liabilities due after one year	**933,202**	(83,368)	877,300	793,932

[(1)] Prior year Reinsurance contract assets have been restated to report the discounted value of the asset.

[(2)] Prior year Lease obligations have been restated after correction to the calculation of the total lease payments.

[(3)] Prior year Insurance contract liabilities have been restated to report the discounted value of the liabilities.

The investments in pooled real-estate and infrastructure funds, that are in redeemable units, have been categorized as non-current as the Corporation does not intend to sell the investments in the next 12 months.

27. Rate Regulation

Under the provisions of The Crown Corporations Governance and Accountability Act, the Public Utilities Board has the authority to review and approve Basic Insurance rates, premiums and service fees charged with respect to compulsory driver and vehicle insurance provided by the Corporation. No new rates or fees for services for Basic Insurance can be introduced without the approval of the Public Utilities Board. This business comprises approximately 84 per cent (March 31, 2025—84 per cent) of the total business based on incurred claims.

Annually the Corporation prepares its Basic Insurance general rate application and files it with the Public Utilities Board in June for implementation in the following fiscal year. The general rate application includes the prospective rate requirements based on historical and forecasted financial and other information as well as the application of actuarial, accounting and statistical principles and practices.

The Corporation is required to pay a portion of the Public Utilities Board's operating costs relating to the Corporation's share of the overall Public Utilities Board budget. In addition, the Public Utilities Board can also order the Corporation to reimburse other proceeding participants for specified costs such as their time, legal and expert witness fees.

28. Contingent Liabilities

The Corporation is subject to litigation arising in the normal course of conducting its insurance business. The Corporation is of the opinion that this litigation will not have a significant effect on the financial position, financial performance or cash flows of the Corporation.

Audited Financial Statements

(in thousands of Canadian dollars, except as otherwise noted)

29. Onerous Contracts

At March 31, 2026, the Corporation recognized a provision for an onerous contract representing unavoidable costs to satisfy contractual obligations in respect of rights and services that are not expected to provide future economic benefit to the Corporation.

The provision established as at March 31, 2026, is reported at $37.3 million, reflecting the present value of the remaining monthly payments required under the contract, including applicable non-refundable tax, to the contract expiry date of July 31, 2030.

Assets that were associated with the contract had been written down by the Corporation prior to recording the provision at March 31, 2026.

Measurement of the provision required the use of significant judgment and assumptions including assessment of proposals for changes to the terms of the contract, potential recoveries from legal action; and determination of an appropriate discount rate used to measure the present value of the future cash outflows.

The discount rate applied at March 31, 2026, in determining the present value of the future payments includes assessment for interest rate risk, and the Corporation's operational risk, and excludes credit risk.

The provision is reported on the Statement of Financial Position at March 31, 2026, as Provision for Onerous Contracts. The expense arising from the recognition of the provision was recorded in Operating Expense in the Statement of Financial Operations for the year ended March 31, 2026, and is reported as Data processing in Note 20, Operating Expenses by Nature.

The following management discussion and analysis (MD&A) is the responsibility of management and has been reviewed by the Board of Directors (the Board) for the three-month period ended June 30, 2026. This MD&A is intended to enable the reader to assess our results of operations and financial condition for the three-month period ended June 30, 2026, compared to the corresponding periods in 2025. It should be read in conjunction with our interim condensed financial statements, as well as the MD&A and the 2025/26 annual audited financial statements and supporting notes found in the Corporation's 2025 Annual Report.

"MPI", the "Corporation", "we" and "our" are terms used throughout this document to refer to Manitoba Public Insurance Corporation. Further information about MPI can be found online at mpi.mb.ca.

Cautionary Note Regarding Forward-Looking Statements

Certain of the statements included in this MD&A about MPI's current and future plans, expectations and intentions, results, levels of activity, performance, goals or achievements or any other future events or developments constitute forward-looking statements. Forward-looking statements are based on estimates and assumptions made by management based on management's experience and perception of historical trends, current conditions and expected future developments, as well as other factors that management believes are appropriate in the circumstances. In addition to other estimates and assumptions which may be identified herein, estimates and assumptions have been made regarding, among other things, economic and political environments, and industry conditions. Many factors could cause the Corporation's actual results, performance or achievements or future events or developments to differ materially from those expressed or implied by the forward-looking statements.

Results of Operations

The Corporation reported net loss from operations of $35.9 million for the three-month period ended June 30, 2026, as compared to net income of $41.5 million for the same period in the prior year. This reflects the underlying performance of the Corporation's individual lines of business. More specifically,

- The Basic insurance line of business reported net loss of $43.5 million as compared to a net income of $25.8 million for the same period in the prior year. The Insurance service result was a loss of $74.2 million as compared to $26.2 million for the prior year.
- The Extension line of business reported net income of $0.4 million as compared to a net income of $20.5 million for the same period in the prior year. The Insurance service result was $0.8 million as compared to $19.2 million for the prior year.
- The Special Risk Extension (SRE) line of business reported a net income of $2.7 million as compared to a net loss of $4.4 million for the same period in the prior year. The Insurance service result was $2.1 million as compared to a loss of $2.1 million for the prior year.
- The Drivers and Vehicles Act operations (DVA) line of business reported a net income of $4.5 million as compared to a net loss of $0.4 million for the same period in the prior year.

Insurance Revenue

Insurance revenue is comprised of Revenue from premiums and Other insurance revenue (fees related to policy administration). Insurance revenue for the Corporation increased by 7.5 per cent or $31.7 million to $456.2 million for the three-month period ended June 30, 2026, as compared to the prior year. Insurance revenue for the Corporation is comprised of insurance revenue from three lines of business: Basic, Extension and SRE. The revenue reported by each of these lines of business is approximately 77 per cent, 14 per cent and 9 per cent, respectively, of the Insurance revenue for the Corporation.

The Basic insurance line of business is subject to regulation by the Public Utilities Board of Manitoba. Rates and premiums are set annually through a General Rate Application (GRA). The Extension and SRE lines of business are not subject to regulation.

Insurance revenue for the Basic line of business increased by 9.4 per cent or $30.2 million to $352.5 million for the three-month period ended June 30, 2026, as compared to the same period in the prior year. The Public Utilities Board has sole authority over reviewing and approving premiums and service fee charges for the Basic line of business. To this end, MPI participates in an annual GRA process beginning in June each year, to establish rates and fees that are effective for the subsequent fiscal year. On December 19, 2025, the Public Utilities Board issued Order No. 126/25 that included a 1.77 per cent rate increase to Basic insurance for policies taking effect on or after April 1, 2026. The PUB also extended the Driver Safety Rating system to +20 as of April 1, 2026; and increased the vehicle premium discounts for all levels above +2, to a maximum of 53 per cent for Levels +19 and +20.

Insurance revenue for the Extension line of business increased by 4.9 per cent or $2.9 million to $62.4 million for the three-month period ended June 30, 2026, as compared to the same period last year. The increased revenue in the Extension line of business reflects an overall stronger demand for certain products such as reduction to deductible, loss of use coverage and maximum insured vehicle coverage.

Insurance revenue for the SRE line of business decreased 3.1 per cent or $1.3 million to $41.3 million for the three-month period ended June 30, 2026, as compared to the same period in the prior year. The decreased revenue in the SRE line of business reflects a decrease in premiums and exposures underwritten, driven in part by deliberate non renewals of accounts with adverse claims experience.

Incurred Claims

Incurred claims are a function of both frequency (the number of claims made) and severity (how expensive are the actual or expected injuries, repairs, or total loss), as well as the timing of when claims are settled and paid. Frequency is affected by several factors, such as driving patterns, weather, and individual decisions to advance a claim or not. Severity is impacted by several factors such as supply chain availability of parts and service, prevailing market conditions for new and used vehicle pricing, and complexity of the vehicle requiring repair. Timing related to claims settlement is impacted by several factors, such as inflation, discount rates, risk adjustments, and investment yields.

Incurred claims for the Corporation increased by 143.2 per cent or $417.6 million to $709.2 million for the three-month period ended June 30, 2026, as compared to the same period in the prior year. This increase is primarily attributable to catastrophic storms experienced in June 2026, which drove increases in both claims paid and claims reported during the quarter and an increase in the estimated ultimate cost of claims not yet settled, resulting in significant increases to incurred claims recognized in the Basic and Extension lines of business.

Basic Line of Business

Incurred claims for the Basic line of business increased 162.8 per cent or $380.7 million to $614.6 million for the three-month period ended June 30, 2026, as compared to the same period in the prior year. The loss ratio for the three-month period increased to 177.8 per cent as compared to 74.4 per cent for the same period in the prior year.

Physical damage incurred claims (excluding discount rate impact and risk adjustment) increased by 206.8 per cent or $361.2 million to $535.9 million for the three-month period ended June 30, 2026, as compared to the prior year. More specifically,

- Collision increased by 5.3 per cent or $6.4 million to $126.2 million. For the three-month period ended June 30, 2026, the estimated cost for collision claims is 36.5 per cent of the Revenue from premiums.
- Comprehensive non-hail decreased by 13.1 per cent or $5.4 million.
- Comprehensive hail increased by $358.4 million due to the catastrophic storms experienced in June. The Corporation received more than 37,000 claims related to severe weather events in the month of June, in particular, a hail storm on June 9, 2026, resulted in the largest volume of claims reported from any single weather event in the Corporation's history.
- Property damage incurred claims increased by 11.3 per cent or $1.8 million.

Bodily injury claims (excluding inflation, discount rate impact and risk adjustment) increased 2.9 per cent or $2.2 million to $77.4 million for the three-month period ended June 30, 2026, as compared to the same period in the prior year. The impact of inflation increased outstanding bodily injury obligations by $7.3 million for the three-month period ended June 30, 2026, as compared to an increase of $15.0 million in the same period of the prior year.

Impacts from discount rates were favourable by $9.7 million and impacts from risk adjustments were unfavourable by $34.6 million, as compared to the same period of the prior year.

Extension Line of Business

Incurred claims for the Extension line of business increased by 182.8 per cent or $43.5 million to $67.3 million for the three-month period ended June 30, 2026, as compared to the prior year. The loss ratio for the three-month period was 110.9 per cent as compared to 41.0 per cent for the same period in the prior year. The current year results include significant impacts from weather-related events in the first quarter.

Special Risk Extension Line of Business

Incurred claims for the SRE line of business decreased by 19.8 per cent or $6.7 million to $27.2 million for the three-month period ended June 30, 2026, as compared to the prior year. More specifically,

- Public liability (excluding discount rate impact and risk adjustment) decreased by 34.1 per cent or $8.4 million to $16.2 million.
- Physical damage (excluding discount rate impact and risk adjustment) increased by 14.9 percent or $1.7 million to $13.1 million.

The loss ratio for the three-month period was 65.9 per cent compared to 79.5 per cent for the same period in the prior year.

Net Income (Expense) from Reinsurance Contracts

The Corporation follows a practice of obtaining reinsurance coverages for both casualty and catastrophic events to limit its exposure to losses. The Net income from reinsurance contracts increased by $280.9 million to an income of $277.6 million for the three-month period ended June 30, 2026, as compared to the same period in the prior year. This reflects the claims incurred volume and eligibility for recovery from reinsurers. Premiums paid for the reinsurance program were $6.7 million compared to $9.4 million for the same period of the prior year.

Net Insurance Financial Income (Expense)

Net insurance financial expense was $49.6 million for the three-month period ended June 30, 2026, as compared to net insurance financial income of $8.8 million, for the same period in the prior year. This reflects the change in discount rates on claims, along with the unwinding of discount rates (a process of recognizing the increase in the present value of a liability over time as it moves forward in time).

Corporate Operating Expenses

The Corporation leverages an integrated service delivery model wherein its lines of business benefit from sharing costs amongst themselves, resulting in lower costs overall than if each were operated on a stand-alone basis. Corporate operating expenses are reported as a separate line item or in aggregate as Acquisition, Maintenance, and Operating on the Statement of Operations. The table, below, illustrates a traditional view of corporate operating expenses prior to being classified as Acquisition, Maintenance, and Operating.

For the three months ended June 30 in thousands of Canadian dollars	**2026**	2025
Compensation	**60,740**	57,957
Data processing	**20,396**	18,682
Special services	**4,367**	2,080
Merchant fees and bank charges	**3,179**	2,968
Buildings	**1,778**	1,687
Other	**1,449**	1,489
Postage	**1,521**	1,344
Printing, stationery and supplies	**1,156**	866
Furniture and equipment	**217**	627
Driver education program	**1,469**	1,345
Regulatory/appeal	**1,411**	861
Grants in lieu of taxes	**472**	449
Telephones	**495**	377
Travel and vehicle	**255**	202
Public information/advertising	**182**	203
Safety/loss prevention programs	**201**	(396)
	99,288	90,741
Commissions-policy	**29,086**	27,068
Commissions-non-policy	**1,693**	1,674
Premium taxes	**13,651**	12,690
	44,430	41,432
Amortization of deferred development costs	**1,311**	1,608
Depreciation of operating property and equipment	**1,735**	1,755
	3,046	3,363
Total	**146,764**	135,536

Total corporate operating expenses including commissions and premium taxes increased 8.3 per cent or $11.3 million to $146.8 million.

Capital Management

The Corporation follows the capital management framework of the Office of the Superintendent of Financial Institutions Canada which includes a Minimum Capital Test (MCT). MCT is a standardized measure of capital adequacy for an insurance company and represents the ratio of available capital to required capital as derived from a risk-based formula.

The Corporation has established minimum capital adequacy targets for each of its insurance lines of business that reflects the underlying risk and the competitive nature unique to that line of business. Higher risk equates to a higher minimum capital requirement. The target MCT for each of the lines of business is set out in *The Manitoba Public Insurance Corporation Act*. More specifically,

- The Basic Insurance line of business has a minimum MCT target of 100 per cent. MCT as at June 30, 2026, was 83 per cent.
- The Extension Insurance line of business has an established minimum MCT target of 200 per cent. MCT as at June 30, 2026, was 220 per cent.
- The SRE Insurance line of business has an established minimum MCT target of 300 per cent. MCT as at June 30, 2026, was 244 per cent.

Outlook

The Corporation remains committed to achieving its Corporate goals. Actual results will be monitored, and corrective actions taken, when necessary, to ensure that expected outcomes are realized.

On June 24, 2026, MPI filed its General Rate Application (GRA) with the Public Utilities Board (PUB), requesting an overall 2.38 per cent rate increase. This 2.38 per cent increase consists of a 5.56 per cent increase to vehicle premiums and a 3.01 per cent decrease due to the change in the Driver Safety Rating Scale (the overall increase reflects the compounding of both rate changes). The PUB is expected to release its decision regarding rate changes, if any, in December 2026. Changes to rates will take effect April 1, 2027.

The accompanying notes are an integral part of these financial statements.

1. Corporate Information

The Manitoba Public Insurance Corporation (the Corporation) was incorporated as a Crown corporation under *The Automobile Insurance Act* in 1970. The Corporation is owned by the Province of Manitoba, and the financial results of the Corporation are included in the consolidated financial statements of the Province of Manitoba. In 1974, *The Automobile Insurance Act* was revised and became *The Manitoba Public Insurance Corporation Act* (Chapter A180 of the continuing consolidation of the Statutes of Manitoba). In 1988, the Act was re-enacted in both official languages as Chapter P215 of the Statutes of Manitoba. The address of the Corporation's registered office is 234 Donald Street, Winnipeg, Manitoba.

Under the provisions of its Act and regulations, the Corporation operates an automobile insurance division and a discontinued general insurance division. The lines of business for the automobile insurance division provide for Basic Universal Compulsory Automobile Insurance, Extension and Special Risk Extension (SRE) coverages. For financial accounting purposes, the lines of business for the automobile insurance division and the discontinued general insurance division are regarded as separate operations and their revenues and expenses are allocated on a basis described in the summary of material accounting policies. For financial reporting purposes, due to the immateriality of the financial results of the discontinued general insurance operations, the operations are reported as part of the SRE line of business. The Basic Universal Compulsory Automobile Insurance line of business rates are approved by the Public Utilities Board of Manitoba.

Under *The Drivers and Vehicles Act* (DVA), the Corporation is responsible for DVA operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services.

2. Basis of Presentation

These unaudited interim financial statements have been prepared based on principles and guidance provided under International Financial Reporting Standards (IFRS).

These unaudited interim financial statements do not include all of the note disclosures normally included in the annual financial statements. As such, these unaudited financial statements should be read in conjunction with the Corporation's annual financial statements for the fiscal year ended March 31, 2026. These financial statements have been prepared using the same accounting policies and methods applied in the annual audited financial statements except for the amendments to existing standards adopted on April 1, 2026, described in Note 4.

These financial statements are presented in thousands of Canadian dollars which is the Corporation's functional and presentation currency. The Corporation presents its Statement of Financial Position broadly in order of liquidity and, Statement of Financial Position line items may include both current and non-current balances, as applicable.

2.1 Seasonality

The automobile insurance business, which reflects the primary business of the Corporation, is seasonal in nature. While Revenue from premiums is generally stable from quarter to quarter, the Insurance service result from insurance contracts is typically highest in the first and second

quarter of each year and lowest in the fourth quarter of each year. This is driven mainly by weather conditions which may vary significantly between quarters.

2.2 Material Estimates, Assumptions and Judgments

The preparation of these financial statements in accordance with IFRS requires management to use estimates, assumptions and judgments that affect the amount reported for certain assets, liabilities, and disclosures as at the reporting date, as well as recognized amounts of revenues and expenses during the reporting period. Actual results could differ significantly from these estimates and assumptions.

3. Summary of Material Accounting Policies

A summary of the material accounting policies followed by the Corporation is provided in Note 3 to the annual financial statements for the fiscal year ended March 31, 2026, as provided in the Corporation's 2025 Annual Report. The accounting policies have been applied consistently to the periods presented, except for the new standards and amendments to existing standards adopted on April 1, 2026, as described in Note 4.

4. Changes in Accounting Policies

4.1 Adoption of Amended Accounting Standards

4.1.1 Amendments to IFRS 7 – Financial Instruments: Disclosures (IFRS 7) and IFRS 9 – Financial Instruments (IFRS 9)

In May 2024, the IASB issued amendments to IFRS 7 – *Financial Instruments: Disclosures* and IFRS 9 - *Financial Instruments*. The amendments clarify the classification of certain financial assets and the derecognition of a financial liability including an accounting policy option for the derecognition of financial liabilities settled through electronic transfer if certain conditions are met. The amendments also add disclosure requirements for certain financial instruments. Restatement of comparative periods is not required, in accordance with transition requirements for amendments to the Standard.

The Corporation has elected to apply these amendments to all payments, excluding contracts in the scope of IFRS 17 – Insurance contracts. Comparative figures have not been restated, accordingly, the impact of the application of the amendments to IFRS 9 is recognized in the Statement of Financial Position and the Statement of Cash Flows as at April 1, 2026, the effective date of the amendments.

4.2 Future Changes in Accounting Policy and Disclosure

Certain new standards, interpretations, amendments and improvements to existing standards have been issued by the International Accounting Standards Board (IASB) over the past year. The standards that may be applicable to the Corporation are:

4.2.1 IFRS 18 – Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18 - *Presentation and Disclosure in Financial Statements* which will replace IAS 1 – *Presentation of Financial Statements*. The standard provides a defined structure for the statement of profit or loss, with three main categories for reporting revenue and expenses (operating, investing, and financing). IFRS 18 is effective for annual reporting

periods beginning on or after January 1, 2027, with earlier application permitted. The Corporation is assessing the impact of this new standard on the presentation and disclosure of its financial statements.

5. Cash, Cash Equivalents and Investments

Cash and cash equivalents are comprised of cash, current operating accounts, provincial short-term deposits with maturities of 90 days or less from the date of acquisition, and funds held in trust on behalf of other insurance companies.

Cash equivalent investments have a total principal amount of $106.6 million (March 31, 2026—$114.5 million) comprised of provincial short-term deposits with effective interest rates of 1.99 per cent to 2.16 per cent (March 31, 2026—2.14 per cent to 2.22 per cent), with interest receivable at varying dates.

The Corporation has an unsecured operating line of credit with its principal banker in the amount of $10.0 million (March 31, 2026—$10.0 million). The unsecured operating line of credit remained unutilized as of June 30, 2026 (March 31, 2025—nil).

Cash, Cash Equivalents and Investments

The following tables present the carrying values of cash, cash equivalents and investments held by the Corporation, according to their classification as defined by IFRS.

	Financial Instruments

Net realized gain on investments	**8,844**	33,451
Net gain (loss) on investments	**92,261**	(1,453)
Investment management fees	**(1,993)**	(1,769)
Investment income	**116,013**	22,394

Net Insurance Financial Result

Net insurance financial result is comprised of insurance finance income (expense) from insurance contracts issued and reinsurance contract held and are provided in the table below.

Changes in the carrying value of insurance contracts that arise from the unwinding of discounting and changes in financial assumptions (including discount rates) applied in measuring insurance contracts, are reported as insurance finance income (expense). Changes in the carrying value of reinsurance contracts that arise from the unwinding of discounting and changes in financial assumptions (including discount rates) applied to measuring reinsurance contracts, are reported as reinsurance finance income (expense).

For the three months ended June 30	**2026**	2025
Change in carrying amount of insurance contracts issued due to:		
Unwinding of discounting	**(25,057)**	(20,733)
Changes in discount rate and other financial assumptions	**(26,282)**	29,332
Insurance finance income (expense) from insurance contracts issued	**(51,339)**	8,599
Change in carrying amount of reinsurance contracts held due to:		
Unwinding of discounting	**1,480**	354
Changes in discount rate and other financial assumptions	**223**	(202)
Reinsurance finance income	**1,703**	152
Net insurance financial result	**(49,636)**	8,751

7. Insurance and Reinsurance Contracts

The net carrying amounts of insurance and reinsurance contracts are as follows:

	June 30, 2026	March 31, 2026
Liability for remaining coverage	**427,963**	424,857
Liability for incurred claims	**2,879,583**	2,450,979
Insurance contract liabilities	**3,307,546**	2,875,836
Asset for remaining coverage	**7,017**	2,160
Asset for reinsured claims	**339,205**	54,934
Reinsurance contract assets	**346,222**	57,094
Net insurance and reinsurance contracts	**2,961,324**	2,818,742

Insurance Contract Liabilities

Insurance contracts analysis by remaining coverage and incurred claims

The following tables present the change in the net liability reported for insurance contracts, showing the movement in the liability for remaining coverage and the liability for incurred claims over the period. The insurance contracts are measured under the Premium Allocation Approach (PAA), and the Corporation applies the accounting policy choice to expense acquisition cash flows as they arise.

	Liability for Remaining Coverage	Liability for Incurred Claims		Total
For the three months ended June 30, 2026		Present Value of Future Cash Flows	Risk Adjustment	
Insurance contract liabilities, beginning of period	424,857	2,336,319	114,660	2,875,836
Changes in comprehensive income (loss):				
Insurance revenue	(456,245)	-	-	(456,245)
Insurance service expense:				
Incurred claims and other insurance expenses	-	791,503	50,946	842,449

10.0 Corporate Project Funding Summary 27

1.0 Introduction and Mandate

Manitoba Public Insurance (MPI) is a Crown corporation created to serve Manitobans by delivering affordable, reliable auto insurance and driver services. As the sole provider of compulsory basic auto insurance in the province, MPI's responsibility is unique. Manitobans trust us to protect them on the road, keep rates affordable, deliver services consistently, and invest in safer communities.

Last year marked the beginning of MPI's new multi-year corporate strategy. In 2025/26, our focus was on establishing discipline and stability: putting the right structures in place, clarifying accountabilities, and identifying clear measures of success. That work created a foundation we could build on.

For 2026/27, we are moving forward, building on what we have learned in year one and making steady progress on the commitments we made, while delivering results that Manitobans can see and feel. It means continuing to pace our work responsibly by matching ambition and aspiration with capacity so that we advance modernization and improvements without losing sight of our responsibility to keep rates affordable.

The five corporate focus areas that continue to guide every decision we make:

Affordability – Managing resources responsibly and providing cost-effective products and services that deliver value for Manitobans.

Financial Stability – Strengthening our financial foundation to ensure MPI remains sustainable for the long term.

Organizational Effectiveness – Creating a positive workplace where employees are set up for success through clear processes, collaboration, technology, and fiscal responsibility.

