i) Please provide the rationale for including the "Customer Confidence in MPI Mission Delivery" measure as one of 7 Strategic KPIs and explain how changes in this measure will drive MPI management decision-making.

Rationale for Question:

To understand the rationale for the individual Strategic KPIs and the set of Strategic KPIs as a whole.

RESPONSE:

a) Both can be used, however MPI has chosen to use the term milestones.

The strategic KPIs are intended to provide directional measures of organizational success and progress toward MPI's long-term strategic outcomes. While MPI has established baseline measures and initial milestones for the first three years of strategic plan implementation, the organization continues to mature its understanding of the operational, organizational, and external factors that influence strategic outcomes.

As part of this ongoing evolution, MPI is working toward a more comprehensive performance framework that will further strengthen the connection between operational measures, organizational activities, and strategic outcomes. This work requires validation of relationships between strategic measures and development of a more complete cascading performance model across the organization.

In this context, milestones provide an appropriate mechanism to communicate expected progress while preserving the flexibility necessary to incorporate organizational learning, improved performance insight, and changes in operating conditions for future milestone setting.

This reflects a deliberate and disciplined approach to building a sustainable strategic performance management system. MPI believes that demonstrating consistent year-

over-year progress toward strategic outcomes is a more meaningful indicator of organizational maturity than establishing fixed long-term targets before the underlying performance framework is fully developed.

b) The Corporation does not consider its strategic KPIs to be solely compliance maintenance measures, as each KPI is also intended to provide insight into performance against one or more strategic outcomes. Consistent with the purpose of a Key Performance Indicator, the strategic KPIs are designed to help MPI understand whether performance is improving, remaining stable, or declining over time, and to support informed decision-making regarding the achievement of Corporate Strategic Plan outcomes.

While some KPIs may reflect a desire to improve performance relative to current baselines and others may emphasize sustaining strong results or preventing deterioration, all seven strategic KPIs are performance-oriented measures. The distinction is therefore not between maintenance and improvement, but rather between the different strategic outcomes being measured and the nature of the performance required to achieve them

Performance against the strategic KPIs is influenced by both internal and external factors. As MPI continues to mature its strategic KPI framework, understanding the impact of these factors provides important context for interpreting results, assessing performance trends, and evaluating progress toward strategic outcomes. The key internal and external influences associated with each KPI are identified in *Part II COM Appendix 3 pages 12-19*.

c) MPI intentionally limited the number of strategic KPIs to maintain focus on a manageable set of measures that reflect the organization's most important strategic outcomes.

Strategic KPIs are intended to provide a high-level view of whether MPI is making progress toward the outcomes established in its Corporate Strategic Plan.

The strategic KPIs selected by MPI help ensure that performance discussions remain focused on the outcomes that matter most. They also support the development of a performance-oriented culture by allowing employees, leadership, the Board of Directors, and external stakeholders to consistently understand and discuss organizational performance using a common set of indicators.

The strategic KPIs represent broad outcome areas where MPI expects to achieve meaningful strategic impact. Together, they provide a balanced view of performance across customer, financial, operational, workforce, and strategic execution dimensions.

d) MPI intends its strategic KPIs to provide the PUB and intervenors with a transparent, outcome-oriented view of whether the Corporation is making progress toward the impact expected from its Corporate Strategic Plan. Rather than measuring the completion of individual initiatives, the strategic KPIs are intended to measure the impact that implementation of the strategy is having on the outcomes that matter most to Manitobans, including affordability, financial stability, organizational effectiveness, customer value, and corporate responsibility.

By monitoring outcomes such as affordability, financial stability, customer experience, employee engagement, and public confidence, the KPIs help demonstrate whether MPI's strategic initiatives are contributing to sustainable service delivery and long-term value for Manitobans.

The strategic KPIs also support accountability by providing a common and recognizable set of measures through which management, the Board of Directors, the PUB, and intervenors can assess organizational performance over time. Trends in KPI performance can be considered alongside information regarding strategic initiatives, operational performance, and external influences to provide a broader understanding of whether the Corporation's strategic direction is producing the intended outcomes and where additional focus or adjustment may be required.

e) The strategic KPIs were developed based on the specific outcomes anticipated through the Corporate Strategic Plan rather than in comparison to other jurisdictions identified through previous benchmarking exercises.

f) MPI acknowledges that the delivery of planned work involves interdependent considerations of scope, cost, quality, resources, and timelines. The "% of Planned Work Completed Within Schedule" KPI is not intended to suggest that schedule performance should be pursued in isolation from these other factors. Rather, the KPI is intended to provide an enterprise-level view of whether MPI is selecting, planning, and delivering a realistic portfolio of strategic work within the fiscal year.

This measure is relevant because strong performance depends on more than completing individual initiatives; it also depends on the organization's ability to make disciplined choices about what work should be undertaken, when that work should occur, and whether the planned portfolio is aligned to available capacity. In this respect, the KPI encourages three important behaviors.

First, it supports stronger annual planning by encouraging MPI to consider resource capacity when determining the volume and timing of work included in the annual planning portfolio. A higher completion rate within schedule indicates that priorities, resources, and organizational capacity are being effectively aligned, while lower performance may indicate that the Corporation has taken on more work than can reasonably be delivered or that priorities require re-evaluation.

Second, it reinforces adherence to MPI's established planning and governance processes. Through annual planning, the Strategy-to-Execution (S2E) framework, and Corporate Planning Governance (CPG) processes, MPI prioritizes and approves a portfolio of work based on strategic importance and organizational capacity. The KPI provides an enterprise-level view of how effectively the organization is executing against that planned portfolio and whether planning, prioritization, and governance processes are functioning as intended. It also helps MPI better understand the impacts of changes in priorities, scope, timing, and capacity as decisions are made throughout the year.

Third, it encourages stronger estimating practices. If planned work is consistently not completed within schedule, that may indicate that initial estimates did not sufficiently reflect the effort, complexity, dependencies, or capacity required to deliver the work. Over time, monitoring this KPI helps strengthen the organization's ability to establish realistic plans and make better-informed decisions about sequencing and resourcing.

For these reasons, the KPI is best understood as a measure of organizational planning and execution discipline, not as a narrow project management metric. The KPI is intended to measure the effectiveness of MPI's prioritization, planning, and execution processes in delivering strategic work, and to provide insight into whether the organization is aligning the volume of work undertaken in a fiscal year with available capacity. It is also not intended to measure project management performance at the individual initiative level, but rather to provide an enterprise-level view of whether MPI is selecting and executing a realistic portfolio of work.

g) MPI included the Average Insurance Premium as a % of Average Income measure as a strategic KPI because affordability is one of the Corporation's core strategic focus areas and a key outcome for Manitobans. While average income is an external variable that MPI does not control, the relationship between insurance premiums and income provides an important indicator of how affordable vehicle insurance remains for Manitobans over time.

The measure is also supported by customer feedback. In MPI's 2024 research, 73% of Manitobans indicated that vehicle insurance in Manitoba is affordable.

MPI does not view the 2.25% milestone as a target to be achieved. Rather, the milestone represents an affordability ceiling or threshold intended to serve as an early warning indicator of affordability pressures if the results begin to trend towards this ceiling. The objective of the KPI is to maintain a level of affordability that a significant majority of Manitobans currently consider affordable by ensuring the ratio remains below the 2.25% threshold. The KPI is therefore intended to act as a guardrail, not a destination.

The KPI supports management decision-making by providing visibility into affordability trends over time. Monitoring the ratio enables MPI to identify emerging affordability pressures and take a proactive approach if results begin trending upward toward the threshold. This allows the Corporation to consider actions within its control, including product changes, initiatives intended to influence long-term claims cost structures, and other measures designed to maintain affordability for Manitobans while continuing to strengthen the Corporation's overall financial position.

As a strategic KPI, the value of the measure is not limited to reporting historical affordability results. Rather, it provides an ongoing view of whether affordability outcomes remain within an acceptable range and helps ensure affordability remains a prominent consideration in strategic planning and decision-making.

h) MPI is targeting flat or modest increases in Customer Satisfaction milestone scores from FY25/26 to FY27/28 because customer satisfaction outcomes typically improve gradually over time and are influenced by multiple factors, including service performance, claims experience, customer interactions, and evolving customer expectations. The milestones were established with consideration of historical customer satisfaction performance, anticipated service improvements, and management assessment of what constitutes a realistic and sustainable rate of improvement over the planning period. MPI's objective is to set targets that are both meaningful and achievable, recognizing that significant year-over-year increases in mature customer satisfaction measures are generally more difficult to sustain as performance levels improve. Although the planned increases are modest, the targets require MPI to maintain performance gains while continuing to improve customer experience in an environment of changing customer expectations and service demands.

i) MPI included Customer Confidence in MPI Mission Delivery as a strategic KPI because it provides insight into Manitobans' overall perception of MPI's ability to fulfill its mission and public responsibilities.

Unlike customer satisfaction measures, which focus on specific customer interactions or service experiences, and affordability measures which focus on actual financial

experience, the Customer Confidence in MPI Mission Delivery measure provides a broader view of public perception of MPI as an organization. It reflects how Manitobans perceive MPI's performance across its responsibilities and fulfilling its public mandate, including delivering affordable and comprehensive insurance products, supporting road safety, and providing exceptional and accessible services.

MPI believes this measure is particularly relevant to the Corporate Responsibility focus area because it reflects whether Manitobans believe the Corporation is meeting the expectations associated with its mission. While individual strategic KPIs provide insight into specific outcomes, this measure serves as a broader indicator of public confidence in MPI's overall contribution to Manitobans and its ability to deliver its mandate as a public insurer over time.

Changes in this measure help inform annual planning and priority-setting discussions by identifying areas where public perceptions may not align with intended outcomes. Trends in confidence can help management assess opportunities to allocate or reallocate resources toward initiatives, programs, services, communications, and investments that support MPI's mission, including its contributions to road safety, its product portfolio, service excellence, and affordability.

Consistent with MPI's broader strategic KPI framework, the measure is not intended to evaluate a single program or service in isolation. Rather, it functions as a strategic indicator of how Manitobans perceive MPI's overall performance in delivering its mission and public responsibilities.

23	17. Total Gross Expenses per FTE	186,937	129,060	123,188

Question:

a) Please provide a trending schedule in a similar format to Exhibit 8 above from 2018/19 (pre-COVID) to 2025/26, reflecting updated results for all 17 measures, including prior SGI and ICBC data and updated MPI data through 2025/26.

b) With this trend data, please provide explanations for material variances in MPI results from 2022/23 to 2025/26

Rationale for Question:

To understand MPI performance results from 2022/23 to 2025/26.

RESPONSE:

a) and b) MPI refers the PUB to its previously filed responses in the 2026 GRA, including PUB (MPI) 1-78 and PUB (MPI) 2-63. In those responses, MPI explained that the prior Crown operational benchmarking exercise with SGI/SAF and ICBC was discontinued because certain comparative data from other Crown insurers is no longer publicly disclosed and is subject to restrictions on external filing.

MPI also refers to the prior 2026 GRA evidence summarized in PUB Order 156/25, section 8.0 Benchmarking, which notes that MPI previously included the results of a Crown benchmarking exercise comparing corporate and operational metrics with ICBC and SGI, but that this practice was discontinued due to confidentiality restrictions from the data providers, who now only permit the use of their information for internal collaboration. The same section of the Order notes that MPI will place greater emphasis on internal performance evaluation by relying more heavily on budgeting processes and key performance indicators to assess operational efficiency and accountability in the absence of external comparisons.

Accordingly, MPI has not prepared the requested updated 2018/19 to 2025/26 trend schedule for all 17 legacy Crown benchmarking measures using prior SGI/SAF and ICBC data and updated MPI data. Reconstructing the discontinued schedule using historical or

publicly available information would not provide the same level of comparability, reliability, or current decision-usefulness as the former jointly understood benchmarking exercise.

MPI continues to monitor performance through its internal KPIs, quarterly reporting, operational reporting, and targeted external comparative information where meaningful and available (and already filed in the 2027 GRA application). This approach is consistent with MPI's evidence filed in the 2026 GRA and reflects MPI's view that current, decision-useful performance evaluation is better supported through internally governed measures and targeted external context than by extending a discontinued Crown benchmarking schedule with incomplete or non-comparable public information.

PUB (MPI) 1-34

Part and Chapter:	**Part VIII – EXP Appendix 22**	**Page No.:**	**1-10**
PUB Approved Issue No:	**5. Updates to the Corporate Strategic Plan and the development/implementation and alignment of KPIs**		
Topic:	**Budgeting Process Framework**		
Sub Topic:	**Operating Expenses**		

Preamble to IR (If Any):

From pages 3-4:

"Operating expenses are subject to a combined top-down and bottom-up approach to ensure alignment.

The Executive Committee (EC) establishes top-down guidance (EXP Appendix 22a). This also reflects direction, if any, from the Treasury Board (TB). As of the filing date, TB has not advanced any guidance with respect to its operating or capital expenditure. MPI does not expect any specific guidance to be advanced in the near term.

Alignment at the EC level is then disseminated to individual business units as a guard rail on departmental budget expectations."

Question:

a) Please comment on any changes made to the overall budgeting process from prior year(s) for the 2027/28 GRA.

b) Please describe how the top-down guidance in factored into the final approved budget, particularly in circumstances where the top-down guidance is lower than the bottom-up approach.

c) Assuming the top-down guidance did not equal the bottom-up operating expense budget, please comment on the final approved operating expense budget versus the bottom-up values and the top-down guidance values, and the nature of any corresponding adjustments made to arrive at the final approved budget. If trade-offs were required (as noted on page 4), please comment on trade-offs made to finalize the budget.

d) Please provide an update on any anticipated top-down guidance from Treasury Board, and how that will get reconciled with the budget approved by MPI Management and the MPI Board.

Rationale for Question:

To understand how the bottom-up and top-down budgeting processes work in conjunction.

RESPONSE:

a) There have been no material changes to the overall operating expense budgeting process from the prior year for purposes of the 2027/28 GRA. MPI's response is consistent with, and should be read together with, the 2026 GRA responses to CC (MPI) 1-26 and CC (MPI) 2-2, as well as the budgeting framework filed as Part X EXP Appendix 27 in the 2026 GRA. As described in those materials, MPI uses a combined top-down and bottom-up approach. Executive Committee establishes enterprise-level guidance for operating expenses and staffing, and departments prepare budgets based on operating requirements, initiative plans, known contractual obligations, expected cost pressures, and resource needs while considering the guidance and constraints provided. Nothing has materially changed in that process.

b) MPI's response is consistent with the 2026 GRA responses to CC (MPI) 1-26 and CC (MPI) 2-2, which described the role of Executive Committee top-down targets as guardrails within an iterative budget process. Top-down guidance is factored into the final approved budget by establishing the initial enterprise-level expectation against which bottom-up submissions are assessed. It is not applied as a mechanical allocation or fixed formula to each budget line. Where bottom-up requirements exceed the top-down guidance, the variance is reviewed through the Executive Committee alignment process, which considers corporate priorities, operational requirements, timing, risk, affordability, and the organization's ability to execute the planned work.

c) MPI's response repeats the explanation provided in the 2026 GRA responses to CC (MPI) 1-26(e) to (g), CC (MPI) 2-2(a) and (g), and the related discussion in Part X EXP Appendix 27 (2026 GRA). The bottom-up budget values are aggregated and reviewed at the corporate level. Executive Committee then resolves any competing requirements between

departments and determines whether adjustments are required to operating expenses, staffing levels, timing of initiatives, or other assumptions before the budget is advanced for approval. As described in the 2026 GRA record, the final approved budget may differ from both the initial top-down guidance and the original bottom-up submissions. Those differences reflect the normal outcome of the alignment process and do not indicate a change in budgeting methodology.

The nature of any adjustments remains consistent with the 2026 GRA responses. Adjustments may include reprioritizing work, pacing initiatives, refining assumptions based on updated information, recognizing known contractual or operational cost pressures, and updating forecasts as more current information becomes available. Trade-offs, where required, are made in the context of maintaining service delivery, supporting corporate priorities, managing affordability, and ensuring that the final budget is achievable. This is the same alignment and trade-off process described in the 2026 GRA response to CC (MPI) 2-2(g), where MPI explained that top-down targets operate as guardrails and that certain operational and initiative expenditures cannot be fully predicted until the bottom-up and initiative planning processes are completed.

d) With respect to Treasury Board, MPI's response is consistent with the 2026 GRA budgeting framework filed as Part X EXP Appendix 27 and the 2027 GRA budgeting framework filed as Part VIII EXP Appendix 22. As of the filing date, Treasury Board had not advanced specific operating or capital expenditure guidance for the 2027/28 budget cycle, and MPI does not expect specific guidance to be advanced in the near term. If Treasury Board subsequently provides direction that affects the budget approved by MPI Management and the MPI Board, MPI will reconcile that direction through its normal budget approval and forecasting processes. Any material changes would be reflected in the appropriate subsequent filing or budget update, consistent with the timing and alignment issues previously described in the 2026 GRA record, including CAC (MPI) 1-30 and CAC (MPI) 2-17.

PUB (MPI) 1-35

Part and Chapter:	**Part VIII - Expenses, EXP.2, EXP.3** **Figure EXP App 6-1** **EXP Appendix 12**	**Page No.:**	**6-7, 15-18**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA**		
Topic:	**Cost Allocation**		
Sub Topic:	**Drivers of the Increased Allocation to Basic**		

Preamble to IR (If Any):

Chapter section EXP.2 attributes approximately $23.1 million of the $35.3 million increase in Basic Normal Operating Expenses to a change in the percentage allocated to Basic ($379.3 million x (64.8% - 58.7%)). Figure EXP App 6-1 shows the Basic share of total corporate expenses at 66.0% in 2025/26, rising to 68.8% by 2028/29, roughly 1.0 to 1.5 percentage points higher in every comparable year than in the 2026 GRA.

Question:

a) Please provide a bridge, by allocator, quantifying the movement in the Basic allocation percentage from the 2026 GRA to the 2027 GRA for each forecast year, separately identifying the FTE proportion allocator, the incurred claims proportion allocator, the PMO departmental allocation and the Weighted Customer Contact Center Call Ratio.

b) For each allocator that moved toward Basic, please provide the underlying data (for example FTE counts by line of business and incurred claims by line of business) for the current and prior updates.

c) Please provide corporate normal operating expenses and the amounts allocated to each of Basic, Extension, SRE and DVA for each year 2024/25 through 2028/29

in both the 2026 and 2027 GRAs, and explain the changes in the shares borne by Extension, SRE and DVA.

d) Please describe the controls that ensure allocation shifts toward Basic reflect cost causation rather than residual allocation, given DVA is government funded and Extension operates in a competitive market.

Rationale for Question:

To understand the drivers of the increased allocation to Basic.

RESPONSE:

a) Please see ***Figure 1*** below for Full Time Equivalents (FTE) proportion allocator, the incurred claims proportion allocator, the Project Management Office (PMO) departmental allocation and the Weighted Customer Contact Center Call Ratio (WCCCR) Basic allocators for 2027 GRA and 2026 GRA.

Figure 1 Basic allocators for 2027 GRA and 2026 GRA

Line No.	Claims Incurred Allocator Fiscal Year	2027 GRA Forecast	2026 GRA Forecast	Change 2027 vs 2026
1	2026/27BF	80.6%	80.0%	0.6%
2	2027/28F	81.9%	80.5%	1.4%
3	2028/29F	83.0%	80.7%	2.3%

27	2026/27BF	90.4%	91.1%	-0.7%
28	2027/28F	90.4%	91.1%	-0.7%
29	2028/29F	90.4%	91.1%	-0.7%
30	2029/30F	90.4%	91.1%	-0.7%
31	2030/31F	90.4%	n/a	-

b) Please refer to *Part VIII Expenses, Figure EXP-5 Summary Table of Assumptions* and *2026 GRA Part X EXP, Attachment A ICAM Review Report* regarding Basic allocation detail.

c) Please see *Figure 2* below for Normal operating expenses for years 2024/25 and 2025/26. Please refer to *Part VIII EXP App-13-1 Cost Allocation Methodology Detail* for 2027 GRA forecast years 2026/27 through 2028/29. For 2026 GRA forecast years, please refer to *2026 GRA Part X EXP App-14-1 Cost Allocation Methodology Detail.*

Figure 2 Normal Operating Expenses

Line No.	Normal Operating Expenses	2027 GRA	2026 GRA	Change 2027 vs 2026
1	*($000's, except where noted)*			
2	**2024/25A**			
3	Basic	243,562	243,562	-
4	Extension	28,012	28,012	-
5	SRE	34,286	34,286	-
6	DVA	57,020	57,020	-
7	Total Corporate	362,880	362,880	-
8	**2025/26A**			
9	Basic	241,160	228,186	12,974
10	Extension	29,146	27,055	2,091
11	SRE	38,288	35,093	3,195
12	DVA	57,706	51,559	6,147
13	Total Corporate	366,300	341,893	24,407

The changes in the shares of normal expenses for each line of business are due to the change in corporate expenses and updates to the current allocation percentage. While the underlying methodology remains unchanged, the allocators may vary from year to year due to its dynamic nature and reliance on being updated annually for most recent fiscal year financial data.

d) Please refer to *Part VIII Expenses, Figure EXP-5 Summary Table of Assumptions* and 2026 GRA *Part X EXP, Attachment A ICAM Review Report* regarding Basic allocation detail.

PUB (MPI) 1-36

Part and Chapter:	**Part VIII - Expenses, EXP.2, EXP.3** **EXP Appendix 12**	**Page No.:**	**6-7, 15-18**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA**		
Topic:	**Cost Allocation**		
Sub Topic:	**Drivers of the Increased Allocation to Basic**		

Preamble to IR (If Any):

Section EXP.3 states that the underlying methodology remains unchanged and that the percentage may vary year to year because allocators are updated annually for the most recent fiscal year financial data. Figure EXP-6 shows a step-up in allocation of 1.6% in 2026/27, followed by 0.4% in 2027/28 and 0.7% in 2028/29.

Question:

a) Appendix 12 provides the allocators for 2026/27BF only, while Figure EXP App 13-1 shows Basic's share of the non-assignable pool rising from 71.9% in 2026/27 to 74.0% in 2028/29. Please provide the Figure EXP App 12-1 allocator table for each forecast year 2027/28 through 2030/31, with the underlying WCCCCR and net incurred claims data.

b) For the net incurred claims allocator, please explain why the allocator is not net of reinsurance and why catastrophe losses are normalized, and quantify the effect of the 2023/24 hail event within the four year rolling average on Basic's allocation percentage.

c) Comparing Figure EXP App 12-1 with Figure EXP App 13-1 of the 2026 GRA, please explain the addition of accounting unit 448 to the WCCCCR and incurred

claims group and of accounting units 425 and 449 to the SRE group, identifying the departments or functions they represent.

d) Please explain the elimination of accounting units 060 and 403, which appeared in the 2026 GRA allocator table but are not listed in Figure EXP App 12-1.

e) Please explain why accounting units 069 and 102 are now allocated differently than in the 2026 GRA, with accounting unit 102 moving from the Estimated Work Effort group (9.40% to Basic) to the 50/50 group (50.0% to Basic) and accounting unit 069 moving from the 50/50 group to the Estimated Work Effort group (40.3% to Basic). If not explained elsewhere in the Application, please explain and discuss the resulting change in the costs allocated to Basic.

f) In PUB (MPI) 2-57 (2026 GRA), MPI acknowledged that the CERP changes and the deductible increase effective April 1, 2026 move claims incurred from Basic to Extension, which should reduce Basic's claims-based allocator share as those years enter the four year rolling average. Please quantify the effect of these coverage changes on the claims incurred allocator in each forecast year and reconcile it with the rising Basic share of the non-assignable pool shown in Figure EXP App 13-1.

Rationale for Question:

To understand the annual allocator updates and their effect on the Basic share of corporate expenses.

RESPONSE:

a) Please see *Figure 1* below for Basic allocators for forecast years. Please refer to *Part VIII Expenses, Figure EXP-5 Summary Table of Assumptions* and 2026 GRA *Part X EXP Attachment A - ICAM Review Report* regarding Basic allocation detail.

b) Please refer to 2026 GRA *Part X EXP Attachment A - ICAM Review Report* regarding Basic allocation detail.

c) In fiscal year 2025/26 the following accounting units were activated:

i. 448 Major Programs Overarching: This operational account was created for expenses related to the administration of Major Programs. These expenses were previously paid as initiative expenses under 274 Nova – Leadership & Delivery Stream.

ii. 425 SRE Fleet Safety: This SRE account was previously active but de-activated when SRE activities were centralized following the 2024/25 re-organization. With the hiring of the Director for SRE Business Development & Stakeholder Relations

the function of SRE teams were divided under two directors and 425 was re-activated.

iii. 449 SRE Business Development & Stakeholder Relations: This SRE account was created with the hiring of a new Director to work on attracting and retaining new SRE business.

d) The accounting units 060 (Product and Pricing) and 403 (Physical Damage Research & Training) were removed from the allocation file as these accounts are no longer used.

e) Accounting Unit 102, IRP, Registration & Licensing, was reassessed following an organizational restructuring. During fiscal 2025/26, a portion of the department's non-insurance related activities and associated staff resources were transferred to another department. The department's actual FTE complement decreased from 24.5 FTEs in fiscal 2024/25 to 17.5 FTEs in fiscal 2025/26 (as at March 31 of each of those years), reflecting the transfer of resources primarily supporting non-insurance functions. Following this restructuring, MPI reviewed the allocation methodology applicable to the remaining activities within the department and concluded that the 50/50 allocation more appropriately reflected the nature of the work being performed. Accordingly, Accounting Unit 102 was moved from the Estimated Work Effort allocation group (9.4% Basic) used in the 2026 GRA to the 50/50 allocation group (50.0% Basic) for the 2027 GRA.

With respect to Accounting Unit 069, Identity Verification & Data Integrity, there was no substantive change to the allocation methodology applied to the accounting unit. The allocation approach remained consistent with the prior year, with only minor changes resulting from the routine annual update of the underlying allocators. The apparent change identified in the information request arises from how the allocation information was presented in the 2026 GRA. The 50/50 allocation represents the first step used to allocate costs between insurance and non-insurance operations. Following this initial allocation step, Accounting Unit

069 is allocated through subsequent allocation methodologies. The information provided in the 2026 GRA did not clearly distinguish these allocation steps, which may have led to the interpretation that Accounting Unit 069 had changed allocation groups. Any change in the Basic allocation percentage reflects normal year-over-year updates to the underlying allocators rather than a change in allocation methodology.

MPI has not completed a formal quantification of the impact to Basic resulting from these specific allocation changes. However, the impact is not expected to be material. The revised allocation for Accounting Unit 102 is being applied to a smaller departmental cost base following the transfer of primarily non-insurance related activities and the reduction in the department's complement from 24.5 FTEs to 17.5 FTEs. Further, there was no substantive change in the allocation methodology applied to Accounting Unit 069, with any change in the Basic allocation percentage reflecting routine updates to the underlying allocators. Accordingly, MPI does not expect these changes to materially affect the overall costs allocated to Basic.

f) MPI cannot isolate the impact of the CERP coverage changes and deductible increase from the current forecast as a discrete stand-alone amount. Product design is one of many interdependent assumptions that inform the overall claims forecast, together with updated loss experience, frequency and severity trends, ultimate claims estimates, exposure changes, inflation, operational experience, and actuarial judgment.

To quantify the CERP coverage changes and deductible increase in isolation would require two comparable point-in-time forecast scenarios: one reflecting the changes and one excluding them, with all other assumptions held constant. This is not possible using the current forecast, as it has since been refreshed to reflect updated claims experience and other relevant information. The current forecast is

therefore not simply the 2026 GRA forecast plus or minus the CERP coverage changes and deductible increase.

Any comparison between the 2026 GRA and the current forecast would capture the combined effect of all forecast updates made since the 2026 GRA, rather than just the effect of the CERP coverage changes and deductible increase. Producing an isolated amount would require recreating a prior forecast environment and rerunning the forecast on an artificial basis that excludes subsequent experience and assumption updates.

Accordingly, while MPI can explain how the CERP coverage changes and deductible increase were reflected in the 2026 GRA and how the claims forecast has been updated since that time, MPI cannot produce a meaningful isolated variance for the CERP coverage changes and deductible increase within the current forecast. Any such figure would imply a level of precision that the forecast does not support.

Preamble to IR (If Any):

Question:

a) Please file an update to EXP Appendix 5 for total Basic expenses.

b) Please file an update to Appendix 5a and 5b for total Extension expenses.

c) Please file a similar schedule to (b) for DVA and supplement the analysis to include actual and forecast government funding, net surplus or deficit, and DVA retained earnings in each of the years.

Rationale for Question:

To understand total expenses by line of business.

RESPONSE:

a) Please refer to *Part VIII EXP Appendix 2-4* for total Basic expenses.

b) Please see *Figure 1* below for 10 Year Summary of Extension Total Operating Expenses - Normalized with CAGR and *Figure 2* below for Percentage of Extension Expenses relative to Basic and Extension Expenses - Total Operating Expenses

PUB (MPI) 1-38

Part and Chapter:	**Part VIII - EXP Appendix 6** **Figures EXP App 6-2 to 6-4** **EXP Appendix 18**	**Page No.:**	**7, 14, 20**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA**		
Topic:	**Cost Allocation**		
Sub Topic:	**Onerous Contract and Impairment Allocation**		

Preamble to IR (If Any):

The Application records a $37.3 million Corporate onerous contract expense in 2025/26A ($29.5 million allocated to Basic), described as primarily license fees fully expensed at March 31, 2026 due to the contract becoming onerous. Basic's share of $29.5 million represents 79.0% of the total, compared to a total Basic share of corporate expenses of 66.0% in that year.

Question:

a) Please identify the allocator applied to the onerous contract expense and explain why Basic bears 79.0% of that cost.

b) Please provide the impact on the Basic MCT related to the impairment charge and the onerous contract.

c) Please confirm whether this relates to Project Nova close-out or IT vendor licenses and provide any relevant Board or Investment Committee approvals or accounting memos supporting the amount.

d) For the IFRS 17 insurance contracts conclusion (no onerous groups), please file the supporting quantitative assessment (fulfilment cash flows, grouping, risk adjustment at the 90th percentile) for Basic portfolios.

e) Please confirm whether any portion of these one-time expenses flows into the rate indication or is recovered via the Regulatory Deferral Account (RDA).

f) Please provide supporting details of the $15 million impairment charge and the allocation of $8 million of that charge to Basic.

Rationale for Question:

To understand the accounting and rate setting treatment of the onerous contract and impairment charges.

RESPONSE:

a) Refer to *PUB (MPI) 1-56.* The contract was intended to support all insurance lines of business. Accordingly, the expense was allocated using the incurred claims allocator. Consistent with this, the allocator was applied to the onerous contract expense. The allocator for 2025/26 was 78.96% to the Basic line of business.

b) The impairment charge and the onerous contract impacts the Basic MCT by reducing retained earnings and thereby reducing available capital for the line of business. Basic MCT would have been 100% before recognition of Basic's share of the impairment ($8M) and onerous contract ($29.5M) and before transfer from Extension.

c) Please see *Appendix 1 - Confidential* for the Onerous Contract memo, all details requested are contained therein.

d) There were no onerous contracts identified under IFRS 17 as part of the 2025/26 year-end financial statements, this is consistent with the 2025/26 annual report (*Part XI SFR Appendix 1*).

e) As filed in *Figure EXP App 23-2* prior year initiative expenses included for rate setting, the $10.1M is based on 2024/25 actuals and the 2025/26 onerous contract adjustment is not included in initiatives expenses requested for rate-setting.

f) Please see PUB (MPI) 1-57 Appendix 1 - Confidential for the 2025/26 impairment memo, all details requested are contained therein.

Appendix 1:
Provision for Onerous Contract (Data Processing Expense, License Expense)

This material is the subject of a confidential motion.

PUB (MPI) 1-39

Part and Chapter:	**Part VIII - EXP Appendix 13** **Figure EXP App 13-1**	**Page No.:**	**1-2**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA**		
Topic:	**Cost Allocation**		
Sub Topic:	**Assignment of Costs among Lines of Business**		

Preamble to IR (If Any):

Figure EXP App 13-1 shows the non-assignable expense pool growing 11.2% from $321.3 million in 2026/27 to $357.2 million in 2030/31. Within that pool, SRE's allocated dollars fall 23.4% from $27.7 million to $21.2 million (8.6% of the pool declining to 5.9%), while Basic's share rises from $230.8 million (71.9%) to a peak of $252.4 million (74.0%) in 2028/29 and Extension's allocated dollars rise 33.2% from $23.8 million to $31.7 million.

MPI has reverted to legacy systems for processing SRE.

DVA direct costs on line 7 increase 27.0% from $18.9 million in 2026/27 to $24.1 million in 2027/28.

Question:

a) Please identify the allocators driving the decline in SRE's share of the non-assignable pool over the forecast period and provide the underlying data.

b) Please explain the cost causation basis for a 23% reduction in shared corporate costs allocated to SRE while the pool itself grows 11%, and confirm the competitive lines bear their full share of costs.

c) Please explain the 27% increase in DVA direct costs in 2027/28 shown on line 7 of Figure EXP App 13-1.

Rationale for Question:

To understand the changes in the shares of the non-assignable expense pool.

RESPONSE:

a) The decrease in SRE's share of expenses is primarily driven by the claims incurred allocator. Please see *Figure 1* below for SRE Claims Incurred Allocator.

Figure 1 SRE Claims Incurred Allocator

Line No.	Claims Incurred 4-year average	2026/27BF	2027/28F	2028/29F	2029/30F	2030/31F
1	SRE %	11.0%	9.6%	8.0%	7.7%	7.5%

b) The decrease of 23% allocated to SRE normal operating expenses is primarily due to the decrease in SRE claims incurred allocators from 11.0% in 2026/27BF to 7.5% in 2030/31. Please see to part (a) for the claims incurred allocators. Please refer to *2026 GRA Part X EXP Attachment A - ICAM Review Report* regarding allocation detail.

c) The increase in direct account allocation to DVA from 2026/27 to 2027/28 is primarily due to changes in the forecast distribution for licence plates printed forms and licence fees subscription related to DVA. The distribution change resulted in these costs shifting allocation from Step 5 – Allocate Departments to Line of Business in 2026/27 to Step 3 – Direct Costs allocation in 2027/28. The licence fees subscription related to DVA transferred from initiatives to normal operations in 2027/28.

PUB (MPI) 1-40

Part and Chapter:	**Part VIII - Expenses, EXP.3** **EXP Appendix 12, Figure EXP App 12-2** **Part VIII - Pro Formas, Figure PF-1**	**Page No.:**	**15-18**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Regulatory Deferral Account**		
Sub Topic:	**Integration Costs and the IFRS 17 Insurance Contract Boundary**		

Preamble to IR (If Any):

Figure EXP App 12-2 allocates initiative implementation costs to lines of business and to the IFRS 17 expense categories, with several projects classified 100% Operating until go live and Maintenance or Service Centre allocation thereafter. The Application does not set out how these integration costs were assessed against the IFRS 17 requirements for inclusion in the measurement of insurance contracts.

Under paragraph 34 of IFRS 17, cash flows are within the boundary of an insurance contract if they relate directly to the fulfilment of the contract. Paragraph B65(l) includes within the fulfilment cash flows an allocation of fixed and variable overheads (such as the costs of accounting, human resources, information technology and support, building depreciation, rent, and maintenance and utilities) directly attributable to fulfilling insurance contracts, allocated to groups of contracts using methods that are systematic and rational and consistently applied to all costs that have similar characteristics.

Paragraph B66(d) excludes cash flows that relate to costs that cannot be directly attributed to the portfolio of insurance contracts that contain the contract, which are recognized in profit or loss as incurred.

Appendix A defines insurance acquisition cash flows as cash flows arising from the costs of selling, underwriting and starting a group of insurance contracts that are directly attributable to the portfolio of insurance contracts to which the group belongs.

Question:

a) Please describe how each category of initiative and integration cost in Figure EXP App 12-2 was assessed against paragraphs 34, B65 and B66 of IFRS 17, and confirm whether each cost meets the definition of costs within the boundary of the insurance contracts of the line of business to which it is allocated.

b) For costs classified as 100% Operating until go-live, please confirm whether these costs are treated as not directly attributable to fulfilling insurance contracts under paragraph B66(d), and explain the basis under paragraph B65(l) for reclassifying them to Maintenance after go-live.

c) Please explain how the IFRS 17 treatment of integration costs interacts with the treatment proposed for rate setting (if such costs fall outside the boundary of a specific insurance contract), including the initiative expenses excluded for rate setting and the prior year initiative expenses included for rate setting on Figure PF-1.

Rationale for Question:

To understand the IFRS 17 classification of initiative and integration costs.

RESPONSE:

a) For rate-setting purposes, it is not relevant whether the costs are classified as acquisition and maintenance expenses or other operating expenses. MPI prepares its audited financial statements in accordance with IFRS and does not apply a regulatory accounting standard. MPI is not eligible to apply IFRS 14, Regulatory Deferral Accounts. Equally, IFRS 20, Regulatory Assets and Regulatory Liabilities, is not

applicable to MPI because paragraph 4 of the standard excludes regulatory assets and liabilities that arise where premiums charged in insurance contracts within the scope of IFRS 17 are regulated (*Part VIII EXP Attachment A, Appendix 23 Summary of Regulatory Deferral Accounts*). MPI follows IFRS 17 for the classification of acquisition and maintenance expenses. As disclosed in MPI's annual financial statements, "*[e]xpenses that are attributable to the fulfillment of insurance contracts including costs of premium collection, claims adjudication and processing, actuarial calculations, and policy pricing and administration are assigned to maintenance and acquisition expense reported within insurance service expense on the Statement of Operations*."

b) By way of example, prior to go-live, BI3 upgrade project costs are classified as operating expenses because they relate to the development and implementation of future system capabilities that are not yet available for use in claims administration activities. As such, the costs are not considered directly attributable to fulfilling insurance contracts. This treatment is consistent with IFRS 17 paragraph B66(d), which excludes costs that cannot be directly attributed to a portfolio of insurance contracts, including certain product development and training costs.

Following go-live, the upgraded functionality is utilized in claims administration and processing activities. Accordingly, the associated costs are classified as maintenance expenses, consistent with IFRS 17 paragraph B65(l), which includes information technology and support costs that are directly attributable to fulfilling insurance contracts.

c) Refer to part a) above.

PUB (MPI) 1-41

Part and Chapter:	**Part VIII - Expenses, EXP.3** **EXP Appendix 23-1, EXP Appendix 23-2** **Part VIII - Pro Formas, Figure PF-1**	**Page No.:**	**15-18**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Regulatory Deferral Account**		
Sub Topic:	**Reconciliation of RDA balance**		

Preamble to IR (If Any):

In Order 4/23, the Board stated that, with respect to initiative expenses, the Board considered it appropriate and consistent with AAP to defer costs that are for systems that do not benefit current ratepayers. The Board directed MPI to defer these integration costs through a regulatory deferral account for rate-setting purposes. The account was to accumulate the integration costs and will be recovered when Project Nova is fully in service.

"MPI has stated that it intends to adjust its financial forecasts (for regulatory purposes) reflecting the deferral of integration costs for the purposes of GRA. However, MPI has not recorded a regulatory deferral account in its financial statements to accumulate these deferred integration costs. MPI has determined through professional accounting advice, that it is not permitted to adopt IFRS 14 Regulatory Deferral Accounts (IFRS 14), a requirement to recognize a regulatory asset or liability in its financial statements." [Order 02/25 page 28]

In its 2026 Closing Submission, MPI stated:

"As in past GRAs, MPI deferred initiative expenses and excluded them from the rate indication in the 2026 GRA. In the 2025 GRA, MPI forecasted $18.5 million in excluded initiative expenses for 2025/26 and $12.4 million for 2026/27. In the 2026 GRA, MPI

confirmed $34.1 million in excluded initiative expenses for 2024/25, and updated its forecast for 2025/26 to $26.5 million and $31.2 million for 2026/27. For 2027/28, MPI forecasts an additional $33.2 million in excluded initiative expenses, resulting in an average of $32.2 million for the 2026/27 rating year."

MPI has provided three alternative views of what expenses are in the RDA. MPI provided an update of actual spending at this GRA in EXP Appendix 23-2.

From a review of the record of 2026 GRa and the current filing the following was determined:

Deferred Initiative Expenses for Rate Setting (Updated with 2025/26 Actual and Proposed Recovery) ($ in Millions)

	2023/24 A	2024/25 A	2025/26 A	2026/27 F	2027/28 F	2028/29 F	2029/30 F
Initiative expenses excluded	10.2	34.1	56.5	18.6	18.5	31.5	34.6
Proposed recovery of Integration Expenses	-	-	-	10.1	-	-	-
Cumulative balance	10.2	44.3	100.8	109.3	127.8	-	-
Forecast at 2026 GRA (Original)	-	-	70.8	102.0	-	-	-
Difference (Updated vs 2026 GRA)	-	-	$30	+7.3	-	-	-

- 2025/26 reflects actual initiative expenses of $56.5 million (vs. $26.5M originally forecast).
- Proposed recovery of $10.1 million shown in 2026/27 GRA column reduces the cumulative balance.
- The 2027 GRA proposes to defer accumulated initiative expenses to a Regulatory Deferral Account (RDA) and then declare the assets in that account to be of "no value" and "not recoverable from Basic ratepayers."

Question:

a) Please provide a detailed schedule of the deferred integration costs by year, and indicate which if any of the expenses relate to Project Nova discontinued projects and which relate to IT infrastructure providing services to ratepayers.

b) Please explain why implementation expenses were $56.5 million for 2025/26. Please provide a detailed expense schedule for that year by cost element in the same level of detail as Figure EXP App 23-2 and add a column for those costs not to be recovered in rates.

c) Please provide the detail of implementation expenses forecast for 2026/27 and indicate whether MPI will be requesting a recovery of certain of these expenditures at the 2028 GRA.

Rationale for Question:

To understand the deferred initiative expenses and the amounts proposed for recovery.

RESPONSE:

a) to c) Please see *Appendix 1 - Confidential* for the detailed schedule of initiative expenses deferred for rate setting, all details requested are contained within. Refer to *Part VIII EXP Appendix 23* for MPI's position on initiative expenses.

PUB (MPI) 1-42

Part and Chapter:	**Part VIII - Expenses, EXP.3** **EXP Appendix 23-1, EXP Appendix 23-2** **Part VIII - Pro Formas, Figure PF-1**	**Page No.:**	**15-18**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Cost Allocation**		
Sub Topic:	**Regulatory Deferral Accounts and IAS 8 Accounting Policy for Initiative and IT Integration Costs**		

Preamble to IR (If Any):

Certain initiative and IT integration/implementation costs referenced in Figure EXP App 12-2 and Part VI may not qualify as fulfilment cash flows under IFRS 17 (paragraphs 34, B65(l) and B66(d)) because they may not be directly attributable to fulfilling insurance contracts within a specific portfolio. These costs are therefore expensed (or amortized) under IFRS.

IFRS 20 Regulatory Assets and Regulatory Liabilities contains a scope exemption for regulatory assets and regulatory liabilities that arise if premiums charged in insurance contracts within the scope of IFRS 17 are regulated. As a result, IFRS 20 does not apply to many rate-regulated differences arising in the Basic line of business.

Question:

a) Please provide MPI's assessment of whether costs that are not within the fulfilment cash flows of its insurance contracts under IFRS 17, such as deferred initiative and integration costs, fall within the scope of IFRS 20 when their recovery through future regulated rates is directed by the Board, and whether a regulatory asset would be recognized for the RDA on adoption.

b) Please discuss the merits of MPI establishing and recording a Regulatory Deferral Account on its balance sheet under an IAS 8 accounting policy for initiative and IT integration costs that do not qualify as IFRS 17 fulfilment cash flows, rather than (a) recovering the costs immediately in the current rate year or (b) writing them off with no recovery. In your response, please specifically address:

i. The advantages and disadvantages, from both an accounting and rate-setting perspective, of recognizing such an RDA on the balance sheet under IAS 8 (including relevance, reliability, and consistency with the IFRS 17 scope exemption in IFRS 20).

ii. Whether this approach would better achieve the regulatory objective of matching costs with the periods in which the new computer systems and initiatives are providing services and benefits to Basic ratepayers.

iii. The impact on the following if an IAS 8 RDA were established and amortized starting when the systems go live: (i) Figure PF-1 (Net Income (Loss) for rate setting purposes), (ii) Figure PF-3 (Basic equity and MCT ratio), (iii) the current overall rate indication, and (iv) future rate indications.

iv. How would this treatment interact with (or require modification of) the current proposal to declare the RDA assets “of no value” and “not recoverable from Basic ratepayers.”

v. Any other material merits or risks MPI has considered in deciding whether to apply an IAS 8 accounting policy to record a Regulatory Deferral Account on the balance sheet in these circumstances.

Rationale for Question:

To understand the merits of recording a regulatory deferral account for initiative and IT integration costs.

RESPONSE:

a) As filed in *Part VIII EXP Appendix 23- Summary of Regulatory Deferral Accounts*, IFRS 20 *Regulatory Assets and Regulatory Liabilities* contains an explicit scope exclusion for regulatory assets and regulatory liabilities arising from premiums charged in insurance contracts within the scope of IFRS 17 Insurance Contracts. As a result, where an entity's rate-regulated activities relate to insurance contracts accounted for under IFRS 17, those regulatory balances are excluded from the requirements of IFRS 20. The standard therefore does not provide an accounting policy choice that permits an insurer to elect to apply IFRS 20 to insurance-related regulatory balances that are expressly excluded from its scope

Accordingly, any suggestion that an entity could use IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to adopt IFRS 20 for balances that are specifically excluded by IFRS 20 is inconsistent with the IFRS hierarchy. IAS 8 serves as a source of guidance only when no IFRS Accounting Standard specifically applies to a transaction or event. It cannot be used to override an explicit scope provision contained in another IFRS Accounting Standard. Where IFRS 20 expressly excludes a population of regulatory assets and liabilities from its scope, that scoping decision must be respected and there is no basis under IAS 8 to apply IFRS 20 by analogy or as a voluntary accounting policy choice.

b) i)–v) MPI is not contemplating or seeking to establish or record a regulatory deferral account on its balance sheet under IAS 8. Because IAS 8 cannot be used to override the explicit scope provisions of another IFRS Accounting Standard, it would not be appropriate to characterize the application of IFRS 20 to such balances as a change in accounting policy. Accordingly, there is no balance sheet RDA, amortization pattern, or related impact to *Figure PF-1*, *Figure PF-3*, the current rate indication, or future rate indications. The classification of costs as acquisition and maintenance expenses or other operating expenses, does not change this conclusion.

MPI has engaged extensively, thoughtfully, and in good faith regarding the discussion of Regulatory Deferral Accounts (RDAs) and related alternatives. Throughout this process, MPI has responded to numerous requests for analyses and modeling of potential accounting approaches, including options that are not applicable under the IFRS framework. While MPI has endeavored to provide meaningful input and evaluation where possible, its position remains unchanged from when the PUB first introduced the concept of RDAs.

Based on industry practice, financial considerations, and technical accounting requirements, MPI continues to conclude that RDAs do not provide a suitable or supportable approach within the context of its General Rate Application. The analyses completed to date have consistently reinforced this conclusion.

Given the extensive information and evidence already provided, MPI is uncertain what additional information would materially change the assessment of this issue. Accordingly, MPI submits that continued discussion regarding the merits, implementation, or amortization of accounting treatments that are not permitted under IFRS would be unlikely to yield new insights and does represent an effective use of resources and time.

Reframing the Relevance of RDAs: The balance within the RDA reflects operating costs that have not been recognized for rate-setting purposes and therefore remain excluded from rates. Based on the current regulatory and operational framework, there was never an expectation that these balances would be incorporated into a future rate application. At no point would MPI anticipate seeking amendments to the RDA balance for the purpose of including associated amounts into its GRA. Given this context, the RDA only serves as a record of costs that have been excluded from recovery through rates – i.e., denied operating expenses for rate setting purposes. Any adjustment to the RDA balance should therefore be considered for administrative and presentation purposes only, rather than as a step toward future rate recovery, as any such recovery is not contemplated.

Abandoning RDAs: MPI is optimistic that the PUB will grant the relief requested in this application, enabling the historical RDA balance to have no ongoing relevance in future GRAs. Should the PUB determine that RDAs continue to be maintained – in whole or in part – MPI respectfully requests that the PUB provide clear and specific direction in its 2027 Order regarding the recognized RDA balance, the treatment of related expenses for rate-setting purposes, and the framework that will govern their application going forward. MPI further requests that the PUB maintain and report the RDA balance, and any related adjustments, within its final orders (should the RDA continue). This approach would provide clarity for all parties while reducing administrative requirements on MPI.

Work Effort with Limited Practical Benefits: To track initiative expenses for rate-recovery on the basis outlined in the question, MPI would effectively be required to construct and maintain a separate set of regulatory accounting records and reporting mechanics that are not required under IFRS, are not used for statutory financial reporting, and would be maintained solely to illustrate the operation of an accounting framework that does not apply. Such an exercise would require a significant ongoing investment of effort, governance, modelling, controls, and documentation without a corresponding accounting requirement. MPI submits that there is a practical limit to the value of continued analysis where the requested outcome is not available within the governing accounting standards.

RDAs – Treatment of Operating Costs for Rate Recovery Purposes: MPI views the RDA balance and related deferred costs as denied operating costs for rate setting purposes, now paid for through the RSR in the normal course of operations, and recovered via Extension transfers rather than a capital build application. While MPI acknowledges this is not the intended purpose of the RSR, it reflects the practical outcome of the current rate setting treatment.

Recovery of Initiative Expenses Based on Prior-Year Actuals: As noted above, the purpose of the RSR is not to fund initiative-related expenditures. Accordingly, the 2027

GRA proposes recovery of actual initiative costs incurred based on prior-year spending. MPI believes this approach is practical, transparent, and straightforward to administer, while ensuring that costs are reflected based on actual experience. To the extent that any eligible costs are not approved for recovery through rates, those amounts would ultimately be absorbed through the RSR.

PUB (MPI) 1-43

Part and Chapter:	**Part VIII - EXP Appendix 11** **Figures EXP App 11-3, 11-4** **EXP Appendix 6, Figure EXP App 6-4**	**Page No.:**	**3-6**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**2027/28 Salary Increase and FTE Reconciliation**		

Preamble to IR (If Any):

Figure EXP App 11-4 shows corporate salaries essentially flat in 2026/27 (a decrease of 0.14%) followed by an increase of $11.3 million (6.21%) in 2027/28, including $6.2 million under FTE Corporate Changes.

Figure EXP App 11-3 shows the budget FTE count unchanged at 2,038.8 for 2026/27 through 2029/30, with actual FTEs consistently below budget.

The comparative explanation for 2027/28 in Appendix 6 attributes $2.5 million to position reclassifications that increased average salaries and to the addition of 11 FTE into normal operations that were previously designated as students, and $2.3 million to a revised forecast placeholder for initiative FTE salaries.

Figure EXP App 18-2 line 40 shows implementation Salaries and Overtime of $4.5 million per year from 2027/28.

Question:

a) Please reconcile the $6.2 million FTE Corporate Changes in 2027/28 to FTE counts, given the budget FTE count is unchanged at 2,038.8.

b) Please update Figure EXP App 11-3 to include actual FTEs at the most recent available date and the number of vacant positions at that date.

c) Please refile Figure EXP App 11-3, adding columns for initiative and total staff for each of the actual, budget and over/under variance columns to provide a full picture of the staff budget forecast.

d) Please refile a figure in Part C adjusted for the labour disruption.

e) Please provide a detailed comparison of total corporate staff in the forecast for 2026/27 with actual 2025/26 and explain the changes. Explain all changes in Full-Time Equivalents by department with rationale.

f) Please explain what led to the position reclassifications that led to the $2.5 million higher costs. Please provide a detailed calculation supporting this increase, and indicate where in Figure EXP App 11-4 this change is reflected.

g) Please explain the $4.5 million per year initiative salary amount from 2027/28 onward and confirm whether it is incremental to the $15.5 million Initiative Implementation Placeholder or included within it.

h) Please identify where on Figure EXP App 11-4 the $4.5 million in initiative overtime (EXP App 18-2) is included in the Corporate Compensation analysis, which indicates overtime at $1.7 million a year.

Rationale for Question:

To understand changes in the corporation's staffing budget.

RESPONSE:

a) The total corporate FTE budget is 2,088.8, with 2,038.8 budgeted for Normal Operations, and 50 budgeted for Initiatives. $6.2M is noted under FTE Corporate Changes based on the following:
    i. $2.8M for position re-classification and market adjustments including:
        - $1.3M: The movement of 11 FTE previously unbudgeted and allocated to “specialty” into normal operations
        - $1.5M: Adjuster positions in Operations and Claims divisions were re-classified to higher pay scales to remain market competitive

ii. $3.4M for the difference between the $4.5M Initiative Budget Placeholder in 2027/28 and the $1.1M forecast in 2026/27.

b) Please refer to *Figure 1* below.

124			**Total**	**2,041.3**	**2,088.8**	**(47.4)**

Variance between actual 2025/26 FTE and 2026/27 budgeted FTE reflect the timing of staff hiring and position fills. While budgeted FTE represent planned full-time positions over the year, actual FTEs will vary at any given point depending on when roles are filled, staff turnover (including retirements), and recruitment processes. Because of these normal staffing fluctuations, it is not possible to attribute the variance to a specific change or policy shift, it is simply the result of real-time hiring activity catching up to the approved budget. These differences are expected and typical in any organization with ongoing recruitment and operational changes throughout the year.

f) Figure EXP App 6-4 explains the variance for 2027/28 between 2026GRA and 2027GRA, while Figure EXP App 11-4 explains the variance between 2026/27 and 2027/28 in 2027GRA.

g) Please refer to Figure EXP App 6-4. $4.5M, $5M, and $10.5M together is equal to $20M in total for Initiatives as detailed in *Part VIII EXP Appendix 22* – the total Major Program placeholder is $15M ($4.5M plus $10.5M) and EPMO is $5M for a total of $20M.

h) Figure EXP App 18-2 line 40, indicates $4.5M salaries and overtime - this is not overtime, it is the $4.5M salaries placeholder only. In *Part VIII EXP Appendix 11*, the initiative placeholder is within the 6M change as explained in part a) above.

PUB (MPI) 1-44

Part and Chapter:	**Part VIII - EXP Appendix 18** **EXP Appendix 24-1 Data Processing Expenses (2026 GRA)**	**Page No.:**	
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Data Processing Expenses**		
Sub Topic:			

Preamble to IR (If Any):

At the 2026 GRA, MPI provided detail of data processing expenses in Appendix 24 and Appendix 25, Special Services Expense.

Question:

a) Please provide a comparative schedule of the details of data processing expenses (total corporate) by major component for the 2027 GRA and compare that to the 2026 GRA for each of the years 2025/26 through 2029/30.

b) Please provide a detailed schedule of total corporate special services expenses for each of the years 2025/26 through 2030/31.

Rationale for Question:

To understand the components of data processing and special services expenses.

RESPONSE:

a) Please see ***Figure 1*** below for Data Processing - 2027 GRA vs 2026 GRA.

Figure 1 Data Processing - 2027 GRA vs 2026 GRA

PUB (MPI) 1-45

Part and Chapter:	**Part VIII - EXP Appendix 15**	**Page No.:**	
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Capital Expenditures**		
Sub Topic:	**Land and Building**		

Preamble to IR (If Any):

MPI indicated land and building costs were lower in this GRA than the prior year, primarily due to planned renovations delayed until the outcome of a facility study. This resulted in land and building expenditures being, in part, $5.1 million lower than forecast for 2025/26. In 2026/27, capital expenditures on land and building are $6.5 million higher than forecast.

Figure EXP App 6-3 provides a detailed comparison of the Initiative Implementation Expense forecast for 2026/27 in the 2026 GRA to the 2027 GRA. This does not appear to agree with the implementation expenses shown on Figure EXP App 15-2 for that year.

Question:

a) Please explain which projects for land and building were expected to commence this year, resulting in the $6.5 million forecast variance.

b) Please provide a copy of the related facility study.

c) Please provide a detailed breakdown by cost element by project, comparing the forecast $24.2 million in data processing implementation expense at the 2026 GRA versus the $10.8 million now forecast to be spent in 2026/27 (2027 GRA).

d) Please explain how MPI determined the placeholders for Initiative Project Management Office and Major Program totalling $5.8 million in 2026/27, and provide the analysis.

Rationale for Question:

To understand the changes in land and building and implementation expenditure forecasts.

RESPONSE:

a) The $6.5 million forecast variance between the 2026 and 2027 GRA submissions is due primarily to the following three projects:

   i. Plessis Land Improvement – Restructure Gravel Lot

      - Forecast in the 2026 GRA for expenses to be incurred within the 2025/26 fiscal year, this project was delayed due to seasonal timing constraints, and the costs are now anticipated to be incurred in the 2026/27 fiscal year.

   ii. CityPlace – Chiller Replacement

      - Forecast in the 2026 GRA for the majority of the project to be completed within the 2025/26 fiscal year, this project was delayed with a current end date of September 2026.

   iii. CityPlace – Food Court & Façade Renovation Design Options

      - A new project in the 2027 GRA which was not forecast in the 2026 GRA. This project is not expected to complete until the fall of 2026. As such, it is not presently available. The expected cost is expected to be approximately $0.2 million.

b) The Winnipeg Service Centre facility study is not expected to be completed until the fall of 2026. As such, it is not presently available.

c) Please refer to *Figure PUB 1-45c* below:

Figure PUB 1-45c Comparison of Data Processing Implementation Expenses by Cost Element by Project for the 2026 GRA versus the 2027 GRA

Line No.	Project Name	Cost Element	2026 GRA Data Processing	2027 GRA Data Processing	Change
1	***(C$000s, except where noted)***

21	Project Management Office (non-Major Programs) Annual Budget	Computer Costs	254		(254)
22	Project Management Office (non-Major Programs) Annual Budget	External Labour - other	3,529		(3,529)
23	Project Management Office (non-Major Programs) Annual Budget	License Fees	1,015		(1,015)
24	Project Management Office (non-Major Programs) Annual Budget	Cloud Costs	204		(204)
25		Total	24,169	10,845	(13,324)

d) The $5.8 million placeholder consists of the remaining unallocated funding after forecasted 2026/27 costs for continuing projects were deducted from the total placeholder amounts. This resulted in $3.9 million remaining for the PMO non-Major Programs projects and $1.8 million remaining for Major Programs, for a total of $5.8 million. These amounts were based on 2026/27 forecasts for projects already underway, with the remaining amounts available for future initiatives.

PUB (MPI) 1-46

Part and Chapter:	**Part VIII - EXP Appendix 11** **Figure EXP App 11-4 (lines 24-38)** **Figures EXP App 11-7, 11-8, 11-9** **EXP Appendix 6, Figure EXP App 6-2**	**Page No.:**	**6-7**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Severance and Retirement Provisions**		

Preamble to IR (If Any):

Figure EXP App 11-4 shows Salaries - Severance/Retirement Pay-Out increasing from $2.1 million in 2025/26A to $5.9 million in 2026/27BF, an increase of approximately 176%, before declining to $4.2 million in 2027/28 and $4.6 million in 2028/29.

The Salaries - Retirement Allowance Provision moves from $2.1 million in 2025/26A to negative $3.5 million in 2026/27BF and negative $1.4 million in each of 2027/28 and 2028/29.

The Appendix 6 comparative explanation for 2025/26 attributes a $2.8 million increase in the Retirement Allowance Provision to calculation changes, including changes to the weekly rate, years of service and the actuarial factor.

Question:

a) Please extend Figure EXP App 11-4 to include 2024/25 actual and provide the detail of the compensation change for 2025/26.

b) Please provide a comparison of the details of Compensation Expense and Compensation Change from the 2027 GRA with that provided at the 2026 GRA for

2025/26, 2026/27, and 2027/28. Include a comparison of the economic and step-in-scale increases and explain the changes.

c) Please provide an update to Figures EXP App 11-7, 11-8, and 11-9, including each of the years 2026/27 to 2028/29.

d) Please explain the basis for the near tripling of forecast severance and retirement payouts in 2026/27, including the number of expected retirements or departures and whether any restructuring is planned.

e) Please explain the negative Retirement Allowance Provision amounts in the forecast years and the relationship between provision releases and the increased payouts.

f) Please provide the retirement policy for the Corporation and explain the vacation carryover and severance policy for MPI and how it factors into severance and retirement payouts.

g) Please describe each calculation change made to the Retirement Allowance Provision and quantify its effect.

Rationale for Question:

To understand the components of forecast compensation expense.

RESPONSE:

a) Please refer to ***Figure 1*** below.

b) Budget comparisons for regular salaries are not “apples to apples” due to year-specific assumptions and point-in-time average salary information used to complete the calculations. Change comparisons for these years between 2026GRA and 2027GRA are not like-for-like comparisons. Therefore, a comparison of details for these years over 2026GRA and 2027GRA cannot be provided. To obtain similar information, please refer to *Part VIII EXP Appendix 5a* in 2027GRA and *Part X EXP Appendix 12-1, 12-2, and 12-3 in 2026GRA*.

c) Please refer to Figure 2 to 4 below.

10 * Total Change in Compensation for 2026/27 to 2028/29 algins with the total compensation change in EXP Appendix 11-4

d) The increase in 2026/27BF represents both a higher estimate of eligible retiree payouts and a higher estimated average payout amount. The 2026/27BF estimated 78 payouts with an average payout of ~$75.9K. The estimated number of retirements is based on an estimate of how many employees eligible for retirement will retire. The average payout is also an estimate and is based on the YTD actual payouts within the fiscal period and adjusted for estimated GWI. The 2026/27BF was prepared two budget cycles ago and at that time was based on F2024/25A data which experienced a higher average payout amount than what was experienced in F2025/26A (approx. $72K per payout in F2024/25 vs. $51K per payout in F2025/26.) Both the length of service and earnings at retirement may contribute to considerable year over year variances. There is no restructuring planned.

e) The Sal-Sev/Retirement Pay-outs is budgeted by using the estimated number of retirements during the fiscal period multiplied by the estimated average retiring allowance payout. As items are paid, there should then be a corresponding reduction to the Sal-Retirement Allowance Provision (i.e., inverse relationship between the two accounts).

The Sal-Retirement Allowance Provision is budgeted by calculating the difference between the five-year historical average Sal-Retirement Allowance Provision (adjusted for estimated GWI changes) less the budgeted payouts in Sal-Sev/Retirement Pay-outs (see part g for calculation). Accordingly, as there were higher budgeted payouts anticipated, this resulted in a drop to the provision account (thus the negative budgeted balance).

f) Employees with ten or more years of corporate service who retire or die or who are terminated due to a permanent disability as deemed by the Workers Compensation Board shall be entitled to a retiring allowance. In the event of the death of an employee, retiring allowance shall be paid to the employee's estate. Eligible employees will be paid a retiring allowance in the amount of one (1) weeks' pay for each year of accrued service, or pro-rated portion thereof. The

rate of weekly pay will be that in effect at the time of retirement, death, or termination. Both an eligible employees' length of service and earnings at retirement are key inputs into the determination of the Sal-Sev/Retirement Pay-outs.

Employees are expected to utilize all earned vacation entitlement in the applicable vacation year, in the form of scheduled days off. Employees are paid out for any unused vacation balances upon retirement and/or termination.

g) 5 Year Historical average of Sal-Retirement Allowance Provision: $2,410M

Budgeted Sal-Sev/Retirement Pay-outs: $5,917M

2026/27 BF: ($3,507M)

PUB (MPI) 1-47

Part and Chapter:	**Part VIII - EXP Appendix 11** **Figures EXP App 11-1, 11-2**	**Page No.:**	**1-3**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Economic Increase and Merit Assumptions**		

Preamble to IR (If Any):

Appendix 11 states the current collective agreement covers September 2022 to September 2026, with negotiated economic increases of 3.40% for 2025/26 and 3.60% for 2026/27, and an assumed 2.00% increase once a new contract is negotiated, applied from 2027/28.

The in-scope step-in-scale rate is 1.75%, based on an assumption that 50% of employees are at the top of scale. The out-of-scope merit rate is 2.25%, based on approximately 65% of staff receiving a 3.5% merit increase.

Question:

a) Please provide the status of collective bargaining for the agreement expiring in September 2026.

b) Please provide the support for the 2.00% economic increase assumption, including reference to recent Manitoba public sector settlements.

c) Please quantify the impact on 2027/28 and 2028/29 Basic compensation expense of each 0.5 percentage point variance in the assumed economic increase.

d) Please provide the actual distribution of in-scope employees by step, and the actual percentage of out-of-scope staff receiving merit increases in each of the last three years, in support of the 50% and 65% assumptions.

Rationale for Question:

To understand the compensation increase assumptions.

RESPONSE:

a) Collective bargaining for the current agreement expiring in September 2026, is expected to start in the fall of 2026.

b) The 2.00% economic increase factor incorporated into the forecasting model was selected as a prudent and reasonable assumption, reflecting long-term CPI expectations. The final economic increase factor will be determined through future discussions with the union and the successful completion of a new collective bargaining agreement (CBA). MPI does not anticipate a completed CBA until after the conclusion of the 2027 GRA process. MPI has no updates concerning recent Manitoba public sector settlements.

c) Please refer to ***Figure 1*** below, which demonstrates the 0.5% impact at a Corporate level. The below description from the Internal Cost Allocation Methodology (ICAM) describes why this amount cannot be provided only for the Basic portion.

Figure 1 Economic Increase Sensitivity Report – Corporate

Line No.		2027GRA				0.5% Increase				Change			
		2027/28		2028/29		2027/28		2028/29		2027/28		2028/29	
1		%	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%	Amount
2	(C$000s, except where noted)												
3	**Economic - Inscope**	2.00%	1,267	2.00%	1,291	2.50%	1,583	2.50%	1,617	0.50%	316	0.50%	326
4	**Economic - Out of Scope**	2.00%	1,071	2.00%	1,117	2.50%	1,339	2.50%	1,403	0.50%	268	0.50%	286

Merit increases and general wage increases are initially incorporated into the corporate salary budget at an enterprise level. Salary costs are subsequently assigned to individual lines of business through the established cost allocation methodology, which allocates total labour costs based on allocation drivers rather than by individual compensation components. As a result, the salary expense reported within a line of business represents an allocated share of total corporate

labour costs and does not retain the underlying detail necessary to identify what portion of the allocated amount relates specifically to merit increases, general wage increases, position changes, vacancies, or other salary cost drivers. Accordingly, it is not possible to reliably isolate the impact of merit increases within a particular line of business after the allocation process has been applied.

d) The actual distribution of in-scope employees as a % by each step is reflected in the Figure below.

Figure 2 Distribution of in-scope employees as a % by each step

Step	% of-in-scope employees
1	8%
2	9%
3	8%
4	7%
5	9%
6	7%
7 (top of scale)	51%

For out-of-scope employees, the forecasted rate is 2.25% and is approved by the Governance and Human Resources Committee of the Board and the Board. The 65% is a derived effective rate (3.5% x 65% = 2.25%) for eligibility to ensure the effective rate does not exceed the approved 2.25%.

PUB (MPI) 1-48

Part and Chapter:	**Part VIII - EXP Appendix 11** **Figures EXP App 11-1, 11-2** **PUB (MPI) 1-37 (2026 GRA)**	**Page No.:**	**1-3**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Vacancy Allowance**		

Preamble to IR (If Any):

At the 2026 GRA MPI stated:

> "MPI adjusted the vacancy provision from $6 million (which was based on an implied 60 FTEs) to $3.5 million, reflecting a more realistic expectation of maintaining approximately 40 FTEs as surge capacity at any given point in time. This update aligns with current workforce planning assumptions and reflects MPI's best estimate of expected vacancies during the year. The calculation is based on an average salary of $89,000 per FTE at the time of budget preparation."

Question:

a) Please indicate the number of vacant positions during the last five fiscal years and the current level at June 30, 2026, and the related vacancy allowance. Please normalize for the labour interruption and include the percentage of vacant positions.

b) Please extend the table in a) to include the forecast number of FTEs and the percentage of budget represented in the forecast.

c) Please indicate whether MPI uses a Lapse factor in its staffing-level budgeting.

d) Please provide the Corporate staffing levels, in terms of positions used to determine budgeted salaries and wages, for the 2026/27 and 2027/28 years, and compare them with the budgeted Corporate FTEs.

e) Please indicate whether the vacancy allowance and staff budget are approved by the Treasury Board.

Rationale for Question:

To understand the vacancy allowance and its basis.

RESPONSE:

a) Please refer to *Figure 1* below.

Figure 1 Past Five-Year Vacancy

8	Vacancy	(3,500)	(574)	(507)	(7,036)	(23,992)	(7,367)	(10,909)	(15,545)

9 (1) $44,613K is based on total annual budget of $178,453K divided by 4

10 (2) for 2026/27, Actual Salary and Actual Avg. FTE are forecasted.

11 (3) budgeted and actual salary amounts are based on the amounts from Salary Regular and Salary Accrued accounts

The vacancy amount in the budget is a dollar-level planning assumption only. It reflects a proxy for normal timing differences that occur throughout the year as staff move in and out of roles, start dates vary, and positions are temporarily vacant during regular turnover. *It is not a headcount management tool and does not imply that roles are being held, delayed, or intentionally left unfilled*. At all times, staffing remains aligned to the approved corporate headcount. The vacancy estimate simply recognizes that, from a compensation dollar budgeting perspective, it is not realistic to assume 100% of approved positions will be actively paid for every day of the year. Including this contra amount helps govern overbudgeting compensation dollar costs.

Historical comparisons of "dollar vacancy" are not directly comparable for this purpose because the dollar value of vacancy depends on what salary costs were included in the budget in the first place. If prior budgets did not include the same level of funded compensation, then comparing vacancy dollars across years can be misleading.

For the 2027/28 budget, the budget includes the full compensation cost for the approved 2,089 FTE complement, along with an expected dollar allowance for vacancies based on normal turnover and hiring patterns. This provides a more holistic basis for assessing the expected vacancy allowance, rather than relying on historical dollar vacancy figures that may/will reflect different budgeting assumptions.

c) A lapse factor is the same concept as vacancy allowance. MPI does not apply a formal lapse factor to staffing levels as it incorporates an estimated vacancy allowance dollar within its compensation budget to reflect the expected salary savings arising from normal workforce turnover, recruitment timing, and other vacant-position fluctuations during the year.

d) Please refer to *Appendix 1*.

e) Refer to 2027 GRA application *Part VIII EXP Appendix 22a* section 5 and 6.

PUB (MPI) 1-49

Part and Chapter:	**Part VIII - EXP Appendix 3, Figure EXP App 3-1** **EXP Appendix 6, Figure EXP App 6-2** **Attachment B**	**Page No.:**	**1**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Benefits Growth**		

Preamble to IR (If Any):

Figure EXP App 3-1 shows a compounded annual growth rate for Basic Compensation - Benefits of 0.8% over the five historical years and 5.1% over the five forecast years. The Appendix 6 comparative explanation for 2025/26 identifies a $2.0 million increase for Pension - Superannuation, a $730 thousand increase for CPP contributions and a $458 thousand increase for the Health Spending Account.

Question:

a) Please provide the components of the benefits forecast by year from 2026/27 through 2030/31 and identify the drivers of the 5.1% annual forecast growth rate relative to the 0.8% historical rate.

b) Please reconcile the pension related components of the benefits forecast to the assumptions in the Pension Valuation Report at March 31, 2026 (Attachment B).

c) Please provide actual versus forecast benefits expense for each of the last five fiscal years.

Rationale for Question:

To understand the benefits expense forecast.

RESPONSE:

a) Please refer to ***Figure 1*** below.

Figure 1 Components of Benefits

Line No.	Components	2026/27 BF	2027/28 F	2028/29 F	2029/30 F	2030/31 F
	(C$000s, except where noted)

Between 2021/22 and 2025/26, top 3 drivers contributed to the expense growth are as follows:

- Transit Subsidy
- Employee Assistance Plan
- Supp Health – Hosp/Ambulance

In the same period, top 3 drivers contributed to the expense decline are as follows:

- Workers Compensation
- Group Life Insurance
- Post Ret. In Scope Ext Health

Between 2026/27 and 2030/31, top 3 drivers contributed to the expense growth are as follows:

- Transit Subsidy
- Employee Assistance Plan
- Pension – Superannuation

In the same period, the drivers that contributed to the expense decline are as follows:

- Post Ret. In Scope Ext Health
- Post Ret. O/S Ext Health

b) Pension expense forecasts for 2027/28 through 2029/30 are based on the table below from the Pension Valuation Report as of March 31, 2026 (*Part VIII EXP Attachment B*). Forecasts for 2030/31 and 2031/32 assume the same pension valuation information as of January 1, 2029.

Effective Date	<= YMPE	> YMPE
Current	8.0%	9.0%
April 1, 2026	8.5%	9.5%
April 1, 2027	9.0%	10.0%
April 1, 2028	9.5%	10.5%
January 1, 2029	10.0%	11.0%

c) Please refer to *Figure 2* below.

PUB Approved Issue No:	9. Cost of operations and cost containment measures		
Topic:	Data Processing		
Sub Topic:	Licence Charges Step Change in 2027/28		

Preamble to IR (If Any):

Figure EXP App 18-2 line 5 shows corporate licence charges of $20.7 million in 2026/27BF increasing to $32.4 million in 2027/28F, an increase of 56.5%, and then remaining flat at $32.4 million through 2030/31.

Figure EXP App 18-3 line 5 shows Basic licence charges increasing from $15.1 million to $24.0 million, an increase of 59.1%.

The Appendix 6 comparative explanation attributes a $19.9 million increase in data processing costs to a $13.6 million increase for the increasing costs of technology contracts and the addition of licensing from projects, and a $6.6 million increase for Data Centre. These costs were previously anticipated to be removed after migration to the cloud, but change from the original project direction has required ongoing data centre expenses. 2027/28 project spending is otherwise held in an unallocated placeholder.

Question:

a) Please provide the detail of licence charges by contract for each contract exceeding $500 thousand annually, for 2025/26 through 2030/31, including term, renewal dates and escalation provisions.

b) Please provide the detail of data centre costs for 2025/26 through 2030/31, including term, renewal dates and escalation provisions.

c) Please identify the licences added from projects, the projects concerned, and reconcile these amounts with the Initiative Implementation Placeholder to confirm there is no double counting or omission.

d) Please explain why licence charges are forecast flat from 2027/28 through 2030/31 after a 56.5% step increase, with no escalation.

e) Please describe the procurement and negotiation strategy applied to the technology contracts driving the step increase.

Rationale for Question:

To understand the licence charge forecast.

RESPONSE:

MPI to insert response here.

a) Refer to *Appendix 1 – Contracts over $500k annually - Confidential*.

b) Data centre costs in Figure EXP App 18-2 line 8 are comprised of:

a. Actual and forecasted expenses under the existing Kyndryl contract expiring in January 2027 (legacy data centre operations, Azure VMWare Solution (AVS) management, and Managed Financial Operations)

b. Forecasted expenses for continued data centre operations and AVS management under a 5-year renewal of the Kyndryl contract, from February 2027 through January 3032.

c. The current term of the Kyndryl agreement expires January 30, 2027. MPI has notified Kyndryl of the intent to extend the agreement for an additional 5 years. The current extension option is for an additional three (3) years on the terms and conditions, including price, to be agreed upon by the Parties taking into consideration how the environment has evolved over the Term. MPI is currently developing the requirements and adjustments to services that will be required over the next 5 years as well as a detailed review of the contract terms.

The price escalation terms in the agreement state that MPI is responsible for 100% of the actual year on year inflation as represented by the Price Index up to a maximum of 4.5% per year, subject to the application of the Inflation Sensitivity factor. The agreement contemplates that if the parties enter into negotiations for the renewal term, MPI and Kyndryl will, acting

reasonably, attempt to negotiate a new maximum Economic Change Adjustment to apply during the Statement of Work Renewal Term.

c) The implementation placeholder is not allocated by expense type. Accordingly, forecasted licencing under the implementation placeholder is nil and there is no risk of double counting, as the forecasted implementation placeholder budget is an unallocated placeholder only.

d) The difference is primarily attributable to the evolution and refinement of the underlying operating cost baseline, rather than a year over year increase of 56.5% in normalized operating requirements. The 2026/27 budget was established in winter 2025 as part of the 2026 GRA planning cycle, when the underlying cost baseline and budgeting processes were less mature. As the business has progressed through its planning and budgeting processes, MPI has incorporated more current information regarding expected operating requirements, cost drivers, contractual commitments, etc. As a result, the original 2026/27 budget is no longer considered representative of the current cost baseline. The current assessment is materially closer to the $32M reflected in the 2027/28 budget. In addition, the 2027/28 baseline reflects the impact of Manitoba's Retail Sales Tax (RST) on cloud and related computer services, effective January 1, 2027, which was not reflected in 2026/27. In other words, the apparent increase in forecast largely reflects updating and maturation of the baseline rather than an increase in the underlying cost of normal operations expected for 2026/27 actuals.

Where contractual commitments are known, those commitments are incorporated into the forecast. Where no contractual commitment or other sufficiently reliable information is available because future contracts have not yet been negotiated, a naïve assumption has been carried forward rather than introducing unsupported assumptions about future requirements or cost. It is also important to recognize that these forecasts are inherently dynamic and will change as business requirements evolve, new information becomes available, and existing contracts

approach renewal or are replaced with new arrangements. Accordingly, the forecast should be viewed as a planning baseline that is refined over time, rather than a fixed projection of costs several years into the future.

e) MPI employs competitive and transparent procurement practices in accordance with applicable trade agreement obligations. Procurement activities are conducted through MPI-led tenders as well as through participation in Government of Manitoba buying group arrangements.

   Contract negotiations are informed by the vendor's tender submission, the value and scope of the engagement, and MPI's overall commercial relationship with the vendor. MPI also utilizes independent market benchmarking data to assess pricing competitiveness and support negotiations.

PUB (MPI) 1-51

Part and Chapter:	**Part VIII - EXP Appendix 6** **Figures EXP App 6-2, 6-4** **Appendix 18, Figure EXP App 18-2**	**Page No.:**	4, 8, 21
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Data Processing**		
Sub Topic:	**Data Centre and Cloud Duplication**		

Preamble to IR (If Any):

The Appendix 6 comparative explanation for 2025/26 identifies a $14.3 million increase in Data Centre costs associated with a contract that was not budgeted for in the 2026 GRA.

The explanation for 2027/28 states that data centre costs were previously anticipated to be removed after migration to the cloud, but a change from the original project direction has required ongoing data centre expenses.

Figure EXP App 18-2 shows Data Centre costs of $15.7 million in 2025/26A, $11.9 million in 2026/27BF and $15.5 million in 2027/28F, escalating thereafter, while Cloud Service Environments costs rise from $3.3 million in 2025/26A to $5.7 million in 2026/27BF and continue to grow.

Question:

a) Please describe the data centre contract entered into in 2025/26, including the counterparty, term, total value and the procurement process followed.

b) Please explain the change from the original project direction, when the decision was made, and the governance applied to it.

c) Please quantify the workloads remaining on premises versus in the cloud and provide the plan and timeline to eliminate duplicate platform costs.

d) Please provide the combined annual cost of operating both the data centre and cloud environments for each year 2025/26 through 2030/31.

e) Please confirm whether MPI intends to house its new software systems in data centres it has contracted for, that is, platform-as-a-service (PaaS) rather than software-as-a-service (SaaS) arrangements. If so, please explain how MPI views its integration and implementation expense for accounting purposes given this change.

Rationale for Question:

To understand data centre and cloud costs following the change in migration strategy.

RESPONSE:

a) In Q3 of 2025/26 a Services Agreement Amendment was executed with Kyndryl under the existing agreement. The amendment reflected lower Data Centre Operations costs following cloud migration, while adding two new services: Azure VMware Solution administration and Managed Financial Operations (FinOps) for Microsoft and Kyndryl expenses. These services were needed because MPI continued to use Kyndryl to support the post-migration hybrid environment. The amendment kept Kyndryl as the counterparty and aligned the agreement with MPI's revised operating model. The procurement approach followed MPI's contract amendment process rather than a new competitive procurement, because the services were tied to the existing Kyndryl agreement and the cloud migration transition. The amendment runs within the existing agreement term, which is scheduled to conclude in January 2027. The total value of the amended services aligns with the existing contract value at approximately $15M per year.

b) The original direction was to move workloads out of Kyndryl's data centres, then reduce reliance on data centre services. **[Redacted].**

As a result, MPI shifted to a hybrid model: lower Data Centre Operations costs, but continued Kyndryl support for remaining legacy systems, Azure VMware Solution administration, and Managed FinOps. This change was developed through the 2024 project and contract amendment work, with final amendment activity in Q3 of 2025/26. Governance included project change records, financial business case updates, Architecture Review Board review, Lean Portfolio Management oversight, Strategic Sourcing and Vendor Management review, and executive reporting.

c) Most workloads have moved to the cloud (SaaS) or are supported through the Azure VMware Solution environment. **[Redacted].**

MPI does not have duplicate platform costs, as the cloud and data centre services do not overlap. The remaining data centre costs relate to legacy systems that still require Kyndryl hosting and support, while cloud costs relate to workloads that have already migrated. MPI's plan is to continue support for the remaining legacy platforms beyond January 2027 while assessing modernization, replacement, vendor transition, or decommissioning options through the next service period.

d) For the combined annual cost of operating both the data centre and cloud environments for each year 2025/26 through 2030/31 please see Part VIII – Exp Appendix 18-2, lines 8 and 10.

e) MPI's current strategy is not to host new software systems using a Platform-as-a-Service (SaaS) model in contracted data centre environments, including Kyndryl data centres. MPI's current direction is to favour SaaS solutions where they meet business, security, privacy, integration, and value requirements. Some systems may still use cloud infrastructure or platform services (e.g., Azure VMWare Solution) where a SaaS option is not practical or does not meet MPI's needs. However, this is not intended to recreate a traditional data centre model. It is part of a broader move to modern cloud services.

   Accounting treatment depends on the specific arrangement. Finance assesses each major solution to determine whether integration and implementation costs should be expensed or capitalized, based on applicable accounting standards and the nature of the work performed.

PUB (MPI) 1-52

Part and Chapter:	**Part VIII - EXP Appendix 18** **Figure EXP App 18-2, line 9**	**Page No.:**	**4**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Data Processing**		
Sub Topic:	**IBM Security Operations Centre**		

Preamble to IR (If Any):

Figure EXP App 18-2 line 9 shows IBM Security Operations Centre costs of approximately $553 thousand to $624 thousand annually through 2026/27, and nil from 2027/28 onward.

Question:

a) Please explain the elimination of the IBM Security Operations Centre cost from 2027/28, identify what replaces this capability, and indicate where any replacement costs appear in the forecast.
b) Please confirm that the change does not reduce MPI's security monitoring capability.

Rationale for Question:

To confirm continuity of cyber security monitoring and the completeness of the forecast.

RESPONSE:

a) MPI will have fully transitioned to a Managed Detection and Response (MDR) (vendor managed) service by 2027/28 utilizing Microsoft Defender and Sentinel. Replacement costs will appear within Vendor Managed Services (Figure EXP App 18-2 line 11).

b) MPI confirms that this change does not reduce MPI's security monitoring capability.

PUB (MPI) 1-53

Part and Chapter:	Part VIII - EXP Appendix 18 Figure EXP App 18-7	**Page No.:**	17
PUB Approved Issue No:	9. Cost of operations and cost containment measures		
Topic:	Data Processing		
Sub Topic:	Consultant Costs and Counts		

Preamble to IR (If Any):

Figure EXP App 18-7 shows Basic consulting costs for operational activities increasing from $4.3 million in 2025/26A with 48 consultants to $7.2 million in 2026/27BF with 39 consultants, a cost increase of approximately 67% on a lower consultant count. The figure notes forecast consultant counts are converted at $125 per hour, and that initiative consultant counts from 2027/28 are shown as nil because the placeholder budget is unallocated.

Question:

a) Please explain the increase in operational consulting costs in 2026/27 relative to the decrease in consultant count, including changes in rates, mix or scope of services provided.
b) Please provide the average consultant rate by year for 2021/22 through 2026/27, and update Figure EXP App 18-7 to include the average cost per consultant.
c) Please provide a companion table including corporate consulting cost for operational activities and improvement activities.
d) Please provide the expected consultant utilization within the Initiative Implementation Placeholder amounts from 2027/28.
e) Please update Figure EXP App 18-7 with actual results for the most recent completed quarter.

Rationale for Question:

To understand consulting costs and consultant counts.

RESPONSE:

a) Please refer to ***Figure 1*** below.

Figure 1 Consultant Cost and FTE

Line No.	Consultants - Corporate	2025/26A	2026/27A June 30, 2026	2026/27BF	2027/28F(1)	2028/29F(1)

17	**Total**	**32.9**	**10.0**	**39.4**	**18.4**	**18.1**

18 (1) Forecasted initiative consultants for 2027/28 beyond is not available. 2027/28 initiative budget is a placeholder and not allocated by nature of expense,
19 accordingly forecasted consultant count based on implied dollar is nil as the forecasted dollar is an unallocated placeholder only (refer to EXP Expenses chapter)
20 (2) Actual and forecasted consultants are implied FTE equivalents, calculated as consultant expenses at avg rate/hr, 8hrs/day, 252 days/yr.

As stated in footnotes, the initial table had actual headcount (not FTE equivalents) for actuals, and FTE equivalent for forecast, which is not a like for like comparison. The table above has been updated to report FTE equivalent (calculated on the basis within footnote) to provide a like comparison. In addition, as stated in the footnote, the average actual rate (rather than forecasted) has also been applied to the 2025/26 actuals. Accordingly, the FTE counts and dollars are now proportional.

b) Please refer to ***Figure 2*** below on average consultant rate for 2021/22 through 2026/27.

Figure 2 Consultant Costs and FTE

Line No.	Consultants - Corporate	2021/22A	2022/23A	2023/24A	2024/25A	2025/26A	2026/27BF
1	Avg. Consultant Rate	120.68	126.39	125.12	120.26	132.67	125.00

Please refer to *PUB (MPI) 1-125 - Figure 4* on average cost per consultant.

c) Please refer to *Figure 1* above.

d) Please refer to *Figure IT App 4-2*. Forecasted initiative consultants for 2027/28 and beyond is not current available. The 2027/28 initiative budget is a placeholder and therefore not allocated by nature of expense, accordingly, the forecasted consultant count based on implied dollar is nil as the forecasted dollar is an unallocated placeholder only.

e) Please refer to *Figure 1* above.

PUB (MPI) 1-54

Part and Chapter:	**Part VIII - Expenses, Figure EXP-3 (lines 29-32)** **EXP Appendix 22, section 2.8** **EXP Appendix 23a** **Figure EXP App 6-1, line 34**	**Page No.:**	**10**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Initiative Expenses**		
Sub Topic:	**Initiative Implementation Placeholders**		

Preamble to IR (If Any):

Figure EXP-3 shows an Initiative Implementation Placeholder of $15.5 million per year for 2027/28 through 2030/31, comprising a $5.0 million Project Management Office placeholder and a $10.5 million Major Program placeholder, per section 2.8 of Appendix 22. These amounts are uncommitted and not supported by approved business cases.

Figure EXP App 6-1 line 34 shows the placeholder allocated to Basic at 72.8% to 75.1%, above the overall Basic share of approximately 68%.

Appendix 23a, Supporting Evidence for Recovery of Initiative-Related Expenses, states in its entirety that it will be filed in August 2026.

Question:

a) Please provide the basis for the $15.5 million annual placeholder level, including any analysis linking it to historical initiative spending or the corporate strategic plan.

b) Please describe the governance that will apply before amounts are spent against the placeholders, including business case requirements and approval gates.

c) Figure EXP App 12-2 allocates the placeholder budgets using the WCCCCR and net incurred claims operating allocator, while Appendix 12 states initiative

allocators are reviewed at the inception of each project based on its facts, circumstances, scale and scope. Please explain how an allocator can be selected for uncommitted spending with no identified projects, and the basis for the resulting 72.8% to 75.1% Basic share.

d) Please provide, for each of the last five fiscal years, a comparison of the budgeted initiative expenses versus actual initiative spending in each year.

e) Please reconcile the placeholder approach with the treatment of initiative expenses under Board Order 4/23.

Rationale for Question:

To understand the basis and governance for the initiative implementation placeholders.

RESPONSE:

a) Refer to line 6 in *Figure PUB 1-54 d)* below. As $15M was the implementation spend for the last two fiscal years (2023/24 and 2024/25), this was the basis for the forecasted $15M Major Programs placeholder ($10.5M + $4.5M). Refer to *Part VIII EXP Appendix 22a* and *PUB (MPI) 1-7* for details of the appropriateness of a placeholder estimate. EPMO $5M placeholder remains consistent with prior period, for a total of $20M planned implementation work (refer to line 7 in *Figure PUB 1-54 d)* below).

b) The overarching budget spend must be Treasury Board approved, along with approved business cases under the EPMO and Major Programs governance before project funds can be spent.

c) Allocation of the placeholder has been done on a forecasted basis and as forecasted expenses have recently been denied for rate-setting, the forecasted initiative expenses have no impact on rates. That said, MPI does still advance an expected spend on initiatives to the Treasury Board for approval of its operating budget, irrespective of the PUB's views related to same or their treatment for rate setting purposes.

d) See figure below.

Figure PUB1-54 d 5-year Budget versus Actual Comparison of Initiative Expenditures (Excluding Ongoing costs, Transfer to Operations, and NOVA Leadership)

29	Amortization (Basic)				415	1,476
30	**Total initiatives excluded for rate setting**			10,277	24,167	56,453

e) Initiatives expenses are denied for rate setting under the Board Order(s). This is not related to the placeholder approach – regardless of whether a placeholder is used or not – as filed in *Part VIII EXP Appendix 22a.*

PUB (MPI) 1-55

Part and Chapter:	**Part VIII - EXP Appendix 18** **Figure EXP App 18-6** **Figure EXP App 6-1, line 8**	**Page No.:**	**16**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Initiative Expenses**		
Sub Topic:	**Capitalization of Technology Expenditures**		

Preamble to IR (If Any):

Figure EXP App 18-6 shows deferred development costs of $2.2 million in 2026/27 (MyMPI and IRP Online) and nil for 2027/28 through 2030/31.

Line 15 indicates deferred development costs related to Nova of $165.5 million. Line 34 indicates impairment write-offs of $78.7 million in Deferred Development Expenditures.

Implementation expenses of $20.0 million per year (Figure EXP App 6-1 line 8), including the placeholders, are fully expensed in the year incurred.

Question:

a) Please update the deferred development table in Figure EXP App 18-6 to include the years since the inception of each of the listed projects and a total column on the far right for each project. Please add a row at line 34 to include the cumulative deferred development expenditures.

b) Please confirm whether the impairment of Deferred Development Costs totalling $78.7 million relates to NOVA. If not, please indicate what projects were also impaired.

c) Please confirm whether MPI plans no capitalization of any technology project expenditure from 2027/28 onward.

d) Please describe the capitalization criteria applied under IFRS and explain why forecast initiative expenditures are assessed as not meeting them.

e) Please discuss the intergenerational equity of recovering expenditures with multi year benefits entirely from ratepayers in the year incurred.

f) Please quantify the effect on the 2027/28 revenue requirement if placeholder and implementation expenditures eligible for deferral (IAS 8) were instead capitalized and amortized over five or ten years.

Rationale for Question:

To understand the capitalization policy for technology expenditures.

RESPONSE:

a & b)

27 ***Impairment of Deferred Development contains only the amounts that were previously deferred and impaired to expense for the projects listed in Figure EXP App 18-6*

c) Refer to part d) below.

d) MPI applies the capitalization criteria required under IFRS, including the applicable guidance for property, plant and equipment and intangible assets. The relevant accounting framework is set out in the IFRS Handbook, including IAS 16 for property, plant and equipment and IAS 38 for intangible assets. MPI assesses costs against those recognition criteria based on the nature of the expenditure and whether the cost is directly attributable to bringing an asset to the condition necessary for it to be capable of operating in the manner intended by management. Forecast initiative expenditures are not automatically capitalized simply because they relate to systems, technology, or activities that may provide benefits over more than one period. Each cost must meet the applicable recognition criteria at the time it is incurred or committed.