Customer Value – Delivering high-quality, reliable service that meets the needs of Manitobans today and in the future.

Corporate Responsibility – Acting with integrity and transparency, upholding our public mandate, and making a positive impact in the communities we serve.

Each area reflects an essential promise we will continue to uphold to Manitobans. This year's business plan outlines the priorities we will deliver under each focus area, how they connect to our multi-year strategy, and how we will measure our progress.

By moving from stability to execution, MPI is strengthening confidence in its future. The more consistently we deliver on our commitments, the more Manitobans can trust that their insurer is focused on what matters most: protecting them, serving them well, and doing so responsibly.

1.1 Corporation's Mandate, Objects or Purposes as set out in *The Manitoba Public Insurance Corporation Act*

It is the function of the Corporation to engage in and carry out the activity of all classes of automobile insurance, to administer the universal, compulsory automobile insurance as well as Extension insurance as prescribed by regulation. In carrying out these responsibilities the Corporation may also repair, salvage and dispose of any property

insured by it. The Corporation also has the responsibility to provide insurance under the Special Risk Extension line of business and administers *The Drivers and Vehicle Act*.

1.2 Directives from Province

In accordance with *The Crown Corporations Governance and Accountability Act*, the Minister appointed to administer the Act may issue directives to MPI to support provincial policy and MPI must comply with any directive given.

The following directives have been issued to MPI:

- On April 3, 2023, the minister responsible for *The Crown Corporations Governance and Accountability Act* issued a directive to MPI respecting an organizational review. The organizational review considered the Corporation's operations over the period of fiscal year 2021/22 and fiscal year 2022/23, with the findings of the organizational review delivered by way of a written report to the Minister responsible for the Corporation and to the Board of Directors of the Corporation in December 2023. The directive concluded with the delivery of the report.
- On February 1, 2023, the minister responsible for *The Crown Corporations Governance and Accountability Act* issued a directive to MPI respecting procurement policies and procedures. This directive applies to the procurement of goods and services by the Corporation through non-competitive processes and requires that the Corporation publish as part of its annual report information regarding agreements entered into pursuant to a direct award or sole source arrangement or as a result of an emergency.
- On January 30, 2020, the Minister of Crown Services issued a directive to Crown Corporations concerning executive management compensation, overall staffing levels and review of management spans and layers. MPI continues to comply with this directive. This builds upon the management reductions in 2017, the completed span and layers analysis in 2017, and the Corporation's commitment to remain vigilant related to staffing levels and overall compensation.
- On July 24, 2019, the Minister of Crown Services issued a directive to MPI respecting conciliation with the Insurance Brokers Association of Manitoba (IBAM). MPI honoured this directive, and the conciliation process led to a five-year agreement between MPI and IBAM, effective April 1, 2021.

2.0 Corporate Identity and Strategic Direction

2.1 Corporate Mission & Vision

Mission – Exceptional coverage and service, affordable rates and safer roads through efficient public auto insurance.

Vision – Manitoba's trusted auto insurer and driver services provider. Dedicated to road safety for all.

2.2 Our Values

As a public auto insurer, our core values guide every decision and interaction. Through this commitment we deliver exceptional service, foster a positive workplace, and build lasting confidence in our organization for ***Our Customers, Our Partners and Our People.*** We are:

- **Accountable**: We take ownership of our actions and decisions.
- **Collaborative:** We work together, respecting differences and perspectives.
- **Transparent:** We communicate openly and honestly.

2.3 The Multi-Year Strategic Plan: A Roadmap for Stability and Sustainable Growth

MPI's multi-year corporate strategic plan was developed in 2024 to ensure the organization operates with financial discipline, enhances service delivery, and earns the trust of Manitobans. This is a plan that prioritizes long term sustainability over rapid transformation, designed to align with our financial means and operational capacity and evolve in response to our changing operating environment.

Our Corporate Focus Areas act as our guiding North Star and clearly articulate what MPI should be delivering today and into the future:

Affordability: Managing resources responsibly and providing cost-effective products and services that deliver value for Manitobans

Financial Stability: Strengthening our financial foundation to ensure MPI remains sustainable for the long term

Organization Effectiveness: Creating a positive workplace where employees are set up for success through clear processes, collaboration, technology, and fiscal responsibility

Customer Value: Delivering high-quality, reliable service that meets the needs of Manitobans today and in the future

Corporate Responsibility: Acting with integrity and transparency, upholding our public mandate, and making a positive impact in the communities we serve

The specific efforts to achieve our corporate focus areas are organized by Pillars, each led by an executive and supported by strategic programs. When MPI is successful in achieving our corporate focus areas the following tangible outcomes will be realized for Manitobans:

1. **Focus on Our Customer -** Customers receive reliable service from MPI, their needs are understood and experience is smooth, fair, and compassionate.
2. **Build Engagement and Pride -** MPI employees feel valued and heard within a culture that inspires engagement and pride.
3. **Deliver on Our Promises -** We are accountable to Manitobans and deliver reliable outcomes that they trust.
4. **Strengthen Our Financials -** MPI's financial strength ensures stable and affordable rates and upholds the integrity of the public insurance model.
5. **Be Ready For What's Ahead -** We are relevant and provide value to Manitobans.

3.0 Operating Environment

MPI strategy and priorities are grounded in the environment in which we operate. As a public auto insurer, our context spans not only insurance and financial markets, but also the broader economic, technological, and social forces shaping customer needs and organizational risks.

3.1 Internal Environment

Internally, MPI is strengthening operational foundations by stabilizing processes, enhancing governance, and ensuring that employees are set up for success. As we move forward, we are focused on:

- **Leading with ownership and accountability** – Ensuring clarity in decision-making and responsibilities.
- **Strengthening financial sustainability** – Managing resources prudently and refining cost structures.
- **Enhancing IT resilience and execution discipline** – Improving technology infrastructure to reduce risks and support modernization.

3.1.1 Operational Service Enhancements

A key priority for MPI in 2026/27 is ensuring organizational effectiveness, particularly in areas directly affecting customer service.

Key achievements and future plans include:

- **Modernize Driver Z Registration** – The new approach will eliminate the rush to register on a single day, instead sorting eligible customers into groups and inviting them to a multi-day registration window.
- **Independent Liability Appeal Process** – Moving from a paper system to an electronic power application-based claims appeal process will reduce the back log and turnaround time for decisions.
- **Adjudication Letter Modernization**– The new application allows adjusters to easily retrieve proper updated denials with easier uploading and automatic documentation in the claims file.
- **Improved Road Test Availability** – Work continues to ensure that timely access to road test are available across Manitoba ensuring minimal wait times no matter where you reside in Manitoba.
- **New Customer Service Training** – Ensuring Manitobans receive excellent customer service through all facets of their interaction with MPI is a top priority. Enhanced training will be designed to support MPI staff through their various interactions with Manitobans.
- **Facilities Utilization** – MPI is under-going a space utilization assessment to ensure that space and resources are effectively and efficiently utilized across Winnipeg MPI Services Centres.

In 2026/27, MPI will continue implementing operational improvements that increase efficiency, enhance service delivery, and improve customer experiences.

3.1.2 Product & Customer Experience (CX) Insights

Delivering relevant, accessible, and high-value products remains a core focus for MPI. Over the next several years, we will modernize regulations, policies, and product offerings based on customer insights and industry standards.

Planned product and customer experience initiatives include:

- **Expanding the Driver Safety Rating Scale** – In 2026/27, the Driver Safety Rating scale will expand from +19 to +20, moving all Driver Safety Rating discounts one-third of the way toward actuarial targets. This ensures safer drivers are rewarded appropriately.
- **Basic Deductible Adjustment -** In 2026/27 MPI will increase deductible values that apply to Basic Autopac. Passenger vehicle deductibles will increase from $750 to $1,000, commercial vehicle deductibles will increase from $1,200 to $1,500 and trailer and motorcycle deductibles will increase from $225 to $300. This will allow MPI to offer a more affordable Basic product for the customer choosing to purchase Basic coverage only.
- **Extension Deductible Changes –** In 2026/27 MPI will introduce a new $750 Extension Deductible level providing more customer choice and flexibility for customers in selecting their coverage.

  MPI will also decommission the $200 Standard level combining it with the $200 Plus level as a new single $200 level, reflecting strong customer preferences for more comprehensive coverage. Very few customers chose the $200 Standard deductible, while the vast majority opted for the $200 Plus deductible.
- **Extension Deductible Glass Repair Waiver -** To help promote a ‘repair first’ policy, in 2026/2027 MPI will introduce a Glass Repair Deductible Waiver to all levels of Extension Deductibles**.** This will see more Extension customers benefit from free glass repairs, and encourage customers to repair minor windshield damage. If left unrepaired, this minor glass damage can worsen leading to the full and costly replacement of the windshield.
- **Decommissioning $7M & $10M Third Party Liability Products –** Beginning in 2025/26 and continuing to 2029-2030, MPI will decommission the $7M and $10M Third Partly Liability personal products to maintain a modern offering aligned with industry and appropriate coverage**.** MPI’s research indicates that these higher coverage limits are not a standard offering for any other personal auto insurer, and customers can maintain adequate coverage while saving on insurance costs with lower liability limits.

To ensure we continue to understand needs and wants of customers, MPI is embedding real-time customer feedback mechanisms into its operations. Recent enhancements include:

- **Ongoing post-transaction satisfaction surveys** – Ensuring we capture customer perspectives on extension products to refine offerings.
- **Customer Experience and Operations Report -** Implementation of Customer Experience metrics to align with Strategic Key Performance Indicators, integrating the voice of customer into overall performance management.
- **Customer Feedback Driven Project Design and Delivery -** Making sure customer needs and feedback shape our projects from start to finish

3.1.3 People and Culture

At the heart of MPI's success is its people who serve Manitobans every day. Supporting our people throughout their employee journey is essential to ensuring that MPI can execute its strategic plan effectively. In 2026/27, MPI is focused on growing our leadership capability, continuing to build trust, inclusivity, and belonging by embedding our values into our ways of working.

Culture

A key corporate priority for 2026/27 is embedding MPI's refreshed values into everything we do – how we work and how we show up for ***Our People, Our Customers*** *and* ***Our Partners.*** Empowering employees and leaders to be accountable, collaborative, and transparent in delivering on MPI's mission. This means:

- Clarifying roles and responsibilities so leaders and employees understand their impact on organizational success.
- Collecting insights to inform and strengthen leadership capabilities creating united, collaborative and cohesive teams.
- Building organizational efficiency through visibility, transparency and access to the information, tools and processes required to enable work.
- Fostering a sense of belonging through organizational activities that strengthen relationships among employees and create a positive workplace culture.

MPI recognizes that a strong culture is built over time. To support this, we are introducing structured initiatives to improve decision-making, enhance leadership maturity, and reinforce collaboration across all levels of the organization.

Inclusion, Diversity, Equity and Accessibility

As a Crown corporation serving all Manitobans, MPI is committed to Inclusion, Diversity, Equity, and Accessibility (IDEA). This commitment strengthens public trust, builds engagement and pride in our workforce, improves customer experience, and fulfills our social contract with the communities we serve. This means:

- Refreshing MPI's hiring and onboarding standards to reduce barriers, widen outreach, and ensure new employees connect early to our mission, culture, and values.
- Enhancing education and training in alignment with MPI's dates of honour, pairing plain-language education, leader discussion guides, and inclusive participation options for learning series and speaker spotlights across locations and shifts.
- Leveraging IDEA pulse survey demographics and outputs to inform future Employee Resource Groups (ERG)'s and long-term IDEA initiatives.

- Building a sustainable multi-year IDEA strategic plan informed by data analysis and employee feedback. Extending the ERG framework beyond the pilot to stand up two new ERGs.

- Advancing Accessibility by executing the next wave of actions from MPI's Multi-Year Accessibility Plan and public consultations.

- Integrating IDEA into Customer Service practices and scripts.

Advancing IDEA positions us to better reflect Manitoba's diversity, make data-informed decisions, and remove barriers so employees and customers can fully participate in our services.

Commitment to Truth and Reconciliation

MPI remains committed to advancing Truth and Reconciliation through meaningful actions that recognize the rights, culture, and contributions of Indigenous communities. This means:

- Strengthening relationships with Indigenous communities through sustained engagement and partnership building.

- Integrating reconciliation commitments into policies, training, and corporate decision-making.

- Removing barriers to access in road safety education and driver training for Indigenous Peoples in Manitobans.

These efforts are part of MPI's broader commitment to building an inclusive and respectful workplace, ensuring that reconciliation is embedded in our culture and operations.

Supporting Workforce Planning and Future Readiness

MPI is advancing its workforce of the future initiative through Workforce and Capacity Planning. This includes identifying critical roles, assessing talent supply and demand, and conducting gap analyses to develop actionable strategies that ensure the organization has the right skills and capabilities to meet future needs.

By investing in employee growth, leadership development, and workforce planning, MPI is creating a more resilient and high-performing organization.

In 2026/27, MPI is reinforcing leadership development, employee engagement, and inclusivity, creating a foundation for long-term success, one where employees are empowered, supported, and driven to deliver value for Manitobans.

3.1.4 Digital and Technology Considerations

Keeping MPI's Technology Reliable While Modernizing with Purpose

MPI's technology ecosystem must be stable and secure to deliver reliable service to Manitobans. At the same time, technology is evolving rapidly, which changes how

customers expect to interact with MPI and how employees need tools to do their work effectively.

In 2026/27, MPI will prioritize renewal and maintenance as the core of modernization. The goal is steady progress by pacing work based on capacity and risk, and following a clear IT roadmap that sequences investments logically and avoids overextending the organization.

Key technology priorities include:

- Service reliability, fewer outages, better system performance, and stronger online service continuity
- Cybersecurity and data protection, improved monitoring, controls, and proactive risk management
- Sustainable platforms, addressing aging systems and technical debt through planned upgrades
- Accessible digital services, improving experiences across web and mobile while keeping other channels available
- Better tools for employees, including improvements to data, workflow, and collaboration capabilities

Roadmap-driven execution
Technology renewal is most effective when it's planned, sequenced, and maintained. MPI will continue building and refining an IT roadmap that is practical and strategic, aligning investment choices with business needs, risk reduction, and the outcomes Manitobans care about.

Long-term outcome
A disciplined approach to renewal and maintenance will create a stronger, more resilient technology foundation. That foundation improves service consistency, supports efficiency, and makes MPI better prepared for future demands.

3.2 External Environment

MPI operates in an external environment influenced by economic conditions, industry trends, regulatory frameworks, and evolving customer expectations. As a public insurer, we remain responsive to these factors while ensuring our decisions align with long-term stability and affordability for Manitobans.

3.2.1 Macro-Economic Conditions

Economic pressures such as inflation, rising repair costs, and changes in customer demand impact MPI's financial outlook. Key trends include:

- **Increased Auto Repair Costs** – Higher parts prices, labor costs, and vehicle values are contributing to higher claim severity.
- **Inflationary Pressures on Insurance Costs** – Health care costs, medical supply expenses, and vehicle-related expenses continue to drive up claim costs.

- **Pandemic-related impacts** on traffic congestion and driving behaviour may not have fully faded. It remains unclear whether residual effects will persist or disappear entirely, creating ongoing unpredictability in accident frequency trends.
- **Population Growth** in Manitoba is expected to slow, with lower levels of immigration anticipated in the coming years. This creates uncertainty around future growth assumptions.
- **Escalating trade tensions** and tariff disputes can have broader macroeconomic impacts, including higher unemployment, inflationary pressures, and interest rate volatility. These factors create medium-term uncertainty for economic stability, influencing consumer behaviour, investment returns and overall insurance cost structures.
- **Increased competitiveness** for commercial insurance in Manitoba is presenting commercial carriers and insurance brokers with new options, further exacerbated by the trucking industry's slowdown in freight volumes. Reduced profit margins in trucking have carriers seeking to challenges, including amanage and lower insurance costs, creating an extremely competitive market.

MPI is proactively addressing these trends through strategic financial management, risk mitigation, and long-term business planning.

3.2.2 Industry Trends and Competitive Landscape

The insurance and automotive industries continue to evolve, impacting MPI's operating environment:

- **Hardened Special Risk Extension (SRE) Market** – Rising liability claims and reinsurance costs for trucking and commercial businesses pose challenges. MPI is implementing comprehensive underwriting changes to ensure long-term sustainability.

- **Business slowdowns** driven by global trade wars are reducing freight volumes and profitability, adding pressure to SRE line of business.

- **Shifts in Auto Repair Industry** – Technological advancements in vehicle manufacturing are increasing repair complexity and costs. MPI is adapting claims processes to align with evolving repair standards.

MPI remains committed to responding to these trends while ensuring our insurance model remains financially sustainable and competitive.

3.2.3 Road Safety

As a public insurer with a road safety mandate, MPI continues investing in initiatives to reduce traffic-related injuries and fatalities. Key priorities include:

- **Launching the Road Safety Strategy 2026-2030** – Implementing a comprehensive new strategy informed by stakeholder perspectives and engagement, ensuring MPI's road safety priorities reflect community needs and expert input.
- **Integrating Road Safety with MPI's Indigenous Action Plan** – Strengthening partnerships with Indigenous communities to address unique road safety challenges.

- **Increasing Transparency Through Data** – Releasing a new public-facing road safety dashboard to provide Manitobans with accessible and timely information on collision trends.
- **Focusing on Top Risk Factors** – Addressing speeding, impaired driving, distraction, and non-use of seatbelts through targeted education, awareness, and enforcement support.

MPI also represents Manitoba at the Canadian Council of Motor Transport Administrators, influencing national discussions and aligning Manitoba's road safety efforts with best practices across jurisdictions.

4.0 Corporate Strategic Priorities for 2026/27

The 2026/27 fiscal year advances focused initiatives under each of the five strategic pillars. Each initiative is tied to measurable outcomes and reflects the operating environment we face.

Pillar 1: Focus on our Customers

Manitobans expect insurance and services that are simple, clear, and reliable. This year we will:

- **Introduce IRP Online and MyMPI services** – For International Registration Plan customers, online services will mean faster turnaround times and reduced in-person wait times. MyMPI services for this customer group will serve as a foundation to build on for Manitobans.
- **Digital First Notice of Loss enhancements** – Develop the solution to increase convenience and enhance existing access for customers to make claims online.
- **AI Summarization** – Plan for leveraging automation in customer interactions to reduces duplication of effort internally and contributes to providing a better overall service to Manitobans.
- **E-Signature Rollout** – Expand the number of transactions that can utilize electronic signatures in order to improve customer and employee experience through transaction times and accuracy.
- **Implement end-to-end claims improvements** – Streamline internal processes to reduce the length of physical damage claims.

Expected Impact: Customers will see faster claims, more convenient digital options, and fewer frustrations in their interactions with MPI.

Pillar 2: Build Engagement and Pride

An engaged workforce is critical to delivering reliable service. This year we will:

- **Advance enterprise workforce planning** – Ensuring commitments are matched to resource capacity.
- **Act on Be Heard survey insights** – Focusing on leadership alignment, decision-making speed, and other key drivers to engagement.
- **Put IDEA and Indigenous Action Plan into practice** – Focusing on embedding commitments into recruitment, training, and employee supports.

Expected Impact: Employees will experience clearer priorities and stronger alignment, which reduces turnover and improves consistency of customer service.

Pillar 3: Deliver on Our Promises

Trust comes from following through. This year MPI will:

- **Prepare for the replacement of the Enterprise Resource Planning (ERP) system** – MPI's ERP will no longer be available by 2030. A new system is required across MPI's various lines

of business to meet the organization's needs and to effectively and efficiently deliver on customer business needs.

- **Upgrade the Bodily Injury platform (Fineos)** –MPI is upgrading the platform to ensure it is using the latest version of the software. The updated solution will enable faster, more accurate claim decisions. This will reduce processing time for complex claims and help improve customer experience.
- **Strengthen performance governance** – Using simplified internal processes, improved planning structures and corporate measures to track quarterly progress resulting in the volume of planned corporate initiatives completed on time.

Expected Impact: Manitobans will see more reliable service, fewer errors, and greater consistency in how MPI delivers on its commitments.

Pillar 4: Strengthen our Financials

Financial stability supports affordability. This year we will:

- **Continue Special Risk Extension rebuild** – Narrowing risk exposures and improving underwriting discipline with improved data.
- **New policy wording** - Modernizing Special Risk Extension insurance documents so coverage is clear, consistent, and aligned with today's needs.
- **Product migration -** Streamlining niche Special Risk Extension products to simplify offerings and ensure coverage focuses on true commercial risks.
- **Enhance financial reporting and analysis –** Delivering more timely insights for decision-making with all business lines reporting on financial performance quarterly.

Expected Impact: Customers benefit from clear and value-oriented products as well as stable, predictable rates, and stakeholders see transparent reporting that shows MPI is managing responsibly.

Pillar 5: Be Ready for What's Ahead

The future of insurance requires resilience and foresight. This year we will:

- **Advance IT roadmap and cybersecurity investments** – Reducing MPI's technical debt and putting long-term sustainment practices in place to support system and platform health.
- **Explore responsible use of automation in service and claims** – Focusing on tools with human oversight and measuring success through pilot projects with clear service outcomes.
- **Defining portal core capability** – Assessing the capabilities Manitobans will most benefit from in an online portal to ensure a consistent and high-quality user experience from end to end.

Expected Impact: Manitobans will see an insurer that is both modernizing for tomorrow and protecting the reliability of today.

5.0 Performance Measures and Targets

To ensure accountability, MPI will track key performance indicators across five dimensions:

Focus Areas	Metric	Baseline	2026/27 Target
Affordability	Average Insurance Premium as a % of Average Income	2.24%	<2.25%
Financial Stability	MCT by LOB within Target 1. MCT – Basic 2. MCT – Extension 3. MCT – SRE	1. 100% 2. 200% 3. 300%	1. 100% 2. 200% 3. 300%
Organizational Effectiveness	1. Employee Engagement Score 2. % Planned Work Complete within Schedule 3. Operating Expense Ratio	1. 71% 2. 57% 3. 22.2%	1. 73% 2. 80% 3. 19.6%
Customer Value	Customer Satisfaction by Major Journey 1. Insurance & Registration 2. Driver Testing 3. Physical Damage Claims 4. Bodily Injury Claims	1. 85% 2. 67% 3. 63% 4. 64%	1. 85% 2. 67% 3. 71% 4. 70%
Corporate Responsibility	Customer Confidence in MPI Mission Delivery	66%	70%

Each Key Performance Indicator (KPI) is anchored to one of five corporate focus areas: Affordability, Financial Stability, Organizational Effectiveness, Customer Value, and Corporate Responsibility. Together, MPI's strategic KPIs act as directional, lagging indicators. They show whether the strategy is delivering the intended impact and outcomes, and they offer a shared definition of success.

September 1, 2026

Strategic KPIs don't move on their own. The levers that influence them sit in operational drivers, like cycle times, service quality, cost drivers, capacity, and customer behaviours. MPI is continuing to mature how it connects strategic KPIs to the operational measures that explain performance. These relationships enable MPI to take action earlier, manage trade-offs, and invest in what will matter most.

KPI performance is captured in a scorecard that brings baselines and annual targets into a single view. Annual targets for the 2026/27 fiscal year were made by assessing baseline and current trajectory, environmental factors as well as in-flight and prospective initiatives that will have an impact on each measure. These annual targets reflect stability and expected incremental progress in key areas, making the strategy tangible, clarifying priorities to organize around, and strengthening decision-making about which corporate initiatives to select and sequence.

Ultimately, strategic KPIs turn strategy into measurable outcomes that employees can rally around. They help MPI celebrate progress, confront gaps, and make informed choices, creating clarity for all employees on how their work contributes to success for Manitobans.

6.0 Risks

Effective risk management is essential to MPI's financial stability, operational effectiveness, and ability to deliver on its mandate. Each year, MPI identifies, assesses, and prioritizes key risks to ensure resources are allocated efficiently and mitigation strategies are in place.

At the beginning of 2026/27, MPI's Executive Risk Management Committee will review and update the organization's top risks, which will be monitored by the Risk Committee of the Board throughout 2026/27. This ensures that risk management remains integrated into corporate decision-making, enabling MPI to navigate challenges while maintaining long-term stability and resilience.