As described in the 2027 GRA budgeting materials, including *Part VIII EXP Appendix 22 – Budgeting Process Framework*, MPI did not pre-allocate uncommitted initiative funding between capital, deferred development, and operating expense where the underlying business case, delivery approach, timing, and nature of work were not yet sufficiently defined.

This should not be read as MPI stating that no future initiative expenditures will qualify for capitalization. *Part VIII EXP Appendix 22* expressly recognizes that certain expenditures within the initiative budget may qualify for capitalization in accordance with IFRS, including property and equipment and deferred development costs for intangible assets. Rather, MPI's position is that eligibility for capitalization can only be assessed when the work is business cased and sufficiently developed, including when scope, timing, dependencies, delivery approach, and the nature of the expected costs are known. At this time, the currently approved and open business cases do not provide a sufficiently reliable basis to allocate the uncommitted placeholder amounts to specific projects or expense categories. Accordingly, MPI has adopted a simplified placeholder

approach for uncommitted amounts to avoid presenting preliminary accounting classifications as though they were known and supportable at the time of the GRA filing.

As it concerns the principle of intergenerational equity, MPI submits that the recovery of expenditures from ratepayers today for services tomorrow is analogous to customers having to share the financial burden of insurance losses with others, notwithstanding they might never advance an insurance claim. Moreover, the recovery of costs for a project with multi-year benefits would reasonably be expected to occur over multiple years thereby reducing the inequity of those few that might receive little or no benefit from the finished product (much like the insured that pays premiums but never opens a claim).

There is a balance to be struck, tomorrow's ratepayer might rightfully complain about expenditures being deferred in circumstances where some ratepayers might benefit from the project but escape from having to share in the cost.

Indeed, with the PUB having deferred the capital cost of some IT projects now in service, the effect of Order No. 4/23 has current customers already receiving the benefit of the IT asset but contributing nothing toward the cost. The current cost of service is being subsidized by future customers, from whom the entirety of the accumulated costs must eventually be recovered as a matter of regulatory law. The longer the deferrals continue, by definition, the greater the intergenerational *inequity*, made worse if the recovery period is amortized.

Because ratemaking in MPI's General Rate Application is prospective and not retrospective, forecasted initiative expenses should be included in rates for the regulator to consider under the prudency test. Those expenses are then either allowed or disallowed.

e) MPI refers to ***PUB (MPI) 1-6***. In that information request, MPI was asked to provide alternative rate indications excluding the $10.1 million of initiative

expenses, including all excluded initiative expenses using line 30 of ***PF-1*** instead of line 31, and including the 2025/26 Regulatory Deferral Account balance spread over 10 years instead of the proposed $10.1 million of initiative expenses. MPI was also asked to discuss the merits of recovering initiative expenses over a future period during which the systems will be in use.

MPI's response to this part should be read together with its response to ***PUB (MPI) 1-6*** and the related 2027 GRA evidence. MPI does not agree that placeholder or implementation expenditures can be assumed to be eligible for capitalization or deferral under IAS 8, nor does IAS 8 provide an independent basis to capitalize or defer expenditures that do not meet the recognition criteria under the applicable IFRS standard.

PUB (MPI) 1-56

Part and Chapter:	**Part VIII - Expenses, Figure EXP-2 (note, line 14)** **EXP Appendix 18, Figures EXP App 18-2, 18-3 (line 51)** **EXP Appendix 6, Figure EXP App 6-2**	**Page No.:**	**9**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Operating Expenses**		
Sub Topic:	**Onerous Contract Expense of $37.3 Million**		

Preamble to IR (If Any):

The note to Figure EXP-2 states that 2025/26 actuals include onerous contract expenses of $37.3 million corporate and $29.5 million Basic. Figure EXP App 18-2 line 51 records the amount under Initiatives Ongoing expense.

The Appendix 6 comparative explanation attributes the increase in 2025/26 licence fees to an onerous contract being fully expensed at March 31, 2026. Ongoing licence charges fall from $16.7 million in 2025/26A to $3.6 million in 2026/27BF (Figure EXP App 18-2 line 50).

Question:

a) Please identify the contract, including the vendor, the system or service licensed, the contract term, the annual cost and the total remaining commitment, and explain why the contract is onerous.

b) Please provide the measurement of the onerous contract provision under IAS 37, including the unavoidable costs, any expected economic benefits and the discounting applied.

c) Please describe the steps taken to mitigate the loss, including renegotiation, termination or redeployment of the licences.

d) Please describe the origin and governance of the contract, including when it was approved and its relationship, if any, to Project Nova.

e) Please provide a schedule of the provision by year, showing the accrual, utilization and any reversals, and the corresponding reduction in forecast licence expenses in 2026/27 through 2030/31.

f) Please explain the treatment of the $29.5 million Basic charge for rate setting purposes, including its effect on Basic net income and capital, and confirm whether MPI seeks any recovery of this amount from ratepayers in this or a future application.

Rationale for Question:

To understand the implications of the onerous contract.

RESPONSE:

a to d) Please see *PUB (MPI) 1-38 – Appendix 1 - Confidential* for the Onerous Contract memo, all details requested are contained therein.

e) See *Figure 1* below:

Figure PUB1-56 - 1 Present Value of Duck Creek Onerous Contract Contractual Payments Remaining

[REDACTED]

f) The onerous contract has not been included in the $10.1M initiative expenses requested for rate setting, as detailed in Figure EXP App 23-2.

PUB (MPI) 1-57

Part and Chapter:	**Part VIII - Expenses, Figure EXP-2 (notes, lines 13-14)** **EXP Appendix 6, Figure EXP App 6-2**	**Page No.:**	**9**
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Operating Expenses**		
Sub Topic:	**2025/26 Impairment of $15.1 Million**		

Preamble to IR (If Any):

The notes to Figure EXP-2 state that 2024/25 actuals include impairment of $60.8 million corporate ($8.9 million Basic) and 2025/26 actuals include impairment of $15.1 million corporate ($8.0 million Basic). The Appendix 6 comparative explanation attributes the 2025/26 impairment to Nova.

The Basic share of the 2024/25 impairment was approximately 14.6% ($8.9 million of $60.8 million). The Basic share of the 2025/26 impairment is approximately 53.0% ($8.0 million of $15.1 million).

Question:

a) Please identify the assets impaired in 2025/26, the impairment indicators under IAS 36, and the recoverable amount determination.

b) Please file the working paper or memorandum supporting the 2025/26 impairment and its allocation across lines of business.

c) Please provide a continuity schedule of all Nova related deferred development from project inception through 2025/26, showing amounts capitalized, impaired, written off and remaining, by line of business.

d) Please explain why the Basic share of the 2025/26 impairment (53.0%) differs materially from the Basic share of the 2024/25 impairment (14.6%).

e) Please confirm whether any further Nova related impairments or write offs are possible.

Rationale for Question:

To understand the completeness of Nova related losses and the basis for allocating them to Basic.

RESPONSE:

a) & b) Please see ***Appendix 1 - Confidential*** for the 2025/26 impairment memo, all details requested are contained therein.

c) See figure below.

e) Please see ***Appendix 1 - Confidential*** for the 2025/26 impairment memo for assessment of impairment. Impairment of assets will continue to be tested annually based on current stated indicators in accordance with IFRS.

Assessment for Impairment in Intangible Assets

Fiscal Year Ended March 31, 2026

Background and Impairment Previously Recognized

Project Nova was initiated in 2019 as Manitoba Public Insurance's (MPI) most ambitious technology modernization program, intended to replace aging, end of life core systems across MPI's Insurance, Driver and Vehicle Administration (DVA) and Special Risk Extension (SRE) lines of business. The strategic intent was to reduce technology risk, strengthen cybersecurity, and enable modern, customer centric digital services—aligning with MPI's mandate to provide reliable, secure and accessible services to Manitobans.

Project Nova set out to provide 4 main releases, with 3 sub releases that allowed self-serve capabilities.

- Nova Release 1A – Special Risk Extension (SRE)
- Nova Release 2A – International Registration Program (IRP)
- Nova Release 3A - Autopac, Vehicle Registration and Driver License
- Nova Release 4A - Physical Damage Claims
- Nova Sub-Releases – R2B, R3B, and R4B (Self Service Releases)

In accordance with International Financial Reporting Standards (IFRS), MPI conducted an annual assessment for impairment of assets not in use in fiscal 2024/25. Appendix A provides a summary of the requirements under IFRS for testing for Impairment of Assets. The impairment testing at December 31, 2024, resulted in MPI recording a $60.8 million impairment in intangible assets (i.e. deferred development cost assets) in fiscal 2024/25.

Developments through Fiscal 2025/26

Release 1: Special Risk Extension (SRE, Basic & Ext) – Launched February 2023

After significant efforts to reduce defects and fix issues identified in Release 1, the decision was made in April 2025 to close out the activity occurring in Release 1 and revert to using the legacy system to minimize the impact on clients, brokers, and staff.

A remediation plan for Release 1 commenced in May 2025 that included directing new business and policy renewal activity to the legacy system until the issues with Release 1 (SRE) could be firmly resolved and then tested and approved for use. This plan allowed policies remaining in Release 1 to run their course to expiry or cancelation, thereby reducing the volume of activity in the environment while investigations and remediation activities were occurring.

MPI assessed the issues encountered with Release 1 and revisited the business requirements for the system. MPI engaged the software vendor and system integrator for R1 to assist in estimating the time, effort and cost to remediate the issues, as well as estimates for reconfiguring the implementation of the software if necessary.

Release 2 - International Registration Program (IRP) First phase Launched June 2024

Development of IRP Online/MyMPI continued through 2025/26. At year end March 31, 2026, the next phase of the Release was nearing completion and scheduled to launch in early fiscal year 2026/27.

Release 3 - Autopac, Vehicle Registration and DVA

Discovery for Release 3 completed in the prior year was under evaluation for development. Resources were focused on remediation within Release 1 and continued development for Release 2. Some foundational functionality related to DVA for Release 3 had completed in conjunction with the development and progress within Release 2.

Release 4 - not commenced.

Review of Project Nova in Fiscal 2025/26

A comprehensive review conducted in 2025, considered the outcomes of Release 3 Discovery, lessons from Releases 1 and 2, governance feedback, and rate-payer accountability and concluded that continuing within the Nova construct would extend timelines, increase costs, and constrain organizational capacity for other critical modernization. The results of the review signaled a materially longer duration (to ~56 months from 18) and higher cost trajectory (program total ~$435.7 million vs. prior ~$290 million, before any detailed R4 discovery).

On balance, and to align with expectations for transparency and accountability, MPI's Executive Steering Committee determined that the original Nova program model was no longer the responsible path. With Board approval, the Nova program was closed on June 30, 2025. Remaining requirements for modernization were to be planned at a future date in alignment with capacity for change and balanced with other key initiatives required to support the business.

As of June 30, 2025, MPI maintained ongoing business expenses (licensing/support), continued development of R2; on-going remediation efforts in R1; foundational development within R3, (elements cross functional with R2). Foundational work related to R1–R3 remained in use at June 30, 2025.

The Corporation then identified next steps to tackle modernization, summarized as follows:

- Move forward via the Five-Year Rolling IT Roadmap using a portfolio managed phase gated delivery model with annual (gated) funding approvals tied to milestone achievement and transparent KPIs (the "traditional approach").
- Stabilize SRE (R1) through a timeboxed remediation plan, with adoption/quality KPIs and explicit go/no-go- gates for broker transitions.
- Advance IRP Online and MyMPI as discrete, low risk increments.
- Close the Nova benefits ledger and track other project benefits under the Roadmap at the project level, reporting progress and value realization on other Roadmap initiatives annually to the Board and in alignment with PUB expectations.

Assessment for Impairment within Intangible Assets in Fiscal Year 2025/26

With the closeout of Project Nova on June 2025, the assessment of benefits related to the intangible assets developed for what was referred to as Project Nova Project, is now assessed at the project level.

To meet the requirements of IFRS for assessing and reporting impairments in assets, the releases (Release 1 to Release 3) are individually assessed (rather than combined into one Major Program or Corporate asset).

The releases (Release 1 to Release 3) are assessed for indicators of impairment and are subject to quantitative testing for impairment when indicators are noted. In addition, assets that are 'not in use' within the releases are subject to quantitative testing annually and at the same time each year (i.e. at end of Q3, December 31). Please see appendix A for a summary of the requirements for testing for impairment of intangible assets reported under IFRS.

As at December 31, 2025, the assets associated with the Releases 1 to 3 were as follows:

Assets from Project Nova at December 31, 2025

Category	Description (from Nova)	Release (from Nova)	Asset Balance at Dec 31 2025	Accumulated Amortization at Dec 31 2025	Net Book Value at Dec 31 2025
[redacted]					
			53,295,664.87	(6,887,204.63)	46,408,460.24

Note a: Assets in use. Test for impairment if there is any indication that the asset may be impaired
Note b: Assets not in use. Test for impairment annually

In accordance with IFRS (IAS 36.12), the first consideration is whether there are indicators of impairment as of December 31, 2025 (Q3):

- *External sources of information*
  - *Have there been any recent technical, environmental, legal, or regulatory changes that might affect the utility of the asset(s)? (e.g., Economic downturn, legal changes, technological advancement making certain assets discontinued).*
- *Internal source of information*
  - *Have there been any major changes in how we use or intend to use the asset(s)? (e.g., asset obsolescence or plans to dispose of asset by operational changes).*
  - *Have there been any incidents of underperformance or indications that the economic performance of our assets is lower than expected? (e.g., increased costs or having maintenance or operational issues caused prolonged downtimes for assets or the asset becoming idle).*
  - *Are there any signs of physical damage or obsolescence of the asset(s) that may affect their value? (e.g., underutilization or idling of certain assets).*
- *Financial indicators*
  - *Are there any indications that the cash flows are significantly changed? (e.g, higher operational costs, or lower revenue).*
- *Other indicators*
  - *Are there any other circumstances or events that you believe may indicate a potential impairment of this asset?*

Release 1 (SRE, Basic & Ext): The assets reported at December 31, 2025, are the netbook values for foundational assets and Digital assets that were assessed last year during asset Impairment testing activities as foundational assets offering future value for the Corporation.

Post closure of Project Nova at June 30, 2025, the decision was made to stabilize Release 1 through a timeboxed remediation plan, with adoption/quality KPIs and explicit go/no-go-gates for broker transitions.

The remediation plan that began in May 2025 included directing activity to the legacy system until the issues with Release 1 can be firmly resolved and the release can be tested and approved for use. A return to fully implementing Release 1 and using the foundational assets reported for R1 depends on the time and cost involved to resolve the issues with Release 1 and reimplement the solution.

At December 31, 2025, an assessment of time, effort and costs to remediate Release 1 was underway. The software provider and the system integrator were also engaged to determine the effort to remediate the issues detected to date. Although the assessment was not formally completed by December 31, 2025, it was becoming evident that a

significant investment would be required to correctly identify root causes and remediate the existing issues within Release 1.

It was concluded that the remaining foundational assets reported within R1displayed indicators of impairment. Based on assessments at December 31, 2025, [redacted] were assessed as unlikely to be used as originally intended and expected in supporting a full return to operations [redacted] The foundational assets were unlikely to be used in the coming years and were assessed as not providing future value to the Corporation.

In measuring impairment under IFRS, the fair value, less cost of disposal (FVLCOD) and Value in Use (VIU) for the asset are determined and compared to the carry value reported for the asset. It is not possible to sell the assets reported within Release 1; therefore, fair value less cost of disposal (FVLCOD) is not determined and so Value in Use was assessed.

The Value in Use reflects the cash inflows and outflows derived from using the asset. At December 31, 2025, it was evident that extensive effort and cash outflows would be required to remediate Release 1. [redacted] were written down to zero value in the third quarter of the fiscal year 2025/26 based on the cash outflows expected to remediate the assets and the limited likelihood that the assets would return to full use.

The Digital assets in use under R1 are assessed as foundational in nature and expected to provide future value with integrations for SRE; and Basic & Extension infrastructure, data access and knowledge sharing within the future solution for SRE and Basic and Extension, including interactions across the Corporation's environments. These assets are likely to be used and to provide value to the Corporation. At December 31, 2025, Digital assets were recognized as supporting remaining processing and reporting activities from R1.
Impact of assessment for impairment: Impairment of $2,093,170 was recognized

Support for Assessment of Impairment at December 31, 2025- Subsequent Communication: On April 2, 2026, the Corporation provided internal communication regarding Release 1 [redacted]

Release 2 (IRP): As at December 31, 2025, development for IRP Online/MyMPI was progressing, and key functionality was expected to be implemented in the first half of 2026 calendar year. There were no

indications of impairment for the intangible assets in use; a further test for impairment was not warranted.
Release 2 received a transfer of assets of $717,558 from Release 3 relating to foundational assets that supported functionality for DVA within Release 2.
Impact of assessment for impairment: Increase in asset value of $717,558 with the transfer of work completed under Release 3 that is foundational and integrated with the R2 solution

Release 3 (Basic & Extension & DVA): Discovery was completed in 2024/25; development was paused for further evaluation; resources were focused on remediating Release 1 and on-going development in Release 2.

As of December 31, 2025, Release 3 development had terminated with the closure of Project Nova. Components of the work performed in Release 3 that were foundational and combined with development and functionality in Release 2 for IRP were transferred to Release 2.

Assets Not in Use of $717,558 were transferred to R2 IRP in the fourth quarter of 2025/26.
Impact of assessment for impairment: Impairment of $12,995,530 ($13,713,088 less $717,558 transferred to Release 2) was recognized for Release 3 in the fourth quarter of 2025/26. This effectively closed out Release 3 in fiscal 2025/26.

Total Impairment Recognized in Fiscal 2025/26 in Release 1 and Release 3 after Closure of Project Nova: $15,088,700 (R1 $2,093,170; R3 $12,995,530)

Assets from Project Nova at December 31, 2025

Category	Description (from Nova)	Release (from Nova)	Asset Balance at Dec 31 2025	Accumulated Amortization at Dec 31 2025	Net Book Value at Dec 31 2025	Impairment Recorded Feb 28, 2026	Transfer Amount	Net book value remaining

Note a: Assets in use. Test for impairment if there is any indication that the asset may be impaired
Note b: Assets not in use. Test for impairment annually

Release 1 (SRE):	[redacted]
	Post closure of Project Nova at June 30, 2025, the decision was made to stabilize R1 through a timeboxed remediation plan, with adoption/quality KPIs and explicit go/no-go- gates for broker transitions. Assessment of time, effort and costs to remediate Release 1 resulted in a conclusion that the assets associated with Release 1 could not be remediated effectively within reasonable time and cost estimates. The Value in Use for some of the work completed for this asset was reduced to zero. The Digital assets that were in use within Release 1 did not present an indication of impairment; these assets in use are assessed as providing ongoing use and value to the Corporation.
Release 2 (IRP)	As at December 31, 2025, IRP Online/MyMPI development was progressing, and key functionality was expected to be implemented in the first half of 2026 calendar year.
Release 3 (Autopac/DVA)	Discovery had been completed in 2024/25; development was paused until R1 could be remediated. As of December 31, 2025, R3 development terminated with the closure of Project Nova. Components of the work performed in R3 have been identified as foundational and benefiting the development of functionality in R2 for IRP. Assets not in use of $718K are transferred to R2 IRP.

ALLOCATION ACROSS LINES OF BUSINESS AND PRESENTATION OF IMPAIRMENT IN INTANGIBLE ASSETS IN FISCAL YEAR 2025/26

The assets reported within Release 3 that were not in use at December 31, 2025, and have been assessed as impaired, and not providing future value to the Corporation after the closure of Project Nova, were related to the Basic line of business ($7,459,131) ; Extension ($2,216,079) and Driver Vehicle Administration (DVA) ($3,320,321).

GL Description	Estimated Impairment Amount	Basic	Extension	SRE	DVA	Total
DDC-Nova SRE	(1,093,973)	-	-	(1,093,973)	-	(1,093,973)

R3 Discovery-DVA	-	-	-	2,637	2,637
Total	**7,959**	**2,716**	**1,094**	**3,320**	**15,089**

Total for Operating Expense	13,995
Total for Acquisition Expense	1,094
	15,089

The impairment to the deferred development costs asset will have no impact on the Minimum Capital Test (MCT) for the lines of business. While there will be an estimated reduction to equity earnings and therefore available capital, the MCT is largely shielded from the reduction in Deferred assets because it requires a deduction of the intangible asset to available capital. Accordingly, although the intangible asset is reduced, there is an offsetting add-back to available capital.

APPENDIX A

ASSESSMENT FOR IMPAIRMENT AND IMPAIRMENT TESTING UNDER IFRS

International Financial Reporting Standards (IFRS) includes requirements for the assessment and reporting of impairment in the value of assets reported by an entity. IAS 36-Impairment of Assets requires an entity to report assets at no more than the asset's recoverable amount—the higher of fair value less costs of disposal and value in use.

This standard sets out the requirements for an entity to assess, at the end of each reporting period, whether there is any indication that an asset may be impaired. If any such indication exists, the entity is required to estimate the recoverable amount of the asset.

Regardless of whether there is any indication of impairment, an entity shall also test an intangible asset that is not yet available for use, for impairment, annually by comparing its carrying amount with its recoverable amount. IAS 36.42 requires an entity to include an estimate of any further cash outflow that is expected to be incurred before the asset is ready for use or sale when the carrying amount of the asset does not yet include all the cash outflows to be incurred before it is ready for use or sale (e.g. a building under construction or development project that is not yet completed).

This impairment test may be performed at any time during an annual period, provided it is performed at the same time every year.

MPI conducts assessments for impairment in intangible assets that are not available for use, annually, at the end of the third quarter (December 31).

Quantitative Impairment Test

IAS 36 requires that:
• goodwill, indefinite life intangibles and intangible assets not yet available for use are tested for impairment at least annually, in addition to when there is any indication of impairment,
and
• all other assets are tested for impairment when there is any indication that the asset may be impaired.

Testing for impairment requires comparing the asset's carrying amount with its recoverable amount:

- Estimate the recoverable amount
- Compare the recoverable amount with the carrying amount
- Recognize or reverse any impairment loss.

According to the standard (IAS 36.22): *Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from*

other assets or groups of assets. If this is the case, recoverable amount is determined for the cash-generating unit to which the asset belongs unless either:

(a) the asset's fair value less costs of disposal is higher than its carrying amount; or

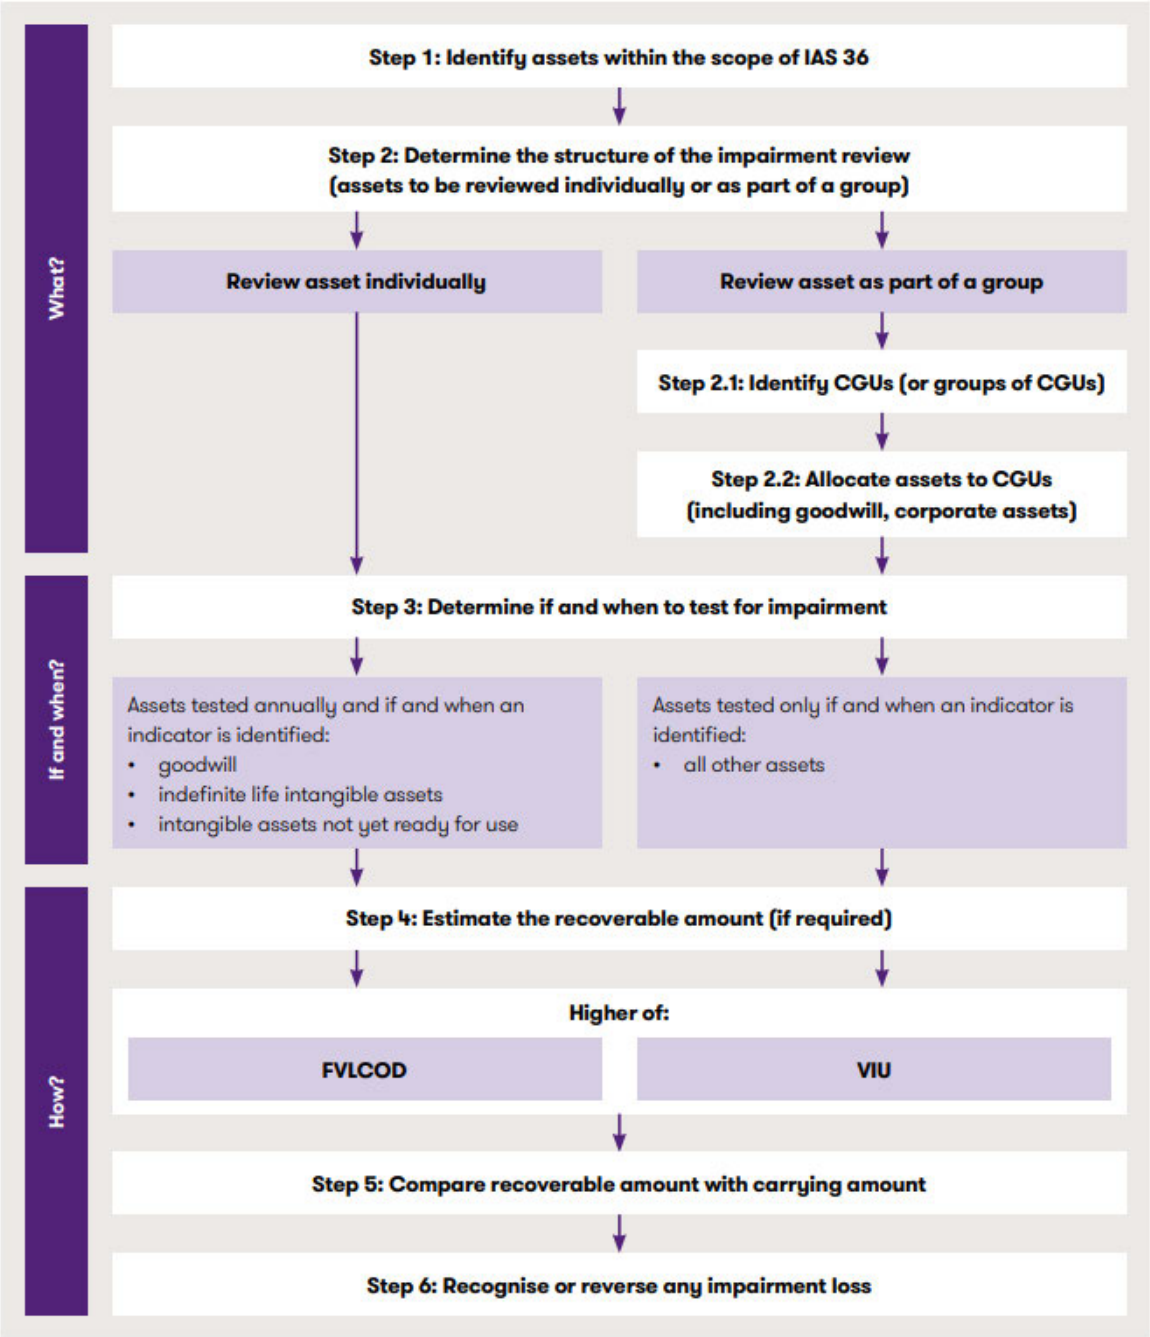
(b) the asset's value in use can be estimated to be close to its fair value less costs of disposal and fair value less costs of disposal can be measured.

The recoverable amount of an asset or a Cash Generating Unit (CGU) is the higher of its fair value less costs of disposal (FVLCOD) and its value in use (VIU).

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Value in use is the present value of the future cash flows expected to be derived from an asset or CGU.

Value in use



VIU in effect assumes that the asset will be recovered principally through its continuing use and ultimate disposal. VIU is therefore 'entity-specific' in that it reflects the entity's intentions as to how an asset will be used. VIU therefore differs from fair value because fair value reflects the assumptions that market participants would use when pricing the asset. Fair value does not reflect any of the following factors to the extent they would not be generally available to market participants:

- additional value derived from grouping assets
- synergies between the asset being measured and other assets
- legal rights or legal restrictions that are specific only to the current owner of the asset
- tax benefits or tax burdens that are specific to the current owner of the asset (IAS 36.53A(a) – (d)).

Estimating VIU involves the following:

- estimating the future cash inflows and outflows to be derived from continuing to use the asset and from its ultimate disposal (IAS 36.31(a))
- applying the appropriate discount rate to those future cash flows (IAS 36.31(b)).

A summary of the decision points within IAS 36 is provided in the chart below (excerpts from Grant Thornton publication Insights into IAS 36).

APPENDIX B

INTERNAL COMMUNICATION PROVIDED ON APRIL 2, 2026

SUBSEQUENT TO IMPAIRMENT TESTING AT DECEMBER 31, 2025, AND YEAR END REPORTING DATE MARCH 31, 2026

PUB (MPI) 1-58

Part and Chapter:	**Part VIII - Expenses, EXP Appendix 20** **EXP Appendix 6, Figure EXP App 6-4** **PUB (MPI) 2-40 Appendix 1 (2026 GRA)** **PUB (MPI) 2-37, 2-38 (2025 GRA)**	**Page No.:**	
PUB Approved Issue No:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Staffing Classification Changes**		

Preamble to IR (If Any):

Appendix 20 shows a shift in staff composition between 2024/25 and 2025/26. Total corporate FTEs were flat (down 0.3%) while FTEs moved from Clerical to Technical/Professional:

Category	2024/25 FTE	2025/26 FTE	Change (FTE)	% Change
Management	138.0	149.0	+11.0	+8.0%
Supervisory	208.0	225.0	+17.0	+8.2%
Technical/Professional	1,190.2	1,441.8	+251.6	+21.1%
Clerical	503.1	215.5	(287.6)	(57.2%)
Student/Intern	7.3	10.0	+2.7	+37.0%
Total	2,046.6	2,041.3	(5.3)	(0.3%)

Most of the movement sits in the Operations division, where Clerical FTEs fell 274.1 and Technical/Professional FTEs rose 237.5. Claims and Customer & Product Value show the same pattern on a smaller scale. The offsetting changes within a flat total point to reclassification of existing positions rather than net new hiring or reductions.

In PUB (MPI) 2-40 Appendix 1 (2026 GRA), MPI filed a position-by-position FTE listing comparing 2024/25 and 2025/26.

In PUB (MPI) 2-37 (2025 GRA), MPI stated that 7% of its job positions were considered below market pay.

Question:

a) Please explain the movement of FTEs from Clerical to Technical/Professional between 2024/25 and 2025/26 for each of Operations, Claims, and Customer & Product Value.

b) Please indicate how many FTEs of the change reflect formal reclassification of existing positions, and how many reflect net reductions, changes in hiring mix, or restructuring.

c) Please describe the process and criteria for reclassifying a position from Clerical to Technical/Professional, including changes in duties and required qualifications, and indicate how many of the reclassified positions went through the Job Evaluation process.

d) Please reconcile the category movement in Appendix 20 to the position level listing filed as PUB (MPI) 2-40 Appendix 1 (2026 GRA) and refile that listing with the staffing classification category added for each position for 2024/25 and 2025/26.

e) Given MPI stated in PUB (MPI) 2-37 (2025 GRA) that approximately 7% of positions were below market pay, please explain the compensation impact of reclassifying approximately 288 positions from Clerical.

f) Appendix 6 attributes part of the 2027/28 salary increase to position reclassifications that increased the average salaries paid. Please reconcile the Appendix 20 reclassifications with that explanation and quantify the salary impact, considering the differential in average salaries from Figure EXP App 7-1.

g) Please indicate whether further reclassifications are planned for 2026/27 or the rating years.

Rationale for Question:

To understand the drivers of the change in staffing composition and its effect on compensation costs.

RESPONSE:

a) The change between 2024/25 and 2025/26 reflects an update to the Job Category assigned to positions for reporting purposes. MPI reviewed the duties for the positions included in the Operations, Claims, and Customer & Product Value Divisions, and aligned them to the appropriate Job Category based on the nature of the work performed. As a result, positions that had previously been reported in one staffing category were reported in the appropriate category in 2025/26. The changes do not represent new FTE growth, reductions, changes to job duties, or changes to required qualifications. The change did not impact compensation and salaries; rather, it reflects the correction of the Job Category used for reporting purposes.

b) There were no formal reclassifications of existing positions, net reductions, or changes in hiring mix, or restructuring for any of the FTEs that were updated.

c) The only roles at MPI in the Clerical Job Category, are Clerk 1, 2 and 3. None of the FTEs corrected went through a Job Evaluation Process or the Reclassification process as the exercise was a Job Category clean-up activity only.

d) Please see ***Appendix 1*** for updated Appendix 20 filed as PUB (MPI) 2-40 Appendix 1 (2026 GRA).

e) None of the FTEs were reclassified, and there was no compensation impact.

f) The movement between Clerical and Technical/Professional was an exercise in correcting the Job Category only. There was no impact to compensation as a result of this review and it did not impact the average of salaries paid. No changes to Appendix 20 are needed.

g) There are no reclassifications or recategorizations planned for 2026/27 at this time.

PUB (MPI) 1-59

Part and Chapter:	**Part VIII - Pro Formas** **Part VIII - Expenses, EXP Appendix 18, Figure EXP App 18-5** **Part II - MFR Appendix 10** **PUB (MPI) 2-60 (2026 GRA)**	**Page No.:**	
PUB Approved Issue No:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Financial Forecasts**		
Sub Topic:	**DVA Operations and Funding**		

Preamble to IR (If Any):

In PUB (MPI) 2-60 (2026 GRA), MPI provided a continuity schedule of DVA retained earnings. That schedule showed government funding held at $40.2 million from 2024/25 through 2029/30, based on 2024/25 actual funding, with DVA net deficits of $13.8 million to $17.7 million in each forecast year. DVA retained earnings declined from $36.6 million at the end of 2025/26 to a deficit of $7.7 million in 2027/28, growing to a deficit of $40.8 million by 2029/30.

The Pro Formas chapter in this Application provides statements for Basic (PF), Extension (EPF) and combined Autopac (APF) only. No DVA financial forecast is filed. Figures PF-3 and EPF-3 show all forecast Extension excess capital transferred to the Basic Rate Stabilization Reserve ($41.9 million to $54.2 million per year from 2026/27 through 2030/31), with Extension held at a 200% MCT target in every year.

MFR Appendix 10 shows that transfers from Extension to DVA ended in 2021/22.

Question:

a) Please update the DVA continuity schedule provided in Figure 1 of PUB (MPI) 2-60, including 2025/26 actuals and the forecast through 2030/31, with the opening, transfer and closing retained earnings rows.

b) Please file a DVA pro forma statement of operations and retained earnings continuity for 2025/26 through 2030/31 as part of this Application.

c) Please provide the status of discussions with the Government of Manitoba on the DVA funding level and indicate whether MPI has requested an increase or an escalation mechanism.

d) Please explain where the accumulating DVA deficit resides on the corporate balance sheet and its effect, if any, on Basic capital and the MCT.

Rationale for Question:

To determine whether DVA operations are fully funded by government funding and whether Basic ratepayers bear any non-insurance costs.

RESPONSE:

a) MPI does not maintain a separate continuity schedule for expenses and retained earnings for the DVA line of business. Please refer to PUB 1-37c for the 10 Year Summary of DVA Total Operating Expenses and part (b) below for the Statement of Operations and Statement of Changes in Equity.

b) Refer to figures 1 & 2 below for the requested information:

Figure 1 DVA Statement of Operations

12	**Total Accumulated Other Comprehensive Income**	5,139	9,993	10,516	10,516	10,516	10,516
13	**Total Equity Balance**	**29,583**	**38,183**	**38,093**	**36,449**	**33,759**	**30,500**

c) Government has approved the recovery at $54M on a go forward basis.

d) The DVA accumulated surplus or deficit is reflected in the DVA line of business retained earnings balance, which forms part of MPI's total corporate retained earnings. Basic capital and the Basic MCT are calculated separately for the Basic line of business. Accordingly, the DVA retained earnings balance is not included in Basic capital and does not affect the Basic MCT.

PUB (MPI) 1-60

Part and Chapter:	**Part VIII – EAR Attachment B**	**Page No.:**	**Exhibit 1 Sheet 1**
PUB Approved Issue No:	**10. Claims Forecasting** **13. Run-off of prior year claims**		
Topic:	**Carried Reserves**		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – EAR Attachment B – Exhibit I Sheet 1 shows Net of $2,063,243,000, Carried Before Review of $2,232,345,000 and Indicated Less Carried of ($169,102,000) in Row 5 Total Claim Liabilities.

The IBNR on Exhibit 2 sheet 1 is 725,566,397. IBNR on Exhibit 1 Sheet 1 is $651,606,000.

The Ultimate Loss & ALAE for Basic – Bodily Injury for Insurance Year 2025 on Exhibit 2 Sheet 2 is 12,002,166, significantly higher than the average level of prior years.

Question:

a) Please indicate what “Carried Before Review” and what “Indicated Less Carried” mean and any conclusions that can be drawn about the amounts.

b) Please indicate the source of the difference in the IBNR between Exhibit 1 and Exhibit 2.

c) Please provide details on why the 2025 Insurance Year for Bodily Injury is projected to be higher than prior years.

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

a) "Carried Before Review" is the amount of total claims liabilities booked in the financial statements before the quarterly actuarial valuation review is performed. At year-end, the "Carried Before Review" represents actuarial reserves as at the February month end and case reserves as of March 31st, 2026.
"Indicated Less Carried" represents the impact from the actuarial review by taking the difference between the actuarially indicated reserves and the reserves carried before review. At year-end, the indicated reserve is based on March data.

The Indicated Less Carried impact in Row 5 Total Claim Liabilities is driven by release in reserves from favourable loss development in physical damage and accident benefits along with favourable impact from rising interest rates.

b) The $74.0 million IBNR (Incurred But Not Reported) difference between Exhibit 1 and Exhibit 2 is due to the implementation of the new case reserving calculator driven by the PIPP Termination Rate & Methodology Update Project. Case reserves at the valuation date were re-evaluated using the new termination rates to assess its impact relative to the previous calculators. This review resulted in a release of $74M in unpaid estimates. This is reflected as an anticipated $74M release in case reserves in Exhibit 2, while reflected as a release in IBNR in Exhibit 1. The total reserve as of March 31st under both exhibits are the same.

c) The 2025 Insurance Year Bodily Injury projection is higher than prior years due to unfavourable claims experience for the year with a spike in Q4. There were 10 claims with reserve increases greater than $100,000 compared to 5 claims in the prior year, along with two claims with reserve increases of approximately $350,000 each. These larger reserve increases have contributed to the higher projected ultimate losses for 2025 than prior years.

PUB (MPI) 1-61

Part and Chapter:	**Part VIII – EAR Attachment B**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**10. Claims Forecasting** **13. Run-off of prior year claims**		
Topic:	**Accident Benefits – Weekly Indemnity**		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – EAR Attachment B – PIPP Termination Rate & Methodology Update Project. In Section 1 the Executive Summary it indicates that the overall estimated impact to liabilities of the case reserve changes relative to the previous method, measured as of March 31, 2026 are $31 million decrease for Weekly Indemnity. It also indicates that the overall estimated impact to liabilities of these valuation changes relative to the previous method, measured as of March 31, 2026 are $13 million increase for Weekly Indemnity, for a total impact of a $18 million decrease to reserves.

Part VIII – EAR Attachment B – Report on the Valuation of Actuarial and Other Policy Liabilities as of 31 March 2026. In Section 2 the Executive Summary it indicates that the ultimate undiscounted estimates have developed unfavorably for Weekly Indemnity by $51.2 million including changes in assumptions. When comparing to the prior valuation, a significant portion of the unfavorable development is coming from the indexed Accident Benefit lines, most notably Weekly Indemnity. This is attributable to the change to termination rate assumptions.

Exhibit 3 Sheet 8 shows the Change in Ultimate Loss Estimates to be an increase of $51.2 million, split by accident year.

Figure CF-4 indicates a 21.52% increase in the projected ultimate loss cost for the 2027/28 rating year for Accident Benefits – Weekly Indemnity in the 2027 GRA.

Question:

Please provide a detailed explanation that reconciles between the above references, with the first indicating a reduction in reserves, and the second and third indicating an increase in reserves, and the indicated loss cost increasing by a material amount.

RESPONSE:

The $31M decrease and $13M increase relate to two separate but related impacts on Weekly Indemnity reserves.

The update to the PIPP termination rates reduced undiscounted case reserves by approximately $31M. The corresponding impact on the undiscounted IBNR was an increase of approximately 83M. As a result, the undiscounted actuarial ultimate losses increased by approximately $51.2M, which is the unfavorable development shown in the valuation report and Exhibit 3.

The $18M decrease discussed in ***Part VIII EAR Attachment B*** reflects the overall impact on Weekly Indemnity reserves after considering all components of the reserve. While undiscounted ultimate losses increased by $51.2M, changes in undiscounted IBNR, ULAE reserve, inflation, discounting and risk adjustment resulted in a net increase of approximately $13M from the actuarial valuation assumption changes. When combined with the $31M reduction in case reserves from the updated termination rates, the overall impact was a reduction of approximately $18M in Weekly Indemnity reserves.

Please find the explanation of the increase in projected ultimate loss cost by root causes in the table below, with a narrative description for each below the table.

Figure 1 – Comparison with 2026 GRA (2027/2028 Rating Year) – Projected Ultimate Loss Cost

	Accident Benefits - Weekly Indemnity
2026 GRA Estimate for 2027/28 Rating Year	**$106.08**
Add PIPP Enhancements to Total	$2.13
Change in claim experience for prior years	$11.39
Including latest year of claim experience	$0.54
Updating past trend	$6.74
Updating future trend	$8.55
Updating forecasted exposure	$0.00
Changing WFH model	-$6.52
Increase to $1,000 Deductible	$0.00
2027 GRA Estimate for 2027/28 Rating Year	**$128.91**
% Impact	
Add PIPP Enhancements to Total	2.01%
Change in claim experience for prior years	10.74%
Including latest year of claim experience	0.51%
Updating past trend	6.35%
Updating future trend	8.06%
Updating forecasted exposure	0.00%
Changing WFH model	-6.14%
Increase to $1,000 Deductible	0.00%
Combined Impact	**21.52%**

Add PIPP Enhancements to Total estimates the impact of including PIPP Enhancements in the claim forecast, as done in the 2027 GRA, rather than forecasting separately.

Change in claim experience for prior years estimates the impact on the claims forecast from the changes in historical ultimate total losses for 2024 accident year and prior years between 2026 GRA and 2027 GRA.

Including latest year of claim experience estimates the impact of adding 2025 accident year on the claims forecast. This includes impact of on-levelling historical experience to 2025 accident year (using trends and assumptions in 2026 GRA) and

shifting accident year weights to be applied for 2021 – 2025 accident years instead of 2020-2024 accident years.

Updating past trend estimates the impact of changing past loss trends to 2027 GRA assumptions on the claims forecast. This includes any changes to WFH factors used to derive the past trend in 2027 GRA. In this step, the change to WFH methodology has not been considered.

Updating future trend estimates the impact of changing future trends to 2027 GRA assumptions on the claims forecast.

Updating forecasted exposure estimates the impact of using the latest exposure forecast based on the experience as of March 31, 2026, in the claims forecast.

Changing WFH model estimates the impact of using alternative assumptions to estimate the impact of COVID-19 and subsequent impact of working from home. The change in the WFH assumption impacts MPI's view on past frequency trends and future frequency trends.

Increase in $1,000 Deductible estimates the impact of change in the Basic deductible from $750 to $1000 in claims forecast effective April 1, 2026. This has no effect on Weekly Indemnity.

PUB (MPI) 1-62

Part and Chapter:	**Part VIII – EAR Attachment B**	**Page No.:**	**Multiple**
PUB Approved Issue No:	**10. Claims Forecasting** **13. Run-off of prior year claims**		
Topic:	**Accident Benefits – Personal Care Assistance**		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – EAR Attachment B – PIPP Termination Rate & Methodology Update Project – In Section 1, the Executive Summary it indicates that the overall estimated impact to liabilities of the case reserve changes relative to the previous method, measured as of March 31, 2026 are $43 million decrease for Personal Care Assistance. It also indicates that the overall estimated impact to liabilities of these valuation changes relative to the previous method, measured as of March 31, 2026 are $39 million decrease for Personal Care Assistance, for a total impact of a $82 million decrease to reserves.

Part VIII – EAR Attachment B – Report on the Valuation of Actuarial and Other Policy Liabilities as of 31 March 2026. In Section 2 the Executive Summary it indicates that the ultimate undiscounted estimates have developed unfavourably for Accident Benefits Other - Indexed by $0.9 million, including changes in assumptions. When comparing to the prior valuation, a significant portion of the unfavourable development is coming from the indexed Accident Benefit lines, most notably Weekly Indemnity. This is attributable to the change to termination rate assumptions.

Exhibit 3 Sheet 9 shows the Change in Ultimate Loss Estimates to be $0.9 million, split by accident year, with substantial increases in more recent accident years.

Figure CF-4 shows the 2027/28 rating year projected ultimate loss cost to be $73.10 based on the 2026 GRA for Accident Benefits Other (indexed) whereas the 2027 GRA has $38.24 for Personal Care Assistance, $2.05 for Travel, and $44.65 for Other, for a total of $84.94, an increase of $11.84, or +16.2%

Question:

Please provide a detailed explanation that reconciles between the above references, with the first indicating a reduction in reserves, and the next two indicating an increase in reserves, and the loss cost for the combined coverages increasing by 16.2%

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

The $43M decrease and $39M decrease relate to two separate but related impacts on Personal Care Assistance (PCA) reserves.

The update to the PIPP termination rates reduced undiscounted case reserves by approximately $43M. The corresponding impact on the undiscounted IBNR was an increase of approximately $44M. As a result, the undiscounted actuarial ultimate losses increased by approximately $0.9M, which is the unfavourable development shown in the valuation report and Exhibit 3.

The $82M decrease discussed in *Part VIII EAR Attachment B* reflects the overall impact on Accident Benefit Other - Indexed reserves after considering all components of the reserve. While undiscounted ultimate reserves increased by $0.9M, changes in undiscounted IBNR, ULAE reserve, inflation, discounting and risk adjustment resulted in a net decrease of approximately $39M from the actuarial valuation assumption changes. When combined with the $43M reduction in case reserves from the updated termination rates, the overall impact was a reduction of approximately $82M in Accident Benefit Other Indexed reserves.

Please find the explanation of the increase in projected ultimate loss cost by root causes in the table below, with a narrative description for each below the table.

Figure 1 – Comparison with 2026 GRA (2027/2028 Rating Year) – Projected Ultimate Loss Cost

	Accident Benefits - PCA	Accident Benefits - Travel	Accident Benefits - Other	Combined
2026 GRA Estimate for 2027/28 Rating Year				**$73.09**
Add PIPP Enhancements to Total				$6.59
Change in claim experience for prior years	$34.02	$2.31	$45.04	$1.69
Including latest year of claim experience	$67.32	$5.21	$87.34	-$2.87
Updating past trend	$37.42	$2.56	$45.41	$6.89
Updating future trend	$42.83	$2.10	$49.27	$8.81
Updating forecasted exposure	$42.83	$2.10	$49.27	$0.00
Changing WFH model	$38.24	$2.05	$44.65	-$9.26
Increase to $1,000 Deductible	$0.00	$0.00	$0.00	$0.00
2027 GRA Estimate for 2027/28 Rating Year	**$38.24**	**$2.05**	**$44.65**	**$84.94**
% Impact				
Add PIPP Enhancements to Total				9.01%
Change in claim experience for prior years				2.31%
Including latest year of claim experience				-3.93%
Updating past trend				9.43%
Updating future trend				12.05%
Updating forecasted exposure				0.00%
Changing WFH model				-12.66%
Increase to $1,000 Deductible				0.00%
Combined Impact				**16.20%**

Add PIPP Enhancements to Total estimates the impact of including PIPP Enhancements in the claim forecast, as done in the 2027 GRA, rather than forecasting separately.

Change in claim experience for prior years estimates the impact on the claims forecast from the changes in historical ultimate total losses for 2024 accident year and prior years between 2026 GRA and 2027 GRA.

Including latest year of claim experience estimates the impact of adding 2025 accident year on the claims forecast. This includes impact of on-levelling historical experience to 2025 accident year (using trends and assumptions in 2026 GRA) and shifting accident year weights to be applied for 2021 – 2025 accident years instead of 2020-2024 accident years.

Updating past trend estimates the impact of changing past loss trends to 2027 GRA assumptions on the claims forecast. This includes any changes to WFH factors used to derive the past trend in 2027 GRA. In this step, the change to WFH methodology has not been considered.

Updating future trend estimates the impact of changing future trends to 2027 GRA assumptions on the claims forecast.

Updating forecasted exposure estimates the impact of using the latest exposure forecast based on the experience as of March 31, 2026, in the claims forecast.

Changing WFH model estimates the impact of using alternative assumptions to estimate the impact of COVID-19 and subsequent impact of working from home. The change in the WFH assumption impacts MPI's view on past frequency trends and future frequency trends.

Increase in $1,000 Deductible estimates the impact of change in the Basic deductible from $750 to $1000 in claims forecast effective April 1, 2026. This has no effect on Accident Benefits PCA, Other, or Travel coverage.

Sub Topic:			

Preamble to IR (If Any):

In the 2026 GRA, Exhibit CF-21 showed the calculation of the ultimate incurred losses no indexation. We are unable to find the equivalent Exhibit in the 2027 GRA.

Part VIII – EAR Attachment B – PIPP Termination Rate & Methodology Update Project. In Section 5.2.3 Factor for Unforeseen Volatility it indicates that a factor is added to the best-estimate reserve calculations to help protect against uncertainty, volatility, and unexpected outcomes. It acts as a safety cushion by making the estimates more conservative. The current factor is set at 10%; that is if the best estimate for a case reserve is $1.0m, after applying the factor it becomes $1.1m. All figures used in valuations and otherwise are on a post-factor basis, as produced by the calculator.

Question:

a) Please provide the equivalent of the Exhibit CF-21 from the 2026 GRA showing the calculation of the ultimate incurred losses no indexation. Please indicate the source of the ultimate incurred losses in column 2.

b) Please calculate alternative Weekly Indemnity ultimate incurred losses excluding the 10% cushion and the equivalent of the Exhibit CF-21.

c) Please calculate the Weekly Indemnity severity trend excluding this 10% cushion. (Part VI – CF Appendix 3a table 4-6)

d) Please calculate the projected loss cost using the valuation claims costs excluding the 10% cushion. (Part VI – CF Appendix 4a tables 1, 3, 4-7)

e) Please calculate the indicated rate change with this alternative loss cost. (Figures RI-2 and RI-14)

Rationale for Question:

To understand the impact of the cushion on the rate indication.

RESPONSE:

a) The equivalent exhibit of Exhibit CF-21 from the 2026 GRA is included below in Figure 1 as of March 2026.

Figure 1 Derivation of Ultimate Losses Accident Benefits - Weekly Indemnity as of March 2026

Line No.	(1) Accident Year	(2) Ultimate Loss	(3) Indexation %	(4) Indexation Factor	(5) Ultimate Loss no Indexation
1	**2012**	$107,674,031	1.60%	1.3294	$80,997,200
2	**2013**	$97,017,513	2.20%	1.3084	$74,148,587
3	**2014**	$93,130,482	1.90%	1.2803	$72,743,717
4	**2015**	$102,626,010	1.20%	1.2564	$81,683,674
5	**2016**	$107,962,537	1.30%	1.2415	$86,962,379
6	**2017**	$107,825,773	1.60%	1.2256	$87,981,296
7	**2018**	$98,728,301	2.50%	1.2063	$81,847,072
8	**2019**	$93,967,016	2.20%	1.1768	$79,847,402
9	**2020**	$90,802,741	0.50%	1.1515	$78,856,084
10	**2021**	$101,228,656	3.30%	1.1458	$88,349,842
11	**2022**	$101,221,553	6.00%	1.1092	$91,258,983
12	**2023**	$104,642,405	3.50%	1.0464	$100,003,732
13	**2024**	$115,251,928	1.10%	1.0110	$113,997,950
14	**2025**	$118,601,856	0.00%	1.0000	$118,601,856

15 (1) April 1 to March 31
16 (2) From March 2026 Valuation
17 (3) CPI Adjustment Factor from PIPP Benefit Table (2026) for each consecutive accident year.
18 (4) = [1.0 + (3)] x (4NextRow)
19 (5) = (2) / (4)

b) For Weekly Indemnity accident year (AY) 2005/06 and onwards, there is no impact to these AYs as the ultimate loss estimates are determined based on a paid methodology. For accident years 2004/05 and prior, the ultimate loss estimates

are based on index-adjusted incurred. Recalculating these accident years with the removal of the 10% cushion, amounts to $15.2M, as illustrated in the table below. Exhibit CF-21 is unchanged.

Figure 2 Accident years recalculation after removal of the 10% cushion

AY	Old WI Ultimate	New WI Ultimate	WI Ult Difference
Prior	146,606,911	146,249,893	(357,018)

Preamble to IR (If Any):

In the 2026 GRA, Exhibit CF-34 showed the calculation of the ultimate incurred losses no indexation. We are unable to find the equivalent Exhibit in the 2027 GRA.

Part VIII – EAR Attachment B – PIPP Termination Rate & Methodology Update Project. In Section 5.2.3 Factor for Unforeseen Volatility, it indicates that a factor is added to the best-estimate reserve calculations to help protect against uncertainty, volatility, and unexpected outcomes. It acts as a safety cushion by making the estimates more conservative. The current factor is set at 10%; that is if the best estimate for a case reserve is $1.0m, after applying the factor it becomes $1.1m. All figures used in valuations and otherwise are on a post-factor basis, as produced by the calculator.

Question:

a) Please provide the equivalent of the Exhibit CF-34 from the 2026 GRA showing the calculation of the ultimate incurred losses no indexation. Please indicate the source of the ultimate incurred losses in column 2.

b) Please calculate alternative Personal Care Assistance ultimate incurred losses excluding the 10% cushion and the equivalent of the Exhibit CF-34.

c) Please calculate the Personal Care Assistance severity trend excluding this 10% cushion. (Part VI – CF Appendix 3b table 4-6)

d) Please calculate the projected loss cost by applying this alternative trend to the valuation claims costs excluding the 10% cushion. (Part VI – CF Appendix 4b tables 1, 3, 4-7)

e) Please calculate the indicated rate change with this alternative loss cost. (Figures RI-2 and RI-14)

Rationale for Question:

To understand the impact of the cushion on the rate indication.

RESPONSE:

a) Exhibit CF-34 showed the derivation of the ultimate incurred losses no indexation for the Accident Benefits – Other (Indexed) coverage before it was split into Personal Care Assistance, Travel and Other (Indexed). As such, MPI has provided an equivalent exhibit for each coverage below.

Figure 1 - Derivation of Ultimate Losses Accident Benefits – Personal Care Assistance as of March 2026

Line No.	(1) Accident Year	(2) Ultimate Loss	(3) Indexation %	(4) Indexation Factor	(5) Ultimate Loss no Indexation

18 (4) = [1.0 + (3)] x (4NextRow)
19 (5) = (2) / (4)

b) For Personal Care Assistance accident year (AY) 2005/06 onwards, there is no impact to these AYs as the ultimates are determined based on a paid methodology. For AYs 2004/05 and prior, the ultimates are based on index-adjusted incurred. Recalculating these AYs with the removal of the 10% cushion, amounts to $11.2M, as is illustrated in the table below. Exhibit CF-34 is unchanged.

Figure 4 – Recalculating accident years with the removal of the 10% cushion

AY	Old PCA Ultimate	New PCA Ultimate	PCA Ult Difference

Preamble to IR (If Any):

Part VI – CF Appendix 2f Table 1 compares the variance to last year's ultimate loss. There are significant increases in the ultimate loss for the most recent three accident years.

Question:

a) Please indicate how much of the increase in the ultimate loss for each accident year is due to:

   i. Actual paid claims emergence being greater than expected

   ii. Change in case reserve being greater than expected

   iii. Change in IBNR approach

   iv. Other.

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

Figure 1 Increase in the ultimate loss for accident years 2022-2024

Accident Year	Current Ultimate Loss	Last Year's Ultimate Loss	Change	Impact from Paid Claims	Impact from Case Reserves
2022	9,065,884.3	7,809,525.0	1,256,359.33	(504,476)	1,760,835
2023	6,547,113.5	5,713,930.9	833,182.65	(7,311)	840,493
2024	7,354,595.9	6,185,775.4	1,168,820.49	(209,664)	1,378,484

For the most recent three accident years, Bodily Injury actual paid claims emerged lower than expected which would indicate a reduction to ultimate losses in each accident year. However, the unfavourable development on case reserves leads to an overall increase to incurred claims. As ultimate losses are determined using incurred methodology, the increase in case reserves results in the significant increase to ultimate loss estimate for the most recent three accident years. No impacts from other changes.

PUB (MPI) 1-66

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	**Appendix 2**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Accident Benefits – Weekly Indemnity**		
Sub Topic:			

Preamble to IR (If Any):

Part VI – CF Appendix 2a Table 1 compares the variance to last year's ultimate loss. Table 2 provides the same on a no indexation basis. In both cases there are quite significant increases in the ultimate loss especially for more recent accident years.

Question:

a) Please indicate how much of the increase in the ultimate loss for each accident year is due to:
   i. Actual paid claims emergence being greater than expected
   ii. Change in case reserve being greater than expected
   iii. Change in IBNR approach
   iv. Other.

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

The increases in Weekly Indemnity ultimate loss between GRA 2026 and GRA 2027 are summarized in the figure below:

Figure 1 Increases in weekly indemnity ultimate loss between GRA 2026 and 2027

(1) Accident Year	(2) Current Year Ultimate Loss	(3) Last Year's Ultimate Loss	(4) Impact from Paid Claims	(5) Impact from Case Reserves	(6) Ultimate Selection	(7) Current Inflation Indexation	(8) PIPP Enhancements	(9) Termination Rate Project	(10) Total Change
2022	100,795,764	89,356,776	2,446,720	4,106,901	(6,054,633)	1,005,729	1,574,110	8,360,161	11,438,988
2023	104,254,173	90,008,983	2,882,469	6,233,598	(10,551,686)	998,798	2,226,479	12,455,533	14,245,190
2024	114,538,036	91,203,384	5,600,500	298,129	(593,569)	1,076,667	1,370,359	15,582,568	23,334,652

(1) April 1 to March 31
(2) As of December, 2025
(3) As of September, 2024 excluding PIPP enhancements
(10) = (2) - (3) = (4) + (5) + (6) + (7) + (8) + (9)

The increase in the ultimate losses between GRA 2026 and GRA 2027 is primarily attributable to two factors:

(i) The inclusion of PIPP enhancements into the main PIPP segments
(ii) The implementation of the new termination rates

The remaining changes are due to experience, selection of ultimate losses and the indexation to current cost level, described below:

- **Impact from Paid Claims & Case Reserves:** Increase in ultimate losses for recent years reflects greater-than-expected paid claims emergence and strengthening of case reserves.
- **Ultimate Selection:** The ultimate losses for the three most recent insurance years were selected based on the higher of the incurred and paid Bornhuetter-Ferguson (B/F) methods, reflecting increased uncertainty associated with immature accident years. Ultimate loss estimates were retained at their March 2025 valuation levels ahead of the implementation of anticipated changes arising from the PIPP Termination & Methodology Update Project.
- **Current Inflation Indexation:** For prior accident years, ultimate loss estimates and loss ratios are trended to reflect an additional year of inflation, aligning the estimates with current year cost levels.

PUB (MPI) 1-67

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	**Appendix 2**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Accident Benefits Other Indexed**		
Sub Topic:			

Preamble to IR (If Any):

Part VI – CF Appendix 2b 2c and 2d provide the current GRA estimates for the three components of Accident Benefits Other – Indexed. The prior GRA forecast these on an aggregate basis.

Question:

a) Please provide an exhibit comparing the total of the three coverages, Personal Care Assistance, Travel, and Other, to the prior Other category.

b) Please indicate how much of the increase in the ultimate loss for each accident year is due to:

   i. Actual paid claims emergence being greater than expected

   ii. Change in case reserve being greater than expected

   iii. Change in IBNR approach

   iv. Other.

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

a) MPI has provided ***Figure 1*** below showing the total of the three components of Accident Benefits Other – Indexed on an aggregate basis compared to prior year's GRA estimates.

Figure 1 Accident Benefits Other – Indexed compared to prior year's GRA estimates

2023	67,881,544	61,812,623	1,770,433	4,816,878	(6,889,290)	640,204	5,730,696	6,068,920
2024	72,657,353	66,245,187	56,047	(82,034)	689,594	720,976	5,027,583	6,412,165

(1) April 1 to March 31
(2) As of December, 2025
(3) As of September, 2024
(9) = (2) - (3) = (4) + (5) + (6) + (7) + (8)

The increase in the ultimate losses between GRA 2026 and GRA 2027 is primarily attributable to the implementation of the new PIPP termination rates.

The remaining changes are due to experience, selection of ultimate losses and the indexation to current cost level, described below:

- **Impact from Paid Claims & Case Reserves:** Variability in paid claims emergence and revisions to case reserve estimates are key drivers of changes in ultimate loss projections.
- **Ultimate Selection:** The ultimate losses for the three most recent insurance years were selected based on the higher of the incurred and paid Bornhuetter-Ferguson (B/F) methods, reflecting increased uncertainty associated with immature accident years. Ultimate loss estimates were retained at their March 2025 valuation levels ahead of the implementation of anticipated changes arising from the PIPP Termination & Methodology Update Project.
- **Current Inflation Indexation:** For prior accident years, ultimate loss estimates and loss ratios are trended to reflect an additional year of inflation, aligning the estimates with current year cost levels.

PUB (MPI) 1-68

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	**Appendix 2**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Comprehensive Theft**		
Sub Topic:			

Preamble to IR (If Any):

Part VI – CF Appendix 2h through 2i provide the current GRA estimates for the two components of Comprehensive Theft. The prior GRA forecast these on an aggregate basis.

Question:

a) Please provide an exhibit comparing the total of the two coverages, Attempted & Partial Theft, and Entire Theft, to the prior Theft category.

b) Please indicate how much of the change in the ultimate loss for each accident year is due to:

   i. Actual paid claims emergence being different than expected
   ii. Change in case reserve being different than expected
   iii. Change in IBNR approach
   iv. Other.

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

a) Please refer to *Appendix 1: Comparison of Theft Ultimate Loss*.

b) The change in ultimate loss due to reported loss being different than expected represents less than 3% variation in any accident year. Since ultimate loss is determined using incurred methodology and MPI does not maintain separate

development assumptions for paid loss and case reserves with respect to Theft coverages, a detailed allocation between paid loss and case reserve impacts has not been provided.

The remainder of the change in ultimate loss is attributable to the change in IBNR approach. Due to the partition of the former Comprehensive Theft category into two coverages, Attempted & Partial Theft and Entire Theft, ultimate loss for the two categories is now determined separately by incurred methodology, each with its own development factors.

Figure 1 Change in Ultimate Loss for Accident Years 2012-2024

PUB (MPI) 1-69

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	**Part VI – CF Appendix 7**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Comparison of Loss Cost Projections**		
Sub Topic:			

Preamble to IR (If Any):

Part VI – CF Appendix 7 compares loss cost projections for the 2022 GRA through the 2027 GRA, by coverage. Over time, different levels of aggregation have been used.

Question:

a) Please provide a comparison of Accident Benefits Other – Indexed, aggregating Personal Care Assistance (7b), Travel (7c), and Other (7d). For the 2027 GRA, the Future trends do not need to be shown.

b) Please provide a comparison of total Comprehensive, aggregating all sub-coverages including Catastrophe loading. Future trends do not need to be shown.

Rationale for Question:

To compare forecasted loss costs by coverage where the level of aggregation has changed over time.

RESPONSE:

a) MPI provides a comparison of Accident Benefits Other – Indexed loss cost projections to the aggregate of Accident Benefits – Personal Care Assistance, Travel, and Other, loss cost projections within *Table 1 of Appendix 1 - Aggregate Prior GRA Projections*. Future trends listed are from the previous ABO – Indexed coverage used in prior GRA submissions. No future trends are shown for the 2027 GRA forecast. Beginning in the 2027 GRA, PIPP enhancements are trended within

each ABO Personal Care Assistance, Travel, and Other, coverages. Previously, they were trended separately. The incurred losses and loss cost for PIPP enhancements have been added back to prior forecasts to ensure the comparison remains as accurate as possible. MPI did not add the future frequency, severity, or loss cost trends for ABO-I and PIPP enhancements together in the comparison. Note that PIPP was derived on a de-indexed basis from the 2024 GRA forecast onwards, which has impacted severity trends.

b) MPI provides a comparison of Comprehensive loss cost projections with all sub-coverages aggregated and catastrophe loading included within *Table 2 of Appendix 1 - Aggregate GRA Prior GRA Projections.*

Note:

PIPP was derived on de-indexed basis from 2024 GRA Forecast onwards, which has impacted the severity trends

Future trends are listed for the previously combined ABO-Indexed coverage. Not applicable for 2027 GRA - Forecast.

PIPP Enhancements were trended seperately in years prior to the 2027 GRA. The trends shown are for the individual ABO-Indexed coverage and do not include the enhancements.

PUB (MPI) 1-70

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Collision Severity Trend**		
Sub Topic:			

Preamble to IR (If Any):

Figure CF-28, the pre-COVID and the 2024 and 2025 selected severity growth for Collision is 3.98%.

Figure CF-32, the Collision Severity Future Trend is based on a weighted average of the estimated gross repair severity growth and the estimated total loss severity growth, at 5.9% in 2026, 5.8% in 2027, and 5.7% thereafter.

Figure CF-7 shows MPI vs Industry Total Loss Valuations, which shows roughly 0% trend from 2023 onwards. MPI believes pre-COVID long-term average trend is the best estimate of future trend, which is 3.00% for total loss severity.

Question:

a) Please determine an alternative loss cost for Collision using the selected historical severity trend of 3.98% for future severity trend for the future impact of changes to deductible on Collision (CF-13) and Collision Projected Ultimate Loss Cost (CF-15).

b) Please determine an alternative rate indication (RI-14) using the alternative loss cost for Collision.

Rationale for Question:

To determine the sensitivity of the rate indication to a selected future severity trend equal to the selected historical trend.

RESPONSE:

a) MPI has determined an alternative Collision loss cost using a future severity trend of 3.98% for the future impact of changes to deductible on Collision in Figure CF-13 and the Collision Projected Ultimate Loss Cost in Figure CF-15. The alternative calculation applies the 3.98% severity trend to the applicable future years for Collision. The resulting alternative Collision projected ultimate loss cost is summarized in the table below.

Figure 1 Collision Ultimate Loss

Line No.	(1) Accident Year	(2) Ultimate Loss Cost	(3) Exposure	(4) Ultimate Loss
1	**2026**	$656.92	1,003,887	$659,473,044

PUB (MPI) 1-71

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	**Appendix 3d Table 5**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Accident Benefits – Other (Indexed)**		
Sub Topic:			

Preamble to IR (If Any):

The selected severity trend is based on 2021 to 2025 accident years.

Question:

a) Please provide an alternative loss cost (CF-23) for Accident Benefits – Other (indexed) based on the indicated severity trend using accident years 2012 to 2025 for both past and future trends. Please provide an alternative rate indication (RI-14) using the alternative loss cost.

b) Please provide an alternative loss cost (CF-23) for Accident Benefits – Other (indexed) based on the indicated severity trend using accident years 2012 to 2025 for just the future trend. Please provide an alternative rate indication (RI-14) using the alternative loss cost.

Rationale for Question:

To understand the sensitivity of the rate indication to the selection of a longer term trend for this coverage.

RESPONSE:

a) The new trends using accident years 2012 to 2025 are outlined in the figure below.

Figure 1 Accident Benefits – Other (Indexed) Past and Future Trend Selection Comparison

Line No.	Accident Year		2027 GRA Selections Frequency	Severity	Loss Cost	Alternate Selections Frequency	Severity	Loss Cost
1	Past Trends	2012-2024	-2.79%	6.60%	3.63%	-2.79%	3.12%	0.24%
2		2025						
3	Future Trends	2026						
4		2027						
5		2028	-2.79%	6.60%	3.63%	-2.79%	3.12%	0.24%
6		2029						
7		2030						

The updated severity model includes time as the only parameter, as the other parameters remained statistically insignificant. As a result, the model has a weaker fit and a lower Adjusted R^2. Consistent with the approach used in the 2027 GRA, the revised loss cost trend was determined using the frequency and severity trends. The alternative loss cost based on these trends is shown in the figure below.

Figure 2 Accident Benefits – Other (Indexed) Ultimate Losses (0.24% past and future loss cost trend)

Line No.	(1) Accident Year	(2) Ultimate Loss Cost	(3) Exposure	(4) Ultimate Loss
1	**2026**	$38.42	1,003,887	$38,568,822
2	**2027**	$38.51	1,019,066	$39,246,235
3	**2028**	$38.60	1,034,487	$39,936,017

PUB (MPI) 1-72

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	**Appendix 3d Table 5**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Accident Benefits – Other (non-Indexed)**		
Sub Topic:			

Preamble to IR (If Any):

The selected loss cost trend is based on 2019 to 2025 accident years.

Question:

a) Please provide an alternative loss cost (CF-25) for Accident Benefits – Other (indexed) based on a 0% loss cost trend based on accident years 2012 to 2025 for both past and future trends. Please provide an alternative rate indication (RI-14) using the alternative loss cost.

b) Please provide an alternative loss cost (CF-25) for Accident Benefits – Other (indexed) based on a 0% loss cost trend based on accident years 2012 to 2025 for just the future trend. Please provide an alternative rate indication (RI-14) using the alternative loss cost.

Rationale for Question:

To understand the sensitivity of the rate indication to the selection of a longer term trend for this coverage.

RESPONSE:

a) The new trends based on a 0% loss cost trend spanning accident years 2012-2025 are outlined in the figure below.

Figure 1 Accident Benefits - Other (Non-Indexed) Past and Future Trend Selection Comparison

Line No.	Accident Year		2027 GRA Selections Frequency	Severity	Loss Cost	Alternate Selections Frequency	Severity	Loss Cost
1	Past Trends	2012-2024	0.00%	0.00%	3.91%	0.00%	0.00%	0.00%
2		2025						
3	Future Trends	2026

5		2028	0.00%	0.00%	3.91%	0.00%	0.00%	0.00%
6		2029						
7		2030						

In the alternative loss cost model, no parameters were found to be statistically significant. Because of this, only a flat parameter was included in the model. As a result, the model has a weaker fit and a lower Adjusted R^2. The alternative lost cost projected by these trends is shown in the figure below.

PUB (MPI) 1-73

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Comprehensive Attempted & Partial Theft**		
Sub Topic:			

Preamble to IR (If Any):

In this GRA, MPI selects future frequency and severity trends to be the same as past trends, as there is no credible evidence to suggest future experience is likely to deviate significantly from the past. For frequency, time and theft parameters were found to be statistically significant and were included in the final model. The theft parameter was included to isolate the period of elevated theft of catalytic convertors during the 2019-2023 accident years, allowing the underlying frequency trend to be estimated more reliably.

The frequency trend is selected based on accident years 2014 to 2025 with a theft parameter of 1, 2, 6, 4, 1 for years 2019 to 2023.

The severity trend is selected based on accident years 2019 to 2025, with a selected annual trend of +11.88%.

Question:

a) Please provide an alternative loss cost (CF-40) based on the indicated severity using the entire 14 accident years for both past and future trend. Please provide an alternative rate indication (RI-14) with this alternative loss cost.

b) Please provide an alternative loss cost (CF-40) based on the indicated severity using the entire 14 accident years for just future trend. Please provide an alternative rate indication (RI-14) with this alternative loss cost.

Rationale for Question:

To understand the sensitivity of the rate indication to the use of a longer trend period.

RESPONSE:

a) The alternative loss trends using the entire 14 accident years are compared to the 2027 GRA selected trends for Comprehensive Attempted & Partial Theft below:

Figure 1 Comprehensive Attempted & Partial Theft Trend Selection Comparison – Part a)

Line No.	Accident Year		2027 GRA Selections Frequency	2027 GRA Selections Severity	2027 GRA Selections Loss Cost	Alternative Part a) Selections Frequency	Alternative Part a) Selections Severity	Alternative Part a) Selections Loss Cost
1	Past Trends	2012-2024	-3.14%	11.88%	8.36%	-3.14%	3.74%	0.48%
2		2025						
3	Future Trends	2026	-3.14%	11.88%	8.36%	-3.14%	3.74%	0.48%
4		2027						
5		2028						
6		2029						
7		2030						

In the alternative severity model, time is still significant and remains the only parameter. The alternative loss cost trend was determined in the same manner as in the 2027 GRA, using the existing frequency trend and the alternative severity trend. The alternative severity model using all 14 accident years has an adjusted R^2 of 0.56, compared to the adjusted R^2 of 0.94 for the severity model selected in the 2027 GRA.

The alternative projected loss cost based on the alternative trend selection is presented below in the same manner as CF-40:

Figure 2 Comprehensive Attempted & Partial Theft – Ultimate Losses – Part a)

Line No.	(1) Accident Year	(2) Ultimate Loss Cost	(3) Exposure	(4) Ultimate Loss
1	**2026**	$2.01	1,003,887	$2,020,503
2	**2027**	$1.93	1,019,066	$1,969,453
3	**2028**	$1.95	1,034,487	$2,015,612
4	**2029**	$1.96	1,050,154	$2,062,619

Preamble to IR (If Any):

The frequency trend is selected based on accident years 2012 to 2025.

The severity trend is selected based on accident years 2012 to 2025.

The loss cost highest level occurred in accident year 2023.

Question:

a) Please provide an alternative loss cost (CF-42) based on a 0% historical past trend, and the previously selected future trend. Please provide an alternative rate indication (RI-14) with this alternative loss cost.

Rationale for Question:

To understand the sensitivity of the rate indication to the use of a different historical trend.

RESPONSE:

a) See the figure below for a comparison of the alternative loss trends and the 2027 GRA selected loss trends:

Figure 1 Comprehensive Entire Theft Trend Selection Comparison

Line No.	Accident Year		2027 GRA Selections Frequency	Severity	Loss Cost	Loss Cost	Alternative Part (a) Selections Frequency	Severity	Loss Cost

PUB (MPI) 1-75

Part and Chapter:	**Part VI – Claims Forecasting**	**Page No.:**	
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Comprehensive Hail (non-Catastrophe)**		
Sub Topic:			

Preamble to IR (If Any):

For severity, the model parameter was found to be statistically significant and included in the final model. The model parameter was included to isolate the effects of hyperinflation during the accident years 2021-2023 and reliably estimate the underlying severity trend.

Question:

a) Please provide any insights on the causes of the 22.56% hyperinflation from 2021 to 2023.

Rationale for Question:

To understand the causes of the hyper-inflation for the Comprehensive Hail.

RESPONSE:

a) For Comprehensive Hail, the future severity trend was selected to be the same as the past severity trend, except for accident years 2021 to 2023, which were identified as a period of higher-than-normal inflation. For severity, the model parameter was found to be statistically significant and was included in the final model to isolate the effects of hyperinflation during accident years 2021 to 2023 and to estimate the underlying severity trend.

As indicated in *CF.2.1*, supply chain issues, pent-up consumer demand, and labour shortages following the COVID-19 pandemic resulted in rapid increases in Manitoba CPI between the 2021 and 2023 accident years, and Manitoba experienced rapid increases in automobile parts prices and other vehicle repair costs beginning in June 2021. In addition, passenger vehicle parts, maintenance, and repair inflation in Manitoba peaked at 9.30% in July 2022, placed significant cost pressure on vehicle repair severity, and gradually subsided thereafter, returning to pre-pandemic levels around July 2024.

PUB (MPI) 1-76

Part and Chapter:	Part VII – RC Appendix 6	**Page No.:**	1 of 15
PUB Approved Issue No:	**PUB (MPI) 1-1** 11. Driver Safety Rating		
Topic:	DSR Relativities		
Sub Topic:			

Preamble to IR (If Any):

At present, DSR relativities have not been incorporated into the Generalized Linear Model (GLM), as their inclusion could result in significant dislocations for indicated discounts driven by model-based changes. Notwithstanding, MPI is actively evaluating enhancements to its modelling framework, including the potential integration of DSR relativities within the GLM. Further analysis and validation will be required to ensure that any such transition is implemented in a controlled and appropriate manner.

Question:

a) Has MPI performed any analysis to determine the potential impact of incorporating DSR relativities into the GLM?

b) If yes, please provide. If no, please indicate how MPI determined that the inclusion could result in significant dislocations.

Rationale for Question:

To understand the potential impact of incorporating DSR relativities into the GLM.

RESPONSE:

a) and b) Yes, MPI has performed exploratory analysis to assess the potential impact of incorporating Driver Safety Rating (DSR) relativities within a GLM framework. The results of this analysis are presented in *Appendix 1-1*, with supporting charts provided in *Appendix 1-2* for visual reference.

As shown in the appendix, the raw DSR relativities produced by the Minimum Bias Procedure (MBP) and GLM approaches are closely aligned, which is expected given that both analyses are based on the same underlying experience data. For comparability, all relativities were rebased to DSR 0.

The appendix compares several alternative approaches for fitting DSR relativities:

- MBP Two-Linear Fit – the contiguous two-linear fit with a slope change at DSR +4, as filed in the 2027 GRA;
- MBP Poly(3) Fit – a third-order polynomial fit applied to the MBP raw relativities; and,
- GLM Fit – an orthogonal polynomial component (degree 3) fit to the GLM raw relativities using Emblem.

The resulting indicated DSR discounts are also presented in the appendix. While the raw relativities are generally similar, the fitted relativities and resulting indicated discounts can differ materially depending on the fitting methodology. These differences would translate directly into changes in indicated DSR discounts and could result in material customer dislocation if implemented.

Consistent with MPI's broader transition strategy, additional analysis and validation would be required before adopting any alternative approach to ensure that any transition is implemented in a controlled and appropriate manner.

Topic:	ALM Study		
Sub Topic:			

Preamble to IR (If Any):

Issue 14 of the 2027 GRA is:

Update on Asset Liability Management Study, including any information currently available regarding;

a) Risk Appetite & Portfolio Changes

b) ALM Project Progress

c) Improving the matching of the impact of changes in interest rates on claims liabilities and on invested assets

Question:

a) Please provide updates on any aspect of the above that was not included in the 2027 GRA filing.

Rationale for Question:

To understand the current state of the ALM study.

RESPONSE:

a) The ALM Chapter will be filed in August and will include an update on the ALM Study.

Preamble to IR (If Any):

Since August 31st, 2019, corporate bond management has been outsourced to Addenda Capital.

The ALM chapter as filed states only that MPI will file it in August 2026. Appendix 9, the Performance Attribution Report, will follow in July 2026.

The Basic Claims fixed income duration increased from 8.11 years to 9.21 years, provincial bond duration increased from 9.12 to 11.93 years, and corporate bond turnover increased from 47% to 71%.

As part of the Asset Liabilities Management Strategy, asset dollar duration is to match liability dollar duration, which is the product of market value / present value and duration (the dollar duration is matched to the basic claims dollar duration to minimize the interest rate risk to MPI).

Question:

a) Please quantify the effect of the duration extension on forecast investment income and on the interest rate sensitivity of the Basic Claims portfolio.

b) Please provide the interest rate hedge ratio and tracking error results for 2024/25, 2025/26 and 2026/27 year to date, against the targets in the operational ALM policy.

c) Please provide a table indicating the net income impact of interest rate movement and related changes in claims liabilities, investments, and tracking differences for the 2024/25 and 2025/26 years and the forecast for the 2026/27 year to date.

Rationale for Question:

To understand the effectiveness of the duration matching strategy to mitigate for interest rate changes.

RESPONSE:

a) *Figure 1* below quantifies the impact of the duration extension of the fixed income portfolio on the Basic Line of Business investment income forecast. Without the duration extension, projected investment income would be approximately $7.1 million lower on average over the five-year forecast period.

Figure 1 – Basic Line of Business Investment Income Impact: Duration Extension

Basic LOB Investment Income ($000s)	**2026/27**	**2027/28**	**2028/29**	**2029/30**	**2030/31**
Base	135,424	145,385	157,767	170,470	184,630
Prior to Duration Extension	130,531	139,527	150,640	162,248	175473
Impact	**-4,893**	**-5,858**	**-7,127**	**-8,222**	**-9,157**

Prior to the implementation of the PIPP Termination Rate & Methodology Update Project, the Basic Claims Portfolio was closely matched to its liabilities under both interest rate shock scenarios, resulting in relatively small net differences.

Figure 2: Interest Rate Sensitivity – Prior to Update

Scenario Analysis	Portfolio ($)	Liabilities ($)	Difference
Parallel +50 bps	(73,724,340)	(73,520,948)	(203,392)
Parallel -50 bps	79,457,896	79,482,465	(24,569)

Following implementation of the updated methodology, the overall interest rate sensitivity of both assets and liabilities increased.

Figure 3: Interest Rate Sensitivity – Post Update

Scenario Analysis	Portfolio ($)	Liabilities ($)	Difference
Parallel +50 bps	(85,792,622)	(85,116,149)	(676,473)
Parallel -50 bps	93,311,725	93,330,258	(18,533)

Despite this increase, the asset-liability matching remains strong relative to the magnitude of the underlying interest rate movements and therefore minimal impact to the net differences is seen.

b) *Figure 4* shows that both the interest rate hedge ratio and tracking error have remained within their target ranges from 2024/25 through 2026/27 year-to-date.

Figure 4: Interest Rate Hedge Ratio & Tracking Error for 2024/25 to 2026/27 YTD

Metric	2024/25	2025/26	2026/27 YTD
Interest Rate Hedge Ratio	98.7%	97.6%	97.6%
Interest Rate Hedge Ratio Target	100% ±5%		
Tracking Error	$19.5M	$2.5M	$0.6M
Tracking Error Target*	± $21.7M	± $21.7M	± $22.2M

*± 1% of the market value of the Basic Claims portfolio.

c) The tracking errors shown in *Figure 4* measure the impact of interest rate movements on the difference between changes in the Basic Claims Asset portfolio and the Basic Claims liabilities. This metric assesses the effectiveness of the Dollar Duration hedging strategy. An effective hedge should minimize the tracking error, with the objective of keeping it as close to zero as possible.

PUB (MPI) 1-79

Part and Chapter:	Part IX - Investments Section C.1 FFI Financial Forecasting Investments FFI Figure-23	**Page No.:**	3
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)		
Topic:	Investment Governance		
Sub Topic:	WTW Advisory Model		

Preamble to IR (If Any):

Section C.1 states that effective October 1, 2025, WTW became MPI's investment advisor in a non-discretionary capacity. The mandate includes analytical support, advice, reporting and structured support for the investment materials in this Application.

Figure FFI-23 forecasts investment management fees in four categories (Department of Finance, fixed income manager, equity managers, alternative assets) with no advisory fee line.

Question:

a) Please describe the contract term and the annual fees under the arrangement.
b) Please identify where the costs of the WTW advisory mandate are recorded and the amounts by year.
c) Please list the deliverables WTW has provided or will provide in support of this Application, including the ALM chapter to be filed in August 2026.
d) Please describe the management and reporting framework related to WTW's mandate.
e) WTW advises on investment strategy and also prepares analysis supporting that strategy for this proceeding. Please describe the safeguards that ensure the objectivity of the analysis.

Rationale for Question:

To understand the cost, scope and governance of the new advisory arrangement.

RESPONSE:

a) The contract term is five years, starting on October 1, 2025. The total cost by year is outlined in Figure 1 below:

Figure 1: WTW Fees by Year

Line No.	Description	Year 1	Year 2	Year 3	Year 4	Year 5
1	*(C$000s, except where noted)*					
2	**Total Fees paid to WTW**	$ 452,200	$ 463,600	$ 475,000	$ 487,350	$ 499,700

b) The WTW advisory mandate will be paid from the Special Services account in the ALM and Investment Management account.

c) WTW has supported MPI's 2027 GRA through the provision of capital market assumptions, support for investment-related filing materials, support for information request responses and ongoing ALM and risk appetite analysis. WTW will also support MPI during the annual PUB hearing. MPI remains responsible for all final filed materials and regulatory submissions.

d) MPI's internal investment team is responsible for day-to-day oversight of WTW's mandate, including coordinating work priorities and timelines, reviewing materials prepared by WTW, and monitoring performance against the requirements of the services agreement. MPI's Chief Actuary, Investment Manager and ALM Lead meet regularly with WTW to discuss ongoing projects, regulatory requirements, emerging priorities and upcoming committee materials. WTW provides analysis, reporting and investment advice in support of these discussions. WTW's performance is monitored through the service-level standards established under the agreement, including periodic review of deliverables and reporting provided to MPI. Any performance concerns are addressed through MPI's governance processes as appropriate. WTW's role is advisory and non-discretionary. WTW does not have authority to implement investment decisions, rebalance portfolios, hire or terminate investment managers, or execute transactions on MPI's behalf. MPI retains responsibility for all investment

decisions, implementation activities and governance approvals through its established management, Investment Committee Working Group, Investment Committee and Board governance framework.

e) WTW's analysis is subject to multiple safeguards within MPI's governance framework. MPI's internal investment team reviews analyses prepared by WTW, including data, assumptions and methodologies. WTW's analyses and recommendations are then submitted to, and discussed with, the Investment Committee Working Group and the Investment Committee, as applicable. The Investment Committee retains approval authority for investment implementation decisions. As indicated, WTW's role is non-discretionary: WTW has no authority to execute transactions, rebalance portfolios, direct investments, or appoint or terminate investment managers without approval through MPI's applicable governance process. WTW's analysis is reviewed through multiple levels of MPI governance before any investment-related action is approved or implemented.

PUB (MPI) 1-80

Part and Chapter:	**Part IX - Investments** **INV Appendix 1** **INV Appendix 6** **Part XII INV Appendix 9 (2026 GRA)**	**Page No.:**	**35**
PUB Approved Issue No:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)**		
Topic:	**Investment Governance**		
Sub Topic:	**Investment Management Performance**		

Preamble to IR (If Any):

A written report for all managers will be presented to the ICWG on an annual basis at a minimum, which will analyze the returns and risk of the managers and discuss any major organizational changes within the firm. For additional oversight, a Portfolio Summary Report will be prepared on a quarterly basis and will be sent to the ICWG to provide Active Manager's Investment Return Updates.

A reporting dashboard is set out in the Investment Policy Statement. All investment managers will be classified as follows:

1 green: no concerns

2 yellow: emerging concerns

3 red: concerns on the watch list

Question:

a) Please provide the most recent ICWG dashboard manager report.

b) Please provide the list of the funds that form part of the Benchmarks in a similar format to that provided in the 2026 GRA.

c) To the extent there were any internal analysis or interpretation of the report results used to present this information to the ICWG, please file it.

d) Please file an update to the Investment Performance Report for June 30th.

e) Please file an update Part XII INV Appendix 9 from the 2026 GRA.

Rationale for Question:

To understand Investment Manager Performance

RESPONSE:

a) Please refer to *Appendix 1 - IC Reports Manager Dashboard* for the most recent dashboard manager report as of March 31, 2026. The dashboard manager report is only provided to the Investment Committee at each quarterly meeting and is not part of the regular submission to the ICWG. Going forward, this analysis will be provided by WTW as part of their quarterly results presentation.

The ICWG receives a Portfolio Summary Report each quarter. Please refer to *Appendix 2* for the latest available report as of March 31, 2026.

b) Please refer to *Appendix 3 – Peer Group Lists*.

c) The Dashboard report is not presented to the ICWG, only to IC. There is no additional analysis provided along with the dashboard.

d) June 30th Investment Performance Report will be provided when available.

e) An update of Appendix 9 from the 2026 GRA can be found in *Appendix 4*.

- Performance objective II: Ranking in the top three quartiles of relevant peer group over the most recent 2 yr period

- Performance objective III: Outperform benchmark net of fees over the most recent 4 yr period or since inception (minimum 2 yr)

- Performance objective IV: Above median returns vs. relevant peer group over the most recent 4 yr period or since inception (minimum 2 yr)

(*) Managers with a minimum of 2 yr performance track record.

MANITOBA PUBLIC INSURANCE

Portfolio Summary

March 31, 2026

Overview for Q4 2025/26

- **Performance Aggregate Investment Portfolio**

  - During the quarter, all individual portfolios outperformed their benchmarks, ranging from 13 bps for the Basic portfolio to 188 bps for the EFB portfolio. The MPI fund returned 1.30% during the quarter, outperforming the benchmark by 0.66%.

  - The Basic Claims portfolio outperformed its benchmark by 0.13%, with MUSH bonds, real return bonds, real estate, and commercial mortgages contributing positively, whereas provincial bonds and corporate bonds were negative contributors to performance.

  - The EXT portfolio outperformed its benchmark by 1.21%, with all asset classes contributing positively, except Canadian small cap, which detracted 0.37% from 1.21%.

  - The SRE portfolio outperformed its benchmark by 0.59%, with all asset classes contributing positively.

  - The RSR portfolio outperformed its benchmark by 1.21%, with all asset classes contributing positively, except Canadian small cap, which detracted 0.40% from 1.21%.

  - The EFB portfolio outperformed its benchmark by 1.88%, with all asset classes contributing positively, except Canadian small cap, which detracted 0.42% from 1.21%.

Table 1 below shows the performance of each investment portfolio relative to the IPS-defined benchmarks.

(*) Assets managed by DOF & Addenda
(**) IPS Benchmark

During Q4 2025, the Basic portfolio earned 0.42% and outperformed its benchmark by 13 bps.

The latest ALM Study conducted by Mercer recommended allocating 5.0% to commercial mortgages and 10.0% to real estate within the Basic Claims portfolio. For commercial mortgages, TD Asset Management was selected to manage that mandate and is fully invested. Two real estate managers (Crestpoint and Harrison Street) were added in June

2024, and the full deployment of the commitments into real estate asset classes will take some time. For that reason, a temporary investment has been made in a real estate ETF (S&P/TSX Capped REIT, ticker: XRE). The real estate ETF's monthly dividends are reinvested. As of March 31, 2026, CrestPoint's undrawn capital was $73.5M out of $135M commitment, whereas Harrison Street's capital commitment of $50M is fully funded.

Provincial bonds were a negative contributor relative to outperformance (detracted 0.07% from +0.13%), as they underperformed the benchmark by 17 bps and were underweight (by 0.8%). Provincial bonds underperformed after the portfolio was rebalanced in March, increasing their duration by 2 years (11.93 years vs. 6.38 years). YTM of provincial bonds spiked to 4.32% in March from 3.68% in February.

Real return bonds were a positive contributor relative to outperformance (contributed +0.003% out of +0.13%), as they outperformed the benchmark by 17 bps despite being underweighted (by 0.2%).

Municipal bonds were a positive contributor relative to outperformance (contributed +0.04% out of +0.13%), as they outperformed the benchmark by 23 bps despite being underweighted (by 1.5%).

Corporate bonds were a negative contributor relative to outperformance (detracted 0.04% from +0.13%), as they underperformed the benchmark by 13 bps and were underweight (by 0.1%).

Commercial Mortgages were a positive contributor relative to outperformance (contributed +0.03% out of +0.13%), outperforming the benchmark by 44 bps, and were overweight (by 0.3%).

Real estate was a positive contributor relative to outperformance (contributed +0.15% out of +0.13%) as it outperformed the benchmark (by 1.61%) despite being underweighted (0.1%).

As per the Operational Asset Liability Management Policy, effective October 16, 2024, the Corporation employs a hedge ratio to manage interest rate risk associated with the Basic Claims liabilities.

MANITOBA PUBLIC INSURANCE

Portfolio Summary

March 31, 2026

Basic Claims Portfolio Dollar Matching	Fixed Income including Accrued Income (in million $)	Claim Liabilities (in million $) (*)	Fixed Income Assets - Claim Liabilities (in million $)
February-26	2,217	2,160	57

Dollar matching: On February 29, 2026, the market value (post -PIPP update) of the Basic Claims portfolio, including real estate and cash, was $2,217M, and the present value of the Basic Claims liabilities was $2,160M. Therefore, the assets exceeded the liabilities by $57M. The latest cash flows as of February 28, 2026, reduced liabilities by $108.5M, resulting in a $57M surplus. The majority of this decrease was driven by a $97M reduction in reserves following the PIPP Case Reserving & Valuation Update. The additional decrease was due to favorable Collision and Comprehensive experience in February.

Note: Delay in Receiving Liability Cash Flows

Liability cash flows are typically delayed by approximately three months after the fiscal year-end due to year-end reporting, with cash flows for subsequent month-ends available approximately 2–3 weeks after the month-end. Because of this, the investment manager will use the most recent available valuation cash flows.

Month-end reporting will be based on the dollar duration of assets as of the reporting date and the dollar duration of liabilities, using the valuation cash flows available to the investment manager at the beginning of the month.

Hedge Ratio: Until March 31, 2024, the first moment of the Basic Claims asset portfolio was to be within +/- 0.25 of the first moment of the Basic Claims liabilities. Starting in May 2024, it was agreed with Addenda that the completion portfolio would aim for a 100% hedge ratio. Thus, the strategy is no longer managed against deviations in moments, and the ALM goal is now on a hedge-ratio basis (i.e., 100% ± 5%) rather than on a duration basis (i.e., duration of liabilities ± 0.25 years). As of Feb 28, the hedge ratio was **98.34%,** within the policy limit of +/-5 %.

(*) Guardian's fund was liquidated and invested in URTH ETF on April 7, 2025.

MANITOBA PUBLIC INSURANCE

Portfolio Summary

March 31, 2026

During Q4 2025, the EFB portfolio earned 3.29% and outperformed its benchmark by 188 bps.

Private debt was a positive contributor to relative outperformance (contributing +0.18% out of +1.88%) as it outperformed its benchmark (by 116 bps) despite being underweight (by 1.4%). The Fund benefited from its excess running yield over the benchmark, which added 18 bps of active return in the most recent quarter. The Fund's private debt moved in line with public credit spreads, specifically provincial spreads, which the Fund is always structurally underweight in favor of private debt holdings. Long public corporate and provincial spreads also moved 5-8 bps wider on the quarter. The Fund gained 52 bps from a specific private asset (Valencia Town Center Ground Lease-Backed Pass-Through Trust) as that asset was revalued upward to its current liquidation value. In addition, the prepayment of a private deal (Mobilinx) added 45 bps in performance.

Canadian Large Cap was a positive contributor to relative outperformance (contributed +0.64% out of +1.88%), as it outperformed the benchmark (by 707 bps) and was overweighted (by 2.1%).

Canadian Small Cap was a negative contributor to relative outperformance (detracted 0.42% out of +1.88%), as it underperformed the benchmark (by 669 bps) and was overweighted (by 2.0%).

Global equity (low vol) was a positive contributor to relative outperformance (contributed +0.41% out of +1.88%), as it was overweighted (by 1.3%) and outperformed its benchmark (by 380 bps).

Global equity (iShares MSCI World Index) was another positive contributor to relative outperformance (contributed +0.04% out of +1.88%), as it was overweighted (by 0.8%) and outperformed its benchmark (by 45 bps).

Real estate contributed positively to relative outperformance (contributed +0.13% out of +1.88%), as it outperformed (by 139 bps) despite being underweighted (by 0.7%).

Infrastructure contributed positively to relative outperformance (contributed +0.83% out of +1.88%) as it outperformed (by 380 bps) despite being underweighted (by 0.8%).

Appendix 4:
Explanation of Roles and Responsibilities

This appendix provides an explanation of the roles and responsibilities of both internal and external parties involved in the management of MPI's investment portfolio, including the qualifications of the individuals performing these roles

The Investment Committee Terms of Reference (TOR), sets out the roles and responsibilities of the Investment Committee (IC or the "Committee"), the Province of Manitoba's Treasury Division (the "Department"), and the Investment Committee Working Group (ICWG).

The Manitoba Public Insurance (MPI) Board of Directors

The BoD is involved in the oversight of MPI's investment strategy, as per the TOR, as it approves recommendations from the IC. The current composition of the BoD is provided below:

MPI's Board of Directors Member Name (First Name, Last Name)	Other Roles	Years of Direct Management/ Monitoring Experience	Years of Indirect Management/ Monitoring Experience	Professional Designations
Gina McKay		0	More than 15 years	-
Candy Wong	IC	26	n/a	CFA
Robert Plohman		0	2	CPA, CA
Carmen Nedohin	IC	5	8	-
Christian Dandeneau		0	15	-
Susan Swan		0	0	-
Marilyn McLaren	IC	0	10	ICD
Fran Frederickson		0	0	-
Luke Johnston		12	0	FCIA, FCAS
JD Devgan	IC	0	0	-
Satvir Jatana (Ex- Officio)	IC	0	0	-

The Investment Committee

As per the TOR, the mandate of the Committee is to assist the Board in discharging its responsibility to:

1. oversee and monitor the investments of the Corporation; and
2. confirm that effective management processes are in place and functioning to ensure compliance with the investment policies and strategies of the Board

The general responsibilities of the Committee are to assist the Board by:

1. recommending investment policies to the Board for approval;
2. reviewing matters relating to investment activities of the Fund;
3. providing oversight and monitoring performance of the Fund;
4. monitoring the implementation of investment decisions consistent with investment policies approved by the Board;
5. approving the retention and termination of investment managers.

The current composition of the Investment Committee (IC) includes five members: Candy Wong CFA; Marilyn McLaren; JD Devgan; Carmen Nedohin and Satvir Jatana.

The Province of Manitoba's Treasury Division

As per the TOR the role of the Department is to:

“The Act and the Minister establishes the role of the Department as:

1. managing the investment of the Fund and implementing investment direction and decisions consistent with approved investment policies and strategies;
2. through participation on the Working Group, developing proposed investment policies and strategies for the Fund for recommendation to the Committee; and
3. appointing a minimum of three (3) individuals as representatives of the Working Group.

Investment Committee Working Group

As per the TOR the role of the ICWG is to:

1. function as liaison between the Department and the Committee;
2. review strategies for investment exposure for consideration by the Department and the Committee;
3. make recommendations to the Committee respecting the retention and termination of investment managers;
4. monitor the performance of investment managers;
5. approve investment policies and annual strategies for the Fund for review by the Committee;
6. monitor investment policies and direction;
7. receive regular reports from MPI's External Investment Consultant and Internal Investment Team; and
8. annually review the risk, return and diversification of all asset classes in the Fund as prepared by the External Investment Consultant and Internal Investment Team, and report the results to the Investment Committee.

The current composition of the ICWG is provided below.

1. Satvir Jatana, President & CEO
2. Cara Low; Vice President, Actuarial, Investments & Underwriting & Chief Actuary
3. Ryan Kolaski; Vice President Finance & Chief Financial Officer
4. Enes Jeina; Manager, Investments
5. Dorothy Scott; Director, Finance & Accounting
6. Sabrina Kauk; Director, Financial Planning & Analysis
7. Khurram Masud; Director Valuation & Capital Management
8. Nicoleta Oprea; Assistant Deputy Minister of Finance, Province of Manitoba
9. Scott Wiebe; Director of Treasury Services, Province of Manitoba

10. Justin Jones; Director of Capital Markets, Province of Manitoba
11. Jeff McCulloch; Assistant Deputy Minister, Fiscal Management and Capital Planning, Province of Manitoba
12. WTW, Lead Investment Consultant

The table below shows details of the ICWG members' professional designations and experience related to management and monitoring of the performance of the investment portfolios.

ICWG Committee Member (First Name, Last Name)	Other Roles	Professional Designation	Investment Management (in Years)
Satvir Jatana	IC	-	0 years
Cara Low		FCIA, FCAS, CFA, FCIP, CRM	0 years of direct investment experience 7 years of ALM experience
Ryan Kolaski		CPA, CBV	0 years
Enes Jeina		CFA, CAIA	5 years
Dorothy Scott		CPA, CA	0 years
Sabrina Kauk		CPA, CA	0 years
Khurram Masud		FCIA, FCAS	0 years
Nicoleta Oprea		CFA Level III Candidate	10+ years of ALM experience
Scott Wiebe		CPA, CGA	30+ years Treasury experience
Justin Jones		CFA Level III Candidate	10 years
Jeff McCulloch			1 year Treasury experience

The ALM & Investment Management Team

Internal parties include members of the ALM & Investment department at MPI:

1. Alejandro Chomski, CFA, Senior Investment Analyst, 15+ years
2. Aman Sekhon, CFA; Senior Investment Analyst, 10 years
3. Paolo Medina, ASA, ACIA; ALM Lead, 2 years

WTW

WTW provides analytical support, investment advice, performance reporting, governance support and regulatory assistance to MPI's management, Investment Committee Working Group, Investment Commitee and Board. WTW acts in a non-discretionary capacity and does not have authority to make, approve or implement investment decisions. Responsibility for investment strategy, risk appetite, policy approval, asset allocation decisions, and and implementation remains with MPI and is exercised through MPI's governance framework.

The transition to this advisory model has supported a number of enhancements to MPI's investment process:

- A more comprehensive asset-liability management and risk-appetite framework
  Investment analysis is increasingly framed around downside outcomes, capital adequacy, recovery dynamics, and volatility across a range of economic scenarios.
- Formalized governance and decision-making process
  Investment matters are progressed through a structured governance framework involving management, the Investment Committee Working Group, and the Investment Committee. This process supports transparent evaluation of risk-return trade-offs,alignment with MPI's mandate, and clear accountability for decision making
- Clear separation between risk-appetite, strategy development and implementation
  Current work is focused on establishing risk appetite, governance guardrails and acceptable ranges of investment risk. Portfolio design, asset mix recommendations, and implementation decisions are considered separately and remain subject to MPI's governance review and and approval processes.
- Enhanced investment monitoring and manager oversight
  Performance measurement, risk monitoring, interest rate hedge analysis, and manager evaluation, and portfolio analytics have been further formalized through independent reporting and review processes. There enhancements support more consistent monitoring of investment outcomes and alignment with investment objectives.
- Structured support for regulatory processes
  The investment process now incorporates a more formal framework for supporting General Rate Application requirements and related regulatory proceedings. This includes preparation of

investment-related analysis, documentation of methologies and assumptions, support for information requests, and communication of investment and ALM-related findings.

Other than the transition to this advisory model and the process enhancements described above, there have been no material changes to MPI's governance framework or decision-making authority. MPI continues to retain full responsibility for investment strategy, risk appetite, asset allocation decisions, implementation activities, and ongoing oversight of the investment program.

PUB (MPI) 1-81

Part and Chapter:	Part IX - Investments Sections C.1	**Page No.:**	3, 10-11
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix) 14. Update on Asset Liability Management Study (a) Risk Appetite & Portfolio Changes 4. Financial forecast (d) Investment income forecast		
Topic:	Investment Strategy		
Sub Topic:	Pending Risk Appetite and Asset Mix Decisions		

Preamble to IR (If Any):

Section C.1 states current work is focused on risk levels and governance guardrails, with portfolio structure and asset mix decisions to follow. Section H.5 states the asset class weightings behind the yield assumptions are not a finalized or optimized asset mix.

Question:

a) Please confirm whether MPI expects to implement asset mix changes during the 2027/28 rating year

b) Please quantify the sensitivity of forecast investment income to the range of asset mixes under consideration and being evaluated by WTW.

c) Please undertake to file the revised asset mix and its investment income impact when approved.

Rationale for Question:

To understand the status of the asset mix review and its effect on the investment income forecast.

RESPONSE:

a) The ALM study for Basic Claims and RSR portfolio is expected to be completed during the 2026/27 rating year. The new asset mix is expected to be effective April 1, 2027 with implementation over the 2027/28 rating year.

b) WTW has not yet presented the potential asset mixes to the Investment Committee (IC). WTW will present an ALM update at the August 2026 IC meeting. The ALM chapter will be filed following the meeting. The recommended changes to the investment asset mix will be presented to the IC in November 2026.

c) The recommended changes to the investment asset mix will be presented to the Investment Committee at the November 2026 IC meeting. MPI cannot therefore undertake to file in this GRA approved asset mixes or calculate any investment income impact but will provide the ALM study after the August IC meeting.

PUB (MPI) 1-82

Part and Chapter:	Part IX - Investments Figure INV-2 INV Appendix 4	**Page No.:**	6
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)		
Topic:	Investment Performance		
Sub Topic:	Reconciliation of Figure INV-2 and Appendix 4		

Preamble to IR (If Any):

The three presentations of 2025/26 investment performance do not agree.

Figure INV-2 and the Appendix 4 return table show, for example, Canadian Small Cap returns of 35.5% (RSR) and 34.7% (EFB) against a benchmark of 66.8%, a shortfall of roughly 31 points, and a nil return on Provincial Bonds in Basic Claims against a benchmark of 2.3%.

The Appendix 4 narrative reports :

Government Bonds underperformance the benchmark by 0.8%

Canadian small cap underperformance of only 6.0% (RSR) and 5.5% (EFB).

Question:

a) Please reconcile the asset class relative performance figures in the Appendix 4

b) Please identify the benchmark index applied to Canadian Small Cap and explain the basis for a 66.8% benchmark return for that mandate.

c) Please explain the nil return on Provincial Bonds in the Basic Claims portfolio against a benchmark of 2.3%, given the Appendix 4 narrative attributes government bond underperformance of 0.8% to duration positioning.

Rationale for Question:

To understand the reported investment performance results.

RESPONSE:

a) Please see MPI ***Exhibit #15*** for a revised version of Appendix 4. The previous narrative was not fully updated and included inaccurate commentary about other equities and private assets, in addition to Government bonds and Canadian Small Cap. Appendix 4 return table has not been changed and accurately reflects MPI returns as of March 31, 2026.

b) As per the IPS, the benchmark assigned to Canadian Small Cap is the S&P/TSX Small Cap Index. The 1-year benchmark return as of March 31, 2026, was 66.8%.

c) As noted in the revised performance commentary, provincial bonds underperformed the benchmark by 2.25% and were underweight by an average of 0.6% over the one-year period. The portfolio's longer duration relative to the benchmark negatively impacted performance as yields moved higher, particularly at the long end of the curve. Overall, provincial bonds contributed -0.81% to the relative underperformance of 0.33% at the portfolio level.

PUB (MPI) 1-83

Part and Chapter:	**Part IX - Investments** **Figure INV-3**	**Page No.:**	**7**
PUB Approved Issue No:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)**		
Topic:	**Investment Performance**		
Sub Topic:	**Five Year Annualized Return**		

Preamble to IR (If Any):

MFR C.5 requested:

Please provide a five-year comparison of the corporation's total annual investment return rates with the corresponding annual return rates of comparable peers and please provide commentary on any significant differences in the description of peer groups.

In the 2026 GRA MPI provided a detailed narrative and the following comparison:

Figure INV- 31 Fiscal Year Gross Annual Returns

Line No.	Year-end Period	ICBC 31-Mar	SGI 31-Mar	MPI 31-Mar
1	2020	1.4%	0.4%	1.5%
2	2021	11.2%	18.4%	8.9%
3	2022	2.9%	3.5%	0.6%
4	2023	1.4%	2.7%	-0.8%
5	2024	8.0%	6.3%	3.4%
6	Annualized Return			
7	over the 5 year period:	4.9%	6.1%	2.7%
8	MPI Value Added	-2.2%	-3.4%	

*2.7% : Comparative return to ICBC, 2.7% : Comparative return to SGI.

In this years application under the OCIO model, MPI provided the following with no explanation and no analysis.

Please note that ICBC's and SGI's returns are publicly available on their respective website. MPI is not comfortable commenting on the relative performance to either ICBC or SGI, as while there may be some similarities in the investment programs, the overall structure and rationale may differ substantially. As such, MPI believes it would be inappropriate to make inferences regarding either of the above's underlying data or performance.

Question:

a) Please explain why MPI is no longer comfortable providing this previously provided information?

b) Please indicate whether the OCIO or WTW provides any services to ICBC, SGI/SAF or the Parent Crown Investment Council.

c) Please provide a table of the published total portfolio returns of ICBC, SGI and SAF for the last five years alongside MPI's returns, with appropriate caveats about differences in mandates and asset mix.

d) Please provide each peer's published asset mix alongside MPI's to give the panel context for return differences.

e) Please quantify the potential uplift if MPI were to achieve the minimum of the comparable 5-year returns.

f) Please provide comments on different investment risk profiles with the other Crowns that may have resulted in lower returns.

g) If commentary is not provided, please explain how the minimum filing requirement is addressed.

Rationale for Question:

To understand MPI's investment returns relative to comparable peers.

RESPONSE:

a) MPI has not included peer comparison commentary because differences in mandates, objectives, liabilities, governance structures, asset mixes, risk tolerances, capital requirements and funding circumstances can materially affect investment outcomes and limit the usefulness of direct comparisons. As a result, comparisons of reported returns or portfolio structures across organizations may not provide meaningful insight into the effectiveness of MPI's investment program and could lead to inappropriate conclusions if viewed without the broader context that drives investment decisions and outcomes. MPI believes that disclosure focused on its own investment objectives, policies, benchmarks and results provides a more relevant and reliable basis for evaluating performance than comparisons to organizations operating under different circumstances.

b) WTW is committed to maintaining the confidentiality of its client relationships and generally does not disclose information regarding specific clients or engagements without appropriate authorization or where disclosure is otherwise required. WTW does not believe it has any conflicts of interest arising from the provision of services to the organizations identified that would impact its ability to provide services to MPI.

c) Published total portfolio returns can be found in the annual reports of ICBC, SGI and SAF. MPI has not compiled the requested five-year comparison. Preparing the table would require additional time and resources during an already busy time for the corporation. For context, the Investment Department dedicated approximately 190 hours to responding to Round 1 Information Requests in the 2026 GRA between July 14 and August 7, 2025.

d) Published asset mixes of ICBC, SGI and SAF can be found in their published reports. MPI has not compiled the requested asset mixes.

e) MPI has not performed an analysis intended to quantify the investment return impact of adopting another institution's asset mix. Any estimate of potential investment uplift would depend on assumptions regarding asset allocation, risk tolerance, liability structure, capital objectives, liquidity requirements, governance constraints, implementation timing and future market conditions. Differences in reported returns across organizations cannot be assumed to represent an achievable increase in returns for MPI, as those returns are generally associated with different levels and types of risk. Consequently, MPI is unable to reliably quantify a potential investment uplift based solely on peer comparisons or publicly available peer information.

f) MPI has not undertaken a detailed comparative analysis of the investment risk profiles of other organizations referenced in this proceeding. In general, differences in investment risk profiles may arise from differences in asset allocation, liability characteristics, capital objectives, liquidity requirements, governance frameworks and risk tolerance. As a result, differences in reported returns or portfolio structures should not be interpreted in isolation, as higher expected returns are often associated with higher levels of investment risk and greater potential variability of outcomes. Without a detailed assessment of each organization's specific circumstances, MPI is unable to draw conclusions regarding the relative appropriateness of the investment risk profiles of other institutions.

g) MPI understands that the minimum filing requirements are intended to provide sufficient information to explain and support the filing. MPI has not included benchmark or peer comparison commentary because differences in investment mandates, objectives, liabilities, governance structures, asset allocations, risk tolerances, funding circumstances, and reporting practices can materially affect results and limit the usefulness of such comparisons. Given these differences, peer comparisons may not provide a meaningful basis for evaluating MPI's investment performance and could be misleading without extensive context. MPI believes the filing satisfies the minimum filing requirements through disclosure that is specific to its own investment objectives, policies, and results, enabling an informed assessment of the filing on its own merits.

PUB (MPI) 1-84

Part and Chapter:	**Part IX - FFI** **Figures FFI-7, FFI-8** **Sections FFI.3.2.4, FFI.3.2.5**	**Page No.:**	**14-21**
PUB Approved Issue No:	**4. Financial forecast (d) Investment income forecast and (e) Interest rate forecast**		
Topic:	**Investment Income Forecast**		
Sub Topic:	**Bond Yield and Spread Reversion Assumptions**		

Preamble to IR (If Any):

Corporate bond holdings yielded 4.48% at March 31, 2026, a spread of 101 basis points over the GoC 10 year yield of 3.47%.

Figure FFI-8 forecasts corporate bond yields of 5.38% and 5.46%, implying spreads of 191 and 199 basis points relative to the GOC 10 year yield of 3.47%.

Section FFI.3.2.5 states spreads are reverted to their long term mean within one to two years.

Figure FFI-7 shows provincial bond yields rising to 4.56% and then declining to 4.40% in the final two years.

Question:

a) Please explain how a change in spread can occur when you have spreads.

b) Please reconcile the forecast corporate bond yields of 5.38% and 5.46% in Figure FFI-8 with the current spread of 101 basis points and explain why the forecast assumes spreads will widen approximately 90 to 98 basis points above current levels.

c) Please explain the path of provincial bond yields in Figure FFI-7, including the decline in the final two years.

d) Please quantify the impact on forecast Basic investment income and the rate indication if current spreads were held constant rather than reverted upward.

Rationale for Question:

To understand the basis for the fixed income yield assumptions.

RESPONSE:

a) In the Financial model, the change in spreads in provincial, corporate and real return bonds can be attributed by two factors:

I. The spreads on provincial bonds, corporate bonds and real return bonds are assumed to revert back to their means within one to two years.
II. The spreads relative to the GoC 10-year vary by duration and if the duration of the portfolio changes, so does the spread.

b) As stated in ***FFI 3.2.4*** the corporate bond holdings on March 31, 2026, had a weighted average yield of 4.58% rather than a 4.48% yield in the preamble. Using the Government of Canada 10-year yield of 3.47%, this implies a spread of 111 basis points.

The corporate bond yields shown in ***Figure FFI-8*** represent the assumed yields on new corporate bond investments, not the yield on the existing corporate bond portfolio. In the financial model, new corporate bond investment yields are determined using the yield of the corporate bond benchmark (25% FTSE Canada Mid-Term Corporate Bond Index and 75% FTSE Canada Long-Term Corporate Bond Index), with yields then adjusted through a mean-reversion process.

Consistent with Section ***FFI.3.2.5***, corporate bond spreads are assumed to revert to their long-term average. Based on historical data since 2007, the average corporate spread is approximately 199 basis points, and the model assumes

spreads on new corporate bond investments will revert toward this long-term average over a two-year period. This produces forecast spreads of approximately 191 basis points at the end of 2026/27 and 199 basis points at the 2027/28, which, when added to the forecast Government of Canada benchmark yields, generate the corporate bond yields of 5.38% and 5.46% shown in ***Figure FFI-8***.

c) In the financial model, only the duration of the provincial bond portfolio is adjusted periodically to maintain the hedge ratio (defined as the dollar duration of assets divided by the dollar duration of liabilities) within 100% ±5% range specified in MPI's ALM policy.

Generally, increasing portfolio duration results in a higher yield as compensation for taking on additional risk, while decreasing duration results in lower yield. ***Figure 1*** below shows the duration of the provincial bond portfolio and its corresponding yield over the five-year forecast period.

Figure 1 – Provincial bond portfolio yield & duration

Fiscal Year	Duration (Years)	Yield
2026/27	11.9	4.49%
2027/28	12.5	4.56%
2028/29	12.5	4.56%
2029/30	11.1	4.40%
2030/31	11.1	4.40%

The larger decrease in 2029/30 is primarily driven by the growth of the provincial bond portfolio in the later years as the MUSH portfolio weight declines. Because the MUSH portfolio has a significantly lower duration (4.29 years), the duration of the provincial bond portfolio is reduced to maintain the target hedge ratio.

d) The rate indication would not change as the new money yield does not change in subsequent years for mean reversion.

Figure 2 below illustrates the impact on the Basic Line of Business Investment if provincial bond, corporate bond and real return bond spreads are held constant at the 2026/27 level instead of reverting upward to their long-term average. It reduces investment income by an average of approximately $0.4 million per year over the four years following 2026/27.

Figure 2 – Impact on Basic LOB Investment with constant spreads of provincial, corporate, and real return bond

Basic LOB Investment Income ($000s)	**2026/27**	**2027/28**	**2028/29**	**2029/30**	**2030/31**
Base	135,424	145,385	157,767	170,470	184,630
Spreads held constant	135,424	145,253	157,395	169,931	183,970
Impact	**0**	**-132**	**-372**	**-539**	**-659**

PUB (MPI) 1-85

Part and Chapter:	Part IX - FFI Sections FFI.3.2.3 Figures FFI-10, FFI-11	**Page No.:**	17-18
PUB Approved Issue No:	4. Financial forecast (d) Investment income forecast 14. Update on Asset Liability Management Study		
Topic:	Investment Income Forecast		
Sub Topic:	Bond Turnover Assumptions		

Preamble to IR (If Any):

Corporate bond turnover in the Basic Claims portfolio is forecast at 71%, up from 47% in the 2026 GRA.

Figure FFI-10 shows provincial bond turnover of 93% in the year ended March 2024 against 28% to 50% in other years. Addenda has forecast a turnover assumption for Provincial Bonds of 47%. Figure FFI-11 shows the turnover assumption moves Basic investment income by up to approximately $8 million per year by 2030/31.

Question:

a) Please explain the basis for Addenda's 71% corporate bond turnover expectation and quantify the transaction costs and realized gains or losses associated with the higher turnover.

b) Please explain the 93% provincial bond turnover in the year ended March 2024.

c) Please confirm who approved managing the corporate bond portfolio at a longer duration (1.1 years longer) and how that decision relates to the ALM strategy currently under development.

Rationale for Question:

To understand the bond turnover assumptions.

RESPONSE:

a) The corporate bond turnover assumption increased from 47% to 71% due to a change in the corporate bond benchmark following the PIPP Termination Rate & Methodology Update Project. As a result of the PIPP project the duration of the Basic Claims liabilities increased (2 years), and the benchmark was revised from a 50/50 allocation between the FTSE Mid-Term and FTSE Long-Term Corporate Bond Indices to a 25%/75% allocation. Implementing this change required additional trading and resulted in a higher turnover assumption.

Transaction costs are not modeled in the financial projections and therefore not affected by the turnover assumption.

Turnover impacts realized gains and losses, although it is completely offset by changes in unrealized gains and losses, because the forecast is naive.

The main impact of the turnover assumption is on interest income. As shown in Figure 1, using the 2026 GRA turnover assumption of 47% would reduce Basic investment income by approximately $0.6 million per year on average. This is because new bond purchases are assumed to have a higher average coupon than the existing portfolio, so lower turnover results in fewer higher-coupon bonds being purchased and lower interest income.

Figure 1 – Basic Line of Business Investment Income Impact: 0.71% vs 0.47% Corporate Bond Turnover

Basic LOB Investment Income ($000s)	**2026/27**	**2027/28**	**2028/29**	**2029/30**	**2030/31**
0.71% Turnover	135,424	145,385	157,767	170,470	184,630
0.47% Turnover	135,128	144,661	156,955	169,732	184,020
Impact	**-296**	**-724**	**-813**	**-738**	**-610**

b) The 93% turnover in provincial bonds for the year ended March 2024 was primarily driven by changes made to align the asset portfolio with the duration of the liabilities and manage interest rate risk.

Following the August 2023 hailstorm, which resulted in just over 15,000 claims, the duration of liabilities decreased. To maintain alignment, the duration of the fixed income portfolio, including provincial bonds, was also reduced. In February 2024, real estate and commercial mortgages were added to the Basic Claims investment portfolio. Because real estate has no duration and commercial mortgages have a relatively short duration (approximately two years), the duration of the provincial bond portfolio was increased to maintain the desired overall duration.

These portfolio rebalancing activities resulted in higher-than-normal turnover within the provincial bond portfolio during the year.

c) The decision to manage the corporate bond portfolio at a longer duration was approved by the Investment Committee. The benchmark change described in part (a) was made to better align the corporate bond portfolio with the Basic Claims liabilities and more importantly maintain the hedge ratio within the 100% ± 5% range specified in MPI's ALM Policy. This change is consistent with the objectives of MPI's ALM strategy to manage interest rate risk.

PUB (MPI) 1-86

Part and Chapter:	Part IX - FFI Figure FFI-4 Figure FFI-1 (lines 12-18) Sections FFI.5, FFI.6	**Page No.:**	8, 11
PUB Approved Issue No:	4. Financial forecast (d) Investment income forecast		
Topic:	Investment Income Forecast		
Sub Topic:	Equity Return and Dividend Assumptions		

Preamble to IR (If Any):

Section FFI.11.1 states WTW capital market assumptions replaced MPI's internal assumptions, raising the global equities, global low volatility and infrastructure return assumptions by 0.7%, 0.8% and 0.1%. The change adds on average $5.6 million per year of equity income and $1.4 million of alternatives income to the forecast.

Separately, Figure FFI-1 shows actual 2025/26 Canadian equity dividend and other income of $11.8 million, implying an approximately 8.1% yield, which falls to a forecast $4.1 million in 2026/27, implying an approximately 2.4% yield. Infrastructure income falls from $6.6 million to $2.1 million.

Question:

a) Please file the WTW capital market assumptions supporting the equity, real estate and infrastructure return assumptions, including the methodology and the date of the assumptions.
b) Please reconcile the actual 2025/26 dividend and other income for Canadian equities and infrastructure with the materially lower forecast amounts, identifying any non-recurring distributions included in actuals.
c) Please quantify the impact on the forecast Basic investment income of a 0.5% variance in the equity total return assumptions.

Rationale for Question:

To understand the basis for the capital market return assumptions.

RESPONSE:

a) WTW provides capital market assumptions annually to support MPI's investment forecasting and financial model inputs. WTW capital market assumptions for equity, real estate and infrastructure return assumptions can be found in the ***Attachment A***, including the methodology and date of the assumptions, subject to MPI's confidentiality and filing position.

b) The higher actual income in 2025/26 relative to the forecast amounts reflects the strong performance of these asset classes during the past fiscal year and corresponding distributions received from these investments. MPI's Canadian large-cap and small-/mid-cap equities generated returns of approximately 44% and 35%, respectively, in 2025/26. Infrastructure investments generated returns of approximately 9.2% during the year.

In contrast, the financial forecast was based on capital market assumption 6.6% projected return for equities (2.5% - 2-7% dividends) and 6.3% return for infrastructure (1.3% dividend). The forecasted return and income were both much lower than actuals.

MPI is not aware of any material one-time special dividends or other specifically identified non-recurring distributions included in the 2025/26 Canadian equity or infrastructure income amounts.

c) ***Figure 1*** illustrates the sensitivity of the investment income forecast to a ±0.5% change in the equity total return assumptions. MPI assumes that the variance is reflected entirely in the capital return assumption.

Figure 1 – Basic Line of Business Investment Income Sensitivity: ±0.5% variance to equity total return assumption

Basic LOB Investment Income ($000s)	**2026/27**	**2027/28**	**2028/29**	**2029/30**	**2030/31**

Introduction

WTW has various asset models for different use cases. This document details the assumptions and calibration processes for the WTW Canadian Investment Model ("the model"). The model and the relevant assumptions, are designed to support investors in undertaking a wide range of risk management activities (e.g., one year risk budgeting) and for aiding decision-making regarding long-term asset liability modelling and strategic asset allocation, particularly around the expected returns and risk profile of the portfolio. As such, it should be noted that it is not meant to be precisely reflective of the likely course of the investment markets in the short-term.

Like all models, the model is a simplified version of reality and is therefore subject to limitations which mean that it cannot fully capture the range of outcomes that have been seen historically, let alone the "unknown unknowns" which could have happened historically but did not. In addition, the historic experience may not be a representative guide as to the range of future outcomes. The model, the assumptions and the calibration process are subject to ongoing development to ensure they remain fit for the intended purpose.

The model is governed by the Investment Assumptions Committee (IAC). This comprises senior investment individuals from across the business to represent the various regions, use cases for the assumptions and the various asset models. The IAC sets model independent assumptions, which are then implemented to the greatest extent possible in our various asset models. Our intention when setting our assumptions is to arrive at best estimates for parameters which aim to describe potential future outcomes. There is a fairly broad range of plausible assumptions and different groups could arrive at alternative assumptions to those agreed by the IAC. This is particularly true when market conditions are what would be regarded as "abnormal". Users of these assumptions should bear this in mind and be careful not to attach more precision to the projected outcomes than is warranted.

Capital market assumptions

Overview

- Our approach to assumptions setting is generally based around a belief that markets are broadly (but not perfectly) efficient. Therefore, we would not usually assume that one market or another is over-sold or over-bought and therefore liable to mean revert. However, on occasions, if market conditions seem particularly anomalous, our central assumptions may reflect an assumed trend.
- The IAC sets a short-term and a long-term view, along with some guidance on how the evolution from short- to long-term figures should be achieved:
  - Reflects initial capital market conditions and transitions, on average, to long-term normative levels with the evolution over the first few years heavily informed by current market conditions.
  - Where the short-term current market condition is different to the long-term normative target, the IAC set guidance on the pace of reversion. All projections meet normative targets within 40 years, however the pace varies by asset class. Cash rates and government bond yields are assumed to revert slowly, perhaps taking multiple decades, to reflect the long periods of time that rates can remain away from long-run averages. Corporate bond spreads however have a much faster reversion speed, as they tend to revert within a business cycle.
  - Long-term normative targets denote the average level we would expect to see in markets over the very long term, and over multiple business and economic cycles. These are set based on our belief in long run average market levels. Normative levels are thus a blend of historical capital market data and future expectations
  - To simplify the process and ensure global consistency a building block approach is used. The IAC focuses on a small number of global risk premia – such as for inflation, real cash, bond term premia and equity risk premia.

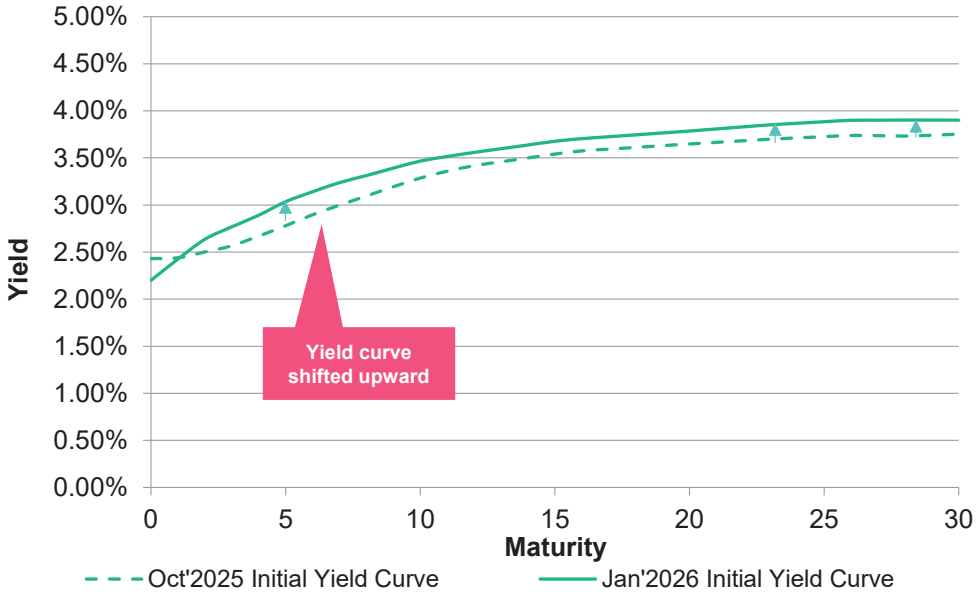
Capital market assumptions

Overview



Fixed Income	▪ Within our 5,000 simulations, the yield curve can move in any direction or take on any shape, but we reflect rising nominal yields in our central assumptions ▪ Canadian nominal yield curve created based on targets for normative real yields : 1.25% for 91-day T-bills (cash) and 2.75% for 30-year Government of Canada bonds ▪ 2036 nominal cash rates are expected to be 3.25% in our central assumptions ▪ 30-year yields are expected to increase 40 bps by 2036 in our central assumptions ▪ Long credit bond spreads are expected to trend from current levels to normative on average by 2030
Inflation & Equities	▪ Inflation is at 2.0% for the first year, which is our long-term normative expectation (2.0%). ▪ Our expected arithmetic developed market equity risk premium for years 2026-2036 is 5% over cash (i.e.., risk free rate) ▪ Normative real equity return of 4.75% per annum (relative to CPI, compound basis). Our equity volatility assumption is 16.9% for US Large Cap (in CAD. i.e.., with foreign currency unhedged)
Interpreting the expected returns	▪ Impact of active management not reflected as all returns are net of fees assuming passive management for each traditional asset class, modeled as relevant broad market index, and low risk exposure, as could be expected, from “core” real asset mandate, or an “average implementation” or a well diversified approach, such as through a fund of funds ▪ Economic conditions are uncertain over the near-term and do not in our view reflect equilibrium conditions ▪ Our capital market assumptions reflect this instability and are time-sensitive. As a result, advice that is dependent on this set of investment beliefs is also time-sensitive; attractiveness of certain strategies will vary from quarter to quarter ▪ Alternative beliefs might well lead to different conclusions; thus, it is important that investors consider whether their beliefs and ours are aligned

Highlights of changes from last quarter - current market conditions

Canadian fixed income (0.1% to 0.4% 10-year Geometric Mean return approximate impact)

- In contrast to October 1, 2025, the increase in initial bond yields resulted to slightly higher expected returns for Government bonds and Corporate bonds
  - Changes in credit spreads had a slight negative impact on expected returns
  - No longer reflects a slight inversion over the short term.
  - Same normative assumptions (i.e.., long-term view) for the Canadian yield curve as the October 1, 2025 model

Results (vs. October 2025) Long Term Bonds 10 Year Returns
Geometric Mean = 4.2% (+0.3%)
Average Standard Deviation = 9.8% (-0.1%)
Initial modeled Yield = 4.6% (+0.2%)
Initial modeled Maturity = 23.1 years (0.0)
Initial modeled Duration = 14.2 years (-0.3)

Cash/Short-term (91 Day T-bills) nominal yields

- Starts at 2.20% (previously 2.43%)

30-year Gov. of Canada (GoC) nominal yields

- Starts at 3.90% (previously 3.75%)
- For both cash returns and long bond yields, we broadly follow forward rates over the next few years then trending to the normative assumptions over the longer-term

Credit spreads for long-term nominal bonds

- Corporate bonds: -2 bps
- Provincial bonds: +3 bps
- 20+ Strip: +2 bps

Real Return Bond yields (overall)

- Starts at 1.58% (previously 1.39%)

The table above shows the key correlations of nominal 1 year returns between asset classes. To help interpret these numbers, a figure below 0.3 (positive or negative) is indicative of low correlation, a figure between 0.3 and 0.5 indicates moderate correlation and a figure of above 0.5 indicates a high degree of correlation.

Forward-looking returns and risk forecasts are subject to numerous assumptions, risks and uncertainties, which change over time. Actual results could differ materially from those anticipated in forward-looking projections. Past performance is not indicative of future returns

Capital market assumptions

January 1, 2026

Central assumptions for 30-year forecast of future Government of Canada yield curve movements, as at January 1, 2026, are based on expectation of falling short yields and flattening yield curve over the first few years (still broadly following forward yields) reverting towards normative levels afterward.

- Within our 5,000 simulations, the yield curve can move in any direction or take on any shape, but we reflect the following central assumptions

Source: Bank of Canada V39065 and CanDeal Data & Analytics (DNA) Yield Curve and Investment Model

Forward-looking returns and risk forecasts are subject to numerous assumptions, risks and uncertainties, which change over time. Actual results could differ materially from those anticipated in forward-looking projections. Past performance is not indicative of future returns

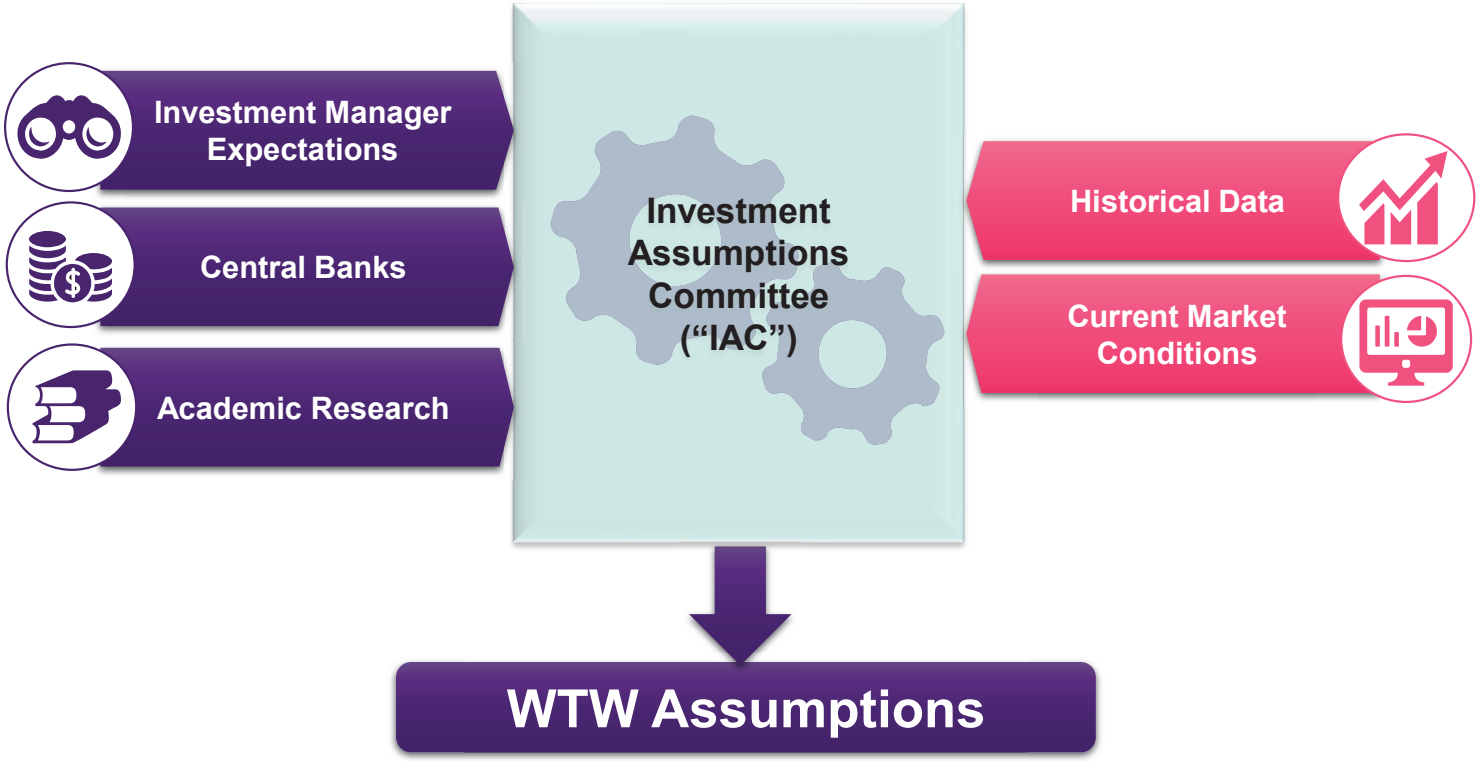
Capital market assumptions



Investment beliefs

- Economic conditions are highly uncertain over the near-term and do not in our view reflect equilibrium conditions
  - Our capital market assumptions reflect this instability and as a result are highly time-sensitive
  - Advice that is dependent on this set of investment beliefs is thus also time-sensitive
  - Alternative beliefs might well lead to different conclusions; thus, it is important that investors consider whether their beliefs and ours are aligned
- The result of these assumptions is to make certain strategies more or less attractive over the short- to mid-term
- A natural outcome of our assumptions is to increase the time-dependency of our advice; we suggest that more frequent revisiting of the investment strategy will be necessary
- Asset classes are described by their expected returns, volatility, and correlation with other asset classes
  - The 10-year geometric returns are more directly comparable to historic annualized returns and are of primary interest when projecting over longer periods as might be appropriate in an asset liability modeling study
  - The importance of the average 1-year returns is largely in terms of risk budgeting analysis (which displays risk and return measures over 1-year periods) and when asset classes are combined into a portfolio. The average return for a portfolio of assets can be obtained by adding together the 1-year returns for each of the constituent asset classes in the appropriate proportions (note the same cannot be said of the geometric returns).
- Expectations for individual asset classes were developed by the WTW Canadian Investment Model as of January 2026
- Return distributions for equity (and some alternatives) asset classes incorporate fat tails
- Correlations between return-seeking asset classes increase when fat-tail events occur
- Simulated Government of Canada yield curve (full yield curve with pace of reversion) and simulated credit spreads are used both in developing liability discount rates and the returns for fixed income asset classes
- Our central assumptions are based on the presumption that current policies with respect to climate change continue with no further attempt to incentivize further emissions reductions. This represents an orderly transition to a low carbon economy, albeit with a low level of action, where socioeconomic and technological trends do not shift markedly from historical patterns, leading inevitably to a larger than desired increase in global warming.

Why fat tails matter?

wtwco.com
© 2026 WTW. All rights reserved.

How we model “black swan” events

- Two state model
  - Our asset model switches among different states for normal and stressed market conditions
  - Return pulled from the “normal” outcome with 95% probability; “bad” outcome with 5% probability
- Fat tails
  - “Regime switching” creates more frequent and severe downside events (“fat tails”) than would have occurred under a normal (or lognormal) distribution and allows for converging correlations

PUB (MPI) 1-87

Part and Chapter:	Part IX – Investments Figure INV-2 Section C.6 Part IX - FFI, section FFI.10.2	**Page No.:**	8
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)		
Topic:	Investment Management		
Sub Topic:	Transition of Global Equities Management		

Preamble to IR (If Any):

Section C.6 states MPI approved the switch of global equities management from Guardian to the iShares MSCI World ETF, implemented in April 2025.

Global Low Volatility returns were 5.0% versus a benchmark return of 14.6%

Question:

a) Please provide the transition costs incurred and the annual management fee savings, comparing the Guardian mandate fees to the ETF management expense ratio.

b) Please confirm whether the Global Low Volatility mandate was affected and identify its current manager and benchmark.

c) Please describe how the reported underperformance of Global Low Volatility relative to its benchmark bears on MPI's manager review process.

Rationale for Question:

To understand the costs and benefits of the manager transition and its treatment in the fee forecast.

RESPONSE:

a) MPI hired PGM Global for transition services. The total fees paid to PMG for transition services were $26,560 CAD (commission of $0.022/shares traded + applicable taxes).

Guardian Fund management fees were 0.55% per annum, whereas the URTH ETF management expense ratio is 0.24% per annum. Effective annual savings are approximately 0.31%, which translates to $378K in management expense savings based on the market value of the URTH ETF as of March 31, 2026.

b) The Global Low Volatility mandate was not impacted by the transition of the Global Core mandate from Guardian Fund to URTH ETF. The Global Low Volatility manager is Acadian (Acadian Global Managed Volatility Fund), and its fund is benchmarked against the MSCI World Index in CAD.

c) As per the MPI Investment Policy Statement, active manager performance is measured over the long term (4 years); active managers must add value net of fees over their contractual benchmark index in order to justify their higher fees relative to a passive strategy. MPI presents a Dashboard report to the Investment Committee quarterly, which classifies underperforming investment managers as follows

Green: No concerns
Yellow: Emerging concerns
Red: Concerns and added to the Watchlist

An active equity manager who meets either of the two factors is added to the Yellow category:

- Underperforms the contractual benchmark net of fees over the most recent two-year period by more than 1.0% or
- Ranks in the bottom quarter of the relevant peer group over the most recent two-year period.

Acadian is currently classified as yellow, because they have underperformed the benchmark by more than 1% over the last two years. Acadian is still ranked in the top half of their peer group, so they do not meet the second criteria. If a manager violates both criteria, they are placed in the red category and added to the watchlist.

PUB (MPI) 1-88

Part and Chapter:	Part IX - Investments Section C.7, Figure INV-4 Part IX - FFI, Figure FFI-2	**Page No.:**	8-9
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix) 14. Update on Asset Liability Management Study		
Topic:	Asset Liability Management		
Sub Topic:	Inflation Protection		

Preamble to IR (If Any):

Section C.7 states inflation sensitivity in the Basic Claims portfolio comes primarily from Real Return Bonds and real estate.

Figure FFI-2 shows Real Return Bonds at 2.6% of the Basic line of business in 2025/26, declining to 2.0% by 2030/31.

MPI notes that inflation protection adequacy is assessed within the overall risk management framework rather than against a standalone target. The current level of inflation-sensitive exposure is considered sufficient to support long-term resilience while avoiding undue complexity or additional sources of Volatility.

Consistent with prior PUB direction. MPI continues to incorporate inflation considerations within its ALM analysis and investment review processes.

Question:

a) Please quantify the change in the value of Basic Claims portfolio assets and in Basic Claims liabilities from a sustained 1 % increase in CPI, and the resulting net exposure.

b) Please explain why the Real Return Bond weight declines over the forecast period while claims liabilities remain indexed to inflation.

c) Please confirm whether the pending risk appetite and asset mix work addresses inflation hedging, and describe how prior Board direction on inflation hedging is being addressed in that work.

Rationale for Question:

To understand the inflation protection in the Basic Claims portfolio.

RESPONSE:

a) *Figure 1* shows the impact of a sustained 1% increase in CPI over the five-year forecast period on Real Return Bonds (RRBs) and Basic Claims liabilities. As shown in INV-4, RRBs is the only invested asset that provide a 100% hedge against CPI inflation. While real estate, equities, and infrastructure offer partial inflation protection, this has not been quantified and is excluded from the analysis, likely resulting in an overstated net impact

Figure 1: Basic Claims Impact: 1% Sustained CPI Increase

Description	2026/27	2027/28	2028/29	2029/30	2030/31
Real Return Bonds Impact	550.3	1,341.8	2,117.6	2,884.8	3,657.3
Basic Claims Liabilities Impact	14,566	14,988.7	15,735.3	16,639.7	17,380.8
Net Impact	**(14,015.8)**	**(13,646.9)**	**(13,617.7)**	**(13,754.9)**	**(13,723.5)**

b) The weight of Real Return Bonds declines over the forecast period because the financial model assumes no future purchases of these assets. Although the portfolio's value increases slightly through asset accretion, growth in other asset classes is stronger, resulting in a lower overall portfolio allocation to Real Return Bonds over time.

c) Confirmed. Inflation sensitivity is being considered as part of the broader risk appetite, ALM and asset mix review. The analysis considers the interaction between MPI's liabilities, inflation-related risks, capital considerations and rate stability objectives, including the potential role that inflation-sensitive assets and strategies may play within the portfolio. Consistent with the risk appetite discussions presented at the Technical Conference, the objective is not necessarily to eliminate inflation exposure, but rather to understand and manage inflation-related risks within a framework that supports stable premiums, capital strength and long-term sustainability.

PUB (MPI) 1-89

Part and Chapter:	Part IX - INV Appendix 5 Shadow Portfolio Returns	**Page No.:**	7
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)		
Topic:	Investment Performance		
Sub Topic:	Actual Returns Versus Passive Policy and Shadow Portfolios		

Preamble to IR (If Any):

Appendix 5 reports the Basic portfolio returned 1.62% in 2025/26 against a passive policy weight return of 1.94%.

The EFB portfolio returned 9.989% against 12.33% with the J curve adjustment.

The unconstrained Basic shadow portfolio (P2) returned 8.02%, and the EFB shadow portfolios returned 8.82% (P3) and 7.14% (P4).

Question:

a) Please explain the sources of the difference between actual returns and the passive policy weight returns for the Basic and EFB portfolios, separately identifying, active positioning and timing effects.

b) Please provide the same comparison of actual versus passive policy returns for each of the last five fiscal years.

c) Please explain the J-curve effect and how it influences the benchmark returns.

d) Please describe how the shadow portfolio results, including the unconstrained P2 return of 8.02% against the Basic passive return of 1.94%, are being used in the pending risk appetite and asset mix work.

Rationale for Question:

To understand actual returns relative to the passive policy benchmarks.

RESPONSE:

a) Please refer to *Appendix 1 - Actual vs Policy Returns* that provides the sources of the difference between actual returns and the passive policy weights for the Basic and EFB portfolios for FY 2025/26.

For the Basic Claims and EFB portfolios, timing effects were the main source of the differences between actual and passive policy returns for FY 2025/26.

b) Please refer to ***Appendix 1 - Actual vs Policy Returns*** that provides the sources of the difference between actual returns and the passive policy weights for the Basic Claims and EFB portfolios for the last five fiscal years ending at March 31, 2026.

For the Basic Claims portfolio, timing effects were the main source of the difference between actual and passive policy returns in 2021/22, 2022/23 and 2024/25, while active positioning was the main source in 2023/24.
For the EFB portfolio, active positioning was the main source of the difference in 2021/22 and 2022/23 while timing effects were the main source in 2023/24 and 2024/25.

c) The J-curve is a representation of investment returns over time that follows the shape of the letter “J.” The J-Curve shows an initial period where returns are negative and followed by positive returns from an investors point of view. This pattern is a fundamental concept in private fund management. In the first period, also known as the capital call period, investors typically experienced negative returns, as the fund manager draws down the committed capital. Early negative returns arise from fees, expenses and the fact that investments have not yet had time to generate gains. The second period is the stage where positive returns start to be fully realized, as the committed capital starts to be fully invested.

For the EFB Passive Policy Portfolio, the J-Curve adjustment was exclusively applied to the private debt-long asset class for the first 12 months since the inception period (March 2019-February 2020), due to the expectation that after that initial period the asset class’s investment commitments would have been fully called.

After February 2020, the effective IPS benchmark returns were applied for that asset class, and, therefore, the J-Curve adjustment did not have any impact on the effective

benchmark returns applied to benchmark that portfolio. The impact of the J-Curve adjustment was to reduce the benchmark returns within the EFB Passive Policy Portfolio in the initial annual period (March 2019-February 2020) relative to the effective benchmark returns that would have been applied for that period otherwise.

By June 2020, the commitment to the long-duration fund within the EFB portfolio was fully funded.

For the last five fiscal years ending at March 2026, no J-Curve adjustment was applied to the benchmark returns for that asset class within the EFB portfolio.

d) Shadow portfolios are analytical tools used to evaluate the potential implications of alternative portfolio structures. They are not investment recommendations. Results from shadow portfolios are considered alongside downside risk measures, capital adequacy impacts, recovery characteristics, liquidity requirements, implementation feasibility and governance considerations. Their primary purpose is to help MPI understand the trade-offs associated with different levels of risk and return within the broader ALM and risk appetite framework.

PUB (MPI) 1-90

Part and Chapter:	Part IX - FFI Section FFI.12 Figure FFI-4	**Page No.:**	51
PUB Approved Issue No:	4. Financial forecast (d) Investment income forecast and (e) Interest rate forecast		
Topic:	Investment Income Forecast		
Sub Topic:	Real Estate Return Assumption in the Model Versus the New Money Yield		

Preamble to IR (If Any):

Section FFI.12 applies two different return assumptions to the same real estate portfolio. The financial model uses 5.90%, based on WTW's capital market assumptions. The New Money Yield uses 3.74%, based on the MSCI/REALPAC Canada Property Index. The higher figure increases forecast investment income and the lower figure reduces the New Money Yield used in the rate indication.

The real estate yield basis was previously addressed in PUB (MPI) 2-3 and PUB (MPI) 2-25 (2026 GRA).

Question:

a) Please explain why different real estate return assumptions are appropriate for the financial model and for the New Money Yield calculation.
b) Please quantify the impact on the rate indication of using 5.90% in the New Money Yield calculation, and the impact on forecast Basic investment income of using 3.74% in the financial model.
c) Please state which figure MPI considers its best estimate of the expected return on the real estate portfolio.

Rationale for Question:

To understand the real estate return assumptions.

RESPONSE:

a) The two assumptions are used for two different purposes. The New Money Yield is used for ratemaking and reflects the Investment Committee approved primary asset

benchmark, which is the MSCI Quarterly Property Fund Index, as the return assumption. The 3.74% assumption reflects the benchmark's annualized return over the most recent 10 years of quarterly data. Consistent with the purpose of the NMY methodology, this approach is based on historical benchmark experience and does not incorporate a forecast of future market conditions. In contrast, the 5.90% assumption used in the FFI is based on WTW's forward-looking capital market assumptions, which incorporate current market conditions and long-term expectations for the real estate asset class. The financial forecast is intended to estimate future investment income and therefore relies on forward-looking assumptions.

b) *Figure 1* presents the revised New Money Yield Calculation using a 5.90% projected return for the real estate portfolio. This change increases the new money yield after fees by 22 bps from 4.48% to 4.70%. These sensitivities are provided for illustrative purposes only and do not imply that the assumptions are interchangeable, as the New Money Yield and financial forecast calculations serve different purposes and are based on different methodologies.

Figure 1 – New Money Yield calculation as at March 31st using 5.90% return for Real Estate

Asset Class	IPS Target Weights	Relative Weights	Mar 31 Yield	Mar 31 Duration
Provincial Bonds	35%	35%	4.49%	11.93
Real Return Bonds	4%	4%	3.94%	10.7
Corporate Bonds	28%	28%	5.42%	10.92
MUSH Bonds	18%	18%	4.28%	4.29
Real Estate	10%	10%	5.90%	n/a
Commercial Mortgages	5%	5%	5.02%	2.27
Total	**100%**	**100%**	4.86%	**8.55**
Investment Management Fees			0.16%	
Yield After Fees			4.70%	

All other assumptions held equal, this New Money Yield results in a 0.41% decrease in the indicated rate change, from 2.38% to 1.97%.

Figure 2 For illustrative purposes, Figure 2 shows the impact on forecast Basic investment income of substituting the 3.74% benchmark-based return assumption for the 5.90% forward-looking return assumption used in the financial forecast. This assumption change would reduce the investment income by an average of approximately $8.8 million per year over the next five years.

Figure 2 – Basic Line of Business Investment Income: 5.90% vs. 3.74% Real Estate Return Impact

Basic LOB Investment Income ($000s)	**2026/27**	**2027/28**	**2028/29**	**2029/30**	**2030/31**
5.90% Real Estate Return	135,424	145,385	157,767	170,470	184,630
3.74% Real Estate Return	128,301	137,267	149,051	160,841	174,005
Impact	**-7,123**	**-8,118**	**-8,716**	**-9,629**	**-10,625**

c) The two figures are developed under different methodologies and MPI does not consider them directly interchangeable. For purposes of forecasting future investment income, MPI uses the 5.90% forward-looking assumption. For purposes of the New Money Yield calculation, MPI uses the 3.74% benchmark-based assumption. MPI considers each assumption appropriate within its respective framework.

PUB (MPI) 1-91

Part and Chapter:	Part IX - Investments, Section H.5 Part IX - FFI, Figures FFI-7, FFI-8 Figure RI-1 (Ratemaking)	**Page No.:**	10-11
PUB Approved Issue No:	4. Financial forecast (e) Interest rate forecast		
Topic:	Interest Rate Forecast		
Sub Topic:	New Money Yield Calculation and Reconciliation to FFI Yields		

Preamble to IR (If Any):

Section H.5 describes the construction of the claims portfolio yields in narrative form only, with no figures, weightings or calculations. The filing requirement asks for detailed calculations including assumed weightings, and reconciliation was required through the IR process in the 2026 GRA.

The yields also require reconciliation to the FFI chapter, where forecast corporate bond yields are 5.38% and 5.46% against a current weighted average of 4.58%, and the New Money Yield uses a real estate yield of 3.74% against 5.90% in the financial model.

Question:

a) Please provide the New Money Yield calculation in the form of Figure RI-1, showing for each asset class the target weight, yield, duration and source, as at March 31, 2026.
b) Please reconcile each asset class yield in the New Money Yield calculation with the corresponding yield in the FFI chapter, explaining any differences.
c) Please provide the same calculation updated to June 30, 2026, and undertake to provide the August 31, 2026 version with the October update.

Rationale for Question:

To understand the New Money Yield calculation.

RESPONSE:

a) The claims liabilities duration for the Basic Claims portfolio as of March 31, 2026, was 8.64. *Figure 1* below shows the calculation of the New Money Yield using the claims duration of 8.64 for Government, Corporate and Real Return Bonds.

Figure 1- New Money Yield Calculation Using Claims Duration as of March 31, 2026 (Claims Duration = 8.64)

Asset Class	Benchmark	IPS Target Weights	Relative Weights	Yield	Duration
Provincial Bonds	20% FTSE Mid-Term Provincial Bond Index / 80% FTSE Long-Term Provincial Bond Index	35%	35%	4.08%	8.64
Real Return Bonds	100% FTSE Canada Real Return Bond Index	4%	4%	3.94%	8.64
Corporate Bonds	25% FTSE Mid-Term Corporate Bond Index & 75% FTSE Long-Term Corporate Bond Index	28%	28%	5.01%	8.64
MUSH Bonds	YTM of MUSH Portfolio (Mar 2026)	18%	18%	4.28%	4.29
Real Estate	10YR QPF Index Rolling Average (December 2025)	10%	10%	3.74%	n/a
Commercial Mortgages	TDAM Commercial Mortgages Yield (March 2026)	5%	5%	5.02%	2.27
Total		**100%**	**100%**	4.38%	**6.67**
Investment Management Fees				0.16%	
Yield After Fees				4.22%	

b) Please see *Figure 2* below:

Figure 2 – Figure 1 vs. FFI Chapter – Yield

Asset Class	Figure 1 - Yield	FFI Chapter
Provincial Bonds	4.08%	4.49%
Real Return Bonds	3.94%	3.94%
Corporate Bonds	5.01%	5.38%
MUSH Bonds	4.28%	4.28%
Real Estate	3.74%	5.90%
Commercial Mortgages	5.02%	5.02%

Figure 2 compares the yields produced by the New Money Yield calculation shown in *Figure 1* with the corresponding yields presented in the FFI chapter. As shown in *Figure 2*, differences are observed for Provincial Bonds, Corporate Bonds, and Real Estate.

The yields for Provincial Bonds and Corporate Bonds are lower than those in the FFI chapter because the claims liability duration as of March 31 was shorter than the actual asset duration used in the financial forecast model. Since spreads are higher for longer-duration bonds, the spreads added to Government bond yields using the actual asset durations were higher than those based on the claims liability duration. As a result, the Government and Corporate bond yields calculated using the asset durations were higher than those produced by the New Money Yield methodology.

For Real Estate, the New Money Yield calculation uses MPI's real estate benchmark return of 3.74%, based on the MSCI Quarterly Property Fund Index. In contrast, the financial forecast model uses a projected return of 5.90% derived from WTW's capital market assumptions. This difference reflects the use of WTW's forward-looking return expectations in the financial forecast model, compared with the historical benchmark return used in the New Money Yield calculation.

There is also a minor variance between the Corporate Bond yield used in the FFI Chapter (5.38%) and the yield used in the New Money Yield calculation (5.42%). This variance reflects a minor difference between the portfolio duration reported internally, which was used in the New Money Yield calculation, and the duration reported by MPI's corporate bond manager, Addenda, which was used in the FFI Chapter. Going forward, MPI will use Addenda's reported duration as the source for both calculations to ensure consistency. The total impact on the NMY as a result of this discrepancy is .01%.

c) The claims liabilities duration for the Basic Claims portfolio as of June 30, 2026, was 7.67. ***Figure 3*** below shows the calculation of the New Money Yield using the claims duration of 7.67 for Government, Corporate and Real Return Bonds. The August 31, 2026 New Money Yield will be provided when available.

Figure 3- New Money Yield Using Claims Duration as of June 30, 2026 (Claims Duration = 7.67)

Asset Class	Benchmark	IPS Target Weights	Relative Weights	Yield	Duration
Provincial Bonds	20% FTSE Mid-Term Provincial Bond Index / 80% FTSE Long-Term Provincial Bond Index	35%	35%	3.84%	7.67
Real Return Bonds	100% FTSE Canada Real Return Bond Index	4%	4%	3.84%	7.67
Corporate Bonds	25% FTSE Mid-Term Corporate Bond Index & 75% FTSE Long-Term Corporate Bond Index	28%	28%	4.71%	7.67
MUSH Bonds	YTM of MUSH Portfolio (Mar 2026)	18%	18%	4.11%	4.30
Real Estate	10YR QPF Index Rolling Average (December 2025)	10%	10%	3.74%	n/a
Commercial Mortgages	TDAM Commercial Mortgages Yield (March 2026)	5%	5%	4.96%	2.19
Total		**100%**	**100%**	4.18%	**6.02**
Investment Management Fees				0.16%	
Yield After Fees				4.02%	

PUB (MPI) 1-92

Part and Chapter:	Part IX - Investments INV Appendices 1, 6, 7, 8, 10 PUB (MPI) 2-39 (2026 GRA)	**Page No.:**	
PUB Approved Issue No:	8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)		
Topic:	Investment Performance		
Sub Topic:	Performance Report Updates and Investment Policies Manual Changes		

Preamble to IR (If Any):

Appendices 6, 7 and 8 report performance to March 31, 2026, and MPI confirmed in PUB (MPI) 2-39 (2026 GRA) that reports are produced quarterly. Appendix 1, the Investment Policies Manual approved April 1, 2026, is filed in redacted form with no summary of changes from the prior Investment Policy Statement.

Question:

a) Please explain the basis for the redactions in Appendix 1.

b) Please provide a summary or blackline of the changes in the Investment Policies Manual approved April 1, 2026 relative to the prior Investment Policy Statement, including any changes to permitted investments, target weights or benchmarks.

c) Please provide the holdings of each portfolio relative to the policy targets at June 30, 2026.

d) Please provide the status of MPI's actions on the areas identified in the Investment Management Audit filed in PUB (MPI) 2-31 (2026 GRA).

e) Please file the June 30, 2026 quarterly performance reports for the Basic Claims, RSR and EFB portfolios when available, and any Risk and Investment Analytic Report prepared since March 31, 2026.

f) Please identify who oversees WTW's performance and the required reporting.

Rationale for Question:

To understand Investment Portfolio Management.

RESPONSE:

a) MPI is seeking confidential treatment of the personal information contained in Part X INV Appendix 1, pursuant to the PUB Rules of Practice and Procedure. The rationale for the redaction is included in the confidential tracker, electronically attached to the 2027 GRA e-book.

b) A redline version of the Investment Policies Manual is included in *Appendix 1 - Confidential*.

c) Holdings relative to target weights as of June 30th are shown in *Appendix 2*.

d) The following is an update to the observations identified in the Investment Management Audit:

- **OBS #1 - IPS Change Communication:** The revised Investment Policy Manual is shared with all external managers after each review.
- **OBS #2 - Investment Manager Compliance Certificates:** This observation was relevant when MPI's assets were managed through segregated accounts. MPI now invests through pooled funds, with compliance assessed against each fund's investment mandate. The compliance certificates provided by investment managers reflect adherence to the specific mandates of their respective funds.
- **OBS #3 - Investment Manager Reporting to Investment Committee:** The Investment Committee have not asked external managers to report independently to the Investment Committee.

- **OBS #4 - Spreadsheet Controls:** The model is saved on SharePoint, which ensures limited access, version control, back-up and archiving. The Manager of Forecasting, who is responsible for the Financial Model, has been advised of these recommendations.

e) MPI has provided the available investment performance and analytical information through to March 31, 2026. As of the date of this response, the June 30, 2026 quarterly performance reports for the Basic Claims, RSR and EFB portfolios have not been finalized and are not available for filing.

MPI will file the June 30, 2026 quarterly performance reports, together with any Risk and Investment Analytic Reports prepared subsequent to March 31, 2026, once they have been finalized, reviewed, and approved for release.

f) WTW's performance, as well as any reporting that is required from the OCIO, is monitored by the MPI internal Investment team and, when appropriate, MPI senior management.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Corporate Policy

INVESTMENT POLICIES MANUAL			
Policy No.	CP.6	**Policy Owner**	Manager, Investments~~ALM & Investment Management~~
Date of Last Review	~~June 18, 2025~~January 21, 2026	**Approval Date**	~~August 13, 2025~~March 17, 2026
Effective Date	~~November 1, 2025~~April 1, 2026	**Approver**	Board of Directors
Additional information about this policy: This is a corporate policy with a corporate-wide impact on Manitoba Public Insurance through the activities of the Investment Committee and the employees involved in investment decisions.			

1. Policy Statement

Manitoba Public Insurance ("MPI" or "Corporation") is committed to making investment decisions and conducting all investment-related procedures and practices in accordance with all applicable laws, regulations, investment principles and standards. The policies in this manual define the approach to managing the Corporation's investment portfolios in compliance with this commitment.

2. Background

Manitoba Public Insurance follows various legislative requirements, investment principles, and standards when making investment decisions to ensure compliance with The MPIC Act, The Financial Administration Act and other applicable laws and regulations.

This manual of assembled investment policies articulates MPI's approach to complying with the applicable statutes and regulatory standards related to corporate investment processes and practices. It assists the Corporation in grouping the various investment-related policies, principles, and guidelines into a single policy artefact for ease of administration, reporting, and audit purposes.

3. Policy Objective

The objective of this policy manual is to ensure that MPI's investments are managed in accordance with all applicable legislative requirements, investment principles, and ethical standards. The application of these policies should promote transparency and

accountability and ensure efficient decision making that adheres with all compliance requirements.

4. Scope

The policies embedded in this manual apply to all members of MPI's Board, Investment Committee, Investment Committee Working Group (ICWG), MPI employees involved in the administration of the Corporation's investment decisions, the MPI External Investment Consultant as well as all external investment managers. These policies include: (1) Investment Policy Statement, (2) Operational Asset Liability Management Policy, (3) Rebalancing Policy, (4) Active Manager Monitoring Policy, and (5) Trading Approval Policy .

5. Definitions

The meaning and intent of specific technical terms are as defined and applied within the Schedule of Policies section of this policy document. Most of the terms are defined as follows:

"alternative asset classes": There are three primary asset classes: equities, bonds, and cash. Alternative asset classes refer to any other types of investments or collections of investment strategies that can be used to diversify investment portfolios. These investment strategies are generally aimed to provide meaningful growth, low correlation with equity markets and lower volatility ~~with~~ than equity markets. Some examples of alternative investments include: hedge funds, private equity, private debt, currencies, commodities, infrastructure and real estate.

"credit spread risk" is the possibility of losses due to changes in credit spreads (i.e., credit widening and credit tightening).

"credit spread hedge ratio" is defined as follows:

$$\frac{Duration_{Corporate}\ x\ Market\ Value_{Corporate} + Duration_{Mortgages}\ x\ Market\ Value_{Mortgages}}{Duration_{Liabilities}\ x\ Market\ Value_{Liabilities}\ x\ (Weight_{Corporate} + Weight_{Mortgages})}$$

Where $Weight_{Corporate}$ and $Weight_{Mortgages}$ are the target weights in the liability discount curve, i.e., the target weights in MPI's Investment Policy Statement divided by 90% to adjust for the 10% allocation to Real Estate.

"**duration"** is the weighted average time until the repayment of a fixed income instrument. In addition, it is also used to measure the price sensitivity of those instruments to changes in bond yields.

"dollar duration" is the product of duration and market value. Dollar duration is a measure of the sensitivity of the market value of fixed income assets and liabilities to changes in interest rates.

"fixed-income securities" are investments that provide a return in the form of fixed periodic payments (coupon payments) and the return of the principal at maturity. Unlike

a variable-income security, the payment amounts and dates of a fixed-income security are known in advance.

"interest rate hedge ratio" is calculated by dividing the dollar duration of the fixed income assets by the dollar duration of the liabilities. Aiming for an interest rate hedge ratio of 100% between fixed income assets and liabilities helps minimize the dollar sensitivity of the surplus to interest rate fluctuations.

"interest rate risk" is the risk of economic loss resulting from market changes in interest rates and the impact on interest rate sensitive assets and liabilities.

"investment counsel" are appointed by the Province of Manitoba to invest certain funds of the Corporation in accordance with and subject to the terms of an agreement with the Provincial government.

"MUSH Bonds" are Manitoba rural municipality, university, school divisions and health-care facility bonds which are not tradable in the fixed income market and are managed by the Department of Finance at the Province of Manitoba.

"private market asset" classes include real estate, infrastructure, commercial mortgages, private debt and private equity. Assets traded in private asset markets are often illiquid.

"public market asset" classes include government bonds, corporate bonds, Canadian equities and global equities. Public markets are known for their accessibility and liquidity.

"risk" can be defined as the uncertainty of future outcomes. In a portfolio context, there is unsystematic risk which diversification can help to mitigate and systematic risk which cannot be eliminated. Systematic risk is essentially the risk inherent in securities markets. The minimum acceptable level of risk for the Corporation occurs when its assets have been sufficiently diversified so as to reduce the impact of unsystematic risk. Systematic risk may be controlled by investing in authorized asset classes and through the use of hedging strategies.

"total return" includes both the change in the price of a financial asset, over a set period of time, as well as any income or dividends paid by the asset. In a portfolio context, total return represents the weighted average of each asset's total return, based on its proportion in the portfolio. This captures the combined effect of price changes and income across all holdings. ~~it is the weighted average of the change in price and any income or dividends paid by of the various asset classes~~.

6. Guiding Principles and Policy Requirements

The guiding principles and applicable requirements of the constituent policies of this manual are as described within the respective policies. For quick access to individual policies, please click the links below.

- Investment Policy Statement
- Operational Asset Liability Management Policy
- Rebalancing Policy

- Active Manager Monitoring Policy
- Trading Approval Policy

7. Roles and Responsibilities

Roles and responsibilities associated with the implementation of this policy manual are as defined within the constituent policies set out in the Schedule of Policies section of this document.

8. Related Documents

- Investment Committee Terms of Reference
- P.13 Code of Ethics and Business Conduct
- The Manitoba Public Insurance Corporation Act
- The Financial Administration Act

9. Exceptions to this Policy

Unless expressly provided within each of the constituent policies, there are no exceptions to this policy manual.

10. Owner/Inquiries

The owner of this policy is the Manager, Investments ~~ALM & Investment Management~~, who is responsible for enforcing and updating this policy manual or any of its constituent policies as may be required.

11. Transitions Provisions

No transition provisions are applicable as the policies within this manual become in force as of the effective date.

12. Periodic Review

Unless as specifically stated within each of the constituent policies of this manual, the Manager, Investments ~~ALM & Investment Management~~, will review and revise this policy manual annually and as required to ensure alignment with applicable organizational changes and regulatory developments.

Document Version Control

Version	Date	Summary of Changes	Author
1.0	March, 2024	Earlier version	
2.1	December, 2024	Annual review of policy with changes including: • benchmarks revised as follows: ○ Name of real estate benchmark updated. ○ Infrastructure benchmark changed to a blend of (BEIR +4%) + DJBGINAT. ○ Weights used in the blended benchmark for MUSH bonds & corporate bonds in Basic Claims adjusted. ○ Benchmark for Provincial bonds in SRE shortened. ○ Total min/max for each asset class adjusted so each asset class cannot simultaneously be at the min or max. • adapting to a new policy template. • updating titles.	Enes Jeina
2.2	June, 2025	IPS Section 5 – "Liability Characteristics" and Section 6 – "Investment Objectives" were revised to make them more clear. IPS Section 8.1 - revised the minimum weights for each asset class in the Basic Claims portfolio. The following changes were made to include the credit spread hedge ratio: • Section 5 of the Corporate Policy: Added definitions of credit spread risk and credit spread hedge ratio.	[redacted]

		• IPS Section 6.7: Replaced reference to section 9.4 with The Operational ALM Policy with regards to hedge ratios. • IPS Section 9.4: Removed the description of the hedge ratio and replaced with a reference to the Operational ALM Policy for more information. • Added references to credit spread risk/credit spread hedge ratio in these sections of the Investment Policy Statement: ○ 1.1 ○ 5.1.1 ○ 6.3 ○ 6.4 ○ 6.7 ○ 6.8 ○ 6.9.1 ○ 9.4 ○ 11.5 The Operational ALM Policy was revised to include a strategy for managing credit spread risk in the Basic Claims portfolio: 1. General housekeeping changes, including but not limited to date changes and grammatical edits. 2. Updated Section I and Section VI and added Section IV to include the strategy for managing credit spread risk in Basic Claims	

2.3	November 2025	Update for the Non Discretionary OCIO~~Hybrid Model~~	[redacted]
2.4	December 2025	Annual Review of policy	[redacted]

Part 4 – Active Manager Monitoring Policy 292928
Part 5 – Trading Approval Policy 343433

Part 1 – Investment Policy Statement

I. Statement of Investment Beliefs

The Investment Committee and ICWG believe that:

1.1 For assets backing claims liabilities the most important measure of risk is surplus volatility (i.e.: the difference in the value of the assets and liabilities) rather than volatility of the market value of the assets alone. A liability sensitive approach to investing reduces the Fund's interest rate risk and credit spread risk by matching the size and duration of the Corporation's liabilities with fixed income securities.

1.2 For assets not backing claims liabilities the most important measure of risk is the volatility of the market value of the asset.

1.3 Asset allocation is an important factor in achieving the investment objective of each portfolio.

1.4 Market timing at the ~~strategic~~ tactical asset allocation level is generally not an effective strategy for consistently increasing returns.

1.5 Identifying, measuring, and monitoring risks within the portfolio is important.

1.6 Passive management is used, when appropriate, to reduce active management risk and cost.

1.7 Over the long-term, equities are expected to provide a return premium over bonds, with higher expected volatility. A meaningful allocation to foreign equities will increase portfolio diversification and thereby decrease portfolio risk while, at the same time, providing the potential for enhanced long-term returns.

1.8 Private debt benefits the Corporation by enhancing and diversifying the return of the Fund's investment portfolio without degrading the quality.

1.9 Alternative asset classes such as real estate and infrastructure provide income and potential capital growth and are suited to partially offset inflation sensitive liabilities.

II. Overview

2.1 This Investment Policy Statement ("the Statement") applies to the assets held in the Fund in respect of the liabilities of the Manitoba Public Insurance Corporation ("the Corporation") under the Manitoba Public Insurance Corporation Act ("the Act"). The Statement contains investment objectives, investment guidelines, and monitoring procedures.

2.2 The Fund will be managed in accordance with all applicable legal requirements notwithstanding any indication to the contrary which might be construed from the

Statement. The purpose of the Fund is to pay the liabilities of the Corporation as they come due and to provide investment income from interest, dividends and capital gains that will assist in minimizing premiums payable by policyholders.

2.3 With respect to any portion of the Fund invested in pooled funds, provisions of the Investment Policy Statement of such pooled fund shall prevail over those of the Statement to the extent that they are in conflict.

2.4 Any investment counsel or other agent or advisor providing services in connection with the investment of the Fund shall accept and adhere to this Statement.

2.5 The Corporation is a Manitoba Crown Corporation and is not subject to provincial or federal income taxes but could be subject to withholding taxes in foreign jurisdictions.

III. Responsibilities

3.1 Section 12 of the MPIC Act requires the Corporation to pay to the Minister of Finance (the "Minister") the investment assets of the Corporation (the "Fund"), which assets the Minister then invests in accordance with The Financial Administration Act (the "Act"). It is understood that the Minister recognizes the unique investment goals of the Corporation and desires a close and cooperative working relationship between the Department of Finance (the "Department") and the Corporation to ensure that the investment strategies and policies of the Fund address their respective needs and objectives.

The Minister has charged the Province of Manitoba's Department of Finance – Treasury Division (the "Department") with the operational management of the Fund. Duties include establishing legal contracts with investment counsel, providing the Corporation with short-term cash and treasury management services, managing portions of the fixed income portfolio, and participating in the ICWG.

Any investment counsel, advisors or custodians that may be required to advise on the Corporation's investments will be engaged on a basis satisfactory to the Minister where applicable, subject to authorization by the Lieutenant Governor in Council.

In accordance with the Section 12 and 18 of the Act, The Minister of Finance is responsible for the investments of the Corporation. Specifically, the Act provides:

> **INVESTMENTS**
> 12(1) The corporation shall pay to the minister charged with the administration of The Financial Administration Act, for investment for the corporation, moneys in any reserve established under section 18 and such additional moneys as are not immediately required for the purposes of the corporation and are available for investment.

MONEYS TO BE CREDITED TO CORPORATION
12(2) Moneys paid under subsection (1) for investment shall form part of the trust and special division of the Consolidated Fund and may be invested in accordance with The Financial Administration Act, and the interest earnings thereon shall be credited to the account of the corporation in the trust and special division of the Consolidated Fund.

PAYMENT OF EARNINGS
12(3) Any earnings, whether alone or with the principal sum invested for the corporation under this section, or any part thereof, shall be paid over to the corporation by the minister charged with the administration of The Financial Administration Act on the request of the corporation."

RESERVES
18(2) The corporation must establish and maintain a reserve sufficient to pay future claims-related expenses associated with incurred claims under that line of insurance.

Investment counsels, advisers and custodians may be hired by the Minister of Finance subject to authorization by the Lieutenant Governor in Council under The Executive Government Organization Act, Section 16 and 16(d) as follows:

AGREEMENTS WITH OTHER AUTHORITIES
16 The Lieutenant Governor in Council may authorize a minister, for and on behalf of the government, or an agency of the government, to enter into an agreement with

(d) any person or group of persons; for the benefit or purposes of the residents of Manitoba or any part thereof.

3.2 The Act and the Minister establishes the role of the Department as:

3.2.1 managing the investment of the Fund and implementing investment direction and decisions consistent with approved investment policies and strategies.

3.2.2 through participation on the ICWG, developing proposed investment policies and strategies for the Fund for recommendation to the Committee; and

3.2.3 appointing a minimum of three (3) individuals as representatives of the ICWG.

3.3 The Board of Directors of MPI approve the retention and termination of investment managers and policies recommended by the Investment Committee

3.4 The purpose of the Investment Committee ("the Committee"), as appointed by the Board of Directors of the Corporation ("the Board") shall be to assist the Board in:

a) Recommending investment policies to the Board for approval;

b) reviewing matters relating to investment activities of the Fund;

c) providing oversight and monitoring performance of the Fund;

d) monitoring the implementation of investment decisions consistent with investment policies and strategies approved by the Board;

~~e) providing suggestions for consideration by the ICWG; and~~

~~f)~~e) approving the retention and termination of investment managers.

3.5 The ICWG is a joint committee of the Department and the Corporation. The role of the ICWG is to:

a) ~~-~~function as liaison between the Department and the Committee;

b) review strategies for investment exposure for consideration by the Department and the Committee;

c) make recommendations to the Committee respecting the retention and termination of investment managers;

d) monitor the performance of investment managers;

e) ~~review draft~~ approve investment policies and annual strategies for the Fund for review by ~~the Department and~~ the Committee

f) monitor investment policies and direction;

g) receive regular reports from MPI's External Investment Consultant and Internal Investment Team and

h) annually review the risk, return and diversification of all asset classes in the Fund as prepared by the External Investment Consultant and Internal Investment Team, and report the results to the Investment Committee.

3.6 Quorum for the ICWG is

- one of the Vice-President & Chief Financial Officer or the Vice-President, Chief Actuary of the Corporation; and
- one of the Assistant Deputy Minister of the Department of Finance or their respective designate.

3.7 MPI's Internal Investment Team

3.7.1 Monitors the outside investment counsel for compliance with the Statement and compliance with the Investment Policy Statement for their fund,

3.7.2 Monitors the External Investment Consultant to ensure all work is completed on a timely basis.~~,~~

3.7.3 Supports the External Investment Consultant to ensure the investment objectives and risk appetite are met; and
~~Supports the External Investment Consultant to ensure the investment objectives and risk appetite are met; and~~

3.7.4 Develops and maintains relationships with members of the investment community and other provincial Crown insurance companies.

3.8 MPI's External Investment Consultant

3.8.1 Completes quarterly reviews of the risk, return and diversification of all asset classes and managers in the Fund, and reports the results to the ICWG and the Investment Committee.

3.8.2 Proposes terminations and appointments of new investment managers.

3.8.3 Reviews investment objectives and risk appetite and proposes changes to investment mix as appropriate; and

3.8.4 Provides research and analysis as requested by the ICWG and IC.

IV. Conflict of Interest

4.1 Corporate Directive P.13 shall be followed by all individuals involved in the Corporation's investments. As per the policy:

4.2 "Individuals shall not have a financial interest which would conflict in any manner with the discharge of their duties. Individuals who have a financial interest in an outside business, or who can gain financially through their association with an outside business, must immediately disclose this relationship to the General Counsel and Corporate Secretary where the business intends or proposes to do business with Manitoba Public Insurance, or if the business enters into a contract with Manitoba Public Insurance."

4.3 A conflict of interest, whether actual, potential or perceived, is defined for the purposes of this Statement as any event in which the Corporation, an employee of the Corporation, an employee of the Department performing duties on behalf of the Corporation, any member of the Board or the Committee, any investment counsel or delegate, the Custodian, or any person or company directly related to any of the

foregoing, may benefit materially from knowledge of, participation in, or by virtue of, an investment decision or holding of the Fund.

4.4 The Code of Ethics and The Standards of Professional Conduct adopted by the CFA Institute shall be applied to each investment counsel.

4.5 A fiduciary, according to the CFA Institute, is one who holds a position of trust or confidence. A conflict of interest is deemed to exist when a fiduciary has an interest of sufficient substance and proximity to its duties and powers with respect to the Fund to impair its ability to render unbiased advice or to make unbiased decisions affecting the Fund.

4.6 A fiduciary, as described in section 4.5, must immediately disclose any conflict of interest in writing along with all relevant details to the chairperson of the Committee who, in turn, discloses it to all Committee members at the appropriate time.

4.7 No part of the Fund shall be loaned to any member of the Board, the Committee, an employee of the Department performing duties on behalf of the Corporation, or employee of the Corporation or any legal entity owned or controlled by any of the aforementioned. In addition, the Fund may not enter into a transaction with a related party unless:

a) The transaction is required for the operation or administration of the Fund and the terms and conditions of the transaction are not less favourable to the Fund than market terms and conditions; or

b) The securities of the related party are acquired through a public exchange, with the exception of MUSH bonds as noted in section 7.3.

Related party includes any officer, director, or employee of the Corporation. It also includes the investment counsels and their employees, a union representing employees of the Corporation, a spouse or child of the persons named previously, or a corporation that is directly or indirectly controlled by the persons named previously, among others.

V. Liability and Retained Earnings Characteristics

5.1 Each of the Corporation's five investment portfolios back liabilities, retained earnings or a combination of both. The Corporation's liabilities include both short-term and long-term liabilities arising from its insurance business as well as employee future benefits liabilities. In its insurance business, short-term liabilities are a result of all perils coverage and minor injury claims, which have a short time frame between claim reporting and claim settlement while long-term liabilities are a result of both the Personal Injury Protection Plan (PIPP) coverage and tort coverage. The long-

term nature of PIPP coverage arises mainly from lifetime benefits payable to eligible claimants. Tort coverage has a long-term nature mainly due to long settlement periods, which is a result of the more complicated nature of these claims. The following is a description of liabilities and retained earnings by business line:

5.1.1 **Basic Claims Portfolio** supports the liabilities associated with claims covered under the universal compulsory automobile insurance for Manitoba drivers and vehicle owners. These obligations include a mix of long-term payments for PIPP coverages and short-term payments for physical damage repairs. The tort component (Third Party Liability – Bodily Injury and Property Damage) is minimal compared to the other coverages. Some of the PIPP coverages are indexed to the Manitoba Consumer Price Index (CPI). Claim liability estimates are influence by various risks including mortality, inflation, discount rate, technological improvements, and societal/legal/regulatory factors. These liabilities comprise the largest portion of the corporation's Liability for Incurred Claims. Most of these liabilities are long-term in nature and are subject to significant interest rate risk and credit spread risk; short-term liabilities represent approximately 10% of the total and require a high level of liquidity to pay claims.

5.1.2 **Rate Stabilization Reserve Portfolio** consists of Basic investment assets that exceed the Basic liabilities for incurred claims. These assets do not have direct associated liabilities but can be used to cover liabilities in case of unfavourable Basic claims experience. The purpose of these assets is to protect motorists from rate increases that would otherwise have been required due to unexpected deviations from forecasted results or losses from non-recurring events.

5.1.3 **Extension Portfolio** consists of assets backing the liabilities and retained earnings of the Extension line of business. This line includes optional products and coverages that Manitobans can elect to add to their compulsory auto insurance. The claims liabilities are primarily short-term, as the largest product being the all-perils deductible buy-down. However, there are some long-tail liabilities from the tort product arising from the Third- Party Liability Extension product. These liabilities are subject to low interest rate and inflation risk.

5.1.4 **Special Risk Extension Portfolio** consists of assets that support liabilities and retained earnings of the SRE line of business. This competitive line of business focuses on insuring the trucking industry. The liabilities are primarily short term due to physical damage claims, but there are some long-term liabilities from the Third-Party Liability coverage, especially for policies with USA exposure. These liabilities are subject to low interest rate and inflation risk. There is societal/legal risk and currency risk due to USA exposure.

5.1.5 **Employee Future Benefit Portfolio** consists of assets that support the accrued employee pension, post-retirement and severance benefits for all lines of business in conjunction with MPI's unfunded portion of the Civil Service Superannuation Board of Manitoba ("CSSB") pension obligations. Employee Future Benefit Liabilities are subject to interest rate risk, mortality risk and changes in actuarial assumptions from the external pension actuary.

5.2 The Corporation's cash needs are significant due to the uncertainties in the timing and amount of claims payments. This is offset by the high certainty of future premium income.

5.3 Some benefits of the Personal Injury Protection Plan (PIPP) paid by the Corporation are indexed to inflation through the Manitoba consumer price index.

VI. Investment Objectives

6.1 The purpose of the five portfolios defined in Section 5.1 (collectively "the Fund") is to pay the short and long-term liabilities of the Corporation as they come due and to provide investment income from interest, dividends and capital gains that will assist in stabilizing premiums payable by policyholders.

6.2 The Corporation must maintain adequate funds to ensure satisfaction with its obligations to claimants. These assets must be managed in a manner which will earn investment returns for an appropriate level of risk~~,~~ suitable for each portfolio. The Fund must also have sufficient liquidity to address all funding needs of the Corporation as they arise.

6.3 The Corporation considers the short-term volatility of premiums to be a primary concern. As such, mitigating short-term changes in the relative value of assets and liabilities is a major investment objective, particularly those generated by interest rate and credit spread variations. The mismatch in the changes in assets and liabilities, because of changes in interest rates and credit spreads, is expected to be minimized by defining a narrow range around the actuarially determined duration of the Corporation's claim liabilities.

6.4 Fixed income management will be governed by the accepted interest rate hedge ratio, credit spread hedge ratio, dollar gap and tracking error ranges as defined in the Operational Asset Liability Management Policy. The fixed income portfolio shall be diversified amongst nominal federal, Manitoba, other provincial, municipal, corporate issues~~,~~ and Maple bonds, real return bonds and commercial mortgages

with ~~amongst~~ a variety of maturities. It may include allocations to private placements (bonds and debentures) of various maturities to be funded over time.

6.5 To meet or exceed the Corporation's short-term and long-term liability commitments.

6.6 To maximize investment returns for an appropriate level of risk. Risk can be defined by the standard deviation of returns, the Sharpe Ratio, Value at Risk, Tracking Error, and other commonly used risk ~~measures~~ metrics for the total MPI portfolio, or any component of the total portfolio, which are compared to the same metrics~~measures~~ for the relevant index.

6.7 For assets supporting claims liabilities, risk is also defined as surplus volatility, which is driven by the dollar duration gap (or mismatch) between fixed income assets and claims liabilities. Dollar duration is a measure of the sensitivity of the market value of fixed income assets and liabilities to changes in interest rates. Operational Asset Liability Management Policy describes the interest rate hedge ratio and credit spread hedge ratio that the Corporation applies to manage its interest rate ~~risk~~ and credit spread risk.