6.0 Capital Reserves

As mandated by Section 18 of the MPIC Act, MPI must maintain capital reserves to ensure its financial stability. These reserves are crucial for covering any unforeseen or unknown events that may affect MPI's insurance operations. In November 2022, an amendment to Section 18 of the MPIC Act introduced legislated capital targets.

To comply with Section 18, MPI created a Capital Management Plan aimed at achieving and maintaining the required capitalization for the Basic line of business. This plan employs the Minimum Capital Test (MCT), a standard developed by the Office of the Superintendent of Financial Institutions (OSFI) to oversee all federally regulated property-and-casualty (P&C) insurers. The MCT evaluates various risks faced by P&C insurers, including:

- Insurance risk
- Market risk
- Credit risk
- Operational risk

Further to this, the Capital Management Plan outlines:

- The criteria and processes for applying for a capital rebate when the MCT ratio surpasses the upper limit.
- The criteria and processes for implementing a capital build when the MCT ratio falls below the target.

7.0 Statement of Operations

(C$ 000s, rounding may affect totals)	*For the Years Ended March 31*		
	2025A	**2026BF**	**2027B**
CORPORATE			
Insurance revenue	1,644,750	1,769,875	1,919,644
Insurance service expenses	(1,573,213)	(1,639,997)	(1,751,315)
Recovered claims from reinsurance contracts	4,252	7,256	9,049
Expenses from reinsurance contracts held	(40,036)	(40,487)	(38,008)
Insurance service result	**35,753**	**96,647**	**139,370**
Net investment income	**290,124**	**145,446**	**147,048**
Finance expenses from insurance contracts issued	(172,675)	(100,252)	(102,087)
Finance income from reinsurance contracts held	5,919	1,517	1,188
Net insurance finance expenses	**(166,756)**	**(98,735)**	**(100,899)**
Net insurance and investment result	**159,121**	**143,358**	**185,519**
Other income	69,700	63,924	77,623
Other operating expenses	(248,623)	(219,234)	(239,574)
Gain (loss) on disposal of property and equipment	115	-	-
Net income from operations	**(19,687)**	**(11,952)**	**23,568**

Note: For additional information on the financials of MPI, please refer to the most recent Annual Report, available at mpi.mb.ca.

7.1 Key Planning Assumptions

Key assumptions for 2026/27 budget include:

- The Basic line of business reflects an overall rate increase of 1.77%, as directed by the PUB in its order December 18, 2025.
- The extension line of business reflects an overall rate increase of 2%.
- The SRE line of business reflects a rate increase of 9.8% for long-haul customers which based on forecasted customer mix (long haul and other) translates to an expected line of business increase of 5.35%
- DVA funding is provided by the Government of Manitoba. MPI has assumed an increase in funding from $40M to $54M for break-even recovery
- Increase of Basic passenger vehicle deductible from $750 to $1,000.
- Increase to DSR discounts by one-third to actuarial indicated percentages.
- IT modernization remains a strategic, multi-year investment to ensure business agility, strengthen data security, improve customer experience through digital services and reduce long-term technology debt and risk.

7.2 Sensitivity Analysis

As MPI matures its Capital Management operations, a key objective is to develop Financial Condition Testing (FCT) reports for its insurance lines of business. The results from the 2025 FCT report for Basic and Extension are presented below.

Basic

The 2025 Basic Financial Condition Testing report indicates that the future financial condition of MPI's Basic line of business is satisfactory, provided that corrective management actions are taken.

According to the FCT standard, there are two types of adverse scenarios: Solvency and Going Concern. For MPI's Basic line of business to be considered "Satisfactory", the following thresholds must be met:

Scenario	Threshold
Base	MCT ≥ 100%
Going Concern	MCT ≥ 38%
Solvency	Statement Value of Assets > Statement Value of Liabilities

September 1, 2026

A Solvency scenario involves testing plausible adverse scenarios at the 99th percentile. The table below details the resulting surplus and the MCT ratio under the various scenarios tested, ranked by the largest change in Basic's equity in the second or third projection year.

Solvency Scenarios	2026/27 Equity	2027/28 Equity	2026/27 MCT Ratio	2027/2028 MCT Ratio	Largest Impact to Equity	Year of Largest Impact
Base Scenario	516,908	577,530	96.1%	97.2%		
Loss Ratio	165,503	51,878	9.9%	-18.5%	-525,653	2027/28
Deterioration of Asset Values w/o Management Action	187,369	551,640	17.9%	89.0%	-329,540	2026/27
Combined	384,302	257,360	61.6%	26.3%	-320,171	2027/28
Liability for Incurred Claims w/o Management Action	396,726	381,153	65.1%	51.2%	-196,378	2027/28
Inflation	386,973	419,733	63.4%	61.3%	-157,797	2027/28
Catastrophe (1 in 100) w/o Management Action	464,490	523,732	81.9%	84.5%	-53,798	2027/28
Cyber w/o Management Action	495,673	555,849	90.6%	92.0%	-21,681	2027/28
Interest Rate Decrease w/o Management Action	706,426	623,965	135.2%	108.5%	46,435	2027/28

A Going Concern scenario involves testing plausible adverse scenarios at the 90th percentile. The chart below outlines the scenarios examined and their outcomes for the Basic line of business:

Going Concern	2026/27 Equity	2027/28 Equity	2026/27 MCT Ratio	2027/2028 MCT Ratio	Largest Impact to MCT Ratio	Year of Largest Impact
Base Scenario	516,908	577,530	96.1%	97.2%		
Loss Ratio	323,070	322,959	46.3%	38.1%	-59.1%	2027/28
Deterioration of Asset Values w/o Management Action	306,033	562,649	47.5%	91.7%	-48.7%	2026/27
Combined w/o Management Action	494,595	418,368	88.3%	63.8%	-33.3%	2027/28
Liability for Incurred Claims w/o Management Action	450,668	469,295	78.8%	71.4%	-25.8%	2027/28
Inflation w/o Management Action	496,053	581,686	90.7%	97.7%	-5.4%	2026/27
Interest Rate Decrease w/o Management Action	606,667	599,016	115.4%	102.7%	5.5%	2027/28

The full analysis can be found in the 2025 Basic FCT report.

Extension

The 2025 Extension Financial Condition Testing report indicates that the future financial condition of MPI's Extension line of business is satisfactory, provided that corrective management actions are taken.

The thresholds for Extension are different from the Basic line of business and are outlined below:

Scenario	Threshold
Base	MCT ≥ 200%
Going Concern	MCT ≥ 100%
Solvency	Statement Value of Assets > Statement Value of Liabilities

A Solvency scenario involves testing plausible adverse scenarios at the 99th percentile. The table below details the resulting surplus and the MCT ratio under the various scenarios tested, ranked by the largest change in Extension's equity in the second or third projection year.

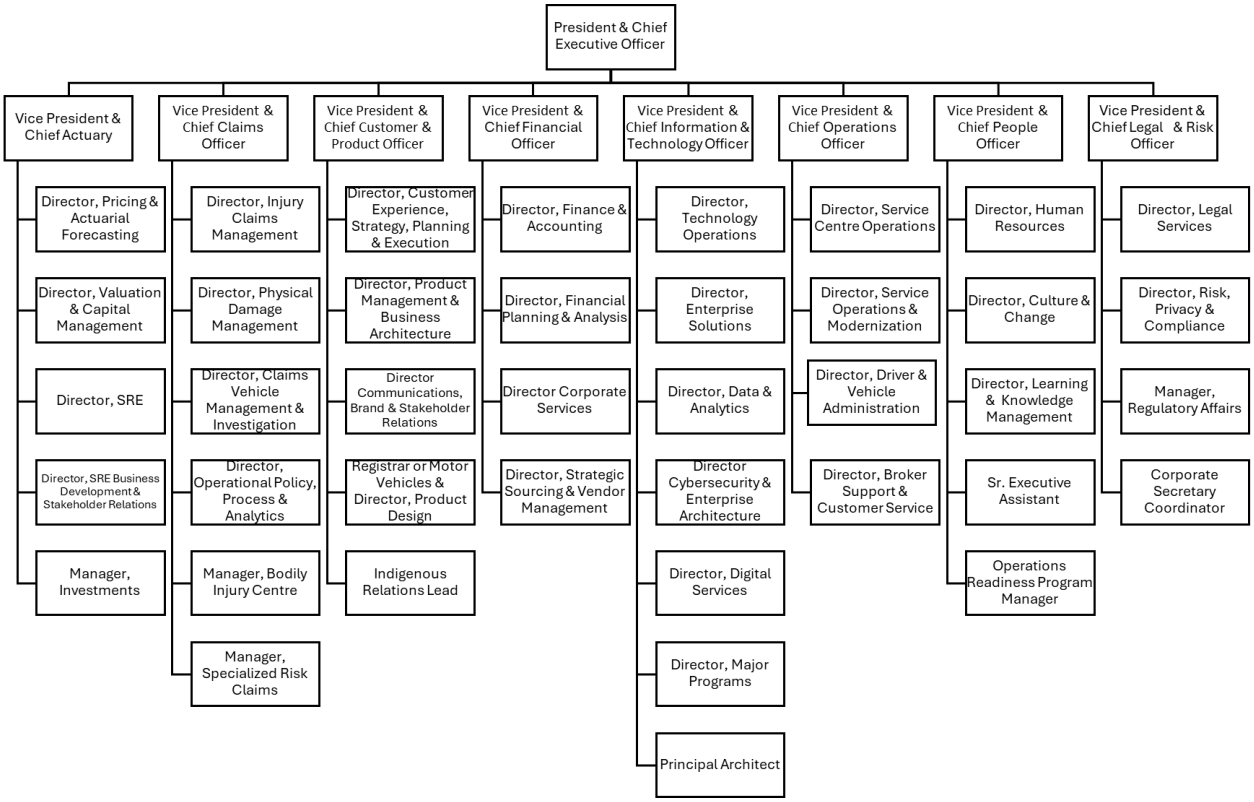
Solvency Scenarios	2026/27 Equity	2027/28 Equity	2026/27 MCT Ratio	2027/2028 MCT Ratio	Largest Impact to Equity	Year of Largest Impact
Base Scenario	100,099	108,528	203.2%	203.9%		
Loss Ratio	65,436	57,007	114.6%	87.1%	-51,521	2027/28
Deterioration of Asset Values w/o Management Action	58,648	108,667	124.3%	195.9%	-41,451	2026/27
Combined	92,726	69,946	181.8%	126.9%	-38,583	2027/28
Cyber w/o Management Action	79,045	87,043	153.4%	157.9%	-21,485	2027/28
Liability for Incurred Claims w/o Management Action	94,706	93,371	190.5%	170.5%	-15,158	2027/28

A Going Concern scenario involves testing plausible adverse scenarios at the 90th percentile. The chart below outlines the scenarios examined and their outcomes for the Extension line of business:

Going Concern	2026/27 Equity	2027/28 Equity	2026/27 MCT Ratio	2027/2028 MCT Ratio	Largest Impact to MCT Ratio	Year of Largest Impact
Base Scenario	100,099	108,528	203.2%	203.9%		
Loss Ratio w/o Management Action	80,994	78,877	153.3%	136.9%	-67.0%	2027/28
Combined w/o Management Action	97,990	78,171	193.5%	146.4%	-57.5%	2027/28
Deterioration of Asset Values w/o Management Action	72,838	108,684	153.4%	196.4%	-49.8%	2026/27
Liability for Incurred Claims w/o Management Action	97,126	100,174	196.2%	185.5%	-18.4%	2027/28

The full analysis can be found in the 2025 Extension FCT report.

8.0 Human Resources



MPI employees work from offices and service centres in 12 communities across Manitoba: Arborg, Beausejour, Brandon, Dauphin, Portage la Prairie, Selkirk, Steinbach, Swan River, the Pas, Thompson, Winkler and Winnipeg.

8.1 Full-Time Employees

Normal Ops		
	Budget 2025/26	Budget 2026/27
Senior Management	40.00	40.00
Management	102.00	102.00
Employees	1885.75	1885.75
Total	2027.75	2027.75
Specialty Program	11.00	11.00
Total	2038.75	2038.75
Improvement Initiatives		
	Budget 2025/26	Budget 2026/27
Senior Management	1.24	1.00
Management	5.47	1.00
Employees	43.29	48.00
Total	50.00	50.00
Total Corporate	2088.75	2088.75

8.2 Organizational Chart

The organizational chart shows senior roles organized across eight divisions to best realize our corporate priorities.

September 1, 2026

9.0 Corporate Project Funding Summary

The Corporate Project Funding Summary encompasses all expenditures related to projects, whether or not they qualify for capitalization, and includes both tangible and intangible assets. The Corporation does not debt finance any of its project initiatives. All of MPI's projects will be financed through cash generated from operations to the extent the projects relate to the Corporation's Basic, Extension, SRE and DVA lines of business.

($000's)	LTD Forecasted Spend to March 31 2026	Proposed Budget 2026/27	Remaining forecasted spend for future years	Total Forecast to FY2030/31
Major Programs	21,557	**25,646**	111,116	158,319
A "Major Program" is defined as a technology initiative exceeding $3M, aligned to the Integrated Corporate Portfolio, selected for its significant impact on business operations and customer/partner experience, and characterized by higher enterprise risk and complexity. Delivery is overseen through executive sponsorship and structured governance to ensure value, schedule, and budget discipline.				
Ongoing Costs	28,902	**26,238**	98,020	153,160
Ongoing Costs include carry forward contracted cloud subscription expenses for licensing, application maintenance and support.				
Corporate Project Funding	9,000	**5,000**	20,000	34,000
Implement projects that focus on growing and transforming MPI				
Sub-Total IT Projects	59,459	**56,884**	229,136	345,479
Administrative Capital^	21,303	**7,405**	44,751	73,459
Investment Capital	578	**1,952**	-	2,530
Grand Total	81,340	**66,241**	273,887	421,468

^Includes Cityplace Space Plan initiative, Cityplace Tenant Fit-ups and other building location projects.

Public Utilities Board

Public Notice

You're Invited

to share your views about the rate application filed by Manitoba Public Insurance

The Manitoba Public Insurance Corporation (MPI) has filed the 2027 General Rate Application before the Public Utilities Board (Board) for approval of Basic Autopac vehicle insurance rates and premiums effective on April 1, 2027 through March 31, 2028.

For further details, please contact MPI at **inquiries@mpi.mb.ca** or visit the Board's website at **www.pubmanitoba.ca.**

A public hearing on the proposed rate application will be held beginning:
Tuesday, October 13, 2026 at 9 a.m.
Please view the hearing via the PUB website link.

If you are interested in learning more about this rate application, you are encouraged to attend the hearing, observe the hearing via live streaming, or provide your perspectives through the Board's online comment tool.

If you wish to speak at the hearing or make a written submission, please contact the Associate Secretary, Ms. Jennifer Dubois at 204-945-2638 or toll free 1-866-854-3698, no later than **September 1, 2026.**

For more information, visit **www.pubmanitoba.ca.**

MP.2 Public Invitation (French version)

Public Utilities Board

Régie des services publics

Avis public

Vous êtes invités

à nous faire part de votre point de vue sur la demande de taux déposée par la Société d'assurance publique du Manitoba

La Société d'assurance publique du Manitoba (SAPM) a demandé à la Régie des services (la Régie) d'appliquer les taux généraux de 2027 en vue de l'approbation des taux et des primes de l'assurance automobile Autopac du 1er avril 2027 au 31 mars 2028.

Pour en savoir plus, communiquez avec la SAPM à **inquiries@mpi.mb.ca** ou consultez le site Web de la Régie au **www.pubmanitoba.ca.**

Une audience publique sur la demande de taux proposés aura lieu à compter du :

mardi 13 octobre 2026 à 9 h

Veuillez consulter l'audience sur le site Web de la Régie.

Si vous souhaitez en savoir plus sur cette demande de taux, nous vous encourageons à assister à l'audience, à la suivre en direct ou à nous faire part de votre point de vue au moyen de l'outil de commentaires en ligne de la Régie.

Si vous souhaitez prendre la parole durant l'audience ou présenter des observations écrites, communiquez avec Jennifer Dubois, secrétaire associée, au 204-945-2638 ou au numéro sans frais 1-866-854-3698, au plus tard le **1er septembre 2026.**

MP.3 Public Notice of Hearing (English version)

Public Utilities Board

Notice of Public Hearing and Pre-Hearing Conference

Applicant: Manitoba Public Insurance Corporation

HEARING:

The Public Utilities Board (Board) anticipates holding a public hearing of an application from The Manitoba Public Insurance Corporation (MPI) for approval of rates and premiums for compulsory vehicle and driver insurance effective April 1st, 2027 through March 31st, 2028. The electronic virtual hearing will be available for viewing via the PUB website link. The Public hearing will be commencing Tuesday, October 13, 2026 at 9:00 a.m.. A Pre-Hearing Conference will be convened by the Board at 9:00 a.m. on Thursday July 2nd, 2026.

RATE IMPACT:

MPI applied for a 2.38% rate increase calculated in accordance with Accepted Actuarial Practice for the Basic Autopac vehicle insurance rates and premiums effective April 1st, 2027, until March 31st, 2028.

The final rate may vary from the submitted application which will be subject to testing at the public hearing and later confirmed through an Order of the Board.

PRE-HEARING CONFERENCE:

Those seeking Intervener status should notify the Board of their intention, by applying to the Associate Secretary until June 30th, 2026. Interveners may be entitled to financial assistance. The Board's Rules of Practice and Procedure provide the related guidelines, which can be viewed on the Board's website: www.pubmanitoba.ca or obtained on request to the Board, by either emailing (publicutilities@gov.mb.ca), writing or calling the Associate Secretary (204-945-2638 or 1-866-854-3698, toll free). Parties wishing to submit a brief or express comments at the hearing should contact the Board through its online comment tool.

GENERAL INFORMATION:

Interested parties should take note that the Board does not have jurisdiction over MPI lines of business known as Extension or Special Risk Extension (commercial trucking), or over MPI's Driver & Vehicle Licensing operations.

Persons seeking further information as to MPI's application, or with respect to the Board's process, and/or wishing to address the public hearing in French should notify the Associate Secretary by September 1st, 2026. As well, interested parties may examine MPI's application and supporting materials, either on the MPI website, or in the Board's office.

The Manitoba Ombudsman has issued privacy guidelines for administrative tribunals. The Board is mindful of its obligations under those guidelines. Decisions made by the Board in respect of the application being considered will be sensitive to the guidelines. Personal information will not be disclosed unless it is appropriate and necessary to do so. However, the Board advises participants that these proceedings are public and that as a result, the protection of personal information is reduced.

MP.4 Public Notice of Hearing (French Version)

Public Utilities Board

Régie des services publics

Avis d'audience publique et de conférence préparatoire

Demanderesse : Société d'assurance publique du Manitoba

AUDIENCE :

La Régie des services publics (Régie) prévoit tenir une audience publique concernant une demande de la Société d'assurance publique du Manitoba (SAPM) visant l'approbation des taux et des primes de l'assurance obligatoire des véhicules et des conducteurs, pour la période du 1er avril 2027 au 31 mars 2028. L'audience virtuelle pourra être visionnée à partir du lien du site Web de la Régie. L'audience publique commencera le mardi 13 octobre 2026, à 9 h. Une conférence virtuelle préalable à l'audience sera convoquée par la Régie à 9 h le jeudi 2 juillet 2026.

INCIDENCE SUR LE TAUX :

La Société d'assurance publique du Manitoba demande l'approbation d'une hausse de taux de 2,38 %, calculée conformément à la pratique actuarielle reconnue pour les taux et les primes d'assurance Autopac de base pour les véhicules, du 1er avril 2027 au 31 mars 2028.

Le taux définitif peut être différent de la demande soumise, qui fera l'objet d'un test lors de l'audience publique, avant d'être confirmée ultérieurement par une ordonnance de la Régie.

CONFÉRENCE PRÉPARATOIRE :

Les personnes qui souhaitent obtenir le statut d'intervenant doivent informer la Régie de leur intention en présentant une demande à la secrétaire associée au plus tard le 30 juin 2026. Les intervenants peuvent avoir droit à une aide financière. Les règles de pratique et de procédure de la Régie font état des lignes directrices connexes, qui peuvent être consultées sur le site Web de la Régie au www.pubmanitoba.ca ou obtenues sur demande auprès de la Régie, par courriel (publicutilities@gov.mb.ca), par écrit ou par téléphone auprès de la secrétaire associée (204-945-2638 ou 1-866-854-3698, sans frais).

Les parties qui souhaitent présenter un mémoire ou exprimer des commentaires à l'audience doivent communiquer avec la Régie au moyen de son outil de commentaires en ligne.

RENSEIGNEMENTS GÉNÉRAUX :

Les parties intéressées doivent prendre note que la Régie n'a pas compétence sur les secteurs d'activité de la Société connus sous le nom d'extensions de garantie ou de services de garanties supplémentaires pour risques spéciaux (camionnage) ni sur les opérations de la Société en matière de permis de conduire et d'immatriculation des véhicules.

Les personnes qui souhaitent obtenir de plus amples renseignements sur la demande de la SAPM ou le processus de la Régie, et/ou qui souhaitent participer à l'audience publique en français, doivent en informer le secrétaire de la Régie d'ici le 1er septembre 2026. De plus, les parties intéressées peuvent examiner la demande de la SAPM et les documents à l'appui, soit sur le site Web de la SAPM, soit au bureau de la Régie.

Le Bureau de l'ombudsman du Manitoba a publié des directives sur la protection de la vie privée à l'intention des tribunaux administratifs. La Régie est consciente de ses obligations en vertu de ces directives. Les décisions prises par la Régie à l'égard de la demande à l'étude tiendront compte de ces directives. Les renseignements personnels ne seront pas communiqués, sauf s'il est approprié et nécessaire de le faire. Toutefois, la Régie informe les participants que les procédures annoncées dans la présente sont publiques et que, par conséquent, la protection des renseignements personnels est réduite.

Téléc. : 204 942-1133

Most supplemental filings identified in *Section OV.7* of the *Overview Chapter* have now been completed. Since the filing of the Application, MPI has filed the Performance Attribution Report (MPI Exhibit #6), the Compensation Report and Risk Appetite Statement materials (MPI Exhibit #7), Supporting Evidence for Recovery of Initiative-Related Expenses (MPI Exhibits #16 and #17), and the Claims Forecasting Coverage Breakdown as an appendix to CC (MPI) 1-47. In addition, the revised version of the Risk Appetite Statement and Blacklined Risk Appetite Statement were filed as MPI Exhibit #12.

The following supplemental filings remain outstanding:

- Annual Business Plan (SFR Appendix 3) – anticipated August 2026
- Asset Liability Management Chapter – anticipated August 2026
- Gartner IT Benchmarking Report (IT Attachment A) – anticipated August 2026
- FCT Report – anticipated September 2026
- Quarterly Financial Statements (SFR Appendix 2) – anticipated early October 2026
- Annual Report (SFR Appendix 1) – anticipated early October 2026

Yours truly,

Steve Scarfone
Senior Regulatory Counsel

Round 1 Information Requests

August 6, 2026

Public Utilities Board (PUB)

MANITOBA
PUBLIC INSURANCE

PUB (MPI) 1-1

Part and Chapter:		**Page No.:**	
PUB Approved Issue No:	**1. Requested vehicle rate and any changes to other fees and discounts** **4. Financial forecast** **5. Updates to the Corporate Strategic Plan and the development/implementation and alignment of KPIs** **7. Capital Management Plan** **9. Cost of operations and cost containment measures** **14. Update on Asset Liability Management Study** **16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA** **18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap (including Major Programs)**		
Topic:			
Sub Topic:			

Preamble to IR (If Any):

In responding to this interrogatory last GRA, MPI provided duplicate pages of redacted minutes. Please only provide one set for each meeting.

Question:

Please file the Corporation's Board of Directors, Investment Committee and Audit Committee meeting minutes (as applicable) relating to:

i. Approval of the 2027 GRA
ii. Budget Approvals
iii. Asset Liability Management/Investment Strategy
iv. IT Optimization/Project Nova/BTO Projects
v. IT Project Impairment(s)
vi. RSR or Total Equity Targets/FCT
vii. All major contracts and their impact on operational costs

viii. Approval of Extension Profit Margin for 2027/28
ix. Extension Transfer of Retained Earnings
x. Enterprise Risk Management
xi. DSR Changes
xii. Material Consultant Contract Matters
xiii. Asset Liability Matching Study and Implementation
xiv. E&Y Organizational Review responses
xv. Changes to the Integrated Cost Allocation Methodology
xvi. Onerous Contracts
xvii. OCIO /WTW contract matters

Rationale for Question:

To understand Corporate decisions that affect Basic.