6.8 To mitigate interest rate ~~risk~~ and credit spread risk where applicable.

6.9 Given the different nature of liabilities, the investment objectives and risk tolerances for each portfolio (which are held to back liabilities, retained earnings or a combination of both) is as follows:

6.9.1. **Basic Claims Portfolio:** The objectives are to back policyholder claims ensuring funds are available as liabilities come due and to minimize interest rate ~~risk~~ and credit spread risk through dollar-duration matching. The funds are intended to pursue modest incremental returns while prioritizing risk management. Sufficient liquidity must be maintained to support the Basic line of business as required. Physical damage claims are typically settled within one year and are funded by cash from premiums. Payments on PIPP claims made in the short-term (0-12 months) represent approximately 5-10% of the overall PIPP liability and are funded from a combination of investment income and cash from premiums. The timing and amount of payments beyond 12 months are estimated and long-term investments are held to cover these liabilities.

6.9.2. **Rate Stabilization Reserve:** The objectives are to ensure sufficient levels of capital are maintained such that the Basic line of business meets the minimum capital target (MCT) of 100% and is in an actuarially determined state of satisfactory financial condition based on the Financial Condition Testing (FCT) report. The RSR portfolio must have sufficient capital to withstand plausible adverse events and to deliver rate stability and

predictability. Given that there are no specific backing obligations, duration management does not apply, and the fund's objective is to generate real returns to facilitate stable premium rates. A moderate level of liquidity is required to ensure ~~–~~funds are available in the event the Corporation experiences a series of adverse events and resulting financial losses that deteriorate its capital base.

6.9.3. **Special Risk Extension Portfolio:** The assets backing the SRE line of business support both the claim liabilities and the retained earnings. The main objectives are to achieve a return target that maintains the capital target of 300% MCT and supports competitive and stable premium payable by policyholders. The SRE claims obligations are expected to be funded by cash generated from ongoing operations. The risk tolerance is moderate, given the nature of liabilities as SRE claims obligations have both ~~short and long term~~short- and long-term durations. Moderate liquidity is required as large claims can arise from the Third- Party Liability coverage.

6.9.4. **Extension Portfolio:** The assets backing the Extension line of business support both the claim liabilities and the retained earnings. The objectives are to maintain the 200% MCT target, and to achieve returns that support competitive and stable premium payable by policyholders. Extension claim obligations are funded by cash generated from ongoing operations. The risk tolerance is moderate, given that liabilities are mainly short duration. Most assets backing Extension are backing surplus, therefore minimal liquidity is required.

6.9.5. **Employee Future Benefits Liabilities:** ~~The~~ The objective is to ensure that pension and other obligations are paid as they become due. The liabilities are long~~-~~term in nature, so minimal liquidity is required.

6.10 To achieve a time-weighted total return, before all investment management fees, at least equal to the following indices and according to the target allocation defined in section 8.1. Passive management strategies are ~~-~~expected to earn a return in line with their respective benchmarks. The investment returns achieved by the investment managers will be measured and monitored on rolling four-year ~~-~~periods and compared against the appropriate benchmarks as defined below.

Asset Class	Annual Expected Return
Cash and Equivalents	FTSE 91-Day Treasury Bill Index
Canadian Provincial Bonds	
Provincial Short-term Bonds	FTSE Short Term Provincial Bond Index
Provincial Mid-term Bonds	FTSE Mid Term Provincial Bond Index
Provincial Long-Term Bonds	FTSE Long Term Provincial Bond Index
Real Return Bonds	100% FTSE Canada Real Return Bond Index

Canadian Corporate Bonds Corporate Bonds – Long-Term Pooled Fund	FTSE Canada Long Term Corporate Bond Index plus 25 basis points over a rolling four-year period annualized before management fees
Corporate Bonds – Basic Claims Separately Managed Account (SMA)	2550% FTSE Canada Mid Term Corporate Bond Index and 7550% FTSE Canada Long Term Corporate Bond Index plus 25 basis points over a rolling four-year period annualized before management fees
MUSH Bonds	50% FTSE Short Term Provincial Bond Index plus 50% FTSE Mid Term Provincial Bond Index
Commercial Mortgages	40% FTSE Canada Mid Term Bonds and 60% FTSE Canada Short Term Bonds plus 50 basis points per annum
Private Debt Private Debt - Universe	FTSE Canada All Corporate Bond Index plus 10075 bps gross of investment management fees over a rolling four-year period annualized
Private Debt - Long	FTSE Canada Long Term Overall Bond Index plus 7550 basis points gross of investment management fees over a rolling four-year period annualized

Canadian Equities Large Market Capitalization Equities	S&P/TSX Capped Composite Total Return Index ~~plus 150 basis points over a rolling four-year period annualized~~
Small to Mid-Market Capitalization Equities	S&P/TSX Small Cap Total Return Index plus ~~150 basis points over a rolling four-year period annualized~~
Global Equities Global Equities	MSCI World Index in Canadian dollars ~~plus 150 basis points over a rolling four-year period annualized~~
Low Volatility Equities	MSCI World Index in Canadian ~~U.S.~~ dollars ~~plus 90 basis points over a rolling four-year period annualized~~
Alternative Investments Canadian Real Estate	MSCI Quarterly Property Fund Index~~REALPAC/IPD Canadian Property Index~~
Infrastructure	90% x (5-year break-even inflation rate[1] + 4%) plus (10% x DJBGINAT[2])

In addition to the return targets above, the Global Low Volatility Equities shall target a reduced return volatility, by the amount of the objective shown below:

[1] The Break-even inflation rate (BEIR) is calculated as the difference in yield of a nominal government bond and a real return bond with the same term. The 5-year BEIR cand be found on Bloomberg (ticker CDGGBE05).
[2] DJBGINAT stands for Dow Jones Brookfield Global Infrastructure North American Listed index. This is the benchmark for our current liquid infrastructure investment, BMO Global Infrastructure Index ETF (ticker ZGI).

Benchmark	Return Volatility Objective Over 4 years
MSCI World Index in Canadian dollars	In general and in USD terms, up to 70% of Benchmark Return Volatility when benchmark return volatility is in the 14%-20% range and up to 80% of Benchmark Return Volatility, if benchmark return volatility is below stated range.

VII. Permitted Investments

7.1 The Fund may only be invested in the following asset categories:

a) Cash;

b) Demand or term deposits, or similar instruments issued or unconditionally guaranteed by banks;

c) Short-term notes;

d) Treasury bills;

e) Bank Deposit Notes;*

f) Commercial paper;*

g) Bonds and debentures or other debt instruments of government, government agencies, or corporations;*

h) Maple Bonds, which includes bonds issued in Canadian dollars by a supra-national agency, a foreign government, or a corporation*;~~.~~

i) Inflation Linked Bonds issued by the ~~Bank of Canada~~the Federal and provincial governments (Real ~~r~~Return ~~b~~Bonds) or the U.S. Treasury (Treasury Inflation Protected Securities);

j) Private placement bonds and debentures*;

k) Canadian and foreign publicly traded equities;

l) Private equity and venture capital;

m) Real estate;

n) Infrastructure;

o) Commercial Mortgages; and

p) Pooled funds consisting of assets listed in a) through o) above.

*See Section 9.6 for minimum credit ratings.

7.2 Cash and equivalent investments include cash and fixed income investments having a maturity of less than one year at the time of purchase.

7.3 Bonds include all fixed income securities having a maturity of one year or more at the time of purchase and include U.S. Treasury bonds & bills, ~~Canada~~Federal, Manitoba, provincial, municipal~~,~~ and corporate bonds, floating rate notes, and debentures as well as bonds issued in Canadian dollars by a supra-national agency ("Maple bonds"), a foreign government or a corporation that are tradable in the fixed income market and Manitoba rural municipality, university, school division and health care facility bonds and debentures (MUSH bonds) which are not tradable in the fixed income market.

7.4 Private Debt includes investment grade debt covering private corporate debt, infrastructure debt, power & energy debt, real estate debt and other forms of private debt.

7.5 Canadian equities include securities traded on the TSX or common stocks, preferred stocks, and convertible securities ~~of~~ issued by Canadian issuers and Canadian equities exchange traded funds (ETFs) ~~.~~

7.6 Foreign equities include common stocks, preferred stocks, and convertible securities ~~of~~ issued by foreign issuers.

7.7 Canadian Real Estate includes pooled funds~~, and~~ direct holdings of real estate and Canadian Real Estate Income Trusts exchange traded funds (ETFs).

7.8 Infrastructure includes pooled funds, segregated funds, direct holdings, co-investments, and infrastructure exchange traded funds (ETFs).

7.9 Private Equity is an investment in an unlisted company, which is typically long-term and unregulated. Venture capital is a form of private equity which focuses on small to medium sized business with strong growth potential. Venture capital is designed to help entrepreneurs start up or develop a new business where a high degree of risk is involved. The Corporation has capped its investments in Private Equity and will make no new investments in this asset class.

7.10 The Fund may purchase derivative financial, commodity or currency related instruments such as forward contracts, options, futures, or swaps provided that such participation is not for speculative purposes and are not purchased with the use of leverage. Use of derivatives should be consistent with the overall asset allocation and risk management of the Corporation. Use of a derivative is permitted only after the ICWG has reviewed the application of the derivative and determined that it meets or exceeds the defined investment objectives of this document. Derivative strategies also require the prior approval of the Committee. Derivatives may be used to mitigate investment risk or create a desired return (where no margin or borrowing is used).

7.11 Investment counsels shall not borrow money, pledge, or otherwise encumber any of the Fund's assets except to the extent that a temporary overdraft may occur in the normal course of day-to-day portfolio management. The use of leverage associated with real estate pooled funds and infrastructure investments is acceptable and will be defined in the investment manager's contract.

7.12 The Investment Counsel shall assess the financial strength of borrowers by reference to published credit ratings and by their own analysis. The investment counsel's analysis should include all material factors relevant to assess the ability of the borrower to repay the debt instrument, to discharge interest obligations on the specified payment dates and to ~~survive~~ endure periods of financial adversity. New investments may not be made in debt obligations that are in default of principal or interest.

7.13 The Minister may enter into a written agreement with the Custodian for securities lending provided that readily marketable securities having a market value of at least 105%, of the market value of the securities lent, are maintained on at least a daily basis.

7.14 Investment Counsels may use Soft Dollars (directed commissions) to pay for research related goods and services in accordance with the CFA Institute Soft Dollar Standards. Investment Counsels shall disclose to the Corporation at least annually the total amount of commissions and the products and services obtained through soft dollar arrangements from the Corporation.

VIII. Asset Allocation

8.1 After March 31, 2023, all investments are classified as Fair Value Through Profit and Loss.

On or after April 1, 2026~~5~~ (or any other date determined by the Investment Committee) the target allocation for each portfolio is as follows:

Basic Claims

Asset Class	Benchmark	Minimum	Target	Maximum
Cash and Equivalents	FTSE Canada 91 Day T-Bill Index	0%	0%	5%
Fixed Income				
Provincial Bonds	20~~100~~% FTSE Mid-Term Provincial Bond Index 80% FTSE Long-Term Provincial Bond Index	25%	35%	45%

* The private debt fund contains a 20-50% allocation to public bonds, with the weight at the discretion of the fund manager

The target asset allocations have been determined in order to meet the objectives of the relevant portfolio. They reflect risk/return trade-offs selected by the Committee.

8.2 The actual allocation to MUSH bonds should not exceed 20% of the total fund. The aggregate allocation to MUSH bonds, Private Debt, Real Estate, Infrastructure and Commercial Mortgages should not exceed 35% of the total fund.

8.3 The ICWG will monitor the target asset allocation of the fund on a quarterly basis, at a minimum, and rebalance if necessary, in accordance with the ICWG's rebalancing policy.

8.4 Securities held in a pooled fund are classified on the basis of the assets comprising the major portion of such pooled funds.

8.5 Derivative instruments along with any collateral held thereon are included in the asset class comprising the securities whose return or price serves as the basis for the pricing of such derivative instruments.

8.6 The target allocation to illiquid growth assets (Real Estate and Infrastructure) as a proportion of total growth assets (Canadian Equity, Global and Global Low Volatility Equity, ~~and~~ Real Estate and Infrastructure) should not exceed 50%. This does not apply to portfolios that do not contain equities.

IX. Investment Risk

9.1 Diversification between asset classes is provided through the asset allocation guidelines set forth in the Statement.

9.2 Diversification within each asset class is provided by limiting to 5% or less the percentage of the book value of Fund assets invested in a single security not issued or guaranteed by the Government of Canada, charged against the Consolidated Revenue Fund, issued by a Canadian province or a guarantee of a Canadian province. Minimum and/or maximum percentage weight targets may be developed and implemented for corporate and provincial bond issuers (Province of Manitoba excluded) to assist in the diversification of the fixed income portfolio.

9.3 Diversification in equity investments is achieved by contracting with investment counsels that concentrate on specific equity market segments (large cap and small/mid cap) as well as investment style (value, growth and core). Managers will be selected based on their investment philosophy and internal investment policies.

9.4 The Corporation employs an interest rate hedge ratio, and a credit spread hedge ratio to manage the interest rate risk and credit spread risks associated with the Basic Claims liabilities.

See the Operational Asset Liability Management Policy for additional information on managing interest rate risk and credit spread risk.

9.5 When investments are made outside of Canada, consideration will be given to limiting exposure to foreign exchange risk by hedging where practical.

9.6 Quality is ensured by requiring that 100% of the market value of short-term securities have a minimum credit rating of R-1 (low) as assigned by Dominion Bond Rating Service Limited (DBRS), or its equivalent, and that 100% of other fixed income securities have a minimum credit rating of BBB (low), or its equivalent, as assigned by Dominion Bond Rating Service (DBRS), S&P Global Ratings (S&P) or Moody's Investors Service (Moody's), or is a security issued or guaranteed by the Government of Canada, charged against the Consolidated Revenue Fund, issued by a Canadian province or a guarantee of a Canadian province. In the event of one or more ratings differing from the others, the majority rating will prevail, or, in the event of all three ratings differing, the median rating shall prevail. In the event that there are only two ratings available, the more conservative rating will prevail.

9.7 In the event of a downgrade in the credit rating of a fixed income security by a recognized bond rating agency to a credit rating below the minimum as defined in Section 9.6, the Fixed Income Manager will follow the course of action set out below:

a) The ICWG will be notified of the downgrade at the earliest possible opportunity;

b) Within five business days of the downgrade, the Investment Counsel will advise the ICWG in writing of the course of action taken or to be taken by the Investment Counsel along with the rationales; and

c) The Investment Counsel will provide regular reporting to the ICWG on the status of the asset until such time as it matures, is sold, or is upgraded to a rating consistent with the minimum rating standards as defined in Section 9.6.

9.8 Trading and execution of the Fund will be done through the investment counsels who shall utilize their best efforts to obtain best execution of orders at the most favorable prices and competitive commission rates.

X. Voting Rights

10.1 The responsibility of exercising and directing voting rights acquired through Fund investments is delegated to the investment counsels, who shall at all times act prudently and in the best interests of the Fund.

10.2 In case of doubt as to the best interests of the Fund, the investment counsel must request instructions from the ICWG and act in accordance with such instructions.

10.3 Investment counsels shall maintain a record of how Fund voting rights have been exercised.

10.4 Investment counsels shall advise the ICWG and provide details when:

a) the results of the vote are contrary to the investment counsel's recommendations;

b) the vote is related to anti-takeover charter and bylaw amendments or shareholder rights;

c) the voting rights have not been exercised.

10.5 Investment counsels shall not delegate voting rights unless the policy and procedures to be used when voting has been filed with the Corporation and written approval of those policies and procedures have been granted.

XI. Monitoring

11.1 At the end of each quarter, the market value of each Fund investment is calculated. Investments that are not regularly traded are valued by the relevant manager or General Partner according to a methodology acceptable to the Committee. Any such investment that may represent more than 1% of the market value of the Fund is valued by a qualified independent appraiser or by the Committee through a resolution at least every three (3) years. The market value of the non-marketable bonds is calculated by the Province of Manitoba as the asset manager of this asset class.

11.2 Fund performance is evaluated at least quarterly in accordance with current Performance Presentation Standards established by the CFA Institute. Such evaluation is focused on objectives set in this document for the Fund and for the investment counsels.

11.3 Each quarter, investment counsels shall provide a letter indicating compliance with the Statement and the investment counsel's mandate and indicating all instances where the Statement and mandate were violated.

11.4 Investment counsels report to the internal and external MPI Investment Teams at least annually in order to:

a) provide information concerning new developments affecting the firm and its services;

b) review the transactions in the latest period and the assets held at the end of the period and explain how they relate to the strategy advocated;

c) explain the latest performance;

d) provide an economic outlook along with a strategy under such circumstances.

11.5 The Corporation employs an interest rate hedge ratio and credit spread hedge ratio in order to manage the interest rate risk and credit spread risk associated with the Basic Claims liabilities. The Corporation evaluates the compliance with the defined

interest rate hedge ratio, credit spread hedge ratio, dollar gap and tracking error ranges as defined in the Operational Asset Liability Management Policy on a quarterly basis.

Pooled fund managers are expected to comply with restrictions set out in the Investment Policy Statement of their respective pooled fund and must provide certificates indicating compliance on a quarterly basis. At each ICWG meeting, the compliance report certificates provided by each investment manager are presented before the Investment Working Committee Group for their review.

XII. Review

12.1 This Statement may be changed or modified at any time by action of the Board of Directors of the Corporation.

12.2 This Statement shall be reviewed at least annually. Non-annual reviews could be caused by:

a) a fundamental change in the business of the Corporation;

b) significant revisions to the expected long-term trade-off between risk and reward on key asset classes;

c) a major change in liabilities;

d) a significant shift in the financial risk tolerance of the Corporation;

e) shortcomings of the Statement that emerge in its practical application, or substantive modifications that are recommended to the Committee by an investment counsel;

f) applicable change in legislation.

Part 2 – Operational Asset Liability Management Policy

I. Background

The Corporation employs an interest rate hedge ratio, and credit spread hedge ratio to manage the interest rate risk and credit spread risk associated with the Basic Claims liabilities.

Interest rate risk is the risk of economic loss resulting from market changes in interest rates and the impact on interest rate sensitive assets and liabilities. This risk arises due to the volatility and uncertainty of future interest rates. Interest rate sensitivity is measured by dollar duration, which is the product of duration and market value. When the dollar duration of the assets and liabilities is equal, both will have the same sensitivity to interest rate movements.

Credit spread is the excess yield offered by a security relative to a risk-free security with the same maturity. Credit spread risk refers to the possibility of losses due to changes in credit spreads (i.e., credit widening and credit tightening).

Under IFRS 17, liability cash flow discounting is delinked from the asset portfolio, and the passthrough of portfolio credit to liability discounting is no longer applicable. This separation can lead to mismatches between the valuation of assets and liabilities. This impacts surplus, available capital, and the Minimum Capital Test (MCT) ratio.

II. Interest Rate Risk Management Objectives by Line of Business

Line of Business	Interest Rate Risk Management Objectives
Basic Claims	Minimize tracking error (hedge ratio) to be less than +/- 1% of the market value of the Basic Claims investment portfolio.
SRE & Extension*	Not part of the ALM strategy - Contains assets backing both surplus and claims. Fixed income assets approximately match the claims liabilities
RSR	No liabilities to match
Employee Future Benefits	Not part of the ALM strategy

*The Extension portfolio includes the retained earnings for the DVA line of business. DVA is not part of the ALM strategy.

III. Basic Claims Interest Rate Risk Management

Basic Claims Portfolio Assets	Maximum Difference	Interest Rate Sensitivity Target	Maximum Dollar Difference	Tracking Error
Marketable Bonds, MUSH Bonds & Real Estate*	+/- 5%	100% Hedge Ratio	+/- $100M	+/- 1% of the MV of Assets

*Real Estate is excluded in the hedge ratio calculation.

The objective of the immunization strategy is for the tracking error (hedge ratio) to be less than 1% of the market value of the Basic Claims investment portfolio. The tracking error (hedge ratio) is the surplus variation in dollars due to market factors relating to the immunization assets (i.e., excludes Real Estate). The Investment Manager will be responsible for the monthly calculation of the tracking error (hedge ratio). This objective is met by controlling two items:

1. **Basic Claims Interest Rate Hedge Ratio**
   The Corporation is to maintain a 100% hedge ratio within +/- 5% between the Basic Claims fixed income assets (including government bonds, corporate bonds, floating rate notes and short-term investments, mortgages, and non-marketable bonds) and Basic Claims liabilities.

   The hedge ratio is calculated by dividing the dollar duration of the fixed income assets by the dollar duration of the liabilities. Aiming for an interest rate hedge ratio of 100% between fixed income assets and liabilities helps minimize the dollar sensitivity of the surplus to interest rate fluctuations.

   The hedge ratio will be calculated and monitored by the investment manager on a daily basis.

2. **Basic Claims Dollar Matching**
   The market value of the Basic Claims total portfolio, including all marketable bonds (government bonds &, corporate bonds ~~& mortgages),~~ non-marketable bonds, real estate, and floating rate notes, shall match the present value of the associated liability within +/- $100 million.

   Note: Delay In Receiving Liability Cash Flows
   Liability cash flows are typically delayed by approximately two~~three~~ months after the fiscal year-end due to normal year-end reporting, with cash flows for subsequent month-ends available approximately 2 – 3 weeks after the month-end. Because of this, the investment manager will use the most recent valuation cash flows available at the time.

   Month-end reporting will be based upon the dollar duration for assets as of the reporting date and dollar duration of the liabilities using the valuation cash flows that were available to the investment manager at the beginning of the month.

IV. Basic Claims Credit Spread Risk Management

The Corporation is to maintain a credit spread hedge ratio of 100% ±5% and the hedge ratio is defined as follows:

$$\frac{Duration_{Corporate}\ x\ Market\ Value_{Corporate} + Duration_{Mortgages}\ x\ Market\ Value_{Mortgages}}{Duration_{Liabilities}\ x\ Market\ Value_{Liabilities}\ x\ (Weight_{Corporate} + Weight_{Mortgages})}$$

Where $Weight_{Corporate}$ and $Weight_{Mortgages}$ are the target weights in the liability discount curve, i.e., the target weights in MPI's Investment Policy Statement divided by 90% to adjust for the 10% allocation to Real Estate.

The credit spread hedge ratio includes the commercial mortgages, which are incorporated as corporate credit in the liability discount curve.

The Investment Manager is responsible for reviewing the credit spread hedge ratio periodically and will advise MPI when the benchmark should be adjusted. Frequent changes are not expected as the ratio is relatively stable once the benchmark is defined.

Month-end reporting will be based upon the data for assets as of the reporting date and data of the liabilities using the valuation cash flows that were available to the investment manager at the beginning of the month.

V. Measurement

Modified duration will be used to determine the duration of the fixed income assets and claims liabilities unless effective duration is a more appropriate measure.

The claims liability duration will be updated by the Valuation Department on a monthly basis using the latest claims discount rate curve including the risk adjustment.

VI. Reporting

The interest rate hedge ratio, credit spread hedge ratio and dollar gap between the Basic Claims portfolio and the Basic Claims liabilities, and the Tracking Error (Hedge Ratio) will be reported to the Investment Committee and ICWG every fiscal quarter.

VII. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS. This policy may be changed or modified at any time by action of the Investment Committee.

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

Part 3 – Rebalancing Policy

I. Policy Details

The following requirements shall guide the practice of rebalancing asset classes:

- The Investment Committee Working Group (ICWG) has the responsibility to rebalance the portfolio(s) according to the asset class weights outlined in Section VIII of the Investment Policy Statement (IPS).
- The ICWG will monitor the target asset allocation of the investment portfolio(s), at a minimum, on a fiscal quarterly basis.
- Whenever an asset class is outside of its target range, it will be reported to the Investment Committee (IC) at the next meeting of the Committee within the Investment Activity and Performance Report. If the weight of any asset class falls outside the allowable range, then that asset class will be rebalanced back into the target range for that asset class within six (6) months.
- If the ICWG wishes to maintain an asset class outside of its specified minimum-maximum range for more than six months it must report the reasons for such variance to the IC and seek the Committee's approval. The IC may approve an asset class to remain outside of the rebalancing range for a limited period of time, to be defined by the ICWG at the time of the request, after the initial six (6) month period.
- Alternative asset classes, which includes real estate, private equity, private debt, commercial mortgages and infrastructure, can be highly illiquid and costly to rebalance. Therefore, special consideration will be given to rebalancing alternative asset classes. These asset classes will be rebalanced on a best efforts basis based upon available liquidity in the relevant fund and the liquidity policy of the relevant fund.

II. Compliance Obligation

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

III. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS.

Part 4 – Active Manager Monitoring Policy

I. Policy Objectives and Manager Expectations

This policy is intended to act as an operational guideline for the Investment Committee Working Group (ICWG). As per Section 3.5 (D) of the Investment Committee Terms of Reference, one of the responsibilities of the ICWG is to "monitor the performance of investment managers."

The decision to retain or terminate an investment manager can be a difficult and subjective process. Retaining an unskilled manager that consistently underperforms their benchmark or terminating a skilled manager that underperformed only in the short term can have a detrimental effect on the returns of the fund. The purpose of this policy is to provide a systematic framework for active manager retention, monitoring, and termination.

The process outlined in this policy takes into account both qualitative and quantitative factors to ensure that such decisions are made fairly and as objectively as possible when evaluating managers.

The guidelines in this document apply to all actively managed portfolios (independent of asset class), and are designed to:

i) Foster a long-term approach to manager evaluations that is forward looking.
ii) Provide a systematic quantitative and qualitative framework to assess the factors relevant to future performance.
iii) Improve client/manager communication by informing each manager of the standards by which they will be evaluated and the consequences of failing to meet these standards.
~~iii)~~iv) Promote timely and appropriate responses to actual and potential performance issues.
~~Promote timely and appropriate responses to actual and potential performance issues.~~

Active Manager Expectations

Active managers may have exposure to factors or an investment style that may occasionally fall out of favour for a period of time (Ex. Value vs. Growth for Active Equity Managers). Therefore, active managers, especially those managers that have high conviction (i.e.: a highly concentrated portfolio) in their process, can be expected to underperform from time to time over the short term as their factor exposure and/or style goes out of favour. However, over the long term (4 years), active managers must add value net of fees over their contractual benchmark index in order to justify their higher fees relative to a passive strategy.

Passive Manager Expectations
Passive managers are expected to have minimal tracking error relative to the contractual benchmark, and to match the benchmark's return gross of fees.

II. Monitoring

A written report for all managers will be presented to the ICWG on an annual basis~~The ICWG will prepare a written report for all managers on an annual basis~~, at a minimum, which will analyze the return and risk of the managers and discuss any major organizational changes within the firm. For additional oversight, a portfolio summary report will be prepared on a quarterly basis and will be sent to the ICWG to provide active manager's investment return updates.

Contributions & withdrawals to the portfolio can impact returns. Because the timing and amount of contributions & withdrawals are under the discretion of MPI, and not the manager, returns will be calculated without the impact of contributions & withdrawals when evaluating manager's performance.

Reporting Dashboard
All investment managers will be classified as follows:

1. Green: No Concerns
2. Yellow: Emerging Concerns
3. Red: Concerns - on the Watchlist

Yellow Criteria:

An active equity manager who:

1. Underperforms the contractual benchmark net of fees over the most recent two-year period by more than 1.0% **or**

2. Ranks in the bottom quarter of the relevant peer group over the most recent two-year period.

The dashboard report will list all managers and classify the managers as red, yellow, or green, indicating why the manager is classified as yellow or red (i.e.: which criteria was met).

Watchlist Status
If an active manager is not meeting performance expectations, or has undergone change(s) that may affect its performance going forward, the manager may be placed on the Watchlist. The purpose of placing a manager on the Watchlist is twofold. First, the action communicates to the manager the ICWG's concern about any issues. Second, the ICWG will begin a process to formally evaluate the continued

retention of the investment manager. Placing a manager on the Watchlist is an intermediate step toward either the expected levels of performance or terminating the manager.

An active manager will be automatically placed on the Watchlist if the manager meets **any one** of the following qualitative factors or **both** of the quantitative factors:

Qualitative

a) A change in ownership, or a change in the CEO, CIO, or relevant portfolio manager;

b) Change to an investment manager's philosophy or process it uses to implement the investment mandate;

c) Material litigation or fraud allegations involving the investment manager;

d) Significant account losses within the strategy in which MPI is invested of more than 25%, or account growth of more than 50% within the most recent 12-month period available.

Quantitative:

a) Active ~~equity~~ manager that underperforms the contractual benchmark net of fees over the most recent four-year period or since inception (minimum two years), whichever is shorter **and**;

b) Manager fails to generate above-median returns versus a style-specific peer group (where available) over the most recent four-year period, or since inception (minimum two years), whichever is shorter.

The ICWG may place an active manager on the Watchlist at its discretion at any time. Active managers will typically remain on the Watchlist for qualitative reasons for one year to ensure that outstanding issues have been resolved. When the manager is placed on the Watchlist, the Watchlist Timeline outlined below will be used for guidance.

Quarterly Watchlist reports will include tables of relevant performance data, any necessary clarifying remarks, and a recommendation.

New Managers

Normally performance is to be evaluated over 4 years, which is meant to cover a full market cycle. However, for new investment managers who underperform their benchmarks a formal Watchlist report will be prepared 24 months after their inception date and every 6 months thereafter until they are removed from the Watchlist.

Watchlist Timeline

A. Initial Annual Review

1. Calculate the manager's annualized performance (including absolute, relative, risk adjusted and other risk measures) over the most recent four-year period and since inception and compare the manager's performance to their benchmark;

2. If the manager falls short of expectations and is placed on the Watchlist:
   a) the manager will be formally notified, a copy of this policy will be provided to the manager for added transparency, and the Investment Department will seek an explanation from the manager;
   b) A written report with the reasons why the manager was placed on Watchlist status will be provided to the Investment Committee and to the Investment Manager.

B. Quarterly Reviews

3. The ICWG will re-evaluate the manager's performance to determine if it has improved over the most recent 3-month period; these reports will be prepared for the duration that the manager remains on the Watchlist.

4. If the manager's underperformance is ongoing and material, or if there continues to be concern about the organization, the manager will remain on the Watchlist ;

5. The manager will be notified of the result and will be provided with a copy of the report. If the manager remains on the Watchlist for more than 12 months the manager will be requested to present to the ICWG to discuss what action the manager plans to take to address their underperformance;

6. A written report will be provided to the Investment Committee (IC) that recommends either removing the manager from the Watchlist, or keeping the manager on the Watchlist.

7. If the ICWG has:
   a) lost confidence in the manager, and performance has not improved, the ICWG may recommend in a written report to the IC that the manager be terminated;
   b) confidence in the manager, the ICWG will recommend to the IC –in a written report to keep the manager on the Watchlist.
      - the manager will be reviewed on a quarterly basis until the issue is resolved. A written report will be provided to the IC at each

subsequent three-month interval that recommends either removing the manager from the Watchlist, or keeping the manager on the Watchlist.

This process can be accelerated if the manager's performance deteriorates materially, if the manager makes significant organizational changes, experiences sizable redemptions or any other developments occur that cause the ICWG to lose confidence in the manager.

III. Termination

The following two broad questions are designed to help guide the decision to retain or terminate an active manager:

1. Does the ICWG accept the manager's rationale for underperformance; and,
2. Does the ICWG have continued confidence in the manager's ability to outperform the benchmark?

This policy provides guidance to the ICWG in reviewing the performance of the active managers. The active manager contracts allow the Department of Finance to terminate any manager, with or without cause, after 30 days' notice, whether or not the manager is on the Watchlist.

IV. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS. This policy may be changed or modified at any time by action of the Investment Committee.

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

Part 5 – Trading Approval Policy

I. Objective

The Trading Approval Policy establishes approval authority for trading activities undertaken within the MPI portfolios (Basic Claims, SRE, EXT, RSR, EFB). The policy aligns with the Investment Policy Statement and provides transparency and accountability for all trading completed within the MPI portfolios. ~~sets out The Investment Committee Working Group's (ICWG) authority for approving trading within the fund.~~

II. Public and Private Market Assets

Public market asset classes include government bonds, corporate bonds, Canadian equities and global equities.

Private market asset classes include real estate, infrastructure, commercial mortgages, private debt and private equity.

III. Types of Public Market Trading

This policy is set out to define authority regarding the following types of trading:

1. Rebalancing between asset managers;
2. Asset liability management (ALM) trading for controlling the duration of the fixed income assets or the dollar gap between fixed income assets & claim liabilities, or;
3. Reinvestment of equity dividends.
4. Transfers between portfolios (Basic Claims, SRE, EXT, RSR, EFB)
5. Initial funding of new asset classes or investment managers
6. Follow-on investments with existing managers ("re-ups") and recapitalizations

All external investment counsels for public and private market investments have the discretion to make trades within their contracted mandate.

IV. Public Market Trading Authority

All public market trading must be approved by either 1) the ICWG, or 2) Either MPI's Vice President & Chief Financial Officer or the Vice President & Chief Actuary plus the Assistant Deputy Minister from the Department of Finance, or their respective designates in their absence.

~~The Operational Asset Liability Management Policy requires dollar duration matching to be completed on a monthly basis. Therefore, trades required by this policy for ALM matching purposes up to $50 million ($CAD) can be approved by the Vice President & Chief Actuary, or the Vice President & Chief Financial Officer or their respective designates in their absence. In these cases, MPI will notify the Assistant Deputy Minister from the Department of Finance. Trades over $50 million must be approved by the ICWG.~~

All trading activity done to maintain compliance with the IPS including meeting the MCT target and supporting the fund ALM objectives requires approval from the Vice President & Chief Actuary and Vice President and Chief Financial Officer. All such trades are to be reported at the following quarterly ICWG meeting.

Reinvestment of equity dividends can be approved by the Manager of ~~Director of ALM &~~ Investments, up to $5 million dollars. Reinvestment of more than $5 million requires the approval of the Vice President & Chief Actuary, or the Vice President & Chief Financial Officer or their respective designates in their absence.

Initial funding of new asset classes or investment managers must be first approved by the ICWG and then taken to the Investment Committee for approval.

Follow-on investments with existing managers ("re-ups") and recapitalizations of existing investments of up to $50 million must be approved by MPI's Vice President & Chief Financial Officer and the Vice President & Chief Actuary plus the Assistant Deputy Minister from the Department of Finance, or their respective designates in their absence; Investment Committee approval is not required for follow-on investments or recapitalizations under $50 million. Follow-on investments over $50 million must be approved by the ICWG and Investment Committee.

V. Private Market Trading Authority

All private market trading must be approved by either: 1) the ICWG, or 2) MPI's Vice President & Chief Financial Officer; or the Vice President & Chief Actuary plus the Assistant Deputy Minister from the Department of Finance, or their respective designates in their absence.

VI. Segregation of Duties

Operational trade recommendations are prepared by the MPI Investment Team and reviewed by MPI's Vice President & Chief Financial Officer and Vice President & Chief Actuary. Upon approval, the trade request is submitted to the Department of Finance for execution.

~~VI.~~VII. Review

This policy will be reviewed by the ICWG annually in conjunction with the annual review of the IPS. This Policy may be changed or modified at any time by action of the Investment Committee.

If there is an inconsistency between this policy and MPI's IPS, then the terms of the IPS shall prevail. Further, nothing in this policy shall override or neutralize MPI's obligation to comply with all applicable legislation.

~~Additional notes: a statement on segregation of duties may be useful --- those that initiate the transaction can not approve the transaction or settle the transaction~~.

Asset Allocations-Basic Portfolio

PUB (MPI) 1-93

Part and Chapter:	Part IV - Benchmarking	**Page No.:**	7-10
PUB Approved Issue No:	12. Operational Benchmarking		
Topic:	Serving Manitobans		
Sub Topic:	Customer Service Measures		

Preamble to IR (If Any):

From page 7:

"Forrester uses proprietary customer experience metrics developed with more than700 brands across 16 industries and has historical data going back more than a decade. Its Customer Experience Index (CX Index™) score offers competitive benchmarking to the Canadian auto and home insurance market."

From page 8:

"The loyalty portion of the metric is based on the likelihood of customers to follow advice, to engage with MPI, and to speak positively about MPI to others. The overall CX Index™ score ranges from zero to 100 and is considered excellent if in the 80-100 range, good in the 70-79 range, okay in the 60-69 range, poor in the 50-59 range, and very poor if less than 50.

At a minimum desired level, MPI aims to provide customers a 'good' experience: a target CX Index™ score of 70 or greater. As a stretch goal, MPI strives to deliver an 'excellent' experience: a CX Index™ score of 80 or greater. By setting a minimum target of 70 or greater, MPI wants customers to have a good or better experience, which is ahead of the industry overall.

Question:

a) Please provide a description of how the overall CX Index is calculated, including the weighting applied to the three quality dimensions (Effectiveness, Ease, and Emotion), how service-category scores aggregate into the overall score, and the name of the third-party firm conducting the.

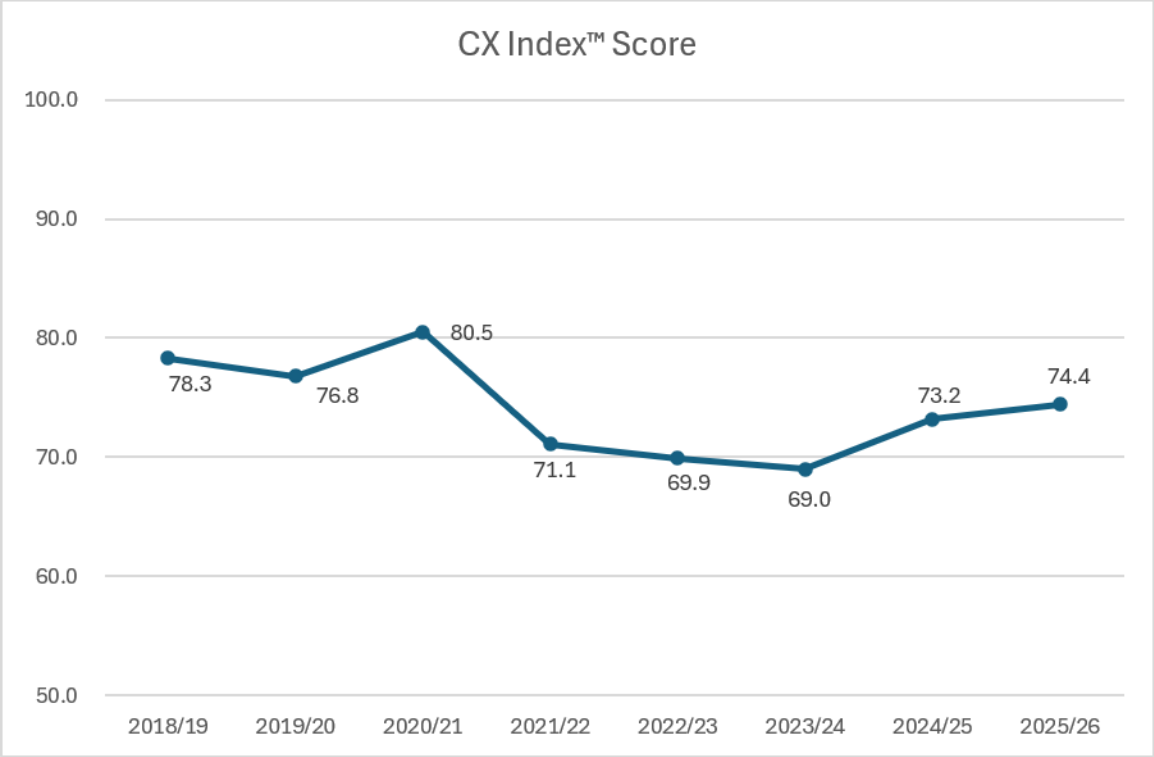
b) Please provide a trend analysis of the overall CX Index from 2018 to current, in the format of Figure BMK-2, and explain the long-term trend.

c) Please explain the rationale for the target of 70 and the stretch target of 80, including any supporting or benchmarking analysis used to set 70 as the minimum for a "Good" experience, and explain why the targets are flat or only modestly increasing given performance over the prior five years.

Rationale for Question:

To understand how the CX Index is constructed, how it has moved, and how the targets are set.

RESPONSE:



a) Forrester uses a proprietary trademarked methodology to calculate Customer Experience Index (CX Index™) score. The Forrester CX Index™ score provides an overall measure of the quality of the experience a customer had and the loyalty of the customer to the organization based on that experience. The quality of the experience is measured based on whether the customer's needs were effectively met, how easy it was to complete the interaction, and whether it was a positive or negative experience overall. Loyalty is based on the likelihood of customers to follow advice, to engage with MPI, and to speak positively about MPI to others.

As a proprietary trademarked methodology, MPI is not privy to, nor can we share, the weighted algorithm used to calculate the CX Index™ score.

b) The CX Index trend reflects a combination of external environmental factors and organizational performance. The peak score of 80.5 in 2020/21 occurred during the first year of the COVID-19 pandemic, when reduced driving activity resulted in significantly fewer collisions and claims, and customers received substantial financial relief through MPI rebate programs. As pandemic conditions eased and service demand increased, the organization was also experiencing a period of operational volatility, including a lengthy strike. Between 2021/22 and 2023/24, customer experience declined as customers increasingly encountered challenges related to timeliness, appointment availability, communication, and service complexity. Beginning in 2024/25, MPI

implemented a focused strategy to improve operational stability and address the key drivers of customer experience. This included improving appointment availability through initiatives such as the Training Support Requirement, reducing friction in claims and licensing journeys, and strengthening customer communication, empathy, and support. These efforts contributed to two consecutive years of CX Index improvement, increasing from 69.0 in 2023/24 to 74.4 in 2025/26, demonstrating a shift from recovery toward sustained operational stability and improved customer outcomes. See chart below for CX trend.

Figure 1 CX Index Score Trend

c) MPI's minimum CX Index™ score target is 70, which corresponds to a "good" customer experience as defined by Forrester Research. This minimum establishes a performance floor across all customer journeys, reflecting MPI's commitment to delivering a consistent and acceptable level of service to all Manitobans. In addition to this baseline, MPI has set an aspirational target of 80, which aligns with Forrester's classification of an "excellent" experience and serves as a stretch goal to continuously elevate customer service.

The dual-target approach enables MPI to distinguish between journeys that require improvement and those that are already performing well.

For example, customer experiences related to licensing and driver testing have consistently scored at or above the aspirational threshold of 80, while experiences involving bodily injury claims—which are inherently complex and emotionally difficult—tend to score lower.

These differences are expected, and MPI uses them to guide targeted service enhancements and prioritize improvement efforts where they are most needed.

MPI currently participates annually in the Forrester Customer Experience Index™ study and has done so since 2018. This benchmarking allows MPI to compare its performance against other Canadian home and auto insurers. Based on the most recent data available, MPI's CX Index score in February 2026 was 74.4, which is above the reported industry average for Canadian home and auto insurance providers. This reinforces MPI's assessment that its customer experience performance is competitive and reflects positively on its public service delivery.

In summary, MPI uses a minimum target of 70 to uphold a consistent level of service across the organization and an aspirational target of 80 to drive continuous improvement. This approach ensures that all customers receive, at a minimum, a good experience while encouraging the organization to continuously elevate standards, informed by both internal performance trends and external industry benchmarks.

PUB (MPI) 1-94

Part and Chapter:	Part IV - Benchmarking	**Page No.:**	7-10
PUB Approved Issue No:	12. Operational Benchmarking		
Topic:	Serving Manitobans		
Sub Topic:	Customer Service Measures		

Preamble to IR (If Any):

From page 7:

Referring to Figure BMK-2, and the following reported measures:

"The following overall satisfaction results are based on tracking surveys in 2025/26:

- Physical damage claims: 71% [2024/25: 64%]
- Injury claims: 70% [2024/25: 65%]
- Policy-only insurance transactions: 86% [2024/25: 88%]
- Driver's licence-only transactions: 88% [2024/25: 89%]
- Combined transactions (had both policy and driver's licence): 84% [2024/25: 87%]
- Autopac-renewal transactions: 85% [2024/25: 89%]
- Knowledge-test appointments: 79% [2024/25: 77%]
- Road-test appointments: 61% [2024/25: 58%]
- Glass-only claims: 95% [2024/25: 94%]

Injury claims, physical damage claims, and road test appointments consistently show lower satisfaction scores than transactional interactions.

Question:

a) Please explain the key drivers of consistently lower satisfaction in injury claims, physical damage claims, and road-test appointments, including the extent to which higher-complexity interactions score lower than transactional interactions.

b) Please provide the operational improvement initiatives and timelines MPI has in place to raise satisfaction in those three categories, and explain how CX Index scores feed into those improvements.

Rationale for Question:

To understand why some service categories, score lower and how MPI is addressing them.

RESPONSE:

a) MPI's customer experience research indicates that more complex customer journeys generally receive lower satisfaction scores than transactional interactions. Transactional services, such as licence transactions and Autopac purchases or renewals, are typically shorter, more predictable, involve fewer touchpoints, and require less customer effort.

By comparison, injury claims, physical damage claims, and road-test appointments involve higher levels of complexity, uncertainty, emotional investment, and customer effort. These interactions often require multiple touchpoints, involve outcomes that are highly important to the customer, and provide more opportunities for dissatisfaction to occur.

For injury and physical damage claims, key drivers of satisfaction include timeliness, communication effectiveness, ease of understanding information, issue resolution, and whether customers feel they are treated fairly, respectfully, and with empathy. Customers are more satisfied when they understand the process, know what to expect next, and feel their concerns are being addressed in a timely manner.

Road-test appointments are similarly affected by factors beyond a typical transactional interaction. Customers often experience anxiety associated with being evaluated, making appointment availability, wait times, clear explanations, and respectful interactions, which are particularly important drivers of satisfaction.

MPI's customer satisfaction results consistently demonstrate this pattern, with transaction-based journeys generally achieving higher satisfaction scores than injury claims, physical damage claims, and road-test appointments. MPI's customer experience research indicates that satisfaction generally decreases as the complexity, duration, uncertainty, and emotional intensity of an interaction increases.

b) MPI is focused on improving customer experience across all customer journeys. As demonstrated in ***Figure BMK-2***, customer satisfaction scores for these more complex journeys have generally improved over time.

CX Index and customer driver analysis are used to identify the customer journeys, experience drivers, and pain points with the greatest impact on customer satisfaction. Results are reviewed to understand where performance gaps exist and to prioritize improvement opportunities. Initiatives are then designed to address the underlying drivers of customer experience, such as timeliness, communication effectiveness, ease of interaction, and access to information. Changes in CX Index™ score and related customer satisfaction measures are subsequently used to assess whether improvement efforts are achieving the intended customer outcomes.

For physical damage claims, improvement efforts are focused on reducing cycle times, improving access to information, and strengthening customer communications. Key initiatives include redesigning the end-to-end adjusting process, initially focusing on non-drivable vehicle claims, and reviewing liability determination processes to reduce decision timelines, secondary reviews, and escalations. MPI has also enhanced the Check My Claim application by expanding customer access to claim status, repair status, towing information, and adjuster contact information. Further enhancements to the online First Notice of Loss application are intended to reduce follow-up requirements and improve overall claim processing efficiency.

For bodily injury claims, customer experience improvement efforts are focused on customer service delivery, communication effectiveness, and improving the clarity of

customer-facing documentation and correspondence. Driver analysis consistently indicates that positive customer experiences are strongly influenced by interactions with frontline employees. As a result, improvement initiatives focus on ensuring employees are equipped to provide clear, trusted, and empathetic service throughout the claims journey.

For road-test appointments, improvement efforts are focused on appointment availability, customer preparedness, and the testing experience itself. The Training Support Requirement has helped improve appointment availability and better align access to testing with customer expectations. Driver examiners continue to focus on customer service practices that help reduce test anxiety and create a positive testing environment. In addition, the Driver's Handbook is undergoing a review to improve understanding and support customer preparedness.

PUB (MPI) 1-95

Part and Chapter:	Part VIII Expenses	**Page No.:**	
PUB Approved Issue No:	16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA		
Topic:	Cost Allocation		
Sub Topic:	ICAM		

Preamble to IR (If Any):

2026 GRA PUB (MPI) 1-60 response d:

In accordance with the approved ICAM, the claims incurred allocator is the claims incurred by an insurance line of business as a percentage of total claims incurred and in accordance with the ICAM, is calculated as a historical weighted average.

Due to changes in coverage, claims incurred moved from Basic to Extension.

Question:

a) Please confirm that MPI does not take changes in coverage into consideration when calculating the claims incurred allocator.

b) Similar to the response for 2026 GRA PUB (MPI) 2-57c, please provide a forward-looking impact of changes in coverage on the alternative claims incurred allocator for Basic, and please provide the alternative expense and the alternative rate indication (RI-14).

Rationale for Question:

To further understand ICAM and coverage changes.

RESPONSE:

a) In accordance with the approved Integrated Cost Allocation Methodology (ICAM), the claims incurred allocator is based on a historical weighted average of actual claims incurred by line of business.

Coverage changes that affect the distribution of claims between Basic and Extension are reflected in the claims incurred allocator only as actual post-implementation claims experience emerges and is incorporated into the historical rolling average used by the ICAM.

It remains appropriate to continue using the 4-year rolling average as the basis for allocating certain operating expenses:

- A rolling average smooths out year-to-year fluctuations in claims experience, including one-time impacts from product changes, large losses or unusual external conditions, providing a more reasonable basis for cost allocation.
- While the product change is expected to reduce Basic claims, the full impact on incurred costs will take time to materialize due to the nature of claims development. Using a rolling average avoids prematurely assuming the magnitude of that impact.
- Operating expenses are typically more stable and not immediately responsive to short-term changes in claims experience. Allocating these expenses based on a longer-term trend ensures better alignment between cost allocation and the underlying drivers of those costs.
- Continuing with a consistent methodology like a four-year rolling average avoids sudden shifts in allocations that could disproportionately affect the allocation based on a single year's claims performance.

While MPI recognizes the directional effect of the product change on claims incurred, as claims emerge under the revised coverage structure, the resulting shift in claims incurred between Basic and Extension will be incorporated into the claims incurred allocator through the normal operation of the historical rolling-average methodology. Over time, the allocator will therefore reflect the actual experience associated with the coverage changes without requiring any departure from the approved ICAM. The continued use of a rolling average supports stability, fairness and a methodology consistent with MPI's approved internal cost allocation framework.

b) In 2026 GRA PUB (MPI) 2-57(c), MPI provided an illustrative forward looking sensitivity to demonstrate the directional impact of a deductible change on the allocation of claims between Basic and Extension. The analysis was provided for illustrative purposes only and did not represent an application of the ICAM methodology.

The key distinction is that the approved claims incurred allocator is based on a historical weighted average of actual claims incurred, whereas the requested analysis would require the use of projected future claims experience as the basis for allocating expenses. As a result, the requested approach effectively replaces the approved historical allocator with a forward-looking allocator that is not contemplated within the ICAM.

MPI submits that the issue is not whether future coverage changes may influence the relative level of claims incurred by line of business. Rather, the issue is that the requested analysis relies on projected claims experience rather than actual historical claims experience, which is inconsistent with the approved methodology used to allocate costs.

As claims emerge under the revised coverage structure, the resulting shift in claims incurred between Basic and Extension will be incorporated into the claims incurred allocator through the normal operation of the historical rolling-average methodology. Over time, the allocator will therefore reflect the actual experience associated with the coverage changes without requiring any departure from the approved ICAM.

Accordingly, MPI has not prepared an alternative claims incurred allocator, expense allocation, or rate indication based on projected claims experience, as such an approach would not be consistent with the approved ICAM methodology.

PUB (MPI) 1-96

Part and Chapter:	Part X - RMF Appendix 1 (Summary of Changes, March 25, 2026) Part X - RMF chapter	**Page No.:**	1-5
PUB Approved Issue No:	15. Risk Assessment and Risk Management		
Topic:	Risk Appetite		
Sub Topic:	Direction of the March 25, 2026 Risk Appetite Changes		

Preamble to IR (If Any):

The March 25, 2026 RAS changes raised risk appetite in four categories and lowered none.

Two Strategy risk statements moved from Very Low to Low, one because intensive enforcement of the mandate to insure only Manitoba companies in SRE is currently unaffordable. Four statements moved from Low to Moderate, including workforce plan execution, where MPI states its workforce planning maturity is very low.

The June 24, 2026 review moved five further statements from Very Low to Low, four in Reputation Risk and one in Solvency Risk, and lowered none (MPI Exhibit 3).

Question:

a) Please confirm that no risk appetite level was lowered in the March 25, 2026 or June 24, 2026 reviews, and explain the effect of the changes on the Corporation's overall Low risk appetite.

b) For each increase in appetite, please describe the resulting change in controls, mitigation activities, or mitigation spending.

c) Please provide the plan and timeline to improve workforce planning maturity, given the stated rationale that maturity is very low.

d) Please describe how MPI monitors adherence to its mandate to insure only Manitoba companies in SRE under the reduced appetite, and the resources applied to that monitoring.

e) Please describe the circumstances that led to a second revision of the Risk Appetite Statement on June 24, 2026, three months after the March 25, 2026 approval.

Rationale for Question:

To understand the changes to the Risk Appetite Statement and their effect on the management of the affected risks.

RESPONSE:

a) No risk appetite statements were lowered as part of the March 25, 2026 or June 24, 2026 reviews. While certain risk appetite statements were increased, these changes did not affect the Corporation's overall Low risk appetite, which remained unchanged following both reviews.

b) The risk appetite increases approved in March and June 2026 did not change or remove existing controls, reduce mitigation activities, or lower mitigation spending.

Risk appetite statements define the level of risk MPI is willing to accept in pursuing its strategic and operational objectives. The 2026 changes reflect management's reassessment of specific risks and current operating realities; they were not decisions to reduce risk management efforts.

Existing risk management processes, controls, monitoring activities, and risk treatment plans remain in place. Mitigation activities and spending continue to be determined based on each risk's nature and severity, cost-effectiveness, regulatory requirements, and operational needs.

Overall, the changes align the Risk Appetite Statement with the Corporation's operating environment, strategic objectives, and management's current assessment of risk without reducing controls, mitigation activities, or mitigation spending.

c) To increase the maturity of workforce planning, MPI has incorporated workforce planning within one of the 5 strategic pillars and put focus on establishing foundational workforce planning processes, governance, and workforce

intelligence to support more strategic decision-making across the divisions. To build organizational capability, a dedicated Workforce Planning Lead role was introduced to support senior leadership in developing workforce planning practices, tools, and workforce strategies aligned to business objectives. The strategy is to focus on building processes and educating our leaders over the next two years while ensuring the new ERP will provide the technology and data insights needed to increase our maturity levels further.

Key deliverables in the 2026/27 fiscal year include implementing key workforce planning enablers, including a Workforce Capacity Assessment Tool, Critical Positions and Key People Assessment Tool, and the development of Divisional Workforce Plans aligned to organizational strategy. In addition, the initiative will strengthen leadership and HR workforce planning capability, support the evolution of mature talent management programs, and introduce targeted capability assessments to better understand current and future workforce needs. Collectively, these efforts will move the organization from a reactive approach toward a more proactive, strategic workforce planning model that supports workforce sustainability and business success.

d) While the dealings with Special Risk Extension customers are outside the jurisdiction of this proceeding, MPI can share that commercial customers when contracting with MPI are subject to questions regarding their operations in Manitoba (location of central management and control) and providing proof of residency, e.g., articles of incorporation.

e) The March and June 2026 revisions were part of a comprehensive Risk Appetite Statement (RAS) review initiated at the direction of the Risk Committee of the Board. Given the scope of the review and the number of stakeholders involved, the updates were completed and approved in two phases.

The first phase (March 2026 revision) covered the Strategy, Technology, People, Legal and Compliance, and Operational risk appetite categories, which were

approved on March 25, 2026. The Reputation risk category was also reviewed as part of this phase. The second phase was approved on June 24, 2026 and covered the Earnings and Solvency risk categories, which required additional engagement and review with different stakeholders. The June revisions also reflected Board feedback arising from the March review of the Reputation risk appetite category.

Accordingly, the June 24, 2026 revisions were not a separate review, they simply completed the broader review process.

PUB (MPI) 1-97

Part and Chapter:	**Part X - RMF Appendix 4 as approved (MPI Exhibit #3, June 30, 2026)** **Part X - RMF chapter**	**Page No.:**	**1-5**
PUB Approved Issue No:	**15. Risk Assessment and Risk Management** **7. Capital Management Plan (a) Transfers of Extension excess capital**		
Topic:	**Risk Appetite**		
Sub Topic:	**Replacement of the Earnings Risk Appetite Thresholds**		

Preamble to IR (If Any):

The June 24, 2026 changes replaced the Earnings Risk appetite statements. The prior Basic statement set loss ratio deviation thresholds: attritional +5%, expense +2%, catastrophe +4%, prior year -5% to +2%, and combined +10%.

The new statements use income measures. Basic ROE is set within plus or minus 5% of 0% over a rolling five year period, and net income within plus or minus $30 million of budget on a five year historical average.

Extension ROE is set at 40% plus or minus 10%, with net income within plus or minus $10 million of budget.

SRE moved from avoiding net losses to positive net income over the long term, with ROE within plus or minus 10% of 0% and net income within plus or minus $20 million of budget. A statement for the DVA line was added.

The blacklined RAS (MPI Exhibit 5) shows four further removals from the Earnings Risk category that the Summary of Changes (MPI Exhibit 3) does not identify: the statement limiting the net impact of interest rate changes on Basic net income to plus or minus 1% of the market value of the Basic Claims investment portfolio, the Moderate appetite for interest rate exposure on non-Basic portfolios, deviation of more than plus or minus 10%

from budgeted corporate net income, and deviation of more than plus or minus 10% from budgeted expenses.

The Summary of Changes records the removal of the Reputation Risk statement on poor employee and agent conduct. That statement remains in the approved RAS (MPI Exhibit 4).

A year earlier, MPI reported no material changes to the RAS and filed its KRI and KCI list confidentially (PUB (MPI) 1-59 (2026 GRA)).

Question:

a) Please explain why the loss ratio deviation thresholds were removed from the Earnings Risk appetite and how loss ratio deterioration will now trigger monitoring or escalation.

b) Please explain how the risk appetite for interest rate risk is now expressed and monitored, given the removal of the interest rate statements from the Earnings Risk category.

c) Please explain how deviations of expenses from budget are now monitored and escalated, given the removal of the expense deviation statement.

d) Please explain how the Basic targets of ROE within plus or minus 5% of 0% and net income within plus or minus $30 million of budget align with break even pricing and the Capital Management Plan.

e) Please explain the basis for the Extension ROE target of 40% plus or minus 10%, and its relationship to the forecast transfers of Extension excess capital to Basic.

f) Please describe how actual results against the new earnings metrics will be measured and reported to the ERM Committee and the Risk Committee of the Board.

g) Please reconcile the Summary of Changes in MPI Exhibit 3 with the blacklined Risk Appetite Statement in MPI Exhibit 5, and provide a complete list of the

changes approved on June 24, 2026, including statements removed and the status of the Reputation Risk statement on poor employee and agent conduct.

h) Please confirm that MPI Exhibits 3 to 5 supersede RMF Appendices 4 to 6 as filed.

i) Please file an updated list of Key Risk Indicators and Key Control Indicators reflecting the new earnings metrics, in the manner of the confidential filing in PUB (MPI) 1-59 (2026 GRA).

Rationale for Question:

To understand the revised Earnings Risk appetite and how performance will be monitored against it.

RESPONSE:

a) The loss ratio deviation thresholds were removed from the Earnings Risk appetite because they primarily measured specific drivers of insurance performance rather than the enterprise financial outcome that the Earnings Risk category is intended to capture.

While the loss ratios are indicative of the underlying loss experience, they represent only one driver of the financial results. Annual earnings can be affected by a broader range of factors, including inflation, large weather events, investment returns, expense levels, and reserve development. Monitoring of the earnings risk therefore is a wider indicator that provides a more comprehensive view of the financial outcome rather than focusing on a specific driver of the results.

b) While interest rate risk is no longer included as a standalone earnings risk appetite measure, MPI continues to actively manage interest rate risk through its Operational Asset Liability Management (ALM) Policy. The ALM framework is designed to minimize the impact of interest rate movements on the Basic Claims surplus by aligning the interest rate sensitivity of assets and liabilities.

Under the ALM Policy, MPI maintains a target interest rate hedge ratio of 100% (within a tolerance of ±5%) between Basic Claims fixed income assets and liabilities. The hedge ratio is measured using dollar duration and is actively monitored daily by the investment manager. In addition, the market value of the Basic Claims portfolio is required to match the present value of the associated liabilities within ±$100 million.

The policy also establishes a tracking error objective to remain within ±1% of the market value of the Basic Claims investment portfolio. The tracking error is the surplus variation in dollars due to market factors relating to the fixed income assets, which measures the effectiveness of the dollar duration hedging strategy.

Hedge ratios, dollar matching results, and tracking error measures are reported quarterly to the Investment Committee (IC) and IC Working Group. These operational controls help ensure that interest rate risk continues to be actively measured, monitored, and managed, even though they are no longer captured through a separate earnings risk appetite statement.

c) The removal of the expense deviation statement did not change MPI's existing monitoring and escalation processes for corporate expenses. Budget-to-actual expense variances continue to be monitored through monthly financial reporting to management (inclusive of executive), including reporting of expense ratios (see Part VIII EXP Appendix 24) and statement of operations results at both the corporate and line of business levels. Corporate expenses are also reviewed and monitored through recurring divisional meetings with finance throughout the year. Quarterly financials are also presented to the audit and finance committee/board.

d) The Basic line of business is priced on a break-even basis and is not intended to generate any profits or losses. However, annual financial results are inherently subject to volatility arising from factors such as claims experience, weather events, inflation, investment market performance, and reserve development. As a result, achieving a 0% ROE or net income exactly equal to budget in any single year is neither practical nor expected.

The Earnings Risk appetite measures of maintaining ROE within ±5% of 0% and net income within ±$30 million of budget (across a five-year period) are therefore intended to assess whether financial results remain reasonably consistent with the Corporation's break-even mandate while recognizing normal year-to-year variability. These measures provide a reasonable tolerance for short-term fluctuations while helping to identify whether financial performance is trending materially above or below the level anticipated through the ratemaking and budgeting processes. Please note that MPI currently does not have an approved Capital Management Plan but adheres to its statutory target.

e) The Extension line of business is intended to support the overall financial strength of the Corporation. This is a competitive line of business and is expected to generate earnings. The Extension ROE target of 40% ±10% (across a five-year period) was established to reflect this role. The target recognizes that Extension is expected to generate returns sufficient to maintain its target capital position, while acknowledging the volatility that can arise from underlying experience affecting annual profitability. The tolerance range therefore provides a reasonable allowance for short-term fluctuations while identifying sustained departures from expected performance. Please note MPI currently does not have an approved Capital Management Plan and capital transfers from Basic to Extension are discretionary.

f) Approved earnings measures have not yet been incorporated into MPI's Key Risk Indicator (KRI) / Key Control Indicator (KCI) inventory. As part of the ongoing KRI development and review process, the applicability of KRIs to support monitoring of the Earnings Risk appetite will be assessed.

Consistent with the Risk Appetite Statement, approved risk indicators are used to monitor actual values and trends against risk appetite thresholds and tolerances. Where appropriate, earnings-related indicators may be incorporated into MPI's risk monitoring and reporting processes and reported to the Executive Risk Management Committee (ERMC) and the Risk Committee of the Board (RCB).

g) MPI Exhibit 3 *(RMF Appendix 4 – RAS Summary of Changes as of June 24, 2026)* reflects the changes that management presented to and that were approved by the RCB and subsequently ratified by the Board on June 24, 2026.

Following the filing of the 2027 General Rate Application, MPI identified an administrative error in the Risk Appetite Statement documents included in the meeting package that were later filed with the PUB. Specifically, the approved removal of the Reputation Risk statement *"Poor employee and agent conduct"* was inadvertently omitted from the tracked and clean versions of the Risk Appetite Statement, even though the supporting documentation provided to the MPI Board members clearly identified this intended change.

As a result, Exhibit 3 correctly identifies the removal of the statement, but Exhibits 4 and 5 do not reflect that approved change. MPI has since corrected this error and filed revised tracked and clean versions of the Risk Appetite Statement as Appendices 9 and 10. The revised documents align with the change presented to and approved by the RCB and ratified by the Board on June 24, 2026.

Table 1 reconciles the approved changes with the corrected Risk Appetite Statement and provides a complete list of the changes approved on June 24, 2026.

Table 1. Reconciliation of Exhibit 3 and 5

Risk Category	**June 24, 2026 Approved Change (MPI Exhibit 3)**	**Corresponding Change in Blacklined Version (MPI Exhibit 5)**
Earnings Risk	Three (3) risk appetite statements have been updated.	Blackline reflects revisions to three existing risk appetite statements and the addition of

	One (1) risk appetite statement was added to this risk category	one new risk appetite statement under Earnings Risk. (p. 5-6)
Solvency Risk	One (1) risk appetite statement has been updated from “Very Low” to “Low”.	Blackline reflects the change from "Very Low" to "Low" (p. 6).
Reputation Risk	Four (4) risk appetite statements were updated from "Very Low" to "Low". One (1) risk appetite statement was removed to avoid duplication, as the underlying risk is addressed under other risk categories. **Removed statement:** *"Poor employee and agent conduct."*	The four appetite rating changes were reflected in the filed blackline. The removal of *"Poor employee and agent conduct"* was approved but was inadvertently omitted from the filed tracked and clean versions due to an administrative error. Revised tracked and clean versions have been filed to correct the record. (p. 9)

h) MPI Exhibits #3 to #5 and RMF Appendices 4 to 6 refer to the same June 24, 2026 Risk Appetite Statement materials under different filing references. As described in response (g), MPI subsequently identified an administrative error in the Risk Appetite Statement documents and has filed revised tracked and clean versions as MPI Exhibit #12. The revised appendices reflect the approved changes and should be read in place of the previously filed Risk Appetite Statement documents.

i) The earnings measures approved on June 24, 2026 have not yet been incorporated into MPI's Key Risk Indicator (KRI) / Key Control Indicator (KCI) inventory. Accordingly, MPI cannot currently file an updated KRI/KCI list reflecting these earnings measures.

The applicability of indicators related to these measures will be assessed through MPI's ongoing KRI development and review processes, in accordance with the Risk Appetite Statement and established governance practices.

PUB (MPI) 1-98

Part and Chapter:	Part X - RMF Appendix 10 Part X - RMF Appendix 9	**Page No.:**	2 1
PUB Approved Issue No:	15. Risk Assessment and Risk Management 10. Claims forecasting		
Topic:	Top Corporate Risks		
Sub Topic:	Acceptance of Inflation Risk and the Claims Forecast		

Preamble to IR (If Any):

Question:

a) Please state the indexation factor assumed in the claims forecast and in reserves, and the indexation factor currently expected.

b) Please quantify the effect on the claims forecast, the reserves and the rate indication if the indexation factor reaches the 6% cap.

c) Please explain the decision to accept rather than mitigate this risk, and identify any mitigation considered.

Rationale for Question:

To understand the treatment of inflation risk in the claims forecast and reserves.

RESPONSE:

a) The claims forecast projects the loss costs at the benefit level in effect at the date of loss; therefore no indexation is included in the claims forecast.

In the rate indication, the application of indexation to the claims forecast is shown in *Part VII RI Appendix 1, Table 2*. Figure 1 below shows the inflation forecast used in the rate indication on line 1 and the updated inflation forecast as of June 2026 on line 2.

Figure 1 Inflation Forecast

Line No.	Description	2026/27	2027/28	2028/29	2029/30	2030/31
1	**March 2026 Forecast**	2.50%	2.36%	2.02%	2.00%	2.00%
2	**June 2026 Forecast**	3.48%	2.00%	2.07%	2.00%	2.00%

b) Assuming an indexation factor of 6% in the 2027/28 and 2028/29 fiscal years, MPI's total forecasted 2027/28 rating year discounted ultimate losses would increase by $7.9M, while MPI's overall indicated rate change would increase from 2.38% to 3.00%, an increase of 0.62%. Please note that there is a one-year lag in the application of indexation. For example, the indexation factor for 2027/28 is applied to claims paid in accident year 2028/29. Further, claims forecast projects loss at the benefit level of the date of loss, therefore, the 2026/27 inflation factor does not impact the rate indication.

   With respect to the impact on forecasted reserves, the March 2026 Forecast inflation assumptions for 2027/28 and 2028/29 were increased to 6%. This change increased forecasted Insurance Contract Liabilities by approximately $117.4 million in 2027/28 and $125.7 million in 2028/29. The higher inflation assumptions also increased forecasted Reinsurance Contract Assets by approximately $0.5 million and $0.6 million in 2027/28 and 2028/29, respectively.

c) The inflation risk that is of concern is the indexation risk of past claims which could potentially be under reserved and can not be recovered in future premiums. The mitigation of the indexation risk is a consideration in the current ALM study. The recommendation on whether to retain the risk or mitigate the risk, either partially or fully, will be addressed in the ALM study which will be provided after the August 12th Investment Committee meeting.

PUB (MPI) 1-99

Part and Chapter:	**Part X - RMF Appendix 10** **Part X - RMF Appendix 9**	**Page No.:**	**1-3** **1**
PUB Approved Issue No:	**15. Risk Assessment and Risk Management** **18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap (including Major Programs)**		
Topic:	**Top Corporate Risks**		
Sub Topic:	**Major Program Execution and Finance Capacity Risks**		

Preamble to IR (If Any):

Change/Transformation Execution Failure for Major Programs ($3 million budgeted or more) has been High in each of the last four assessment periods in RMF Appendix 10, and all seven top risks for 2026/27 are High (RMF Appendix 9).

Pricing risk was elevated as a top corporate risk in the last four quarters and has fluctuated between high and medium risk assessment.

Inadequate Capacity entered the list in Q1 2026/27. Finance resources are stretched across operations and critical projects, including an ERP upgrade and replacement, with challenges backfilling key roles, raising the risk of project delays and inadequate go live support.

The MNP Project Management Review (PUB (MPI) 2-31 (2026 GRA), Appendix 1 summary, report at Attachment D) found eleven project management observations, five high risk, including resource planning and performance, risk identification and mitigation, and benefit measurement, and four high risk governance observations.

Question:

a) Please identify the ERP upgrade and replacement project in the Application, including its approved budget, timeline, and treatment in the expense forecast and deferred development costs.

b) Please explain how the cost and benefit assumptions for Major Programs in the Application reflect a High residual risk of execution failure that has persisted across four assessment periods.

c) Please explain the change in risk variation for pricing risk.

d) Please describe the actions under way to address finance capacity, and state whether incremental staffing or consulting costs are included in the expense forecast.

e) Please provide the status of MPI's actions in response to the MNP Project Management Review recommendations filed in PUB (MPI) 2-31 (2026 GRA), and identify which of the high risk observations remain open.

Rationale for Question:

To understand the management of major program execution and capacity risks.

RESPONSE:

a) Refer to *Part V IT Appendix 9 – Corporate Project Listing* for details on the approved budget and timeline. Additional details can be found in the Lean Business Case for ERP Infor Upgrade *CC (MPI) CSI 1-3 Appendix 2 – Infor Upgrade Lean Business Case - Confidential* and the Lean Business Case for ERP Assessment and Planning *CC (MPI) CSI 1-3 Appendix 1 – ERP Replacement Assessment and Planning Lean Business Case – Confidential*.

Refer to *Part VIII EXP Appendix 25 -10 Year Summary Basic Corporate Project Expenditures (Expense and Deferred Development)* for the schedule of project cost forecasts split between deferred and expense.

b) Large-scale ERP replacement programs carry an inherently high delivery execution risk. This is not unique to MPI; it reflects the industry-recognized complexity of ERP modernizations, including business dependency, integration, data readiness,

organizational change, sustained capacity, and reliance on disciplined program execution. Gartner and other industry references consistently identify ERP initiatives as high-risk, particularly where organizations have limited experience delivering major enterprise transformations.

For that reason, it is appropriate and transparent to identify the program's inherent execution risk as high, even though mitigation activities are in place. Characterizing the risk as lower would understate the nature of the undertaking; the more responsible position is to acknowledge the risk clearly while demonstrating how MPI is reducing residual risk through deliberate mitigation.

MPI is mitigating this risk through experienced ERP advisory support, structured procurement and vendor evaluation, industry-informed requirements, risk assessment practices, and contract safeguards that strengthen vendor accountability and reduce downstream delivery risk.

The ERP advisory vendor will support procurement strategy, requirements and target-state definition, vendor evaluation, contract and statement-of-work review, negotiation support, and implementation readiness planning. This advisory support complements MPI's internal governance and delivery teams by bringing specialized ERP, sourcing, commercial, and risk expertise to areas that are critical to reducing execution uncertainty.

Strengthened Major Programs governance further supports execution through defined decision rights, sponsor accountabilities, escalation pathways, independent risk advisory support, and ongoing monitoring of risks, issues, dependencies, scope, schedule, budget, and resource constraints.

MPI's approach is therefore to be forthright about the inherent risk while applying industry-informed mitigations to reduce delivery uncertainty and improve the likelihood of achieving the intended business outcomes.

c) Pricing risk has re-emerged as a high risk driven by the SRE line of business. Key factors contributing to this change include:

- **Development of the SRE pricing data set:** MPI continues to build and enhance the pricing data required to support actuarial analysis for the SRE line of business. Historical data required to support pricing in a competitive line of business was not always available, particularly during the transition to a new policy system. This created challenges in developing the data foundation needed for pricing analysis and decision-making.
- **Actuarial resource constraints:** The actuarial team experienced significant turnover over the past year. As resources were directed toward developing the SRE pricing data set, capacity for other pricing-related work was reduced.

Mitigation efforts are currently underway to address both the SRE pricing data requirements and actuarial staffing vacancies. As these initiatives progress and data quality and resource capacity improve, pricing risk is expected to decline over time.

d) MPI is addressing Finance capacity constraints related to Major Program initiatives through coordinated resource forecasting for project and operational work through March 2027, including identification of periods when Finance resources are fully committed.

These forecasts have been consolidated into a single resource view and are reviewed monthly by Finance, HR, and EPMO, and Major Program Leadership to assess capacity, identify mitigation options, and escalate decisions to the Executive Steering Committee where required.

Incremental staffing costs are included in the General Rate Application expense forecast. No additional consulting costs have been identified at this time.

e) MNP performed a status review of the observations from the audit during October 2025. MNP reported the following to MPI based on the status review:

Report	Report Date/Follow up	# OBS	#Action Items	Comments/Status	Status Review (October 2025)
Portfolio and Project Management	July 18, 2024	17	0	Confirmed that most processes are fully implemented, including scoping, resource planning, budgeting, and earned value monitoring. Remaining gaps relate to stakeholder engagement enforcement (75%) and risk management integration (50%), which require role fulfillment and enterprise-level alignment.	96%

Of the 17 observations, there were no action items identified. 15 observations were fully addressed. Overall, 96% of the observations were addressed. The two observations that were partially addressed, remain open, are expanded upon below:

Enhanced Stakeholder Engagement

To improve stakeholder engagement oversight, the EPMO will work with the Corporate Change Enablement team to assess opportunities to introduce stakeholder-focused indicators and reporting metrics as part of its governance framework, providing greater visibility into engagement effectiveness and emerging risks.

Risk Management Integration

For risk management integration, the EPMO has implemented risk categorization and trend reporting within its portfolio dashboards and will continue strengthening alignment with Enterprise Risk Management through improved risk taxonomy mapping, periodic risk reviews, and formalized escalation pathways. These initiatives will support earlier identification of systemic risks and enhance enterprise-wide visibility while ensuring project risks are managed at the appropriate level.

Topic:	Enterprise Risk Management Policy		
Sub Topic:	Recording and Reporting		

Preamble to IR (If Any):

In making edits to the policy, MPI added language on page 16 in the '7.6 Recording and Reporting' Section of the ERM policy that:

"Appendix 2 ("Risk Escalation Process") describes the risk escalation to be followed throughout MPI".

The corresponding deletion is noted:

"Appendix 2 provides a summary of report types, including their description, frequency, and purpose.

Question:

a) Please file a 2027/28 version of Appendix 2, including all prior reported characteristics of recording and reporting.
b) Please explain why the prior Appendix 2 was abandoned in favour of the escalation process.
c) If not provided in the answer to a), please explain the cadence and form of reporting, both scheduled and ad-hoc, for each individual or group (eg. Board of Directors, committees, risk owners) responsible to monitor and react to risk issues. Please include the frequency of meetings and how risk issues are escalated within the context of this cadence.

Rationale for Question:

To understand how risks are recorded and reported.

RESPONSE:

a) Appendix 2, as filed, is the most recent approved version available and reflects the Board-approved updates as of March 25, 2026. Accordingly, MPI has no subsequent 2027/28 version of Appendix 2 to file. The version provided in the filing represents the current board-approved document and includes all recording and reporting characteristics contained therein.

b) The purpose of the ERM Policy is to establish governance, roles, accountabilities, and core risk management requirements, rather than to prescribe operational reporting artifacts that may evolve over time. Embedding detailed reporting requirements within the policy reduces flexibility and requires policy amendments whenever reporting practices are updated.

The new “Appendix 2: Risk Escalation Process” shifts the policy from prescribing specific reporting products to outlining the criteria, responsibilities, and process for identifying, assessing, escalating and treating risks. This approach clarifies how significant new risks identified can be reported and escalated appropriately while allowing reporting formats, dashboards, metrics, and committee materials to evolve in response to business needs without requiring changes to the policy itself.

c) The table below summarizes the key governance roles involved in monitoring and responding to risk issues, including the form and frequency of risk reporting and the manner in which risk matters are escalated through the Corporation's risk governance structure.

Role / Committee	Reporting Cadence and Form	Frequency of Meetings	Role in Risk Escalation and Oversight
Board of Directors	Receives risk reporting as required	Regular Board meeting cycle	Provides overall oversight of the ERM Program, facilitates open communication between management, Risk Committee of the Board and the Board with respect to risk, and approves the ERM policy and Risk Appetite Statement
Risk Committee of the Board (RCB)	Quarterly reporting on Top Corporate Risks and other high and critical corporate risks	Quarterly	Reviews management's identification and assessment of corporate risks, monitors risk treatment plans as required
Executive Risk Management Committee (ERMC)	Quarterly reporting on Top Corporate Risks, risk appetite, risk tolerance breaches, and other significant enterprise risks	As required, typically multiple times throughout the quarter	Reviews key risk exposures, approves risk treatment plans as required, reviews risk appetite and tolerance breaches, and escalates matters to the RCB when required
Enterprise Risk Owners	Quarterly risk owner reporting and updates on risk treatment plans	As required	Accountable for enterprise risks, approve specified risk treatment plans, monitor risk exposures and treatment plans, and regularly report and escalate risks to the ERM Function, ERMC, the Chief Legal & Risk Officer, and the RCB, as applicable

PUB (MPI) 1-101

Part and Chapter:	Part III Basic Autopac Coverage Chapter (section BAC.3)	**Page No.:**	
PUB Approved Issue No:	17. Status update on report to be prepared by experts on Traumatic Brain Injuries (TBI) setting out: current scientific knowledge and proven medical best practices and best practicable technology to diagnose, assess and manage brain injuries; appropriate insurance for victims of s; and a comparison of leading medical and insurance practices to the current practices and procedures of MPI		
Topic:	Traumatic Brain Injury		
Sub Topic:			

Preamble to IR (If Any):

"14.33 MPI shall, in the 2027 GRA, provide an update on the progress of the report to be prepared by the TBI expert setting out current scientific knowledge and proven medical best practices and best practical technology to diagnose, assess and manage brain injuries and compare them to the current practices and procedures of MPI in the 2027 GRA."

MPI states the RFP was issued in early 2026, but was not met with a response, meaning MPI was positioned to direct-source the engagement and reached out to a potential consultant. MPI has recently received confirmation from "a reputable professional services firm" and that a report will be prepared comparing the TBI practices and procedures at MPI against industry best practices.

As the service agreement has not yet been executed, MPI indicated that it cannot at this time share the name of the firm or the specifics of its proposal. While the firm cannot commit to having a final report ready for October, MPI expects to provide an update on the progress of the report at the Oral Hearing

Question:

a) Please provide a copy of the RFP created Re: Directive 14.33 Order 156/25.

b) Include a list of recipients and the correspondence to and from candidates, including dates RFP sent, dates responses required/received.

c) Please provide MPI's assessment of why there was no uptake for its RFP.

d) Please explain why the service agreement with the sole-sourced party has not yet been executed.

Rationale for Question:

To understand the timing of the TBI report.

RESPONSE:

a) Please see *Appendix 1 - RFP3455 Traumatic Brain Injury Expert Advisor*.

b) The RFP was posted on Merx on March 20, 2026, and closed for responses on April 10, 2026, with zero proposals submitted. The Ontario Brain Injury Association (OBIA) was notified of the posting on March 20, 2026, with an invitation to respond. OBIA did not submit a response to the RFP. Seven additional entities downloaded and viewed the RFP, however, they did not submit proposals. Please see *Appendix 2 - RFP3455 Communication Report* for additional details.

c) MPI believes the limited response may be attributable to the specialized expertise required for this engagement. The work requires both subject-matter expertise in traumatic brain injuries and an understanding of no-fault insurance practices, a combination that is not commonly available and may have limited the number of qualified respondents interested in submitting a proposal.

d) The General Rate Application was prepared and filed on June 24, 2026, and MPI had just received approval from the Minister's Office to waive tender and enter into an agreement with the vendor (on June 23, 2026). The responsible business unit has since met with vendor management to work through the process of establishing a Statement of Work (SOW), which is expected to be finalized and executed in early August 2026.

MANITOBA PUBLIC INSURANCE

REQUEST FOR PROPOSAL

#3455

FOR

Traumatic Brain Injury Expert & Advisor

ISSUE DATE:	March 20, 2026
LAST DATE FOR QUESTIONS:	March 27, 2026 AT 4:30 PM CENTRAL TIME
MPI RESPONSES BY:	April 2, 2026
SUBMISSION DEADLINE:	**April 10, 2026 AT 4:30 PM CENTRAL TIME**
Invitation(s) to Negotiate:	May, 2026 (Estimated)

Participating Vendors intending to submit a Proposal must do so by the Submission Deadline and in accordance with Article 7.00 of this Request for Proposal. Late Proposals will not be accepted.

This procurement process is subject to Chapter Five of the Canadian Free Trade Agreement and to the New West Partnership Trade Agreement.

THE CONTENTS OF THIS RFP SUPERSEDE ANY INFORMATION CONTAINED ON THE MERX WEBSITE.

TABLE OF CONTENTS

PART A – Procurement Process Information

1. Article 1.00 – Procurement Process Definitions
2. Article 2.00 – MPI Profile
3. Article 3.00 – Purpose and Service Requirements
4. Article 4.00 – Pre-Submission Events
5. Article 5.00 – Evaluation and Award
6. Article 6.00 – Other Rules of the Procurement Process
7. Article 7.00 – Guidelines for Submitting a Proposal
8. Article 8.00 – Costs

PART B – Procurement Details

9. Schedule A – Terms and Conditions
10. Schedule B – Goods and Services

    (a) Appendix B.1 – Definitions
    (b) Appendix B.2 – Material Disclosures
    (c) Appendix B.3 – Scope of Work
    (d) Appendix B.4 – Remote Work Security Standard

PART C – Submissions

11. Schedule C – Submission Forms and Information

    (a) Appendix C.1 – Participating Vendor Authorization
    (b) Appendix C.2 – Service Requirements Response Form
    (c) Appendix C.3 – Costs
    (d) Appendix C.4 – Proposed Additional Service Providers
    (e) Appendix C.5 – References

PART A
PROCUREMENT PROCESS INFORMATION

1.00 PROCUREMENT PROCESS DEFINITIONS

These definitions apply to Part A - Procurement Process Information:

"Agreement(s)" means the agreement(s) to be entered into between MPI and the Vendor as contemplated by this RFP.

"Business Day" means any day other than Saturday, Sunday, or a statutory or civic holiday observed in Manitoba.

"Manitoba Public Insurance" or "**MPI**" means The Manitoba Public Insurance Corporation as established by *The Manitoba Public Insurance Corporation Act* (CCSM c P215).

"**MERX**" means the MERX online tendering service located on the internet at: https://www.merx.com/ operated by mdf commerce inc.

"Participating Vendor" means any person, corporation, or entity who submits a Proposal in response to, and in accordance with, this RFP.

"Proposal" means the proposal submitted by a Vendor in response to, and in accordance with, the provisions of this RFP.

"Representatives" means the directors, officers, shareholders, employees, contractors, subcontractors, partners, volunteers, affiliates, agents, delegates, and other representatives of a party.

"RFP" means this Request for Proposal, including all schedules, appendices, addenda, and MPI's responses to Vendor questions that are posted to MERX.

"Services" means the provision of goods, services, and deliverables as specified in this RFP, including everything necessary for or incidental to the fulfilment thereof.

"Service Requirements" means MPI's requirements for the Services as provided in this RFP.

"Submission Deadline" means the deadline for the submission of a Proposal to MPI as set out on the front page of this RFP.

"Vendor" means the Participating Vendor(s) who enter(s) into an Agreement with MPI to provide MPI with the Services.

2.00 MPI PROFILE

MPI is a provincial Crown corporation which has served Manitobans since 1971. It provides universal mandatory basic automobile insurance coverage for all drivers and for private and commercial vehicles, as well as several optional automobile insurance products. MPI also administers driver and vehicle licensing services for the Government of Manitoba. For more information, see *www.mpi.mb.ca*.

3.00 PURPOSE AND SERVICE REQUIREMENTS

3.01 Purpose of RFP

The purpose of this RFP is to solicit Proposals from qualified Vendors to examine and complete a report on MPI's current process of handling claimants with traumatic brain injuries.

3.02 Detailed Description of the Service Requirements

The Vendor must deliver the Services in accordance with MPI's Service Requirements. Participating Vendors are referred to Schedule B, including all related appendices, and Appendix C.2 – Service Requirements Response Form.

3.03 Material Disclosures

Participating Vendors must consult Appendix B.2 – Material Disclosures for background information and estimates relevant to preparing their Proposals and providing the Services.

4.00 PRE-SUBMISSION EVENTS

4.01 Questions and Answers

(a) All questions regarding the contents of this RFP or the procurement process must be directed to MPI via e-mail as follows:

To e-mail address purchasingservices@mpi.mb.ca addressed in the Subject line as: ***RFP #3455, Attention: Cheryl Caligiuri***

(b) No telephone, facsimile, or verbal inquiries will be responded to or entertained.

(c) All questions and corresponding answers which MPI reasonably deems to be of interest to all Participating Vendors will be posted through MERX by the date indicated on the cover page.

(d) All questions regarding the MERX website should be addressed to MERX customer support at 1-800-964-6379 or merx@merx.com.

5.00 EVALUATION AND AWARD

5.01 Evaluation Summary

MPI will evaluate and score Proposals according to the following evaluation matrix:

EVALUATION CRITERIA	APPENDIX C.2 ITEM	MAX SCORE
Mandatory Requirements		
Insurance	M-01	**Pass / Fail**
Technical Evaluation		
Vendor Requirements Vendor's ability to meet or exceed MPI's capability, qualification, and ERM needs		**30%**
Service Requirements Vendor's ability to provide Services that meet or exceed MPI's services and deliverables needs		**35%**
Information and Records Management Vendor's ability to meet or exceed MPI's information and records management needs		**10%**
Costs	**Appendix C.3**	**25%**
TOTAL		**100%**

5.02 **Compliance**

(a) MPI will perform an initial review of Proposals to ensure that the Mandatory Requirements are addressed and that the Proposal is compliant with the submission criteria; and

(b) MPI may reject a Proposal as being non-compliant if MPI is unable to effectively evaluate the Proposal because it is incomplete, unclear, conditional, contains irregularities, does not adequately address or meet the requirements, or is otherwise not strictly in accordance with the requirements of this RFP.

5.03 **Mandatory Requirements**

(a) "**Mandatory Requirements**" are Service Requirements that must be met by a Participating Vendor and are scored on a pass/fail basis.

(b) Mandatory Requirements are initially evaluated based upon whether MPI can reasonably determine from the Participating Vendor's Proposal that the Mandatory Requirements have been addressed.

(c) If a Participating Vendor fails to adequately address a Mandatory Requirement following Correction (if applicable) their Proposal will be removed from the procurement process and will not be further evaluated.

(d) MPI will not make an award to a Participating Vendor who cannot fulfill all the Mandatory Requirements.

5.04 **Corrections**

(a) At any time MPI may:
  (i) contact all Participating Vendors that met the Submission Deadline and submitted a non-compliant Proposal to request they correct their Proposal; or
  (ii) require a Participating Vendor(s) to clarify any information they have provided during the procurement process; or
  (iii) issue a clarification or question(s) to all compliant Participating Vendors and require them to submit updated information taking into account such clarification or question(s) within the requested timeframe;

(a "**Correction**").

(b) Notwithstanding the foregoing, MPI is not obliged to permit Correction of any aspect of a Proposal, or any other information submitted by a Participating Vendor.

(c) Correction may include:

(i) correcting an obvious error identified by MPI;
(ii) clarifying information included in a Proposal;
(iii) supplying information missing from a Proposal; or
(iv) supplying new information.

(d) If MPI contacts a Participating Vendor and requests Correction as set out above, the Participating Vendor must respond to MPI with the requested information within two (2) Business Days of receiving the request.

(e) If the Participating Vendor does not supply MPI with the requested information within two (2) Business Days of receiving the Correction request, MPI may in its sole discretion evaluate the Proposal as submitted, deem the Proposal non-compliant and reject the Proposal, or extend the timeline for the Participating Vendor to comply with the Correction request.

(f) Any information received by MPI responsive to a Correction may be considered in the evaluation process.

5.05 **Evaluation Methodology**

MPI will evaluate Proposals based on their contents. Proposal scoring may be impacted if the contents do not reasonably demonstrate how well, if at all, the Participating Vendor can meet MPI's Service Requirements.

(a) **Technical Evaluation**

(i) All Service Requirements in the technical evaluation are divided into the categories set out in the table in Section 5.01.

(ii) All Service Requirements in the technical evaluation will either be Key Requirements or General Requirements:

(1) **Key Requirements** are "must have" elements of the procurement that are evaluated on a points basis. Participating Vendors must obtain at least the identified minimum score for each Key Requirement. MPI will not make

an award to a Participating Vendor who has failed to obtain a passing grade in any Key Requirement.

(2) **General Requirements** are "nice to have" elements of the procurement that are evaluated on a points basis. There is no minimum score associated with individual General Requirements.

(iii) Except for any Service Requirements specifying different scoring in Appendix C.2 – Service Requirements Response Form, Service Requirements in the technical evaluation are scored from 0 to 5 as follows:

SCORE	SUMMARY	DESCRIPTION
0	Unacceptable	No response, or completely unacceptable response that does not meet the requirement.
1	Seriously Deficient	Response that is deficient in many areas and does not meet basic elements of the requirement. Deficiencies cannot be effectively mitigated.
2	Weak	Response that falls short of meeting the basic elements of the requirement. Deficiencies can be partially mitigated.
3	Acceptable	Acceptable response that meets the basic elements of the requirement. Deficiencies can be mostly or fully mitigated.
4	Meets	Solid response that fully meets the requirement. There are no deficiencies to be mitigated.
5	Exceeds	Outstanding response that exceeds the requirement.

(b) **Technical Score**

(i) All Service Requirements allocated to a category are individually evaluated and scored.

(ii) The scores of all Service Requirements within a category are then combined to create the category score, which is weighted in accordance with the table set out in Section 5.01.

(iii) The sum of all the weighted category scores is the "**Technical Score**".

(iv) If there is a minimum Technical Score identified in the table in Section 5.01, and if a Participating Vendor fails to meet the minimum Technical Score their Proposal will be removed from the procurement process and will not be further evaluated.

(c) **Cost Score**

The "**Cost Score**" is calculated based on the following formula:

(Total price of lowest Proposal / Total price of Proposal) x (Maximum potential Cost Score as set out in Section 5.01) = Cost Score

(d) **Combined Score**

The **"Combined Score"** is the sum of the Technical Score and the Cost Score.

(e) **Initial Ranking**

All Proposals that receive a Cost Score will be initially ranked in accordance with their Combined Scores.

(f) **Shortlisting**

At MPI's sole discretion, MPI may create a shortlist of the highest ranked Participating Vendors.

(g) **Demonstrations & Interviews**

(i) At its sole discretion, MPI may invite the shortlisted Participating Vendors to be interviewed or to demonstrate their services to MPI.

(ii) The interviews or demonstrations may be held virtually or at MPI's 234 Donald Street location in Winnipeg, Manitoba.

(iii) Interviews or demonstrations will be scheduled by MPI with the shortlisted Participating Vendors, and MPI will provide detailed instructions with respect to the expected format and content. Shortlisted Participating Vendors should be flexible in their scheduling.

(iv) If shortlisted Participating Vendors are unable to attend an interview or demonstration during the required timeframe, their Proposal may, at MPI's sole discretion, be removed from the procurement process and not be further evaluated.

(v) MPI reserves the right to vary the scheduling, timing, and content.

(vi) The interviews or demonstrations must be provided by the shortlisted Participating Vendors to MPI free of charge.

(h) **References**

MPI may, at its sole discretion, contact any references provided by a Participating Vendor.

(i) **Validation**

MPI may validate and, if necessary, adjust any individual Service Requirement Score, category score, Technical Score, Cost Score, or the Combined Score based on:

(i) any Correction provided pursuant to Section 5.04;
(ii) any information provided by the Participating Vendor's references;

(iii) the results of confirming a Participating Vendor's ability to meet a Mandatory Requirement; or
(iv) demonstrations or interviews, if held.

(j) **Revised Ranking**

Following validation, MPI will produce a revised ranking of all Participating Vendors eligible for award based on the validated or adjusted Combined Scores (the "**Validated Score**").

(k) **Tiebreaker**

If at any stage of evaluation two (2) or more Participating Vendors obtain identical Combined Scores or Validated Scores, MPI reserves the right to request additional information from these Participating Vendors to determine the highest ranked between them.

5.06 **Negotiations**

(a) MPI will invite the Participating Vendor that has attained the highest Validated Score (the "**Top Ranked Vendor**") to negotiate an Agreement for the Services.

(b) MPI may request that the Top Ranked Vendor provide an unchanged, unlocked Microsoft Word version of its Proposal.

(c) Participating Vendors must negotiate in good faith with the goal of entering into an Agreement within a reasonable amount of time.

(d) If at any time during negotiations MPI determines, in its sole and unfettered discretion, that continued negotiations will not result in the timely finalization of an Agreement with terms and conditions that are satisfactory to MPI, then:

(i) MPI shall provide the Top Ranked Vendor a specified period of time (to be determined by MPI) to present its best and final offer; and

(ii) If MPI does not accept the Top Ranked Vendor's best and final offer, MPI shall terminate negotiations with the Top Ranked Vendor.

(e) If MPI terminates negotiations with the Top Ranked Vendor, the process under subsections (a) through (c) may be repeated with the remaining Participating Vendor(s) in the order of highest to lowest Validated Score until MPI:

(i) arrives at an Agreement with one of the Participating Vendors; or

(ii) chooses to reject all remaining Proposals.

MPI shall not resume negotiations with a Participating Vendor that have been terminated.

(f) Participating Vendors must negotiate and be flexible with the terms of any related agreements that they require MPI to sign.

(g) MPI anticipates and expects that the terms and conditions set out in Schedule A of this RFP will be incorporated into any negotiated Agreement for the Services. These terms and conditions may be reasonably amended or adjusted during the negotiation process.

(h) MPI is unable to accept material changes to the Proposal during negotiations if such changes would impact the Top Ranked Vendor's Validated Score such that it is no longer the Top Ranked Vendor.

(i) As a result of negotiations pursuant to this Article 5.00, the parties may reasonably modify the Service Requirements.

5.07 **Award of Agreement**

(a) Notwithstanding any statement to the contrary, the Agreement shall only be deemed awarded once negotiations have completed and the parties have executed an Agreement.

(b) MPI will post on MERX the name of the Vendor and the total prices set out in the Agreement within seventy-two (72) days of award. In submitting a Proposal, a Participating Vendor accepts having its name, address, total price, and a description of the Services released if chosen as the Vendor.

6.00 OTHER RULES OF THE PROCUREMENT PROCESS

6.01 Non-Binding Process

(a) This procurement process does not constitute the formation of a binding contract between MPI and a Participating Vendor. A Participating Vendor shall not acquire any legal or equitable rights relative to this RFP, the procurement process, the Services, or the Agreement until a binding Agreement has been executed on terms satisfactory to MPI and all conditional obligations have been fulfilled by the Vendor.

(b) As the procurement process is non-binding, the Participating Vendor may withdraw its Proposal at any time prior to award.

6.02 Liability

(a) All information, whether written, oral, or in any other form, that has been or may subsequently be made available to Participating Vendors is provided on the following conditions:

(i) in deciding to submit or not to submit a Proposal or in interpreting this RFP, Participating Vendors are not to rely on any representation, whether oral or written, other than as expressed in this RFP;
(ii) while the contents of this RFP are believed to be accurate, the Service Requirements, statements, opinions, estimates, forecasts, or other information in this RFP, including Appendix B.2 – Material Disclosures, may change at any time during the procurement process, and MPI will have no liability to any Participating Vendor if any of the above are modified for any reason;
(iii) this RFP is only designed to reflect and summarize information concerning MPI's Service Requirements and is not a comprehensive description of it; and,
(iv) Participating Vendors should seek their own professional advice where appropriate.

(b) By submitting a Proposal, the Participating Vendor agrees it will not claim damages, for whatever reason, relating to this RFP or the procurement process in excess of an amount equivalent to the reasonable costs incurred by the Participating Vendor in preparing its Proposal, and waives any potential claims for loss of profits if no Agreement is entered into between the Participating Vendor and MPI. The Participating Vendor agrees this is a reasonable allocation of risk and is a fundamental part of this RFP.

6.03 **MPI's Rights**

(a) MPI reserves the right to:

(i) vary the timing and processes referred to in this RFP;
(ii) provide additional information to Participating Vendors;
(iii) modify or clarify any or all provisions of this RFP by written addenda posted on MERX prior to the Submission Deadline;
(iv) remove any Participating Vendor that does not comply with the terms of this RFP;
(v) cancel the procurement process at any time without awarding the Services;
(vi) award the Services to multiple Vendors;
(vii) award only a portion of the Services to a Vendor; and,
(viii) award the Services to a Vendor who has not submitted the lowest priced Proposal.

(b) Where MPI cancels the procurement process without awarding the Services because:

(i) no Proposals were submitted;
(ii) no Proposals were submitted that align with Appendix B.3 – Scope of Work;
(iii) no Proposals were submitted that met the Mandatory or Key Requirements of this RFP; or
(iv) MPI has determined that the submitted Proposals were collusive;

MPI may choose to contract with one or more persons (whether or not they were Participating Vendors) for the Services, provided the Services are not substantially modified from the requirements of the RFP.

(c) Where MPI discovers a material error in the RFP it may cancel the procurement process and reissue the RFP to ensure a fair process.

7.00 GUIDELINES FOR SUBMITTING A PROPOSAL

7.01 **The Participating Vendor shall provide, in the strictest of confidence, the information set out or requested in Schedule C – Submission Forms and Information.** It is a Participating Vendor's sole responsibility to ensure that it has complied with all the requirements of this RFP.

7.02 **The completed Proposal must be submitted as follows:**

(a) The Proposal must be submitted through MERX (**www.merx.com**).

(b) Proposals should be submitted in Portable Document Format (PDF), be word searchable with appropriate bookmarks, and sufficiently organized to allow for easy navigation.

(c) Each Participating Vendor is responsible for ensuring their Proposal is not corrupted, defective, or blank and that the submitted documents can be opened and legibly viewed by MPI. MPI may reject a Proposal that cannot be opened or legibly viewed by MPI as non-compliant.

(d) The determination of whether the Proposal has been submitted by the Submission Deadline will be based on the time and date recorded by MERX. Participating Vendors should allow sufficient time to upload their Proposals on MERX and to resolve any issues that may arise with their electronic submission.

It is the sole responsibility of the Participating Vendor to ensure that its Proposal is received by MPI prior to the Submission Deadline, in accordance with the submission requirements above. MPI will reject a Proposal received after the Submission Deadline, regardless of the cause of the delay.

7.03 **Submission Details**

(a) Proposals must reasonably demonstrate how well, if at all, the Participating Vendor can meet MPI's Service Requirements. For example, simply responding to a Service Requirement with "complies with requirement" may not earn full marks as it does not provide MPI with sufficient information to assess the accuracy of the response or level of compliance.

(b) The Participating Vendor shall:

(i) be solely responsible for the accuracy of its Proposal;
(ii) ensure that assumptions made in the preparation of the Proposal are specifically stated in the Proposal; and
(iii) satisfy itself as to the correctness and sufficiency of its Proposal.

7.04 **Conflict of Interest**

Each Participating Vendor shall disclose in its Proposal if a conflict of interest exists prior to or as of the Submission Deadline, or is likely to arise in the future, that may affect the performance of its obligations. A conflict of interest includes, but is not limited to, the following examples:

(a) having a contractual or other obligations with MPI that may or may not be seen to be compromised or impaired because of their participation in this procurement process;

(b) being, or employing, a former employee or Representative of MPI that has relevant knowledge of this procurement process;

(c) having acted in an advisory or professional capacity regarding this procurement process;

(d) having a personal or financial relationship with an employee or former employee of MPI that has knowledge or influence relating to this procurement process;

(e) having a financial interest in more than one Participating Vendor participating in this procurement process;

(f) having knowledge of confidential information (other than Confidential Information (as defined in Schedule A) disclosed by MPI in the normal course of this procurement process) of strategic and/or material relevance to this procurement process or to the Services that is not available to other Participating Vendors and that may, or may be seen, to give the Participating Vendor an unfair competitive advantage; or

(g) having advance notice of a matter relating to this procurement process that is so significant it gives the Participating Vendor materially more time to investigate, plan, or prepare a response to this procurement process that may, or may be seen, to give the Proponent an unfair competitive advantage.

In the event of a conflict of interest being identified, MPI may, at its sole discretion, exclude the Proposal from further consideration.

7.05 **No Collusion**

Each Participating Vendor must genuinely compete for the Services and not engage in collusion in any form.

7.06 **Subcontractors**

If a Participating Vendor intends to use subcontractors to perform any of the Services, the Participating Vendor must include a list of subcontractors that it proposes to use as indicated in Appendix C.4 – Proposed Additional Service Providers.

7.07 **Proposals with Multiple Service Providers**

If a Participating Vendor's Proposal involves more than one legal entity, including affiliates, partners, or any other third parties, providing the Services, then:

(a) The Participating Vendor that signs Appendix C.1 – Participating Vendor Authorization is deemed the principal Participating Vendor;

(b) The principal Participating Vendor is solely responsible for all communications with MPI concerning all aspects of the Proposal;

(c) The principal Participating Vendor is solely responsible for all communications with any other legal entities providing the Services throughout the procurement process;

(d) MPI expects all proposed additional service providers will adhere to the Service Requirements and legal requirements in Schedule A – Terms and Conditions;

(e) The principal Participating Vendor is solely responsible to ensure that any other legal entities intended to provide the Services are aware of and wholly endorse the representations made in the Proposal;

(f) MPI may reject a Proposal if it discovers any proposed additional service providers are not willing or capable of meeting the Service Requirements or legal requirements in Schedule A – Terms and Conditions; and

(g) The Proposal must detail which legal entity is responsible for providing each portion of the Services in Appendix C.4 – Proposed Additional Service Providers.

7.08 **RFP Ambiguities & Errors**

If any Participating Vendor discovers any ambiguity, conflict, discrepancy, omission, defect, or error in this RFP, such Participating Vendor should immediately notify MPI at *purchasingservices@mpi.mb.ca*. MPI will reasonably endeavour to resolve same expeditiously and shall post the issues and resolutions to MERX.

7.09 **Assumption of Risk**

By submitting a Proposal, Participating Vendors are considered to have:

(a) examined this entire RFP, any documents referenced herein, and any other information made available in writing by MPI to Participating Vendors for the purpose of submitting a Proposal;

(b) participated in any mandatory conference calls, site visits, information sessions, demonstrations, interviews, or other such events scheduled by MPI as part of the procurement process, if applicable; and

(c) conducted investigations as necessary to understand the nature of the Services and any risks, contingencies, local or existing conditions, and other circumstances that might affect its Proposal or its performance of the Services.

The Participating Vendor assumes all risks and associated costs which could have reasonably been inferred from any of the above.

7.10 **Equivalent Alternatives**

(a) Where a particular trademark, trade name, patent, copyright, design, type, specific origin, producer, or supplier has been specified by MPI, Participating Vendors are permitted to submit a Proposal based on equivalent alternatives.

(b) MPI reserves the right to accept or reject any proposed equivalent alternative based on whether it determines them to demonstrably fulfill the requirements of this RFP.

7.11 **Current Functionality**

(a) The Participating Vendor's Proposal must only describe its product's current functionality as of the Submission Deadline.

(b) If the Participating Vendor includes information about future functionality as of the Submission Deadline, it must be clearly marked as "future functionality". This information will not be used for evaluation purposes.

7.12 **Proposal Modifications**

A Proposal may be modified by a Participating Vendor at any point before the Submission Deadline. Modifications must be submitted via MERX with any deletions and/or changes highlighted.

7.13 **Confidentiality**

(a) Anything submitted to MPI that a Participating Vendor considers to be confidential should be clearly marked "confidential". Except for posting award information, MPI will not disclose documents marked as "confidential" to third parties unless required to by legislation, an order from a court of competent jurisdiction, or other valid legal process.

(b) By submitting any information or materials to MPI as part of this procurement process, including the Proposal, the Participating Vendor agrees to allow MPI and its Representatives to retain and use the information and materials for:

(i) record keeping;
(ii) evaluation;
(iii) audits;
(iv) the Agreement and any related agreements; and
(v) contract management.

(c) Participating Vendors must not disclose any information or make any public statement in any form or medium with respect to this procurement process without the prior written approval of MPI.

8.00 COSTS

8.01 Participating Vendors must provide the costs for the Services by completing Appendix C.3 – Costs. In providing costs, Participating Vendors must consider all Service Requirements set out in Schedule B, including related appendices, and Appendix C.2 – Service Requirements Response Form.

8.02 Participating Vendors must include all costs, fees, and charges they intend to bill MPI (including but not limited to delivery charges and administrative fees, if applicable). MPI will not pay any other costs, fees, or charges, except for expenses contemplated by, and in accordance with, Article 7.00 of Schedule A, which are not expressly stated in a Participating Vendor's Proposal.

8.03 MPI will be evaluating costs in Canadian Dollars. If a Participating Vendor submits pricing in a currency other than Canadian Dollars MPI will use the value of such currency converted to Canadian Dollars according to the Bank of Canada daily exchange rate as of the Submission Deadline for all evaluations.

8.04 As MPI is a Goods and Services Tax and Harmonized Sales Tax-exempt corporation, Participating Vendors should not include the Goods and Services Tax and Harmonized Sales Tax into their prices.

8.05 MPI will add any applicable tariffs or similar charges it may be required to pay to purchase the Services to the costs submitted by Participating Vendors for the purpose of evaluating Proposals.

PART B
PROCUREMENT DETAILS

MANITOBA PUBLIC INSURANCE

SCHEDULE A
TERMS AND CONDITIONS

1.00 INTERPRETATION

1.01 **Definitions**

(a) "**Agreement**" means this agreement, any schedules, appendices, or documents attached hereto or incorporated by reference, and any other documents made pursuant to this Agreement.
(b) "**AI**" means artificial intelligence.
(c) "**AMA**" means *The Accessibility for Manitobans Act* (CCSM c A1.7).
(d) "**Business Day**" means any day other than Saturday, Sunday, or a statutory or civic holiday observed in Manitoba.
(e) "**Confidential Information**" means all information, including Personal Information, and materials acquired by the Vendor or its Representatives, or to which the Vendor or its Representatives have been given access, in the course of the performance of this Agreement, excluding information that is in the public domain (for greater certainty, this does not include information in the public domain which was made public as a result of an unauthorized disclosure by a third party).
(f) "**Confidentiality Breach**" means an actual or suspected unauthorized use, disclosure, or destruction of, or any unauthorized access to, Confidential Information.
(g) "**Data Residency Jurisdiction**" means Canada or such other jurisdiction as MPI has approved in writing.
(h) "**FIPPA**" means *The Freedom of Information and Protection of Privacy Act* (CCSM c F175).
(i) "**Manitoba Public Insurance**" or "**MPI**" means The Manitoba Public Insurance Corporation as established by *The Manitoba Public Insurance Corporation Act* (CCSM c P215).
(j) "**Personal Information**" means "personal information" and "personal health information" collectively, as those terms are defined in FIPPA and PHIA respectively.
(k) "**PHIA**" means *The Personal Health Information Act* (CCSM c P33.5).
(l) "**PUB**" means the Manitoba Public Utilities Board, which is an independent quasi-judicial administrative tribunal with broad oversight and supervisory powers over MPI.
(m) "**Refund**" means a payment or credit of any fees prepaid by MPI equal to the prorated value of Services MPI will not receive.
(n) "**Representatives**" means the directors, officers, shareholders, employees, contractors, subcontractors, partners, volunteers, affiliates, agents, delegates, and other such representatives of a party.
(o) "**Reputation**" means the public perception, business reputation, community standing, or business operations of MPI or its Representatives.
(p) "**Services**" means the provision of goods, services, and deliverables as specified in this Agreement, including everything necessary for or incidental to the fulfilment of this Agreement.
(q) "**Submitted Materials**" means all goods, data, deliverables, and materials that are submitted or required to be submitted by the Vendor or its Representatives to MPI in the performance of this Agreement, and all copyright therein.
(r) "**Term**" means the entire length of this Agreement, including the Initial Term and any applicable Renewal Terms.

1.02 References to any legislation, including any statute or regulation, shall mean any successor or amended legislation.

1.03 Wherever "including" is used, it shall mean "including, but not limited to," unless stated otherwise.

1.04 The singular includes the plural, and vice versa, unless stated otherwise.

1.05 This Agreement shall be interpreted, performed, governed, and enforced in accordance with the laws of Manitoba and the laws of Canada applicable therein.

1.06 This Agreement contains the entire agreement between the parties with respect to the subject matter hereof. There are no undertakings, representations, or promises, either express or implied, other than those contained in this Agreement, and none have been relied on.

1.07 Unless stated otherwise, all dollar amounts referred to in this Agreement are in Canadian currency.

1.08 The rule of construction that any uncertainty or ambiguity in an agreement shall be construed or interpreted against the drafter shall not be applicable to this Agreement.

1.09 If any term of this Agreement is deemed invalid, unenforceable, void, or illegal, in whole or in part, the other terms of this Agreement shall remain in

full force and effect. Further, any such term shall be modified only to the extent necessary to render it valid, enforceable, effective, or legal and shall then become binding. If the intent of either party cannot be preserved, this Agreement shall either be renegotiated or terminated.

2.00 SCOPE

2.01 The Vendor agrees to provide the Services to MPI's reasonable satisfaction. MPI and the Vendor agree that any work performed by the Vendor outside the scope of the Services without prior written approval of MPI shall be deemed to be gratuitous on the Vendor's part, and MPI has no liability with respect to such work.

2.02 The Vendor agrees to be bound solely by this Agreement. If the Vendor begins the Services with MPI's permission before the start of this Agreement's Term, all Services provided by the Vendor before the start of this Agreement's Term will be considered to have been provided under all the terms and conditions of this Agreement.

2.03 MPI reserves the right to change, modify, delete, or add to the Services, if necessary. In addition to the foregoing, the Vendor shall provide to MPI any other services, documentation, or data related to the Services as may be reasonably required by MPI.

2.04 Unless specifically stated to the contrary, nothing in this Agreement grants the Vendor exclusivity in providing the Services to MPI.

3.00 INSURANCE, PERMITS, LICENSES, AND CERTIFICATES

3.01 The Vendor will be responsible for the procurement and costs of all insurance, permits, licences, security clearances, criminal record checks, and certificates that are necessary for the performance of the Services or required by this Agreement.

3.02 If the Vendor is required to carry or maintain insurance under this Agreement:

(a) The Vendor shall provide certified copies of its certificates of insurance to MPI within ten (10) Business Days of award, prior to commencing the Services.
(b) When requested by MPI, the Vendor shall provide updated insurance certificates evidencing the renewal of the required insurance and bonding coverage.
(c) Where available, all required insurance policies and bonds shall be endorsed to provide MPI with not less than thirty (30) days' written notice in advance of cancellation, change, or amendment restricting coverage.
(d) Compliance with these insurance requirements does not release the Vendor from, nor reduce the Vendor's exposure, to liability for damages under this Agreement.
(e) The Vendor is responsible for determining if any additional insurance coverage is necessary to fulfill its obligations under this Agreement, and for procuring such insurance at its own expense.

3.03 If required by MPI, the Vendor shall submit the following within ten (10) Business Days of award:

(a) One completed safe work plan per site, with a copy left on site for the duration of this Agreement.
(b) Certified copies of its original letter of clearance from The Workers Compensation Board, which must be dated no earlier than the date of award.

4.00 PERFORMANCE OF VENDOR'S OBLIGATIONS

4.01 When performing the Services, the Vendor and its Representatives shall:

(a) comply with all applicable federal, provincial, and municipal laws, regulations, by-laws, ordinances, orders, notices, policies, and regulatory body decisions; and
(b) if applicable, work with MPI to ensure that both the Vendor's AI technology and MPI's usage of the Vendor's AI technology complies with any applicable laws, directives, or policies.

4.02 The Vendor represents and warrants that:

(a) it possesses the necessary skills, expertise, and experience to perform the Services in accordance with this Agreement;
(b) the Services shall be provided in a professional manner and as outlined in this Agreement unless MPI and the Vendor agree otherwise in writing;
(c) the Representatives designated to perform the Services shall devote the time, attention, abilities, and expertise necessary to properly perform the Vendor's obligations;
(d) it shall comply with all reasonable directions and requests of MPI within the scope of the Services as set out in this Agreement;
(e) MPI shall have the right of prior approval of any Representatives designated to provide the Services, and MPI shall have the right to request the removal of any Representatives so designated and the Vendor shall immediately comply with all such requests for removal;

(f) it shall conduct itself in a manner that does not negatively affect MPI's Reputation;
(g) it has all rights to the data it used to train any AI technology used to provide the Services;
(h) it has full right and authority to enter into this Agreement; and
(i) all representations and warranties contained in this Agreement are true and correct and shall so remain throughout the Term of this Agreement

4.03 The Vendor shall provide written progress reports at such intervals as MPI may reasonably request. Such progress reports shall be in form and content satisfactory to MPI acting reasonably.

4.04 The Vendor agrees to co-operate with all MPI Representatives (including subcontractors providing services to MPI) throughout the Term.

4.05 If the Vendor intends to use subcontractors:

(a) It shall not subcontract or use a subcontractor for any portion of the Services without MPI's prior written consent, and MPI may grant or withhold such consent in its sole and unfettered discretion;
(b) All subcontractors are subject to MPI's ongoing approval, and the Vendor shall not add, remove, or replace any subcontractor, or change the part of the Services to be performed by a subcontractor, without MPI's prior written approval; and
(c) Performance by subcontractors shall meet, at a minimum, the same standards as required for performance by the Vendor, and the Vendor is responsible for such performance.

4.06 If applicable, and unless explicitly stated otherwise in this Agreement, delivery of goods and/or deliverables shall be to MPI's mail & warehouse services at B100 – 234 Donald Street, in Winnipeg, Manitoba. All goods/deliverables shall remain at the risk of the Vendor until they are delivered to the reasonable satisfaction of MPI. All goods/ deliverables supplied shall be subject to inspection and acceptance by MPI for a period of sixty (60) days after delivery. Defective or deficient goods/deliverables or goods/deliverables not conforming to specifications may be returned at the Vendor's expense. At MPI's option, such deficient or non-conforming goods/deliverables shall be returned for either exchange or full refund. In addition to the foregoing, the Vendor shall pass through any other warranties that are applicable to such goods/deliverables, and MPI shall have the right to rely on same, and on any other warranties offered by the Vendor that are applicable to such goods/deliverables.

5.00 RESTRICTION ON OTHER WORK

5.01 While this Agreement is in effect, the Vendor and its Representatives shall not provide services to any other person, corporation, or entity in a manner that interferes or conflicts with the proper performance of the Vendor's obligations under this Agreement.

6.00 INDEPENDENT CONTRACTOR

6.01 The Vendor is an independent contractor, and this Agreement does not create the relationship of employer and employee, of principal and agent, of joint venture, or of partnership between MPI and the Vendor or between MPI and any Representatives of the Vendor. The Representatives of one party shall not be deemed or construed to be the Representatives of the other party for any purpose whatsoever.

6.02 The Vendor is responsible for any deductions or remittances which may be required by law.

6.03 Except as authorized in this Agreement, the Vendor shall not incur any expenses or debts on behalf of, nor make any commitments for MPI without first obtaining written permission from MPI.

7.00 VENDOR'S COSTS

7.01 The Vendor shall provide invoices to MPI. All Services listed on an invoice must have been completed by the Vendor prior to that invoice being submitted to MPI. All invoices shall be in writing and satisfactory to MPI, acting reasonably, in both form and content. The Vendor shall also provide to MPI such supporting documents, vouchers, statements, and receipts as may be requested by MPI acting reasonably.

7.02 MPI shall pay the invoice within thirty (30) days after the receipt and approval of an invoice and any supporting materials requested under Section 7.01. In the event any invoice is not satisfactory, MPI shall notify the Vendor of the problem within seven (7) days of receipt of invoice.

7.03 If MPI in good faith (i) disputes any invoice on the grounds that there is an objectively verifiable error in any invoice; or (ii) disputes the adequacy or correctness of any supporting documentation provided in connection with any invoice, or (iii) the Vendor has materially breached this Agreement, then MPI may withhold, in the case of (i) and (ii), the disputed portion of the invoice until the dispute is resolved, and in the case of (iii), all outstanding balances of the invoice until the dispute is resolved. The parties shall work promptly to resolve any such disputes. MPI will advise the Vendor of the amount

of the invoice MPI considers to be in dispute and the basis for such dispute, and will pay any undisputed portion in accordance with this Article 7.00. Payment by MPI shall not preclude MPI from questioning any fees or charges MPI believes to be improper or incorrect.

7.04 Those undisputed invoiced amounts not paid by MPI within thirty (30) days of receipt and approval, shall bear interest from the thirty-first (31st) day at the prime rate in effect on that day at the Winnipeg main branch of the Bank of Montreal.

7.05 Where not tax-exempt, MPI shall also pay all applicable sales and use taxes. Where tax-exempt, MPI shall provide the Vendor with the applicable exemption number and/or certificate as required.

7.06 The Vendor agrees that it understands the nature of the Services and any risks, contingencies, local or existing conditions, and other circumstances, and accepts all risk and associated costs which could have been inferred from reasonable investigation into the above prior to entering into this Agreement.

7.07 Unless explicitly stated otherwise in this Agreement, MPI shall reimburse the Vendor for reasonable out-of-pocket expenses relating to the provision of the Services if:

(a) such expenses were reasonably required for the performance of the Services;
(b) prior written permission to incur such expenses was first obtained from MPI;
(c) the Vendor uses the most economical rates possible for the expenses;
(d) the Vendor provides receipts and/or supporting documents to the satisfaction of MPI, unless it is agreed that submission of receipts for certain categories of expenses is not required (e.g. a per diem approach); and,
(e) reimbursement to the Vendor for out-of-pocket expenses shall be in accordance with the amounts and guidelines set out in the MPI's Corporate Directives.

MPI shall not be responsible for payment of any other expenses incurred by the Vendor in the performance of this Agreement.

7.08 The Vendor shall advise MPI if any non-resident of Canada will be, or has performed any of the Services in Canada. MPI may withhold and/or remit any taxes or duties required by federal, provincial, or municipal law in relation to the purchase or performance of the Services.

8.00 CONFIDENTIALITY AND INFORMATION SECURITY

8.01 The Vendor acknowledges that FIPPA and PHIA each impose obligations on MPI to collect, use, or disclose Personal Information, in the strictest of confidence, and in accordance with those Acts. In performing the Services under this Agreement, the Vendor acknowledges that they may collect, use, or have access to Personal Information.

8.02 While this Agreement is in effect, and at all times thereafter, the Vendor agrees to treat as confidential all Confidential Information. For the purposes of this Agreement, Personal Information shall be considered to be Confidential Information.

8.03 The Vendor agrees that during the Term of this Agreement and at all times thereafter:

(a) the Personal Information disclosed to the Vendor by MPI may only be used by the Vendor in a manner expressly permitted by FIPPA or PHIA (as the case may be);
(b) it shall not disclose or permit the disclosure of Confidential Information, or any copies of it, in any format, to any third party without the express prior written consent of MPI;
(c) it shall comply with all directives given to it by MPI with respect to safeguarding, or otherwise ensuring the confidentiality, of any Confidential Information disclosed to it by MPI;
(d) it shall ensure that access to the Confidential Information by the Representatives of the Vendor is restricted to a "need-to-know" basis, and that access, when given, shall be to the minimum amount of Confidential Information necessary to accomplish the task;
(e) it shall use the Confidential Information only for those purposes that have been expressly permitted by MPI;
(f) it shall not reproduce Confidential Information, in any format, without the express prior written consent of MPI provided that it shall be able to reasonably reproduce the Confidential Information for internal use only in the normal performance of the Services;
(g) it shall ensure that it, or its Representatives, do not access, transport, or store any Confidential Information outside of the Data Residency Jurisdiction without the express prior written consent of MPI. Without limiting the generality of the foregoing, in MPI's sole discretion, the Vendor may be permitted to remotely access Confidential Information if required to provide the Services, provided that the Vendor follows all MPI's policies regarding remote access;
(h) it will not access MPI's Confidential Information, its systems, or perform Services from any country Canada currently imposes

applicable sanctions against. The current list is found at: https://www.international.gc.ca/; and

(i) unless a different retention period has been specified in the Agreement, after the Confidential Information has been used for its authorized purpose, or upon termination or expiration of this Agreement, or where destruction of the Confidential Information is requested by MPI or is required by this Agreement, the Vendor shall securely destroy the Confidential Information (and all copies of the Confidential Information in any form) in a manner which adequately protects the confidentiality of the Confidential Information and ensures that such Confidential Information cannot be reconstructed in any form. Notwithstanding the foregoing, the Vendor may retain copies of the Confidential Information it has received to comply with any applicable law, provided the Vendor protects such retained Confidential Information in accordance with this Agreement.

8.04 The Vendor represents and warrants that it has established an information security management practice that follows accepted industry information security standards and best practices. During the Term of this Agreement and at all times thereafter, the Vendor shall take reasonable technical, administrative, and physical measures and precautions to prevent any unauthorized disclosure of the Confidential Information. The standard of such precautions taken by the Vendor shall be the greater of:

(a) the standards the Vendor has in place to protect its own confidential information; or,
(b) the standards imposed on the Vendor by MPI.

8.05 The Vendor shall, through a single point of contact, immediately notify MPI in writing upon becoming aware of any Confidentiality Breach. The written notification must include full details of the Confidentiality Breach. The Vendor shall immediately take all reasonable technical, physical, and administrative measures and precautions to prevent the recurrence of any such Confidentiality Breach and shall notify MPI in writing of the steps taken. In the event of a Confidentiality Breach, MPI may do any combination of the following: (i) impose increased standards on the Vendor related to its treatment of the Confidential Information and the Vendor shall comply with such increased standards, and/or (ii) if applicable, limit the Vendor's access to MPI's premises and systems, and/or (iii) enforce or use any other applicable section of this Agreement.

8.06 The Vendor shall inform its applicable Representatives of the obligations imposed upon it in this Agreement with respect to Confidential Information, and shall take whatever steps are necessary to ensure that all its applicable Representatives comply with those obligations.

8.07 The Vendor acknowledges that monetary damages may not be a sufficient remedy for a Confidentiality Breach, and that MPI may, without waiving any other rights or remedies, seek appropriate injunctive or equitable relief from a court of competent jurisdiction.

8.08 If the Vendor receives a subpoena or other validly issued administrative or judicial order seeking Confidential Information, the Vendor shall provide prompt notice to MPI and deliver to MPI a copy of its proposed response to the demand. Unless the demand has been time-limited, quashed, or extended, the Vendor shall thereafter be entitled to comply with the demand to the extent permitted or required by law. If requested by MPI, the Vendor shall cooperate with MPI in the defence of the demand, at MPI's expense.

8.09 The Vendor acknowledges and accepts that MPI may be required to provide deliverables and Vendor information to the PUB, as part of MPI's annual rate application. There is a presumption that all materials filed with the PUB will be placed on the public record. MPI shall notify the Vendor if deliverables and Vendor information will be submitted to the PUB. The Vendor may request that MPI seek confidential treatment by the PUB of certain deliverables and Vendor information. MPI may require the Vendor to provide affidavit evidence to support the request to the PUB for confidentiality, which would be prepared by MPI on behalf of the Vendor. The Vendor acknowledges and accepts that MPI is bound by the PUB's decision.

8.10 The Vendor undertakes not to publish any public statement or advertisement with respect to this Agreement and further undertakes not to seek publicity of this Agreement without the express prior written consent of MPI, except as otherwise required by law or by this Agreement.

8.11 In the event that the Vendor or its Representatives use any of MPI's or its Representatives' premises, the Vendor and its Representatives shall comply with all such premises' security requirements as may be in effect from time to time.

9.00 ACCESSIBILITY

9.01 The Vendor acknowledges that the AMA and the regulations made under the AMA impose obligations on MPI to prevent and remove barriers

in its business and administrative practices in accordance with the following principles:

(a) Access: Persons should have barrier-free access to places, events and other functions that are generally available in the community;
(b) Equality: Persons should have barrier-free access to those things that will give them equality of opportunity and outcome;
(c) Universal design: access should be provided in a manner that does not establish or perpetuate differences based on a person's disability; and
(d) Systemic responsibility: the responsibility to prevent and remove barriers rests with the person or organization that is responsible for establishing or perpetuating the barrier.

9.02 Throughout the Term of this Agreement, the Vendor agrees to comply with the accessibility obligations under the AMA and regulations, and further agrees that when providing the Services or otherwise acting on MPI's behalf, the Vendor shall comply with all obligations under the AMA and regulations applicable to public sector bodies.

10.00 OWNERSHIP OF INFORMATION

10.01 Unless otherwise explicitly stated in this Agreement, upon payment of all amounts due, all Submitted Materials shall be the exclusive property of MPI and shall be forthwith delivered to MPI, at no further cost to MPI. The Vendor agrees to execute all documents that may be necessary to transfer ownership or waive moral rights to the Submitted Materials to MPI.

10.02 MPI shall own the portion of the outputs of the Vendor's AI technology that contain MPI's Confidential Information and shall be granted a license to use the remaining portions of the outputs for its own business purposes. The Vendor shall have no other ownership or use rights to the outputs of the AI technology.

10.03 In the event that the Vendor is licensing or reselling to MPI a license for the goods or Services, the goods and Services shall be subject to the specific licensing terms and conditions agreed to between MPI and the licensor of such goods and Services.

10.04 The Vendor grants to MPI the right to modify and create derivative works with respect to the Vendor's documentation to enable and support the use of the Services, including, as reasonably necessary, to embed such modifications and derivative works in MPI intellectual property. The Vendor will retain all proprietary rights to its intellectual property and MPI is not required to provide a copy of such modifications and derivative works to the Vendor. MPI's right to use, copy, modify, and create modifications and derivative works thereto shall survive the termination of the Agreement.

10.05 Any property provided by MPI to the Vendor under this Agreement is only provided for the limited use in the performance of the Services, shall remain the property of MPI, and shall be returned, without cost, to MPI upon request or upon termination of this Agreement. The foregoing shall not give the Vendor or its Representatives any rights in any of MPI's intellectual property.

11.00 AUDITS

11.01 The Vendor and its Representatives shall promptly cooperate with MPI so that MPI can verify the Vendor and its Representatives have complied, and are complying, with the provisions of this Agreement, including providing to MPI any requested information to verify compliance.

12.00 RECORDKEEPING

12.01 Except as expressly indicated elsewhere in the Agreement, the Vendor shall maintain records pertaining to the Services for the Term.

12.02 Except as expressly indicated elsewhere in the Agreement, upon expiry or termination of the Agreement, the Vendor shall:

(a) confirm with MPI whether the Vendor is required to transfer the records referred to in Section 12.01 to MPI;
(b) transfer the records if directed by MPI; and
(c) securely destroy such records in a manner that ensures that the records cannot be reconstructed in any form.

12.03 Notwithstanding Section 12.02, the Vendor may retain the records referred to in Section 12.01 to comply with any applicable law, provided the Vendor protects any retained records in accordance with this Agreement.

13.00 INDEMNIFICATION OF MPI

13.01 The Vendor shall indemnify and save harmless MPI and its Representatives from all losses, damages, costs, causes of action, claims, liabilities, or demands of any kind with respect to any injury to persons (including, without limitation, death), damage to or loss of property, economic loss, incidental or consequential damages, or infringement of rights (including, without limitation,

privacy rights) caused by, or arising directly or indirectly from:

(a) the default of the Vendor or its Representatives of any term of this Agreement; or,
(b) any negligent or willful act or omission of the Vendor or its Representatives.

The above includes all costs and expenses associated therewith, including reasonable solicitors' fees.

13.02 If MPI has provided prior written permission to the Vendor allowing the use of any AI technology in the performance of the Services, the Vendor shall indemnify and save harmless MPI and its Representatives from all losses, damages, costs, causes of action, claims, liabilities, or demands of any kind with respect to any injury to persons (including, without limitation, death), damage to or loss of property, economic loss, incidental or consequential damages, or infringement of rights (including, without limitation, privacy rights) caused by, or arising directly or indirectly from MPI's use or distribution of outputs of the Vendor's AI technology.

13.03 The Vendor shall immediately notify MPI in writing upon the Vendor becoming aware that it (or its Representatives) has, or will soon be likely to have committed a breach or is under default of this Agreement. The written notification must include full details of the actual or potential breach or default. The Vendor shall immediately take all reasonable technical, physical, and administrative measures and precautions to prevent the breach or the recurrence or continuation of the breach or default and shall notify MPI in writing of the steps taken. Nothing in this section shall be construed as waiving or reducing MPI's rights of termination or other applicable remedies at law.

14.00 SUSPENSION

14.01 MPI may, at its sole option, from time to time, delay or suspend the Services being provided under this Agreement, in whole or in part, for such period of time as may, in the opinion of MPI, be necessary. Unless another notice period has been provided elsewhere in this Agreement, MPI shall provide five (5) days prior written notice to the Vendor of its intention to delay or suspend the Services. MPI shall not be obliged to make payments to the Vendor except with respect to those Services already satisfactorily performed prior to such delay or suspension.

14.02 Where there is a delay or suspension under Section 14.01, all terms and conditions of this Agreement shall continue in full force and effect against the Vendor. The Vendor shall not be entitled to make any claim for damages by reason of the delay or suspension.

15.00 TERMINATION

15.01 MPI may terminate this Agreement at any time for any reason by giving the Vendor fourteen (14) days prior written notice.

15.02 Neither party shall be responsible for any failure to comply with, or for any delay in performance of the terms of this Agreement where such failure or delay is directly or indirectly caused by, or results from events of force majeure beyond the control of either party. The time in which the Services are to be provided shall be extended by a period of time at least equal to the length of the force majeure event, provided that in the event the extended period of time exceeds, or is reasonably anticipated to exceed a period of fourteen (14) days, then MPI may terminate this Agreement and pay the Vendor for all Services performed to the date of the force majeure event.

15.03 In addition to its rights under Sections 14.01, 15.01, and 15.02 above, and without restricting any other remedies available, MPI may immediately terminate, or immediately suspend this Agreement in writing if:

(a) the Vendor makes an assignment for the benefit of creditors, takes any other action for the benefit of creditors, becomes bankrupt or insolvent, or takes the benefit of or becomes subject to any legislation in force relating to bankruptcy and insolvency;
(b) in the opinion of MPI, the Services provided by the Vendor or its Representatives are unsatisfactory, inadequate, or otherwise improperly performed;
(c) in the opinion of MPI, the Vendor or its Representatives have failed to comply with, or breached any term or condition of this Agreement; or
(d) in the opinion of MPI, continuing to engage the Vendor under this Agreement may adversely affect its Reputation.

15.04 Upon termination of this Agreement, the Vendor shall cease to perform any further Services. MPI shall be under no obligation to the Vendor other than to pay, upon receipt of an invoice or statement and supporting documentation satisfactory to MPI acting reasonably, such compensation as the Vendor may be entitled to receive under this Agreement for Services satisfactorily completed up to the date of termination. Upon MPI's request, the Vendor will work in good faith to facilitate the

orderly transition of the Services, in whole or in part, to MPI or to a successor service provider.

15.05 If the Agreement is terminated by MPI pursuant to Sections 15.02 or 15.03, and MPI has prepaid for any of the Services, then MPI shall be entitled to a Refund. The Vendor shall, at MPI's sole discretion, either (i) credit such Refund against any fees MPI is obligated to pay the Vendor, or (ii) promptly return the Refund to MPI, or (iii) a combination of (i) and (ii).

16.00 GENERAL TERMS

16.01 The terms and conditions contained in this Agreement that by their sense and context are intended to survive the performance of this Agreement by the parties shall so survive the completion and performance, suspension, or termination of this Agreement.

16.02 The Vendor shall not assign or transfer this Agreement or any of its rights or obligations under this Agreement without first obtaining written permission from MPI. This Agreement shall be binding upon the executors, administrators, heirs, successors, and any permitted assigns of the parties.

16.03 No amendment or change to, or modification of, this Agreement shall be valid unless it is in writing and signed by both parties.

16.04 The parties hereby irrevocably and unconditionally submit to the exclusive jurisdiction of the courts of the Province of Manitoba and all courts competent to hear appeals therefrom.

16.05 Any failure or delay by either party to exercise or partially exercise any right hereunder shall not be deemed a waiver of any of the rights under this Agreement. The waiver by either party of a breach of any provision of this Agreement shall not operate as, or be construed as, a waiver of any subsequent breach thereof. The election of any one or more remedies by either party shall not constitute a waiver of that party's right to pursue other available remedies.

16.06 The Vendor agrees to perform any further acts and execute and deliver any documents that may be reasonably necessary to carry out the provisions of this Agreement.

16.07 Any notice or communication:

(a) sent by registered mail shall be deemed to have been received on the third Business Day following the date of mailing;

(b) sent by facsimile or other electronic transmission (including email) shall be deemed to have been received on the day of transmission; and,

(c) sent by courier or personal delivery shall be deemed to have been received on the day that it was delivered.

SCHEDULE B
GOODS AND SERVICES

Schedule B consists of the following Appendices:

B.1 Definitions

The definitions in Schedule A and Appendix B.1 are applicable to the Services and the Agreement, including Schedules B and C and their related appendices.

B.2 Material Disclosures

The material disclosures form the background and context of the Services and represent the basic assumptions upon which the Vendor should base its Proposal.

B.3 Scope of Work

The scope of work describes a high-level overview of the Services and deliverables the Vendor is required to provide to MPI.

B.4 Remote Work Security Standard

If the Vendor or any of its Representatives are delivering all or a portion of the Services from a remote location (e.g. working from home), the Vendor must have and follow remote work security standards that align with MPI's Remote Work Security Standard.

APPENDIX B.1
DEFINITIONS

"Disposition" means the action taken at the end of the total retention period, including destruction or transfer of records to MPI.

"Participating Vendor" means any person, corporation, or entity who submits a Proposal in response to, and in accordance with, this RFP.

"PIPP" means Personal Injury Protection Plan

"PUB" means The Public Utilities Board of Manitoba

"Service Requirements" means MPI's requirements for the Services as provided in this Schedule B, its related appendices, and in Appendix C.2 – Service Requirements Response Form.

"Services Record" means any documents or content produced in any form that is created, collected, or received by the Vendor for the purpose of carrying out the Services.

"SFTP" means Secure File Transfer Protocol.

"TBI" means traumatic brain injury.

"*The Manitoba Public Insurance Corporation Act*" means *The Manitoba Public Insurance Corporation Act* C.C.S.M. c. P215

"Vendor" means the Participating Vendor(s) who enter(s) into an Agreement with MPI to provide MPI with the Services.

APPENDIX B.2
MATERIAL DISCLOSURES

1.01 Background Information

PIPP was introduced in 1994 and is a comprehensive statutory plan that provides benefits to individuals who are injured as a result of a motor vehicle collision, regardless of fault. The benefits are legislated, and MPI administers them in accordance with *The Manitoba Public Insurance Corporation Act* and the regulations thereunder.

MPI receives an average of approximately 12,000 injury claims annually of which approximately 150 claims involve brain injuries.

Order No. 2/25 from the PUB recommended a comparison between current scientific knowledge and proven medical best practices to diagnose, assess and manage brain injuries and MPI's current practices and procedures for brain injuries.

As a result of the PUB's recommendation, the Government of Manitoba requested that MPI obtain an independent investigation examining MPI's current process of handling claimants with traumatic brain injuries.

MPI will provide the Vendor with its processes and procedures for TBI claims when the Services are awarded.

The Vendor will be required to testify before the PUB at hearings in fall 2026 and potentially fall 2027.

1.02 Agreement Start Date and Duration

Anticipated Commencement of Services	May 2026
Initial Term	Two (2) years
Potential Renewal Term(s)	One (1) year

APPENDIX B.3
SCOPE OF WORK

The Vendor will provide a report assessing MPI's current processes and procedures on claims where a TBI has been identified in comparison to best practices.

The Vendor will do the following prior to conducting its assessment:

1. conduct a kickoff meeting to align expectations and establish clear communication protocols;
2. work with MPI to define the objectives, scope, and timelines of the assessment. In this meeting, MPI will provide an overview of the current process to aid in defining the assessment plan; and
3. develop a detailed assessment plan outlining the methodologies, tools, and data collection techniques to be used.

In conducting its assessment, the Vendor will:

1. use a defined framework to assess and benchmark current processes and procedures; and
2. evaluate how MPI currently handles TBI claims and identify strengths and weaknesses that are within MPI's control.

After concluding its assessment, the Vendor will develop and provide:

1. a summary of findings and actionable recommendations;
2. the intended outcome of each recommendation; and
3. the impact and priority of completing each recommendation.

The Vendor will provide a comprehensive report detailing the assessment findings, recommendations, and impact assessment. The Vendor will present the findings to MPI to ensure clarity and facilitate informed decision-making.

The Vendor will make available a suitable Representative to present the Vendor's findings to the PUB at MPIs request.

MPI requires the assessment and report to be completed no later than three (3) months from commencement of the Services.

APPENDIX B.4
REMOTE WORK SECURITY STANDARD

1.00 Purpose

1.01 This standard describes the requirements for cyber and information security practices and mechanisms which must be implemented by the Vendor and adhered to by its Representatives working from locations other than the Vendor's facilities.

1.02 The intent of this standard is to reduce the likelihood of cybersecurity and privacy incidents from occurring as a result of remote work arrangements.

2.00 Standard

2.01 The Vendor shall implement the following security controls whenever they or their Representatives access Confidential Information or when provisioning the Service.

3.00 Endpoint Security

3.01 Wherever supported by the endpoint device, all workstations (desktops, laptops, tablets, and mobile devices) must have:

(a) Encrypted hard drives / storage media;
(b) Up to date patches to ensure that the workstations are kept current with all required operating system and application security patches;
(c) The ability to prevent unapproved software from being installed;
(d) Up to date antivirus software including the associated signature files, with real-time scanning enabled and a minimum of a weekly full scan;
(e) Firewalls installed and configured to protect the workstations from unauthorized access;
(f) Data loss prevention capabilities;
(g) Web traffic directed through a web filtering technology to help prevent accidental access to malicious sites; and
(h) A process to securely dispose of any hard drive or removable media storage device.

4.00 Access Control

4.01 Access control mechanisms will be in place as follows:

(a) Enforcement of principle of least privilege, allowing only the minimum level of access to Confidential Information necessary to accomplish assigned tasks in accordance with the Agreement;
(b) Multifactor authentication must be enabled for all types of remote access;
(c) User authentication credentials will be promptly deactivated where such credentials have not been used for a maximum period of 3 months, or within 2 days if the user has changed roles and no longer requires such access;
(d) User authentication credentials will be immediately revoked for all remote access capabilities (e.g.: VPN accounts, remote access tokens) and physical access to the Vendor premises in the event of a Representative's termination or end of the Vendor's engagement; and
(e) Authentication credentials must not be shared with other individuals.

5.00 Connectivity

5.01 Network security control mechanisms will be in place as follows:

(a) Representatives will connect only to secure Wi-Fi networks using strong encryption such as WPA2 or higher. If secure Wi-Fi is not available, a wired connection will be used instead;
(b) Vendor provisioned and managed workstations shall be used, leveraging secure connectivity mechanisms (e.g. Virtual Private Network), when accessing Confidential Information or when provisioning the Service; and
(c) Unmanaged workstations shall only be used when leveraging secure connectivity mechanisms to connect to Vendor managed endpoint services or devices (e.g. Desktop-as-a-Service or Remote Desktop Protocol).

6.00 Physical Controls

6.01 Vendor's Representatives shall:

(a) Ensure that physical working space is appropriately cordoned off to limit the exposure of Confidential Information to other individuals. This includes precautions related to preventing verbal communications from being overheard by other individuals;
(b) Protect the workstations and software against unauthorized use and access; and

(c) Be authorized to print Confidential Information to local printers at remote locations, provided that printed materials are kept secured at all times and are securely destroyed prior to disposal or recycling.

7.00 Collaboration Requirements

7.01 Vendor's Representatives shall use secure collaboration, storage, and application platforms for conducting virtual meetings and sharing of documents.

PART C
SUBMISSIONS

SCHEDULE C
SUBMISSION FORMS AND INFORMATION

Schedule C consists of the following Appendices:

C.1 Participating Vendor Authorization

Participating Vendors must complete and return Appendix C.1 – Participating Vendor Authorization as part of their Proposal. Failure to do so may result in a Participating Vendor being deemed non-compliant.

C.2 Service Requirements Response Form

(a) Participating Vendors must complete and return Appendix C.2 – Service Requirements Response Form in their Proposals. Failure to do so may result in a Participating Vendor being deemed non-compliant.

(b) Participating Vendors are strongly encouraged to determine whether they can meet the Mandatory Requirements and Key Requirements before proceeding to respond to the General Requirements.

(c) All responses should be provided in the Vendor Response column. If there are supporting documents or supplemental information to include, or if there is not enough room to fully respond in the cell, Participating Vendors may provide their responses in additional files that:

(i) Are clearly and precisely identified in the Vendor Response cell of the Service Requirement; and
(ii) Include clear and precise references to the Service Requirement and item number associated with each response in the additional files.

C.3 Costs

Participating Vendors must complete and return Appendix C.3 – Costs in their Proposals. Failure to do so may result in a Participating Vendor being deemed non-compliant. Appendix C.3 must include ALL costs (including any and all charges, fees, or other amounts that they intend to or may invoice MPI for) in Appendix C.3.

C.4 Proposed Additional Service Providers

If a Participating Vendor intends to use subcontractors to perform any of the Services, the Participating Vendor must include a list of subcontractors that it proposes to use as indicated in Appendix C.4 – Proposed Additional Service Providers.

If a Participating Vendor's Proposal involves more than one legal entity, including affiliates, partners, or any other third parties, providing the Services, then the Proposal must detail which legal entity is responsible for providing each portion of the Services in Appendix C.4 – Proposed Additional Service Providers.

C.5 References

Participating Vendors must provide the names of not less than three (3) Canadian clients for whom the Participating Vendor has provided services of a similar nature and scale to those described in this RFP.

APPENDIX C.1
PARTICIPATING VENDOR AUTHORIZATION

1.00 PARTICIPATING VENDOR INFORMATION

PARTICIPATING VENDOR NAME	
Full Legal Name:	
The Participating Vendor is:	☐ a sole proprietor; ☐ a partnership that is validly registered and in good standing; or ☐ a corporation that is validly registered and in good standing.
Usual Business Name (if different):	
	☐ I represent and warrant that the above business name is validly registered and in good standing.
PARTICIPATING VENDOR ADDRESS	
Full Address:	
Mailing Address (if different):	
Billing/Payment Address (if different):	
PROCUREMENT PROCESS CONTACT INFORMATION	
Contact Person (name and title):	
Phone:	
E-mail:	
AGREEMENT CONTACT INFORMATION (IF KNOWN)	
Notices Representative (name and title):	
Phone:	
Email:	
Signatory (name and title):	

2.00 PROPOSAL COMPLETENESS

I certify that the Participating Vendor has included the following in this Proposal:

☐ If applicable, samples of any related agreements that the Participating Vendor may require MPI to execute if chosen as the Vendor, including licensing agreements.

☐ The following completed appendices:

- ☐ Appendix C.2 - Service Requirements Response Form
- ☐ Appendix C.3 - Costs
- ☐ Appendix C.4 - Proposed Additional Service Providers
- ☐ Appendix C.5 - References

3.00 PARTICIPATING VENDOR REPRESENTATIONS

3.01 I represent and warrant that the Participating Vendor and its Representatives have the necessary skills and capacity to provide the Services, and that the Participating Vendor:

(a) has not consulted with others for the purpose of restricting competition;

(b) has not knowingly made any false statement in its Proposal;

(c) and its Representatives has not attempted to and will not attempt to improperly influence a Representative of MPI in connection with the evaluation of this Proposal;

(d) if invited by MPI to enter negotiations, will negotiate in good faith and with the intention of finalizing a binding Agreement with MPI based on the terms, conditions, and requirements of this RFP (including Schedules A, B, and C) and the Participating Vendor's Proposal;

(e) is not bound by any law or other legal obligation that may be breached by, or under which any default may occur, because of the delivery of a Proposal, negotiations with MPI, the execution of an Agreement, or the provision of the Services; and

(f) has informed all proposed additional service providers of the Service Requirements and legal requirements in Schedule A – Terms and

Conditions. I warrant that all proposed additional service providers are willing and capable of meeting the Service Requirements and legal requirements in Schedule A – Terms and Conditions and that the Proposal incorporates their input.

3.02 I acknowledge and agree that this procurement process is subject to the laws of the Province of Manitoba and the laws of Canada applicable therein.

4.00 CERTIFICATION

I certify that the Participating Vendor has the necessary power and authority to submit the Proposal, I have the authority to submit this Proposal on behalf of the Participating Vendor.

APPENDIX C.2
SERVICE REQUIREMENTS RESPONSE FORM

MANDATORY REQUIREMENTS

ITEM	REQUIREMENT	INSTRUCTIONS	RESPONSE
M-01	**Insurance** **Commercial General Liability** The Vendor shall provide commercial liability insurance in the amount of not less than five million dollars ($5,000,000 CAD) per occurrence and aggregate annually, in accordance with Schedule A, 3.00. **Professional Liability (Errors & Omissions) Insurance** The Vendor shall maintain Professional Liability Insurance in the amount not less than two million dollars ($2,000,000) (CAD). The Vendor shall supply a Certificate of Insurance to MPI evidencing coverage prior to the commencement of the Work. If such coverage is afforded through a "Claims-Made" style of policy, then such insurance shall be maintained in force at all times during the term of the Contract and for a period of two years thereafter for services completed during the term of the agreement.	Provide one of the following: (a) insurance certificates; or (b) documentation from your insurer confirming that you will be able to obtain the required insurance if awarded the Services; or (c) your confirmation that you will meet the insurance requirements if awarded the Services.	

VENDOR REQUIREMENTS

Capability & Qualifications

ITEM	REQUIREMENT	INSTRUCTIONS	RESPONSE
V-01 KEY	**Experience** The Vendor warrants that it has relevant previous experience providing substantially similar Services in a professional and timely manner to organizations with similar needs to MPI's operating in a similar environment.	Provide information demonstrating your organization's level of experience. At minimum, the following information should be provided: (a) average volume of similar work and number of distinct clients; (b) years of experience providing similar Services as an organization; (c) years of experience or volumes of audits that specifically focus on no fault injury claims and identification of specific work as it relates to brain injuries (d) at least three (3) references for whom the Vendor has performed similar work at a similar scale (government preferred); and (e) any other pertinent information. **MINIMUM SCORE: 4**	

ITEM	REQUIREMENT	INSTRUCTIONS	RESPONSE
V-02 KEY	**Conflict of Interest** The Vendor shall not have: (a) represented an individual claimant; (b) provided services to an MPI claimant; or (c) provided services to MPI specific to injury claims handling.	Confirm that you have not: (a) represented an individual claimant; (b) provided services to an MPI claimant; or (c) provided services to MPI specific to injury claims handling. **MINIMUM SCORE: 4**	

SERVICE REQUIREMENTS

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
S-01 KEY	**Methodologies** The Vendor shall have well-tested methodologies and best practices proven to be effective for: (a) data collection; (b) process mapping; (c) benchmarking; (d) comprehensive analysis; (e) reporting on organizational processes and procedures; and (f) developing meaningful recommendations including: (i) intended impact; and (ii) priority ranking.	Provide information demonstrating your methodologies and best practices including: (a) a summary of standard artifacts and data required; (b) a summary of the methodology to determine impact and priority of recommendations; and (c) Description of the process to develop recommendations including any benchmarking to industry best practices. **MINIMUM SCORE: 4**	
S-02 KEY	**Report** The Vendor shall provide MPI with a report suitable for MPI to file with the PUB, setting out the Vendor's assessment, findings and recommendations.	Provide a sample report that demonstrates your ability to provide a report suitable for filing in a regulatory setting.	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
S-03 KEY	**Timeline** The Vendor shall complete all data collection, process mapping, benchmarking and analysis and submit a report suitable for MPI to file with the PUB no later than three (3) months following commencement of the Services.	Provide your proposed timeline for completing all work and submitting a report. **MINIMUM SCORE: 4**	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
S-04 KEY	**Presentation** The Vendor shall make a suitable Representative(s) available to present the Vendor's assessment, findings and recommendations to the PUB, under oath, and in other instances as required by MPI. The Vendor warrants and represents that the Representative(s) made available to present the Vendor's assessment, findings and recommendations will: (a) Possess comprehensive knowledge of the Vendor's assessment, findings and recommendations; (b) Possess comprehensive knowledge on how the Vendor conducted its assessment, reached its findings and developed its recommendations; (c) Be available to present with two (2) weeks' notice from MPI; and (d) Be available to MPI to prepare for any presentation required by MPI.	Confirm that you will make a suitable Representative available to present the Vendor's assessment, findings and recommendations to the PUB under oath, and as otherwise required by MPI. Describe how you will ensure that the Representative: (a) Possesses comprehensive knowledge of the Vendor's assessment, findings and recommendations; (b) Possesses comprehensive knowledge on how the Vendor conducted its assessment, reached its findings and developed its recommendations; (c) Is available to present with two (2) weeks' notice from MPI; and (d) Is available to MPI to prepare for any presentation required by MPI. **MINIMUM SCORE: 4**	

INFORMATION AND RECORDS MANAGEMENT REQUIREMENTS

Data Security

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
CIS-01 KEY	**Confidential and Personal Information Storage Location** The Vendor shall access, use, and store any Confidential Information collected, including Personal Information, only in Canada or the United States of America or both.	Confirm the location(s) where you would access, use, and store Confidential Information, including Personal Information. **MINIMUM SCORE: 4**	
CIS-02 KEY	**Remote Work Security Standard** If the Vendor or any of its Representatives are delivering all or a portion of the Services from a remote location (e.g. working from home), the Vendor must confirm it has and follows remote work security standards, and that they align with MPI's Remote Work Security Standard attached as Appendix B.5 – Remote Work Security Standard.	Confirm whether you have and follow remote work security standards that align with Appendix B.5 – Remote Work Security Standard. **MINIMUM SCORE: 3**	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
CIS-03 KEY	**Secure Data Transmission** The Vendor shall only send or receive Confidential Information, including Personal Information to or from MPI via a secure site designated by MPI (such as SFTP).	Confirm whether you are able to send and receive Confidential Information, including Personal Information to or from MPI via a secure site such as SFTP. **MINIMUM SCORE: 4**	
CIS-04	**Human Resources Security** The Vendor shall have and follow security and background screening processes including criminal record checks for all Representatives providing the Services.	Provide details of your security and background screening processes for all Representatives that would be involved in delivering the Services.	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
CIS-05	**Security Training and Awareness** The Vendor shall have and follow a comprehensive security awareness training program, for its Representatives with training performed on at least an annual basis. The Vendor shall require its Representatives to complete security awareness training as directed by MPI.	Provide details of your security awareness training programs including the topics covered. Confirm that you perform training at least annually.	
CIS-06	**Data Protection** The Vendor shall follow information security industry best practices to protect Confidential Information against internal and external threats to ensure the confidentiality, integrity, and availability of MPI's Confidential Information.	Describe the information security industry best practices you would use to protect Confidential Information against internal and external threats to ensure the confidentiality, integrity, and the availability of MPI's Confidential Information.	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
CIS-07	**Secure Destruction of Confidential Information** The Vendor shall have and follow secure destruction processes and controls to protect Confidential Information.	Describe your processes for the secure deletion, wiping, or destruction of data from wherever it is stored including from reallocated storage space, damaged hardware or cloud environments.	
CIS-08	**Physical Security** The Vendor shall have and enforce physical security and environmental controls within their computing environments and premises to continuously protect their computing environments and premises.	Provide details on the physical security and environmental controls your organization enforces to protect its computing environments and premises. Include information on measures such as access controls, surveillance systems, and environmental monitoring (e.g., temperature, humidity). Confirm whether these controls are continuously monitored, tested, and maintained to ensure the ongoing security of your computing environments and premises.	

Records Management

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
RM-01 KEY	**Recordkeeping Practices** The Vendor shall have and follow comprehensive Recordkeeping practices that ensure the secure creation, handling, and Disposition of any Services Records created while delivering the Services including the following: (a) Services Records retention and Disposition policies; (b) regular creation of Services Records to document completion of Services; (c) documented review and approval of Services Records prior to Disposition; (d) secure storage and restricted access that protects Services Records; and (e) maintaining audit trails to maintain integrity, confidentiality, and availability of Services Records at all times.	Describe: (a) your Services Records retention and Disposition policies; (b) how you ensure regular creation of Services Records to document completion of Services; (c) your process for review and approval of Services Records prior to Disposition; (d) how you ensure secure storage and restricted access that protects Services Records; and (e) how audit trails are maintained to ensure integrity, confidentiality, and availability of Services Records at all times. **MINIMUM SCORE**: **3**	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
RM-02	**Metadata** The Vendor shall: (a) maintain complete and accurate metadata, including version control, creation date and modified date, associated with each electronic Services Record; and (b) ensure that complete and accurate metadata is included when electronic Services Records are transferred to MPI.	Describe how you will: (a) maintain complete and accurate metadata including version control, creation date and modified date associated with each electronic Services Record; and (b) ensure that complete and accurate metadata is included when electronic Services Records are transferred to MPI.	
RM-03	The Vendor shall retain and prevent the destruction of Services Records and associated metadata for a minimum of 5 years.	Describe your internal retention and disposition policies. Describe what mechanisms you will employ that will retain and prevent the destruction of Services Records and associated metadata for a minimum of 5 years.	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
RM-04	If MPI approves the destruction of Services Records, the Vendor shall securely destroy Services Records according to industry standards that ensure the Services Records cannot be reconstructed or restored, and in an organized and documented way that is auditable.	Describe your Services Record destruction processes and how you will securely destroy Services Records according to industry standards that ensure the Services Records cannot be reconstructed or restored, and in an organized and documented way that is auditable.	
RM-05	The Vendor shall submit any Services Records requested by MPI using one of the following electronic formats: (a) PDF; (b) Word (*.docx); (c) Excel (*.xlsx); (d) CSV; or (e) such other file format as may be approved by MPI.	Describe what file formats you provide your Services Records in and confirm that you would submit any Services Records requested by MPI using one of the following electronic formats: (a) PDF; (b) Word (*.docx); (c) Excel (*.xlsx); (d) CSV; or (e) such other file format as may be approved by MPI.	

ITEM	REQUIREMENT	INSTRUCTIONS TO PARTICIPATING VENDORS	VENDOR RESPONSE
RM-06	Upon expiry or termination of the Agreement, the Vendor shall confirm with MPI whether the Vendor is required to transfer all Services Records to MPI and shall comply with MPI's direction.	Describe how you would transfer all Services Records to MPI upon expiry or termination of the Agreement.	

APPENDIX C.3
COSTS

Name of Participating Vendor: _____

Goods & Services	Unit Cost	Total Good(s) Cost
Assessment and Report	$	$
Expert Testimony	$	$
Other Costs	$	$
Total	**$**	**$**

1.01 The prices entered into the table above must include all costs, fees, and charges the Vendor intends to bill MPI for the Services (see Section 8.02 of Part A of the RFP for further details).

1.02 MPI will be evaluating costs in Canadian Dollars. If a Participating Vendor submits pricing in a currency other than Canadian Dollars MPI will use the value of such currency converted to Canadian Dollars according to the Bank of Canada daily exchange rate as of the Submission Deadline for all evaluations.

1.03 **Renewal Term Pricing**

(a) **Renewal Term Pricing – Fixed**

The pricing for all Renewal Terms shall be as indicated in the above table. Pricing for Renewal Terms is fixed, and no increase to pricing shall be permitted during negotiations or the Term.

PUB (MPI) 1-102

Part and Chapter:	Part V – IT Appendix 2	**Page No.:**	5 - 8
PUB Approved Issue No:	19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);		
Topic:	IT Benchmarking		
Sub Topic:	Gartner Recommendations Fiscal Year 2025/26		

Preamble to IR (If Any):

In Part V – IT Appendix 2, pages 5-8, MPI outlines its plans and progress against Gartner's recommendations, which include:

- Plan Product & Application Lifecycle;
- Manage Vendors; and
- Foster the Data Ecosystem.

Question:

a) Please clarify whether MPI intends to govern these three initiatives as formal projects under its Project Management Office (PMO), including the establishment of defined timelines and allocated budgets.
   i. If an alternative management approach is planned, please detail the proposed framework

b) Please outline the anticipated impact of these initiatives on MPI's IT staffing requirements, resource allocation, and organizational structure.

Rationale for Question:

To clarify governance structures and resource impacts necessary for aligning project delivery expectations to support IT Benchmarking recommendations.

RESPONSE:

a) The initiatives described in Part V – IT Appendix 2 (pages 5–8) are governance and process improvement activities that are being implemented through ongoing operational and management practices. Any associated expenditures will be managed through established operational budgeting and approval processes in accordance with

internal policies. As operational improvements, they do not require formal project governance through the Project Management Office (PMO).

b) The implementation of these improvements is not expected to have a material impact on MPI's IT staffing requirements, resource allocation, or organizational structure.

PUB (MPI) 1-103

Part and Chapter:	Part V – IT Appendix 2	**Page No.:**	5
PUB Approved Issue No:	19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);		
Topic:	IT Benchmarking		
Sub Topic:			

Preamble to IR (If Any):

MPI has provided a progress update on Gartner's FY2024/25 recommendation to strengthen product and application lifecycle planning. MPI has noted this framework will be operationalized by the end of FY 2026/27.

Question:

a) Please identify which MPI division will be accountable and responsible for establishing and implementing the Enterprise Application Lifecycle Management (ALM) framework.

b) Please indicate whether MPI will engage or has already engaged external consultants to establish the ALM framework, and if so, the estimated budget for this initiative.

Rationale for Question:

To clarify ownership, accountability, and resourcing for the ALM framework's establishment and implementation.

RESPONSE:

a) Information Technology (IT) is responsible for the establishment and implementation of the Enterprise Application Lifecycle Management (ALM) Framework.

b) The Implementation of this framework will be done utilizing MPI internal capacity and is not expected to have a material impact on MPI's IT staffing requirements, resource allocation, or organizational structure.

PUB (MPI) 1-104

Part and Chapter:	Part V – IT Appendix 2	**Page No.:**	7
PUB Approved Issue No:	19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);		
Topic:	IT Benchmarking		
Sub Topic:			

Preamble to IR (If Any):

MPI has provided a progress update on Gartner's FY2024/25 recommendation to advance MPI's data ecosystem. MPI has noted that the effort is in the initial phase, follows a phased path forward, and is establishing Microsoft Fabric as the modern enterprise data platform (EDP).

Question:

a) Please identify which MPI division will be accountable and responsible for managing and implementing the phases to support advancement of MPI's data ecosystem.

b) Please indicate whether MPI will engage or has already engaged external consultants to support this initiative, and if so, the estimated budget for this initiative.

Rationale for Question:

To clarify accountability, funding approval, phased budget allocation, and external consulting requirements for the evolution of MPI's data ecosystem

RESPONSE:

a) The IT division will be accountable and responsible for managing and implementing the phases, with additional responsibilities, consultations, and information sharing taking place with key business stakeholders.

b) **[REDACTED]**

[REDACTED]

PUB (MPI) 1-105

Part and Chapter:	Part V – Information Technology Appendix 2	**Page No.:**	97
PUB Approved Issue No:	19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);		
Topic:	IT Benchmarking		
Sub Topic:			

Preamble to IR (If Any):

Question:

Please provide the Gartner Master Service Agreement and/or Statement of Work covering the IT Benchmarking services that Gartner will perform for MPI, spanning June 2025 to June 2030.

Rationale for Question:

To further refine the understanding of the scope of work and engagement mode of Gartner's IT Benchmarking services for MPI, this question seeks to clarify the boundaries, deliverables, and engagement expectations to ensure alignment with MPI's objectives.

RESPONSE:

Please see *Appendix 1*.

Consulting Services Agreement - Gartner Canada Co.

This **Consulting Services Agreement** ("**Agreement**"), dated as of 5 June, 2025 (the "**Effective Date**"), is between Gartner Canada Co. located at 40 King Street West, 36th Floor, Suite 3601, Toronto, Ontario, M5H 3Y2 ("**Gartner**") and The Manitoba Public Insurance Corporation located at 234 DONALD AVE 9TH Floor, WINNIPEG, Manitoba, R3C 4A4, Canada ("**Client**"), and sets forth the terms and conditions for the provision of consulting and benchmarking services to be performed by Gartner or its Affiliates for Client (collectively, the "**Services**"). For purposes of this Agreement, "**Affiliates**" means any entity that, directly or indirectly, controls, is controlled by, or is under common control of that party. "**Control**" means direct or indirect ownership of 50% or more of the stock or other interests entitled to vote for the election of the board of directors or other governing body of the entity.

1. ***Agreement.*** This Agreement is applicable to all Services provided by Gartner during the term of this Agreement as set forth in Request for Proposal 3389 posted by the Client on MERX February 14, 2025 (the "RFP") and the Proposal of Gartner received by the client dated March 7, 2025 (the "Proposal"). Both the RFP and Proposal are incorporated into this Agreement by reference. The RFP and Proposal contain the scope of the Services, the deliverables to be provided by Gartner (the "Deliverables"), specific responsibilities of Client, and the fees and payment schedule for the Services. The parties may make changes to this Agreement provided that both parties agree to the changes in writing.

2. ***Term of Agreement.*** This Agreement comes into effect as of June 5, 2025, and shall continue until and including June 4, 2030 (the "**Initial Term**"), unless otherwise terminated, suspended or extended in accordance with the terms and conditions of this Agreement.

3. ***Renewals.*** MPI may, at its sole option, not later than ninety (90) days prior to the expiration of the Initial Term, renew the Agreement for an additional twenty-four (24) month term (the "**First Renewal Term**"), on the same terms and conditions as were in force during the Initial Term. To determine pricing for the First Renewal Term, on the date that it notifies the Vendor of its intention to renew, MPI will take the most currently available Consumer Price Index ("**CPI**") calculation for Manitoba from Statistics Canada and compare it to the CPI for the same month of the previous year to determine the percentage of increase or decrease. If the percentage is positive (an increase), the percentage will then be applied to the prices that were in effect during the Initial Term. If the percentage is negative (a decrease), then the prices that were in effect during the Initial Term will remain unchanged. If Statistics Canada no longer supplies the CPI data at the time of adjustment, the CPI data of such other agency as MPI may reasonably select shall be used.

   If MPI has exercised its renewal rights provided in the above subsection (b), then MPI may, at its sole option, not later than ninety (90) days prior to the expiration of the First Renewal Term, renew the Agreement for a second additional twenty-four (24) month term (the "**Second Renewal Term**"), on the same terms and conditions as were in force during the First Renewal Term. The pricing for the Second Renewal Term, will be calculated in the same manner as for the First Renewal Term based other than the CPI as a percentage will then be applied to the prices that were in effect during the First Renewal Term.

   The "**Term**" shall collectively mean the Initial Term and all additional renewal terms.

4. ***Effect of Termination.*** Upon termination of this Agreement, Gartner shall complete the Services in process as of the effective date of termination.

5. ***Intellectual Property.*** Client shall retain all right, title and interest in any proprietary materials supplied to Gartner ("Client Materials"), and grants Gartner all necessary rights and licenses for Gartner to fulfill its obligations under each SOW. Excluding any Client Materials, Gartner shall retain sole and exclusive ownership of the Deliverable(s), Gartner tools, methodologies, questionnaires, responses, and proprietary research and data generated in the course of performing the Services, together with all intellectual property rights therein (the "Gartner Materials"). Gartner grants Client a perpetual, non-exclusive, royalty-free license to use the Deliverables, subject to the limitations set forth in Section 7 (Use of Deliverables). Gartner shall not be restricted in its use of ideas, concepts, know-how, data and techniques acquired or learned in the course of performing the Services, provided that Gartner shall not use or disclose any of Client's confidential information, as defined in Section 8 (Confidentiality).

6. ***Benchmarking Services.*** With respect to any benchmarking services performed by Gartner, Gartner will only use Client's data in an aggregate and anonymous format. Client acknowledges that the contents of the benchmarking Deliverables are based upon information which is proprietary to Gartner and contained in Gartner's database. Client's data will become part of the database. The database will be used by Gartner in future consulting and benchmarking engagements.

7. ***Use of Deliverables.*** Subject to payment in full of the applicable fees, Gartner grants to Client, for internal purposes only, a worldwide, royalty-free, perpetual license to use, reproduce, display, distribute copies of, and prepare derivative works of the Deliverables. Unless the Deliverable is identified in a SOW as intended for external distribution by Client such as a Request for Proposal or similar document, Client shall not make the Deliverables available, in whole or in part, to anyone outside of Client, or quote excerpts from the Deliverables to the public. Notwithstanding the foregoing, Client may share the Deliverables with (i) its outside auditors and/or accountants, (ii) third parties who have signed appropriate confidentiality agreements with Client who are engaged by Client to review or implement suggestions or to further research the issues contained in the Deliverables, (iii) governmental or regulatory bodies as required by law, and (iv) with Client's Affiliates provided that its Affiliates are made aware of the obligations under this Section and that Client remains liable for the use made of the Deliverables by its Affiliates.

   Notwithstanding the wording of Sections 7 above and 8 below, Gartner acknowledges and accepts that the Client will be required to provide Deliverables to its regulator the Public Utilities Board of Manitoba ("PUB"), and Gartner will be required to present Deliverables to the PUB as part of the Services provided. MPI agrees to only provide Deliverables to the PUB through a confidential submission process, unless otherwise approved in writing by Gartner. Through such confidential process, the PUB and all parties to a general rate application proceeding in receipt of the deliverables (e.g. the PUB panel, intervenors, and consultants) will be required to keep the deliverables confidential and sign the PUB's approved form of non-disclosure agreement and undertaking to destroy all Confidential Information at the end of such proceeding.

8. ***Confidentiality & Data Protection.***
   a) The parties agree to keep confidential and not to use or disclose to any third parties any non-public business information of the other party learned or disclosed in connection with each SOW, including the Gartner Materials. The obligation of the parties with respect to the confidential information shall terminate with respect to any particular portion of the confidential information if and when: (i) it is in the public domain at the time of its communication; (ii) it is developed independently by the receiving party without use of any confidential information; (iii) it enters the public domain through no fault of the receiving party subsequent to the time of the disclosing party's communication to the receiving party; (iv) it is in the receiving party's possession free of any obligation of confidence at the time of the disclosing party's communication; (v) it is communicated by the disclosing party to a third party free of any obligation of confidence; or (vi) the receiving party has the disclosing party's written permission.

   b) Each party shall provide notice to the other of any demand made upon it under lawful process to disclose or provide any of the other party's confidential information. The receiving party agrees to cooperate with the disclosing party, at the disclosing party's expense, if the disclosing party elects to seek reasonable protective arrangements or oppose such disclosure. Any confidential information disclosed pursuant to such lawful process shall continue to be confidential information.

   c) In performing its obligations under this Agreement, each of Gartner and Client will comply with all applicable data protection legislation. In the event that any personal data is exchanged under this Agreement or any SOW, the parties shall treat such personal data in accordance with their respective privacy policies.

9. ***Warranties.*** Client warrants that Gartner's use of any materials furnished by Client in connection with a SOW does not infringe any copyright, trademark, trade secret or other right of any third party. Gartner warrants that the Deliverables, in the form provided to Client, do not infringe any copyright, trademark, trade secret or other right of any third party.

   EXCEPT AS PROHIBITED BY APPLICABLE LAW OR OTHERWISE SET FORTH ABOVE, ALL SERVICES ARE PROVIDED ON AN "AS IS" BASIS AND GARTNER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A

PARTICULAR PURPOSE. THE INFORMATION IN THE DELIVERABLES HAS BEEN OBTAINED FROM SOURCES THAT GARTNER BELIEVES TO BE RELIABLE. ALL DELIVERABLES SPEAK AS OF THE DATE OF DELIVERY TO THE CLIENT. GARTNER HAS NO OBLIGATION TO ADVISE CLIENT OF ANY CHANGE IN THE INFORMATION OR VIEWS CONTAINED IN THE DELIVERABLES.

10. ***Limitation of Liability.*** Neither party shall be liable for any consequential, indirect, special or incidental damages, including but not limited to, lost profits, business failure or loss of use, arising out of use of the Deliverables or the Services, whether or not advised of the possibility of such damages. Except for liability for personal injury or death or for damage to property caused by the negligence or willful misconduct of a party or its employees, or a party's breach of its confidentiality obligations under this Agreement, each party's total liability arising out of this Agreement and the provision of the Services shall be limited to the fee paid by Client under the SOW under which such liability arises. Unless otherwise prohibited by applicable law, and except for actions by Gartner for payment, no action or proceeding arising out of this Agreement may be brought more than two years after the events giving rise thereto.

11. ***Fees and Expenses.*** The fees due to Gartner in connection with this Agreement are set forth in the Proposal and are exclusive of any applicable taxes. All taxes are the responsibility of the party to which those taxes apply. Client agrees to pay all reasonable travel-related expenses incurred by Gartner in connection with the Services. Out-of-pocket expenses related to travel and subsistence will be billed at the actual amount incurred, and are not included in the professional fee applicable to each SOW.

12. ***Acceptance of Deliverables.*** All Deliverables provided by Gartner to Client shall be deemed to be accepted within 15 days of receipt by Client unless Gartner receives written notice of non-acceptance within 15 days after delivery. Any notice of non-acceptance must state in reasonable detail how the Deliverables did not conform to the SOW and Gartner shall use its reasonable business efforts to correct any deficiencies in the Deliverables so that they conform to the SOW. Client shall not withhold any payment for Services except for material and substantial non-conformity with the SOW.

13. ***Assignment.*** The parties may not assign any rights or delegate any obligations under this Agreement without the prior written consent of the other party, which consent shall not be unreasonably withheld, provided (i) Gartner may assign any rights or obligations under this Agreement to any of its affiliates and subsidiaries without the prior consent of Client and (ii) each party may assign its rights to a successor entity provided that upon the merger or consolidation of such party or the transfer of all or substantially all of its assets to a third party, the surviving entity is controlled by the person(s) controlling such party prior to the date of such merger, consolidation or transaction. Any assignment in violation of this Agreement is void. This Agreement shall be binding upon the successors, legal representatives and permitted assigns of the parties.

14. ***Force Majeure.*** Neither party shall be in breach of this Agreement to the extent performance is prevented or delayed by natural disasters, war, acts of God or any similar event, that is beyond the reasonable control of either party.

15. ***Publicity.*** Neither party shall use the name of the other party in any announcements, press releases or advertisements, or for any commercial purpose, without the prior written consent of the other, except that Gartner may name Client in client listings.

16. ***Independent Contractors.*** The relationship of the parties is that of independent contractors. Neither party shall be deemed to be the employees, agents, joint ventures or partners of the other, and neither party shall have the authority to bind the other. Nothing contained in this Agreement shall preclude Gartner from rendering services to others or developing work products that are competitive with, or functionally comparable to, the Services.

17. ***No Third-Party Beneficiaries.*** This Agreement is for the benefit of the parties only. None of the provisions of this Agreement are for the benefit of, or enforceable by, any third party. The parties agree that no third party shall have the right to (i) rely on the Services provided by Gartner, or (ii) seek to impose liability on Gartner as a result of the Services or any Deliverables furnished to Client.

18. ***Entire Agreement.*** This Agreement, together with the SOWs, constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes all prior documents and agreements, and shall not be effective until accepted by an authorized representative of Gartner and Client.

19. ***Amendments/Controlling Document.*** Any change to the provisions of this Agreement shall be made by written amendment signed by both parties. The provisions of this Agreement shall control any inconsistencies with SOWs unless otherwise specifically agreed by the parties in writing by referencing the provision of this Agreement being modified. This Agreement and any amendments thereto may be executed in counterparts.

20. ***Severability.*** If any term of this Agreement or a SOW is to any extent invalid, illegal, or incapable of being enforced, such term shall be excluded to the extent of such invalidity, illegality, or unenforceability; all other terms hereof shall remain in full force and effect.

21. ***Notices.*** All notices under this Agreement shall be by email to the addresses below or in writing and sent by hand delivery, courier or certified mail, return receipts requested, to the other party's address set forth below. Notices shall be effective upon receipt. A party may change its address by giving written notice to the other party in accordance with this Section.

If to Client:
The Manitoba Public Insurance Corporation
234 DONALD AVE 9TH FL
WINNIPEG, Manitoba, R3C4A4 Canada
Attention: Manager, Strategic Sourcing & Vendor Management
Email: purchasingservices@mpi.mb.ca

22. ***Governing Law.*** This Agreement, and any dispute arising from it, shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein.

23. ***Dispute Resolution.*** Any dispute arising out of or in connection with this Agreement shall be decided by a single arbitrator under the International Arbitration Rules of ADR Chambers International, or such other dispute resolution entity jointly agreed upon by the Parties. The decision of the arbitrator shall be final and binding, and the award may be entered in any court having jurisdiction over the Parties. The Parties consent to the jurisdiction of the Courts of the Province of Ontario. The prevailing Party shall be entitled to an award of its reasonable attorneys' fees and costs, in addition to an award of damages or other relief, if any. This clause is without prejudice to either Party's right to seek interim relief against the other Party (such as an injunction) through the courts of Canada to protect its rights and interests, or to enforce the obligations of the other Party.

24. ***Survival.*** Sections 4 to 12, 17, 22, 23 and 24 shall survive any expiration or termination of this Agreement.

[THE REMAINDER OF THIS PAGE HAS BEEN LEFT INTENTIONALLY BLANK]

The parties have caused this Agreement to be executed by their authorized representatives, to be effective on the Effective Date.

PUB (MPI) 1-106

Part and Chapter:	Part V – Information Technology Appendix 2	**Page No.:**	9
PUB Approved Issue No:	19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);		
Topic:	IT Benchmarking		
Sub Topic:			

Preamble to IR (If Any):

MPI states:

"Detailed recommendations will be submitted to the PUB and made available for review during hearings scheduled for October 2026. Figure 5 below depicts the timeline for the benchmarking exercise this year."

Question:

Please confirm whether the IT Benchmarking report will be filed in August 2026 and identify any anticipated risks that may impact its timely delivery.

Rationale for Question:

To confirm the filing timeline and identify risks affecting timely report delivery.

RESPONSE:

Filing of the Gartner IT Benchmarking assessment is scheduled for August 2026 and is proceeding as planned. No material risks or delays have been identified that would affect timely submission.

PUB (MPI) 1-107

Part and Chapter:	Part V – Information Technology Appendix 1	**Page No.:**	7
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT Strategy Roadmap Timeline		
Sub Topic:			

Preamble to IR (If Any):

Question:

Please provide an update on whether the IT Roadmap will be released to the PUB prior to the GRA 2027/28 hearings and identify any risks to this timeline.

Rationale for Question:

To confirm the IT Roadmap delivery timeline and identify risks affecting availability before GRA hearings.

RESPONSE:

MPI is currently targeting release of the updated IT Roadmap prior to the 2027/28 GRA hearings and work remains on track. At this time, no material risks have been identified that are expected to impact the planned release date. The timeline remains subject to normal governance, review, and approval processes, as well as any significant changes to corporate priorities or planning assumptions. MPI will advise the PUB should any material risks to the timeline emerge.

PUB (MPI) 1-108

Part and Chapter:	Part V – Information Technology	**Page No.:**	5
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT Organizational Update		
Sub Topic:	IT.6 Enterprise Project Management Office (EPMO)		

Preamble to IR (If Any):

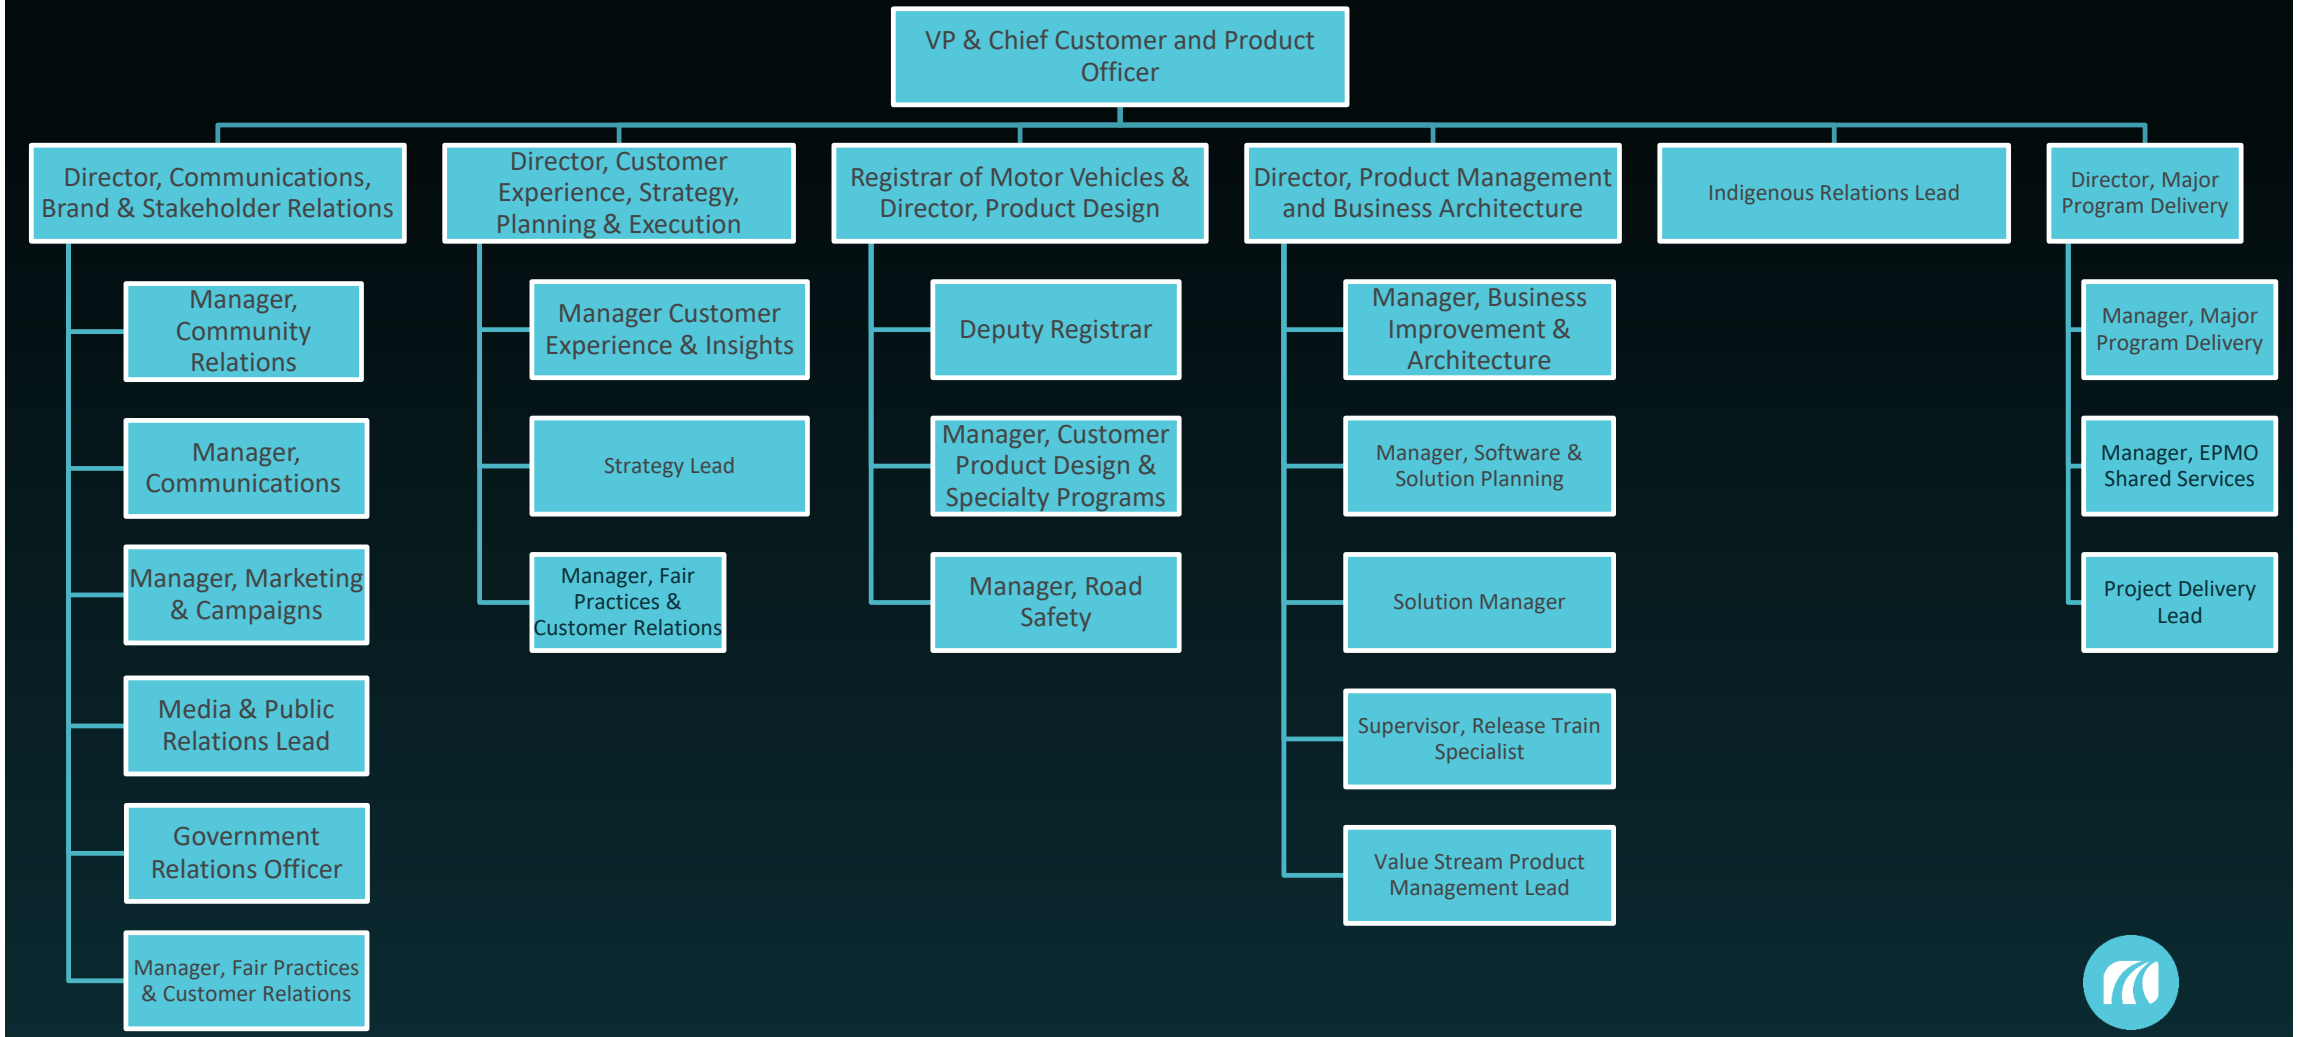
MPI states:

"The most notable organizational change since the previous filing is the creation of the Enterprise Project Management Office (EPMO) on April 20, 2026. This was accomplished by bringing together Major Programs and the Project Management Office (PMO) under a single structure within the Customer & Product Value division."