RESPONSE:

Where they exist, MPI provides a redacted excerpt of the responsive Board of Directors (Board) and Board Committee minutes. Minutes provided cover the period August 2025 to June 2026 to ensure the Public Utilities Board receives minutes for the period since its last request. Please note that items contained in the minutes that are not responsive (relevant) to the request were not provided. Minutes in draft (i.e., those that have yet to be approved by the Board/Committee were not included as they may be subject to material changes before they are approved). In some cases, the same minute may apply to multiple items.

Board/Committee minutes are grouped together and provided as *Appendix 1 - Confidential*

Responsive Investment Committee (IC), Technology Committee (TC) and Risk Committee (RC) minutes of the Board are included in the response.

I. **Approval of the 2027 GRA –** see *Appendix 1 - Confidential* for a redacted version of the following responsive minutes:

Board – March 25, 2026

Board - May 27, 2026

II. **Budget Approvals –** see *Appendix 1 - Confidential* for a redacted version of the following responsive minutes:

Board – March 25, 2026

III. **Asset Liability Management/Investment Strategy –** see *Appendix 1 - Confidential* for a redacted version of the following responsive minutes:

IC – March 17, 2026

Board – March 31, 2026

IV. **IT Optimization/Project Nova/BTO Projects -** see *Appendix 1 - Confidential* for a redacted version of the following responsive minutes:

TC – August 6, 2025

Board – August 13, 2025

AFC – September 17, 2025

Board – September 24, 2025

TC – September 24, 2025

TC – December 10, 2025

TC – January 28, 2026

Board – February 13, 2026

TC – March 17, 2026

V. **IT Project Impairment**

There are no minutes responsive to this request between August 2025 to June 2026.

VI. **RSR or Total Equity Targets/FCT -** see *Appendix 1 - Confidential* for a redacted version of the following responsive minutes:

AFC – September 17, 2025

Board – May 27, 2026

VII. **All major contracts and their impact on operational costs -** see *Appendix 1 - Confidential* for the following responsive minutes:

IC – August 6, 2025

TC – August 6, 2025

Board – August 13, 2025

AFC – September 17, 2025

TC – October 28, 2025

IC – November 12, 2025

Board – November 12, 2025

TC – December 10, 2025

Board – December 17, 2025

Board – February 13, 2026

TC – January 28, 2026

TC - March 17, 2026

Board – March 25, 2026

Board – May 27, 2026

VIII. **Approval of Extension Profit Margin for 2027/28**

Please note that the Board is not currently expecting to approve Extension pricing changes for the 2027/28 insurance year until November 19, 2026.

IX. **Extension Transfer of Retained Earnings**

Please refer to the May 27, 2026, Board of Directors Meeting Minutes provided within *Appendix 1 - Confidential*

Please note that the approval of this item is related to the 5-year financial forecast, which includes the automatic transfer of excess Extension capital to Basic at fiscal year end.

X. **Enterprise Risk Management -** see *Appendix 1 - Confidential* for a redacted version and of the following responsive minutes:

RC – September 17, 2025

RC –December 10, 2025

Board – December 17, 2025

RC – March 18, 2026

Board – March 25, 2026

XI. **DSR Changes**

Please refer to the May 27, 2026 Board of Directors Meeting Minutes provided within *Appendix 1 - Confidential.*

XII. **Material Consultant Contract Matters**

Please refer to MPI's response to VII.

XIII. **Asset Liability Matching Study and Implementation**

Please note that the according to the Workplan, MPI is not currently expecting to present an ALM update until the August 12, 2026, Investment Committee meeting. Please refer to the response in III for other references to ALM.

XIV. **E&Y Organizational Review responses**

There are no minutes responsive to this request between August 2025 to June 2026.

XV. **Changes to the Integrated Cost Allocation Methodology**

There are no minutes responsive to this request between August 2025 to June 2026.

XVI. **Onerous Contracts**

There are no minutes responsive to this request between August 2025 to June 2026.

XVII. **OCIO/WTW Contract matters -** see *Appendix 1 – Confidential* for the following responsive minutes:

IC – August 6, 2026

Board – August 13, 2025

IC – November 12, 2025

IC – March 17, 2026

Outsource Investment Function (hybrid model), Vendor Selection and Resultant Amendments to Investment Committee Terms of Reference and Investment Policies Manual

C. Low presented Agenda Item 3.1, Outsource Investment Function (Non-Discretionary OCIO Model), Vendor Selection and Resultant Amendments to Investment Committee Terms of Reference and Investment Policies Manual.

Take Away #I25-0806-01 – Revise the Outsource Investment Function business case to reflect the feedback provided by the Members.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that the Members recommend that the Board of Directors:

1. approve and authorize Management to take all actions necessary to implement the Non-Discretionary Outsourced Chief Investment Officer (OCIO) Model business case, whereby the management of investments is performed by an external and an internal team;

2. authorize Management to finalize a contract with Willis Towers Watson, the top ranked vendor to the Invitational Request for Proposal for Investment Management Services, incorporating:

    a. an initial term of 5 years;

    b. the cost of the initial term at $2,377,650 plus the cost of any additional services which Management deems necessary, and which are beyond the following scope and deliverables:

        i. 2 strategic asset allocation studies for each of the 5 investment pools (i.e., 10

Board of Directors - Committee Meeting

studies in total), plus efficient frontier modeling;

ii. 1 manager search per year;

iii. 5 in-person travel costs per year;

c. subject to further approval of the Board of Directors, the option to renew for an additional 5 years, the cost of which would be subject to future negotiation should Management recommend renewal;

3. approve the proposed revisions to the Investment Committee Terms of Reference to give effect to the outsourcing of the Investment Function per the Non-Discretionary OCIO Model; and

4. approve the proposed revisions to the Investment Policies Manual to give effect to the new non-discretionary OCIO investment function.

Take Away #I25-0806-02 – Inform the Members if there are any material deviations in the service levels that Management negotiates with Willis Towers Watson in finalizing a contract for Outsourced Investment Function Services.

Major Programs Governance and Risk Advisory Services RFP

C. Muir presented Agenda Item 2.1 Major Programs Governance and Risk Advisory Services RFP.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that that the Members approve and authorize Management to finalize and issue the Major Programs Governance and Risk Advisory Services Request for Proposal subject to the changes identified during the meeting, which at a high level, include the following:

1. Ensure the Scope of Work in Appendix B.3 provides more context and clarity on Major Programs

2. Provide more detail in the Proposed Reporting Structure found in Appendix B.3.1

3. Create clear assumptions to ensure proposals from Vendors are easy to compare and request that Vendors use their rate card to provide costing for sample services

4. Clarify that the Technology Committee is “of the Board of Directors” when used in the RFP

The RFP may be further updated following its approval to correct any non-substantive typographical or grammatical errors.

Take Away ##T25-1028-01 - provide to the Technology Committee the final version of the Major Programs Governance and Risk Advisory Services Request for Proposal after it is released, for Information.

W. Koos presented Agenda Item 3.1 Red River College Equipment Donation.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that the Members approve the donation of surplus and non-essential collision repair equipment from the Physical Damage Centre (PDC) with a combined value of ~$1 million to Red River College (RRC).

[redacted]

[redacted]

25-322 **Parking Lot #1 RFP**

J. Pinkerton presented Agenda Item 3.2 Parking Lot #1 RFP.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that the Members authorize Management to proceed to advance the Lot 1 Structural and Security Upgrades Plan by:

1. Hiring a consultant, secured through a competitive process, to provide tender design documents and contract administration services for the structural and security upgrades, with anticipated fees of approximately $0.5M;

2. Returning to the Members for approval to release the RFP to hire the general contractor to execute on the upgrades; and

3. increasing the capital project funds by $1.8M to fully execute the structural and security upgrades to Lot 1, taking the total budget to execute the plan to $4.6M

"Lot 1" being the MPI owned parking lot located at 266 Hargrave St.

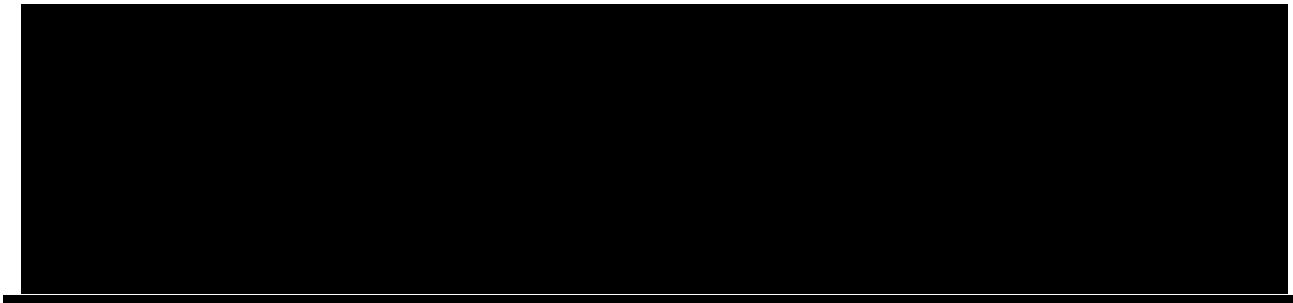
[redacted]

25-323 **Reinsurance Broker Services – Top Ranked Vendor**

C. Ostapowich presented Agenda Item 3.3 Reinsurance Broker Services – Top Ranked Vendor.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that the Members approve the appointment of AON as the provider of Reinsurance Broker Services [redacted]



C. Muir and C. Ostapowich withdrew from the meeting.

26-085 **2027 General Rate Application**

C. Ostapowich and S. Kauk presented Agenda Item 2.2 General Rate Application.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that the Members authorize Management to request approval by the Public Utilities Board (PUB) the following relief in the 2027 General Rate Application:

1. in accordance with accepted actuarial practice, an overall rate increase of 2.38% for compulsory automobile insurance provided through the Basic line of business;

2. in compliance with PUB Order 156/25, Directive 10, movement of all DSR discounts one-half of the way toward their actuarially indicated discounts for each DSR level and then rounded down to the nearest whole number, with base rates adjusted to off-balance these changes;

3. further expansion of the CLEAR rate groups (46 – 50), with maximum upward movement capping of +2;

4. notwithstanding PUB Order 156/25, Directive 7, to include approximately $10.1M of initiative expenses in the 2027 GRA;

5. in compliance with PUB Order 30/26, Review of Directive 7 (Continued Deferral of Integration Costs), to seek recovery of certain *forecasted* initiative expenses, i.e., those initiatives that meet the prudency test in the context of a rate-regulated entity, initiatives that are useful or being used;

6. readvance proposal from last year that the RDA balance (not including $10.1M of initiative expenses sought this year for recovery in rates) are no longer of any value and therefore not recoverable from basic customers,

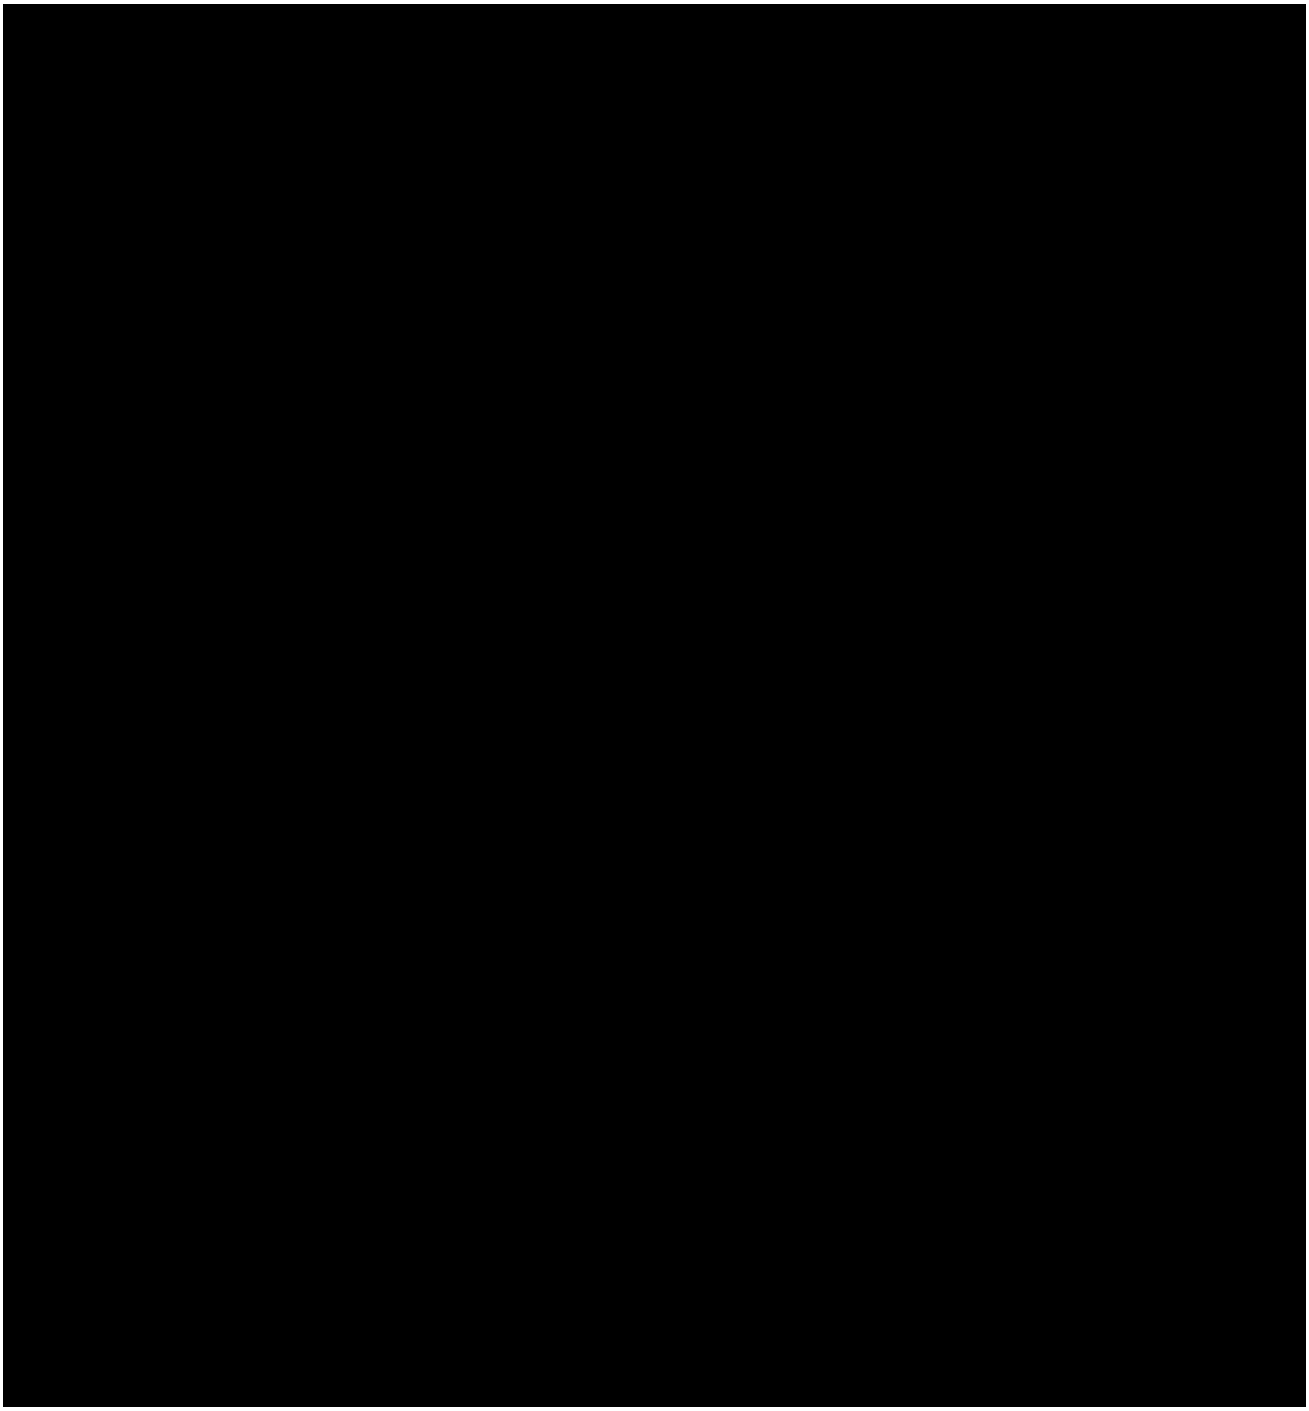
Board of Directors Meeting
MINUTES

Date: May 27, 2026
Page: 7 of 12

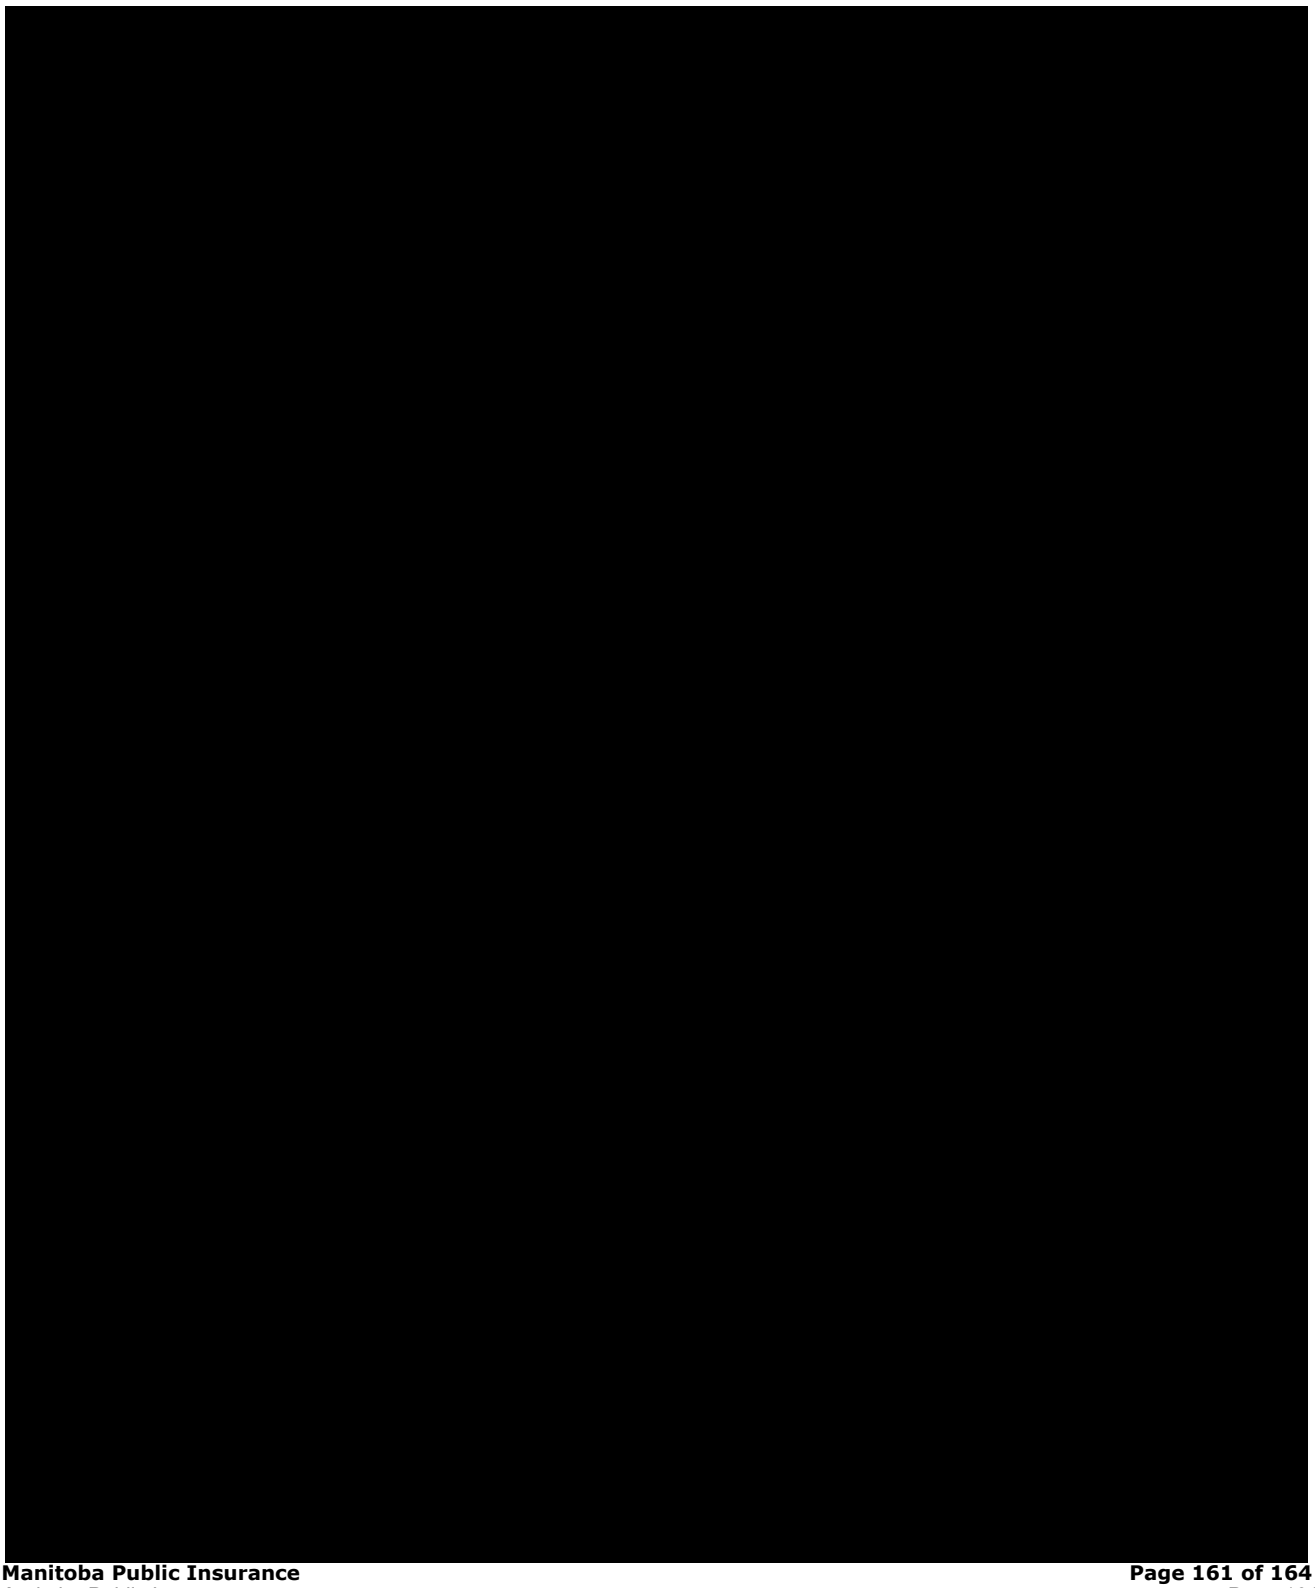
7. as supported by the financial forecast, no capital build or rebate provision because, on March 31, 2026, the balance of the Rate Stabilization Reserve was at a Minimum Capital Test (MCT) ratio of 108% and is projected to remain at or over 100% MCT;

[redacted]

9. no changes to miscellaneous Permits and Certificates;



10. no changes to driver premiums; and



11. no changes to Basic Service and Transaction fees.

Per resolution indexed as 26-117 of the June 24, 2026 Board of Directors meeting, item #8 under resolution of 26-085 of the May 27, 2026 Board of Directors Meeting was rescinded.

PUB (MPI) 1-2

Part and Chapter:	**Part II-COM**	**Page No.:**	**Appendix 3 page 13 of 9**
PUB Approved Issue No:	**1. Requested vehicle rate**		
Topic:	**Affordability**		
Sub Topic:			

Preamble to IR (If Any):

MPI provides average insurance premium as a % of average income from 2015/16 to 2024/25. The slide indicates that it is based on private passenger and light truck, pleasure and all purpose.

Question:

Please provide the average premium for each of private passenger pleasure, private passenger all purpose, light truck pleasure, and light truck all purpose, with weights used for each category, and the weighted average, for each of the last 10 years. Please include average income in the table so the ratio of average premium to average income can be easily determined.

Rationale for Question:

To understand the calculation of the average premium.

RESPONSE:

Please see below for the table containing the average premium breakdown by vehicle type, with corresponding earned units for each vehicle type used in the weighted average calculation, average income, and average premium as a percentage of average income

Figure 1 Calculation of Average Premium used to Calculate Average Premium as a Percentage of Average Income

PUB (MPI) 1-3

Part and Chapter:	**Part III-BAC Basic Autopac Coverage and Benefits**	**Page No.:**	**Section 5**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Safety incentive program**		
Sub Topic:			

Preamble to IR (If Any):

MPI is advancing the development of a safety incentive program for these customers in parallel with planned fleet enhancements. Addressing this gap is a necessary component of addressing cost causation (see 2025 GRA, Part VII RC Appendix 7 – Fleet Rebate Allocation for more detail), ensuring all customer segments are incorporated into a consistent, safety incentive framework. Without this program, the transition to a more self-funded discount and surcharge structure would remain incomplete and result in continued inequities and misalignment between premiums and claims experience for this segment. Accordingly, implementation of this program will be planned in parallel with the fleet changes.

While detailed program design and implementation timelines remain under development, this update is intended to inform the Public Utilities Board (PUB) of the rationale to address the gap in the current safety incentive framework, guiding principles for program development, the work underway, and the next steps towards establishing target implementation timelines for both the fleet enhancements and the safety incentive program.

Question:

Please provide premium and claims experience that is currently available split between DSR eligible, fleet, and the remainder, by Major Class and/or coverage.

Rationale for Question:

To understand what information is currently available on the relative profitability.

RATIONALE FOR REFUSAL:

The information requested is not currently available. As noted in BAC 5.2, MPI is currently enhancing its analytical capabilities to accurately track and report premiums, claims, and exposures across customer program types. This work will enable MPI to accurately establish and report program experience.

MPI does not currently maintain system indicators to segment and report premiums, claims, and exposures splitting DSR-eligible, Fleet, and Corporate Non-Fleet program participants.

PUB (MPI) 1-4

Part and Chapter:	**Part VII – Rate Indication**	**Page No.:**	
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Data Error**		
Sub Topic:			

Preamble to IR (If Any):

RMO – 1 is the figure in the Ratemaking Overview Chapter that projects average premiums for each Major Class and sets out the Balanced Indicated Rate Change for each Major Class.

A reserve imbalance of approximately $10 million was recently identified for certain injury claims whereby reserves were not being reduced properly and a cache-related issue was causing duplicate reserves changes. While BI3 was capturing the reserve changes, the changes were not reflected in the Enterprise Data Warehouse, resulting in an imbalance between BI3 and EDW reporting.

Three claims comprise $8.9 million of the overstatement, with one claim overstated by $6.3 million. The $6.3 million overstated claim was within the last 5 years for bus (Public Major Class), meaning their loss cost was overstated and therefore the allocation to Public was slightly overstated.

These are reserve amounts, not paid amounts.

Although the impact to the 2027 GRA is nominal, perhaps immaterial, MPI notes that the PUB might not share that view so MPI has decided it will file an amended version of RMO – 1 and all documents in support thereof will also be amended, including the rate tables.

More information to follow, including a narrative description of the imbalance. The overall rate indication will not change….there will however be a change to Public of less than 50 points (– 0.42%), from 2.59% to 2.17%, following adjustment to the Major Class incurred amounts with corrected numbers based on the 3 largest claims referenced herein. The

motorcycles will go up 6 basis points (0.06%) while the others (Private Passenger, Commercial and ORV) are without question immaterial, 0.01% change.

Question:

a) Please indicate what controls are in place to catch these sorts of errors.

b) Please indicate how this error was caught.

c) Please indicate if this error affects the data used in the External Actuary valuation. If so, please confirm that the external actuary has determined if the error is not material to his valuation.

d) Please indicate if this error affects any of the analysis or any of the Figures in Part VI – Claims Forecasting.

e) Figure RI-11 refers to Pure Premium from Appendix 2, Table 5. We assume this should refer to Appendix 1, Table 5. Please confirm that the correction of the data error has been applied to Appendix 1, Table 5 and a revised Appendix 1, Table 5 has been provided that ties into the revised Figure RI-11 and the revised Figure RI-14.

f) Part VII – Risk Classification provides the calculation for territorial and insurance use. Please confirm if the error affected these calculations and whether they were revised for the error.

Rationale for Question:

To understand potential impacts of the data error.

RESPONSE:

a) As described in MPI Exhibit #8, filed on July 15, the issue was detected through operational processes. MPI has since implemented a monthly reconciliation process between BI3 and the Enterprise Data Warehouse to address the control gap, and enhanced testing protocols for the uncommon scenarios identified.

b) As described in MPI Exhibit #8, filed on July 15, Claims identified the $10.1 million BI3/Enterprise Data Warehouse imbalance during a routine operational review of a claim in late May 2026. MPI then completed a full reconciliation of all open and closed claims, confirmed the imbalance was limited to $10.1 million, and identified two isolated system issues where reserve changes were recorded correctly in BI3 but not transmitted properly to the Enterprise Data Warehouse.

c) The valuation of Accident Benefits reserves and ultimate loss estimates is based on a paid claims methodology. As paid methodologies rely exclusively on paid claims data, the case reserve imbalance did not affect the resulting reserves or the ultimate loss estimates.

d) As described in MPI Exhibit #8, the imbalance did not impact claims forecasting and therefore had no effect on MPI's overall rate indication. This is because ultimate losses were estimated using a paid-loss methodology, which was not affected by the imbalance.

e) Confirmed. Please refer to MPI Exhibit #8, for all figures that were impacted by this imbalance.

f) Confirmed that the error impacts the Major Class relativities for Major Class 1 and Major Class 3; however as described in MPI Exhibit #8, MPI did not revise its relativities for this imbalance. For ease of reference please see below excerpt from Exhibit #8.

MPI acknowledges that the imbalance also affects the calculation of major class relativities. However, given the relatively small size of the adjustment and the mitigating effect of credibility weighting within the relativity methodology, MPI has not revised the major class relativities presented in Part VII Risk Classification, RC Appendix 4.

PUB (MPI) 1-5

Part and Chapter:	**Part VII – Rate Indication**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**New Money Yield**		
Sub Topic:			

Preamble to IR (If Any):

Figure RI-1 New Money Yield Calculation shows benchmark yields of 4.49% for Provincial bonds, 3.94% for Real Return bonds, 5.42% for Corporate bonds, 4.28% for MUSH bonds, 3.74% for Real Estate, and 5.02% for Commercial Mortgages.

Figure FFI-7 shows 4.56% for 2027/28 for Provincial bonds. Figure FFI-8 shows 5.46% for Corporate bonds. Figure FFI-20 shows 5.90% for Real Estate.

Figure RI-17 shows the indicated rate change with New Money Yield 50 bps higher to be +1.46%, or 0.92% lower than RI-14 (at 2.38%)

Question:

a) Please calculate an alternative New Money Yield based on the FFI values.

b) Please provide an explanation of the difference between the FFI values and the RI-1 values.

c) Given the 0.92% sensitivity to a New Money Yield 50 bps higher, please provide the impact on indicated rate with the alternative New Money Yield.

Rationale for Question:

To understand the impact on the rate indication of alternative investment assumptions.

RESPONSE:

a) Alternative New Money Yield based on the values FFI value contained in the preamble of this IR:

Figure 1 New Money Yield Calculation based on FFI values

Asset Class	IPS Target Weights	Relative Weights	Mar 31 Yield	Mar 31 Duration
Provincial Bonds	35%	35%	4.56%	11.93
Real Return Bonds	4%	4%	3.94%	10.70
Corporate Bonds	28%	28%	5.46%	10.92
MUSH Bonds	18%	18%	4.28%	4.29
Real Estate	10%	10%	5.90%	n/a
Commercial Mortgages	5%	5%	5.02%	2.27
Total	**100%**	**100%**	4.89%	**8.55**
Investment Management Fees			0.16%	
Yield After Fees			4.73%	

b) For ratemaking purposes, MPI continues to believe that a naive interest rate forecast is the best estimate, so the new money yield calculation is based on the returns as of March 31st based on the actual asset duration.

The difference between the values shown in the FFI tables and the values in the RI-1 table are due to some of the FFI assumptions being forward looking rather than naive.

- **Provincial Bonds**: The provincial bond yield used in the new money yield calculation is based on the provincial bond portfolio yield as of March 31, 2026. This yield should not be compared to 2027/28 yield in FFI-7 but rather the yield in 2026/27. In FFI-7, the 2026/27 provincial bond yield is 4.49%, which matches the yield of the provincial bond portfolio in the RI-1 table.

- **Corporate Bonds:** Similarly, the corporate bond yield used in the new money yield calculation is based on the corporate bond portfolio yield as of March 31, 2026, and should not be compared to the 2027/28 yield.

- **Real Estate**, the new money yield calculation uses MPI's real estate benchmark return of 3.74%. MPI's real estate benchmark is the MSCI Quarterly Property Fund Index. The financial forecast model uses a projected return of 5.90% based on WTW's capital market assumptions. This represents WTW's forward-looking assumptions rather than the historical return assumption used in the new money yield calculation.

c) All other assumptions held equal, the alternative New Money Yield results in an indicated rate change of 1.91%, a 0.47% decrease from 2.38%

PUB (MPI) 1-6

Part and Chapter:	**Part VII – Rate Indication**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Initiative Expenses**		
Sub Topic:			

Preamble to IR (If Any):

As noted, in the 2027 GRA, MPI includes an estimate of $10.1M for initiative expenses within Operating Expenses for ratemaking purposes.

Question:

a) Please provide alternative rate indication (RI-14) excluding the $10.1M initiative expenses.

b) Please provide alternative rate indication (RI-14) including all excluded initiative expenses, using amounts in line 30 of PF-1 instead of amounts in line 31 of PF-1.

c) Please provide alternative rate indication (RI-14) including the 2025/26 Regulatory Deferral Account balance (excluding onerous contract and impairment charges) spread over 10 years, instead of the proposed $10.1M of initiative expenses included in the filing.

d) Please discuss the merits of recovering initiative expenses over a future period during which the systems will be in use.

Rationale for Question:

To understand the sensitivity of the rate indication of including various amounts of initiative expenses.

RESPONSE:

a) Please see the figure below for the requested alternative rate indication. Beyond the requested change to initiative expenses, all other assumptions remain fixed.

Figure PUB 1-006-a Rating Year 2027/28 Major Classification Required Rate Changes - Breakeven Rates, excluding initiative Expenses

c) MPI is unable to provide the requested alternative rate indication on the basis proposed. As set out in Part VIII – EXP Appendix 23, Summary of Regulatory Deferral Accounts, the PUB has not previously confirmed what it views to be the dollar amount of the RDA balance or the practice of accounting for it. MPI also explained that the value of the RDA balance is not clear because the expenses excluded from rates were determined by reference to the applicable rating year in each of the last three rate applications, and different dollar amounts or combinations of amounts could be used to estimate a balance, including forecasted amounts excluded from rates, expenses forecasted by fiscal year, actual expenses incurred after the GRA, or combinations of those amounts.

Accordingly, there is no confirmed 2025/26 RDA balance that MPI can reliably use as the basis for an alternative RI-14 scenario spread over 10 years. Preparing such a scenario would require MPI to first select a balance from among several possible approaches, each of which would be dependent on assumptions about what should be included, what period should be used, and whether the measure should reflect forecasted, excluded, or actual expenses. In MPI's view, presenting a rate indication on that basis would imply a level of precision and acceptance of an RDA balance that does not exist.

d) MPI does not see merit in recovering initiative expenses over a future period by continuing or re-establishing the RDA approach. MPI's position on this matter is set out in Appendix 23, which should be read together with Appendix 29 from the 2026 GRA for the detailed history, context, and broader discussion of RDAs and initiative expenses. As filed, MPI is seeking to have the PUB declare RDA amounts to be no longer of any value for rate-setting purposes and to abandon the practice of RDAs. That request is not an accounting impairment or write-off, nor is it a statement that the underlying expenditures provided no value to ratepayers. Rather, it is a request to confirm that existing deferred amounts will not be recovered in future GRAs.

The merits of the proposed approach have already been addressed in Appendix 23. MPI has included $10.1 million of initiative expenses for recovery in the 2027 GRA, as shown in Figure EXP App 23-2, and has chosen not to carry forward excluded initiative expenses into future GRAs. MPI also explained that, where initiative expenses are excluded from recovery through rates, those amounts would be satisfied by monies in the RSR rather than carried forward for future recovery. This approach avoids the need to maintain a separate PUB-specific deferral mechanism for amounts that are not recognized as an asset under IFRS and for which the balance is uncertain.

Accordingly, MPI does not support an alternative recovery model that would amortize an unconfirmed RDA balance over a future period. In MPI's view, that approach would perpetuate the uncertainty and complexity identified in Appendix 23, require assumptions about a balance that have not been confirmed, and continue a rate-setting practice that MPI has specifically requested be discharged and abandoned.

PUB (MPI) 1-7

Part and Chapter:	**Part VII – Rate Indication**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Initiative Expenses**

Preamble to IR (If Any):

The following table shows the amount of initiative expenses (in $000s) shown on PF-1 of each of the last 4 GRAs as filed:

	For the Fiscal Years Ended March 31,							
GRA	**2024**	**2025**	**2026**	**2027**	**2028**	**2029**	**2030**	**2031**
2024	29,195	26,142	26,609	10,735	3,634			
2025	10,717	18,444	18,501	12,375	7,381	5,612		
2026		24,165	24,476	31,183	33,204	31,516	34,606	
2027			56,453	17,273	18,316	18,456	18,589	16,849

Question:

Given the observed level of historical volatility in the projected initiative expenses for each of the forecast years, please provide the process that MPI has followed to increase the accuracy of the 2027 GRA projected initiative expenses.

Rationale for Question:

To understand the accuracy or potential volatility of the initiative expenses.

RESPONSE:

As filed in *Part VIII EXP Appendix 22- Budgeting Process Framework*, MPI has included a $15M implementation placeholder within 2027/28 IT Major Programs

initiative expenses. The purpose of using a placeholder is to improve the accuracy and reliability of the forecast by avoiding arbitrary early allocations between capital and operating expense, or among specific expense categories such as licensing, external labour, or other delivery costs, before the underlying work has been sufficiently defined through business casing, which is again further refined through the Request for Proposal (RFP) and associated Statement of Work (SOW) processes.

The historical volatility identified in projected initiative expenses is precisely the issue the placeholder approach is intended to address. Forecasting initiative spending at a detailed capital versus operating level, or by specific nature of expense, requires assumptions about work that may not yet be scoped, approved, sequenced, or supported by a completed business case. Those assumptions can create – and have created – an artificial level of precision which later requires retrospective explanation or reconciliation when actual work plans, timing, vendors, and delivery models differ materially from the preliminary forecast.

Accordingly, MPI has fully assumed the placeholder to be operating in nature at this time. Eligibility for capitalization will be assessed when the related work is business cased and when sufficient information exists to determine the appropriate accounting treatment. This approach does not assume that all related work will be completed within the currently forecast horizon; rather, it recognizes that MPI does not yet have a sufficiently reliable basis to pre-allocate future implementation spending to individual projects, expense categories, or capital versus operating treatment.

The historical amounts referenced in the expense schedules for the Basic line of business relied on predetermined allocations and assumptions, but as seen in that volatility, it is not supportable to reliably estimate, this far in advance, the exact nature of work that will ultimately be performed. In MPI's view, attempting to pre-

estimate that level of detail before business cases are developed is the crux of what has contributed to significant forecast volatility in prior years.

For that reason, MPI has adopted a simplified placeholder approach for the 2027/28 IT Major Programs forecast. The approach reflects the likelihood of continued implementation spending while avoiding arbitrary allocations that would imply a degree of certainty that does not yet exist. It is also consistent with the approach used for the $5 million Corporate Project Funding PMO provision for the non-major program initiative budget, where the amount is presented as an uncommitted envelope rather than being pre-allocated to specific projects before those projects are sufficiently defined.

Refer to *PUB (MPI) 1-54 a)* which details the basis for the $15M as the placeholder.

PUB (MPI) 1-8

Part and Chapter:	**Part VII – Rate Indication**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Commission and Premium Tax Expenses**		
Sub Topic:			

Preamble to IR (If Any):

2027 GRA RI.2.6 Calculation of Average Required Premium

> Note that, in comparison to the 2026 GRA, additional revenue is now subtracted from claims costs prior to the application of variable expenses; this is to recognize the reduction in commission and premium tax expenses associated with the reduction in required premium collected.

Question:

a) Please confirm that the 2026 GRA had an error in the calculation of the commission and premium taxes, overstating them, and therefore overstating the rate indication.

b) Please estimate the impact on the 2026 GRA rate indication of the error.

Rationale for Question:

To understand the impact of the error in the commission and premium tax calculation in the 2026 GRA.

RESPONSE:

a) Confirmed.

b) Please see below the impact of the error on the 2026 GRA submission:

Figure PUB 1-008 Variable Operating Expense Impacts

Line No.	Description	2026 GRA, Original	2026 GRA, Adjusted	Difference

Part and Chapter:	**Part VII – RI Rate Indication**	**Page No.:**	
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Major Class Loss Cost**		
Sub Topic:			

Preamble to IR (If Any):

Part VII – RI Appendix 1 Table 5 Major Classes Loss Cost provides the derivation of the loss cost by Major Class by coverage.

Question:

a) For Property Damage and for Comprehensive, the Selected Trend refers to Part VII Appendix 4 Loss Cost Projection Analysis. We are unable to find the Selected Trend in this Appendix. Please provide the derivation of the Selected Trend for Comprehensive and for Property Damage.

b) Please confirm that the selected Work from Home Adjustment for Accident Benefits - Weekly Indemnity, Personal Care Assistance, Travel, and Other Indexed, Bodily Injury, and Collision is not applied to the Major Class Loss cost.

c) Please provide an alternative Appendix 1 Table 5 in which the selected Work from Home Adjustment is applied to the above coverages, an alternative Figure RI-11, RI-14, and RMO-1.

d) Please provide Catastrophe Comprehensive claims by Major Class for Accident Years 2012 to 2025.

e) Please explain how Catastrophe Comprehensive claims are included in the loss cost by Major Class, and does this differ from the overall approach?

f) For Off-Road Vehicles, the incurred claims for Property Damage appear relatively high for the 2021 accident year. Please provide any relevant non-confidential information about this.

Rationale for Question:

To better understand the Major Class loss cost indications.

RESPONSE:

a) The trends used for Comprehensive and Property Damage were the implied total trend based on the loss cost projection analysis. Please see *PUB 1-009 Appendix 1 part a* for derivation of the selected trend.

b) Confirmed.

c) Please see *PUB 1-009 Appendix 2 part c* for an alternative Appendix 1 Table 5, where the selected Work from Home Adjustments is applied to the coverages in part (b). Alternative figures are provided below.

d) Please see the figure below for Incurred Catastrophe Comprehensive claims by Major Class.

Figure 4 Incurred Catastrophe Losses by Major Class

	Major Class			
Accident Year	**1**	**2**	**3**	**5**
2012	15,452,224	194,148	85,973	889,622
2013	12,851,391	139,291	163,833	1,415,417
2014	3,624,749	54,099	24,111	244,796
2015	37,197,819	656,109	256,541	3,722,646
2016	30,561,049	366,846	282,236	3,531,227
2017	-	-	-	-
2018	31,052,833	627,683	262,203	4,921,257
2019	7,480,568	194,452	127,019	302,186
2020	4,466,343	142,433	79,178	515,452
2021	1,574,220	16,083	-	302,268
2022	14,062,642	385,188	69,399	1,937,813
2023	150,658,842	1,364,476	1,386,934	5,698,213
2024	40,984,154	417,862	1,068,210	803,997
2025	3,339,873	50,021	57,619	250,987

e) Catastrophe comprehensive claims are not included in the loss cost by Major class. In previous years, these were included across all major classes with a single percentage loading. Since the purpose of the appendix is to allocate forecasted loss costs between the major classes, an identical percentage loading all major classes does not impact the allocated losses. Thus, catastrophe losses were excluded.

f) The increase is driven by one claim occurring in accident year 2021 where the case reserve was set at policy limits of $500k.

**From VI, Appendix 4 - Loss Cost Projection*

PUB (MPI) 1-10

Part and Chapter:	**Part VII – RI Rate Indication**	**Page No.:**	
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Vehicle Rate Group addition**		
Sub Topic:			

Preamble to IR (If Any):

The Corporation has requested approval to expand the number and range of vehicle groups under CLEAR by adding rate groups 46 through 50, subject to a capping of a maximum increase for any vehicle of +2 rate groups.

Question:

a) Similar to PUB (MPI) 1-3c from the 2026 GRA, please provide loss ratio information based on the projected rate groups, providing earned premiums and claims by each of the proposed 51 rate groups.

b) Similar to PUB (MPI) 1-3d from the 2026 GRA, please provide a distribution of the indicated rate group without capping, i.e. up to 102.

c) Similar to PUB (MPI) 1-3e from the 2026 GRA, with the same assumptions used for that response, please provide the average MSRP for each of the proposed 51 rate groups.

d) Similar to PUB (MPI) 1-5 from the 2026 GRA, please provide the number of vehicles and the amount of premium by rate group for Passenger vehicles for coverages that are affected by rate line before and after the addition of rate groups 46 to 50.

e) The maximum rate group for existing vehicles is capped at an increase of 2 per year, with a vehicle upgrade of 4.46% in the 2026/27 year. Please explain why the vehicle upgrade factor is only 2.84% in 2027/28, given the cap of an increase of +2 per year in this year as well.

f) In the 2026 GRA, the impact of the 4 additional rate groups combined with +5 capping was +3.1%. Only +2 capping was approved for the 2026/27 rating year, with an estimated impact of +1.4%, leaving +1.7% of which a majority should show up in the 2027/28 rating year. Please indicate how this additional expected premium is included in the rate indication.

g) Please provide the estimated additional revenue from vehicles being capped at +2 rate groups, in dollar terms, and as a percent of the average vehicle premium. Please indicate how this additional revenue is captured in the overall rate indication. If it is not captured in the overall rate indication, please provide an alternative rate indication with this amount captured in it.

Rationale for Question:

To better understand the additional 5 rate groups and the continued impact of the rate groups added in the 2026 GRA.

RESPONSE:

a) Please refer to *Appendix 1* for loss ratio information of the CLEAR rated vehicles based on the projected rate groups. Earned premiums, claims, and resulting loss ratios are based on data from January 1, 2021 to December 31, 2025, with claims developed to December 31, 2025.

Like MPI's response in PUB (MPI) 1-3c from the 2026 GRA, it is important to note that vehicles in lower rate groups typically have lower average premiums. Since some of the expenses are fixed, they constitute a larger proportion of their premiums. As a result, the loss ratios for these groups appear to be lower, not necessarily due to claims experience but rather, due to higher relative impact of the fixed expenses.

b) Please refer to *Appendix 2* for the distribution of the indicated rate group without capping, based on the vehicle population as per the rate model.

c) Like the note in PUB (MPI) 1-3e from the 2026 GRA, in some cases, multiple vehicles with the same VICC code and model year may have different MSRP values due to variations in trim levels. To address this, MPI used the median MSRP for each unique VICC and model year combination, thereby mitigating the impact of outlier values.