However, the Information & Technology Division organizational chart (Part II MFR Appendix 7, pg. 8) lists Major Programs including the Director, Manager, and Coordinators (x2) under the Information & Technology division.

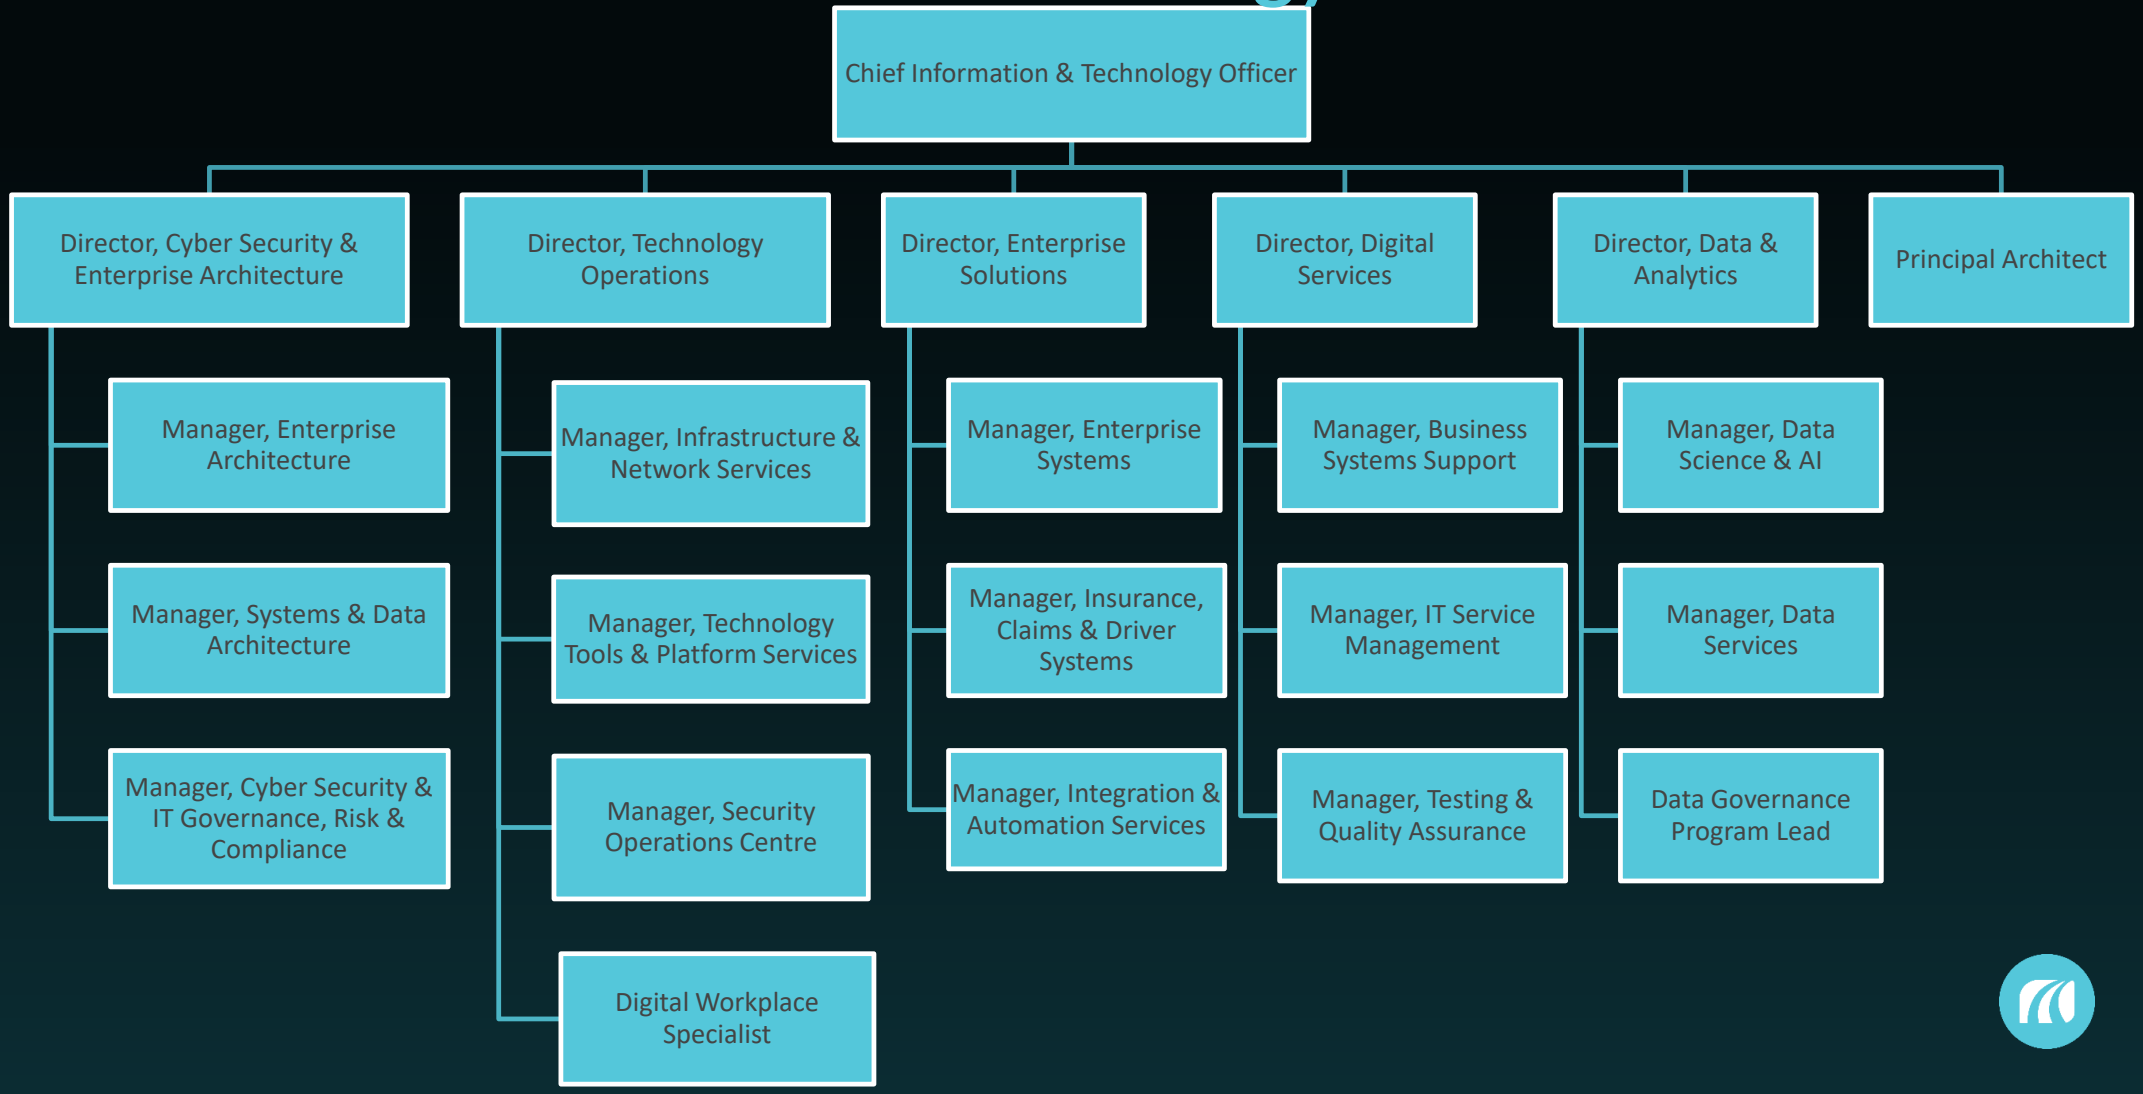
Question:

a) Please reconcile the inconsistency between the organizational chart and the consolidation of Major Programs with the Customer & Product Value division.
b) Please identify and list any current vacancies within the leadership organizational structure provided for the IT division.



Rationale for Question:

To clarify the reporting line and division of ownership for Major Programs.



RESPONSE:

a) Please see ***Appendix 1*** for changes in the organizational structure.
b) There are currently no vacancies in the IT division leadership organizational structure (Managers and up).

PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT Organizational Update		
Sub Topic:			

Preamble to IR (If Any):

MPI has undergone a leadership change within Information Technology spawning from the departure of the previous Chief Information Technology Officer (CITO). MPI has hired a new CITO.

Question:

Please file the resume of the newly hired CITO.

Rationale for Question:

To understand the changes to Information Technology management.

RESPONSE:

Please see *Appendix 1 - Confidential*.

TRACY A RILEY, C.Dir., MBA, CIP

[redacted]

▪ Property & Casualty Insurance Expert ▪ Transformational Executive Leader

▪ Strategic Thinker ▪ Team Player ▪ Innovative

▪ Passionate to Succeed

Highly respected in the Canadian P&C insurance sector, leveraging deep industry expertise and relationships throughout North America to achieve sustained results for one of Canada's largest carriers. Transformational executive leader with a proven record of advancing digital capabilities to deliver exceptional customer experiences. Recognized for designing and executing enterprise-wide transformation strategies that drive profitable growth and foster a member-centric culture. As a politically agile leader, successfully navigated complex stakeholder interests to implement a comprehensive policy, claims and billing platform, aligning executive priorities and securing buy-in across departments. Passionate coach dedicated to developing high-performing teams.

PROFESSIONAL EXPERIENCE

MANITOBA PUBLIC INSURANCE

Vice President – Chief Information & Technology Officer (Feb 2026 – present)

As a key member of the Executive Leadership Team, the Vice President & Chief Information Technology Officer (CITO) leads enterprise-wide digital transformation through strategic technology leadership. The CITO is responsible for ensuring the efficient, secure, and innovative delivery of IT services that enable high-quality, accessible automobile insurance and driver licensing services for Manitobans.

- ✓ Responsible for driving innovation and technology excellence across the organization and provides strategic oversight across the IT Division including IT operations, enterprise architecture, business transformation, information security, and enterprise support functions.
- ✓ Responsible for the development and execution of long-term strategies for technology, information management, enterprise architecture, and digital platforms – ensuring alignment with corporate priorities and enhancing customer, partner, and employee experiences.
- ✓ A critical mandate includes safeguarding MPI's data and systems against external threats while fostering a high-performance, customer-focused technology organization.

WAWANESA MUTUAL INSURANCE COMPANY

Senior Vice President - Chief Technology & Analytics Officer (Jan 2025 – April 2025)

An essential executive leader accountable for Wawanesa's technology, ensuring technological demands are met, data is readily accessible and necessary analytical support is available. Accountable to deliver a cost-effective and complete technology stack, maintaining data integrity and privacy, and improving operational efficiency with digital technologies and data analytics.

- ✓ Developing a clearly defined enterprise-wide technology strategy, ensuring digital, AI, and Cloud-based initiatives are fully integrated into the strategic planning process for leadership commitment, resource allocation, and execution.
- ✓ Driving the adoption of emerging technologies, such as GenAI and machine learning, to enhance operational efficiency.
- ✓ Coaching and mentoring technology leaders to drive a culture of innovation, member-centricity, continuous improvement, and growth.

Senior Vice President - Chief Insurance & Technology Officer (2022 – 2025)

An essential executive leader integral to the profitability of Wawanesa's Canadian personal insurance portfolio through pricing sophistication, a strong data foundation, and integrated and secured technology. Accountable for successfully advancing the organization's advanced analytics and artificial intelligence strategy and roadmap with solid governance and human oversight, enabling an optimized workforce, fraud and expense management, and an exceptional member, broker, and employee experience. Responsible for securing Wawanesa's data and systems from cyber threats.

- ✓ Developing a clearly defined enterprise-wide technology strategy, ensuring digital, AI, and Cloud-based initiatives are fully integrated into the strategic planning process for leadership commitment, resource allocation, and execution.
- ✓ Driving product strategy and innovation by maximizing technology investments and developing internal and external partnerships.
- ✓ Developing a best-in-class talent strategy to develop and prepare future leaders and incorporate intentional diversity, equity, and inclusion.

Senior Vice President - Chief Digital Officer (2021 – 2022)

A key executive leader integral to the long-term success of Wawanesa through exploration in the 'art of the possible' and creation of an enhanced digital experience delivered with agility, speed, and innovation. Capitalizing opportunities to reduce costs through automation and self-service and leveraging digital across the entire Wawanesa ecosystem using data, technology, people, and processes to enhance and optimize fundamental business performance.

- ✓ Developing a clearly defined enterprise-wide digital vision and strategy, ensuring all digital initiatives are fully integrated into the strategic-planning process for leadership commitment, resource allocation, and execution.
- ✓ Driving digital innovation through partnerships across the business to generate innovative digital solutions for products, services, processes, customers and employee experiences, marketing channels, and business models.
- ✓ Improving Wawanesa's Key Performance Indicators by introducing and optimizing ethically created machine learning and artificial intelligence models embedded into crucial customer journeys and enterprise processes.

Vice President – Business Transformation (2015 – 2021)

A key executive leading highly visible and impactful enterprise-wide strategic initiatives and operational innovative solutions; accountable for the $300m system renewal program and the realization of operational savings. Responsible for additional million-dollar projects, designing and leading execution of strategic end-to-end business transformation, while capitalizing on opportunities for continuous improvement to drive efficient and effective operational processes. Leading a team of 50+ employees comprising various IS functions, business SMEs/analysts, and Lean Six Sigma experts.

- ✓ Business leadership of large-scale enterprise-wide strategic initiatives and projects that incorporate proactive and innovative solutions; act as the bridge between technology and the business to capitalize on existing and future opportunities or challenges for the business to ensure future company relevancy.
- ✓ Business leadership in the implementation of rate and product changes for Canada's P&C operations, optimizing business processes and automation to deliver financial targets.

EDUCATION

- **Chartered Director (C.Dir.),** The Directors College, (2026)
- **Master of Business Administration in Digital Transformation**, McMaster University, DeGroote School of Business, Hamilton, Ontario (2021)
- **Queen's Executive Program**, Queen's University, Kingston, Ontario (Leadership, Strategy, Strategic Execution) (2017)
- **Chartered Insurance Professional (CIP)**, Insurance Institute of Canada, Manitoba Division (2004)
- **Business Administration Diploma**, Red River Community College, Winnipeg, Manitoba (1991)

BOARDS, MEMBERSHIPS, AND ASSOCIATIONS

- Board of Directors, Mood Disorders Association of Manitoba, 2025 to 2026
- Advisory Board Member, Trufla Technology Ltd., 2025 to 2025
- Ambassador, WELCM Group (Women Supporting Emerging Leaders through Connection and Mentorship), 2024 to present
- Member, WOW (Women of Winnipeg), 2023 to present
- Member, Insurance Institute of Canada, 1992 to present
- Member, Institute of Corporate Directors, 2023 to present
- Board of Directors, Facility Association, 2022 to 2025

- Board of Directors, Winnipeg Condominium Corporation No. 547 – 2019 & 2020

PUB (MPI) 1-110

Part and Chapter:	Part V – Information Technology	**Page No.:**	12-13
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT.4 Labour Updates		
Sub Topic:	IT.4.3 Skill Gaps and Third-Party Dependencies		

Preamble to IR (If Any):

In Part V – Information Technology IT.4.3 "Skill Gaps and Third-Party Dependencies – 2025/26 Update" MPI states that "staff successfully executed on their individual development plans, with strong support from IT division leadership," and that "teams were encouraged to dedicate up to two weeks annually to structured learning."

In Part V – IT Appendix 3: IT Risk Registry, Risk #2 identifies "difficulty in attracting knowledgeable SMEs as Full Time Employees," and Risk #4 identifies a "lack of in-house technical capability / expertise."

In Part VIII – EXP Appendix 18, Figure EXP App 18-2, Line No. 19 (Training) shows actuals of $135K (2023/24), $248K (2024/25), and $35K (2025/26), followed by a $0 budget for each of the next five forecast years.

Question:

Please reconcile the $0 forecast training budget with:

i. MPI's stated commitment to individual development plans and up to two weeks of annual structured learning per staff member;

ii. The fact that MPI has funded training in each of the past three years, but has budgeted nothing for training going forward; and

iii. Risk #4's mitigation strategy to upskill resourcing based on skills gap assessment.

Rationale for Question:

To clarify staff development funding forecasts.

RESPONSE:

All corporate training has been centralized in the People & Culture divisional budget and is therefore not reflected in the Information Technology budget. The following amounts have been allocated to Information Technology for training in the 5 year forecast:

- 2027/28 & 2028/29: $200,000
- 2029/30: $204,000
- 2030/31: $208,080
- 2031/32: $212,242

PUB (MPI) 1-111

Part and Chapter:	**Part V – Information Technology**	**Page No.:**	**36**
PUB Approved Issue No:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap (including Major Programs)** **9. Cost of operations and cost containment measures**		
Topic:	**Capital Expenditures**		
Sub Topic:	**Cost of Capital**		

Preamble to IR (If Any):

Question:

a) Please provide a table detailing the cost of capital hurdle rates (low, medium and high risk) used in 2019 through 2026.

b) Please also include in the table the hurdle rates used for projects with risk mitigation strategies.

Rationale for Question:

To understand any changes to business case cost of capital.

RESPONSE:

a) Please see *Appendix 1 – Cost of Capital Hurdle Rate 2019 – 2026.*

b) Details of NPV by project is included in *Part V IT Appendix 9 – Corporate Project Listing*.

As filed in the *2026 GRA CC (MPI) 1–64-part b)*, Net Present Value (NPV), while a consideration, is not the main decision-making factor for major programs. MPI needs to modernize its IT systems to address significant technology debt. Without this modernization, MPI faces considerable security and operational risks that could jeopardize MPI's ability to serve customers. While these investments do not generate immediate revenue or savings that offset capital expenditure, they are necessary for maintaining the integrity and long-term stability of operations.

Line No.	Option	Description	GRA 2027 July 2026 onward Hurdle Rate	GRA 2026 July, 2025 onward Hurdle Rate	GRA 2025 July, 2024 onward Hurdle Rate	GRA 2024 November, 2023 onward* Hurdle Rate	GRA 2023 June 2021 onward Hurdle Rate	GRA 2022 June 2021 onward Hurdle Rate	GRA 2021 June 2020 onward Hurdle Rate	GRA 2020 January 2019 onward
1	**Low Risk**	for low risk projects	5.00%	5.00%	5.00%	5.00%	4.50%	4.50%	3.50%	4.00%
2	**Medium Risk**	for medium risk projects	5.50%	5.50%	6.00%	6.00%	6.50%	6.50%	6.00%	6.00%

PUB (MPI) 1-112

Part and Chapter:	Part V – Information Technology	**Page No.:**	12-14
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT.4 Labour Updates		
Sub Topic:	2025/26 Update		

Preamble to IR (If Any):

MPI notes in FY 2024/25, MPI completed an evaluation of skills across the IT Division using the Skills Framework for the Information Age (SFIA) tool.
Question:

a) Please provide an update on whether the results of this skills assessment remain consistent with the advancement of MPI's IT Strategy since FY 2024/25.
b) Please indicate whether MPI anticipates any skills gaps arising from the advancement of technologies such as Artificial Intelligence (AI) since FY 2024/25.
c) Please file the completed SFIA Report from the 2026 GRA, along with any subsequent updates.

Rationale for Question:

To clarify IT skills alignment with MPI’s evolving Information Technology strategy.

RESPONSE:

a) MPI completed an Information Technology (IT) skills assessment using the Skills Framework for the Information Age (SFIA) in FY 2024/25. The results remain broadly consistent with the direction of MPI’s IT Strategy and continue to support current priorities, including cloud adoption, cybersecurity, data and analytics, service management, and modernization initiatives. MPI continues to use these results to inform workforce planning, recruitment, succession planning, and employee development activities.

b) MPI anticipates that the continued advancement of Artificial Intelligence (AI), automation, cloud technologies, cybersecurity, and data management capabilities

will increase demand for specialized skills across the IT Division. While the SFIA assessment identified a strong foundation of existing capabilities, MPI expects targeted skill development, recruitment, and knowledge-transfer activities will be required to address emerging technology needs. MPI is incorporating these considerations into workforce planning and employee development initiatives to help ensure capabilities remain aligned with evolving business requirements and the advancement of its IT Strategy.

c) A formal consolidated report has not been finalized. Following completion of the SFIA role mapping, skills assessment, and gap analysis activities, an Excel-based skills gap report was provided to managers outlining the technical and professional skill gaps identified within their respective teams. Managers reviewed the results and identified priority skills for development based on operational and strategic needs. Learning Services developed role-based development recommendations and Individual Development Plans for 62 positions across the division.

The SFIA initiative has since been approved to be operationalized. Employees continue to execute on their development plans to address identified skill gaps, and workforce modernization efforts now include the first two modernized SFIA-aligned roles, to be piloted during this fiscal year.

Overall, the SFIA initiative established a structured foundation for skills assessment, development planning, and workforce capability management, which continues to support workforce modernization and long-term talent planning across the division.

PUB (MPI) 1-113

Part and Chapter:	Part V – Information Technology	**Page No.:**	14
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT.4.3 Skill Gaps & Third-Party Dependencies		
Sub Topic:	Third Party Dependencies		

Preamble to IR (If Any):

MPI states:

"Kyndryl currently manages the cloud environment, and maintains the remaining legacy systems hosted in their datacenters.

Kyndryl will continue to deliver these services under the existing agreement until its scheduled conclusion in January 2027. Planning is underway to assess future service needs and identify the most suitable partner to support MPI's next phase of digital operations."

Question:

a) Please provide an update on the timeline to assess future service needs and to identify the most suitable partner to support MPI's next phase of digital operations.
b) Please summarize which legacy systems are currently hosted within Kyndryl's data centers.
c) Please summarize Kyndryl's data hosting residency requirements and MPI's perspective.
d) Please provide a table listing your Platform-as-a-Service (PaaS) and Software-as-a-Service (SaaS) vendors. The table should include:
    i. Vendor name
    ii. Service type (PaaS or SaaS)
    iii. Primary and backup data center locations

Rationale for Question:

To understand MPI's transition planning and legacy system dependencies ahead of the Kyndryl agreement's January 2027 conclusion and MPI's data hosting context

RESPONSE:

a) MPI has concluded its assessment and determined that Kyndryl remains the most suitable partner to support MPI up to a five-year period beginning February 1, 2027. Contract negotiations are currently underway and will conclude prior to January 31, 2027, the end of the existing contract.

b) **[REDACTED]**.

c) Kyndryl's hosting services are governed by contractual requirements relating to the security, protection, availability, and management of MPI data. Under the current agreement, MPI data hosted by Kyndryl is maintained within approved Canadian data centre environments and is subject to contractual, privacy, and security controls. MPI's perspective is that data residency, security, regulatory compliance, and operational resiliency remain key considerations in all current and future hosting arrangements. These principles will continue to inform the future service delivery decisions following the conclusion of the current agreement in January 2027.

d) MPI utilizes numerous SaaS solutions across the enterprise. As part of procurement and contract negotiations, MPI establishes requirements related to data residency, privacy, security, and service availability. Vendors are responsible for ensuring their services comply with these contractual requirements.

Please refer to the table below:

Vendor	**Service Type**	**Primary Data Centre Location**	**Backup/DR Location**
Microsoft Azure	PaaS	[Redacted]	[Redacted]
Kyndryl (managed hosting)	Hosting/Managed Service (not SaaS/PaaS)	[Redacted]	[Redacted]
Selected SaaS vendors	SaaS	Vendor-specific	Vendor-specific

Primary and backup data centre locations are vendor specific and may change over time. MPI does not maintain a consolidated inventory of validated primary and backup data centre locations for all SaaS vendors. Where required, this information would need to be obtained directly from the applicable vendor.

PUB (MPI) 1-114

Part and Chapter:	Part V – Information Technology	**Page No.:**	7,15
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT.4.3 Skill Gaps & Third Party Dependencies		
Sub Topic:	Third Party Dependencies		

Preamble to IR (If Any):

Gartner indicated on page 7 that MPI needs a more robust vendor management system.

MPI states:

"MPI maintains contractual relationships with over 75 software vendors to support a wide range of applications and provide services —from full Software as a Service (SaaS) solutions to basic licensing agreements. These partnerships are essential to sustaining MPI's digital operations and service delivery."

Question:

a) Please provide a table listing the 75 software vendors, including the following for each:
   i. Contracted term (duration) of each vendor.
   ii. Summary of the type of service(s) provided
   iii. Type of contract remuneration (e.g., SaaS/license, time & expense, fixed price)
   iv. Forecasted FY 2026/27 budget utilization
   v. Indication (yes/no) of whether the vendor supports legacy systems operations or maintenance.
   vi. Summary of legacy systems support, if applicable.
b) Please summarize the vendor management policy or framework employed.

Rationale for Question:

To further understand MPI's software vendor landscape, contractual commitments, and supporting service arrangements.

RESPONSE:

a) See *Appendix 1 – Confidential.*

b) The changes made to address Gartner's recommendation can be found in *Part V – IT Appendix 2 pages 6 and 7*.

Appendix 1:
Software Vendor Summary

This material is the subject of a confidential motion.

PUB (MPI) 1-115

Part and Chapter:	**Part V – Information Technology**	**Page No.:**	**34-35**
PUB Approved Issue No:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap**		
Topic:	**IT.6.5.3 Governance Vendor Oversight**		
Sub Topic:			

Preamble to IR (If Any):

MPI states:

> "MPI Request for Proposal (RFP) 3437 for Major Programs Governance and Risk Advisory Services closed on December 23, 2025, and was subsequently extended to January 5, 2026. MNP, the incumbent vendor, was selected as the successful proponent, and a new Master Services Agreement (MSA) and Statement of Work (SOW) were fully executed effective April 1, 2026. Under this agreement, MNP will provide governance oversight services for a five-year term ending March 31, 2031, with one optional five-year renewal term."

Question:

a) Please file the contracted MSA and SOW.

b) Please indicate whether MNP is engaged to provide any additional services to MPI beyond those described under RFP 3437.

c) If so, please:

   i. Identify and summarize each additional service or engagement, including the associated contract value and term.

   ii. Explain how MPI identifies, manages, and mitigates any perceived or actual conflicts of interest arising from MNP providing governance oversight services concurrently with other services.

iii. Describe any safeguards, policies, or independence controls MPI has in place to preserve the objectivity of MNP's governance and risk advisory role.

Rationale for Question:

To understand the scope of MNP's engagements and MPI's approach to managing independent governance support.

RESPONSE:

a) Please see *Attachment A - MNP - Major Programs Governance and Risk Advisory Services Agreement - April 1 2026 – Confidential,* and *Attachment B - MNP – SoW Major Programs Governance and Risk Advisory – Confidential.*

b) Yes. MNP is currently providing services to MPI beyond RFP 3437. MPI has entered into an agreement for MNP to provide Internal Audit Services as a result of RFP #3420. Also, MPI entered into a multi-party agreement for a study of the State of the Manitoba Collision Repair Industry Study with The Automotive Trade Association of Manitoba Inc. and The Manitoba Motor Dealers Association Inc.

c) i) Please see table below:

Additional service or engagement:	Statement of Work to Conduct a State of the Manitoba Collision Repair Industry Study
Summary:	MNP will conduct a study on the current state of the Manitoba collision repair industry, including project planning, survey design, data collection, analysis, preliminary findings, and a final report with recommendations.
[REDACTED]	**[REDACTED]**
Term:	February 1, 2026, to September 30, 2026.

Additional service or engagement:	Agreement for Services for Internal Audit Services
Summary:	MNP will provide Internal Audit Services to MPI in accordance with RFP #3459, the Agreement, the Service Requirements, and MNP's Proposal. The Agreement contemplates negotiated Statements of Work for internal audits, including the costs, deliverables, reporting structure, material disclosures, remote work security requirements, and other related details necessary to clearly define the scope of each internal audit engagement.
[REDACTED]	**[REDACTED]**
Term:	Initial term from April 1, 2026, to March 31, 2029, with MPI's option to renew for up to two additional two-year terms.

ii) MPI identifies and manages perceived or actual conflicts of interest by reviewing any concurrent MNP engagement before approval to assess potential self-review, advocacy, management-participation, or independence risks. MPI further mitigates perceived or actual conflicts of interest by maintaining organizational separation between the internal audit function and the governance oversight function, as these are distinct teams with separate mandates, scopes, and reporting lines. In addition, MNP's governance oversight role reports directly to the Chair of the Technology Committee and takes direction from that position, which further supports segregation of duties and protects the independence and objectivity of the governance oversight work. MPI mitigates these risks through

clearly defined scopes of work, segregation of responsibilities, conflict-of-interest disclosures, controlled information access, governance oversight, and contract monitoring. Where a risk is identified, MPI may restrict the scope, require additional internal or independent review, separate resources, limit access to information, or decline the work. This helps preserve the objectivity, independence, and transparency of MNP's governance oversight role.

iii) MPI preserves the objectivity of MNP's governance and risk advisory role by maintaining a clear separation between advisory oversight and MPI's management accountabilities. MNP's role is limited to independent risk review, oversight, challenge, and recommendations; MPI retains responsibility for decisions, approvals, action plans, vendor direction, implementation, and acceptance of deliverables.

MNP's governance and risk advisory role reports directly to the Chair of the Technology Committee. While MNP works with MPI management to conduct reviews and obtain relevant information, its reports are tabled with the Board to support transparency, oversight, and action where appropriate. MNP also meets with MPI executives on a bi-weekly basis, separate from the delivery arm, to support independent oversight, escalation, and challenge.

Safeguards include a defined Statement of Work, documented deliverables, governance forum oversight, review of recommendations by MPI management, formal change control for scope changes, confidentiality and security obligations, controlled access to information, and ongoing contract, invoice, and vendor performance monitoring.

These controls collectively support MNP's objectivity and help ensure its governance and risk advisory role remains independent, transparent, and appropriately bounded.

MANITOBA
PUBLIC INSURANCE

An Agreement for Services dated effective the 1st day of April 2026.

BETWEEN:

THE MANITOBA PUBLIC INSURANCE CORPORATION

("**MPI**")

- and -

MNP LLP

(the "**Vendor**")

WHEREAS:

A. MPI issued Request for Proposal #3437 ("**RFP**") on November 26, 2025, for the purpose of engaging Vendors qualified to provide Major Programs Governance and Risk Advisory Services, as more particularly described in this Agreement (the "**Services**");

B. the Vendor submitted a proposal in response to the RFP (the "**Proposal**"), incorporated by reference as Schedule C; and,

C. MPI has selected the Vendor to provide the Services to MPI in accordance with the terms and conditions contained in this Agreement.

NOW THEREFORE, in consideration of the mutual obligations contained in this Agreement, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1.00 TERM OF AGREEMENT

1.01 In accordance with the Term of Agreement Section set out in the RFP:

(a) The Initial Term is for five (5) years, and shall continue until and including March 31, 2031, unless otherwise terminated, suspended, or extended in accordance with the terms and conditions of this Agreement.

(b) MPI may, at its sole option renew the Agreement for up to one (1) additional five (5) year term (the "**Renewal Term**"), on the same terms and conditions as were in force during the Initial Term or the immediately preceding Renewal Term. The pricing for the Renewal Term is based on CPI as set out in Appendix C.3 of the RFP as follows:

(c) On the date that MPI notifies the Vendor of renewal, MPI will take the most currently available Consumer Price Index ("**CPI**") calculation for Manitoba from Statistics Canada and compare it to the CPI for the same month of the previous year to determine the percentage of increase or decrease.

(d) If the percentage is positive (an increase), the percentage will then be applied to the prices that were in effect during the Initial Term or the preceding Renewal Term (if applicable). If the percentage is

negative (a decrease), then the prices that were in effect during the Initial Term or the preceding Renewal Term will remain unchanged.

(e) If Statistics Canada no longer supplies the CPI data at the time of adjustment, the CPI data of such other agency as MPI may reasonably select shall be used.

2.00 SERVICES TO BE PROVIDED

2.01 The Vendor agrees to be bound solely by this Agreement. For greater certainty, "**Agreement**" means this agreement, any schedules attached hereto, and any statement of work and/or other document incorporating or made pursuant to this Agreement. If the Vendor begins the Services before the start of the Term, all Services provided by the Vendor before the start of the Term will be considered to have been provided under all of the terms and conditions of this Agreement.

2.02 MPI agrees to retain the Vendor to perform the Services, which are further detailed in the Service Requirements attached as Schedule B, Appendix B.1, B.2 and in the Proposal incorporated by reference as Schedule C. The Vendor agrees to perform such Services during the Term, on the terms and conditions set out in this Agreement and as directed by MPI, to its reasonable satisfaction.

3.00 VENDOR'S FEES

3.01 Subject to the following subsections, in consideration of Services performed to the reasonable satisfaction of MPI during the Term, MPI agrees to pay to the Vendor in accordance with the Agreement as follows. MPI has approved an aggregate maximum cap on expenses under this Agreement over the Initial Term of five (5) years at one million seven hundred and sixty-two thousand, two hundred and ninety ($1,762,290.00) Canadian dollars, plus applicable taxes. If the fees under this Agreement exceed this aggregate maximum cap, additional pre-approvals from MPI will be required before such amounts can be paid. Notwithstanding anything else in this Agreement, MPI is not obligated to spend a minimum or base amount of fees.

3.02 The Vendor shall provide invoices to MPI. All Services listed on an invoice must have been completed by the Vendor prior to that invoice being submitted to MPI. All invoices shall be in writing and satisfactory to MPI, acting reasonably, in both form and content. The Vendor shall also provide to MPI such supporting documents, vouchers, statements and receipts as may be requested by MPI acting reasonably.

3.03 MPI shall pay the invoice within thirty (30) days after the receipt and approval of an invoice and any supporting materials requested under Section 3.02. In the event any invoice is not satisfactory, MPI shall notify the Vendor of the problem within seven (7) days of receipt of invoice.

3.04 If MPI in good faith (i) disputes any invoice on the grounds that there is an objectively verifiable error in any invoice; or (ii) disputes the adequacy or correctness of any supporting documentation provided in connection with any invoice, or (iii) the Vendor has materially breached this Agreement, then MPI may withhold, in the case of (i) and (ii), the disputed portion of the invoice until the dispute is resolved, and in the case of (iii), all outstanding balances of the invoice until the dispute is resolved. The parties shall work promptly to

resolve any such disputes. MPI will advise the Vendor of the amount of the invoice MPI considers to be in dispute and the basis for such dispute, and will pay any undisputed portion in accordance with this Article 3.00. Payment by MPI shall not preclude MPI from questioning any fees or charges MPI believes to be improper or incorrect.

3.05 Those undisputed invoiced amounts not paid by MPI within thirty (30) days of receipt and approval, shall bear interest from the thirty-first (31st) day at the prime rate in effect on that day at the Winnipeg main branch of the Bank of Montreal.

3.06 Where not tax-exempt, MPI shall also pay all applicable sales and use taxes. MPI is exempt from the Goods and Services Tax and the Harmonized Sales Tax. The applicable Goods and Services Tax and Harmonized Sales Tax exemption information is attached hereto as Schedule E.

3.07 Unless explicitly stated otherwise in this Agreement, MPI shall reimburse the Vendor for reasonable out-of-pocket expenses relating to the provision of the Services if:

(a) such expenses were reasonably required for the performance of the Services;

(b) prior written permission to incur such expenses was first obtained from MPI;

(c) the Vendor uses the most economical rates possible for the expenses;

(d) the Vendor provides receipts and/or supporting documents to the satisfaction of MPI, unless it is agreed that submission of receipts for certain categories of expenses is not required (e.g. a per diem approach); and,

(e) reimbursement to the Vendor for out-of-pocket expenses shall be in accordance with the amounts and guidelines set out in the MPI's Corporate Directives.

MPI shall not be responsible for payment of any other expenses incurred by the Vendor in the performance of this Agreement.

3.08 The Vendor shall advise MPI if any non-resident of Canada will be, or has performed any of the Services in Canada. MPI may withhold and/or remit any taxes or duties required by federal, provincial, or municipal law in relation to the purchase or performance of the Services.

4.00 STANDARD TERMS & CONDITIONS

4.01 The parties agree to comply with the additional terms and conditions which are attached hereto as Schedule A and acknowledge that such terms and conditions form an integral part of this Agreement.

4.02 To the extent there is a conflict or inconsistency, the following is the order of precedence of documents comprising this Agreement:

(a) Main body of this Agreement
(b) Schedule A – General Terms and Conditions
(c) Schedule B – Goods and Services
- Appendix B.1 – Definitions

- Appendix B.2 – Material Disclosures
- Appendix B.3 – Scope of Work
- Appendix B.3.1 – Proposed Reporting Structure
- Appendix B.4 – Not Used
- Appendix B.5 – Remote Work Security Standard

(d) Schedule C – Vendor's Proposal (Incorporated by Reference)
(e) Schedule D – Negotiated Terms
(f) Schedule E – MPI's GST Exemption Certificate

5.00 NOTICES

5.01 Any notice or other communication under this Agreement shall be delivered:

To the Vendor:

In accordance with the Vendor's contact information set out in the Vendor's Proposal attached as Schedule C.

To Manitoba Public Insurance:

Attention: Manager, Strategic Sourcing & Vendor Management
Manitoba Public Insurance
P.O. Box 6300, 234 Donald Street
Winnipeg MB R3C 4A4
Email: vendormanagement@mpi.mb.ca

5.02 Any notice or communication:

(a) sent by registered mail shall be deemed to have been received on the third business day following the date of mailing;

(b) sent by facsimile or other electronic transmission (including email) shall be deemed to have been received on the day of transmission; and,

(c) sent by courier or personal delivery shall be deemed to have been received on the day that it was delivered.

6.0 COUNTERPARTS

6.01 This Agreement may be signed in one or more counterparts, each of which shall be deemed to be an original and all of which taken together shall constitute one and the same document. The signature of party received by electronic or digital means shall be binding upon the signatory with the same force and effect as an original signature.

6.02 For clarity, MPI accepts digital or electronic signature, along with signed documents that have been scanned.

[SIGNATURES ON THE FOLLOWING PAGE]

This Agreement has been executed on behalf of each party by their duly authorized representatives.

MANITOBA PUBLIC INSURANCE

SCHEDULE A
TERMS AND CONDITIONS

1.00 INTERPRETATION

1.01 **Definitions**

(a) "**Agreement**" means this agreement, any schedules, appendices, or documents attached hereto or incorporated by reference, and any other documents made pursuant to this Agreement.
(b) "**AI**" means artificial intelligence.
(c) "**AMA**" means *The Accessibility for Manitobans Act* (CCSM c A1.7).
(d) "**Business Day**" means any day other than Saturday, Sunday, or a statutory or civic holiday observed in Manitoba.
(e) "**Business Records**" means all financial accounts and records (including payroll records, invoices, and receipts) relating to this Agreement.
(f) "**Confidential Information**" means all information, including Personal Information, and materials acquired by the Vendor or its Representatives, or to which the Vendor or its Representatives have been given access, in the course of the performance of this Agreement, excluding information that is in the public domain (for greater certainty, this does not include information in the public domain which was made public as a result of an unauthorized disclosure by a third party).
(g) "**Confidentiality Breach**" means an actual unauthorized use, disclosure, or destruction of, or any unauthorized access to, Confidential Information.
(h) "**Data Residency Jurisdiction**" means Canada or such other jurisdiction as MPI has approved in writing.
(i) "**FIPPA**" means *The Freedom of Information and Protection of Privacy Act* (CCSM c F175).
(j) "**Manitoba Public Insurance**" or "**MPI**" means The Manitoba Public Insurance Corporation as established by *The Manitoba Public Insurance Corporation Act* (CCSM c P215).
(k) "**Personal Information**" means "personal information" and "personal health information" collectively, as those terms are defined in FIPPA and PHIA respectively.
(l) "**PHIA**" means *The Personal Health Information Act* (CCSM c P33.5).
(m) "**PUB**" means the Manitoba Public Utilities Board.
(n) "**Refund**" means a payment or credit of any fees prepaid by MPI equal to the prorated value of Services MPI will not receive.
(o) "**Representatives**" means the directors, officers, shareholders, employees, contractors, subcontractors, partners, volunteers, affiliates, agents, delegates, and other such representatives of a party.
(p) "**Reputation**" means the public perception, business reputation, community standing, or business operations of MPI or its Representatives.
(q) "**Services**" means the provision of goods, services, and deliverables as specified in this Agreement, including everything necessary for or incidental to the fulfilment of this Agreement.
(r) "**Submitted Materials**" means all goods, data, and materials that are submitted or required to be submitted by the Vendor or its Representatives to MPI in the performance of this Agreement, and all copyright therein.
(s) "**Term**" means the entire length of this Agreement, including the Initial Term and any applicable Renewal Terms.

1.02 References to any legislation, including any statute or regulation, shall mean any successor or amended legislation.

1.03 Wherever "including" is used, it shall mean "including, but not limited to," unless stated otherwise.

1.04 The singular includes the plural, and vice versa, unless stated otherwise.

1.05 This Agreement shall be interpreted, performed, governed, and enforced in accordance with the laws of Manitoba and the laws of Canada applicable therein.

1.06 This Agreement contains the entire agreement between the parties with respect to the subject matter hereof. There are no undertakings, representations, or promises, either express or implied, other than those contained in this Agreement, and none have been relied on.

1.07 Unless stated otherwise, all dollar amounts referred to in this Agreement are in Canadian currency.

1.08 INTENTIONALLY DELETED

1.09 If any term of this Agreement is deemed invalid, unenforceable, void, or illegal, in whole or in part, the other terms of this Agreement shall remain in full force and effect. Further, any such term shall be modified only to the extent necessary to render it valid, enforceable, effective, or legal and shall

then become binding. If the intent of either party cannot be preserved, this Agreement shall either be renegotiated or terminated.

2.00 SCOPE

2.01 The Vendor agrees to provide the Services to MPI's reasonable satisfaction. MPI and the Vendor agree that any work performed by the Vendor outside the scope of the Services without prior written approval of MPI shall be deemed to be gratuitous on the Vendor's part, and MPI has no liability with respect to such work.

2.02 The Vendor agrees to be bound solely by this Agreement. If the Vendor begins the Services with MPI's permission before the start of this Agreement's Term, all Services provided by the Vendor before the start of this Agreement's Term will be considered to have been provided under all the terms and conditions of this Agreement.

2.03 MPI reserves the right to change, modify, delete, or add to the Services, if necessary. In addition to the foregoing, the Vendor shall employ commercially reasonable efforts to provide to MPI any other services, documentation, or data related to the Services as may be reasonably required by MPI. Where the changes described herein impact the cost of the Services, the parties shall negotiate any fee adjustments in good faith.

2.04 Unless specifically stated to the contrary, nothing in this Agreement grants the Vendor exclusivity in providing the Services to MPI.

3.00 INSURANCE, PERMITS, LICENSES, AND CERTIFICATES

3.01 The Vendor will be responsible for the procurement and costs of all insurance, permits, licences, security clearances, criminal record checks, and certificates that are necessary for the performance of the Services or required by this Agreement.

3.02 If the Vendor is required to carry or maintain insurance under this Agreement:

(a) The Vendor shall provide certified copies of its certificates of insurance to MPI within ten (10) Business Days of award, prior to commencing the Services.
(b) When requested by MPI, the Vendor shall provide updated insurance certificates evidencing the renewal of the required insurance and bonding coverage.
(c) The Vendor shall ensure that each such bond, policy, or renewal is endorsed so that MPI will be advised if it is altered or cancelled prior to expiry.
(d) Compliance with these insurance requirements does not release the Vendor from, nor reduce the Vendor's exposure, to liability for damages under this Agreement.
(e) The Vendor is responsible for determining if any additional insurance coverage is necessary to fulfill its obligations under this Agreement, and for procuring such insurance at its own expense.

3.03 If required by MPI, the Vendor shall submit the following within ten (10) Business Days of award:

(a) One completed safe work plan per site, with a copy left on site for the duration of this Agreement.
(b) Certified copies of its original letter of clearance from The Workers Compensation Board, which must be dated no earlier than the date of award.

4.00 PERFORMANCE OF VENDOR'S OBLIGATIONS

4.01 When performing the Services, the Vendor and its Representatives shall:

(a) comply with all applicable federal, provincial, and municipal laws, regulations, by-laws, ordinances, orders, notices, policies, and regulatory body decisions; and
(b) if applicable, work with MPI to ensure that both the Vendor's AI technology and MPI's usage of the Vendor's AI technology complies with any applicable laws, directives, or policies.

4.02 The Vendor represents and warrants that:

(a) it possesses the necessary skills, expertise, and experience to perform the Services in accordance with this Agreement;
(b) the Services shall be provided in a professional manner and as outlined in this Agreement unless MPI and the Vendor agree otherwise in writing;
(c) the Representatives designated to perform the Services shall devote the time, attention, abilities, and expertise necessary to properly perform the Vendor's obligations;
(d) it shall comply with all reasonable directions and requests of MPI within the scope of the Services as set out in this Agreement;
(e) MPI shall have the right of prior approval of any Representatives designated to provide the Services, and MPI, acting reasonably, shall have the right to request the removal of any Representatives so designated and the Vendor shall immediately comply with all such requests for removal;
(f) it shall conduct itself in a manner that does not negatively affect MPI's Reputation;

(g) it has all rights to the data it used to train any AI technology used to provide the Services, if accplicable;
(h) it has full right and authority to enter into this Agreement; and
(i) all representations and warranties contained in this Agreement are true and correct and shall so remain throughout the Term of this Agreement

4.03 The Vendor shall provide written progress reports at such intervals as MPI may reasonably request. Such progress reports shall be in form and content satisfactory to MPI acting reasonably.

4.04 The Vendor agrees to co-operate with all MPI Representatives (including subcontractors providing services to MPI) throughout the Term.

4.05 If the Vendor intends to use subcontractors:

(a) It shall not subcontract or use a subcontractor for any portion of the Services without MPI's prior written consent, and MPI may grant or withhold such consent in its sole and unfettered discretion;
(b) All subcontractors are subject to MPI's ongoing approval, and the Vendor shall not add, remove, or replace any subcontractor, or change the part of the Services to be performed by a subcontractor, without MPI's prior written approval; and
(c) Performance by subcontractors shall meet, at a minimum, the same standards as required for performance by the Vendor, and the Vendor is responsible for such performance.

4.06 The Vendor does not warrant and is not responsible for any third-party products or services obtained independently by MPI notwithstanding any participation or involvement by the Vendor. MPI shall have the sole and exclusive rights and remedies with respect to any defect in third party products or services and any claim shall only be brought against the third party vendor and not against the Vendor.

4.07 If applicable, and unless explicitly stated otherwise in this Agreement, delivery of goods and/or deliverables shall be to MPI's mail & warehouse services at B100 – 234 Donald Street, in Winnipeg, Manitoba. All goods/deliverables shall remain at the risk of the Vendor until they are delivered to the reasonable satisfaction of MPI. All goods/ deliverables supplied shall be subject to inspection and acceptance by MPI for a period of sixty (60) days after delivery. Defective or deficient goods/deliverables or goods/deliverables not conforming to specifications may be returned at the Vendor's expense. At MPI's option, such deficient or non-conforming goods/deliverables shall be returned for either exchange or full refund. In addition to the foregoing, the Vendor shall pass through any other warranties that are applicable to such goods/deliverables, and MPI shall have the right to rely on same, and on any other warranties offered by the Vendor that are applicable to such goods/deliverables.

5.00 RESTRICTION ON OTHER WORK

5.01 While this Agreement is in effect, the Vendor and its Representatives shall not provide services to any other person, corporation, or entity in a manner that interferes or conflicts with the proper performance of the Vendor's obligations under this Agreement.

6.00 INDEPENDENT CONTRACTOR

6.01 The Vendor is an independent contractor, and this Agreement does not create the relationship of employer and employee, of principal and agent, of joint venture, or of partnership between MPI and the Vendor or between MPI and any Representatives of the Vendor. The Representatives of one party shall not be deemed or construed to be the Representatives of the other party for any purpose whatsoever.

6.02 The Vendor is responsible for any deductions or remittances which may be required by law.

6.03 Except as authorized in this Agreement, the Vendor shall not incur any expenses or debts on behalf of, nor make any commitments for MPI without first obtaining written permission from MPI.

7.00 VENDOR'S COSTS

7.01 The Vendor shall provide invoices to MPI. All Services listed on an invoice must have been completed by the Vendor prior to that invoice being submitted to MPI. All invoices shall be in writing and satisfactory to MPI, acting reasonably, in both form and content. The Vendor shall also provide to MPI such supporting documents, vouchers, statements, and receipts as may be requested by MPI acting reasonably.

7.02 MPI shall pay the invoice within thirty (30) days after the receipt and approval of an invoice and any supporting materials requested under Section 7.01. In the event any invoice is not satisfactory, MPI shall notify the Vendor of the problem within seven (7) days of receipt of invoice.

7.03 If MPI in good faith (i) disputes any invoice on the grounds that there is an objectively verifiable error in any invoice; or (ii) disputes the adequacy or correctness of any supporting documentation

provided in connection with any invoice, or (iii) the Vendor has materially breached this Agreement, then MPI may withhold, in the case of (i) and (ii), the disputed portion of the invoice until the dispute is resolved, and in the case of (iii), all outstanding balances of the invoice until the dispute is resolved. The parties shall work promptly to resolve any such disputes. MPI will advise the Vendor of the amount of the invoice MPI considers to be in dispute and the basis for such dispute, and will pay any undisputed portion in accordance with this Article 7.00. Payment by MPI shall not preclude MPI from questioning any fees or charges MPI believes to be improper or incorrect.

7.04 Those undisputed invoiced amounts not paid by MPI within thirty (30) days of receipt and approval, shall bear interest from the thirty-first (31st) day at the prime rate in effect on that day at the Winnipeg main branch of the Bank of Montreal.

7.05 Where not tax-exempt, MPI shall also pay all applicable sales and use taxes. Where tax-exempt, MPI shall provide the Vendor with the applicable exemption number and/or certificate as required.

7.06 The Vendor agrees that it understands the nature of the Services and any risks, contingencies, local or existing conditions, and other circumstances, and accepts all risk and associated costs which could have been inferred from reasonable investigation into the above prior to entering into this Agreement.

7.07 Unless explicitly stated otherwise in this Agreement, MPI shall reimburse the Vendor for reasonable out-of-pocket expenses relating to the provision of the Services if:

(a) such expenses were reasonably required for the performance of the Services;
(b) prior written permission to incur such expenses was first obtained from MPI;
(c) the Vendor uses the most economical rates possible for the expenses;
(d) the Vendor provides receipts and/or supporting documents to the satisfaction of MPI, unless it is agreed that submission of receipts for certain categories of expenses is not required (e.g. a per diem approach); and,
(e) reimbursement to the Vendor for out-of-pocket expenses shall be in accordance with the amounts and guidelines set out in the MPI's Corporate Directives.

MPI shall not be responsible for payment of any other expenses incurred by the Vendor in the performance of this Agreement.

7.08 The Vendor shall advise MPI if any non-resident of Canada will be, or has performed any of the Services in Canada. MPI may withhold and/or remit any taxes or duties required by federal, provincial, or municipal law in relation to the purchase or performance of the Services.

8.00 CONFIDENTIALITY AND INFORMATION SECURITY

8.01 The Vendor acknowledges that FIPPA and PHIA each impose obligations on MPI to collect, use, or disclose Personal Information, in the strictest of confidence, and in accordance with those Acts. In performing the Services under this Agreement, the Vendor acknowledges that they may collect, use, or have access to Personal Information.

8.02 While this Agreement is in effect, and at all times thereafter, the Vendor agrees to treat as confidential all Confidential Information. For the purposes of this Agreement, Personal Information shall be considered to be Confidential Information.

8.03 The Vendor agrees that during the Term of this Agreement and at all times thereafter:

(a) the Personal Information disclosed to the Vendor by MPI may only be used by the Vendor in a manner expressly permitted by FIPPA or PHIA (as the case may be);
(b) it shall not disclose or permit the disclosure of Confidential Information, or any copies of it, in any format, to any third party without the express prior written consent of MPI;
(c) it shall comply with all directives given to it by MPI with respect to safeguarding, or otherwise ensuring the confidentiality, of any Confidential Information disclosed to it by MPI;
(d) it shall ensure that access to the Confidential Information by the Representatives of the Vendor is restricted to a "need-to-know" basis, and that access, when given, shall be to the minimum amount of Confidential Information necessary to accomplish the task;
(e) it shall use the Confidential Information only for those purposes that have been expressly permitted by MPI;
(f) it shall not reproduce Confidential Information, in any format, without the express prior written consent of MPI provided that it shall be able to reasonably reproduce the Confidential Information for internal use only in the normal performance of the Services;
(g) it shall ensure that it, or its Representatives, do not access, transport, or store any Confidential Information outside of the Data Residency Jurisdiction without the express prior written consent of MPI. Without limiting the generality of the foregoing, in MPI's sole discretion, the

Vendor may be permitted to remotely access Confidential Information if required to provide the Services, provided that the Vendor follows all MPI's policies regarding remote access;

(h) it will not access MPI's Confidential Information, its systems, or perform Services from any country Canada currently imposes applicable sanctions against. The current list is found at: https://www.international.gc.ca/; and

(i) after the Confidential Information has been used for its authorized purpose, or upon termination or expiration of this Agreement for any reason, or where destruction of the Confidential Information is requested by MPI or is required by this Agreement, the Vendor shall securely destroy the Confidential Information (and all copies of the Confidential Information in any form) in a manner which adequately protects the confidentiality of the Confidential Information. The Vendor shall ensure that the Confidential Information that is destroyed cannot be reconstructed (whether physical or electronic, or any other form). Notwithstanding the foregoing, the Vendor may retain copies of the Confidential Information it has received to comply with any applicable law, provided the Vendor protects such retained Confidential Information in accordance with this Agreement.

8.04 The Vendor represents and warrants that it has established an information security management practice that follows accepted industry information security standards and best practices. During the Term of this Agreement and at all times thereafter, the Vendor shall take reasonable technical, administrative, and physical measures and precautions to prevent any unauthorized disclosure of the Confidential Information. The standard of such precautions taken by the Vendor shall be the greater of:

(a) the standards the Vendor has in place to protect its own confidential information; or,
(b) the standards imposed on the Vendor by MPI.

8.05 The Vendor shall, through a single point of contact, without undue delay, notify MPI in writing upon becoming aware of any Confidentiality Breach. The written notification must include full details of the Confidentiality Breach. The Vendor shall promptly take all reasonable technical, physical, and administrative measures and precautions to prevent the recurrence of any such Confidentiality Breach and shall notify MPI in writing of the steps taken. In the event of a Confidentiality Breach, MPI, acting reasonably, may do any combination of the following: (i) impose increased standards on the Vendor related to its treatment of the Confidential Information and the Vendor shall comply with such increased standards, and/or (ii) if applicable, limit the Vendor's access to MPI's systems, and/or (iii) enforce or use any other applicable section of this Agreement.

8.06 The Vendor shall inform its applicable Representatives of the obligations imposed upon it in this Agreement with respect to Confidential Information, and shall take whatever steps are necessary to ensure that all its applicable Representatives comply with those obligations.

8.07 The Vendor acknowledges that monetary damages may not be a sufficient remedy for a Confidentiality Breach, and that MPI may, without waiving any other rights or remedies, seek appropriate injunctive or equitable relief from a court of competent jurisdiction.

8.08 If the Vendor receives a subpoena or other validly issued administrative or judicial order seeking Confidential Information, the Vendor shall, to the extent legally permitted, provide prompt notice to MPI and deliver to MPI a copy of its proposed response to the demand. Unless the demand has been time-limited, quashed, or extended, the Vendor shall thereafter be entitled to comply with the demand to the extent permitted or required by law. If requested by MPI, the Vendor shall cooperate with MPI in the defence of the demand, at MPI's expense.

8.09 The Vendor acknowledges and accepts that MPI may be required to provide deliverables and Vendor information to the PUB, as part of MPI's annual rate application. There is a presumption that all materials filed with the PUB will be placed on the public record. MPI shall notify the Vendor if deliverables, in their final and approved state, and Vendor information will be submitted to the PUB. The Vendor may request that MPI seek confidential treatment by the PUB of certain deliverables and Vendor information. MPI may require the Vendor to provide affidavit evidence to support the request to the PUB for confidentiality, which would be prepared by MPI on behalf of the Vendor. The Vendor acknowledges and accepts that MPI is bound by the PUB's decision.

8.10 The Vendor undertakes not to publish any public statement or advertisement with respect to this Agreement and further undertakes not to seek publicity of this Agreement without the express prior written consent of MPI, except as otherwise required by law or by this Agreement.

8.11 In the event that the Vendor or its Representatives use any of MPI's premises, the Vendor and such Representatives shall comply with all such premises' security requirements as may be in effect from time to time.

8.12 The Vendor shall cooperate with MPI so that MPI can verify that the Vendor has complied, and is complying, with the provisions of this Article 8.00.

9.00 ACCESSIBILITY

9.01 The Vendor acknowledges that the AMA and the regulations made under the AMA impose obligations on MPI to prevent and remove barriers in its business and administrative practices in accordance with the following principles:

(a) Access: Persons should have barrier-free access to places, events and other functions that are generally available in the community;
(b) Equality: Persons should have barrier-free access to those things that will give them equality of opportunity and outcome;
(c) Universal design: access should be provided in a manner that does not establish or perpetuate differences based on a person's disability; and
(d) Systemic responsibility: the responsibility to prevent and remove barriers rests with the person or organization that is responsible for establishing or perpetuating the barrier.

9.02 Throughout the Term of this Agreement, the Vendor agrees to comply with the accessibility obligations under the AMA and regulations, and further agrees that when providing the Services or otherwise acting on MPI's behalf, the Vendor shall comply with all obligations under the AMA and regulations applicable to public sector bodies.

10.00 OWNERSHIP OF INFORMATION

10.01 All documents produced by the Vendor, in any form whatsoever, for delivery to MPI (collectively, the "Deliverables") are prepared in contemplation only of MPI's use for the purpose stated in this Agreement and not for any other purpose, or by any other party. The Vendor hereby grants to MPI a limited, non-exclusive, perpetual, world-wide license, without payment of any royalty, so that MPI may use, copy and distribute the Deliverables internally and externally as required for business purposes. MPI shall not use the Deliverables directly or indirectly, for any purpose competitive with the business of the Vendor. The Vendor retains all intellectual property rights, title and interest in and to all its existing methodologies, processes, techniques, ideas, concepts, trade secrets, artwork, logos and identifying script and know-how that the Vendor may develop or supply in connection with this Agreement ("Vendor Knowledge") whether or not such is embodied in the Deliverables. Subject to the confidentiality restrictions contained in Article 8.00, the Vendor may use the Vendor Knowledge for any purpose.

10.02 The Vendor owns all working papers and files, other materials, reports and work created, developed or performed during the course of providing the Services, including intellectual property used in the preparation thereof. The Vendor agrees, upon request from MPI, to provide MPI with a copy of all practitioner-prepared working papers necessary for MPI's accounting records. The Vendor may develop software, including spreadsheets, documents, databases, and other electronic tools, to assist with providing the Services. Where these tools are developed specifically for the Vendor's purposes and without consideration of any purpose for which MPI might use them, any such tools provided to MPI are made available on an "as is" basis only, and remain the exclusive intellectual property of the Vendor, and are not to be distributed to or shared with any third party and the Vendor shall be entitled to the return of all such property, uncopied, at any time.

10.03 This Agreement is not intended for the express or implied benefit of any third party. No third party is entitled to rely, in any manner or for any purpose, on the advice, opinions, reports, Deliverables or Services of the Vendor contemplated in this Agreement.

10.04 Any property provided by MPI to the Vendor under this Agreement is only provided for the limited use in the performance of the Services, shall remain the property of MPI, and shall be returned, without cost, to MPI upon request or upon termination of this Agreement. The foregoing shall not give the Vendor or its Representatives any rights in any of MPI's intellectual property.

11.00 RECORD KEEPING, INSPECTION OF RECORDS, AND AUDITS

11.01 At all reasonable times throughout the Term, and for seven (7) years thereafter, the Vendor shall maintain and make available for inspection and audit by MPI and its Representatives all accounts and records, including payroll records, relating to the Services or the Agreement, and shall produce said documents upon request. The Vendor agrees to co-operate fully in any such inspection or audit, and to promptly provide copies of, and extracts from the accounts and records requested by MPI and its Representatives, and any such other information as may be reasonably requested from time to time by MPI and its Representatives.

12.00 INDEMNIFICATION OF PARTIES

12.01 The Vendor shall indemnify and save harmless MPI and its Representatives from all losses, damages, costs, causes of action, claims, liabilities, or demands of any kind with respect to any injury to persons (including, without limitation, death), damage to or loss of property, economic loss, incidental or consequential damages, or infringement of rights (including, without limitation, privacy rights) caused by, or arising directly or indirectly from:

(a) the default of the Vendor or its Representatives of any material term of this Agreement; or,
(b) any grossly negligent or willful act or omission of the Vendor or its Representatives.

The above includes all costs and expenses associated therewith, including reasonable solicitors' fees.

12.02 If MPI has provided prior written permission to the Vendor allowing the use of any AI technology in the performance of the Services, the Vendor shall indemnify and save harmless MPI and its Representatives from all losses, damages, costs, causes of action, claims, liabilities, or demands of any kind with respect to any injury to persons (including, without limitation, death), damage to or loss of property, economic loss, incidental or consequential damages, or infringement of rights (including, without limitation, privacy rights) caused by, or arising directly or indirectly from MPI's use of outputs of the Vendor's AI technology.

12.03 The Vendor shall promptly notify MPI in writing upon the Vendor becoming aware that it (or its Representatives) has, or will soon be likely to have committed a breach or is under default of this Agreement. The written notification must include full details of the actual or potential breach or default. The Vendor shall immediately take all reasonable technical, physical, and administrative measures and precautions to prevent the breach or the recurrence or continuation of the breach or default and shall notify MPI in writing of the steps taken. Nothing in this section shall be construed as waiving or reducing MPI's rights of termination or other applicable remedies at law.

12.04 MPI and the Vendor agree to the following with respect to each party's liability to the other:

(a) A party's liability (the "Injuring Party") to the other party (the "Injured Party") for the aggregate of all losses, claims, liabilities, penalties, damages, or expenses shall not exceed the amount of fees paid by MPI to the Vendor pursuant to this Agreement, or, if the Services were provided over a period longer than 12 months, the fees paid by MPI over the most recent 12-month period of the Services, except to the extent such loss, claim, liability, penalty or expense suffered by the Injured Party (1) has been finally judicially determined to have resulted from the bad faith or intentional misconduct of the Injuring Party, or (2) is the result of or arises out of a Confidentiality Breach by the Injuring Party.

(b) In no event shall the Injuring Party be liable for consequential, special, indirect, incidental, punitive or exemplary loss, damage or expense or any loss of revenue or profit or any other commercial or economic loss or failure to realize expected savings.

(c) The Injuring Party's liability will be several and not joint and several and the Injured Party may only claim payment from the Injuring Party of the Injuring Party's proportionate share of the total liability based on the degree of fault of the Injuring Party as finally determined by a court of competent jurisdiction.

(d) MPI agree that in respect of the Services, it will have no recourse to and may only bring a claim against the Vendor entity that is party to this Agreement and not against any partner, officer, director, employee, or contractor of the Vendor or any of its affiliates.

Any notice required under this Section 12.04 or any action by way of filed court process against the Injuring Party by the Injured Party must be brought and served within two (2) years after the cause of action arises and, if not so brought, such notice or action shall be null and void to the same extent as if the right to bring such were statute barred.

12.05 MPI agrees to jointly and severally indemnify, defend, and hold harmless the Vendor from and against all claims, losses, damages, penalties, expenses or liabilities of any nature, including legal fees and costs on a solicitor and own client basis, and reasonable professional fees of the Vendor incurred in connection with any action, proceeding, investigation, claim or otherwise, brought or threatened against MPI or the Vendor by a third party ("Claim") that relates to, directly or indirectly, the Services, the whole subject to Section 12.01 of this Agreement.

13.00 SUSPENSION

13.01 MPI may, at its sole option, from time to time, delay or suspend the Services being provided under this Agreement, in whole or in part, for such period of time as may, in the opinion of MPI, be necessary. Unless another notice period has been provided elsewhere in this Agreement, MPI shall provide five (5) days prior written notice to the Vendor of its intention to delay or suspend the Services. MPI shall not be obliged to make payments to the Vendor except with respect to those Services already satisfactorily performed prior to such delay or suspension.

13.02 Where there is a delay or suspension under Section 13.01, all terms and conditions of this Agreement shall continue in full force and effect against the Vendor. The Vendor shall not be entitled to make any claim for damages by reason of the delay or suspension.

14.00 TERMINATION

14.01 MPI may terminate this Agreement at any time for any reason by giving the Vendor fourteen (14) days prior written notice.

14.02 Neither party shall be responsible for any failure to comply with, or for any delay in performance of the terms of this Agreement where such failure or delay is directly or indirectly caused by, or results from events of force majeure beyond the control of either party. The time in which the Services are to be provided shall be extended by a period of time at least equal to the length of the force majeure event, provided that in the event the extended period of time exceeds, or is reasonably anticipated to exceed a period of fourteen (14) days, then MPI may terminate this Agreement and pay the Vendor for all Services performed to the date of the force majeure event.

14.03 In addition to its rights under Sections 13.01, 14.01, and 14.02 above, and without restricting any other remedies available, MPI may immediately terminate, or immediately suspend this Agreement in writing if:

(a) the Vendor makes an assignment for the benefit of creditors, takes any other action for the benefit of creditors, becomes bankrupt or insolvent, or takes the benefit of or becomes subject to any legislation in force relating to bankruptcy and insolvency;
(b) in the opinion of MPI, the Services provided by the Vendor or its Representatives are unsatisfactory, inadequate, or otherwise improperly performed;
(c) in the opinion of MPI, the Vendor or its Representatives have failed to comply with, or breached any term or condition of this Agreement; or
(d) in the opinion of MPI, continuing to engage the Vendor under this Agreement may adversely affect its Reputation.

14.04 Upon termination of this Agreement, the Vendor shall cease to perform any further Services. MPI shall be under no obligation to the Vendor other than to pay, upon receipt of an invoice or statement and supporting documentation satisfactory to MPI acting reasonably, such compensation as the Vendor may be entitled to receive under this Agreement for Services satisfactorily completed up to the date of termination. Upon MPI's request, the Vendor will work in good faith to facilitate the orderly transition of the Services, in whole or in part, to MPI or to a successor service provider.

14.05 If the Agreement is terminated by MPI pursuant to Sections 14.02 or 14.03, and MPI has prepaid for any of the Services, then MPI shall be entitled to a Refund. The Vendor shall, at MPI's sole discretion, either (i) credit such Refund against any fees MPI is obligated to pay the Vendor, or (ii) promptly return the Refund to MPI, or (iii) a combination of (i) and (ii).

15.00 GENERAL TERMS

15.01 The terms and conditions contained in this Agreement that by their sense and context are intended to survive the performance of this Agreement by the parties shall so survive the completion and performance, suspension, or termination of this Agreement.

15.02 The Vendor shall not assign or transfer this Agreement or any of its rights or obligations under this Agreement without first obtaining written permission from MPI. This Agreement shall be binding upon the executors, administrators, heirs, successors, and any permitted assigns of the parties.

15.03 No amendment or change to, or modification of, this Agreement shall be valid unless it is in writing and signed by both parties.

15.04 The parties hereby irrevocably and unconditionally submit to the exclusive jurisdiction of the courts of the Province of Manitoba and all courts competent to hear appeals therefrom.

15.05 Any failure or delay by either party to exercise or partially exercise any right hereunder shall not be deemed a waiver of any of the rights under this Agreement. The waiver by either party of a breach of any provision of this Agreement shall not operate as, or be construed as, a waiver of any subsequent

breach thereof. The election of any one or more remedies by either party shall not constitute a waiver of that party's right to pursue other available remedies.

15.06 The Vendor agrees to perform any further acts and execute and deliver any documents that may be reasonably necessary to carry out the provisions of this Agreement.

15.07 Any notice or communication:

(a) sent by registered mail shall be deemed to have been received on the third Business Day following the date of mailing;
(b) sent by facsimile or other electronic transmission (including email) shall be deemed to have been received on the day of transmission; and,
(c) sent by courier or personal delivery shall be deemed to have been received on the day that it was delivered.

SCHEDULE B
GOODS AND SERVICES

Schedule B consists of the following Appendices:

B.1 Definitions

The definitions in Schedule A and Appendix B.1 are applicable to the Services and the Agreement, including Schedules B and C and their related appendices.

B.2 Material Disclosures

The Material Disclosures form the background and context of the Services and represent the basic assumptions upon which the Vendor should base its Proposal.

B.3 Scope of Work

The Scope of Work describes a high-level overview of the Services and deliverables the Vendor is required to provide to MPI.

B.3.1 Proposed Reporting Structure

The reporting structure defines the proposed reporting structure for the Services as well as the communication and relationship structure.

B.4 Not Used

B.5 Remote Work Security Standard

If the Vendor or any of its Representatives are delivering all or any portion of the Services from a remote location (e.g. working from home), the Vendor shall, and shall cause its Representatives to, comply with MPI's Remote Work Security Standard.

APPENDIX B.1
DEFINITIONS

"**Attachments**" has the meaning assigned in Schedule C, Section C.2 – Service Requirements Response Form.

"**Effective Date**" means the date the Agreement is made effective.

"**Material Disclosures**" means the material disclosures described in Appendix B.2 – Material Disclosures.

"Scope of Work" means the entire scope of Services as described in Appendix B.3 – Scope of Work.

"Service Requirements" means MPI's requirements for the Services as provided in this Schedule B, its related appendices, and in Appendix C.2 – Service Requirements Response Form.

APPENDIX B.2
MATERIAL DISCLOSURES

1.01 Background Information

Major Programs is a new area in the IT Division that manages large programs over $3M by providing the governance and budget oversight required for these complex initiatives. While MPI aims to address Enterprise IT Debt through a 5-year Rolling IT Roadmap, its success depends on aligning legacy technology and modernization efforts with its corporate strategy, verifying that expected efforts match organizational capacity, ensuring that the funding of future deliverables is determined by past achievement and by conducting comprehensive assessments to establish future needs.

MPI developed a 5-Year Rolling IT Roadmap according to these principles and added organizational change and operational readiness supports to bolster this new approach. The Roadmap provides a vision over the 5-year period while concentrating on near-term priorities (12 - 24 months) and remaining flexible to adapt to changing circumstances. Many of the "Major Programs" initiatives are part of this Roadmap.

Business cases will be created for each project within Major Programs; business cases will be provided as available and approved. While number of Major Programs and associated projects will vary year over year, high level estimates are 3 - 5 Major programs. For example, the current active Major Programs are:

- MyMPI Foundation and IRP Online;
- Special Risk Extension (SRE) Remediation;
- Bodily Injury Claims Management (BI3); and
- ERP Replacement.

The assumption is to have a thorough evaluation of one (1) major program, then using the review and recommendations review other major programs to ensure and report on compliance with the governance model.

1.02 Agreement Start Date and Duration

Anticipated Commencement of Services	March 1, 2026
Initial Term	5 years from the Effective Date
Potential Renewal Term(s)	Option to renew for one (1) five (5) year extension

APPENDIX B.3
SCOPE OF WORK

MPI wishes to engage a Vendor to deliver Services, expert advice and coaching that will result in measurable gains to enable MPI's success in delivering the full scope of Major Programs on time and on budget. Reporting to the Technology Committee of the Board of Directors the Services potentially including the following:

(a) Governance and risk assessment across Major Programs work streams set out in Appendix B.3.1 – Proposed Reporting Structure;

(b) The scope may include:

i. Identifying Major Programs KPIs to measure and report;
ii. Reviewing existing Major Programs status and value realization reports;
iii. Consolidating specific targets for vendors based on contracts with those vendors;
iv. Developing standard templates for reporting on KPIs.

(c) Coaching and advisory services to identify gaps, ensure team alignment, and facilitate development of mitigations;

(d) Develop governance best practices to:

i. enable Major Programs and MPI leadership to address risks prior to risks becoming issues;
ii. provide actionable and concrete mitigation steps; and
iii. provide proactive solutions to risks and issues.

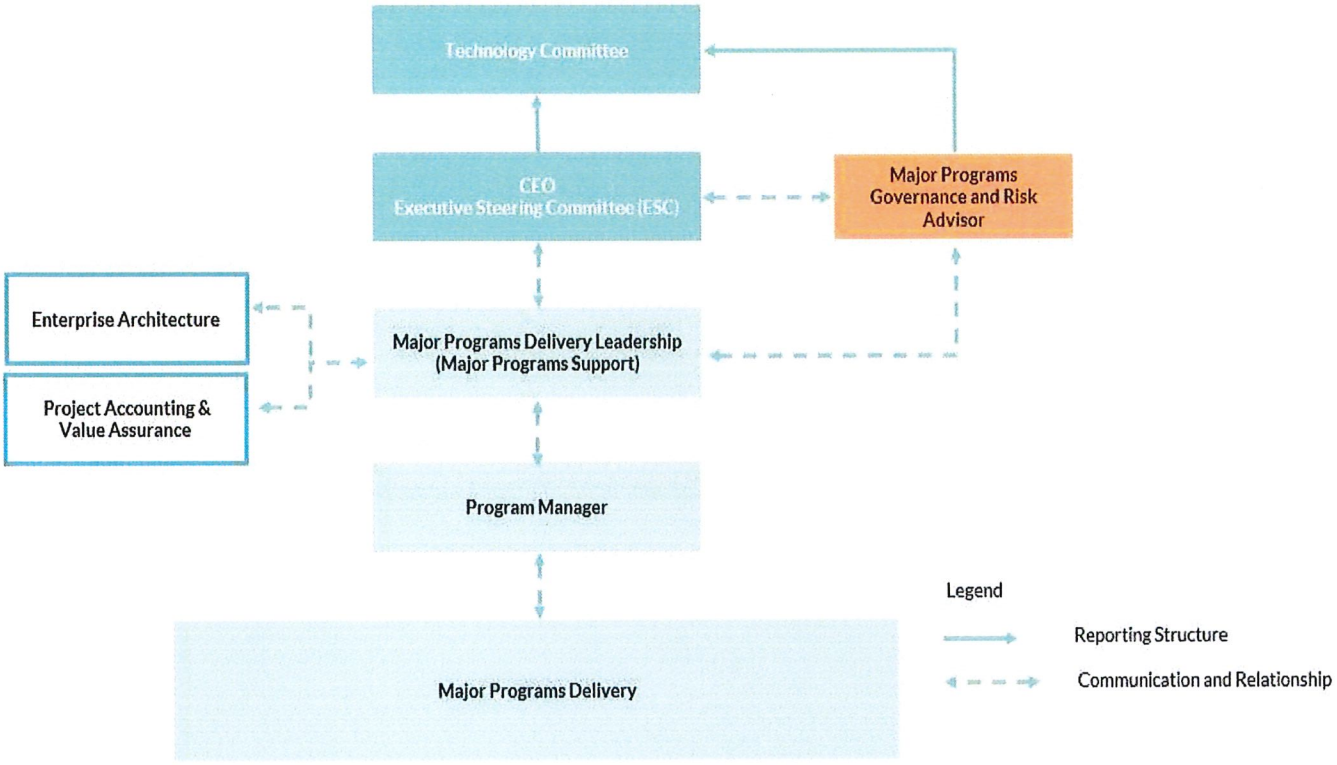
(e) Major Programs and MPI risk mitigation and governance including:

i. assessment and evaluation of Major Program's current state, risks and issues and validation of action plans;
ii. facilitate Lean communication on prioritization of governance and status reporting;
iii. industry experts in MPI's core lines of business; and
iv. fact-based reporting that would allow MPI to mitigate or remediate issues.

(f) Measurable benefits in achieving program objectives.

i. Measuring internal control effectiveness

(g) Providing guidance on conducting due diligence on potential and existing vendors.



i. Establishing systems for ongoing monitoring of vendor performance and risk levels; and

(h) Scheduled reports and presentations to Technology Committee of the Board of Directors as listed in B.3.1 and testifying before, and/or providing an annual assessment to, the Manitoba Public Utilities Board or similar organization.

It is assumed that a comprehensive evaluation will be conducted for one major program, followed by a governance review and recommendations. These steps will then be applied to other major programs to ensure and report on their compliance with the established governance model.

APPENDIX B.3.1
PROPOSED REPORTING STRUCTURE

The following describes the proposed reporting structure for the Services. Major Programs Governance and Risk Advisor.

APPENDIX B.4
(NOT USED)

APPENDIX B.5
REMOTE WORK SECURITY STANDARD

1.00 Purpose

1.01 This standard describes the requirements for cyber and information security practices and mechanisms which must be implemented by the Vendor and adhered to by its Representatives working from locations other than the Vendor's facilities.

1.02 The intent of this standard is to reduce the likelihood of cybersecurity and privacy incidents from occurring as a result of remote work arrangements.

2.00 Standard

2.01 The Vendor shall implement the following security controls whenever they or their Representatives access Confidential Information or when provisioning the Service.

3.00 Endpoint Security

3.01 Wherever supported by the endpoint device, all workstations (desktops, laptops, tablets, and mobile devices) must have:

(a) Encrypted hard drives / storage media;
(b) Up to date patches to ensure that the workstations are kept current with all required operating system and application security patches;
(c) The ability to prevent unapproved software from being installed;
(d) Up to date antivirus software including the associated signature files, with real-time scanning enabled and a minimum of a weekly full scan;
(e) Firewalls installed and configured to protect the workstations from unauthorized access;
(f) Data loss prevention capabilities;
(g) Web traffic directed through a web filtering technology to help prevent accidental access to malicious sites; and
(h) A process to securely dispose of any hard drive or removable media storage device.

4.00 Access Control

4.01 Access control mechanisms will be in place as follows:

(a) Enforcement of principle of least privilege, allowing only the minimum level of access to Confidential Information necessary to accomplish assigned tasks in accordance with the Agreement;
(b) Multifactor authentication must be enabled for all types of remote access;

(c) User authentication credentials will be promptly deactivated where such credentials have not been used for a maximum period of 3 months, or within 2 days if the user has changed roles and no longer requires such access;
(d) User authentication credentials will be immediately revoked for all remote access capabilities (e.g.: VPN accounts, remote access tokens) and physical access to the Vendor premises in the event of a Representative's termination or end of the Vendor's engagement; and
(e) Authentication credentials must not be shared with other individuals.

5.00 Connectivity

5.01 Network security control mechanisms will be in place as follows:

(a) Representatives will connect only to secure Wi-Fi networks using strong encryption such as WPA2 or higher. If secure Wi-Fi is not available, a wired connection will be used instead;
(b) Vendor provisioned and managed workstations shall be used, leveraging secure connectivity mechanisms (e.g. Virtual Private Network), when accessing Confidential Information or when provisioning the Service; and
(c) Unmanaged workstations shall only be used when leveraging secure connectivity mechanisms to connect to Vendor managed endpoint services or devices (e.g. Desktop-as-a-Service or Remote Desktop Protocol).

6.00 Physical Controls

6.01 Vendor's Representatives shall:

(a) Ensure that physical working space is appropriately cordoned off to limit the exposure of Confidential Information to other individuals. This includes precautions related to preventing verbal communications from being overheard by other individuals;
(b) Protect the workstations and software against unauthorized use and access; and
(c) Be authorized to print Confidential Information to local printers at remote locations, provided that printed materials are kept secured at all times and are securely destroyed prior to disposal or recycling.

7.00 Collaboration Requirements

7.01 Vendor's Representatives shall use secure collaboration, storage, and application platforms for conducting virtual meetings and sharing of documents.

Schedule C – Vendor's Proposal

The Vendor's Proposal submitted to MPI on January 5, 2026, for RFP #3437 entitled Proposal for Major Programs Governance and Risk Advisory Services in the form of a 289 page Power Point presentation converted to Adobe Acrobat is incorporated into this Agreement by reference.

Schedule D – Negotiated Terms

The parties have agreed to changes to Schedule A which have been incorporated into Schedule A.

The parties agree that any Statement of Works negotiated and signed by the parties separately are incorporated into this Agreement by Reference.

Appendix A – Approach 15
Appendix B – Billing Schedule 18

1. Background

The Manitoba Public Insurance Corporation ("MPI" or the "Corporation") is executing a broad portfolio of business and technology modernization initiatives to renew legacy systems and strengthen its operational and service delivery capabilities, referred to as Major Programs. These initiatives span multiple domains, including digital services, core platforms, enterprise applications, and enabling technologies.

To manage delivery complexity and interdependencies, MPI has adopted a Major Programs approach, overseeing multiple, concurrently delivered modernization projects under a common governance, delivery, and risk management framework. Key initiatives currently operating within Major Programs include, but are not limited to, MyMPI and IRP Online, BI3, ERP Replacement (Infor Upgrade and Assessment & Planning), and related digital and enterprise enablement efforts.

MNP LLP ("MNP") will provide independent governance and risk advisory services in support of MPI's Major Programs, focusing on delivery oversight, risk transparency, and executive decision support across this multi-initiative environment.

This Statement of Work ("SoW") describes the services MNP will deliver and should be read in conjunction with MNP's proposal (dated January 5, 2026).

2. Objective

The objective of the Independent Risk Advisor ("IRA") service is to provide continuous monitoring of the Major Programs implementations. Our role as the IRA is to support project success by providing a third-party, independent, and continuous risk assessment of the project, providing transparency, and supporting accountability. Our role would be to support senior management and the project team in understanding the risks in the project's current state, identifying ways to mitigate them, and making recommendations to optimize the success of the Major Programs projects.

3. Scope & Approach

To support the Executive Steering Committee ('ESC"), Senior Management, and the Major Programs PMO to understand the risks with the project's current state, identify ways to mitigate risks, and make recommendations to optimize the success of Major Programs.

For the purposes of this SOW and the MSA the ESC is composed of MPI's President and CEO, VP & Chief Customer and Product Officer, VP & Chief Information & Technology Officer, VP & Chief Financial Officer

and VP & Chief People Officer. MNP's primary points of contact are the VP & Chief Customer and Product Officer and VP & Chief Information & Technology Officer.

The engagement scope will include a review of the key risk areas as per the risk framework shared in section V-02 of the proposal. For details on the approach, please refer *to Appendix A* and the original details provided in section V-02 of the proposal. The independent risk advisory services will review project control processes and assess whether project risks are appropriately identified, quantified/measured, and managed. Table 1 below, which is based on the Risk Assessment Framework (as depicted in V-02 of the proposal), describes five key risk areas and corresponding sub-components that will support the governance and risk assessment across Major Programs work streams. In the next section (Section 4) outlines the schedule of deliverables that will be submitted in support of the scope of services described above.

Table 1: Risk Assessment Framework – Risk Areas and sub-areas

Risk area	Risk sub-area
Business Needs	✓ Business Model (new capabilities) ✓ Funding Strategy ✓ Member Security & Strategy ✓ Requirements Management ✓ Strategic Alignment ✓ Expected Outcomes
Vendor Management	✓ Capability & Functionality ✓ Performance (SLA) ✓ Resource Continuance ✓ Standards & Methods
Project Management	✓ Resource Management (schedule, budget, & people) ✓ Contingency (budget & slack time) ✓ Risk Management ✓ Methodology & Approach ✓ Project Change Management ✓ Earned Value ✓ Estimating (including assumptions) ✓ Constraints & Dependencies ✓ Deployment & Support Plans ✓ Transition & Handover
Governance & Decision Making	✓ Gate Decision-Making ✓ Sponsorship ✓ Audit & Compliance ✓ Committee Structures ✓ Vision ✓ Prioritization ✓ Stakeholder Engagement

Risk area	Risk sub-area
	✓ Oversight Roles
Organizational Readiness	✓ Management Capacity ✓ Change Management ✓ Operational Capacity (processes) ✓ Technology Capacity ✓ Resource Availability (LOE) ✓ Staffing Knowledge & Skills

4. Schedule of Deliverables & Acceptance Criteria

The tables below provide a detailed overview of the expected deliverables for each engagement phase. Furthermore, acceptance criteria for each deliverable are provided in and will form part of the deliverable acceptance procedures.

Table 2: Schedule of Deliverables

Phase	Deliverable	Deliverable overview
1. Ongoing Project Management Activities	1.1 Engagement Status Reports	Engagement status reports will be prepared on a bi-weekly basis and will include: • High-level summary of key observations, insights made by MNP as part of its Sprint risk assessment work (note that details of Sprint work will be included in the Sprint Report deliverables) • Work completed in the reporting period • Priorities for the next reporting period • Risks/issues impacting the engagement schedule, scope, and budget that require escalation In addition to written status reports, we will also provide bi-weekly verbal engagement status updates to MPI contact and attend weekly engagement status updates.
	1.2 Tracking Action Logs	As part of ongoing activities, MNP will participate in relevant Major Program meetings (e.g., Steering Committee and Technical Committee, delivery panels, workstream meetings, and project management meetings). The meetings that MNP is expected to attend will be documented in the CAP deliverable. As part of MNP meeting attendance, MNP will maintain a log of key action items and decisions captured during meetings to refresh the risk backlog.
	1.3 Critical Advice Memos	Critical advice memos may arise out of documentation of verbal feedback shared by MNP during its attendance at regular Major Program meetings. Critical advice memos may also include documented advice/feedback provided on an ad hoc basis at the request of ESC or the Technology Committee. Critical advice memos are expected to be completed within 10 hours of effort (over 10 hours would be part of the Deep Dive deliverable). Critical advice memos will include but is not limited to the following: • Purpose of advice memo • Context (e.g. where was advice provided, what documents were referred to, if at a meeting, who were the participants, when did meeting occur, etc.) • Observation (conditions, facts, and/or circumstances that triggered the advice)

Phase	Deliverable	Deliverable overview
2. Iterations 1 to N and Iterations N+1 to M	2.1 Sprint Report (Risk Dashboard)	The purpose of a sprint report is to provide MPI leadership with a concise and transparent overview of the IRA activities, findings, and progress during a specific sprint or iteration. The report outlines the scope of IRA work completed, identified risks or issues, recommended actions or improvements, and any required adjustments to the sprint plan. In other words, MPI is provided with practical recommendations and best practice advice for management to approach the remediation. Based on this, management should be able to produce an action plan that we could review and follow up on as part of the next sprint.
	2.2 Sprint Plan for Next Iteration	The updated sprint plan for the next iterations outlines the sprint objective, scope and the specific IRA priorities for the upcoming sprint. This plan reflects adjustments based on the findings and emerging risks as identified in the last IRA sprint. By updating the sprint plan, this ensures that the IRA team focuses on the most relevant and impactful areas, allowing the engagement to adapt and allocate scarce resources towards emerging challenges. The overall goal of the updated sprint plan is to provide key stakeholders with timely insights related to risk assessment, mitigating controls and residual risks. We assume this will be forecasted up until go-live. Once Major Program projects have gone live, the 'prioritized action plan matrix' will adhere to the same process as the sprint plan. Although, the key emphasis is to update risk backlog and the prioritized action plan to focus on post-implementation risks and benefits realization. As such, the risk backlog and the proposed actions will be tailored to the post go-live environment.
	2.3 Deep dives (if needed)	At the request of ESC, and validated with the Technology Committee, MNP may be asked to perform a special study or deep dive on a particular topic. A deep dive would be above and beyond what is covered as part of the regular sprint reviews, and may include but is not limited to: • Remediation work (e.g., assessing management actions to determine whether previously identified gaps/deficiencies have been adequately addressed) • Root cause analysis (e.g., performing a deep dive review into the underlying drivers of an issue experienced by the project with a goal of identifying recommended resolutions and preventing recurrence) • Solution architecture reviews • Security/privacy assessments • Specific analytic procedures including documentation review and interviews with testing based on requests from stakeholders

Phase	Deliverable	Deliverable overview
		• Comparatives – These may include jurisdictional scan, benchmarks and studies to determine how a specific issue, problem or concern was handled by other organizations, projects, modernization efforts or digital transformations • Data analytics – Specific procedures to answer stakeholder questions or concerns • Value Chain Analysis – Structured and layered decomposition of services provided by the organization, projects, modernization efforts or digital transformations will deliver value • GRC Process Review – Control, risk and governance analysis • Ad-hoc studies risk reviews – Studies based on cyber, privacy or business continuity (TRA, PIA and BIA)
3. Summary Report (Annual Summary Report)	3.1 Independent Risk Advisory Report	The objective of the annual report provides MPI leadership and key stakeholders with a comprehensive overview of the IRA assessment's progress, findings, and outcomes over the course of a year. Furthermore, it highlights proposed sprint iterations, lessons learned, and areas for improvement, while also enabling stakeholders to make informed decisions.

Table 3: Deliverable Acceptance Criteria

Please refer to the below schedule for the acceptance criteria. Please note that this is only an initial list and is still subject to iterative / ongoing changes to reflect more defined criteria to ensure the quality, completeness, and timeliness of engagement deliverables. The finalization of this list will require refinement between MNP and MPI.

All Deliverables shall be sent to the VP & Chief Customer and Product Officer and the VP & Chief Information & Technology Officer, for their review and approval, in accordance with the acceptance criteria. Copies of all Deliverables should also be sent to the Director of Major Programs and the Director of Strategic Sourcing and Vendor Management. The tracking and approval of final Deliverables will be managed by MPI in Azure Dev Ops.