Of the 911,727 vehicles affected by the 0–50 rate group scale, 898,511 have an MSRP defined by CLEAR. The results for these vehicles are presented in *Appendix 3*. Please note that although MPI is expanding the rating structure to include rate groups +46 to +50, the highest rate group assigned as of November 1, 2025 is +43. With the proposed limit of a maximum increase of two rate groups, vehicles can move no higher than rate group +45. Consequently, Appendix 3 only includes rate groups up to +45.

d) MPI assumes PUB is referring to PUB 1-4 in the 2026 GRA. Please note that while MPI is expanding the rating structure to contain rates for vehicles in rate groups +46 to +50, the highest assigned rate group as at November 1, 2025 is rate group +43. Under the proposed cap of a maximum upward movement of two rate groups, these vehicles can increase to no higher than rate group +45. As a result, there will be no additional impact from the proposed rate group expansion to rate group +50. Thus, the premiums by rate group in the rate model is the same before and after applying the expansion in rate groups, and so only one table, going up to rate group +45, is provided in ***Appendix 4***.

e) The upgrade factor for the 2026/27 rating year is higher than that for the 2027/28 rating year due to the revenue impact associated with MPI's rate group expansion. Under the 2026 GRA, the highest rate group was +41. With the expansion to rate group +45 and the proposed cap of a maximum upward movement of two rate groups, MPI was able to recognize additional premium revenue from vehicles transitioning from rate group +41 up to rate group +43.

For the 2027/28 rating year, the proposed expansion to rate group +50 is expected to generate additional premium revenue only through new business. As at November 1, 2025, the highest assigned rate group within the existing in-force portfolio is rate group +43. Under the proposed +2 rate group cap, these vehicles would be limited to rate group +45 and therefore would not be affected by the additional expansion to rate group +50. In contrast, newly written policies may be assigned anywhere within the expanded rate group structure, including rate groups +46 through +50, and could therefore generate additional premium revenue. However, the revenue impact associated with this future expansion is highly uncertain, as it depends on the volume and mix of future new vehicle purchases and the extent to which those vehicles are assigned to the newly established rate groups. Given the absence of a reliable basis to quantify this impact, MPI has not included any additional adjustment to the upgrade factor for the 2027/28 rating year.

f) The estimated 3.1% impact associated with the addition of four rate groups and the implementation of a +5 rate group cap assumed that vehicles could migrate by more than two rate groups. However, under the +2 rate group cap, the additional premium revenue associated with rate groups +44 and +45 would arise primarily from newly written vehicles rather than from MPI's existing in-force portfolio. As a result, applying the full 3.1% impact would overstate the expected revenue effect.

For the 2027/28 rating year, changes in rate group movements up to rate group +43 are adjusted by an offset within the rate model to maintain overall revenue neutrality. As mentioned in response to (e), MPI did not quantify the incremental premium impact associated with vehicles being assigned to rate groups +46 through +50. The magnitude of this impact is inherently uncertain, as it depends on future new vehicle purchases and the distribution of those vehicles across the expanded rate group structure.

Instead, MPI selected a higher premium trend assumption to reflect the anticipated effect of new vehicles entering the portfolio at higher rate groups. In MPI's view, this approach provides a reasonable and practical means of recognizing the expected premium growth associated with the expanded rate group structure without relying on highly speculative assumptions regarding future vehicle mix and rate group assignments.

g) Please refer to (e) and (f).

PUB (MPI) 1-11

Part and Chapter:	**Part VII – RC Risk Classification**	**Page No.:**	**1120**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Generalized Linear Models**		
Sub Topic:	**GLM for Rate Line Relativities**		

Preamble to IR (If Any):

Within the Rate Line Relativities GLM model (passenger vehicles and light trucks), PIPP losses are excluded from the response variable (non-PIPP loss cost), however PIPP remains embedded in the calculation of the 'Vehicle Rate Group' explanatory variable, which is a weighting of Collision, Comprehensive and Accident Benefits CLEAR rate groups.

Question:

Please explain the rationale for this apparent misalignment between the explanatory and response variables.

Rationale for Question:

To understand the data used in the rate line relativities GLM models.

RESPONSE:

MPI's Vehicle Rate Group structure is derived from CLEAR rate groups and serves as the foundation for vehicle classification within the ratemaking framework for passenger vehicle and light truck.

As mentioned in *Part VII RC 8.1* in 2027 GRA, MPI's historical analyses have shown that physical damage coverages generally increase with rate group, whereas PIPP coverages do not exhibit a consistent increasing relationship by rate group. Accordingly, the purpose of the Rate Line Relativities analysis is to estimate differences in physical damage costs across rate groups rather than differences in PIPP costs.

Consistent with this objective, the GLM response variable is non-PIPP loss cost. The resulting rate group relativities are used to estimate expected physical damage costs by rate group. Average PIPP costs and operating expenses are subsequently added in the ratemaking process to derive the final premium relativities. In other words, while PIPP contributes to the underlying CLEAR-based vehicle classification framework, PIPP costs themselves are not reflected through the rate group relativity analysis. Instead, it is added as a fixed cost across all rate groups.

This approach is also consistent with MPI's previous Minimum Bias Procedure (MBP). MPI retained the methodology used in prior years to support consistency during the first year of its full transition to a GLM framework.

PUB (MPI) 1-12

Part and Chapter:	**Part VII – RC Risk Classification**	**Page No.:**	**1109 and 1120**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Generalized Linear Models**		
Sub Topic:			

Preamble to IR (If Any):

The GLM models for Major Class Relativities incorporate an adjustment to remove the serious losses and applying a serious loss loading. There is no indication that a similar treatment is applied to the GLM models for Rate Line Relativities.

Question:

Please clarify whether the treatment of serious losses in the Rate Line Relativities GLM models is consistent with the methodology applied to the Major Class Relativities GLM models? If the approaches differ, please provide the rationale for different treatments.

Rationale for Question:

To understand the data used in the Rate Line Relativities GLM models and Major Class GLM models.

RESPONSE:

The treatment of serious losses differs between the Major Class Relativities GLM models and the Rate Line Relativities GLM models because the analyses are designed to estimate different components of the ratemaking framework.

The Major Class Relativities GLM models are used to estimate relativities for variables such as Territory, Insurance Use, and Gross Vehicle Weight (GVW) using overall claim costs, including both PIPP and non-PIPP losses. To reduce the volatility associated with

infrequent, high-severity claims, actual serious losses are removed and a serious loss loading is applied.

In contrast, the response variable in the Rate Line Relativities GLM models is non-PIPP loss cost as mentioned in *Part VII RC 8.1* in 2027 GRA. These models are intended to capture differences in non-PIPP physical damage costs across vehicle rate groups. Since PIPP losses are excluded from the response variable, a serious loss loading is not necessary. Instead, a PIPP loading is added as a fixed cost across all rate groups. Please refer to *PUB (MPI) 1-11* for further details.

PUB (MPI) 1-13

Part and Chapter:	**Part VII – GLM Generalized Linear Models**	**Page No.:**	**1021 and 1072**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Generalized Linear Models**		
Sub Topic:	**GLM for Rate Line Relativities**		

Preamble to IR (If Any):

Figure RI-2 (Section RI.2.1) shows that PIPP-related losses represent a notable portion of roughly 17% of total incurred claims. Unlike physical damage coverages, which exhibit a consistent increasing relationship by rate-group, PIPP coverages do not follow this pattern (Section RC.8.1).

Question:

a) Given that PIPP and non-PIPP coverages exhibit different loss patterns across rate groups, and considering PIPP's notable contribution to total loss, are there considerations of constructing separate GLM analyses by coverage?

b) Does the proportion of PIPP losses relative to total losses for motorcycles align with that of other vehicle types? If they differ significantly, should motorcycle PIPP losses be modelled separately?

Rationale for Question:

To understand the design of GLM models.

RESPONSE:

a) MPI recognizes that PIPP and non-PIPP coverages exhibit different relationships with rate groups. MPI will continue to evaluate potential enhancements to its GLM framework, including alternative model structures and coverage-specific analyses where appropriate.

b) MPI recognizes that the proportion of PIPP losses relative to total losses for motorcycles differs significantly from that of other vehicle types. For motorcycles, PIPP losses comprise the majority of their overall loss costs. As a result, motorcycles are treated as a distinct segment within MPI's ratemaking framework. See *RC.8.2* for reference.

PUB (MPI) 1-14

Part and Chapter:	**Part VII – RC Risk Classification**	**Page No.:**	**1109 and 1120**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Generalized Linear Models**		
Sub Topic:	**Model Validation**		

Preamble to IR (If Any):

Both Major Class Relativities and Rate Line Relativities GLM models are built on the entire dataset, and there is no split of training and testing datasets.

Question:

Since the entire dataset was used for fitting, please explain how MPI assesses model performance on unseen data.

Rationale for Question:

To understand whether the models have been adequately validated and are suitable for their intended use.

RESPONSE:

MPI acknowledges that the Major Class Relativities and Rate Line Relativities GLM models were fit using the full available dataset and therefore were not evaluated through a traditional training/testing split.

This approach was considered appropriate given the objectives of the 2027 GRA. The current implementation represents MPI's first full transition from the historical minimum bias framework to GLM-based analyses. As a result, MPI's primary objective was to replicate and enhance existing ratemaking methodologies while maximizing the credibility and stability of the estimated relativities by using all available experience.

As MPI continues its transition toward a more comprehensive GLM-based ratemaking framework, additional model validation approaches, including out-of-sample testing and other predictive performance assessments, may be considered where appropriate. However, at this stage of implementation, MPI's focus was on producing stable and credible relativity indications that remain aligned with the existing ratemaking framework.

PUB (MPI) 1-15

Part and Chapter:	**Part VII – RC Risk Classification**	**Page No.:**	**1148**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**DSR**		
Sub Topic:			

Preamble to IR (If Any):

With respect to the treatment of DSR data between the DSR minimum bias model and GLM Rate Line Relativities models for motorcycles and motorhomes, motorcycle and merit-eligible motorhomes data are not included in the DSR minimum bias model (Appendix 6), but DSR variable is included in GLM Rate Line Relativities models for motorcycles and motorhomes.

Question:

a) Please explain MPI's view of DSR in motorcycle and motorhome pricing.
b) Regarding motorcycle and motorhomes, as their data are excluded in the DSR minimum bias model, but their GLM models provide fitted DSR relativities, how would MPI compare the two sets of DSR relativities for them?

Rationale for Question:

To understand the treatment of DSR relativities for motorcycles and motorhomes between the minimum bias model and the GLM.

RESPONSE:

a) MPI recognizes that DSR is associated with claim experience for motorcycles and therefore includes DSR as an explanatory variable in the Rate Line Relativities GLM model. Including DSR in the GLMs helps control for differences in driver risk and improves the estimation of the rating factor of interest.

As described in ***Part VII RC Appendix 6 Section 2.2*** in 2027 GRA, merit-eligible motorcycles and merit-eligible motorhomes were excluded from that analysis because these vehicle types are not considered representative of the broader merit-eligible vehicle population due to their limited exposure, seasonal nature, and distinct risk characteristics. Consequently, the DSR discounts established through the minimum bias analysis are only based on passenger vehicle and light truck.

b) MPI does not view the two sets of DSR relativities as directly comparable. The DSR relativities estimated within the motorcycle and motorhome Rate Line Relativities GLM models serve as control variables for driver risk and are conditional on the model specification and explanatory variables included. They are not used to determine DSR discounts.

In contrast, the DSR relativities from the minimum bias analysis are specifically intended to establish DSR discounts and are based on a different underlying population that excludes motorcycles and motorhomes. Given the different objectives, model structures, and data used, differences in the fitted DSR relativities are expected and do not indicate inconsistency. One supports rate line modeling, while the other forms the basis for DSR discounts.

PUB (MPI) 1-16

Part and Chapter:	**Part VII – RC Risk Classification**	**Page No.:**	**1109, 1120, 1146**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Generalized Linear Models**		
Sub Topic:	**Models used**		

Preamble to IR (If Any):

The modeling framework comprises three distinct approaches: Major Class Relativities GLM models, Rate Line Relativities GLM models, and a minimum bias model for DSR. Because none of these models incorporate offsets, each set of relativities is estimated under an independent specification that is not conditional on a unified set of pricing variables.

One example is the treatment of DSR; while final DSR relativities are derived from the minimum bias model, DSR also serves as a statistically significant explanatory variable in the Major Class GLMs, where the fitted results are different due to the absence of a shared offset.

Another example is 'Insurance Use'; although final relativities are sourced from the Major Class model, their fitted values are quite different in the Passenger Vehicle Rate Line GLM model.

Theoretically, in a multivariate GLM, an estimated relativity is conditional on the explanatory variables presented in the model. Results from different specifications are not directly compatible unless appropriate adjustments, such as offsets or recalibration, are applied.

Question:

Please explain the rationale for this methodology and provide any available assurance that this approach does not misallocate the effects of the explanatory variables.

Rationale for Question:

To understand the model structure and ensure model is aligned with its intended use.

RESPONSE:

MPI's ratemaking framework uses multiple models because different components of the rate structure serve different purposes and are therefore estimated using analyses tailored to those objectives. The Major Class GLMs are used to estimate the risk classifications other than rate group relativities by major class (e.g., insurance use and territory for major class 1), the Rate Line GLMs are used to estimate the rate group relativities, and the DSR Minimum Bias Procedure is used to determine DSR discounts. Variables such as DSR, Territory and Insurance Use may be included in more than one analysis to control differences in underlying risk characteristics and reduce potential confounding effects. As a result, fitted relativities for a given variable may differ across models because they are estimated in different modelling contexts and are conditional on different sets of explanatory variables. However, these relativities are not intended to be interchangeable across models, as only the designated outputs from each analysis are used in the final rate determination process. This approach is consistent with the historical Minimum Bias Procedure framework, where separate analyses were used to estimate specific components of the rate structure.

MPI gains assurance through the interpretation and application of each model within its intended ratemaking purpose, rather than by comparing fitted relativities across models as though they were interchangeable. The inclusion of relevant explanatory variables in each analysis helps control for underlying risk differences, and only the specific relativities designated for final rate determination are applied, reducing the risk that effects from one variable are inadvertently assigned to another rating component.

Part and Chapter:	**Part VIII Pro Formas**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Interest Rates**		
Sub Topic:	**Cash Flow Weighted Average Discount Rate**		

Preamble to IR (If Any):

2026 GRA PUB (MPI) 1-19e provided the cash-flow weighted average discount rate as at March 31 of 2022, 2023, 2024 & 2025 to be as follows:

March 31, 2022 3.05%
March 31, 2023 4.30%
March 31, 2024 4.62%
March 31, 2025 3.66%

The net insurance finance result for the 2024/25 year as forecasted in the 2025 GRA was -$97,531,000 and the actual net insurance finance result in the 2026 GRA was -$150,757,000, a deterioration of $53,226,000.

The net insurance finance result for the 2025/26 year as forecasted in the 2026 GRA was -$89,197,000 and the actual net insurance finance result in the 2027 GRA is -$1,263,000, an improvement of $87,934,000.

Question:

a) Please provide the cash-flow weighted average discount rate as of March 31, 2026.

b) Given the answer to a), please compare the movement in the cash-flow weighted average discount rate to the improvement or deterioration in the net insurance finance result in the 2025/26 year as compared to the movement in the 2024/25 year, and provide any qualitative remarks.

Rationale for Question:

To understand the movement of interest rates relative to the impact on net finance expense with respect to the discounting of claims liabilities.

RESPONSE:

a) The cash-flow weighted average discount rate as of March 31, 2026 was 4.15%.

b) The net insurance finance result reflects the effects of the unwinding of discounting and changes in discount rates arising from movements in the underlying yield curve. For forecasting purposes, the net insurance finance result reflects only the unwinding of discounting, as no changes in the underlying yield curve are assumed throughout the forecast period.

Figure 1 Unwinding of discounting

	Cash-flow weighted average discount rate	Change
March 31, 2024	4.62%	-
March 31, 2025	3.66%	-0.96%
March 31, 2026	4.15%	0.49%

Net insurance finance result :	2024/25	2025/26
Forecast	**(97,531,000)**	**(89,197,000)**
Unwinding	(97,531,000)	(89,197,000)
Change in discount	-	-
Actual	**(150,757,150)**	**(1,263,000)**
Unwinding	(94,734,890)	(90,925,847)
Change in discount	(56,022,261)	89,662,847
Improve / (Deterioration) of Actuals to Forecast	**(53,226,150)**	**87,934,000**
Unwinding	2,796,110	(1,728,847)
Change in discount	(56,022,261)	89,662,847

The improvement between 2024/25 and 2025/26 actual results was primarily driven by higher discount rates, which reduced the present value of insurance contract liabilities. The 2025/26 result also benefited from a one-time adjustment of $35.0 million related to the PIPP Termination Rate & Methodology Update project.

PUB (MPI) 1-18

Part and Chapter:	**Part VIII Pro Formas**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Interest Rates**		
Sub Topic:	**Impact on Assets versus Liabilities**		

Preamble to IR (If Any):

The net investment income for the 2024/25 year as forecasted in the 2025 GRA was $136,349,000 and the actual net investment income in the 2026 GRA was $241,972,000, an improvement of $105,623,000.

The net insurance finance result for the 2024/25 year as forecasted in the 2025 GRA was -$97,531,000 and the actual net insurance finance result in the 2026 GRA was -$150,757,000, a deterioration of $53,226,000.

The net investment income for the 2025/26 year as forecasted in the 2026 GRA was $121,594,000 and the actual net investment income in the 2027 GRA was $105,149,000, a deterioration of -$13,959,000.

The net insurance finance result for the 2025/26 year as forecasted in the 2026 GRA was -$89,197,000 and the actual net insurance finance result in the 2027 GRA is -$1,263,000, an improvement of $87,934,000.

Question:

a) Please explain why there was favourable movement in the investment income in 2024/25 of $105,623,000, but only $53,226,000 of deterioration in the net insurance finance result.

b) Please explain why there was a deterioration of -$13,959,000 in the investment income in 2025/26 but a much larger improvement of $87,934,000 in the net insurance finance result.

Rationale for Question:

To understand the different impact of changes in interest rates on the assets and liabilities.

RESPONSE:

a) Please refer to *Part X Pro Formas, PF-4 Statement of Operations - 2024/25 Comparative* in the 2026 GRA for detailed variance explanations. An excerpt pertaining to the net investment income and net insurance finance result variances is reproduced below.

Figure 1 Excerpt from Part X Pro Formas PF-4 (2026 GRA)

56		**(153,452)**	**2026 GRA**
57	*detailed explanations can be found in *Part X Financial Forecasting - Net Incurred Claims*		

While both net investment income and the net insurance finance result are influenced by changes in interest rates, the two amounts are driven by different factors and are therefore not expected to move equally or offset one another entirely. Differences in the timing, duration, composition, and sensitivity of assets

and liabilities to changes in interest rates can result in movements in net investment income and the net insurance finance result that differ in both magnitude and direction.

b) Please refer to part (a) for an explanation of the differing drivers of investment income and the net insurance finance result, and why changes in these amounts do not necessarily offset.

Please refer to *Part VIII Pro Formas, PF-4 Statement of Operations - 2025/26 Comparative* for detailed variance explanations. An excerpt pertaining to the net investment income and net insurance finance result variances is below.

PUB (MPI) 1-19

Part and Chapter:	**Part VIII Pro Formas**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Financial Forecast**		
Sub Topic:	**Future Rate Changes**		

Preamble to IR (If Any):

Part VIII – Proformas. The base forecast in the 2027 GRA reflects multi-year indicated rate change requirements for Basic.

Question:

a) Please provide alternative PF-1, PF-2 and PF-3 excluding rate changes beyond the 2027/28 rating year. Discuss whether a capital build would be required in the following GRA.

b) Please provide alternative PF-1, PF-2 and PF-3 excluding rate changes beyond the 2027/28 rating year, and assuming no transfers from Extension, starting in the 2026/27 year. Discuss whether a capital build would be required without the Extension transfers.

Rationale for Question:

To understand the financials prior to any additional rate changes, as well as prior to any Extension transfers.

RESPONSE:

a) Please refer to ***Figures 1 to 3*** below. With the Extension transfers included (line 8 of ***Figure 3***), forecasted Basic MCT exceeds the legislated threshold of 100% until 2030/31.

19	Minimum Capital Required (b)	406,210	442,605	453,811	482,074	504,909	534,897
20	**MCT Ratio % (a) / (b)**	**108.2%**	**105.2%**	**106.5%**	**102.2%**	**102.7%**	**99.0%**

b) Please refer to *Figures 4 to 6* below. As shown in *Figure 6* below, the MCT ratio falls below the 100% threshold in 2026/27 and continues to decline throughout the forecast period. Under this scenario, Basic falls below its capital target through the forecast period. The nature and size of a potential capital build would be dependent upon knowing the rate determined by the PUB. To which, MPI holds the view that appropriate and reasonable rate action is always available through the GRA process for the Basic line of business which includes a capital build request if so warranted.

Part and Chapter:	**Part VIII Pro Formas**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Financial Forecast**		
Sub Topic:	**Future Rate Changes**		

Preamble to IR (If Any):

Part VIII – Proformas. The base forecast in the 2027 GRA reflects multi-year indicated rate change requirements for Basic.

Question:

a) Please provide an alternative PF-1 which includes:
   i. A line item for the additional revenue sought in this application
   ii. A separate line item for the revenue for the indicated rate change in each of the three future rating years beyond this application.

Rationale for Question:

To understand the revenue impact of the requested rate increase and the future modelled rate changes.

RESPONSE:

a) Please refer to *Figure 1* below.

Figure 1 - Alternate Basic forecast with additional revenue from premiums lines

PUB (MPI) 1-21

Part and Chapter:	**Part VIII Pro Formas**	**Page No.:**	**Figure PF-3**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Employee Future Benefits**		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – Proformas PF-3. Change in Remeasurement of Employee Future Benefits is $17,994,000 for 2025/26, $19,887,000 for 2026/27 and $2,143,000 for 2027/28. In the 2026 GRA, there was only a non-zero Change for the 2024/25 year.

Question:

Please explain why there is a non-zero amount for Change in Remeasurement of Employee Future Benefits for 2026/27 and 2027/28.

Rationale for Question:

To understand the basis of the Change in Remeasurement of Employee Future Benefits.

RESPONSE:

a) In prior GRAs, the assumptions used to estimate employee future benefit obligations were held constant throughout the forecast period, resulting in no forecasted remeasurement gains or losses. For the 2027 GRA, the assumptions were refined to reflect projected changes in discount rates. As a result, forecasted remeasurement gains are recognized in 2026/27 and 2027/28. These remeasurement amounts are recognized through Other Comprehensive Income and do not impact Net Income for Rate Setting Purposes.

PUB (MPI) 1-22

Part and Chapter:	**Part VIII Revenues**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Revenue**		
Sub Topic:	**Upgrade Factor**		

Preamble to IR (If Any):

Aggregating Figure REV-14 and REV-15 from 2027 GRA with REV-9 and REV-10 from 2026 and 2025 GRA, the following table of actual and forecast (in italics) Vehicle Upgrade Factors was created:

Insurance Year	GRA		
	2025	2026	2027
2019/20	2.57%		
2020/21	1.97%	1.97%	
2021/22	2.06%	2.06%	1.55%
2022/23	2.24%	2.24%	1.82%
2023/24	2.79%	2.79%	2.63%
2024/25	*2.38%*	3.04%	3.32%
2025/26	*3.03%*	*3.37%*	5.07%
2026/27	*2.38%*	*5.71%*	*4.46%*
2027/28	*2.38%*	*2.54%*	*2.84%*
2028/29	*2.38%*	*2.54%*	*2.84%*
2029/30		*2.54%*	*2.84%*
2030/31			*2.84%*

Question:

a) Please confirm that the change to include all vehicles and not just HTA units explains why the historical vehicle upgrade factors changed in the 2027 GRA for insurance years 2021/22 through 2024/25.

b) For 2024/25 actual of 3.04% as per the 2026 GRA versus forecast of 2.38% as per the 2025 GRA, please explain why the actual was 0.66% higher than forecast.

c) For 2025/26 actual of 5.07% as per the 2027 GRA versus forecast of 3.37% as per the 2026 GRA, please explain why the actual was 1.70% higher than forecast. As part of the explanation please estimate the impact of the 1 vehicle rate group addition.

d) For 2026/27 forecast of 5.71% as per the 2026 GRA versus forecast of 4.46% as per the 2027 GRA, please explain why the current forecast is 1.25% lower than previous forecast. As part of the explanation please estimate the impact of the capping at +2 rate groups versus the requested capping of +5 rate groups.

e) For 2027/28 forecast of 2.54% as per the 2026 GRA versus forecast of 2.84% as per the 2027 GRA, please explain why the current forecast is 0.30% higher than previous forecast. As part of the explanation please estimate the impact of the residual impact of the +2 capping of rate groups approved in the 2026 GRA versus the requested +5 capping, plus the expected impact of the additional 5 new rate groups.

f) For the 2028/29 forecast of 2.54% as per the 2026 GRA versus forecast of 2.84% as per the 2027 GRA, please explain why the current forecast is 0.30% higher than previous forecast. As part of the explanation, please estimate the continuing impact of the +2 maximum increase plus the additional 5 new rate groups.

Rationale for Question:

To understand the selected vehicle upgrade factors.

RESPONSE:

a) Confirmed.

b) The 2024/25 actual vehicle upgrade factor of 3.04% exceeded the 2.38% forecast presented in 2025 GRA because the vehicle population experienced greater shifts toward higher-cost vehicles than anticipated at the time the forecast was developed.

The vehicle upgrade factor measures the premium impact associated with changes in the distribution of the insured vehicle population, including changes in rate groups, vehicle types, body styles, insurance uses, and territories. As these distributional changes are forecasted in advance, variances between projected and actual results may arise.

c) The forecasted 2025/26 HTA vehicle upgrade factor of 3.37% in the 2026 GRA was derived by applying an estimated 0.81% impact from the expansion of the maximum rate group to +41 to a base vehicle upgrade assumption of 2.54%, based on a 10-year historical average excluding the COVID-impacted 2020/21 and 2021/22 years.

The actual 2025/26 vehicle upgrade factor of 5.07% reflected a higher-than-expected shift in the vehicles, consisting of an actual vehicle upgrade of 4.12% (for both HTA and non-HTA vehicles) derived from the Rate Model and an estimated impact of 0.92% from the 1 vehicle rate group expansion.

d) The forecasted 2026/27 HTA vehicle upgrade factor of 5.71% in the 2026 GRA was derived from a base vehicle upgrade assumption of 2.54%, based on a 10-

year historical average excluding the COVID-impacted 2020/21 and 2021/22 years, together with an estimated 3.10% impact from expanding the maximum rate group to +45 with a maximum upward movement of five rate groups.

To comply with PUB Order 156/25, the forecasted 2026/27 HTA vehicle upgrade factor was subsequently revised to 3.96%, reflecting the same 2.54% base assumption and a reduced estimated rate group expansion impact of 1.39%, based on a maximum upward movement of two rate groups.

In the 2027 GRA, the forecasted 2026/27 vehicle upgrade factor of 4.46% (for both HTA and non-HTA vehicles) was derived from a base assumption of 2.84%, based on a five-year historical average excluding the COVID-impacted 2020/21 and 2021/22 years and the rate group expansion impact associated with the 2025/26 rating year, together with an estimated 1.57% impact from expanding the maximum rate group to +45 with a maximum upward movement of two rate groups.

e) The forecasted 2027/28 vehicle upgrade factor of 2.84% in the 2027 GRA is 0.30% higher than the 2.54% forecast used in the 2026 GRA primarily due to differences in the underlying experience period and vehicle population considered. The 2026 GRA forecast was based on a 10-year historical average for HTA vehicles only, excluding the COVID-impacted 2020/21 and 2021/22 years. In contrast, the 2027 GRA forecast was based on a 5-year historical average for both HTA and non-HTA vehicles, excluding the COVID-impacted years as well as the rate group expansion impact associated with the 2025/26 rating year. The shorter averaging period places greater weight on more recent experience, which has exhibited higher vehicle upgrade levels, while the inclusion of both HTA and non-HTA vehicles reflects the broader vehicle population considered in the 2027 GRA analysis. Together, these changes resulted in a higher forecast vehicle upgrade factor of 2.84% in the 2027 GRA.

Please refer to MPI's response to PUB (MPI) 1-10 regarding the impact of the rate group expansion for the 2027/28 rating year. MPI notes that it is proposing to maintain the current +2 rate group movement cap and is not proposing +5 rate group movement cap for the 2027/28 rating year.

f) Please refer to part e). For the forecasted years, MPI maintained the selected vehicle upgrade factor of 2.84%.

PUB (MPI) 1-23

Part and Chapter:	**Part VII – Rate Indication and Part VIII – Pro Formas**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**4. Financial Forecast** **10. Claims Forecasting**		
Topic:	**June 9th Hailstorm**		
Sub Topic:			

Preamble to IR (If Any):

On June 9th Manitoba was hit with a large hailstorm. In a June 25th news release MPI indicated that over 25,000 claims have been received, exceeding the previous record that was set following a 1996 hailstorm that led to about 24,000 claims.

Part VIII – EAR Attachment B Appendix D Summary of Catastrophe IBNR indicates that the ultimate number of claims from the large 2023 claim are 17,475, with ultimate loss and ALAE of $140,517,183.

Part VIII – Pro Formas PF-3 indicates forecast Capital Available for 2026/27 of $465,399,000 and Minimum Capital Required of $442,605,000, for an MCT ratio of 105.2%.

Figure CF-35 Removal of CAT Claims from Comprehensive Ultimate Incurred Claim Amounts and Derivation of CAT Adjustment as of March 2026 shows a Selected CAT adjustment factor of 1.19, based on a 9-year average of 2017 to 2025.

Loss cost selected trends for Comprehensive sub-coverages are as follows:

Sub-coverage	Past	Future
Attempted & Partial Theft	+8.36%	+8.36%
Entire Theft	+8.26%/18.42%/8.26%	+3.28%
Fire	+1.95%/13.15%/1.95%	+1.95%
Glass	+29.10%	+9.29%/ 3.96%/ 13.46%/ 13.01%/ 12.62%
Hail	+0%/22.56%/0%	+0%
Vandalism	-1.69%/+7.97%/-1.69%	-1.69%
Other	+8.74%	+8.74%

Figure REV-33 Basic Ceded Premiums – Catastrophe Program show premiums of $26.4 million in 2025/26 dropping to $19.5 million in 2026/27 and 2027/28 followed by slight increases to $19.7 million in 2028/29.

Question:

a) Please provide MPI's current number of actual reported claims and incurred claim amount as well as projected ultimate number of claims and ultimate claim amount for this event for Basic.

b) Given the $50 million Corporate annual aggregate, barring other unknown events, with an allocation of a little over 90% to Basic, would this event reduce the Basic MCT by about 10 percentage points at the end of 2026/27?

c) Please explain why MPI believes a factor applied to the trended loss costs of the seven sub-coverages (which each have different loss cost trends) is an appropriate estimate of the trend that should be applied for future catastrophe claims.

d) Please describe alternative approaches that could be used to project hail catastrophe claims that does not rely on the seven sub-coverages and explain why the current approach was selected.

e) Please provide an alternative ultimate loss estimate and loss cost estimate for Comprehensive using all 14 accident years from CF-35 in the average.

f) Please provide an alternative rate indication (RI-14) using a Comprehensive CAT factor using the above 14-year average.

g) Given the large catastrophic event, please provide an estimated increase in catastrophe reinsurance premium for 2027/28.

h) Please provide an alternative rate indication (RI-14) using the alternative catastrophe reinsurance premium.

i) Please provide the sensitivity of the rate indication to a $10 million increase in the catastrophe reinsurance premium.

j) What learnings can be drawn from the adverse development that occurred over time for the large 2023 event when reserving the most recent event?

k) Does MPI intend to revise its rate request for the 2027 GRA due to the June 9th hailstorm?

l) Does the Corporation have a policy with criteria under which it would revise its rate request? If yes, please provide.

Rationale for Question:

To understand potential impacts of the June 9th hailstorm.

RESPONSE:

a) As of July 22, 2026, there are 31,480 claims reported for the June 9th event with incurred losses of $78.7 million. The current ultimate loss estimate for this event (Basic, Extension, and SRE combined) is $329.1 million, based on projected ultimate number of claims of 37,399. As additional claims are reported and estimates are refined, both projected claim counts and severity assumptions may change, which could materially impact the ultimate loss estimate. This estimate excludes adjuster expenses, salaries, and overtime.

Based on the historical 10-year average distribution of catastrophe losses, approximately 91.5% of the gross ultimate loss estimate is attributable to Basic, resulting in an estimated gross Basic loss of $301.1 million before reinsurance. After considering the $50 million annual aggregate deductible, the $3 million per-occurrence deductible, and MPI's 18.2% co-participation on the $100 million excess of $50 million layer, MPI's estimated net retention for this event is approximately $71.2 million, of which approximately $65.1 million is attributable to Basic.

b) Based on MPI's analysis, the impact of this event is estimated to be a reduction of approximately 20 percentage points in the Basic MCT ratio during 2026/27 (~85.2%).

Under MPI's catastrophe reinsurance program, the retention associated with this event is approximately $71.2 million, consisting of the $50 million annual aggregate deductible, the $3 million occurrence deductible, and MPI's 18.2% participation on the $100 million excess of $50 million layer ($18.2 million). Of this amount, approximately $65.1 million is attributable to Basic. The estimated MCT impact reflects these retained losses and the protection provided by the catastrophe reinsurance program.

c) MPI applies the selected catastrophe adjustment factor after the seven Comprehensive sub-coverages have each been projected using their respective loss cost trends. The factor is therefore not intended to represent a single trend applied uniformly to each sub-coverage rather, it is an additional provision applied to the combined projected Comprehensive loss cost to reflect the expected cost of catastrophe claims.

MPI considers this approach appropriate because both catastrophe and attritional physical damage claims are affected by many of the same underlying cost drivers, including vehicle values, parts prices, labour rates, repair complexity, deductible levels and repair practices. Applying the catastrophe factor after the individual sub-coverages have been projected brings the historical catastrophe provision forward consistently with the expected cost level of the overall Comprehensive coverage. The resulting Comprehensive forecast is therefore based on the individual sub-coverage

projections, with catastrophe claims reflected separately through the catastrophe adjustment.

d) Alternative approaches that could be used to project hail catastrophe claims include the following:
   - Direct hail catastrophe loss cost approach: Historical hail catastrophe losses could be developed to ultimate, adjusted to a common deductible and cost level, and divided by exposures. An average of the resulting catastrophe loss costs could then be added directly to the attritional Comprehensive forecast.
   - Frequency and severity approach: The expected annual frequency of hail catastrophe events and expected loss per event could be estimated separately. Severity could consider factors such as the number and value of vehicles affected, average damage per vehicle, geographic location, and applicable deductibles.
   - Catastrophe modelling approach: A third-party weather or catastrophe model could simulate the frequency, location and intensity of severe storm events and apply those events to MPI's insured vehicle portfolio. The resulting annual loss distribution could be used to select an expected catastrophe loss.

   MPI selected the current factor approach because it is transparent, easily reproducible and based on MPI's observed catastrophe experience. It integrates directly with the sub-coverage forecasts and scales with changes in exposure and the projected cost level of Comprehensive claims. It also reflects expected reinsurance recoveries because only losses net of expected catastrophe reinsurance recoveries are included in deriving the factor.

   The alternative approaches would require additional assumptions regarding the future frequency, geographic concentration and severity of infrequent severe hail events. The results could be highly sensitive to those assumptions. External catastrophe models may provide useful supplementary information, but their results would also depend on model calibration, the representation of MPI's insured vehicle portfolio and the model's ability to reflect Manitoba-specific hail or storm experience. MPI therefore

considers the historical net catastrophe factor applied to the combined projected Comprehensive loss cost a supportable and readily auditable estimate for the 2027 GRA.

e) Comprehensive ultimate losses in ***Figure-1*** are derived by applying a catastrophe adjustment factor of 1.23 to combined projected loss costs excluding catastrophe. This catastrophe adjustment factor is calculated using a 14-year average as requested, rather than the original 9-year average used in the original submission.

g) MPI expects catastrophe reinsurance premiums for 2027/28 to increase materially as a result of the June 9th 2026 catastrophic event. Based on preliminary discussions with its reinsurance broker, the cost of renewing the existing $350 million excess of $50 million aggregate catastrophe reinsurance program is currently estimated to be approximately $50 million to $60 million for a fully placed program.

In developing a planning estimate, MPI has assumed an overall placement level of approximately 80% for 2027/28. This assumption reflects recent placement experience, including 81.8% placement of the $100 million excess of $50 million layer at the April 1, 2026 renewal and 82.8% placement of the additional catastrophe protection purchased effective July 10, 2026. MPI believes this is a reasonable simplifying assumption because the lower layers represent the most costly portion of the program and account for the majority of total premium, while any variation in placement of higher layers would not be expected to have a material impact on overall program cost.

Applying the 80% placement assumption results in an estimated catastrophe reinsurance premium of approximately $40 million to $48 million for the existing catastrophe program. Consistent with MPI's allocation methodology, approximately 91.5% of these costs, or $36.6 million to $43.9 million, would be attributable to Basic.

Following the June 9th 2026 event, MPI purchased an additional $200 million of catastrophe reinsurance protection effective July 10, 2026 to provide protection for the remainder of the 2026/27 fiscal year. The additional coverage provides $200 million of catastrophe protection excess of a $70 million annual aggregate deductible, subject to a $3 million per-event deductible. Preliminary indications suggest that maintaining a comparable amount of additional catastrophe reinsurance protection in 2027/28 could cost approximately $7 million to $10 million on a fully placed basis. Applying the same 80% placement assumption results in an estimated cost of approximately $5.6 million to $8.0 million, of which approximately $5.1 million to $7.3 million would be attributable to Basic.

Accordingly, MPI's current preliminary estimate is that catastrophe reinsurance costs attributable to Basic could be in the range of approximately $41.7 million to $51.2 million in 2027/28. These estimates are highly uncertain and subject to change as reinsurance renewal negotiations have not yet occurred. Actual pricing will depend on market conditions, reinsurers' assessment of the 2026 catastrophe losses, available capacity, and the final structure of MPI's catastrophe reinsurance program.

Assuming the midpoint of the pricing range provided by the reinsurance broker, and consistent with the broker's advice that pricing is expected to remain flat in the year following 2027/28, no increase has been assumed for 2028/29. Accordingly, a reinsurance expense of $46.6 million has been projected for both 2027/28 and 2028/29 for the catastrophe treaty. This amount assumes an 80% placement level for the catastrophe reinsurance program and applies the 91.5% allocation to the Basic line of business.

h) See the below figure for the requested alternative rate indication. Note that beyond the revised catastrophe premium forecast, all other assumptions remain unchanged.

19	**Balanced Cred Wtd Premium**	1,125.13	1,502.37	1,164.01	2,841.24	878.92	106.73	6.86
20	**Balanced Cred Wtd Rate Indication**	4.26%	3.93%	5.11%	3.29%	4.41%	22.83%	37.15%

i) All else held equal, a $10M increase in catastrophe premiums would increase MPI's overall indicated rate change from 2.38% to 3.08%, an increase of 0.70%.

j) One of the key learnings from the 2023 catastrophe event was the importance of obtaining damage estimates as quickly as possible to improve the accuracy of the overall event loss estimate. Individual claim reserves are established once a vehicle has been inspected and an estimate has been completed. Until that time, uncertainty regarding claim severity is reflected through the event-level loss estimate, including the allowance for incurred but not reported (IBNR) claims and claims that have been reported but not yet fully assessed.

The circumstances surrounding the June 2026 event differ significantly from those of the 2023 event. The 2023 event occurred during a labour interruption, which limited MPI's ability to complete inspections and estimates, resulting in greater uncertainty regarding the ultimate cost of the event. In contrast, MPI has had access to its full complement of staff during the June 2026 event and has implemented its catastrophe response plan, including the opening of two dedicated catastrophe estimating centres to help process the high volume of claims and obtain damage estimates more quickly.

These actions are intended to provide better insight into the severity of reported claims at an earlier stage and reduce uncertainty in the overall event loss estimate. As additional vehicles are inspected and estimated, MPI gains more information on claim severity, which supports refinements to both individual claim reserves and the event-level IBNR estimate. MPI continues to monitor claim emergence and severity trends closely and will update its estimates as additional information becomes available.

k) MPI does not intend to change the rate request. The rate request was developed based on the best estimate assumptions and information available at the time of filing. As time passes, actual experience may differ from the assumptions underlying the indication, whether due to catastrophe losses, claims trends, inflation, investment returns, or other factors. This uncertainty is an inherent part of ratemaking. MPI sets rates using its best estimate of expected costs, while the Rate Stabilization Reserve exists to absorb adverse experience and risks that are not fully reflected in rates, including large catastrophe events (i.e., pricing risk). In next year's filing, the catastrophe loading will likely be higher than in the past and the expected cost of reinsurance will increase.

l) The corporation does not have such a policy. Forecasts will never be exact, they are completed with the best information at a specific time. Given the inherent inaccuracies of forecasting actual rate need, MPI believes no measurable benefit can be taken from re-submitting updated forecasts, particularly considering the administrative burden placed on its employees ~~and the correction that occurs with an annual filing~~.

The circumstances surrounding the June 2026 event differ significantly from those of the 2023 event. The 2023 event occurred during a labour interruption, which limited MPI's ability to complete inspections and estimates, resulting in greater uncertainty regarding the ultimate cost of the event. In contrast, MPI has had access to its full complement of staff during the June 2026 event and has implemented its catastrophe response plan, including the opening of two dedicated catastrophe estimating centres to help process the high volume of claims and obtain damage estimates more quickly.

These actions are intended to provide better insight into the severity of reported claims at an earlier stage and reduce uncertainty in the overall event loss estimate. As additional vehicles are inspected and estimated, MPI gains more information on claim severity, which supports refinements to both individual claim reserves and the event-level IBNR estimate. MPI continues to monitor claim emergence and severity trends closely and will update its estimates as additional information becomes available.

k) MPI does not intend to change the rate request. The rate request was developed based on the best estimate assumptions and information available at the time of filing. As time passes, actual experience may differ from the assumptions underlying the indication, whether due to catastrophe losses, claims trends, inflation, investment returns, or other factors. This uncertainty is an inherent part of ratemaking. MPI sets rates using its best estimate of expected costs, while the Rate Stabilization Reserve exists to absorb adverse experience and risks that are not fully reflected in rates, including large catastrophe events (i.e., pricing risk). In next year's filing, the catastrophe loading will likely be higher than in the past and the expected cost of reinsurance will increase.

Given the inherent inaccuracies of forecasting actual rate need, MPI believes no measurable benefit can be taken from re-submitting updated forecasts, particularly considering the administrative burden placed on its employees.

PUB (MPI) 1-24

Part and Chapter:	**Part VIII - Pro Formas, Figures PF-1, PF-3** **PUB (MPI) 1-18 (2026 GRA)**	**Page No.:**	**4-7**
PUB Approved Issue No:	**4. Financial forecast**		
Topic:	**Financial Forecast**		
Sub Topic:	**Break-Even Mandate, Net Income and MCT Trajectory**		

Preamble to IR (If Any):

Figure PF-1 shows Net Income for Rate Setting Purposes rising from $10.9 million in 2026/27 to $92.5 million in 2030/31. Figure PF-3 shows the Basic MCT ratio reaching 127.2% by 2030/31, supported in every year by transfers from Extension of $41.9 million to $54.2 million. The forecast assumes future rate increases the Board has not approved.

In PUB (MPI) 1-18 (2026 GRA), MPI stated it balances long-term break-even pricing with just and reasonable rate changes, and that absent the Extension transfers, Basic would require larger rate increases.

Question:

a) Please state which revenue basis the capital management policy's 100% MCT five year test is applied to: the base forecast including assumed future rate increases, or approved and applied for rates only.

b) Please state what action follows under the capital management policy if the five year MCT test fails on the approved and applied for rates basis, and how the assumed transfers from Extension interact with that trigger.

c) Please reconcile the forecast Net Income for Rate Setting Purposes of $92.5 million in 2030/31 with the long-term break-even pricing mandate.

d) Please explain how the forecast MCT of 127.2% in 2030/31 aligns with the capital targets in the Capital Management Plan.

Rationale for Question:

To understand the application of the capital management policy to the financial forecast.

RESPONSE:

a) b) and d) MPI does not currently have a capital management policy outside of what appears in section 18 of *The Manitoba Public Insurance Corporation Act*, including the threshold for a capital rebate application. Please refer to 2026 GRA PUB (MPI) 1-072 where the PUB acknowledged in its preamble "MPI does not currently have a capital management policy". In the 2024 GRA, the PUB, through Directive 10.7 of Order 145/23, dismissed the approval of MPI's proposed capital management plan (CMP) after declining to approve it in the 2023 GRA (for reasons identified in Order 4/23)."

c) Refer to 2026 GRA PUB (MPI) 1-18. As stated in the 2026 response, break even pricing is not the only contributing factor in the forecast of net income. The net income for rate setting line in the pro-formas includes multi-year rate changes, deferral of initiative expenses, and rate stabilization reserve (RSR) investment income. MPI continues to apply for approval of rates for Basic that are determined in accordance with Accepted Actuarial Practice (AAP), with a zero profit provision. Income projected to be earned from RSR investments is not considered in establishing break-even rates; it is only used to build capital within the RSR. In addition, as per PUB Order 4/23, forecasted initiatives are currently excluded in this line.

Sub Topic:	**Upgrade Factor Selection and Rate Group Expansion Revenue**		

Preamble to IR (If Any):

Figure REV-13 forecasts upgrade factors of 4.36% for 2026/27 and 2.64% to 2.99% thereafter.

MPI changed the methodology for determining the upgrade from only HTA units to all units.

The vehicle upgrade selection of 2.84% is a five-year average excluding COVID-affected years and rate group expansion impacts. Actual vehicle upgrade was 5.07% in 2025/26 and the three-year average is 3.68%.

The DSR upgrade was negative 0.80% in 2025/26.

Question:

a) Please quantify the effect of the change in methodology on the forecast premium relative to the prior HTA-only approach.

b) Please explain the drivers of the negative DSR upgrade and how the forecast DSR upgrade interacts with the proposed increases to vehicle premium discounts.

Rationale for Question:

To understand the basis for the upgrade factor selections.

RESPONSE:

a) The figures below compare the premium forecasts based on the vehicle upgrade factors filed in the 2027 GRA, which are derived using all vehicles (HTA and non-HTA), with the forecasts derived under the historical HTA-only methodology. The corresponding vehicle upgrade factor forecasts are also shown in *Figure 2*, with the revised assumptions highlighted in italics.

b) The DSR upgrade measures the impact on vehicle insurance premiums arising from changes in the average DSR level of registered vehicle owners. A negative DSR upgrade indicates that, on average, more drivers are moving up the DSR scale than expected, receiving higher discount, thus resulting in lower premium revenue for MPI.

The intent of the DSR upgrade component is to capture the impact of natural movements in DSR levels, independent of any changes to the DSR discount structure itself. DSR upgrade is forecasted based on projected driver movements described in *Part VIII REV.3* in 2027 GRA. Accordingly, the forecasted DSR upgrade and the proposed changes to vehicle premium discounts are separate and independent assumptions, with no interaction between the two.

PUB (MPI) 1-26

Part and Chapter:	Part VIII Pro Formas	**Page No.:**	Multiple
PUB Approved Issue No:	4. Financial Forecast		
Topic:	Financial Forecast		
Sub Topic:	Extension Premium Changes		

Preamble to IR (If Any):

EPF-1, EPF-3, and EPF-4 are included.

Question:

a) Please provide an EPF-2.

b) Please indicate what assumptions have been made in the Extension forecast with regard to volume growth, vehicle upgrade, DSR change and rate change; preferably similar to Figure REV-2 but for Extension.

Rationale for Question:

To understand what assumptions have been included in the Extension forecast.

RATIONALE FOR REFUSAL TO FULLY ANSWER THE QUESTION:

a) and b) MPI refuses to answer this question on the basis that the Public Utilities Board does not have jurisdiction over the Extension line of business and MPI is not prepared to voluntarily provide this level of information.

PUB (MPI) 1-27

Part and Chapter:	**Part VIII Revenues**	**Page No.:**	**8 of 37**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Revenue**		
Sub Topic:	**Volume Growth**		

Preamble to IR (If Any):

For Private Passenger, MPI selected a lower trend of 1.42% based on 2012-2025, with Statistics Canada indicating a population decline. In the 2026 GRA, MPI had selected a trend of 2.00% as actuals have been coming in higher than forecasted. Actual change in 2025/26 was 2.32%.

For Public, MPI selected 2.16% based on 2012-2025 including a factor for mobility and new normal. Actual growth rates for 2021/22 to 2025/26 were 3.55%, 13.34%, 4.66%, 3.98%, and 3.19%, respectively.