	Work Phase			
Acceptance Criteria (illustrative)	Engagement Set-Up	PM Activities	Iterations 1 to N, N+1 to M	Summary Report
Common Acceptance Criteria				
The work deliverable is consistent with the requirements described in the Statement of Work ("SOW")		X	X	X
Work deliverable includes the following components: introduction, time period, who was involved (preparers and reviewers), report date		X	X	X

	Work Phase			
Acceptance Criteria (illustrative)	Engagement Set-Up	PM Activities	Iterations 1 to N, N+1 to M	Summary Report
Language and terminology should be clearly defined		X	X	X
All data, facts, and figures presented in the deliverable must be accurate and supported by reliable sources		X	X	X
Deliverables should be well-formatted, with consistent font styles, headings, and spacing		X	X	X
Deliverables should be appropriately branded		X	X	X
Graphics, charts, and tables should be properly labeled and easy to comprehend		X	X	X
Review and signoffs are on project deliverables and reports		X	X	X
The Vendor acknowledges and accepts that MPI may be required to provide deliverables and Vendor information to the Manitoba Public Utilities Board ("PUB"), as part of MPI's annual rate application. There is a presumption that all materials filed with the PUB will be placed on the public record. MPI shall notify the Vendor if deliverables are in their final and approved state, and Vendor information will be submitted to the PUB. The Vendor may request that MPI seek confidential treatment by the PUB of certain deliverables and Vendor information. MPI may require the Vendor to provide affidavit evidence to support the request to the PUB for confidentiality, which would be prepared by MPI on behalf of the Vendor. The Vendor acknowledges and accepts that MPI is bound by the PUB's decision	X	X	X	X
1.1 Client Assistance Package (CAP) acceptance criteria				
The CAP was provided on the agreed upon and schedule communicated by MNP. Baseline schedule may be subject to change which will impact timeliness accordingly.			X	
The CAP detailed the following at a minimum: • Expected documentation by topic area and rationale for its inclusion such that MPI can understand the purpose of each request and how the documentation informs the risk assessment or supports specific lines of enquiry. • Priority of the document such that MPI can have some flexibility to source the material and the sequence within which to provide it to MNP. • List of initial interviewees/stakeholders along with priority to align calendars and schedule meetings. • The types of meetings MNP will participate in, ensuring alignment with project expectations.			X	
Due dates and action items are documented within the CAP.			X	
Maintained library of artifacts collected to establish a common vision.			X	
1.2 Risk Backlog with Iteration 1 Priorities and Areas of Focus High-Level Initial Iteration 1 to N Plan				
The risk backlog contains a comprehensive list of risks relevant to Major Programs.			X	
Risks are clearly prioritized based on their potential impact and likelihood, and they are appropriately categorized.			X	

	Work Phase			
Acceptance Criteria (illustrative)	Engagement Set-Up	PM Activities	Iterations 1 to N, N+1 to M	Summary Report
Risks in the backlog are aligned with management, stakeholder concerns, and the engagement's goals.			X	
The sprint plan/schedule outlines proposed timeframes for each iteration from 1 to N, indicating the start and end dates for each iteration.			X	
1.3 Sprint Plan				
The sprint plan is informed by the risk backlog, ensuring the chosen sprint topic is aligned with the most critical risk identified.			X	
The chosen sprint topic is clearly defined, providing an accurate description of the subject matter that will be addressed during the sprint.			X	
The sprint plan has been reviewed and approved by relevant stakeholders, ensuring that the chosen topics and schedules are in line with their expectations and needs.			X	
The plan includes a set of preliminary lines of inquiry that MNP will pursue during the sprint. These lines of inquiry outline the key areas of investigation and exploration for the topic.			X	
The plan includes the details of initial sprint but also a proposed / draft outline of the schedule for future sprints.			X	
2.1 Engagement Status Report				
The reporting frequency and timing of status reporting is agreed upon by MNP and MPI.		X		
The status report includes the reporting period.		X		
The status report includes the following components: What was completed since the last reporting period What we will be working on in the upcoming reporting period Are there any engagement risk / issues that require monitoring		X		
Status reports are written in a professional tone, using clear and easily understandable language.		X		
Individuals receiving the status report are project managers and who can appropriately manage and track engagement progress.		X		
2.2 Tracking Action Logs				
The Action Logs capture a log of key action items and decisions from relevant Major Programs meetings (Steering Committee, Technical Committee, workstream meetings, project management meetings, etc.)		X		
The Action Logs are documented within 48 hours of each relevant meeting attended by MNP.		X		
Each action log entry includes the date, description, responsible parties, and status of the action (if applicable).		X		

	Work Phase			
Acceptance Criteria (illustrative)	Engagement Set-Up	PM Activities	Iterations 1 to N, N+1 to M	Summary Report
The action logs are consistently updated and organized for easy reference.		X		
2.3 Critical Advice Memos				
Critical advice memos are completed within the specified time frame of 10 hours of less of effort.			X	
Memos will have the following components: • Purpose of advice memo • Context (e.g., where was advice provided, what documents were referred to, if at a meeting, who were the participants, when did meeting occur, etc.) • Observation (conditions, facts, and/or circumstances that triggered the advice) • Advice provided			X	
When advice is given based on verbal feedback shared during Major Programs meetings or ad hoc requests, the memo includes documentation of the meeting or interaction.			X	
For meetings, key participants, date, and any other pertinent discussions are noted, providing context for the advice / feedback given.			X	
3.1 Sprint Report (Risk Dashboard)				
There is an overview of the activities, findings, and progress during the specific sprint.			X	
The report transparently presents the identified risks or issues.			X	
The report includes actionable recommendations for addressing the identified risks or issues. Each recommendation is supported by the findings from the engagement.			X	
Management is able to develop / produce an action plan based on the information within the Sprint Report that MNP can review and follow-up on as part of the next sprint.			X	
3.2 Sprint Plan For Next Iteration				
The sprint plan is documented, outlining what MNP aims to achieve during the sprint.			X	
The sprint plan outlines the specific IRA priorities for the next iteration, aligning them with the most relevant areas based on the findings and emerging risks from the previous sprint.			X	
Sprint plans are reviewed and approved by MPI.			X	
3.3 Deep Dives				
Management and stakeholders clearly articulate specific concerns related to project components, processes, or risks that would require a "deep dive." Concerns are documented, specifying the areas to be addressed. I.e., The purpose and scope of the deep dive are defined and aligned with the specific request from MPI management or the board.			X	

	Work Phase			
Acceptance Criteria (illustrative)	Engagement Set-Up	PM Activities	Iterations 1 to N, N+1 to M	Summary Report
Each identified concern is evaluated for its potential impact on timelines and budget. Deep dives (greater than 10 hours) scope and level of effort will be agreed upon with MPI before work commences			X	
Any deliverables arising from the deep dive have documentation to support the methodologies used, including the specific analytic procedures and data sources; if applicable.			X	
Deep dive findings, recommendations, and mitigation strategies are documented. Comparatives: If the deep dive includes comparatives, such as jurisdictional scans, benchmarks, or studies, the deliverable highlights relevant findings and insights from these comparisons.			X	
Results are communicated on a timely basis to relevant stakeholders, including management and project teams.			X	
4.1 Independent Risk Advisory Report				
The report provides a comprehensive overview of the IRA assessment's progress, findings, and outcomes over the course of the year, covering key activities and milestones.				X
The report highlights key lessons learned from the IRA process, including insights gained, challenges faced, and successful strategies employed.				X
The report outlines proposed sprint iterations for the upcoming year, including priorities, focus areas, and potential adjustments based on lessons learned.				X
The report undergoes thorough quality checks from MNP to ensure accuracy, coherence, and alignment with the SOW.				X
The report is delivered in a timely manner, allowing stakeholders to review and consider its insights in a timely manner. This delivery date is agreed upon by both MNP and MPI.				X
Identified risks and related observations are linked to the critical success factors				X
Recommendations are tied to persons of interests				X
Table of Content is prepared and approved by the project authority (MPI) prior to development / finalization				X
Draft deliverables submission is consistent with the Table of Contents				X
Content must articulate a clear, validated, understanding of the requirements, current context, situation, and challenges and actionable recommendations.				X

5. Pricing

Please refer to Appendix C.3 to Schedule C – Submission Forms and Information of the proposal for details related to the estimated level of effort and associated cost per each iteration. As outlined in *Appendix B*, a billing schedule has been prepared to outline the monthly invoice amounts and the corresponding deliverables within the invoice period.

Assumptions

The following assumptions were made to develop the fee estimate:

- This Statement of Work is made pursuant to and shall be governed by the Agreement for Services dated March 24, 2026, between MPI and MNP the Program Governance and Risk Advisory Services (the "Agreement").
- Baseline schedule may be subject to change and will be communicated and agreed upon with the Project Authority.
- Professional fees do not include applicable taxes.
- Project status report meetings will be held with the MPI 's project manager. Frequency of status reporting to be agreed upon by MNP and MPI during project kick-off.
- Any changes to the scope that either party deems material will be discussed and approved in accordance with a formal change order. This includes deep dives greater than 10 hours.
- Billings for our services will be prepared and submitted regularly (i.e., monthly) in accordance with the Agreement – Appendix B.
- Each iteration will be a segment of the risk universe and will focus on the highest priority risks based on their rating and risk evaluation.
- The provided fees and effort assume that the level of involvement from MPI will be low; as such, a high-touch scenario was proposed.
- We estimated 1 iteration every 3 (three) months. Expected timelines for the Major Programs would affect iterations based on program activities. This will be discussed with MPI during the engagement setup phase.
- Based on management and stakeholder concerns on specific areas, "deep dives" may be requested and depending on the scope, additional budgets and scope may warrant a change request. Additional hours beyond the estimated amount in the different will be delivered on a time-and-materials basis. To provide higher levels of assurance, deep dives may be required when the estimated effort exceeds 10 hours.

- Following the first and second iterations, the Core Agile Internal Audit Team will conduct a "lessons learned" debrief session on the iteration, timelines, and approach to refine both the plan for the next audit iteration and the overall plan

Signatures

Appendix A – Approach

Workplans

As detailed in the engagement proposal, we describe below the workplan to support MPI with the Major Programs initiative.

	Engagement Set-up	Project Management Activities	Iterations 1 to N	Iterations N+1 to M	Summary Report
Phase Description	Not required as MNP has been the Independent Governance Vendor with MPI since August 2023.	Participate in key Major Programs meetings.	Perform risk assessments for Iterations 1 to N and provide a risk dashboard with MNP recommendations to support critical areas.	Once all the workstreams are live, MNP will primarily focus on post-implementation risks and benefits realization.	Identify gaps in current Major Programs or operational controls and processes and develop next steps while transferring knowledge.
Activities	We understand MPI transition to a Major Programs delivery model and would apply that knowledge and adapt based on feedback received by MPI.	Attend relevant stakeholder meetings (e.g., weekly/bi-weekly management meetings, the Steering Committee, and the Technology Committee). Prepare responses to Technology Committee queries. Analyze and evaluate the information obtained.	STEP 1 – TOP-DOWN RISK ANALYSIS Follow-up on previous audits, reviews and findings and related management action plans. Identified any "Unknown Unknowns" (where studies have not been performed into a planned "preliminary survey" and perform an initial validation of the risk backlog considering MPI feedback. Determine the level of depth of review needed for the	Review risks related to data quality and operational reporting. Address the highest risks for Business Readiness and Benefits Realization, Internal controls and the operational controls. Perform periodic workshops to confirm risks related to operations, systems management, interfaces and delivery of benefits promised. Develop draft and final briefing deck, including next	Summarize the current state of gaps, issues and risks. Through a final set of workshops, confirm the current state of the entire program, including all delivered workstreams. Gather information and fact patterns and areas of the effort identified with higher "Unknown Unknowns" into a planned risk assessment consisting of a "preliminary survey". Prioritize mechanisms and provide a list of initiatives

Engagement Set-up	Project Management Activities	Iterations 1 to N	Iterations N+1 to M	Summary Report
		current iteration as either LOW, MEDIUM OR HIGH TOUCH. Gather information to develop "TOP DOWN" areas **STEP 2 – BOTTOM-UP RISK ANALYSIS.** Gather information to develop "BOTTOM-UP" areas. For each iteration, we will address the highest risks. Analyze baseline areas such as system functionality, configuration, data quality and effectiveness of conversion and new operational reporting. Based on management and stakeholder concerns, specific areas to perform ("deep dives") may be requested, and *depending on the scope, additional budgets and scope may warrant a change request* **STEP 3 – SUMMARIZE RESULTS IN THE RISK DASHBOARD**	steps and options to resolve remaining issues. **Notes** 1. N and M will be decided during the project. 2. For any given iteration, a LOW, MEDIUM or HIGH-TOUCH approach may be taken, and therefore our risk assessment can be highly tailored to meet the project's intensity, risk environment and MPI's need to obtain assurance. 3. The total number of iterations will be determined by MPI.	with associated costs, resource requirements and sequencing (Project Prioritization Matrix) for any issues or gaps that remain outstanding. Develop draft and final briefing deck, including next steps and options to resolve remaining issues.

	Engagement Set-up	Project Management Activities	Iterations 1 to N	Iterations N+1 to M	Summary Report
			STEP 4 – ADJUST PLANS FOR NEXT ITERATION		
Timeframes	N/A	Monthly	Kickoff + 12 weeks	To Be Determined	Annually
Deliverables	*None applicable* – MNP will continue to leverage its existing risk backlog, which will be updated at the end of the last Sprint.	Engagement Status Report • Tracking Action Logs	Risk Dashboard • Plan for Next Iteration • Deep Dives (if needed)	Action Plan prioritization Matrix for Each Iteration N+1 to M) • Updated Rick Backlog	Independent Risk Advisor Final Report

Appendix B – Billing Schedule

Please refer to the attachment titled: *MPI – Billing Schedule* for details related to the proposed billing, mapped to each deliverable.

Payment Date	Project Management Activities	Iterations 1 to N, Iterations N+1 to M	Summary Report	Total
30-Apr-26	6,534	21,735		28,269
31-May-26	6,534	21,735		28,269
30-Jun-26	6,534	21,735		28,269
31-Jul-26	6,534	21,735		28,269
31-Aug-26	6,534	21,735		28,269
30-Sep-26	6,534	21,735		28,269
31-Oct-26	6,534	21,735		28,269
30-Nov-26	6,534	21,735		28,269
31-Dec-26	6,534	21,735		28,269
31-Jan-27	6,534	21,735		28,269
28-Feb-27	6,534	21,735		28,269
31-Mar-27	6,534	21,735	13,230	41,499
Year 1 Total	$78,408	$260,820	$13,230	$352,458
Year 2 Total – March 31, 2028 *(Adheres to year 1 billing frequency and deliverable commitments)*				$352,458
Year 3 Total – March 31, 2029 *(Adheres to year 1 billing frequency and deliverable commitments)*				$352,458
Year 4 Total – March 31, 2030 *(Adheres to year 1 billing frequency and deliverable commitments)*				$352,458
Year 5 Total – March 31, 2031 *(Adheres to year 1 billing frequency and deliverable commitments)*				$352,458

PUB (MPI) 1-116

Part and Chapter:	**Part V – Information Technology**	**Page No.:**	**27**
PUB Approved Issue No:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap**		
Topic:	**IT.6.4.2 Major Programs Projects Overview (3-Year Focus)**		
Sub Topic:	**MyMPI Online**		

Preamble to IR (If Any):

MPI has provided an overview of the MyMPI online project, which aims to establish a new customer portal, with International Registration Plan (IRP) customers designated as the initial users. This initiative remediates deferred work from Project Nova Release 2 (R2) that previously resulted in manual workarounds and duplicate data entries for the Prorate Office.

Question:

a) Please summarize the application system components and vendor solutions developed or acquired during Project Nova Release 2 that remain utilized by, or integrated into, the MyMPI online portal.

b) Please detail and explain what portion R2 expenditures relate to Basic.

c) Please outline MPI's long-term vision for the MyMPI portal beyond IRP customers. Specifically, please clarify whether this portal will serve as the foundation for broader customer-facing digital capabilities and transactions.

d) Please provide MPI's current perspective and updated forecasts regarding online service adoption rates for Manitobans:

   i. Specifically: Has MPI conducted updated forecasting on the percentage of total transactions aimed to be conducted online

   ii. If available, please file MPI's revised forecast for online service adoption rates for the next 5 Fiscal Years.

Rationale for Question:

To understand MyMPI's current state and the future vision for online services leveraged from the MyMPI initiative.

RESPONSE:

a) For MyMPI Foundation and IRP Online, the following application systems implemented in Nova Release 2 (or earlier) were used:
- Celtic Motor Carrier Systems (CMCS) - New for R2, enhanced for IRP Online
- Microsoft Power Apps Portal - New for R1, enhanced for MyMPI
- MuleSoft - New for R1, enhanced for R2 and MyMPI/IRP Online
- Dynamics 365 CRM - New for R1, enhanced in R2 and IRP Online
- Azure Cloud - New components added for R2 and MyMPI/IRP Online
- Moneris - Reuse of existing service for IRP Online
- Infor/Lawson - Reused existing platform

b) See *Figure 1* below:

Figure 1 NOVA R2 Expenditures (Deferred + Expenses) - Basic

Line No.	Cost Expenditure	Basic
1	***(C$000s, except where noted)***	
2	**Deferred NBV at March 31, 2026 - Basic**	13,325
3	**Nova R2 Implementation Expenses**	1,716
4	**R2 Accounting Write-off**	188,370
5	**Total Basic Nova R2 Expenditures**	203,411

c) The current scope for the MyMPI customer portal is only IRP customers. A 2026/27 corporate initiative, Defining Core Portal Capabilities, is underway to develop a customer-centric plan defining desired customer capabilities and a prioritized roadmap of future use cases by leveraging the MyMPI portal implemented in 2026 as the foundation for broader customer-facing digital capabilities. This plan will serve as the long-term vision for the MyMPI portal.

d)

i.) There are no updated forecasts regarding online service adoption rates for Manitobans.

ii.) There are no updated forecasts regarding online service adoption rates for Manitobans.

PUB (MPI) 1-117

Part and Chapter:	**Part V – Information Technology**	**Page No.:**	**29**
PUB Approved Issue No:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap**		
Topic:	**IT.6.4.2 Major Programs Projects Overview (3-Year Focus)**		
Sub Topic:	**Specialty Insurance Services (SIS) Reversion Project**		

Preamble to IR (If Any):

MPI notes that the status of phase 2b, Assessment and Planning, has been paused since January. MPI Executive direction has been provided, and a change request has been drafted for project close-out.

Question:

Please file the change request pertaining to Phase 2b of the SIS Reversion Project.

Rationale for Question:

To understand the scope, cost, and decision basis underlying the pause and close-out of Phase 2b.

RESPONSE:

MPI has filed the Phase 2b SIS Reversion Project change request in response to the PUB's request.

Under the approved decision-making governance model, the change request was within the authority of the Program Steering Committee and was approved at that level. In keeping with governance reporting expectations, the change request was also included in program status reporting and brought forward to the Executive Steering Committee for information and oversight.

Please see *Appendix 1 – SRE Assessment Planning Project Close Out - Confidential*

Appendix 1:
CR: SRE Assessment & Planning - Project Close Out

This material is the subject of a confidential motion.

PUB (MPI) 1-118

Part and Chapter:	**Part V – Information Technology**	**Page No.:**	**29-30**
PUB Approved Issue No:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap**		
Topic:	**IT.6.4.2 Major Programs Projects Overview (3-Year Focus)**		
Sub Topic:	**Specialty Insurance Services (SIS) Reversion Project**		

Preamble to IR (If Any):

MPI notes the status of phase 2c, Duck Creek Data Quality, that a change request has been approved to extend the project through December 2026.

MPI also notes in Part V-IT Appendix 2 pg. 18-19 that:

> "MPI undertook a rigorous assessment of available options, including careful review of vendor cost assumptions, internal delivery capacity, and proposed timelines, and concluded that reinitiating a large-scale implementation would not represent prudent value, particularly considering execution risk and the scale of further investment required.

Question:

a) Please file the approved change request pertaining to Phase 2c of the SIS Reversion Project.

b) Please summarize whether MPI sought external legal expertise to assist with review and action of this vendor contract decision.

Rationale for Question:

To understand the scope, cost, revised timeline, and decision basis underlying the approved extension of Phase 2c.

RESPONSE:

a) Please see *Appendix 1 – SRE Duck Creek Data Quality – Duck Creek Exit Activities - Confidential.* Under the approved decision-making governance model, the change request was within the authority of the Program Steering Committee and was approved at that level. In keeping with governance reporting expectations, the change request was also included in program status reporting and brought forward to the Executive Steering Committee for information and oversight.

b) Yes. MPI retained external legal expertise to provide legal advice and assist management in assessing contractual rights, risks, and strategic options arising from this vendor relationship. The engagement of external counsel formed part of MPI's governance approach given the complexity, value, and strategic importance of the contractual arrangements under consideration. At this time, MPI will not disclose the substance of any legal advice received or comment on current or potential negotiations, dispute resolution, recovery efforts, or litigation involving the vendor, as such information is protected by solicitor-client privilege.

CR MP SRE Duck Creek Data Quality Duck Creek Exit Activities

This material is the subject of a confidential motion.

PUB (MPI) 1-119

Part and Chapter:	Part V – IT Appendix 1	**Page No.:**	8-9
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Approach to Modernization		
Sub Topic:			

Preamble to IR (If Any):

MPI has summarized key principles and approach to modernization Information Technology systems

Question:

Please summarize whether and to what extent MPI has evaluated SGI/SAF's or ICBC's principles and approaches to modernization.

Rationale for Question:

To further understand the underlying information gathered to support MPI's modernization approach.

RESPONSE:

MPI has reviewed modernization experiences from other Canadian property and casualty insurers, including SGI and ICBC, as one of several inputs used to inform its modernization planning. Through discussions with these organizations, MPI explored modernization approaches, governance models, sequencing strategies, lessons learned, and implementation challenges.

The insights gained helped validate certain modernization principles and identify practical lessons regarding planning, organizational readiness, governance, and risk management. For example, common themes included the importance of strong business engagement, phased delivery approaches, executive sponsorship, and aligning modernization activities to business objectives.

While MPI considered these experiences, it has not adopted any single organization's modernization approach. MPI's modernization strategy has been developed based on its own assessment of business services, technology risk, technical debt, architectural considerations, and strategic priorities. External insights were used as reference points to inform planning and decision-making rather than as a prescribed model for implementation.

PUB (MPI) 1-120

Part and Chapter:	Part V – IT Appendix 2	**Page No.:**	11-12
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Project & Major Programs		
Sub Topic:	Project Management Governance		

Preamble to IR (If Any):

In Part V – IT Appendix 2, pages 11 and 12, MPI states that "financial controls are deliberately structured to increase rigor as risk and spend grow," and that "as initiatives approach the $3-million threshold, governance automatically escalates to Major Program oversight, triggering stronger controls, reporting, and executive visibility."

Question:

a) Please define what MPI means by "automatically escalates" in this context.

b) Please identify the specific conditions and metrics under which this escalation is triggered.

Rationale for Question:

To obtain clarity on the noted escalation process.

RESPONSE:

a) As initiatives progress through the Strategy to Execution (S2E) process, increasing clarity is obtained regarding scope, strategic alignment, dependencies, resourcing requirements, estimated costs, and delivery complexity. This information enables assessment against MPI's established Major Program definitions and thresholds including the $3-million funding threshold. Where an initiative is determined to meet the characteristics of a Major Program, the initiative becomes subject to the governance, oversight, reporting, and decision-making processes applicable to

Major Programs. Early identification of such initiatives supports the establishment of appropriate governance, planning, funding, stakeholder engagement, organizational readiness, and delivery oversight before execution begins. The term "automatically escalates" is intended to reflect that when it is known that initiatives meet Major Program criteria they are expected to transition to the applicable Major Program oversight framework rather than continue under standard project governance.

b) The escalation is not intended to mean that the project changes governance without review or approval. Rather, the threshold acts as a control point that triggers a defined review and decision process. Finance and project governance functions monitor project forecasts and actuals to identify when a project may reach the threshold or when cost, scope, schedule, risk, or complexity has increased to a level that requires stronger oversight.

Where the threshold or related risk conditions are met, a formal decision request is prepared for the Executive Steering Committee or other applicable executive governance body.

Major Programs oversee large initiatives exceeding $3M, providing the governance and budget oversight required for these complex efforts. A Major Program is defined as a technology program with a total expected cost greater than $3M.

This threshold serves as an appropriate marker for a Major Program, as it identifies initiatives with sufficient financial scale, enterprise impact, and delivery complexity to warrant enhanced governance, executive visibility, and more rigorous oversight. It establishes a clear and consistent basis for differentiating major strategic investments from standard projects, while ensuring governance efforts are focused on initiatives with the highest organizational risk and value.

Specific triggering conditions may include: significant impacts on business operations/processes (e.g., changes to underwriter workflow); substantial impacts to the customer and/or partner experience (e.g., accessing the International Registration Plan (IRP) through MyMPI); involvement of a relatively high degree of enterprise “risk” and “complexity” (i.e., due to cost overruns, scope creep, and change resistance); and/or being part of a series of interrelated projects that, in total, exceed $3M and that key stakeholders are likely to view in aggregate.

PUB (MPI) 1-121

Part and Chapter:	Part V – IT Appendix 3	**Page No.:**	2
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	IT Risk Registry		
Sub Topic:	Risks Removed from Registry		

Preamble to IR (If Any):

Part V – IT Appendix 3 IT Risk Registry removes the risk of "Lack of Resource Capacity, and Organizational capacity impacted by demand for Major Programs" as "Both risks have been addressed through capacity management and proactive planning activities through corporate portfolio governance.

Question:

Please detail the specific capacity management and proactive planning activities undertaken through corporate portfolio governance that successfully addressed and mitigated these risks.

Rationale for Question:

To understand how MPI is mitigating resource capacity risks following their removal from the IT Risk Registry.

RESPONSE:

MPI manages resource capacity through an integrated set of annual planning, portfolio governance, workforce planning and resource management activities designed to ensure the organization does not commit to more work than it can reasonably deliver.

A foundational input is MPI's enterprise project resource capacity and demand planning toolset. The tool captures the percentage of employee capacity required to operate the core business, commonly referred to as business-as-usual capacity. This is critical because it establishes the amount of organizational capacity that may be available for

Major Programs, Corporate Initiatives and other priorities after core operational requirements have been protected.

The Enterprise Project Management Office uses the toolset to identify project resource demand, coordinate requests with functional managers and analyze future demand and capacity. Resource information is refined as work progresses through planning, business case development, procurement and delivery. This provides increasing visibility into resource requirements, potential constraints and decisions that may be required.

MPI's annual planning practice and ongoing EPMO management activities act as the conduits through which this information is translated into portfolio decisions. The annual planning process and ongoing resource capacity management begin by protecting the capacity required to deliver MPI's core business. Major Programs are then accounted for in allocating the remaining organizational capacity because of their scale, complexity, commitments and importance to MPI's long-term objectives.

During annual planning, MPI identifies the most important enterprise problems to be addressed through Corporate Initiatives. Rather than immediately committing to predetermined projects, MPI assesses potential solution options and identifies the most appropriate response to each problem. As part of this feasibility analysis, MPI develops preliminary Class 4 estimates of the financial and workforce resources required to implement the proposed solutions.

This early solution analysis and estimation process provides visibility into potential resource collisions before delivery commitments are finalized. It allows MPI to identify where multiple initiatives may require the same specialized resources at the same time and to adjust the portfolio accordingly. Mitigation may include sequencing work so that initiatives do not all begin simultaneously, changing scope or timing, identifying alternative delivery approaches, supplementing internal capacity or deferring lower-priority work.

Resource constraints, dependencies, timelines, risks and organizational impacts are highlighted through ongoing EPMO management. Where available capacity is insufficient to support all proposed work, trade-off decisions are surfaced. This enables MPI to avoid

approving a portfolio that exceeds the organization's feasible delivery capacity and enables MPI to actively manage capacity during delivery.

As initiatives move through business casing, procurement and detailed planning, resource estimates become more precise. MPI actively updates capacity and demand information, monitors emerging challenges and brings forward decisions where resource requirements differ from earlier assumptions or where new conflicts arise.

MPI organizes work into four priority categories that guide planning and resource allocation:

1. Core business activities, which receive the first and primary allocation of organizational capacity.
2. Major Programs, which are then accounted for because of their significant investment, delivery obligations and contribution to MPI's long-term objectives.
3. Corporate Initiatives, which address the most important enterprise problems and advance the multi-year strategy.
4. Operational priorities, which also contribute to delivering against the multi-year strategy and are advanced only where sufficient capacity remains and where they do not jeopardize delivery of the first three categories.

This prioritization reflects an organizational expectation that operational priorities will not proceed where they would compromise core business delivery, Major Programs or Corporate Initiatives. It provides a consistent basis for resource decisions and helps direct limited organizational capacity toward the work that is most important.

MPI has also created an Enterprise Project Resource Lead role within the EPMO to establish a more coordinated and proactive approach to enterprise resource planning and capacity management. The role is intended to improve visibility into resource demand and availability across the portfolio, support forecasting and inform prioritization and sequencing decisions. As the role was only recently established, related processes, tools and reporting remain in the early stages of development and will continue to mature.

In parallel, MPI is undertaking enterprise workforce planning activities led by the People & Culture division to better understand longer-term workforce demand, capability requirements and potential skill gaps.

MPI also maintains access to contingent labour through an established Request for Standing Offer administered through the FlexTrack service. This provides a flexible mechanism to obtain specialized skills or additional capacity where internal resources are unavailable or insufficient, subject to procurement, funding and governance requirements.

Although the risks titled “Lack of Resource Capacity” and “Organizational capacity impacted by demand for Major Programs” are no longer included in the IT Risk Registry, MPI continues to actively manage resource and organizational capacity risk. The combination of protected business-as-usual capacity, annual portfolio planning, early feasibility analysis, progressive resource estimation, portfolio sequencing, trade-off decisions, workforce planning and contingent labour provides a coordinated approach to mitigating the risk that MPI undertakes more work than it can feasibly deliver.

PUB (MPI) 1-122

Part and Chapter:	Part V – IT Appendix 4	**Page No.:**	1-2
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Figure IT App 4-1 & 4-2		
Sub Topic:	IT Personnel & IT Personnel Costs		

Preamble to IR (If Any):

Part V – IT Appendix 4, Figure IT App 4-1 shows internal FTE counts, and Figure IT App 4-2 shows related internal FTE costs over the same period. Reviewing the two together, the headcounts and costs do not appear to align.

Footnote (1) of Figure IT App 4-1 states that internal FTE excludes "Initiatives," yet Figure IT App 4-2 reports "Initiative" costs, Line No. 3.

Question:

Please explain the rationale for excluding Initiative FTE counts in Figure IT App 4-1 given that Initiative costs are included in Figure IT App 4-2.

Rationale for Question:

To establish a consistent basis for comparing FTE counts and costs, given that one figure excludes Initiatives while the related cost figure includes them.

RESPONSE:

Excluding initiative FTE in *Figure IT App 4-1* aligns with the past GRA presentation; *Figure IT App 4-2* was redesigned at PUB request through PUB (MPI) 1-95 in 2026GRA.

Please refer to Figures 1 to 4 in *PUB (MPI) 1-125*, which factors in internal FTEs.

PUB (MPI) 1-123

Part and Chapter:	Part V – IT Appendix 4	**Page No.:**	1-2
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Figure IT App 4-1 & 4-2		
Sub Topic:	IT Personnel & IT Personnel Costs		

Preamble to IR (If Any):

Part V – IT Appendix 4, Figure IT App 4-1 shows internal FTE counts, including Enterprise Project Management Office (EPMO) FTE on Line No. 7 and 8, which fluctuate from 14 to 25 and back to 14 year-over-year.

Figure IT App 4-2 shows related internal FTE costs over the same period, but it is not clear how this fluctuation is reflected in the cost figures.

Question:

a) Please confirm whether the EPMO FTE on Line No. 7 and 8 in Figure IT App 4-1 are costed under Normal Ops or Initiative in Figure IT App 4-2, and reconcile the EPMO count to the corresponding cost lines.

b) Please explain the reason for the EPMO FTE count movement from 14 to 25 and back to 14 year-over-year.

Rationale for Question:

To understand forecasted utilization of EPMO resources and to clarify the operational drivers behind the year-over-year fluctuations in FTE levels.

RESPONSE:

a) EPMO FTE on Line No. 7 and 8 in Figure IT App 4-1 are costed under Normal Ops and included on Line No. 2 in Figure IT App 4-2.

b) The EPMO was previously in the Information Technology Division and moved to the Customer & Product Value division where it underwent further re-organization activities. The 2026/27 budgeted FTE reflect the composition of the EPMO prior to the re-organization. This re-organization was effective in 2025/26 but after the completion of the 2026/27 budget cycle and therefore actuals for 2025/26 reflect the future budget state for 2027/28.

PUB (MPI) 1-124

Part and Chapter:	Part V – IT Appendix 4	**Page No.:**	2
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Figure IT App 4-2		
Sub Topic:	IT Personnel Costs		

Preamble to IR (If Any):

Part V – IT Appendix 4, Figure IT App 4-2 shows internal FTE costs. Internal FTE costs - Initiative rises sharply from $756K in 2026/27 to $3,333K in 2027/28.

Question:

Please summarize what the significant increase in "Internal FTE Costs - Initiative" from $756K in 2026/27 to $3,333K in 2027/28 represents, including the specific drivers or projects behind this change.

Rationale for Question:

To understand the underlying drivers and business justification for this significant year-over-year cost increase.

RESPONSE:

$756K is the Basic portion of known initiative costs based on 2026/27BF. $3,333K in 2027/28 is the Basic portion of $4.5M budget placeholder in 2027/28.

PUB (MPI) 1-125

Part and Chapter:	Part V – IT Appendix 4	**Page No.:**	6
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Figure IT App 4-9		
Sub Topic:	Average Cost per FTE		

Preamble to IR (If Any):

Figure IT App 4-9 derives an average internal cost per FTE using total internal FTE costs from Figure IT App 4-2 and internal FTE counts from Figure IT App 4-1.

Figure IT App 4-1's Footnote (1) confirms its FTE counts exclude Initiatives, while Figure IT App 4-2's cost base includes Initiative spend.

This mismatch appears to affect the average cost per FTE, which rises from $81.93K to $92.61K as Initiative cost grows from $756K (2026/27) to $3,333K (2027/28) with no corresponding change in FTE counts.

Question:

Please clarify MPI's approach and provide the specific calculations used to determine the average FTE costs presented in Figure IT App 4-9.

Rationale for Question:

To clarify the calculation of average cost per FTE.

RESPONSE:

Figure IT App 11-9 - average annual cost for Internal FTE is based on Internal FTE Costs – Normal Ops & - Initiatives from Figure IT App 11-2 over Internal FTE numbers – IT Norm Ops, Internal EPMO – Major Programs FTE & Internal EPMO – PMO FTE. Initiative FTE are not included in the calculation.

Initiative FTEs have been added through Figure 1 to 4 below.

Figure 1 IT Personnel – Updated chart previously submitted in *2026 GRA Part V IT Appendix 2, Figure IT App 11-1*

Line No.	FTE Adjustments	2021/22 (A)	2022/23 (A)	2023/24 (A)	2024/25 (A)	2025/26 (A)	2026/27(B)	2027/28(F)	2028/29(F)
1	**Internal FTE**	296.5	320.6	319.6	290.5	261.0	268.5	268.5	268.5
2	**Corporate Re-Organization(s)**	-	-	-	-	-	-	-	-
4	**Net New Positions**	-	-	-	-	-	-	-	-
5	**Divisional Reductions**	-	-	-	-	-	-	-	-
6	**Internal IT Normal Operations FTE Total** (1)	296.5	320.6	319.6	290.5	261.0	268.5	268.5	268.5
7	**Internal EPMO - Major Programs FTE** (2)					-	-	5.0	5.0
8	**Internal EPMO - PMO FTE** (2)					14.0	25.0	14.0	14.0
9	**Internal Initiative FTE**	64.2	57.8	49.1	29.0	31.0	50.0	50.0	50.0
10	**Consultants** (3)(4)	93.5	114.0	102.0	36.0	37.3	39.4	18.4	18.1
11	**Total**	**454.2**	**492.4**	**470.7**	**355.5**	**343.3**	**382.9**	**355.9**	**355.6**

12 (1) Internal FTE includes IT Normal Operations and excludes Initiatives. Historical actuals represent IT Operations and PMO teams.
13 (2) Internal EPMO - Previously within IT Division, moved to Customer & Product Value in 2025/26 (PMO) and 2026/27 (Major Programs).
Major Programs leadership FTE were reorganized under normal operations in 2025/26 and are updated in budget effective 2027/28.
14 (3) Consultant counts are Basic FTE equivalents for Normal Operations and Initiatives. Calculated: Basic consultant expenses at $125/hr rate, 8 hrs/day, 252 days/yr
By comparison, forecasts in Figure EXP App 19-7 are calculated as Corporate FTE equivalent (not Basic).
(4) 2027/28 forward represents normal operations consultant count only. As noted in App 11-2 forecasted initiative consultants for 2027/28 beyond is not available.
2027/28 initiative budget is a placeholder and not allocated by nature of expense, accordingly forecasted consultant count based on implied dollar is nil as
the forecasted dollar is an unallocated placeholder only (refer to EXP Expenses chapter)

PUB (MPI) 1-126

Part and Chapter:	Part V – IT Appendix 4	**Page No.:**	6
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Figure IT App 4-9		
Sub Topic:	Average Cost per FTE		

Preamble to IR (If Any):

Figure IT App 4-9 details the Average Cost per Consultant FTE.

Question:

Please provide a schedule supporting the calculation of average consultant cost per FTE of $252 /per hour for FY2025/26 through FY2028/29.

Rationale for Question:

To clarify cost drivers of consulting forecasts.

RESPONSE:

$252 represents $252,000 average annual cost per consultant, which is based on consultant amounts from Figure IT App 11-8 over consultant FTE from Figure IT App 11-7 between 2025/26 and 2028/29.

PUB (MPI) 1-127

Part and Chapter:	Part V – IT Appendix 9	**Page No.:**	1
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Corporate Project Listing		
Sub Topic:			

Preamble to IR (If Any):

MPI has provided the following Exhibit containing the CPFS for all IT initiatives over$100,000:

> "Part_05_01_IT_02_Appendix_09_Corporate_Project_Listing_MFR_F17_F18_F20_F23_part_d_and_f_Redacted.xlxs"

PUB Order 19 states:

"MPI shall provide a single consolidated report for all IT initiatives over $100,000 within the CPFS in the 2027 GRA. Each initiative must include, at a minimum: work category, focus area, NPV, discount rate, risk rating, Major Program status, BRM use, timelines, status, historical and forecasted spend, current-to-date spends, contingency details, and modernization relevance in addition to traditional CPFS reporting elements"

MPI filed in GRA26 Part VI – IT Appendix 5, "5 Year Rolling IT Roadmap".

MPI filed the following definitions of "focus areas"/"portfolios of work" to PUB (MPI) 1-86:

- "Strategic - initiatives that directly support execution of the corporate strategic plan and deliver long-term value aligned to corporate priorities.
- Vitality - initiatives that aimed to strengthen the foundation of the organization, including upgrades to systems, processes, or infrastructure to support operational health.

- Managed Work - externally triggered or mandatory initiatives introduced by stakeholders such as regulators, government directives, or legislative changes. This included work that fell outside of MPI's internal strategic planning cycle but required coordinated delivery."

MPI filed PUB Figure 1-86d summarizing FY 2024/25 Focus Area Budgets across 8 main areas.

MPI has noted an updated IT Strategy and Road map is currently in progress to be updated and thus it is not included in the GRA27 application filing yet.

Question:

a) Please confirm whether full list of options for "Portfolio" for FY2025/26 continue to be:
   i. Strategic
   ii. Vitality
   iii. Managed Work
b) Please confirm which "Portfolio" "Renewal & Maintenance" should be mapped to.
c) Please file an updated Exhibit which includes the following information.
   i. Areas of Focus (similar to the eight provide in Figure 1-86d), revised, if applicable, for FY 2025/26.
   ii. Major Program status: "Yes" considered Major Program, "No", not considered Major Program.
   iii. BRM Utilized: "Yes", BRM is utilized, "No" BRM is not utilized.

Rationale for Question:

To clarify definitions of content included within the CPFS and to gather the additional information requested as per PUB Order 19.

RESPONSE:

a) and b) As explained in the response to *PUB Figure 1-86d*, for fiscal year 2025/26, MPI retained the same structure but revised the nomenclature to Strategic, Renewal & Maintenance (formerly Vitality), and External Stakeholder Insertions (formerly Managed Work).

c) i. As per the response to *PUB Figure 1-86a*, "MPI confirms that "Funding Envelopes" were removed entirely from funding planning in the 2025/26 fiscal year.

ii. Refer to the first column, labelled "Project Category", in *IT Appendix 9 Corporate Project Listing*. This column categorizes the projects listed by Major Programs, Non-Major Programs Projects with approved budgets >=$500,000, and Projects with approved budgets between $100K and $499K.

iii. Refer to the column labelled Benefit Realization Plan Status, in *IT Appendix 9 Corporate Project Listing*. This column provides the status of the BRM plan for each project. An "Approved" status is for on-going projects that have approved BRM plans. The "Approved – Benefit Tracking" status is for closed projects with a BRM plan that is within the first 12 months after project closure, with the benefits being measured and monitored. The "Not applicable - Approved Prior to FY2024/25" status is for projects that were approved prior to the BRM process and therefore do not have a BRM plan. The "Not applicable" status is for projects under $500 thousand.

PUB (MPI) 1-128

Part and Chapter:	Part VIII - Expenses	**Page No.:**	18-19
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	EXP.4 Corporate Project Funding Summary (CPFS) – Facilities and Technology Infrastructure		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – Expenses EXP.4, Corporate Project Funding Summary (CPFS) – Facilities and Technology Infrastructure, states that there are two types of CPFS expenditures: facilities and infrastructure, and technology expenditure related to corporate initiatives.

Part VIII – EXP Appendix 19: Corporate Project Expenses by Project does not distinguish between the two.

Question:

a) Please supply an updated Part VIII – EXP Appendix 19: Corporate Project Expenses by Project table with an additional column identifying each project as either "Facilities and Infrastructure" or "Technology Expenditure."

Rationale for Question:

To clarify CPFS project categorization assignments.

RESPONSE:

All projects listed in Part VIII – EXP Appendix 19: Corporate Project Expenses by Project are Technology Expenditures.

PUB (MPI) 1-129

Part and Chapter:	Part VIII – Expenses Appendix 18	**Page No.:**	5
PUB Approved Issue No:	18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap		
Topic:	Figure EXP App 18-2		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – EXP Appendix 18, Figure EXP App 18-2, Line No. 40 (Salaries and Overtime) records actual costs ranging from approximately $900K to $2,600K over the last five years. The forecast then steps up to $4,500K and holds at that level for the next four years.

Question:

a) Please explain the drivers underlying the forecast increase in Line No. 40 (Salaries and Overtime) to $4,500K, given historical costs ranged between approximately $900K and $2,600K over the preceding five years.

b) Please provide rationale of why the forecast is held constant at $4,500K across all four forecast years.

Rationale for Question:

To understand forecasted expenditures on Information Technology Salaries and Overtime.

RESPONSE:

a) $4,500,000 reflects the estimated compensation costs associated with the 50 initiative FTE (using an average $90,000 salary x 50 FTE). As MPI has an approved FTE ceiling of 2,089, all FTE (normal operations and initiative) are budgeted for. Vacancy due to normal staffing fluctuations throughout the year is reflected through the contra allowance of $3,500,000.

b) Refer to *PUB (MPI) 1-054 a)*. FTE are held through the forecast period at the 2,089 approved amount.

PUB (MPI) 1-130

Part and Chapter:	**Part II – COM Appendix 7** **Part VIII – EXP Appendix 14**	**Page No.:**	**1-153** **1-4**
PUB Approved Issue No:	**20. Road Safety**		
Topic:	**Road Safety**		
Sub Topic:	**Road Safety Strategy and Road Safety Program Costs**		

Preamble to IR (If Any):

Further to Part II, MPI conducted the 2026 Road Safety Technical Conference on June 18-19, 2026, reviewing comprehensive Road Safety Strategy and initiatives and reflecting considerable stakeholder input and feedback.

In Part VIII, Road Safety Program costs reflect underspending in recent years including 2025/26, and budget/forecasts from the 2026 GRA and the 2027 GRA remain consistent (with minor variances) for 2027/28 to 2029/30.

Question:

a) Given the gaps in timing between development of the Road Safety budget for 2027/28 (well before the June 24 2026 issuance of the GRA) and the date of the Road Safety Technical conference, does the Road Safety budget in Part II – COM Appendix 7 reflect all programs and initiatives articulated in and leading up to MPI's "Road Safety Strategy 2035 and Beyond"?

b) If MPI is anticipating escalating costs for Road Safety based on the results of the Road Safety Technical Conference, please refile COM Appendix 7 (and related schedules) with updated costs.

Rationale for Question:

To better understand how Road Safety costs may escalate with the new Road Safety Strategy.

RESPONSE:

a) Yes. The Road Safety budget reflected in Part II – COM Appendix 7 and Part VIII – EXP Appendix 14 is intended to support delivery of MPI's Road Safety Strategy 2026–2030 and reflects the programs and initiatives identified through the strategy development process.

While the 2026 Road Safety Technical Conference was held on June 18-19, 2026, the Road Safety Strategy was already in draft form that allowed for the considerations required for the 2027/28 budget development.

The purpose of the Technical Conference was to provide stakeholders with an overview of MPI's Road Safety Strategy 2026–2030, the engagement process, and planned Road Safety initiatives. The conference was not intended to serve as the primary mechanism for identifying or developing Road Safety programs after the budget had been established. Rather, it communicated work that had already been undertaken and that had informed the forecast included in the 2027 GRA.

MPI reviews and updates its Road Safety budget annually based on emerging road safety issues, research and evaluation findings, stakeholder input, and changes to planned Road Safety initiatives. As a result, individual programs and expenditures may evolve over time in future budget cycles. However, MPI does not currently anticipate a material escalation in Road Safety costs arising from the 2026 Road Safety Technical Conference.

b) N/A

PUB (MPI) 1-131

Part and Chapter:	Part II – COM Appendix 7	**Page No.:**	
PUB Approved Issue No:	20. Road Safety		
Topic:	Road Safety		
Sub Topic:	Road Safety Strategy and Road Safety Program Costs		

Preamble to IR (If Any):

Question:

a) Provide a quantitative assessment (with supporting data and methodology) of how MPI's road safety programs have affected claims frequency and severity trends in recent years and in the 2026/27–2030/31 forecast. Reconcile any claimed reductions to the loss trend assumptions in Part VI.

b) File a cost-benefit or return-on-investment analysis for major road safety programs over the past 3–5 years and for the test years, including total costs, claimed claims savings, and net impact on the revenue requirement and rate indication.

c) Explain how the findings from the new driver and vulnerable road user analyses are being incorporated into the claims forecasting model and loss trend selection for the 2027 GRA.

Rationale for Question:

To understand the cost/ benefit of road safety projects.

RESPONSE:

a) MPI undertakes road safety programming to prevent injuries and fatalities and to support the safe use of Manitoba's road network. MPI does not currently have a quantitative assessment of the impact of its road safety programs on claims frequency and severity. To the extent that road safety programs have contributed to changes in collision frequency or severity, those impacts would be reflected indirectly in the historical claims experience used to inform the loss trend analysis. MPI has not made an explicit adjustment to the loss trend assumptions in Part VI for the anticipated impact of road

safety programs. Accordingly, there are no claimed reductions to reconcile to the loss trend assumptions in Part VI.

b) MPI has not completed a comprehensive cost-benefit or return-on-investment analysis for major road safety programs over the past three to five years or for the test years that directly quantifies claims savings and the resulting net impact on the revenue requirement or rate indication.

Rather than assigning claims savings to individual programs, MPI evaluates road safety initiatives using a range of outcome and performance measures such as observed changes in driving behaviour and participation and program reach metrics.

c) The new driver and vulnerable road user analyses are being used primarily to support road safety planning, program design, and prioritization. These analyses help MPI identify higher-risk road user groups, behaviours, collision types, and potential intervention areas.

For the 2027 GRA, the findings from these analyses have not been incorporated as separate adjustments within the claims forecasting model or loss trend selection. MPI's actuarial forecasting process continues to rely on the factors described in Part VI.

Manitoba Public Insurance

2027 General Rate Application

Round 1 Information Requests

Consumers Coalition (CC)

MANITOBA
PUBLIC INSURANCE

CC (MPI) 1-1

Part and Chapter:	**Part II – Overview** **Part II – COM Appendix 4**	**Page No.:**	**Page 14** **Page 12**
Topic:	**Strategic Plan Execution and Cost Implications**		
Sub Topic:			

Preamble to IR (If Any):

Directive #13 from PUB Order 156/25 states: "In the 2027 GRA, MPI shall include updates to elements of the Strategic Plan based on evolving strategy…"

In the response to CC (MPI) 1-24 (h) from the MPI 2026 GRA proceeding, MPI indicated that it planned to revisit and update the Action Plan Roadmap associated with its multi-year strategic plan in the fall of 2025 as part of its annual business planning and to prioritize the multi-year initiative portfolio.

In the responses to CC (MPI) 1-24 (d) and (e) from the MPI 2026 GRA proceeding, MPI provided descriptions of the nature, status and outcomes of two supporting programs to the "Be Ready for What's Ahead" pillar of its multi-year strategic plan: (i) "Designing a Service Model for the Future" and (ii) "Adapting Products and Services to a Changing World".

In the response to CC (MPI) 1-24 (f) from the MPI 2026 GRA proceeding, MPI provided lists and descriptions of various strategic initiatives (carry-forward, strategic enablers, big and medium), as well as initiatives that had been cancelled, considered for other delivery approaches, paused or moved to future fiscal years to respect resource constraints.

In the response to CC (MPI) 1-24 (i) from the MPI 2026 GRA proceeding, MPI indicated that it was unable to provide the $ and FTEs included in the budget as a result of the implementation of the multi-year strategic plan, by supporting program or initiative.

In the response to CC (MPI) 1-24 (j) from the MPI 2026 GRA proceeding, MPI provided $ and FTEs for initiatives that were discontinued and removed from its budget as a result of the execution/implementation of its multi-year strategic plan.

In Part II – Overview, Section OV.6 (Conclusion) of the MPI 2027 GRA, page 14, MPI states that "Manitobans are directly shaping how MPI makes decisions, designs services, and allocates resources, with customer insight as the primary driver of strategy and execution. This customer-centric approach underpins the 2027 GRA."

In Part II – COM Appendix 4, Section 4 (From Year 1 Outcomes to Consistent Execution) of the MPI 2027 GRA, page 12, MPI indicated that in planning activities for the 2025/26 and 2026/27 fiscal years, it made deliberate decisions to narrow the scope of work to align with available capacity and elevate the priority of efforts rather than enable or directly impact corporate focus areas.

Question:

a) Please provide an update to CC (MPI) 1-24 (h) from the MPI 2026 GRA that requested an update to the 5-year Action Plan Roadmap associated with the execution/implementation of the MPI multi-year strategic plan filed by MPI in the 2026 GRA. As part of the response, please explain the reasons for changes to the sequencing and priority of programs and initiatives and the related implications for $ and FTEs for each of 2026/27, 2027/28 and 2028/29.

b) Please provide a detailed description of the customer insights that MPI is using as the primary driver of strategy and execution. As part of the response, please list each specific customer insight, the multi-year strategic plan pillar and supporting programs that respond to each customer insight and a status update on the progress towards execution of each of the related supporting programs for 2026/27 and 2027/28.

c) Please provide a detailed description of the most impactful (5 to 10) external transformative forces that are shaping/re-shaping the auto insurance industry in the next 5 to 10 years, using the PESTLE framework (political, economic, sociological, technological, legal and environmental).

d) Please describe how MPI's multi-year strategic plan and the "Be Ready for What's Ahead" strategic pillar is addressing the threats and opportunities that result from the

most impactful external transformative forces that are shaping/re-shaping the auto insurance industry (as described in part c of this information request).

e) Please provide an update to CC (MPI) 1-24 (d) from the MPI 2026 GRA proceeding that requested a detailed description of the nature, status and outcomes of any specific projects or initiatives that MPI has or is developing related to the supporting program “Designing a Service Model for the Future”, which was a supporting program listed under the “Be Ready for What’s Ahead” pillar of MPI’s multi-year strategic plan filed at the MPI 2026 GRA.

f) Please provide an update to CC (MPI) 1-24 (e) from the MPI 2026 GRA proceeding that requested a detailed description of the nature, status and outcomes of any specific projects or initiatives that MPI has or is developing related to the supporting program “Adapting Products and Services to a Changing World”, which was a supporting program listed under the “Be Ready for What’s Ahead” pillar of MPI’s multi-year strategic plan filed at the 2026 GRA.

g) Please provide an update to CC (MPI) 1-24 (f) from the MPI 2026 GRA that included lists and descriptions of (i) carryforward initiatives from the MPI Integrated Corporate Portfolio (ICP) (ii) initiatives classified as strategic enablers (iii) initiatives considered big and medium and (iv) initiatives that were deliberately cancelled, considered for other delivery approaches, paused or moved to future fiscal years to respect resource constraints.

h) Please provide an update to CC (MPI) 1-24 (i) from the MPI 2026 GRA and indicate if MPI is able to provide the $ and FTEs included in the budget as a result of the implementation of the multi-year strategic plan, by supporting program or initiative for (i) the 2026/27 fiscal Year (ii) the 2027/28 fiscal year and (iii) the 2028/29 fiscal year.

i) Please provide an update to CC (MPI) 1-24 (j) from the MPI 2026 GRA proceeding to provide $ and FTEs for initiatives that were discontinued and removed from the budget as a result of the implementation of the MPI multi-year strategic plan, by supporting program or initiative for (i) the 2026/27 fiscal Year (ii) the 2027/28 fiscal year and (iii) the 2028/29 fiscal year.

Rationale for Question:

To assess the implications for the current rate-setting process of the implementation of MPI's multi-year strategic plan and the implications on its budget process, operating expenses and cost containment initiatives.

RESPONSE:

a) The 5-Year Action Plan Roadmap included in MPI's Multi-Year Strategic Plan was intended as a high-level, illustrative view of the relative timing and scale of effort anticipated across key strategic programs and initiatives. The roadmap was developed to communicate the expected sequencing of major areas of focus and to provide a directional view of the modernization required to achieve the strategic outcomes outlined in the plan. At the time it was presented, MPI noted that the roadmap represented an initial view that would continue to evolve through annual planning, execution, and ongoing prioritization decisions.

MPI does not actively maintain the original roadmap as a detailed project management or Gantt-style artifact. While the roadmap illustrated major areas of strategic focus, delivery of the strategic plan occurs through a combination of Corporate Initiatives and ongoing operational activities across the organization. As implementation progresses, annual planning and portfolio governance processes have become the primary mechanisms for prioritizing, sequencing, and monitoring this work.

MPI continues to use the strategic pillars, associated programs, and Corporate Strategic KPIs established in the Multi-Year Strategic Plan as the foundation for annual business planning, performance management, and reporting. Through the annual planning process, Corporate Initiatives are identified, prioritized, and resourced based on strategic alignment, organizational capacity, emerging risks, regulatory requirements, and changing business conditions.

Progress against approved Corporate Initiatives within the Strategic Pillars is monitored and reported through MPI's quarterly strategic performance reporting and Integrated Corporate Portfolio governance processes. These reports provide visibility into active, completed, deferred, on-hold, and cancelled Corporate Initiatives, including supporting rationale where priorities, sequencing, or delivery plans have changed.

Together, the annual planning and quarterly reporting processes provide MPI's current and most accurate view of strategy execution and program delivery. While these processes track the organization's most significant Corporate Initiatives, they do not seek to centrally monitor every operational activity that contributes to the achievement of strategic outcomes. Rather, they focus on the highest-impact initiatives requiring enterprise-level governance, investment, and oversight while maintaining alignment with the strategic pillars and intended outcomes of the Multi-Year Strategic Plan.

Information related to Corporate Initiative funding, business cases, and resource requirements is reported through established governance, financial planning, and regulatory reporting processes, including business case submissions and related investment approvals, as applicable.

b) Customer insights are a key input into strategic planning prioritization and execution activities. Customer insights are also reflected in MPI's Strategic KPI framework through the Customer Satisfaction Key Areas KPI and Customer Confidence in MPI Mission Delivery KPI. These measures are intended to provide enterprise-level indicators of customer value and public trust, while operational initiatives and improvement efforts are designed and prioritized to address the underlying drivers identified through customer research and analysis.

Customer Insight	Strategic Outcome Area	Examples of Corporate Initiatives / Operational Efforts
Customers value timely service, reduced wait times, appointment availability, and shorter cycle times	Customer Value	End to End Adjusting Strategy Development and Implementation; Digital FNOL Enhancements; CCaaS – Agent Assist AI Call Summary/Transcript and Low Touch Enhancements; operational process improvements within claims and customer service delivery
Customers require clearer information and improved preparedness throughout their journey	Customer Value	Public Website Wayfinding Enhancements; Digital FNOL Enhancements; operational customer service training

Customers value ease of interaction and convenient access to services	Customer Value	Driver Z Registration by appointment window; Defining Core Portal Capabilities; E-Signature – Broker Roll out and Transaction Expansion
Customers expect respectful treatment and to feel valued throughout interactions	Customer Value	CCaaS – Agent AI Call Summary/Transcript; operational customer service training and continuous operational improvements aligned to journey-specific driver analysis
Customers want confidence that MPI is delivering on its mission, including affordable rates, exceptional coverage, exceptional service, and safer roads	Corporate Responsibility	Digital FNOL Enhancements; Trucking Telematics Program; New Impaired Driving Countermeasures; New Policy Wording; operationalizing the implementation of the Road Safety Strategy and Indigenous Action Plan

c) Not applicable; MPI has not conducted a formal PESTLE analysis and does not have one to provide or share.

d) Not applicable, see part c.

e) The strategic program Designing a Service Model for the Future continues to progress and remains focused on ensuring MPI's future service delivery model aligns with customer expectations, operational sustainability, organizational capacity, and evolving service channel needs.

Since the 2026 GRA, work has advanced in two primary areas: development of a comprehensive Winnipeg facility and service delivery assessment, and implementation of a formal customer experience and operational performance target-setting framework.

As described in the 2026 GRA, the first phase of the program focused on establishing a fact-based understanding of current service delivery performance and network requirements. During 2025/26 and 2026/27, MPI solicited a comprehensive Facility Utilization and Service Delivery Assessment covering its Winnipeg service delivery footprint. The assessment was conducted with external consultants and included review of service delivery operations, facility utilization, customer service locations, and related operational requirements.

At the time of filing, no decisions have been made regarding future service delivery or facility changes. The study results will represent both the completion of the current-state assessment phase and the consideration of future service delivery design work envisioned under the program.

MPI also completed the CX and Operations Performance Blueprint initiative in 2025/26, which established a formal methodology for developing service standards and associated performance targets. The initiative brought together customer experience, operational policy, process, and analytics perspectives to create a consistent framework for target setting and performance measurement.

The framework was initially piloted using Class 5 road test wait times, resulting in a formalized service standard and supporting performance measures.

Since that time, the methodology has been operationalized and incorporated into ongoing business practices. The framework has also strengthened integration between customer experience insights and operational performance information, supporting more consistent performance threshold setting and quarterly CX and operational performance reporting. The initiative has transitioned from a discrete project into an ongoing management practice used to establish and monitor service standards across the organization.

Through these initiatives, MPI has strengthened its understanding of current service delivery performance, established a repeatable and evidence-based approach to service standard development, and developed future service delivery scenarios that will inform longer-term planning. Collectively, this work continues to advance the objectives of the Designing a Service Model for the Future program by improving the connection between customer expectations, operational performance, service standards, and future service delivery planning.

f) MPI has made progress on the work committed under the Adapting Products and Services to a Changing World program (Pillar 5: Be Ready for What's Ahead).

Since the MPI 2026 GRA, MPI has continued to mature its approach to product development, product review, and long-term product planning. This work supports the evaluation, prioritization, and delivery of product and service changes required to respond to

evolving customer expectations, emerging technologies, changing operating conditions, stakeholder feedback, and legislative or regulatory requirements. This includes a combination of product reviews, service enhancements, coverage modernization reviews, road safety-related changes, customer experience improvements, and legislative and regulatory initiatives. These initiatives are integrated into divisional and corporate planning, portfolio management, and governance processes.

Current and recent work includes modernization of programs such as the Fleet Program, development of new customer offerings and coverage options, enhancements to Personal Injury Protection Plan (PIPP) benefits, improvements to customer-facing tools and communications, assessment of emerging vehicle technologies, and evaluation of potential product and coverage changes intended to improve affordability, fairness, usability, safety, and customer value.

This work is informed by multiple sources, including customer feedback, customer research, operational experience, jurisdictional reviews, environmental scanning, and ongoing engagement with external stakeholders and partners. Product reviews and development activities incorporate input from organizations such as the Coalition of Manitoba Motorcycle Groups (CMMG), industry stakeholders, municipal and government partners, and other groups affected by MPI products and services. This engagement helps ensure future product and service changes remain aligned with evolving customer and stakeholder needs.

An important component of this work has been the proactive assessment of legislative and regulatory changes. While legislative and regulatory initiatives represent only one element of the broader product work, they are critical to the successful implementation of many product and service changes. The legislative and regulatory work positions MPI for future government decisions and policy changes, supports proactive planning and prioritization, and enables MPI to assess operational, technology, service delivery, and customer impacts in advance. This helps ensure product enhancements, coverage changes, service improvements, and regulatory requirements can be coordinated and delivered through a structured and integrated planning process.

g) As part of the evolution of MPI's Strategy-to-Execution (S2E) planning, prioritization, and governance framework, the initiative classifications of "strategic enablers" and "big/medium" used in prior annual planning cycles are no longer applied across initiatives. MPI has adopted a simplified approach of centrally capturing and managing Corporate Initiatives in the Integrated Corporate Portfolio and managing operational priorities at the divisional level which offers appropriate visibility and governance for the respective efforts. *Appendix 1 - Confidential* includes an update as requested by providing a description of currently active, deferred, cancelled, and carry-forward Corporate Initiatives that were identified through the 2025/26 and 2026/27 business planning process as well as Corporate Initiatives added after 2026/27 planning.

h) MPI refers to its response to CC (MPI) 1-24(i) from the 2026 GRA. As explained in that response, MPI does not budget or forecast operating expenses and FTEs by strategic plan pillar, supporting program or individual strategic initiative in the manner requested.

For the 2027 GRA forecast period, MPI has not added or removed FTEs as a result of the multi-year strategic plan. Total corporate FTEs have been held flat at the Treasury Board approved 2,089 level through the forecast period. Accordingly, while MPI continues to sequence, prioritize and resource Corporate Initiatives through its normal budget and initiative governance processes, there are no new or removed FTEs embedded in the forecast that can be separately identified as being added because of the implementation of the multi-year strategic plan. When selecting initiatives for a given fiscal year, MPI acknowledges and prioritizes regular core business activities before contemplating additional efforts. Corporate Initiatives are only selected based on available capacity within MPI's existing FTE count after core business operations are resourced.

MPI also notes that the 2027 GRA filing provides additional project-level information for technology-related initiatives. In particular, *Part V IT Appendix 9* lists corporate projects and includes business case references and supporting information for IT initiatives over $100,000, consistent with PUB direction. That appendix should be read together with the expense forecast materials and the initiative expense appendices filed in the 2027 GRA. Those materials provide the project and business case context for the corporate initiative

portfolio, but they do not represent the addition or removal of new FTEs beyond the approved 2,089 FTE complement.

i) MPI refers to its response to CC (MPI) 1-24(j) from the 2026 GRA and response h) above. To the extent initiatives were discontinued, cancelled, paused, moved to a future fiscal year or otherwise removed from the budget, those changes were addressed in the 2026 GRA response and reflect MPI's effort to align work to available capacity, affordability and strategic priority. The response clarified that MPI was not adding new FTEs for the implementation of the multi-year strategic plan; rather, divisions were expected to manage within existing budgets and FTE capacity by reprioritizing work, sequencing initiatives and sunsetting or deferring lower-priority activities where required.

Active Initiatives Carried-Forward from 2025/26

Title	Description
Build New Road Safety Dashboard for Stakeholders	MPI will develop a public dashboard for road safety data by 2026. This initiative addresses requests from key stakeholders—including the Province of Manitoba, City of Winnipeg, and PUB intervenors—for more timely and accurate collision data. The dashboard will enhance regulatory compliance, strengthen stakeholder trust, and support informed decision-making. It aligns with MPI's strategic goals by improving transparency, reinforcing relationships with government partners, and advancing corporate social responsibility through accessible road safety insights.
Driver Z Registration by Appointment Window	In response to a high-volume of in-erson visits on Driver Z registration day MPI will restructure the registration process to disperse demand over several Appointment Windows, followed by a general registration. Customers will be grouped and assigned to an Appointment Window with set start/end dates. The number of customers assigned to each group will be carefully managed to ensure that they are each guaranteed a seat and to account for service level capacity within their area.
[REDACTED]	**[REDACTED]**
MyMPI Foundation and IRP Online	MPI is enabling IRP customers to securely manage their accounts online through the MyMPI portal. This initiative expands digital services, improves data security and quality.
ERP - Assessment and Planning	With MPI's ERP contract ending, a gap assessment is needed to compare current processes in People & Culture and Finance to their target states. This will identify what's needed for a successful ERP replacement and support MPI's operational effectiveness goals.
SRE Remediation – SIS Reversion	The intent of the SIS Reversion is to discontinue creating new policies in the current implementation of Duck Creek. Upon renewal, new tems will be created in the SIS system. This is required to alleviate operational pressures caused by an unstable implementaiton of Duck Creek.
SRE Remediation – SRE Data Quality	Data Quality related elements of SRE remediation program.
Upgrade Bodily Injury Claims Management System (BI3)	**[REDACTED]**
ERP Replacement – Infor Upgrade	**[REDACTED]**

Foundational setup for Enterprise Data Platform – Phase 1 and 2	The foundational setup will enable a scalable, flexible environment that not only addresses current gaps—such as missing data elements and insufficient quality controls—but also creates a pathway for future, enterprise-wide adoption. Although this project centers on the consumers of Special Risk Extension data, the longer-term strategic vision extends beyond these initial stakeholders. Over time, MPI intends to roll these enhanced data capabilities out to the broader organization, ensuring that all business units eventually benefit from a unified, drill-down capable data ecosystem that supports informed decision-making, operational excellence, and long-term growth.
Active Initiatives Planned for 2026/27	
Title	
CCaaS - Agent Assist AI Call Summary / Transcript & Low Touch Enhancements (Five9)	Building on MPI's transition to the Five9 Contact Center as a Service (CCaaS) platform, this initiative advances Phase 2 capabilities by introducing AI-powered tools that improve both customer service delivery and employee efficiency. The initial focus is implementing Five9 Agent Assist Call Transcription and Summary, which automatically generates call transcripts and editable summaries, reducing the manual effort, inconsistencies, and delays associated with note-taking. The initiative will also leverage AI-driven insights, sentiment analysis, and compliance monitoring to provide deeper visibility into customer interactions, operational performance, and emerging trends. Together, these capabilities will enhance agent productivity, improve the quality and consistency of customer information, and support data-driven service improvements across the organization.
Digital FNOL Solution	The core business opportunity is to redesign the digital FNOL (First Notice of Loss) experience to be clearer, more intuitive, and better aligned to customer needs and expectations, while also improving the experience of frontline employees who support customers throughout the claims intake process. By simplifying navigation, improving accessibility, reducing redundancy, tailoring the flow to reflect the nature of the loss, and providing clearer confirmation and next step guidance, MPI can create a more supportive and transparent intake journey
E-Signature - Broker Rollout & Transaction Expansion	E-Signature Broker Rollout & Transaction Expansion will modernize and streamline customer transactions by enabling secure digital signatures for broker-initiated services, reducing reliance on manual paper-based processes. By replacing print, sign, scan, and email workflows with a more seamless digital experience, the initiative will improve convenience for customers, increase operational efficiency for brokers, and accelerate transaction completion. Expanding e-signature capabilities across additional transaction types supports MPI's broader digital service strategy while enhancing service quality and accessibility.
New Policy Wording	New Policy Wording will support the review and modernization of SRE policy documentation to ensure it remains current, clear, and aligned with evolving industry practices. By leveraging specialized reference tools and resources, the initiative aims to strengthen policy consistency, improve maintainability, and support effective risk management.
Defining Core Portal Capabilities	Defining Core Portal Capabilities will build on the foundation established through the MyMPI initiative by defining a strategic roadmap for the evolution of MPI's digital portal experience. The initiative will assess customer feedback and business priorities to identify and sequence the highest-value next steps to leverage the MyMPI portal. By establishing a clear direction for future efforts, the roadmap will help reduce fragmented development efforts, improve user experience, and maximize the value of existing digital capabilities.
Legislative and Regulatory Efforts 1 - DVA Fee Adjustments	Regulatory initiative to implement provincially approved fee changes for select DVA products and services by updating MPI systems, processes, and financial controls to ensure accurate fee collection, regulatory compliance, and financial reporting.

E2E Adjusting Strategy Implementation	End-to-End Adjusting Implementation builds on the foundational discovery and planning work completed through the End-to-End Adjusting Strategy initiative and focuses on translating that vision into operational change. The initiative will modernize adjusting operations through changes that enhance consistency, efficiency, and accountability across the claims journey. By redesigning approaches that were established to meet past needs, MPI will be better positioned to support evolving customer expectations, employee experience, and claim complexity. The result will be a more streamlined, customer-focused adjusting model that reduces friction, improves service delivery, and strengthens organizational performance.
Legislative and Regulatory Efforts - 2 (FY 26/27)	REDACTED
Legislative and Regulatory Efforts - 4 (FY 26/27)	REDACTED
Trucking Telematics Program	Trucking Telematics Program will leverage real-time vehicle and driving data to provide commercial trucking customers with proactive safety insights and value-added services. The initiative is designed to help carriers identify and address risk earlier, supporting safer driving behaviours and reducing the frequency and severity of high-impact losses. By shifting from a reactive to a more proactive approach to safety, MPI can strengthen customer engagement, enhance the value provided to commercial carriers, and support more informed risk management decisions. Over time, the program will also establish a stronger foundation for data-driven insights that can inform future strategies.
ROADS (Cornerstone) Replacement	ROADS (Cornerstone) Replacement will identify and implement a future-state solution to replace the existing ROADS platform, which is approaching end of contract and product end-of-life. The initiative is focused on maintaining critical organizational structure capabilities that support reporting, planning, and day-to-day workforce navigation across MPI. In considering broader technology modernization efforts, including ERP transformation, the project will assess options that ensure continuity of service, reduce technical risk, and support ongoing operational and regulatory reporting needs. This initiative is intended to establish a sustainable path forward while preserving key business functionality.
Impaired Driving Countermeasures	New Impaired Driving Countermeasures will implement the legislative changes introduced through Bill 31 – The Highway Traffic Amendment Act, ensuring MPI's driver licensing, enforcement, suspension, prohibition, ignition interlock, and compliance management processes align with updated legal requirements. The initiative supports the operational and regulatory changes required to administer the new framework and maintain legislative compliance across impacted programs and services.
Identified in 2026/27 but Deferred to Future Fiscal	
Title	**Description**
Credit Card Fees	Credit Card Fees will evaluate options related to the cost and administration of credit card payment services as part of MPI's ongoing efforts to manage operating expenses and support sustainable service delivery. The initiative will assess potential approaches and associated impacts while ensuring alignment with regulatory, operational, and customer considerations.
Frontline Employee Privacy	Frontline Employee Privacy will explore opportunities to enhance privacy protections for customer-facing employees while maintaining appropriate business and regulatory requirements. The initiative aims to support a safe and secure work environment by reviewing how employee information is presented during customer interactions and identifying options that balance employee well-being with operational needs.
Cancelled 2026/27 Initiatives	
Title	**Description**

Implement Electronic Certificate of Inspection (eCOI)	MPI will replace paper inspection certificates with digital eCOIs to reduce fraud, improve oversight, and support future system integration. This shift aligns with other provinces and responds to customer demand for a more modern, efficient process. This specific initiative identified a solution that is no longer being pursued. A new solution to replace paper inspection certificates will be advanced as part of 2027/28 annual planning.
Legislative and Regulatory Efforts - #3	REDACTED

CC (MPI) 1-2

Part and Chapter:	**Part VIII – EXP Appendix 22** **Part VIII – EXP Appendix 22a**	**Page No.:**	**Pages 3 and 4** **Pages 2 and 5**
Topic:	**Top-Down Operating Expense Budget Process**		
Sub Topic:			

Preamble to IR (If Any):

Directive #14 from PUB Order 156/25 states: "MPI shall file financial information on its top-down operating expense targets, bottom-up targets, and alignment process as part of its minimum filing requirements in future GRAs."

In the response to CC (MPI) 1-25 (d) from the MPI 2026 GRA proceeding, MPI provided Executive Committee quantitative financial guidance (top-down guidance) on operating expenses by expenditure type, operating expenses by division and FTEs by division.

In Part VIII – EXP Appendix 22, Section 2.4 (Operating Expenses), pages 3 and 4, MPI provides a high-level qualitative overview of its Operating Expense Budget Process, indicating that operating expenses are subject to a combined top-down and bottom-up approach to ensure alignment and highlights the following with respect to the **Top-Down** budget approach:

- Top-Down Guidance is established by the Executive Committee (EC) which reflects any direction received from Treasury Board (TB); and
- Alignment at the EC level is then disseminated to individual business units as a guard rail on department budget expectations.

Part VIII - EXP Appendix 22a, pages 1 to 7, appears to provide the qualitative EC Top-Down guidance related to the 2027/28 Corporate Operating Expense Budget Process, which indicates the following:

- It had an approved over-budget FTE allocation of 40 for 2026/27, which is being maintained within existing FTE salary dollars (page 2);
- The senior-leadership team approved a list of 2027/28 initiatives from the Executive offsite in November 2025 (page 5); and
- Flat ceilings on FTE and operating expenses have been identified (page 5).

Question:

a) Please explain why MPI did not file quantitative financial information on its top-down, bottom-up and alignment operating expense budget processes as part of its 2027 GRA filing, as directed by the PUB in Order 156/25, Directive #14.

b) Further to the information requested in part a, please explain why Part VIII – Appendix 22a for the MPI 2027 GRA did not provide the tables of quantitative financial information related to EC top-down guidance with respect to operating expenses by expenditure type, operating expenses by division and FTEs by division – similar to the information that was provided in the response to CC (MPI) 1-25 (d), Appendix 1 from the MPI 2026 GRA proceeding.

c) Please describe any changes to the operating expense budget process (top-down guidance, bottom-up exercise and alignment process) that MPI made for the 2027/28 budget process.

d) Please confirm (or explain otherwise) if Part VIII - EXP Appendix 22a represents the totality of the Top-Down operating expense guidance issued by EC related to the 2027/28 budget process. If not confirmed, please provide the Top-Down operating expense guidance issued by EC related to the 2027/28 budget process.

e) Please provide (i) the total top-down Operating Expense ($) target from the EC for each MPI division and the corporation in total for 2026/27, 2027/28 and 2028/29 and (ii) the total top-down FTE target from the EC for each MPI division

and the corporation in total for 2026/27, 2027/28 and 2028/29 (consistent with the response to CC (MPI) 1-25 (d), Appendix 1 from the MPI 2026 GRA).

f) Please explain if there were any corporate stretch targets or negative contingencies that were intended to offset cost pressures, set expectations of productivity and contain Operating Expenses set by the Executive Committee

for 2026/27, 2027/28 and 2028/29 on an overall corporate wide basis (not specifically allocated to a division) and if so, quantify the stretch targets for each year in terms of Operating Expenses ($) and FTEs.

g) Please explain if there were any corporate allowances or positive contingencies for additional process improvement initiatives or new capabilities, set by the Executive Committee for 2026/27, 2027/28 and 2028/29 on an overall corporate wide basis (not specifically allocated to a division) and if so, quantify the corporate allowance for each year in terms of Operating Expenses ($) and FTEs.

h) Please explain how many of the 40 over-budget FTEs for surge capacity that MPI is forecast to use in the 2026/27 fiscal year will actually be used and provide the $ of this surge capacity that is forecast to be used for 2026/27 and the $ that is not forecast to be used in 2026/27.

i) Please confirm (or explain otherwise) if the MPI operating expense budget for 2027/28 includes 40 over-budget FTEs for surge capacity. If it does, please provide the $ in the 2027/28 operating expense budget related to this 40 over-budget FTE surge capacity.

j) Please provide the list and descriptions of the senior leadership team approved initiatives for 2027/28.

k) Please elaborate and quantify what “flat ceilings on FTE and operating expenses” means for the 2027/28 operating expense budget in terms of total $ and total FTEs. As part of the response, please clarify if the flat ceilings on FTE and operating expenses for 2027/28 are (i) flat to 2026/27 forecasts of actual

FTEs and operating expenses provided by MPI at the current 2027 GRA, (ii) flat to 2026/27 forecasts of FTEs and operating expenses provided at the MPI 2026 GRA proceeding or (iii) flat to some other baseline.

Rationale for Question:

To gain an understanding of the MPI Top-Down operating expense budget approach, process and outcomes related to the 2027 GRA.

RESPONSE:

a) MPI refers to response *CC (MPI) 1-3(a)*, which addresses the same budgeting framework from the bottom-up and alignment perspective, and to the previously filed 2026 GRA responses, including CC (MPI) 1-25(d), CC (MPI) 1-26(b), (e), (f) and (g), and CC (MPI) 2-2. MPI also refers to the 2027 GRA materials filed at *Part VIII EXP Appendix 22* and *Part VIII EXP Appendix 22a*. Those materials collectively describe MPI's combined top-down and bottom-up operating expense budget process, the role of Executive Committee guidance as a guardrail, and the alignment process used to assess proposed operating expenses and FTEs against corporate priorities, affordability, operational requirements, risk, timing and organizational capacity.

b) The 2027 GRA filing included the applicable budget process framework and Executive Committee guidance in *Part VIII EXP Appendix 22* and *Part VIII EXP Appendix 22a*, "Use of the prior 2026 GRA forecast as a reference point".

c) There were no material changes to the overall operating expense budgeting process for the 2027/28 budget process. This is consistent with MPI's response to *PUB (MPI) 1-34* and the prior 2026 GRA responses to CC (MPI) 1-26 and CC (MPI) 2-2. MPI continues to use a combined top-down and bottom-up approach. Executive Committee establishes enterprise-level guidance for operating expenses and staffing, departments prepare submissions based on operating requirements, initiative plans, known contractual obligations, expected cost pressures and resource needs, and the resulting

budget is reviewed and aligned through the Executive Committee process before approval.

d) *Part VIII EXP Appendix 22a* represents the Executive Committee operating expense guidance filed for the 2027/28 budget process, to be read together with the broader budgeting framework in *Part VIII EXP Appendix 22* and the expense forecasts and supporting schedules filed in *Part VIII Expenses Chapter*.

e) The 2027 GRA filing included the applicable budget process framework and Executive Committee guidance in *Part VIII EXP Appendix 22* and *Part VIII EXP Appendix 22a*, "Use of the prior 2026 GRA forecast as a reference point". Please see Appendix 1.

f) MPI refers to the 2026 GRA response to CC (MPI) 2-2 (g) and (h) and *Part VIII EXP Appendix 22a* in the 2027 GRA.

g) MPI refers to the response to part (f), the 2026 GRA response to CC (MPI) 1-25 (h), and– *Part VIII EXP Appendix 22a* in the 2027 GRA.

h) The Corporation is not tracking surge capacity and is operating within the Treasury Board approved 2,089 Corporate headcount.

i) The treatment of vacancy and surge capacity is embedded in the salary budgeting process and is not a separate operating expense line item that can be isolated independently from the filed compensation forecast without reperforming the underlying budget model.

j) MPI does not currently have a finalized list of approved 2027/28 corporate initiatives. The Corporation is in the process of its annual planning and prioritization cycle. The Executive Committee is scheduled to meet in September 2026 to review and prioritize potential corporate initiatives for 2027/28. As part of that alignment process, leadership reviews current corporate initiatives that are expected to carry-over in 2027/28, previously identified initiatives, and potential new additions in order to support prioritization and trade-off discussions across the overall portfolio of work to achieve

strategic KPI milestones. Following that workshop, selected initiatives will undergo further analysis to determine solution options and estimated resource requirements. An additional workshop is planned for November 2026 to assess feasibility of the full potential portfolio of corporate initiatives and associate resource requirements against organizational and financial capacity, as well as strategic alignment. Decisions will be made during the November workshop regarding which initiatives will proceed into business casing and considered as a finalized list of approved 2027/28 corporate initiatives.

k) MPI refers to *Part VIII EXP Appendix 22a*, which explains that the prior 2026 GRA forecast served as a directional reference point and not an automatic baseline, and to the 2027 GRA expense and staffing schedules filed in *Part VIII Expenses Chapter*. The reference to flat ceilings on FTE and operating expenses means that the initial budget guidance was intended to constrain the 2027/28 budget development process and require departments to justify requirements rather than assume automatic carry-forward of prior forecast amounts. The final approved forecast reflects the outcome of the normal budget process, including bottom-up submissions, Executive Committee review, alignment to corporate priorities and updates for known cost pressures and forecast assumptions. FTE are held at the 2,089 approved 2026/27 budget through the forecast period.

CC (MPI) 1-2

Part and Chapter:	**Part VIII – EXP Appendix 22** **Part VIII – EXP Appendix 22a**	**Page No.:**	**Pages 3 and 4** **Pages 2 and 5**
Topic:	**Top-Down Operating Expense Budget Process**		
Sub Topic:			

Preamble to IR (If Any):

Directive #14 from PUB Order 156/25 states: "MPI shall file financial information on its top-down operating expense targets, bottom-up targets, and alignment process as part of its minimum filing requirements in future GRAs."

In the response to CC (MPI) 1-25 (d) from the MPI 2026 GRA proceeding, MPI provided Executive Committee quantitative financial guidance (top-down guidance) on operating expenses by expenditure type, operating expenses by division and FTEs by division.

In Part VIII – EXP Appendix 22, Section 2.4 (Operating Expenses), pages 3 and 4, MPI provides a high-level qualitative overview of its Operating Expense Budget Process, indicating that operating expenses are subject to a combined top-down and bottom-up approach to ensure alignment and highlights the following with respect to the **Top-Down** budget approach:

- Top-Down Guidance is established by the Executive Committee (EC) which reflects any direction received from Treasury Board (TB); and
- Alignment at the EC level is then disseminated to individual business units as a guard rail on department budget expectations.

Part VIII - EXP Appendix 22a, pages 1 to 7, appears to provide the qualitative EC Top-Down guidance related to the 2027/28 Corporate Operating Expense Budget Process, which indicates the following:

- It had an approved over-budget FTE allocation of 40 for 2026/27, which is being maintained within existing FTE salary dollars (page 2);
- The senior-leadership team approved a list of 2027/28 initiatives from the Executive offsite in November 2025 (page 5); and
- Flat ceilings on FTE and operating expenses have been identified (page 5).

Question:

l) Please explain why MPI did not file quantitative financial information on its top-down, bottom-up and alignment operating expense budget processes as part of its 2027 GRA filing, as directed by the PUB in Order 156/25, Directive #14.

m) Further to the information requested in part a, please explain why Part VIII – Appendix 22a for the MPI 2027 GRA did not provide the tables of quantitative financial information related to EC top-down guidance with respect to operating expenses by expenditure type, operating expenses by division and FTEs by division – similar to the information that was provided in the response to CC (MPI) 1-25 (d), Appendix 1 from the MPI 2026 GRA proceeding.

n) Please describe any changes to the operating expense budget process (top-down guidance, bottom-up exercise and alignment process) that MPI made for the 2027/28 budget process.

o) Please confirm (or explain otherwise) if Part VIII - EXP Appendix 22a represents the totality of the Top-Down operating expense guidance issued by EC related to the 2027/28 budget process. If not confirmed, please provide the Top-Down operating expense guidance issued by EC related to the 2027/28 budget process.

p) Please provide (i) the total top-down Operating Expense ($) target from the EC for each MPI division and the corporation in total for 2026/27, 2027/28 and 2028/29 and (ii) the total top-down FTE target from the EC for each MPI division

and the corporation in total for 2026/27, 2027/28 and 2028/29 (consistent with the response to CC (MPI) 1-25 (d), Appendix 1 from the MPI 2026 GRA).

q) Please explain if there were any corporate stretch targets or negative contingencies that were intended to offset cost pressures, set expectations of productivity and contain Operating Expenses set by the Executive Committee

for 2026/27, 2027/28 and 2028/29 on an overall corporate wide basis (not specifically allocated to a division) and if so, quantify the stretch targets for each year in terms of Operating Expenses ($) and FTEs.

r) Please explain if there were any corporate allowances or positive contingencies for additional process improvement initiatives or new capabilities, set by the Executive Committee for 2026/27, 2027/28 and 2028/29 on an overall corporate wide basis (not specifically allocated to a division) and if so, quantify the corporate allowance for each year in terms of Operating Expenses ($) and FTEs.

s) Please explain how many of the 40 over-budget FTEs for surge capacity that MPI is forecast to use in the 2026/27 fiscal year will actually be used and provide the $ of this surge capacity that is forecast to be used for 2026/27 and the $ that is not forecast to be used in 2026/27.

t) Please confirm (or explain otherwise) if the MPI operating expense budget for 2027/28 includes 40 over-budget FTEs for surge capacity. If it does, please provide the $ in the 2027/28 operating expense budget related to this 40 over-budget FTE surge capacity.

u) Please provide the list and descriptions of the senior leadership team approved initiatives for 2027/28.

v) Please elaborate and quantify what “flat ceilings on FTE and operating expenses” means for the 2027/28 operating expense budget in terms of total $ and total FTEs. As part of the response, please clarify if the flat ceilings on FTE and operating expenses for 2027/28 are (i) flat to 2026/27 forecasts of actual

FTEs and operating expenses provided by MPI at the current 2027 GRA, (ii) flat to 2026/27 forecasts of FTEs and operating expenses provided at the MPI 2026 GRA proceeding or (iii) flat to some other baseline.

Rationale for Question:

To gain an understanding of the MPI Top-Down operating expense budget approach, process and outcomes related to the 2027 GRA.

RESPONSE:

a) MPI refers to response *CC (MPI) 1-3(a)*, which addresses the same budgeting framework from the bottom-up and alignment perspective, and to the previously filed 2026 GRA responses, including CC (MPI) 1-25(d), CC (MPI) 1-26(b), (e), (f) and (g), and CC (MPI) 2-2. MPI also refers to the 2027 GRA materials filed at *Part VIII EXP Appendix 22* and *Part VIII EXP Appendix 22a*. Those materials collectively describe MPI's combined top-down and bottom-up operating expense budget process, the role of Executive Committee guidance as a guardrail, and the alignment process used to assess proposed operating expenses and FTEs against corporate priorities, affordability, operational requirements, risk, timing and organizational capacity.

b) The 2027 GRA filing included the applicable budget process framework and Executive Committee guidance in *Part VIII EXP Appendix 22* and *Part VIII EXP Appendix 22a*, "Use of the prior 2026 GRA forecast as a reference point".

c) There were no material changes to the overall operating expense budgeting process for the 2027/28 budget process. This is consistent with MPI's response to *PUB (MPI) 1-34* and the prior 2026 GRA responses to CC (MPI) 1-26 and CC (MPI) 2-2. MPI continues to use a combined top-down and bottom-up approach. Executive Committee establishes enterprise-level guidance for operating expenses and staffing, departments prepare submissions based on operating requirements, initiative plans, known contractual obligations, expected cost pressures and resource needs, and the resulting

budget is reviewed and aligned through the Executive Committee process before approval.

d) *Part VIII EXP Appendix 22a* represents the Executive Committee operating expense guidance filed for the 2027/28 budget process, to be read together with the broader budgeting framework in *Part VIII EXP Appendix 22* and the expense forecasts and supporting schedules filed in *Part VIII Expenses Chapter*.

e) The 2027 GRA filing included the applicable budget process framework and Executive Committee guidance in *Part VIII EXP Appendix 22* and *Part VIII EXP Appendix 22a*, "Use of the prior 2026 GRA forecast as a reference point". Please see Appendix 1.

f) MPI refers to the 2026 GRA response to CC (MPI) 2-2 (g) and (h) and *Part VIII EXP Appendix 22a* in the 2027 GRA.

g) MPI refers to the response to part (f), the 2026 GRA response to CC (MPI) 1-25 (h), and– *Part VIII EXP Appendix 22a* in the 2027 GRA.

h) The Corporation is not tracking surge capacity and is operating within the Treasury Board approved 2,089 Corporate headcount.

i) The treatment of vacancy and surge capacity is embedded in the salary budgeting process and is not a separate operating expense line item that can be isolated independently from the filed compensation forecast without reperforming the underlying budget model.

j) MPI does not currently have a finalized list of approved 2027/28 corporate initiatives. The Corporation is in the process of its annual planning and prioritization cycle. The Executive Committee is scheduled to meet in September 2026 to review and prioritize potential corporate initiatives for 2027/28. As part of that alignment process, leadership reviews current corporate initiatives that are expected to carry-over in 2027/28, previously identified initiatives, and potential new additions in order to support prioritization and trade-off discussions across the overall portfolio of work to achieve

strategic KPI milestones. Following that workshop, selected initiatives will undergo further analysis to determine solution options and estimated resource requirements. An additional workshop is planned for November 2026 to assess feasibility of the full potential portfolio of corporate initiatives and associate resource requirements against organizational and financial capacity, as well as strategic alignment. Decisions will be made during the November workshop regarding which initiatives will proceed into business casing and considered as a finalized list of approved 2027/28 corporate initiatives.

k) MPI refers to *Part VIII EXP Appendix 22a*, which explains that the prior 2026 GRA forecast served as a directional reference point and not an automatic baseline, and to the 2027 GRA expense and staffing schedules filed in *Part VIII Expenses Chapter*. The reference to flat ceilings on FTE and operating expenses means that the initial budget guidance was intended to constrain the 2027/28 budget development process and require departments to justify requirements rather than assume automatic carry-forward of prior forecast amounts. The final approved forecast reflects the outcome of the normal budget process, including bottom-up submissions, Executive Committee review, alignment to corporate priorities and updates for known cost pressures and forecast assumptions. FTE are held at the 2,089 approved 2026/27 budget through the forecast period.

MPI Exhibit #21 – CC (MPI) 1-2 Appendix 1

Please refer to Figure 1 and 2 below for the forecasted operating expense and FTE by Division for 2027/28 in 2027 GRA and 2026 GRA, respectively.

CC (MPI) 1-3

Part and Chapter:	**Part VIII – EXP Appendix 22** **Part VIII – EXP Appendix 22a**	**Page No.:**	**Pages 1, 2 and 4** **Page 1**
Topic:	**Bottom-Up and Alignment Operating Expense Budget Processes**		
Sub Topic:			

Preamble to IR (If Any):

Directive #14 from PUB Order 156/25 states: "MPI shall file financial information on its top-down operating expense targets, bottom-up targets, and alignment process as part of its minimum filing requirements in future GRAs."

In the response to CC (MPI) 1-26 (e) to (g) from the MPI 2026 GRA proceeding, MPI provided operating expense $ budgets and FTE budgets that resulted from the bottom-up budget exercise, adjustments from the EC alignment process and explanations of the EC adjustments.

In Part VIII – EXP Appendix 22, pages 1 and 2, MPI indicates:

- Operating budgets are set annually, by LOB, utilizing MPI's fiscal year-end results, assumptions based on historical averages and all plausible changes expected in the future;
- Budgets are set for a single fiscal period and funds that are unspent over the course of a year lapse and, if still required, form part of a subsequent budget submission; and
- MPI prepares a five-year forecast – with the annual budget being the first-year of the forecast.

In Part VIII – EXP Appendix 22, Section 2.4 (Operating Expenses), page 4, MPI provides a high-level overview of its Operating Expense budget process, and states that operating expenses are subject to a combined top-down and bottom-up approach to ensure alignment and indicates that as part of the **Bottom-Up** budget approach, the bottom-up

exercise reflects department operating and initiative plans, budget and resource requirements while aligning to the guidance/constraints provided. MPI also indicates that as part of the **Alignment Process** – business unit budgets are aggregated and presented to Executive Committee (EC) for final alignment – where competing tradeoffs for resources, if any, between departments are resolved.

In Part VIII – EXP Appendix 22a (Use of the Prior 2026 GRA Forecast as a Reference Point), page 1, MPI indicates that "…your previously identified forecasted requirements from the last year's budget cycle should serve as a directional reference point, not a baseline, and should not be assumed or automatically carried forward without justification".