Question:

a) Please show the calculation of the selected 1.42% for private passenger.

b) If the selected volume growth factor for private passenger for future years was unchanged from those selected in the 2025 GRA, what would be the impact on the rate indication?

c) Given the last 5 years of growth for Public Vehicles have been 3% or higher, why does MPI expect the growth rate to slow down to 2.16%? What would be the impact on the rate indication if 3% was selected instead?

Rationale for Question:

To understand the selected volume growth factors.

RESPONSE:

a) The selected annual trend of 1.42% for Private Passenger was derived using a log-linear regression model applied to the historical experience data from the 2012 to 2023 accident years. The model results showed high R^2 and adjusted R^2 values, indicating a good fit. The p-value for the time parameter was significant, and the regressions showed varying levels of significance for the time parameter depending on the selected experience period up to 2023 accident year.

Table 1 through 3 in ***Appendix 1*** illustrate the model inputs, fitted regression results, and corresponding trend indications used in the analysis. Based on the estimated slope of the fitted log-linear regression model, the indicated annual trend was calculated to be 1.42%.

b) MPI has shown the impact of using the Private Passenger volume growth factors selected in the 2025 GRA in Figures 1 through 4. For this scenario, MPI recalculated the Private Passenger rate indication by replacing the current selected future year volume growth factors with the corresponding selections from the 2025 GRA. All other assumptions and inputs were held constant.

c) MPI selected a Public Vehicle volume growth factor of 2.16% based on a review of historical growth experience and trend indications derived from the underlying data. The selected annual trend of 2.16% for Public was derived using a log-linear regression model applied to the historical experience data. Starting 2012 to 2025 accident years, the model results showed high R^2 and adjusted R^2 values, indicating a good fit. The p-values are significant for the time parameter, mobility parameter and the new normal parameter. The model incorporates both mobility and post-pandemic new normal variables to account for the impacts of COVID-19 on Public Vehicle exposure, including rental vehicles, which were heavily impacted by pandemic-related changes in travel demand and utilization. After adjusting for these temporary pandemic-related effects through the mobility and the new normal variables, the model indicates that the underlying long-term volume growth trend remains stable and is expected to continue in the post-pandemic environment. Tables 1 through 3 in *Appendix 2* illustrate the model inputs, fitted regression results, and corresponding trend indications used in the analysis.

To assess the sensitivity of the rate indication to this assumption, MPI recalculated the indication assuming a future Public Vehicle volume growth factor of 3.00%, while holding all other assumptions constant. The supporting calculations and resulting impact on the rate indication are presented in Figures 5 through 8.

PUB 1-027 (c)
Figure 3
Public Vehicle
Earned Units

PUB (MPI) 1-28

Part and Chapter:	**Part VIII - Revenues, REV.3** **Figures REV-21, REV-22**	**Page No.:**	**22-23**
PUB Approved Issue No:	**4. Financial forecast**		
Topic:	**Revenue Forecast**		
Sub Topic:	**Driver Unit Growth Selection**		

Preamble to IR (If Any):

MPI selected driver unit growth of 1.35%. The three-year average is 2.16%, the five year average is 1.76%, and actual growth was 2.61% in 2024/25.

Vehicle unit growth is forecast at 1.85% to 1.87% per year.

Question:

a) Please explain the basis for the 1.35% selection relative to recent actual growth and the difference from forecast vehicle unit growth. Confirm it is the average of 2017/18 to 2019/20.
b) Please provide the completed 2025/26 policy year driver unit growth when available.

Rationale for Question:

To understand the basis for the driver unit growth selection.

RESPONSE:

a) MPI selected a driver unit growth assumption of 1.35% after considering both historical experience and the most recent emerging data. While actual driver unit growth was 2.61% in policy year 2024/25 and historical averages have been elevated in recent years, policy year 2025/26 driver units is observed to be materially lower. Based on approximately 50% earned experience as of March 31, 2026, the annualized driver growth for 2025/26 is approximately 1.05%.

MPI therefore did not consider the elevated growth observed during the 2022 to 2024 period to be representative of long-term expected growth.

MPI confirms that the 1.35% assumption was informed by the average growth observed from 2017/18 to 2019/20. In selecting the final assumption, MPI applied judgment after considering the recent moderation in population growth, the high year-to-year variability observed in driver unit growth over the last several years, and the expectation that the elevated growth experienced during the 2022 to 2024 period is unlikely to persist over the long term. As a result, MPI selected a growth assumption that reflects a long-term view of expected driver unit growth rather than relying solely on recent experience.

The selected driver unit growth assumption differs from the projected vehicle unit growth assumption because driver units and vehicle units measure different exposures and are projected separately. Vehicle ownership growth does not necessarily occur at the same rate as growth in the driver population; consequently, the two assumptions are not expected to be identical.

b) MPI will provide the completed policy year 2025/26 driver unit growth in the 2028 GRA, as a full 24-month earning period is required for the policy year to be fully earned. Specifically, policies written in 2025/26 will not be fully earned until the end of the 2027/28 fiscal year.

PUB (MPI) 1-29

Part and Chapter:	**Part VIII - Revenues, REV.4** **Part VIII - Pro Formas, Figure PF-1 (line 14)**	**Page No.:**	**31-34**
PUB Approved Issue No:	**4. Financial forecast**		
Topic:	**Revenue Forecast**		
Sub Topic:	**Reinsurance Premiums Ceded**		

Preamble to IR (If Any):

Figure PF-1 shows reinsurance expense falling from $27.5 million in 2025/26 to $20.6 million in 2026/27, then remaining essentially flat through 2030/31. Reinsurance premiums had been rising following the 2023 hail event and the six storms exceeding the deductible in 2023/24. June hailstorm is not factored into this analysis

Question:

a) Please provide the assumptions underlying the reduction in ceded premiums in 2026/27 and the flat profile thereafter, including retention levels, limits purchased, reinstatement provisions and assumed market pricing.

b) Please provide the renewal status and actual ceded premium for the current treaty year, and update the forecast if the renewal differs materially.

c) Provide an update on recent Cat claims relative to reinsurance limits.

Rationale for Question:

To understand the reinsurance premium forecast and its assumptions.

RESPONSE:

a) The reduction in ceded premium for 2026/27 reflects the actual April 1, 2026 reinsurance renewal cost, which was completed in a softer reinsurance market environment compared to the April 1, 2025 renewal. In addition to being a soft market, MPI had experienced two consecutive treaty years (2024/25 and 2025/26) without aggregate catastrophe losses exceeding the program deductible and reinsurers generally viewed the August 2023 catastrophe event as an isolated event rather than indicative of a recurring loss trend. As noted by MPI's reinsurance broker, the combination of favourable market conditions and recent loss experience resulted in materially improved renewal terms and a significant reduction in reinsurance costs.

The forecast assumed the continuation of the catastrophe reinsurance structure renewed effective April 1, 2026, consisting of:

$100 million excess of $50 million;
$150 million excess of $150 million; and
$100 million excess of $300 million;

for a total catastrophe treaty limit of $350 million excess of a $50 million annual aggregate deductible. There is also a $3 million per event deductible which was increased from the $2M per event deductible in the 2025/26 treaty year.

The treaty contains no reinstatement provisions as coverage is provided on an annual aggregate basis. The first layer is 81.8% placed, resulting in MPI's co-participation on losses within that layer.

Future forecast years assumed no structural changes to the program, retention levels, or limits purchased. The forecast assumed actual 2026/27 renewal premiums for the current year, no premium increase at the 2027/28 renewal, modest 1% increases in 2028/29 and 2029/30, and no increase in 2030/31. These

assumptions were developed prior to the June 2026 catastrophe event and were based on expectations of limited catastrophe loss activity.

b) The reinsurance expense attributable to the Basic line of business reflected in Figure PF-1 is $20.6 million, which reflects the April 1, 2026 renewal and includes approximately $19.5 million related to the catastrophe treaty and $1.1 million related to the Casualty Treaty.

Following the June 2026 catastrophic event, MPI purchased an additional $200 million of catastrophe reinsurance protection effective July 10, 2026 to provide additional protection for the remainder of the 2026 fiscal year. The premium for this additional protection was approximately $38 million on a fully placed basis. The placement achieved to date is 82.3%, resulting in a premium spend of $31.3 million, of which approximately 91.5%, or $28.6 million, is attributable to Basic.

As a result, total reinsurance expense attributable to the Basic line of business for 2026/27, increases from $20.6 million to approximately $49.2 million, consisting of approximately $48.1 million of catastrophe reinsurance expense and $1.1 million of Casualty Treaty expense.

The forecast included in the General Rate Application was developed prior to the June 2026 severe convective storm events and therefore did not contemplate either the additional catastrophe reinsurance purchased effective July 10, 2026 or the potential impact of the June 2026 catastrophe losses on future renewal pricing.

Based on preliminary discussions with MPI's reinsurance broker, the cost of renewing the existing $350 million excess of $50 million catastrophe reinsurance program is currently estimated at approximately $50 million to $60 million on a fully placed basis. MPI has assumed an overall placement level of approximately 80%, reflecting recent placement experience. MPI has also assumed that the additional catastrophe protection purchased effective July 10, 2026 would be maintained in

future years, at an estimated range of $7 million to $10 million on a fully placed basis. Applying the midpoint of the broker's estimated pricing range, the 80% placement assumption, the 91.5% allocation to Basic, and including the Casualty Treaty premium, results in an estimated reinsurance expense attributable to Basic of approximately $47.6 million for 2027/28. Future reinsurance costs are inherently uncertain and will depend on reinsurers' assessment of MPI's exposure, loss experience, available market capacity, and overall market conditions. For forecasting purposes, MPI has assumed the continuation of the current program structure. However, at future renewals MPI would evaluate potential changes to retentions, attachment points, co-participation levels, layering, and limits purchased in order to maintain an appropriate level of protection while managing overall program costs. MPI would also continue to pursue participation from additional markets where available to help improve long-term pricing and capacity.

c) Since the General Rate Application was filed, MPI has experienced several significant catastrophe events, including the June 6–8, 2026 Parkland flooding event, the June 9–12, 2026 Southern Manitoba Severe Convective Storm, the June 28–July 1, 2026 Parkland storms event, and the July 5–7, 2026 Southwest Manitoba storms.

Based on estimates as of July 22, 2026, the June 9–12 Severe Convective Storm is expected to result in approximately $329.1 million of ultimate losses. The June 6–8 Parkland flooding event is currently estimated at approximately $6.7 million, the June 28–July 1 Parkland storms event at approximately $10.2 million, and the July 5–7 Southwest Manitoba storms at approximately $46.4 million. Combined, these events are currently estimated to result in approximately $392.4 million in ultimate losses, excluding adjuster salaries and overtime costs. Approximately 91.5% of these losses, or $359.0 million, are attributable to the Basic line of business, before reinsurance recoveries.

These events remain relatively early in their development and the estimates are subject to significant uncertainty. MPI has observed faster-than-typical claim reporting through its online reporting channels, which may affect the reliability of traditional claim count development patterns and the associated projected ultimate claim counts. As a result, ultimate loss estimates may change materially as additional claims are reported, estimates are completed, and claims are settled.
MPI's catastrophe reinsurance program provides $350 million of aggregate catastrophe protection excess of a $50 million annual aggregate deductible, subject to a $3 million per event deductible and MPI's 18.2% co-participation in the $100 million excess of $50 million layer. Based on current estimates, the 2026 catastrophe events are expected to exceed the annual aggregate deductible and result in significant recoveries under the catastrophe reinsurance program.

Current estimates indicate that MPI's total retention for these events will be approximately $80.2 million, comprising the $50 million annual aggregate deductible, $12 million of per-occurrence deductibles associated with the four events, and approximately $18.2 million related to MPI's co-participation in the first layer of the catastrophe reinsurance program. Applying the current 91.5% allocation to the Basic line of business, approximately $73.4 million of the $80.2 million retention is attributable to Basic. Based on current loss estimates, approximately $312.2 million is expected to be recoverable from reinsurers, with $285.67 million attributable to the Basic line of business. These figures remain preliminary and will continue to evolve as the claims mature.

In light of these events and the potential for catastrophe losses to approach the limits of the existing program, MPI purchased an additional $200 million of catastrophe reinsurance protection effective July 10, 2026, subject to a $70 million annual aggregate deductible and $3 million occurrence deductible, to provide additional protection for the remainder of the 2026 catastrophe season.

PUB (MPI) 1-30

Part and Chapter:	**Part VIII - Financial Forecasting Model** **Sections FFM.3 to FFM.6**	**Page No.:**	**3-7**
PUB Approved Issue No:	**4. Financial forecast**		
Topic:	**Financial Forecast**		
Sub Topic:	**Financial Forecasting Model Validation**		

Preamble to IR (If Any):

The FFM chapter reports one reporting update, no functional updates, no new controls, and states that no testing or validation was required this year. Complex functional changes are made externally by a modelling provider.

OSFI released Guideline E-23 effective May 2027 with regard to Model Validation, highlighting the importance of this for insurance companies.

Question:

a) Please identify the external modelling provider and describe the work performed on the FFM in the last three years.
b) Please indicate when the FFM was last validated end-to-end by a party independent of the forecasting team, and provide the resulting report or summary of findings.
c) Please describe the control sheet checks referred to in section FFM.3.3.

Rationale for Question:

To understand the governance and validation of the Financial Forecasting Model.

RESPONSE:

a) The external modelling providers used during the last three years were The Marquee Group and, beginning in March 2025, Medici Financial Modeling Inc.

External modelling support is retained to provide specialized expertise and assist with more complex model enhancements or issues should they arise.

MPI has filed details of model updates in the previously filed "Financial Model Updates" section of each application.

b) Please note that MPI is not required to comply with *Guideline E-23* as MPI does not report to OSFI.

As submitted in the 2026 GRA, MNP completed an audit of the Financial Forecasting Model (FFM) in May 2025. The audit produced two low rated observations (i.e., *not critical but should be addressed in the longer term to either improve internal controls or efficiency of the process*), for which management will incorporate the following improvements into the 2027 GRA FFM:

- Continuous updating of the FFM guide and annual workflow signoff;
- Review of investment tabs to identify key areas to apply checks/validation;
- Update of control tab to include identified key checks/validations; and
- Implementation of quarterly process to review/validate key components in the control panel.

c) Please refer to *Part X Financial Forecasting Model, FFM.3.3 Model checks and balances* in the 2026 GRA. The control sheet contains checks to ensure the accuracy and consistency of FFM outputs. These checks include reconciliation to source data, identification of significant year-over-year variances, and validation of alignment between corporate and line-of-business financial results.

PUB (MPI) 1-31

Part and Chapter:	**Part VIII – EXP Appendix 24**	**Page No.:**	**1 - 3**
PUB Approved Issue No:	**5. Updates to the Corporate Strategic Plan and the development/implementation and alignment of KPIs**		
Topic:	**KPIs**		
Sub Topic:	**Budgeting KPIs**		

Preamble to IR (If Any):

In reference to Figures EXP App 24-1 and 24-2, MPI notes on page 2 that

"The figures listed above are not performance targets. They are forecasted values generated from MPI's long-term financial forecasting model and represent MPI's best estimate of expected performance based on current assumptions. These figures are used for planning purposes and to support multi-year visibility into operational and financial trends. They are not intended to serve as fixed goals or performance benchmarks.

As an insurance business, these ratios (combined, loss, expense) are subject to variability due to a wide range of external factors, including claims volatility, inflation, regulatory shifts, and other economic events and conditions, many of which are outside of MPI's control. These uncertainties mean MPI cannot absolutely predict these ratios over the long-term with certainty. As a public auto insurer operating within a fixed service delivery model, MPI lacks many of the operational levers that a private insurer might use to respond to these conditions. As a result, setting long-term targets for these ratios would not be meaningful and could create unrealistic expectations about the degree of predictability and influence MPI has over these figures. Instead, the forecasted values provide a directional view to support trend analysis and internal planning."

We also note that many of the KPIs in Figure EXP App 24-2 reflect steady improvements over time, indicating external and/or internal improvement in conditions that yield more favourable results.

Question:

a) Acknowledging MPI's explanation noted in the preamble and the fact that some KPIs are dependent in part on factors external to the company, which of the 14 Budgeting KPIs are indicative or reflective of internal operational and/or financial performance of MPI?

b) Please provide an example of how the Budgeting KPIs are used internally by MPI management and the Board to assess performance and make decisions.

c) Please indicate whether MPI provides variance and/or trend analysis for Budgeting KPIs and provide an example of such analysis.

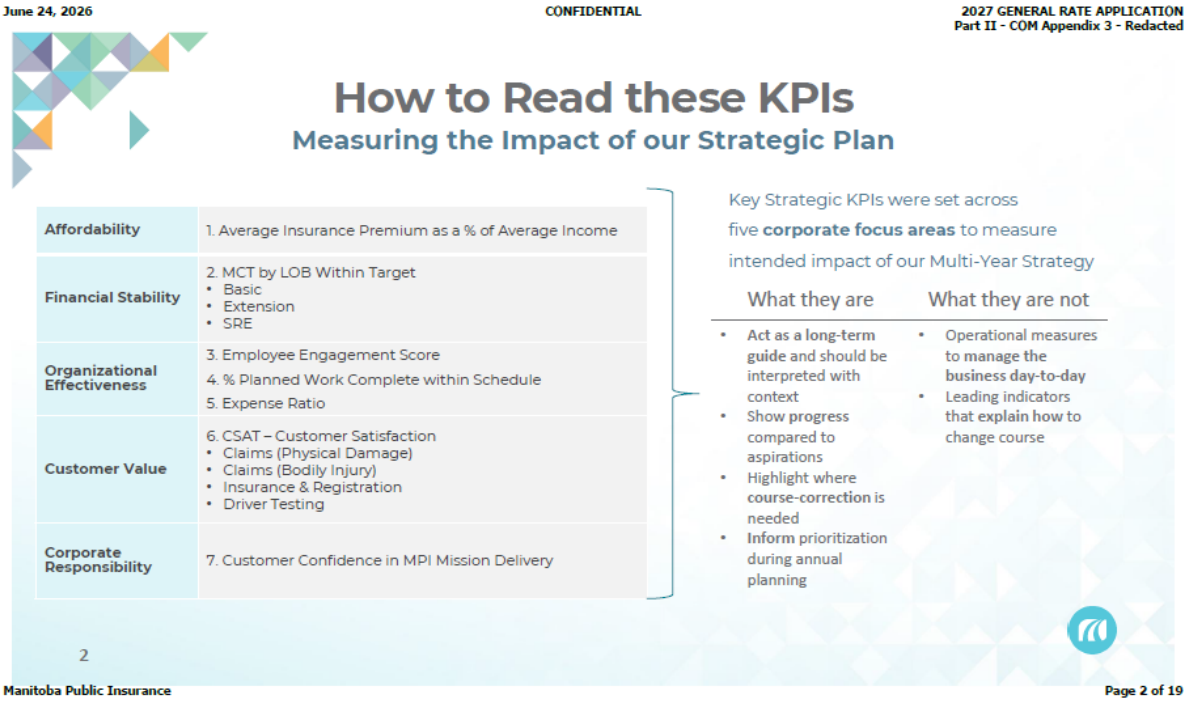
Rationale for Question:

To understand the basis for excluding budget KPIs from target setting and benchmarking.

RESPONSE:

a) Refer to MPI's previously filed responses in the 2026 GRA, including PUB (MPI) 1-046, PUB (MPI) 2-047, CC (MPI) 1-028, CC (MPI) 2-004 and CC (MPI) 2-047. As previously explained, the budgeting KPIs are directional planning and monitoring tools that support visibility into operational and financial trends. MPI does not view the 14 budgeting KPIs as falling into a singular classification of either internally controllable or externally driven. As explained in the 2026 GRA, the KPIs are interrelated and are affected by a combination of MPI's operating decisions, claims experience, inflation, regulatory rate-setting, investment and insurance finance impacts, and other external economic or business conditions. The KPI's are influenced by MPI's fixed public-service delivery model, labour and vendor cost structures, modernization requirements, and other factors that limit the extent to which they can reasonably be treated as controllable performance targets.

b) MPI previously explained that budgeting KPIs are calculated as part of monthly, quarterly and annual reporting to senior leadership and the executive team, depending on the measure. They are used to inform performance discussions, provide visibility into emerging trends, and support management and Board understanding of the financial and operational outlook. For example, MPI compares actual results to the expected ratios implied by the approved budget and forecast to understand the drivers of change, assess whether results remain directionally consistent with the financial forecast, and to inform planning and decision-making. These comparisons are not used as a mechanical trigger for corrective action because the measures are not formal targets and because changes in the ratios may arise from factors outside of MPI's direct control.



c) MPI does provide variance and trend analysis in the ordinary course of its quarterly and year-end financial reporting and planning processes. As previously filed in the 2026 GRA, MPI monitors budget-to-actual results to identify and explain key drivers, including operating expense impacts, claims experience, revenue assumptions, initiative expense treatment, and other items that affect reported ratios.

Figure BMK App 4-1 2022-23 Comparative Benchmark Report

Line No.	Performance Measurement	SGI Auto Fund	MPI Basic Compulsory	ICBC
1	**Headcount Analysis**			
2	1. FTEs per $100 Million of Gross Premiums Written	134.0	124.5	93.3
3	2. Mgmt FTEs per $100 Million of Gross Premiums Written	16.7	9.8	11.1
4	3. Staff FTEs per $100 Million of Gross Premiums Written	117.3	114.6	82.2
5	**Span of Control Analysis**			
6	4. Ratio of Staff to Management	7.0	11.7	7.4
7	**Premium Metrics**			
8	5. Total Gross Expenses as a % of Gross Premiums Written	25.1%	16.1%	11.5%
9	6. Average Gross Premiums Written (000's)	1,036,243	1,123,870	3,219,692
10	7. Gross Premiums Written per FTE	746,035	803,304	1,071,850
11	8. Gross Premiums Written Growth	2.9%	4.0%	14.8%
12	9. Net Premiums Written as a % of Gross Premiums Written	98.2%	98.5%	99.9%
13	10. Total Net Expenses as a % of Net Premiums Written	25.5%	16.3%	11.5%
14	**Policy Metrics**			
15	11. Adjusted Policies In Force per FTE	690.1	884.0	1,390.0
16	12. Total Gross Expenses per Adjusted Policy In Force	270.9	146.0	88.6
17	**Traffic Safety Measurements**			
18	13. Total Traffic Safety Expenses (000's)	20,242	10,530	29,434
19	14. Total Traffic Safety Expenses as a % of Gross Premiums Written	2.0%	1.0%	0.9%
20	**Other Performance Measurements**			
21	15. Pure Loss Ratio	102.8%	70.6%	62.7%
22	16. Loss Adjustment Expense Ratio	15.9%	13.5%	17.8%
23	17. Total Gross Expenses per FTE	186,937	129,060	123,188

Question:

a) Please explain the basis for MPI terming the KPIs for FY25/26 to FY29/30 “Milestones” rather than “Targets”.

b) For each Strategic KPI, please indicate whether MPI considers it to be primarily a compliance/maintenance measure or a performance improvement measure, and the key external and internal drivers to positively impact improvements in the measure.

c) Please explain the basis of limiting the overall number of Strategic KPIs to 7.

d) Please explain how MPI intends the Strategic KPIs to enable the PUB and intervenors to assess management’s performance and the effectiveness of MI’s strategic direction.

e) Please confirm whether MPI considered other measures of productivity, efficiency or quality from the list of 17 comparative benchmarks used from MPI’s prior benchmarking exercise with ICBC and SGI, and provide any analysis of other measures considered but not selected, and the rationale for exclusion.

f) Noting that accomplished work carries with it co-dependent characteristics of cost, quality and timeline, and that timelines can be extended to accommodate the pace and volume of activity, please explain the rationale for including “% of Work Completed Within Schedule” as a relevant measure and reflective of strong performance at MPI.

g) Given that the “Average Insurance Premium as a % of Average Income” KPI is highly dependent on the external variable average income as the denominator, please explain the rationale for including this measure as one of the 7 Strategic KPIs rather than monitoring it. Please explain what outcomes MPI anticipates from the change in this measure, and how will this measure drive MPI management decision-making.

h) Referring to the "Customer Satisfaction Key Areas" KPI, why is MPI targeting flat or modest increases in Milestone score from FY25/26 to FY27/28.