Question:

a) Please provide a detailed description of (i) how the departmental bottom-up budget process was undertaken (ii) how the alignment process occurred at the Executive Committee for the 2027 MPI GRA as it relates to the years 2026/27, 2027/28 and 2028/29 and (iii) how competing tradeoffs for resources between departments are resolved.

b) Please explain under the current EC operating expense guidance, if department or divisional management are expected to adhere/manage to their Executive Committee approved forecasts other than the first-year detailed budget or if the departments are able to re-budget for the forecast years in the subsequent fiscal year budget process.

c) If the response to information request part b is that departments are able to re-budget in the subsequent fiscal year budget process, please explain if MPI has considered developing multi-year year Operating Expense detailed budgets which departmental management is expected to adhere/manage to - in order to allow for a longer-term perspective by departmental management and please provide commentary on MPI's views on the advantages and disadvantages of such an approach to budgeting.

d) Please explain why MPI did not provide quantitative financial information similar to the responses to CC (MPI) 1-26 (e) to (g) from the MPI 2026 GRA proceeding as part of the 2027 GRA filing – in order to demonstrate the functioning and outcomes related to the bottom-up and EC alignment operating expense budget process and comply with PUB directive #14 from Order 156/25.

e) Please provide (i) the total Operating Expense budgets ($) that resulted from the departmental bottom-up budget exercise (before alignment to Executive Committee top-down targets) for each MPI division and the corporation in total for 2026/27, 2027/28 and 2028/29 and (ii) the total FTE budgets that resulted from the departmental bottom-up budget exercise (before alignment to Executive Committee top-down targets) for each MPI division and the corporation in total for 2026/27, 2027/28 and 2028/29 (consistent with the response to CC (MPI) 1-26 (e) from the MPI 2026 GRA proceeding).

f) Please provide (i) the total Operating Expense adjustments ($ increase or decrease) that resulted from the final alignment by Executive Committee for each MPI division and the corporation in total for 2026/27, 2027/28 and 2028/29 and (ii) the total FTE adjustments (increase or decrease) that resulted from the final alignment by Executive Committee for each MPI division and the corporation in total for 2026/27, 2027/28 and 2028/29. Please also quantify the overall positive or negative contingencies that are embedded in the corporate Operating Expense forecasts for 2026/27, 2027/28 and 2028/29 in order to achieve the Executive Committee top-down targets (consistent with the response to CC (MPI) 1-26 (f) from the MPI 2026 GRA proceeding).

g) Please provide an explanation of the final alignment adjustments made by Executive Committee for each MPI division for 2026/27, 2027/28 and 2028/29 that were provided in the response to part e of this information request. As part of the explanations, please discuss how assessment of key priorities and risks are involved in determining the Executive Committee adjustments to Operating

Expenses ($ and FTEs) (consistent with the response to CC (MPI) 1-26 (g) of the MPI 2026 GRA proceeding).

Rationale for Question:

To gain an understanding of the MPI bottom-up and Alignment Process Operating Expense budget approach, process and outcomes related to the 2027 GRA.

RESPONSE:

a) MPI refers the reader to its previously filed responses in the 2026 GRA, including CC (MPI) 1-26(b) and CC (MPI) 2-2, and to the 2027 GRA application materials filed at Part VIII – EXP Appendix 22 and EXP Appendix 22a. The departmental bottom-up budget process has not materially changed. Departments develop budget submissions based on their operating requirements, initiative plans, staffing and resource needs, known contractual obligations, and other expected cost pressures, while considering the guidance and constraints communicated through the Executive Committee process. For the 2027 GRA, this process also used the prior 2026 GRA forecast as a directional reference point, consistent with EXP Appendix 22a, but not as an automatic baseline to be carried forward without justification.

The Executive Committee alignment process is also addressed in the previously filed 2026 GRA responses to CC (MPI) 1-26(b), (f) and (g), and further discussed in CC (MPI) 2-2. Business unit budgets are aggregated and reviewed at the corporate level, and Executive Committee assesses whether the resulting budget is reasonable, achievable, aligned with corporate priorities, and reflective of organizational capacity. Competing trade-offs between departments are resolved through that process, taking into account operational needs, affordability, strategic priorities, risk, timing, and MPI's capacity to execute the planned work. The same principles apply to the 2027 GRA forecast years 2026/27, 2027/28 and 2028/29.

b) MPI refers to its previously filed response to CC (MPI) 1-26(c) and (d) and the further explanation provided in CC (MPI) 2-2 (l) and (m) in the 2026 GRA.

c) MPI refers to its previously filed response to CC (MPI) 1-26 (d) and the further explanation provided in CC (MPI) 2-2 (l) and (m) in the 2026 GRA.

d) MPI refers to the previously filed 2027 GRA application, including Part II – Compliance with PUB Orders and Part VIII – EXP Appendix 22 and EXP Appendix 22a. MPI complied with Directive #14 from Order 156/25 by filing information on the top-down operating expense guidance, the bottom-up budgeting approach, and the Executive Committee alignment process.. MPI also notes that similar information was previously provided in the 2026 GRA responses to CC (MPI) 1-25(d), CC (MPI) 1-26(e) to (g), and CC (MPI) 2-2. To the extent the request is seeking the same type of quantitative information previously requested and provided in the 2026 GRA, MPI's position is that the process and nature of the information have already been addressed in the prior responses and in the 2027 GRA materials filed.

e) MPI does not track the requested bottom-up budget information at the level of discrete divisional versions or adjustment histories proposed in this question. The budget is developed through an iterative, months-long process involving ongoing discussions with Vice-Presidents and their teams as assumptions, operating requirements, initiative plans, staffing needs, contractual obligations, affordability considerations, and corporate priorities are refined. As a result, there is not a single, static bottom-up version that is appropriate to compare against the final proposed budget in the manner requested.

f) For the same reasons, MPI does not track Executive Committee alignment adjustments as discrete increases or decreases by division and year in the manner requested. Alignment occurs through continuous engagement with Vice-Presidents and their teams throughout the budget cycle, rather than through a single final adjustment entry or mechanical allocation. Multiple working versions may exist during the process, but those interim iterations are not the budget being proposed in this proceeding. The relevant budget is the total corporate budget ultimately advanced by Management and approved by the Board, which reflects the weighted needs of the Corporation after

considering operational requirements, affordability, risk, capacity, timing, and corporate priorities.

g) MPI does not prepare a separate explanation of final alignment adjustments for each division because the process is not managed as a set of discrete divisional adjustments. MPI is not seeking to amend its process to accommodate a set of discrete divisional adjustments. Doing so would create an onerous level of work effort for the same outcome. The assessment of priorities and risks is embedded in the ongoing budget discussions with Vice-Presidents and their teams and in the Executive Committee review of the corporate budget as a whole. Those discussions consider the relative importance, timing, affordability, risk, and deliverability of proposed operating and initiative spending. The outcome of that process is the total corporate operating expense budget proposed by the Board. That approved corporate budget, rather than interim working versions or notional adjustments between versions, is the budget that MPI is asking the PUB to consider.

CC (MPI) 1-4

Part and Chapter:	**Part VIII – EXP Appendix 6** **Part VIII – EXP Appendix 9** **Part VIII – EXP Appendix 20**	**Page No.:**	**Pages 5 and 6** **Page 2** **Page 2**
Topic:	**Changes in the Level of Corporate FTEs**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – EXP Appendix 6, MPI presents the following variances between the 2025/26 budget at the MPI 2026 GRA proceeding and 2025/26 actual results for the current MPI 2027 GRA:

- For Corporate – salaries are approximately $9.5 million higher than budgeted (EXP Appendix 6, page 5, line 2); and
- For Basic – Salaries are approximately $5.2 million higher than budgeted (EXP Appendix 6, page 6, line 27).

In Part VIII – Expenses, MPI provides information on the level of corporate FTEs (by division and in total), as follows:

- 2025/26 Total Actual FTE = 2,041.3 (EXP Appendix 9, page 2, line 42);
- 2025/26 Total Budgeted FTE = 2,088.8 (EXP Appendix 9, page 2, line 53);
- Total 2025/26 Actual vs. 2025/26 Budgeted FTE = 47.5 under budget (2,041.3 – 2,088.8) (EXP Appendix 9, page 2).
- 2026/27 Total Budgeted FTE = 2,088.8 (EXP Appendix 20, page 2, line 6); and
- Total 2026/27 Budgeted vs. 2025/26 Actual FTE = 47.5 increase (2,088.8 – 2,041.3) (EXP Appendix 20, page 2).

Question:

a) Please provide detailed variance explanations by division for the over budget or under budget FTEs between the 2025/26 actual FTEs and the 2025/26 budgeted FTEs – which total 47.5 FTEs under budget on an overall corporate basis.

b) Please explain the reasons for the $9.5 million unfavorable variance (higher than budgeted at 2026 GRA) in salaries for Corporate in 2025/26 and the $5.2 million unfavorable variance (higher than budgeted at the 2026 GRA) in salaries for Basic in 2025/26 – considering that total corporate FTEs were 47.5 under budget for 2025/26.

c) Please provide detailed explanations by division for the increase or decrease in FTEs between the 2025/26 actual FTEs and the 2026/27 budgeted FTEs – which total a 47.5 increase on an overall corporate basis.

d) Please provide the $ increase in the 2026/27 operating expense budget as a result of the 47.5 increase in budgeted FTEs to 2088.8.

Rationale for Question:

To understand the reasons for variance between actual and budgeted FTEs for 2025/26 and 2026/27 regarding cost of operations & cost containment measures.

RESPONSE:

a) The fluctuation in FTE by department/division (increases or decreases) is a result of normal business and staff movement including balancing FTE within Directorates/Divisions based on operational requirements and leave of absences, temporary assignments or turnover that result in positions potentially being vacant or filled at a point in time.

b) Please refer to *Figure 1* below.

Figure 1 Salary Change – 2025/26 BF vs Actuals

Line No.	Description	2026GRA 2025/26BF	2027GRA 2025/26A	Change
1	Salaries-Regular	172,630	170,566	(2,064)
2	Salaries-Regular-North Allow	100	93	(7)
3	Salaries-Regular-Standby	440	543	103
4	Salaries-Regular-Shift	129	109	(20)
5	Salaries-Regular-Apprentices	124	-	(124)
6	Salaries-Accrued	-	840	840
7	Salaries-Recovery	-	(66)	(66)
8	Salaries-Maternity Benefit	899	983	84
9	Salaries-Vacation Buy-out	61	24	(37)
10	Sal-Sev/Retirement Pay-outs	2,737	2,143	(594)
11	Salaries-Sick Leave Provision	245	703	458
12	Salaries-Vacation Payout	-	1,800	1,800
13	Salaries-Banked Vacation	423	718	295
14	Salaries-Downtown Allowance	561	526	(35)
15	Salaries-Flex Spending Account	866	914	48
16	Sal-Retirement Allowance Prov	(678)	2,134	2,812
17	Salaries-Accrued Vacation	717	772	55
18	Corporate Vacancy Provision	(6,000)	-	6,000
19	**Total**	**173,254.00**	**182,802.00**	**9,548.00**

c) The changes in FTEs by division for actual vs budget is a point in time and reflects timing of staff hiring and position fills and can vary at any given point depending on when roles are filled, staff turnover and recruitment.

d) The corporate FTE budget has remained flat at 2,088.8, there has not been an increase of 47.5 FTE to budgeted FTE and therefore no associated increase to the 2026/27 operating expense budget.

CC (MPI) 1-5

Part and Chapter:	**Part II – COM Appendix 3** **Part II – COM Appendix 4** **Part VIII – EXP Appendix 24**	**Page No.:**	**Pages 3 to 9 and 13** **Pages 1, 2, 5, 15 and 18** **Page 1**
Topic:	**MPI's use of Key Performance Indicators (KPIs)**		
Sub Topic:			

Preamble to IR (If Any):

In Order 156/25, at page 128, the PUB found that "…the absence of a consistent, strategic link between KPIs and the Strategic Pillars limits the Board's ability to evaluate whether MPI's financial and operational activities are producing the outcomes described in its Strategic Plan."

Directive #11 from PUB Order 156/25 states: "MPI shall file a comprehensive update to its KPIs at the 2027 GRA."

Directive #12 from PUB Order 156/25 states: "In the 2027 GRA, MPI shall provide analysis and measurements against the Multi-Year Strategic Plan, and report on the development of KPI targets. This will include details as to how MPI's KPI system is integrated into the Corporation's Strategic Plan with KPI's mapped to Strategic Pillars."

In the response to CAC (MPI) 1-29 (e) from the MPI 2025 GRA proceeding, MPI indicated that its introduction of Objectives and Key Results (OKRs) did not follow best practices of limiting OKRs to only strategic work and as such the initial rollout of OKRs was unsuccessful.

In the response to CAC (MPI) 1-28 (i) from the MPI 2026 GRA proceeding, MPI indicated that it did not intend to re-introduce OKRs as a component of its performance measurement system at this time. The approach taken at the time was broad in scope and lacked integration with business planning and resource allocation processes. As a

result, the volume of objectives quickly became unfocused and difficult to manage, leading to limited accountability and follow-through.

In the response to CC (MPI) I-28 (a) from the MPI 2026 GRA proceeding, MPI indicated that it had confirmed a set of eight strategic measures aligned to the five corporate focus areas as follows:

- Affordability: (1) average insurance premium as a % of median income;
- Financial Stability: (2) MCT by line of business;
- Organizational Effectiveness: (3) employee engagement score (4) technology risk score (5) % planned work completed (6) expense dollar per vehicle registered;
- Customer Value: (7) customer experience index; and
- Corporate Responsibility: (8) customer confidence in MPI's mission delivery.

In Part II – COM Appendix 3, pages 3 to 9, MPI indicates that it has set seven strategic measures aligned to the five corporate focus areas as follows:

- Affordability: (1) average insurance premium as a % of average income;
- Financial Stability: (2) MCT by line of business;
- Organizational Effectiveness: (3) employee engagement score (4) % planned work completed within schedule (5) expense ratio;
- Customer Value: (6) customer satisfaction (i) physical damage claims (ii) bodily injury claims (iii) insurance & registration and (iv) driver testing; and
- Corporate Responsibility: (7) customer confidence in MPI's mission delivery.

In Part II – COM Appendix 3 – MPI provides/indicates the following:

- As claims grow faster than operating expenses in a break-even model, operating costs naturally represent a smaller share of revenue, even without efficiency gains (page 7); and
- A 10-year history of the average insurance premium as a % of average income that ranges between 2.01% (2024/25) and 2.42% (2019/20). The average

growth rate of average annual income is 2.96% from 2015/16 to 2024/25 and the 2024/25 average annual income is $59,824 (page 13).

In Part II – COM Appendix 4, MPI indicates the following:

- The focus has been on selecting strategic KPI targets that are meaningful, stable over time, and directly connected to the outcomes in the five strategic pillars and corporate focus areas (Section 2. Setting Meaningful Milestones, page 1);
- For 2025/26, the primary objective was to begin building reliable baselines using historical and current performance (Section 2.1 Approach to KPIs and Milestones, page 2);
- For 2026/27, the focus shifts to publication and formalization of initial annual milestones tied to realistic delivery expectations (Section 2.1 Approach to KPIs and Milestones, page 2);
- For 2027/28, MPI expects increased maturity in its KPI framework supported by greater stability in annual milestones informed by trend data (Section 2.1 Approach to KPIs and Milestones, page 2);
- The affordability metric is supported by strong historical context as the ratio of premiums to income has remained within a relatively narrow range, demonstrating consistency and stability. The historical performance informed the establishment of a milestone threshold of less than 2.25% based on historical experience and customer feedback indicating that insurance has remained affordable within this range (Section 2.4 Focus on Affordability, page 5);
- MPI's strategic KPIs are aligned to the corporate focus areas (affordability, financial stability, organizational effectiveness, customer value and corporate responsibility) rather than directly to the strategic pillars (focus on our customers, build engagement and pride, deliver on our promises, strengthen our financials and be ready for what's ahead). This is an intentional design choice. (Section 5 Alignment of Strategic KPIs to Corporate Focus Areas, page 15); and
- As initiatives are added, deferred or re-sequenced based on capacity, the KPIs remain stable and continue to provide a clear view of progress (Section 5.3 Complimentary Roles of Pillars and KPIs, page 18).

In Part VIII – EXP Appendix 24, figure EXP App 24-1 at page 1, MPI lists a summary of Key Performance Indicators, reproduced below:

Figure EXP App 24-1
Summary of Key Performance Indicators with Calculation Details and Frequency

Line No	Key Performance Indicator (KPI)	Calculation Description	Frequency
1	Basic MCT	Basic: Total Minimum Capital Available / Total Minimum Capital Required	Quarterly
2	Corporate - Gross Combined (Partially Discounted) Ratio	(Total Insurance Service Expense + Operating Expenses) / Total Insurance Revenue	Monthly
3	Corporate - Gross Combined (Fully Discounted) Ratio	((Total Insurance Service Expense + Operating Expenses) - (Net Insurance Financial Result) / Total Insurance Revenue	Monthly
4	Corporate - Total Expense Ratio %	((Acquisition Expense + Maintenance Expense + Operating Expense) / Revenue from Premiums	Monthly
5	Basic - Gross Combined (Partially Discounted) Ratio	(Total Insurance Service Expense + Operating Expenses) / Total Insurance Revenue	Monthly
6	Basic - Gross Combined (Fully Discounted) Ratio	((Total Insurance Service Expense + Operating Expenses) - (Net Insurance Financial Result) / Total Insurance Revenue	Monthly
7	Basic - Total Expense Ratio %	((Acquisition Expense + Maintenance Expense + Operating Expense) / Revenue from Premiums	Monthly
8	Corporate - Loss Ratio %	Incurred Claims / Revenue from Premiums	Monthly
9	Basic - Loss Ratio %	Incurred Claims / Revenue from Premiums	Monthly
10	Corporate - Average Cost Per Claim	Corporate Incurred Claims before Reinsurance / # Corporate Claims	Yearly
11	Basic - Average Cost Per Claim	Basic Incurred Claims before Reinsurance / # Basic Claims	Yearly
12	Claims Count Ratio	Monthly Average Claims Reported / Monthly Average Claims Support FTEs	Monthly

Question:

a) Please provide MPI's understanding of the differences between OKRs and KPIs in terms of their primary purpose, nature, focus, scope and duration. As part of the response, please also provide MPI's understanding of how OKRs and KPIs can be complimentary and how they can be used together in an effective performance measurement system.

b) Please explain why MPI has chosen to measure progress towards execution of its multi-year strategic plan using KPIs which tend to measure steady state performance and operational/financial health (current mission) - and not OKRs that are designed to drive time-bound transformational change and strategic alignment and are more closely associated with a corporate strategy (future vision).

c) Please explain why MPI is primarily focused on stability as the key driver in the design of its performance measurement system and related strategic KPI milestones and not aspirational or ambitious targets that are more associated with strategy. As part of the response, pleased explain which of the strategic KPIs does MPI consider as representing stretch targets.

d) Recognizing that MPI has chosen to design its performance measurement system and related KPIs around its areas of focus and not its strategic pillars – please explain how the MPI selected seven strategic KPIs incorporate and measure progress towards its strategic pillar to "Be Ready for What's Ahead".

e) Please provide the customer feedback that MPI has obtained that indicates that an historical ratio of premiums to income of 2.25% is considered to be affordable.

f) Please explain if MPI has obtained feedback from lower income customers to understand what ratio of premiums to income this portion of MPI's customer base would consider affordable. If not, please explain why MPI has not considered lower income customers in its design of an affordability metric.

g) Please explain why MPI changed the strategic KPI to measure affordability from Average Insurance Premium as a % of Median Income at the MPI 2026 GRA proceeding to Average Insurance Premium as a % of Average Income at the MPI 2027 GRA. As part of the response, please provide any data and calculations that MPI has which compares the indicative milestone of the ratio using median income as compared to average income and provide MPI's views on the pros and cons of using median or average income in this affordability ratio.

h) Please provide the average insurance premium data for 2015/16 to 2024/25 that was used by MPI to create the Average Insurance Premium as a % of Average Income graph located on page 13 of Part II – COM Appendix 3.

i) Please confirm (or explain otherwise) if the 2.25% milestone for the premium as a % of income KPI has been derived as a simple average of the 10-years from

2015/16 to 2024/25 (2.19%) and rounded to 2.25%. As part of the response, please also explain if MPI considered setting the milestone for this metric closer to the 2.01% actual ratio for 2024/25 or giving additional weight to the more current historical actual ratio results that had declined from a high of 2.42% in 2019/20 to 2.01% in 2024/25.

j) Please provide the following calculations for 2025/26 to 2028/29: (i) the $59,824 average income for 2024/25 escalated by 3% on an annual basis (ii) the average insurance premium for each of the years that would correspond to a 2.25% ratio of the average insurance premium to average income (iii) the corresponding annual premium increase for each of the years to produce a 2.25% ratio (iv) the corresponding cumulative annual premium increase from 2025/26 to 2028/29 and (v) the corresponding even annual premium increase for the period from 2025/26 to 2028/29. As part of this response, please provide MPIs views on whether the calculated even annual premium increase associated with a 2.25% milestone is a reasonable target from a customer affordability perspective and represents an aspirational milestone or a milestone that is easily achievable given that the current ratio is around 2.01%.

k) Please explain why MPI chose a Planned Work Completed Within Schedule metric with an 80% milestone in 2026/27 and 2027/28 – instead of a Planned Work Completed Within Budget metric – as a strategic KPI for Organizational Effectiveness.

l) Please explain why MPI chose an Expense Ratio metric as a strategic KPI for Organizational Effectiveness given the limitation noted by MPI that as claims grow faster than operating expenses in a break-even model, operating costs naturally represent a smaller share of revenues, even without efficiency gains.

m) Please explain why MPI chose not to implement the Technology Risk Score metric and Expense Dollar per Vehicle Registered metric that it had confirmed at the MPI 2026 GRA proceeding as being part of the eight strategic measures that it had selected.

n) Please explain why the milestones MPI set related to customer satisfaction key areas of driver testing, damage claims and bodily injury claims that range between 70% and 71% by 2027/28 are acceptable to MPI given they are much lower than the 85% milestone set for insurance and registration.

o) Please explain how and if the seven chosen strategic KPIs (described in Part II – COM Appendix 3 and 4) integrate and are complimentary to (i) the five claims cost KPIs (described in Part II – COM Appendix 2) and (ii) the 12 budgeting framework KPIs (described in Part VIII – EXP Appendix 24). As part of the response, please explain how these 3 distinct KPI frameworks integrate into MPI's overall performance measurement system.

Rationale for Question:

To gain an understanding of MPI's performance measurement system and the selection and use of performance metrics and KPIs to measure progress towards strategy, inform decision making and contain operating expenses.

RESPONSE:

a) KPIs and OKRs are both recognized performance management frameworks, but they serve different purposes.

KPIs are enduring measures used to monitor organizational performance and assess whether results are improving, stable or declining over time. Their primary purpose is to provide a consistent view of organizational health and performance across areas such as affordability, financial stability, organizational effectiveness, customer value and corporate responsibility.

KPIs are generally broad in scope and remain stable over multiple years. This consistency allows an organization to establish baselines, identify trends, compare performance over time and assess whether sustained improvement is occurring. In this sense, KPIs operate as an organizational scoreboard.

When supported by annual targets and milestones, KPIs also serve a more active management function. They focus organizational effort, align teams around shared outcomes and establish clear performance expectations for the year. The underlying measures remain stable, while the associated targets and milestones can be adjusted to reflect the level of progress expected within a specific period.

OKRs are a time-bound goal-setting framework that combines a defined objective with a set of measurable key results. Similar to KPIs, their primary purpose is to focus effort, align teams and drive progress toward a specific outcome within a defined period. OKRs are generally narrower in scope than corporate KPIs and may change as strategic priorities, challenges and opportunities evolve.

MPI understands KPIs and OKRs to be complementary rather than competing frameworks. KPIs provide the stable performance information needed to understand current conditions, establish credible baselines and identify areas where focused improvement may be required. OKRs can then use that evidence to define specific, measurable and time-bound outcomes.

In this way, KPIs can be an enabler of effective OKRs. Without reliable performance measures and established baselines, key results may be set without sufficient evidence or context. When used together, KPIs provide the ongoing organizational scoreboard and clear annual performance expectations, while OKRs translate selected priorities into focused objectives and measurable results over a defined period.

b) As outlined in MPI's response to 2026 GRA CC (MPI) 1-28, MPI does not intend to re-introduce OKRs (Objectives and Key Results) as a component of its performance management system at this time.

MPI recognizes that OKRs can be an effective tool for driving organizational focus and advancing specific strategic outcomes. However, MPI's previous experience with OKRs demonstrated that the framework was not sufficiently integrated with business planning, resource allocation, and governance processes to achieve the intended results. As

noted previously, the approach became broad in scope, difficult to manage, and resulted in limited accountability and follow-through.

Rather than reintroducing OKRs, MPI has continued to advance the integrated strategy execution approach described in its prior response. This approach is designed to provide the same benefits sought through an OKR framework including visibility, alignment, prioritization, and accountability while being better aligned with MPI's current level of organizational maturity and governance practices.

A foundational element of this approach is the use of strategic KPIs. While KPIs are often associated with monitoring performance over time, they also play an important role in enabling effective strategy execution. Strategic KPIs provide consistent measurement, establish reliable baselines, support trend analysis, and improve understanding of the factors that influence strategic outcomes.

MPI considers this performance measurement foundation to be a prerequisite for setting meaningful objectives and targets. Without a clear understanding of baseline performance and the drivers of results, it is more difficult to establish credible improvement targets or assess progress toward transformational outcomes.

c) MPI’s focus on stability should be understood in the context of establishing a performance measurement framework that is manageable, shareable, and recognizable across the organization and over time. The intent is not to avoid ambition, but to ensure that performance is being assessed through measures and milestones that are well understood, consistently applied, and capable of supporting meaningful trend analysis across multiple planning cycles.

As the framework matures, MPI is focused on building confidence in the measures being used, the baselines against which performance is assessed, and its understanding of the factors that influence long-term outcomes. This approach enables more informed decision-making, supports organizational alignment, and provides a consistent basis for evaluating progress.

MPI's milestones were established to be meaningful, reasonably paced, and reflective of both historical performance and expected progress. Enterprise-wide improvements often take time to materialize, and performance expectations must be grounded in an understanding of organizational capacity, approved initiatives, and the pace at which strategic outcomes can reasonably be influenced.

More broadly, MPI views the strategic KPI framework as a decision-support tool that will continue to mature as additional trend data and organizational experience are gained. Stability, in that sense, is not about preserving particular metrics or targets indefinitely, but about maintaining a disciplined approach to assessing performance and adapting where necessary.

MPI did not use the term "stretch targets" when establishing strategic KPI milestones. Rather, the milestones were established using a consistent approach focused on building reliable baselines, supporting long-term performance measurement, and demonstrating initial progress towards achieving the outcomes identified in the Corporate Strategic Plan. The intent was to establish meaningful milestones in the first few years of strategic plan implementation to inform future year milestone setting based on actual trajectory.

d) MPI intentionally designed its strategic KPI framework around the five corporate focus areas rather than creating a direct one-to-one linkage between individual strategic pillars and specific KPIs. The strategic pillars act as a portfolio management structure to keep track of the specific work occurring to drive the strategy forward, while the strategic KPIs are intended to measure the outcomes and impacts resulting from the execution of the Corporate Strategic Plan. As a result, initiatives undertaken within a particular strategic pillar may contribute to performance across multiple strategic KPIs and focus areas.

This is particularly true for the "Be Ready for What's Ahead" pillar. The pillar is intended to keep track of effort related to supporting MPI's preparedness for future opportunities and challenges through activities such as modernization, capability building, risk management, and organizational readiness. While MPI has not established a dedicated

KPI exclusively for this pillar, work undertaken within the pillar is expected to positively influence a number of strategic KPIs.

For example, modernization and process improvement initiatives undertaken as part of the "Be Ready for What's Ahead" pillar may improve employee tools, workflows, and organizational capabilities, contributing to improvements in employee engagement and the percentage of planned work completed within schedule. Similarly, investments that strengthen organizational resilience, technology capabilities, and risk management practices may support the Corporation's long-term financial health and its ability to maintain capital adequacy targets. Improvements to internal processes and service delivery capabilities may also contribute to better customer experiences and increased customer confidence in MPI's mission delivery.

Accordingly, MPI views the strategic KPIs as measuring the cumulative impact of activities undertaken across all strategic pillars, including "Be Ready for What's Ahead," rather than as measures that are attributable to a single pillar in isolation.

e) MPI’s affordability milestone was informed by both customer feedback and historical affordability performance. As part of a 2024 quantitative research study of 1,608 Manitobans, 73% of respondents indicated that vehicle insurance in Manitoba is affordable.

Additionally, MPI does not view the 2.25% affordability milestone as a target to be achieved. Rather, it represents an affordability ceiling or threshold intended to serve as an early indicator of affordability pressures. The objective of the KPI is to maintain the ratio of average insurance premiums to average income below 2.25%, with results above that threshold indicating an opportunity for further review and action. Consistent with the intent of the KPI, the focus is on monitoring affordability trends over time and ensuring affordability outcomes remain within an acceptable range.

f) MPI has not obtained customer feedback specifically from lower-income Manitobans to determine what ratio of premiums to income that segment of the customer base would consider affordable. The affordability milestone was established

using historical premium-to-income data and customer feedback regarding affordability at an aggregate level, rather than feedback segmented by income group.

g) MPI replaced Average Insurance Premium as a % of Median Income with Average Insurance Premium as a % of Average Income to improve the practicality and sustainability of the measure as a strategic KPI. While both measures provide insight into affordability, average income data is available through Statistics Canada's Survey of Employment, Payrolls and Hours (SEPH) on a regular basis, allowing MPI to monitor performance, establish annual milestones, and assess trends over time. By comparison, median income data is primarily available through census-based reporting and is updated less frequently, making it less suitable for a KPI intended to support ongoing performance measurement and annual reporting.

MPI's objective in selecting average income was not to materially change the underlying affordability concept, but rather to ensure that the measure is supported by timely, consistently available data that allows for meaningful monitoring and trend analysis over multiple planning cycles.

h) Please see response to 2027 GRA *PUB (MPI) 1-2.*

i) MPI does not view the 2.25% milestone as a target to be achieved, rather, the 2.25% milestone represents a ceiling or affordability threshold intended to act as an early indicator of affordability pressures.

MPI's historical experience demonstrates that the ratio of average insurance premiums to average income has generally remained below this level. As a result, the objective of the KPI is not to achieve a 2.25% ratio, but instead to maintain affordability by remaining below it.

The threshold was established using historical performance trends, affordability context, and customer feedback. It is intended to serve as a monitoring and decision-support tool that enables MPI to identify and respond to affordability pressures should the ratio

begin to trend upward towards the 2.25% ceiling over time. In this regard, both the trend line and the 2.25% ceiling provide important signals regarding affordability performance.

MPI therefore does not consider the fact that recent results have been below 2.25% to indicate that the threshold is easily achievable or unnecessary. Rather, the threshold reflects a level at which affordability concerns would warrant increased scrutiny and a trend line that approaches this threshold would introduce proactive actions to understand and address the factors contributing to the upward trend.

Consistent with MPI's broader strategic KPI philosophy, the affordability KPI is intended to provide a stable, long-term measure of performance. The value of the measure lies not in reaching a specific target value, but in monitoring trends over time and providing an indication of whether affordability outcomes remain within an acceptable range.

j) The calculations requested demonstrate the premium levels that would correspond to a ratio of average insurance premiums to average income of 2.25%. However, MPI does not view 2.25% as a target to be achieved or a premium growth objective. Rather, the 2.25% milestone represents an affordability ceiling or threshold intended to act as an early indicator of affordability pressures

The objective of the affordability KPI is to maintain the ratio of average insurance premiums to average income below 2.25%, not to increase premiums until the ratio reaches that level. Accordingly, MPI does not consider the premium increases implied by a 2.25% ratio to be a reasonable target for customer affordability, nor was the milestone established for that purpose. Instead, the threshold is intended to support ongoing monitoring of affordability trends and provide an indication of when affordability outcomes may warrant additional review and consideration.

k) MPI selected the "% of Planned Work Completed Within Schedule" KPI because it is intended to measure the effectiveness of the Corporation's prioritization, planning, and execution processes in delivering strategic work. The KPI provides insight into whether MPI is appropriately aligning the volume of work undertaken in a given fiscal year with available organizational capacity and making the necessary trade-offs to focus

resources on the highest-value initiatives. In this regard, the measure is designed to reflect the rigor of organizational decision-making and MPI's ability to consistently deliver on the commitments it chooses to pursue.

The KPI is not intended to measure project management performance at the individual initiative level, but rather to provide an enterprise-level view of whether MPI is selecting and executing a realistic portfolio of work. A higher percentage of planned work completed within schedule indicates that priorities, resources, and organizational capacity are being effectively aligned, while lower performance may indicate that the Corporation has taken on more work than can reasonably be delivered or that priorities require re-evaluation.

As such, the intended use of the KPI was determined to be best represented through a % of Planned Work Completed Within Schedule.

l) MPI acknowledges the limitation that, within a break-even insurance model, claims costs may at times grow more quickly than operating expenses, resulting in operating expenses representing a smaller proportion of revenues even in the absence of underlying efficiency gains. MPI considered this dynamic during the development of its strategic KPI framework.

Notwithstanding this limitation, MPI selected Expense Ratio as a strategic KPI because it continues to provide a useful enterprise-level indicator of operating efficiency when assessed relative to historical performance, established baselines, and targeted milestones. Rather than being interpreted as a standalone measure of efficiency, the metric is intended to be evaluated over time to understand whether operating expenses are being appropriately managed relative to the overall scale of the business.

The value of the metric is not derived from a single year's result, but from its ability to provide a consistent basis for trend analysis and performance monitoring across multiple planning cycles. By establishing baselines and future milestones, MPI is able to assess whether its operating cost profile is improving, remaining stable, or deteriorating

relative to expectations while maintaining a measure that is easy to communicate and understand at an enterprise level.

Consistent with MPI's broader approach to strategic KPI design, the objective is not to isolate a single causal driver of performance, but rather to maintain a stable enterprise-level measure that allows MPI to evaluate the cumulative impact of organizational decisions, improvement initiatives, and external factors on long-term operating performance.

m) Technology risk assessments are designed to support internal governance, risk management, prioritization, and decision-making activities. In order to be effective, these assessments often require a level of detail regarding technology assets, control environments, emerging risks, and areas requiring attention that may not be appropriate for inclusion within a public-facing strategic reporting framework.

As MPI refined its strategic KPI framework, the Corporation sought to identify measures that were directly aligned to the intended outcomes of the Corporate Strategic Plan, were readily understood by external audiences, and could be reported publicly without requiring additional context regarding internal risk management practices.

While technology readiness and organizational resilience remain important considerations for MPI, the Corporation concluded that a Technology Risk Score was better suited as an internal management and governance measure than as a public strategic KPI.

MPI continues to monitor and manage technology-related risks through its established governance and risk management processes. Strategic investments in technology modernization, capability development, and organizational readiness remain important contributors to achieving outcomes reflected in the strategic KPI framework.

MPI ultimately selected Expense Ratio as the preferred strategic KPI because it captures a similar intended outcome to Expense Dollars per Vehicle Registered, namely, understanding whether operating expenses are being effectively managed

relative to the size and activity of the business, but does so in a simpler and more broadly understood format.

During development of the strategic KPI framework, MPI considered whether Expense Dollars per Vehicle Registered would be readily understood by the diverse audiences that use MPI's public reporting, including customers, stakeholders, and regulators. While the metric provides useful operational insight, interpretation can require additional context regarding vehicle growth, inflationary pressures, wage growth, and other external factors affecting the cost of service delivery.

Expense Ratio provides a more intuitive enterprise-level measure that reflects the relationship between operating expenses and the overall scale of operations while supporting trend analysis and cost discipline. MPI concluded that the measure communicates the intended outcome in a manner that is simpler to interpret and better suited to the broad audience of its strategic reporting. Accordingly, MPI determined that Expense Ratio would serve as the public-facing strategic KPI.

n) MPI established customer satisfaction milestones using historical performance trends and baseline results for each customer journey. The intent was to set meaningful and achievable milestones that reflect current performance levels while supporting continuous improvement and maintenance of strong performance over time.

Insurance & Registration has historically demonstrated significantly higher customer satisfaction results than the other measured customer journeys and, as a result, has a higher baseline from which its milestones were established. This customer journey is generally transactional in nature, involving shorter, more predictable interactions with fewer touchpoints and lower levels of customer effort.

By comparison, Driver Testing, Physical Damage Claims, and Bodily Injury Claims involve greater complexity, uncertainty, customer effort, and emotional investment. These journeys often involve outcomes that have high importance to customers and generally provide more opportunities for dissatisfaction to occur. Consequently, these

journeys have historically achieved lower customer satisfaction results than Insurance & Registration and improvements tend to occur more gradually.

MPI does not consider the differing milestone levels to indicate that certain customer experiences are less important than others. Rather, the milestones reflect the distinct historical performance patterns, operating realities, and baselines associated with each service area. Consistent with MPI's overall approach to strategic KPI development, the milestones were established based on historical trends and available performance data to support meaningful measurement of progress over time.

MPI is targeting flat or modest increases in Customer Satisfaction milestone scores from FY25/26 to FY27/28 because customer experience improvements are typically realized incrementally, require sustained investment and organizational effort, and are influenced by evolving customer expectations. Milestones were established based on historical performance trajectories, expected benefits from approved initiatives, and a desire to set credible, sustainable performance expectations, which are reflective of a historical trajectory. As service improvements are delivered, customer expectations often re-baseline, meaning significant gains become increasingly difficult to achieve and maintain over time.

o) MPI does not currently maintain a direct mapping between the seven Strategic KPIs, the five Claims Cost KPIs, and the Budgeting Framework KPIs. Each framework was developed to serve a distinct purpose within the Corporation's broader performance measurement system and reflects a different level of organizational measurement maturity.

The Claims Cost KPIs were developed in response to PUB Directive #9 and are focused on specific operational claim cost drivers where performance measurement can help identify trends, support operational decision-making, improve cost management, and inform corrective action when required. These measures are intended to provide insight into the efficiency and effectiveness of specific claims processes and support day-to-day management activities.

Similarly, the Budgeting Framework KPIs were developed to support planning, forecasting, resource allocation, and financial performance monitoring. As MPI has previously indicated, these measures play an important role in informing annual planning cycles, supporting accountability, and helping guide investment and budgeting decisions.

The Strategic KPI framework was developed more recently as part of the implementation of MPI's Corporate Strategic Plan and serves a different purpose. Strategic KPIs are intended to measure long-term outcomes across MPI's corporate focus areas and provide an enterprise-level view of whether the organization is achieving the outcomes it is seeking to deliver. Unlike operational or financial measures, they are not intended to manage individual functions or activities directly, but rather to assess progress toward broader organizational outcomes over time.

As part of developing its strategic performance measurement framework, MPI intentionally focused first on establishing meaningful strategic measures, creating reliable baselines, assigning ownership, and integrating those measures into governance and planning processes. Building a cohesive performance system that effectively connects strategic, operational, and financial measures is an evolutionary process and requires an improved organizational understanding of the factors that influence strategic outcomes.

Accordingly, MPI views the Claims Cost KPIs and Budgeting Framework KPIs as important sources of operational and financial performance information that contribute to the broader performance story, but which have not yet been formally mapped to individual strategic focus areas. Consistent with MPI's previously stated view that no single KPI should be considered in isolation, these measures are intended to be viewed holistically and alongside other organizational indicators when assessing overall performance.

As MPI continues to mature its performance measurement framework, a key area of future development will be strengthening the connection between strategic outcomes and the operational and financial measures that influence them. This work will help MPI

better understand which organizational measures are the most meaningful drivers of performance within each corporate focus area and how those measures collectively contribute to achieving strategic objectives.

The long-term objective is to develop a more holistic view of organizational performance that integrates strategic, operational, and financial perspectives. Rather than creating a direct one-to-one relationship between individual KPI frameworks, MPI expects its performance measurement approach to continue evolving so that strategic KPIs provide insight into desired outcomes while operational and financial measures help explain the underlying performance drivers influencing those outcomes and support more informed organizational decision-making.

CC (MPI) 1-6

Part and Chapter:	**Part II—COM Appendix 2**	**Page No.:**	**1 - 9**
Topic:	**Claims Cost Control KPIs – response to PUB Order 2/25, Directive 9**		
Sub Topic:			

Preamble to IR (If Any):

Page 1, Part II – COM Appendix 2 it states:

> "With a full year of results now available, **MPI has developed a better understanding of how these KPIs perform in practice across** the four key **physical damage** claims dimensions."

Page 2, Part II – COM Appendix 2 it states:

> "MPI currently **exercises some degree of control** across the following dimensions for physical damage claims:
>
> 1. Repair;
> 2. Total Loss;
> 3. Salvage; and
> 4. Subrogation.
>
> **These are core claims dimensions**. This framework allows MPI to assess performance across these dimensions and identify where additional focus is needed."

Upon reviewing the KPI's from pages 2 to 6, some targets have been met and some targets have not been met. Pages 6 to 7 provide some rationale for updating the targets

that have not been met with additional input-based information to adjust the targets either up or down.

In the Conclusion at page 9 it states:

> "MPI used these results to refine targets, improve data alignment, and strengthen how performance information is interpreted and used. **These actions have improved consistency and reliability of performance measurement and MPIs ability to assess claims costs drivers.**
>
> The selected KPIs provide meaningful insights and **support informed decision making**. MPI will continue to monitor these indicators and further apply refinement as appropriate." [emphasis added.]

Question:

a) Please provide a narrative discussion explaining the target setting approach including the 'input-based framework', operational guardrails, customer experience expectations, peer benchmarking, historical baselines, and feasibility. (For reference see page 6).

b) Please provide a narrative discussion on MPI's salvage operations, disposition of purchased salvage vehicles (in Country and out of Country); including as part of the response the Salvage Statements of Operations for the last two fiscal years.

c) Please provide a narrative discussion highlighting the value generated to MPI as a result of managing the four Physical Damage KPIs.

d) Please provide a narrative discussion on the management decisions that have been made as a result of monitoring the Physical Damage KPIs.

e) Please provide the accountability framework ensuring the Physical Damage KPI's are met or exceeded.

f) Please provide a copy and a narrative discussion on the status of the PIPP KPIs.

Rationale for Question:

To clarify, assess and better understand the value added to MPI by the physical damage KPIs.

RESPONSE:

a) MPI uses an input-based framework to review and establish targets for the Physical Damage KPIs. The framework considers relevant inputs where available, including operational guardrails, benchmarking, customer experience expectations, baselines, feasibility, and forecasted changes that may affect performance.

   Operational guardrails refer to regulatory and legislative requirements. Customer experience expectations reflect customer preferences. Benchmarking refers to peer or industry comparisons. Baselines reflect historical performance based on internal data, alongside considerations for any major operational changes that may have occurred. Feasibility considers current operating conditions. Forecasted changes reflect known internal or external factors that may impact future performance.

b) In fall 2020 MPI salvage operations moved online to enable broader market exposure, increased buyer participation, enhanced vehicle marketing, and improve accessibility for buyers regardless of location. The online model has also increased competition among buyers, resulting in higher returns. Currently in an average year, MPI has roughly 2300 unique buyers, of which over 80% of buyers are located within the province. Of note, approximately three quarters of all buyers are dealers, recyclers, and exporters.

   Impact Auto Auctions (IAA), MPI's auction service provider, monitors salvage market trends across Canada and provides industry benchmarking and insights. Overall, fluctuations in MPI's salvage returns are generally consistent with broader industry trends.

Unlike other MPI products, salvage operations involve the sale of physical assets and are heavily influenced by market and transportation factors. Vehicle values can be affected by external pressures such as tariffs, fuel costs, shipping disruptions, and buyer demand. As a result, both MPI and IAA recognize that salvage returns will naturally fluctuate from quarter to quarter and year to year. These changes are expected and reflect broader market conditions rather than operational performance alone.

MPI and SGI participate in joint quarterly reviews through IAA because both organizations operate in similar markets with comparable populations and geographic challenges. Overall, MPI's salvage returns are comparable to SGIs. One area for future improvement is that MPI sells more vehicles as parts-only units, which can reduce overall salvage returns. The higher number of parts-only sales is partly due to MPI's vehicle status (i.e. repairable, irreparable) rules. A planned review and simplification of these rules is targeted in late 2026 and is expected to reduce the number of vehicles classified as irreparable, allowing more vehicles to be sold through higher-value sales channels.

For additional financial details, please see *Appendix 1 - Salvage Statement of Operations.*

c) The Physical Damage KPIs provide MPI with greater visibility into key claims cost drivers across Repair, Total Loss, Salvage, and Subrogation. By monitoring these KPIs, MPI assesses performance in areas where operational practices can influence claims costs and identifies trends that may require further review. The KPI review process creates regular opportunities to discuss results, better understand the factors influencing performance, and ensure results are appropriately contextualized. The consistent review of performance across operational areas also supports a shared understanding of results and emerging trends. Collectively, the KPIs support ongoing oversight of claims cost control activities and provide a consistent basis for monitoring performance over time.

d) MPI used the first year of results to assess performance across the selected claims dimensions, review the suitability of the KPIs, and refine associated targets and reporting approaches where appropriate. As a result, Physical Damage KPIs have not yet been utilized to make material management decisions.

e) Performance against established Physical Damage KPI targets is monitored through regular reporting and review with the relevant operational areas. These reviews provide an opportunity to understand performance results, assess factors influencing outcomes, and support ongoing focus on meeting or exceeding established targets. The Physical Damage KPIs form part of an evolving performance management process, and MPI is considering how accountability mechanisms may be incorporated as the framework matures.

f) Income Replacement Indemnity (IRI) Conclusion Time (***Figure 1***) remains the critical KPI related to PIPP. This KPI measures the percentage of injury claims within a loss year where IRI concludes within specified standard timeframes.

Previous targets were based on historical averages, however due to the continued trend of injuries being more complex, further analysis is required to re-establish targets that factor in the change in injury complexity trends (***Figure 2***). As this is an emerging trend, additional time is required to ensure sufficient claims development and data points are available. It is anticipated that more refined targets will be established in the 2027/28 fiscal year. The focus of the KPI is not purely to achieve faster IRI conclusion but to ensure customers are receiving the appropriate duration of benefits based on their individual circumstances and injuries.

Figure 1 Income Replacement Indemnity Conclusion

Loss Year	IRI Concluded within 6 Months	IRI Concluded within 12 Months	IRI Concluded within 24 Months	IRI Concluded within 36 Months
2017/18	69%	84%	90%	92%
2018/19	69%	86%	91%	93%
2019/20	71%	86%	91%	93%

One additional KPI has been established, focused on the early stages of a PIPP claim. A critical milestone is how quickly a customer receives their initial IRI payment (*Figure 3*), this is an indicator that coverage confirmation is moving at the appropriate pace, and that customer and employer contact is timely and of sufficient depth to collect the required supporting documentation.

The target of 28 days to first payment was established considering the legislated seven (7) day waiting period, plus the typical bi-weekly pay period (14 days), plus seven (7) days to collect the required information to substantiate the level of entitlement.

Figure 3 – Days to First IRI Payment

CC (MPI) 1-7

Part and Chapter:	**Part II – Overview**	**Page No.:**	**5-7**
Topic:	**Corporate Values Implementation**		
Sub Topic:			

Preamble to IR (If Any):

On pages 6-7 of Part II – Overview it states:

> "Recently MPI refreshed its corporate values for how its employees engage with customers, partners and stakeholders. MPI's new refreshed corporate values and their descriptions are:
>
> **Accountability** - Taking ownership of actions and decisions.
>
> We are accountable when we follow through on our commitments and hold ourselves, and each other, responsible for actions that build trust.
>
> **Collaboration** - Working together, respecting differences and perspectives.
>
> We are collaborative when we work together as one team, leveraging diverse strengths and perspectives to deliver strong outcomes and strengthen the relationships that support our shared success.
>
> **Transparency** - Communicating openly and honestly.
>
> We are transparent when we share information openly and proactively, creating clarity and shared understanding by communicating what is relevant, responsible, and meaningful.
>
> These are not aspirational statements it is the standard by which employees are held in MPI's day-to-day work. **The refreshed values are also how MPI approaches the 2027 GRA and are central to its vision of conducting all facets of its operations in step with these tenets."** [emphasis added].

Question:

Please provide a narrative discussion on how the refreshed corporate values (Accountability, Collaboration, Transparency) are operationalized, including:

a) Training materials

b) Performance metrics

c) Compliance monitoring

Rationale for Question:

To review MPI's refreshed corporate values and assess how they are being operationalized for the benefit of the policyholders.

RESPONSE:

MPI's refreshed corporate values of Accountable, Collaborative and Transparent are being operationalized as practical expectations for how employees, leaders and teams work, make decisions, deliver service and engage with customers, partners and stakeholders. The values are not being implemented as a standalone initiative; they are being embedded into existing organizational practices, including employee communications, leadership routines, performance conversations, recognition, change management, employee listening and ongoing culture-building activities. This approach is intended to ensure the values are understood, applied and reinforced through day-to-day behaviours rather than treated as statements of principle only.

a) <u>Training Materials and Employee Awareness</u>

MPI has supported the values refresh through a planned change, communications and learning approach designed to build awareness, understanding, commitment and adoption. This has included launch communications, a CEO message and values introduction video, updates to internal and external channels, and refreshed visual materials. MPI is also developing practical materials such as one-pagers, discussion guides, job aids, leader templates, and workshop materials to help employees

understand what the values look and sound like in everyday work. As part of the next phase of implementation, MPI also plans to integrate its refreshed values into employee onboarding and relevant learning materials so new and existing employees are introduced to the values as part of the employee experience and can connect them to expectations for conduct, decision-making, service delivery and collaboration.

A key component of the rollout has been the “Values in Action” workshop at this spring’s Management Meeting and the upcoming employee-driven values videos. These activities, along with ongoing communications and storytelling initiatives, are designed to translate the values into observable behaviours and practical commitments in how accountability, collaboration and transparency should show up in team practices, decision-making, service delivery and interactions with colleagues, customers and partners. Employee video campaigns and values-related communications will further reinforce desired behaviours and share practical examples of the values in action across the organization.

b) Performance Metrics

MPI is embedding the refreshed values of Accountable, Collaborative and Transparent into performance management, leadership practices and employee experience measures. This allows the organization to assess not only what outcomes are achieved, but how they are achieved through day-to-day behaviours, decision-making, service delivery and collaboration.

Success is measured through observable behaviours and outcomes that show whether the values are understood, demonstrated and experienced across the organization. This includes how employees apply the values in their work, how leaders connect them to objectives and decision-making, and how teams address misalignment or barriers that affect employees, service delivery or organizational outcomes.

MPI monitors related culture and performance indicators, including trust, employee voice, collaboration across silos, transparency of communication, values-based

recognition, customer-centric behaviours, leadership effectiveness, employee engagement and change readiness.

These indicators are assessed through existing mechanisms such as Employee Net Promoter Score, onboarding, census and exit surveys, values-based survey indices, leadership behaviour measures, performance discussions and evaluations, values recognition data, customer and partner satisfaction scores, and change readiness or confidence measures.

c) Compliance Monitoring

Rather than relying on a standalone compliance program, MPI is monitoring adoption through existing leadership, culture, and employee experience mechanisms. This includes reinforcing expectations through leaders, performance conversations, recognition programs, employee communications, action planning, employee listening activities and ongoing culture work. Where behaviours or practices are not aligned with the values, leaders are expected to address the misalignment through established management practices and appropriate channels.

MPI's intent is to use these mechanisms to identify gaps, reinforce desired behaviours, support continuous improvement and ensure the values remain connected to MPI's service, culture and strategic objectives.

CC (MPI) 1-8

Part and Chapter:	**Part II — Overview**	**Page No.:**	**12-13**
Topic:	**Indigenous Action Plan Implementation**		
Sub Topic:			

Preamble to IR (If Any):

On page 13, Part II – Overview it states:

> "The Indigenous Action Plan will help MPI translate commitments into clear and accountable steps that strengthen relationships, remove systemic barriers and support meaningful, lasting progress toward reconciliation across its operations. **It is built around three pillars: Internal Structure, Community Impact and Cultural Empowerment.**
>
> In the first year of the Indigenous Action Plan, MPI plans a stronger focus on road safety issues in Indigenous communities and building relationships through community engagement, reviewing Indigenous employment and representation within the corporation, and **improving licensing and identification services by introducing mobile clinics that can visit remote communities**." [emphasis added].

Question:

a) Please provide a copy of the detailed Year 1 implementation schedule for the Indigenous Action Plan.

b) Please provide a copy of the KPI's for each pillar (Internal Structure, Community Impact, Cultural Empowerment).

c) Please provide the resources and budget allocation for implementing this strategy.

d) Please provide a narrative discussion and evidence of engagement with Indigenous communities and Rights Holders.

e) Please provide the operational plan for mobile clinics, including deployment schedule, service capacity and expected impact on access for remote communities.

Rationale for Question:

To clarify and better understand the Indigenous Action Plan.

RESPONSE:

a) Please see ***Appendix 1*** for a detailed year 1 initiative implementation plan.

b) Please refer to "How we are measuring our progress" in ***Appendix 1***. At this stage of implementation, the KPIs for each action item have been established as initial status-based measures, such as whether the item has been completed, not completed, or remains in progress. This approach provides a practical baseline for tracking Year 1 progress while the Indigenous Action Plan continues to mature. As implementation advances, MPI will continue to review and refine the KPIs for each action item to ensure they are meaningful, measurable, and aligned with the intended outcomes of the plan. Ongoing engagement with Indigenous communities, Rights Holders, and community partners will also help inform the development of more robust indicators that better reflect community priorities, support accountability, and demonstrate progress toward reconciliation.

c) All initiatives identified in the Indigenous Action Plan have been reviewed with the intent of leveraging existing internal resources across the organization wherever possible. This approach supports MPI's ability to advance reconciliation related priorities in a responsible and sustainable manner while maintaining fiscal prudence. As implementation progresses, each action item will continue to be assessed to determine the appropriate operational requirements, resource needs, and any potential funding considerations. This ongoing review will help ensure that initiatives

are implemented thoughtfully, aligned with organizational capacity, and supported through available internal expertise and resources.

d) MPI undertook extensive and meaningful engagement with Indigenous communities, Rights Holders, Indigenous organizations, Elders, Knowledge Keepers, and community representatives throughout the development of its Indigenous Action Plan. This engagement process was designed to ensure that Indigenous voices, perspectives, priorities, and lived experiences were reflected in the Plan and would guide the corporation's ongoing commitment to reconciliation, relationship-building, and accountability.

Engagement activities included consultations and discussions with Indigenous organizations, as well as outreach to First Nation communities across Manitoba. MPI formally invited all 63 First Nation communities in Manitoba to participate in the engagement process through direct correspondence and provided opportunities for feedback, dialogue, and collaboration. The initial correspondence also invited communities to provide feedback and input on the Road Safety Strategy 2030. Prior to the public launch of the Indigenous Action Plan, the draft Plan was shared with communities and organizations for review, and additional opportunities were provided for feedback to help ensure the Plan reflected community priorities, needs, and aspirations.

The Indigenous Relations Lead played a significant role in this engagement process by conducting direct outreach and building relationships with First Nation communities throughout Manitoba. Through conversations with community leadership and representatives, appropriate contacts were identified, early relationships were established, and opportunities for ongoing collaboration were created. This relationship-building approach strengthened engagement during the development of the Plan and continues to support implementation activities across the province.

To support implementation and ensure Indigenous perspectives remain embedded in organizational decision-making, MPI established an Indigenous Advisory

Committee comprised of employees who self-identify as Indigenous, including First Nations (Status and Non-Status), Métis, and Inuit. Representing a diverse range of roles, lived experiences, and geographic locations across Manitoba, the Committee provides guidance, feedback, and accountability as the Indigenous Action Plan is implemented. The Committee continues to serve as an important internal mechanism for ensuring Indigenous voices help inform organizational initiatives and reconciliation commitments.

Feedback received throughout the engagement process consistently emphasized the importance of building respectful and authentic relationships, enhancing cultural safety within programs and services, increasing Indigenous representation throughout the organization, improving access to driver licensing and identification services, and maintaining transparency, accountability, and ongoing dialogue with Indigenous communities. These perspectives, recommendations, and lived experiences directly informed the development of the nine priority areas and associated actions contained within MPI's Indigenous Action Plan, helping ensure that the Plan is grounded in community informed priorities and focused on creating meaningful, measurable, and lasting change.

Evidence of engagement includes formal correspondence sent to all 63 First Nation communities in Manitoba; consultation meetings and discussions with representative Indigenous organizations including MKO, SCO, and MMF; direct outreach and relationship-building discussions with community representatives and Rights Holders; feedback received on draft versions of the Indigenous Action Plan; and documentation supporting the establishment and ongoing participation of MPI's Indigenous Advisory Committee. The feedback gathered through these engagement activities directly influenced the Plan's priorities and commitments, particularly in areas related to relationship-building, cultural safety, Indigenous representation, service accessibility, and organizational accountability. This engagement process demonstrates MPI's commitment to working collaboratively with Indigenous communities and Rights Holders to advance reconciliation and ensure Indigenous perspectives continue to inform the corporation's policies, programs, and services.

e) The operational plan for mobile ID clinics is currently being developed as part of Year 1 implementation of MPI's Indigenous Action Plan. This foundational work includes establishing a consistent and sustainable service model, supported by a standardized operating procedure that addresses equipment, staffing, secure connectivity, community coordination, and other operational requirements. Initial delivery will be tested through pilot clinics in selected Indigenous communities, with scheduling and service capacity including the number and frequency of clinics, staffing levels, and anticipated client volumes to be determined through community engagement, identified need, and operational feasibility. As a Year 1 initiative, MPI is exploring a pilot ID clinic in Little Grand Rapids to support community members who require identification for employment, driver education, and other essential services. Pilot results will inform refinements to the operating model, future deployment schedules, capacity requirements, and performance measures before broader implementation. The expected impact is improved access to identification services for remote and northern communities by reducing travel barriers, expanding service availability, and supporting more equitable access to employment, education, financial services, and other programs that require government-issued identification.

INDIGENOUS ACTION PLAN Year 1 Initiatives

Action Item	Context	How we are Measuring Our Progress
1) Leadership and Governance		
1.2. Collaborate with leadership teams to advance and implement the Indigenous Action Plan.	Develop and publish an annual progress report, highlighting actions taken under the Indigenous Action Plan. (NOTE: This is a year 1 and ongoing endeavor) Work with executive leaders, department heads, and advisory partners to embed Indigenous focused education, cultural awareness training, and reconciliation commitments across MPI operations.	• Annual Indigenous Action Plan progress report published (Yes/No, annually)
2) **Cultural Competency Training**		
2.1. Design and develop a comprehensive cultural education plan that encompasses teachings such as Tobacco Offering, Smudging, the Seven Sacred Teachings, and the historical and ongoing impacts of residential schools and the Sixties Scoop.	Create an internal website titled “Indigenous Cultures & Perspectives: A Cultural Corner” that features information on diverse Indigenous cultures and languages. The site will also include an “Events” page showcasing updates and photos from internal events such as Orange Shirt Day and National Indigenous Peoples Day.	• Organization-wide five-year learning plan completed and approved (Yes/No) • Number of Elders/Knowledge Keepers engaged to deliver education and training • Internal “Cultural Corner” website launched (Yes/No) • Number of cultural events/resources published annually on the site
2.2. Deliver training in-person, virtually for participation across the organization.	Develop comprehensive surveys, interview guides, and feedback tools designed to collect both qualitative and quantitative insights into employee learning experiences, cultural understanding overall effectiveness of Indigenous training offered through MPI.	• % of employees completing Indigenous cultural training • Number of training sessions delivered (virtual/in-person) • Measured improvement in understanding following training (pre/post survey)

INDIGENOUS ACTION PLAN Year 1 Initiatives

Action Item	Context	How we are Measuring Our Progress
	3) **Employment and Representation**	
3.1. MPI will assess and enhance Indigenous hiring and leadership development processes to increase Indigenous representation across all levels of the organization.	Conduct a comprehensive review of current Indigenous hiring, retention, and leadership development practices to establish representation benchmarks.	• Current Indigenous workforce representation identified through Pulse Survey completed? (Yes/No)
3.2. Pursue opportunities to partner with Indigenous learning institutions to create a clear pathway for Indigenous talent into roles across MPI.	Host MPI career information sessions at partner institutions, creating Indigenous-specific recruitment streams. This can be done through: - University College of the North (UCN). - Indigenous adult education centres. - Manitoba First Nations Education Resource Centre (MFNERC). - Indigenous employment and training organizations. - Southeast College. - Schools within Winnipeg that have high Indigenous presences. - First Nations University of Canada (FNUniv).	• Number of Indigenous institutions career fairs held each year • Number of Indigenous applicants referred through partnerships • Feasibility review for formal training pathways with Indigenous Learning Institutions completed (Yes/No) • Number of partnerships with Indigenous organizations that support direct hires for entry level positions
3.3. Create and support the Indigenous Advisory Committee to provide strategic guidance on culturally appropriate approaches for integrating Indigenous knowledge, values, and perspectives into organizational decision making.	Clarify the role of the Indigenous Advisory Committee (IAC) by establishing a formal workplan, a structured meeting framework, and a comprehensive engagement process. Together, these will enable the Committee to provide ongoing strategic guidance on integrating Indigenous knowledge, values, and perspectives into organizational decision making, aligned with the Indigenous Action Plan and Reconciliation commitments.	• Indigenous Advisory Committee workplan approved (Yes/No) • Number of meetings held annually • Annual feedback from IAC members

INDIGENOUS ACTION PLAN Year 1 Initiatives

Action Item	Context	How we are Measuring Our Progress
4) **Access to Insurance, Licensing and Identification Services**		
4.1. Create opportunities to improve mobile testing service delivery to remote and northern communities.	Identify and review existing mobile testing locations and look for opportunities to service and expand into communities with limited or no access to regional service centres. (NOTE: This is a year 1 and ongoing endeavor)	• Number of remote and northern communities reached before and after the program was put in place (baseline vs. post implementation-Increase in the areas where mobile testing services are available) • Number of certified local driving instructors trained • Number of mobile/virtual testing days delivered annually • Reduction in service access gaps (baseline vs. post-implementation)
	Conduct a thorough review of internal claims data related to locations within rural Indigenous communities to identify gaps, trends, and insights that can guide improvements and streamline Indigenous customer service delivery.	
	Collaborate with Indigenous communities to identify current service needs and support the training of local community members to become certified driving instructors.	
	Review opportunities for virtual assessments and mobile testing days.	
4.2. Implement mobile ID clinics across Manitoba in partnership with local communities and organizations to enhance awareness and improve accessibility to identification services.	Collaborate with internal teams to establish a streamlined and consistent approach to delivering Mobile ID Clinics and ID services to Manitobans, including the development of a single, finalized Standard Operating Procedure (SOP) that outlines equipment requirements, staffing needs, and secure connectivity protocols.	• Operating procedure for Mobile ID Clinics finalized (Yes/No) • Expanded approved ID options (Yes/No) • Number of Mobile ID Clinics delivered annually • Number of clients served through mobile clinics • Mobile travel trailer designed and deployed (Yes/No)
	Consult with communities on opportunities to expand acceptable documentation for validating identity (i.e. community-issued letters, letters of confirmation of identity from First Nation Police, etc.).	

INDIGENOUS ACTION PLAN Year 1 Initiatives

Action Item	Context	How we are Measuring Our Progress
	5) **Community Engagement**	
5.2. Engage in local community/cultural events to promote MPI's Truth and Reconciliation efforts.	Compile a comprehensive list of community events across Manitoba and develop a coordinated participation plan outlining opportunities to attend pow wow's, feasts in regional areas and in Winnipeg to strengthen the relationship with the community.	• Indigenous events calendar completed (Yes/No) • Number of community/cultural events attended annually
5.4. Engage with Indigenous communities across Manitoba to continue to build meaningful relationships and strengthen collaboration and consultation.	Continue with ongoing engagement with communities to ensure MPI continues to uphold Truth and Reconciliation commitments and that community programing needs remain current and responsive. (NOTE: This is a year 1 and ongoing endeavor)	Continue with ongoing engagement with communities to ensure MPI continues to uphold Truth and Reconciliation commitments and that community programing needs remain current and responsive.

INDIGENOUS ACTION PLAN Year 1 Initiatives

Action Item	Context	How we are Measuring Our Progress
	7) **Indigenous Road Safety and Accessibility**	
7.1. Develop road safety campaigns and education materials tailored to Indigenous communities.	Develop culturally relevant community outreach and educational materials that promote road safety, including resources focused on speed reduction signage, enhanced stop sign visibility, seatbelt use, prevention of distracted driving, and community-specific speed awareness initiatives.	• Number of tailored road safety materials developed • Number of Indigenous communities receiving materials • Feasibility review of Integrating of Driver Education Program in First Nation schools (Yes/No) • Fewer high-risk road safety issues, where we have data to measure it
7.2. Expand Manitoba Public Insurance's existing safety pilots such as Pedestrian Safety Kits to additional Indigenous communities.	Review the current Road Safety Pedestrian Safety Kit pilot to confirm effectiveness and awareness of the current campaign so that additional First Nations, Inuit, and Red River Métis communities can join the program. Where appropriate, tailor programming to address priority risks such as ATV safety based on community identified needs and available data.	• Number of Indigenous communities currently participating in safety pilots • Evaluation of Pedestrian Safety Kit effectiveness completed (Yes/No) • Expansion of pilots to address community-identified risks (Yes/No)

INDIGENOUS ACTION PLAN Year 1 Initiatives

Action Item	Context	How we are Measuring Our Progress
	9) **Indigenous Procurement Strategy**	
9.1. Design and implement a procurement plan that promotes supplier diversity and inclusion, with a focus on removing obstacles and creating opportunities for Indigenous peoples.	*Promote MPI's Indigenous Procurement Policy to expand partnerships with Indigenous owned businesses and support economic reconciliation. (NOTE: This is a year 1 and ongoing endeavor)	• Indigenous Procurement Policy promoted internally and externally (Yes/No) • Policy review completed by implementation date (Yes/No)

CC (MPI) 1-9

Part and Chapter:	**Part VIII – Pro Formas** **PF-3 Statement of Equity: +2.38% Basic Rate Change**	**Page No.:**	**7**
Topic:	**Change in Remeasurement of Employee Future Benefits**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Pro Formas PF-3 on line 12 the following **'Change in Remeasurement of Employee Future Benefits'** amounts ($000) are reported for the fiscal years indicated:

2025/26A	$17,994
2026/27BF	$19,887
2027/28F	$2,143

Question:

a) Please provide a narrative discussion explaining the change in remeasurement of employee future benefits with supporting assumptions and calculations.

Rationale for Question:

To clarify and understand the rationale for the remeasurement of employee future benefits.

RESPONSE:

a) Please refer to *PUB (MPI) 1-21* for an explanation of why the Change in Remeasurement of Employee Future Benefits line contains non-zero amounts.

The remeasurement amount is estimated at a corporate level based on the prior year's ending employee future benefits obligation, the forecasted change in the annual discount rate, and the weighted average duration of the defined benefit obligation.

The duration assumption is held constant based on the weighted average duration disclosed in the Corporation's annual report, while the annual discount rate is based on actuarial assumptions used in the financial forecast.

The resulting amount is allocated to each line of business using the payroll ratio (e.g., 69.3% for Basic).

CC (MPI) 1-10

Part and Chapter:	**Part VIII – Pro Formas** **PF-4 Statement of Operations – 2025/26 Comparative**	**Page No.:**	**8**
Topic:	**Othe Insurance Revenue line 4**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Pro Formas PF-4 at page 8 other insurance revenue at line 4 increased from the 2026 GRA to the 2027 GRA by $2.9 million or 10.8%.

Question:

a) Please prepare a chart detailing the various transactions comprising the 2026 GRA amount of $26.8 million compared to the 2027 GRA amount of $29.7 million and explaining the significant differences.

Rationale for Question:

To review the other insurance revenue transactions and the relative increase year over year.

RESPONSE:

a) Refer to ***Figure 1*** below. The increase in other insurance revenue is primarily due to a higher dollar value of loans financed relative to the 2026 GRA forecast (Line 4).

Figure 1 Other Insurance Revenue - Comparison of 2025/26 values in the 2027 GRA vs 2026 GRA

Line No.	Other Insurance Revenue Category	2027 GRA	2026 GRA	Difference
1	Motor Vehicle Late Payment Fees	1,090	695	395
2	Dishonoured Cheque Fees	500	435	65
3	Arrears Interest	256	116	140
4	Finance Plans	27,881	25,592	2,289
5	**Sub Total Other Insurance Revenue**	**29,727**	**26,838**	**2,889**

CC (MPI) 1-11

Part and Chapter:	**Part VIII – Pro Formas** **PF-4 Statement of Operations – 2025/26 Comparative**	**Page No.:**	**9-10**
Topic:	**Variance explanations**		
Sub Topic:			

Preamble to IR (If Any):

Line 2 indicates a variance of ($27.5) million: "Lower incurred claims and directly **attributable expenses**"

Line 6 indicates a variance of $41.1 million: "Higher physical damage claims"

Line 30 indicates a variance of $50.7 million: "Favourable change in discount rate"

Line 33 indicates a variance of $39.6 million: "Favourable change in discount rate"

Line 47 indicates a variance of $28.3 million: "Higher than expected data processing expense"

Question:

a) For each one of the lines detailed in the Preamble, please provide a detailed analysis with supporting assumptions and calculations along with a narrative explanatory discussion.

Rationale for Question:

To review and better understand the variances contained in PF-4.

RESPONSE:

a) Incurred claims and directly attributable expenses

The decrease in incurred claims and directly attributable expenses reflects the updated claims forecast incorporating changes required as a result of Public Utilities Board Order No. 156/25.

Physical Damage claims

Please refer to *Figure 1* below. The increase is attributable to higher collision claims and Third-Party Liability Property Damage claims.

The increase in collision claims was primarily driven by unfavourable current accident year experience resulting from higher-than-expected claim frequency. This was partially offset by favourable development from the runoff of the 2024/25 accident year.

The increase in Third Party Liability Property Damage claims was driven by unfavourable current accident year experience resulting from higher-than-expected claim frequency, together with higher claim severity emerging from the 2024/25 accident year.

Figure 1 2025/26 Physical Damage Claims

Line No.	Physical Damage Claims	(1) 2026 GRA Compliance filing	(2) 2027 GRA	(3) = (2) - (1) Impact 2027 GRA
1	*($000's, except where noted)*			
2	Collision	605,034	635,044	30,009
3	Comprehensive	156,394	156,648	254
4	Third Party Liability - Property Damage	57,451	68,321	10,870
5	**Total**	**818,879**	**860,012**	**41,133**

Discount rate

Please refer to PUB1-17b for details on the improvement to net insurance finance result in 2025/26.

Data processing expense

Please refer to *Part VIII – EXP Appendix 6, Figure EXP 6-2* and the related narrative explaining the $3.8 million increase to Initiatives-Implementation and $26.9 million increase to Initiatives ongoing. The higher-than-expected data processing line is caused by changes in total corporate expenses, which are allocated to lines of business based on a review of each project and the line of business expected to benefit from the project. For further details on the allocation process, please refer to *Part VIII – Expenses, Section EXP.3 Basic Expenses: Cost Allocation Methodology*.

CC (MPI) 1-12

Part and Chapter:	**Part VIII – Pro Formas** **EPF-1 Extension** **Statement of Operations**	**Page No.:**	**19**
Topic:	**Significant Claims incurred increases, year over year, from 2025/26 through to 2027/28**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Pro Formas EPF-1 Extension Claims Incurred by year are increasing significantly ($000,000):

Year	Claims Incurred	Increase $	Increase %
2025/26A	$101.6		
2026/27BF	136.3	$34.7	34.2%
2027/28F	162.8	26.5	19.4%

Question:

a) Please provide a detailed analysis, including assumptions and explanatory notes of the year over year increases in extension claims incurred.

Rationale for Question:

To review significant increases in extension claims incurred, year over year, noting that the Basic insurance MCT funding is dependent on extension excess retaining earnings.

RESPONSE:

a) MPI's Extension claims incurred forecast is based on the claims forecasting methodology described in the Claims Forecasting chapter, which provides loss trending analysis and loss cost projections used for ratemaking and financial forecasting. Accident year losses for the fiscal year forecasts are provided in the Claims Forecasting chapter and *Part VI CF Appendix 6 - Extension Loss Cost Projection Appendices* provides the forecasted Extension loss cost projections.

MPI increased the Basic deductible from $750 to $1000 effective April 1, 2026, alongside the introduction for a new deductible level for Extension of $750. This change directly affects losses for policies renewed on April 1, 2026, and onwards. Losses eliminated from the Basic level do not disappear completely, many of them move to Extension instead. An analysis similar to the one outlined in *Part VI CF.5.4 Adjustments for Product Changes* is performed on Extension products. The selected $1000 adjustment factors that are shown within *CF.5.4* are used to calculate the impact of a deductible change on the corresponding Basic product. This is used to calculate the predicted impact on the corresponding Extension product.

Figure 1 below compares the Projected Ultimate Loss Cost for Extension Auto Physical Damage (APD) Collision with and without the $1000 deductible change. It shows increases of more than 50% beginning in accident year 2027, which helps explain the increase in Extension claims incurred. Similar increases are observed in other Extension coverages affected by the product change, further contributing to the increase in claims incurred.

Figure 1 Extension APD Collision Deductible Change

Line No.	(1) Accident Year	(2) Projected Ultimate Loss Cost Without $1000 Deductible Change	(3) Projected Ultimate Loss Cost	(4) Increase with Deductible Change
1	2026	$44.46	$58.23	30.98%
2	2027	$45.36	$72.48	59.79%
3	2028	$46.28	$72.97	57.69%
4	2029	$47.21	$73.49	55.66%
5	2030	$48.17	$74.04	53.70%
6				
7	(1) April 1 to March 31			
8	(2) Ultimate Loss Cost without $1000 Deductible Change			
9	(3) Ultimate Loss Cost with $1000 Deductible Change			
10	(4) = (3) / (2) - 1			

CC (MPI) 1-13

Part and Chapter:	**Part VIII – Pro Formas PF-1** **Part VIII – Net Incurred Claims Pro Formas 5, 10**	**Page No.:**	**6** **11, 15**
Topic:	**Insurance contract liability**		
Sub Topic:	**Reconciling various charts using fiscal year 2027/28**		

Preamble to IR (If Any):

Part VIII – Pro Formas PF-1 Statement of Financial Position at page 6, line 18, for 2027/28F indicates for insurance contract liability ($000) a balance of $2,621,726.

Part VIII – Net Incurred Claims Figure NIC – 5 at page 11, line 4 for 2027/28F indicates a balance of $2,154,809 ($000).

Part VIII – Net Incurred Claims Figure NIC – 10, at page 15, line 3 for 2027/28F indicates a balance of $2,256,596 ($000).

Question:

a) Please reconcile the insurance contract liabilities balances as cited in the Preamble or provide a narrative discussion as to their respective differences.

b) Please provide the source for the Incurred Claims Before Risk Adjustment, column 1, Figure NIC -8.

Rationale for Question:

To clarify the various insurance contract liability values for greater understanding.

RESPONSE:

a) The insurance contract liability reported on the Statement of Financial Position comprises both the Liability for Incurred Claims (LIC) and the Liability for Remaining Coverage (LRC). Figure NIC-5 presents the present value of future cash flows related to the LIC, while Figure NIC-10 presents the LIC, consisting of the present value of future cash flows and the associated risk adjustment. Therefore, the difference between Figures NIC-5 and NIC-10 represents the risk adjustment, and the difference between the Statement of Financial Position balance and Figure NIC-10 represents the LRC.

b) Incurred losses before Risk Adjustments (Column 1) are derived from MPI's claims forecast. The forecasted ultimate losses are converted to a fiscal year incurred basis by applying reporting and payment patterns to estimate the emergence of unpaid claims and the timing of future claim payments. Future cash flows are adjusted for inflation, where applicable, and discounted using the yield curve.

Incurred losses before Risk Adjustments are then determined as paid losses plus the change in the discounted unpaid claims liability. Losses in Column 1 include loss adjustment expenses, except non-proportional (fixed) ULAE, which is added separately in Column 3.

Please refer to ***Part VIII NIC Net Claims Incurred Section NIC.1 Direct Claims Forecast*** for more details.

CC (MPI) 1-14

Part and Chapter:	**Part VIII - Expenses**	**Page No.:**	**6-7, 18**
Topic:	**Normal Operating Expenses Growth**		
Sub Topic:			

Preamble to IR (If Any):

Part VIII – Expenses, page 6 reflects the following:

Corporate normal operating expenses, on a rating year basis, are rising by 4.9% or $18.7 million comparing the 2026 GRA to the 2027 GRA. Basic operating expenses are rising 15.8% or $35.3 million--significantly higher than CPI which ranges between 2% and 3%.

In Part VIII – Expenses on pages 6-7 it states:

> **"Basic Normal Operating Expense**
>
> Normal operating expenses include expenses incurred to manage the day-to-day operations of MPI. Overall, Basic Normal Operating Expenses for the 2027 GRA ratings years are approximately $35.3 million higher (as per *Figure EXP-1* above) compared to 2026 GRA Basic rating year normal operating expenses. This impact can best be explained by the following two factors:
>
> 1. An approximate $12.2 million related to higher corporate normal operating expenses ($18.7 million x 64.8%)
>
> 2. An approximate $23.1 million due to a change in the percentage allocated to Basic ($379.3 million x (64.8% - 58.7%)"

Question:

a) Please provide a detailed breakdown of the $18.7 million increase in Corporate Normal Operating Expenses (from $379.3M to $398.1M) and the increase of $35.3 million for Basic Normal Operating Expenses (from $222.8M to $258.0M). Please include:

   i. Line-item contributions by expense category (compensation, data processing, special services, merchant fees, initiative placeholders, etc.).

   ii. Identification of structural vs. discretionary cost drivers.

   iii. Any cost-containment measures considered but not implemented.

b) For the Basic Normal Operating expenses increase of $35.3 million, please provide full documentation, including:

   i. Evidence supporting the $12.2M impact from higher corporate expenses.

   ii. Evidence supporting the $23.1M impact from changes in the Basic allocating percentages.

   iii. Sensitivity analysis showing the impact of alternative allocation percentages.

c) Please explain the '% Normal Operating expense' allocator of 58.7% (2026 GRA) and 64.8% (2027 GRA), a change of 6.1 percentage points, including:

   i. a detailed analysis causing the percentage points change in the Allocation Methodology.

d) In Part VIII – Expenses, page 18, Figure EXP-6 suggests that "the allocation of corporate normal operating expenses to the Basic LOB is expected to remain relatively stable over the forecast period." Please explain the apparent allocator percentages contradiction between Figure EXP-6 and Figure EXP-1 at page 6.

Rationale for Question:

To review the growth in Corporate and Basic normal operating expenses.

RESPONSE:

a) Please see *MPI Exhibit #13* for revised *Part VIII EXP-1 Expense Comparison - 2027 vs 2026 GRA Rating Years*. These responses are based on the revised version of EXP-1 table. The original submission reported Basic Normal Operating Expenses under Line 6 rather than of the Total Basic allocated corporate expenses. Following this correction, the increase in Basic Normal Operating Expenses is $19.8M, compared to the previously reported increase of $35M.

   i) *Figure 1* below provides a detailed breakdown of the $18.7 million increase in Corporate Normal Operating expenses, while *Figure 2* provides a detailed breakdown of the resulting $19.8 million increase in Basic Normal Operating Expenses.

   For additional information regarding the allocation of corporate expenses to Basic, please refer to *Part VIII Figure EXP-5 Summary Table of Assumptions*, *PUB (MPI) 1-35*, and the 2026 GRA *Part X EXP Attachment A - ICAM Review Report*.

30	**Adjust for Initiative Expenses (BO 12.1 d)**							13,329	32,360	(19,031)
31	**Basic Normal Operating Expenses**							274,480	254,647	19,834

ii) MPI does not formally classify cost drivers as either "structural" or "discretionary". Costs are allocated in accordance with the ICAM, which uses allocators designed to reflect cost causation. Please refer to the 2026 GRA *Part X EXP Attachment A - ICAM Review Report* for additional information regarding the underlying cost drivers and allocation methodology.

iii) Please refer to *CC (MPI) 1-2 (f).*

b) i&ii) As discussed in part (a), the increase in Basic Normal Operating Expenses is $19.8M (revised from $35.3 million in the original filing). Of this increase, $12.9M is attributable to higher corporate normal operating expenses (revised from $12.2M), while $6.9M is attributable to a change in Basic's allocation of costs (revised from $23.1M). Please refer to *Figure 3* below which provides the supporting calculations. Details regarding the $18.7 million increase in corporate normal operating expenses and the resulting $19.8 million increase in Basic Normal Operating Expenses are provided in part (a).

Figure 3 Detail of Basic Expenses - Average Rating Years

Line No.	Average Rating Years	2027 GRA	2026 GRA	Change
1	*(C$000s,rounding may affect totals)*			
2	Part a Figure 1 Corporate Normal Ops Expenses	398,052	379,318	18,734
3	Part a Figure 2 Basic Normal Operating Expenses	274,480	254,647	19,834
4	Basic % Normal Operating Expenses (Basic/Corporate)	69.0%	67.1%	1.9%
5	Part b-i - Impact of change due to change in Normal Operations forecast ($18.7 million x 69.0%)			12,918
6	Part b-ii - Impact of change due to change in Basic allocation ($379.3 million x 1.9%)			6,915
7	Total impact to Basic Normal Operating Expenses (Line 5 & Line 6)			19,834

iii) MPI does not prepare sensitivity analyses based on alternative allocation percentages. Costs are allocated using the approved ICAM methodology and allocators designed to reflect cost causation. Please refer to the 2026 GRA *Part X EXP Attachment A - ICAM Review Report* and *PUB (MPI) 1-35* for further discussion of the allocation methodology and Basic allocators.

c) The revised table in ***MPI Exhibit #13*** shows Normal Operating expenses allocated to Basic increased by 1.9% (69.0% - 67.1%), indicating that Basic's share of the corporate normal operating expenses over the rating years is expected to remain relatively stable.

d) Please refer part (c) above.

CC (MPI) 1-15

Part and Chapter:	**Part VIII - Expenses**	**Page No.:**	**13-14**
Topic:	**Compensation Cost Escalation**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses, at page 13, it states:

> "Compensation is the largest expense category and remains a core driver of the increase across the period, with in-scope staff representing approximately 80% of FTE."

Figure EXP-5 at page 14 provides a 'Summary Table of Assumptions'.

Question:

a) Please provide evidence supporting the salary and benefit growth assumptions, including:

   i. Economic increase and retention assumptions (3.3% in 2026/27; 2.0% in 2027/28; 2.0% in 2028/29).

   ii. Step-in-scale assumptions for in-scope (1.75%) and out-of-scope (3.50%) staff.

   iii. Reconciliation of compensation growth to FTE counts (2,038.75 FTEs).

Rationale for Question:

To review the compensation cost escalation year over year. The following explanation is provided for information:

Reconciliation of compensation growth to FTE (Full-Time Equivalent) counts is the financial process of analyzing why payroll expenses changed over a period, specifically verifying whether the variance was driven by an increase or decrease in staff size (FTE counts) versus other factors like raises, bonuses, or market adjustments.

Organizations perform this reconciliation to identify "expense creep" and ensure payroll budgets remain aligned with actual business growth.

RESPONSE:

i) Refer to *Part VIII EXP Appendix 11 - Compensation Analysis* Section 1 Economic increases.

ii) Refer to *Part VIII EXP Appendix 11 - Compensation Analysis*, Section 2: In scope step in scale (merit) increases, and Section 3: Out of scope step in scale (merit) increases.

iii) Compensation growth is driven by the factors described in *Part VIII EXP Appendix 11*, which include economic increases, merit, FTE staff count changes etc. Salary increases compound annually. Even with a flat FTE count of 2,089, compensation costs will continue to naturally increase and compound annually through the forecast period. For example, if an employee receives a 3% economic increase on a $50,000 salary, $1,500 is added to the cost. In year two, the 3% economic increase is not based on the original $50,000, it is calculated on the new, higher total of $51,500, and so forth through the forecasting period.

CC (MPI) 1-16

Part and Chapter:	**Part VIII- Expenses**	**Page No.:**	**18**
Topic:	**Stability of Basic Allocation Percentages**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses, Figure EXP-6 at page 18 lists the Basic allocation percentages by year.

Question:

a) Please provide an analysis and explanation of the year-to-year changes in Basic allocation percentages (65.8% to 67.4% to 67.8% to 68.5% to 68.2% to 68.1%).

b) Please identify and explain any allocator methodology changes or data updates.

Rationale for Question:

To review the stability of the basic allocation methodology.

RESPONSE:

a) Please see *Figure 1* below for Basic Allocation Percentages and approximated dollar changes due to forecast versus allocator:

Figure 1 Basic Allocation Percentages

Line No.	Allocation % to Basic	2026/27F	2027/28F	2028/29F	2029/30F	2030/31F
1	Changes due to forecast change	0.8%	0.3%	0.5%	-0.5%	-0.1%
2	Changes due to allocation change	0.8%	0.0%	0.2%	0.1%	0.0%
4	Total	1.6%	0.4%	0.7%	-0.4%	-0.1%
5	**Allocation to Basic**	**2026/27F**	**2027/28F**	**2028/29F**	**2029/30F**	**2030/31F**
6	($000's, except where noted)					
7	Changes due to forecast change	5,998	12,155	6,269	6,561	5,664
8	Changes due to allocation change	6,043	1,495	2,757	(1,465)	(402)
9	Total	12,041	13,650	9,026	5,096	5,262

The year-to-year changes in the Basic allocation percentage of Normal Operating expenses are primarily attributable to the changes in total corporate expenses and updates to the allocator percentages. The allocators may vary from year to year due to their dynamic nature and reliance on being updated annually for most recent fiscal year financial data. Please refer to *PUB(MPI)1-35* for Basic allocator details and *Part VIII Exp Appendix 6* for details on forecasted total corporate expenses.

b) The cost allocation methodology remains unchanged, however as mentioned in part a), the allocators may vary from year to year due to their dynamic nature and reliance on being updated annually for most recent fiscal year financial data.

CC (MPI) 1-17

Part and Chapter:	**Part VIII - Expenses**	**Page No.:**	**10**
Topic:	**Initiative Placeholder Justification**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses, Figure EXP-3 at page 10 lists two placeholders:

1. Initiative Project Management Office Placeholder (2027/28 and forward $5M per year)
2. Initiative Major Program Placeholder (2027/28 and forward $10.5M per year)

Question:

a) Please provide the basis for the Initiative Project Management Office Placeholder and the Major Program Placeholder.

b) Please provide evidence that these placeholder expenses reflect realistic implementation timelines and cost profiles and are justified to be included in the cost component (basic portion) for establishing basic rates.

Rationale for Question:

To review the justification of initiative placeholder expenses to be included or excluded from basic ratemaking for the rating year.

RESPONSE:

a) Refer to *PUB (MPI) 1-054 a)*.

b) Under PUB Order, forecasted initiative expenses are not currently included in the rate, therefore the placeholder budget estimate has no impact on the Basic rate. Funding currently flows from the Rate Stabilization Reserve (RSR), once the Treasury Board (TB) authorizes MPI's fiscal budget.

MPI notes that while the PUB currently excludes certain initiatives from rate-setting considerations, MPI must still obtain Treasury Board (TB) approval of its annual operating fiscal budget to advance its modernization agenda. To effectively manage its business and technology environment, MPI requires flexibility to progress critical modernization initiatives beyond those specifically reflected in annual rate decisions. Limiting investment solely to initiatives included in PUB-approved rates would constrain MPI's ability to *proactively* and *practically* address evolving technology and infrastructure needs, leading to further accumulation of technical debt and increasing future operational and financial pressures to remedy same.

As a result, MPI includes reasonable planning provisions for anticipated modernization costs (an expected dollar placeholder) while business cases are refined and procurement processes are completed. This approach reflects prudent business practice and enables the organization to obtain TB authorization, maintain momentum on strategic initiatives that support operational effectiveness, service delivery, security, and long-term sustainability. By continuing to invest in modernization, MPI is better positioned to manage risks, improve resiliency, and control and avoid future remediation costs.

MPI also notes that the exclusion of certain modernization-related costs from rate-setting considerations can create challenges in maintaining capital adequacy, as these investments continue to be required to support MPI's operations. Over time, this may contribute to the need for greater capital accumulation to maintain its legislated MCT target, i.e., a future capital build.

When evaluating rate-setting inputs and individual operating expense items, MPI believes it is beneficial to focus on the key drivers of long-term value and organizational sustainability. These include addressing technical debt in a timely manner, mitigating knowledge-retention risks associated with legacy systems, and continuing to strengthen cybersecurity capabilities. Progress in these areas helps ensure a secure, resilient, and efficient operating environment while

supporting the delivery of reliable services to Manitobans. As MPI advances these priorities, the related costs will be reflected in future rate considerations and contribute to the corporation's long-term financial and operational stability. Ultimately, the costs associated with initiatives will be recovered either directly through rates or indirectly through the RSR.

MPI submits it is important to maintain focus on the factors that most meaningfully influence long-term customer value and organizational sustainability, including the timely advancement of modernization initiatives, the management of technical debt, system resiliency, cybersecurity, and operational effectiveness.

CC (MPI) 1-18

Part and Chapter:	**Part VIII – Expenses**	**Page No.:**	**9**
Topic:	**Onerous Contract Expenses**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses, Figure EXP-2 at page 9, line 14 states:

> "2025/26A includes impairment of $15.1 million Corporate ($8.0 million Basic) and onerous contract expenses of $37.3 million ($29.5 million Basic)."

Question:

a) Please provide a full analysis and explanation supporting the Onerous Contract expense for both Corporate ($37.3M) and Basic ($29.5 M).

b) Please explain how this expense affects future licensing costs and initiative expenses, if at all.

Rationale for Question:

To understand and review the Onerous Contract expenses.

RESPONSE:

a) Please see *PUB (MPI) 1-38 Appendix 1c - Confidential* for the Onerous Contract memo, all details requested are contained therein.

b) The subsequent accounting will involve unwinding the discounted present value until the liability equals the cash payment due. Any variance on any settlement of the liability will be recorded through the Statement of Operations.

CC (MPI) 1-19

Part and Chapter:	**Part VIII – Expenses**	**Page No.:**	**13**
Topic:	**Technology cost drivers**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses at page 13, it states:

> "Data processing is the second largest expense category and technology and data processing costs (which the project implementation placeholders will be predominantly allocated to) are a continued significant driver of expenditures for the Corporation."

Question:

a) Please provide a decomposition of data processing costs over the last 10 years identifying major systems, vendors and licensing components.

b) For greater clarity, please provide a narrative explanation why data processing remains the second-largest expense category, include data processing cost mitigation and containment strategies under consideration.

Rationale for Question:

To clarify and better understand the data processing cost drivers and actions taken to contain these costs drivers, if any.

RESPONSE:

a) Refer to *Appendix 1 - Confidential*. This exercise for the last 5 years was undertaken as part of a broader effort to establish a current baseline for the development of the 2027/28 budget and subsequent forecast years. The historical decomposition was therefore also intended to improve understanding of

the underlying cost base and support future forecasting and budgeting. The work was completed as a manual internal exercise involving collaboration across vendor management, IT and Finance. At present, MPI does not have a dedicated reporting tool that can readily produce this level of historical vendor and licensing cost decomposition. The analysis is currently performed through excel based processes, including extraction, review, classification, reconciliation and compilation of the underlying transaction level journal entry information. The preparation of this historical analysis represents a significant manual effort and requires substantial internal effort across departments. MPI is using this exercise to improve the quality and usability of the underlying cost information for future budgeting and forecasting, while recognizing that the historical data does not always contain the level of vendor level detail that would be available from a purpose-built reporting solution. Given the limitations of the historical data, including that vendor codes were not consistently captured on all historical journal entries, the analysis required a manual review and compilation of the relevant journal entries. The analysis should be understood in this context.

b) MPI's operations are technology-dependent and require ongoing investment to maintain secure, reliable and modern systems. MPI's cost containment approach is focused on ensuring that these expenditures are supported by approved business needs, aligned to contractual obligations and actual utilization, and subject to continued budget discipline through the Corporation's established governance processes.

CC (MPI) 1-20

Part and Chapter:	**Part VIII – Expenses**	**Page No.:**	**15**
Topic:	**Cost Allocation Methodology (ICAM)**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses EXP-3 at page 15 refers to Basic Expenses: Cost Allocation Methodology as follows:

> "The Corporation's integrated cost allocation methodology … robust and regulator-approved … allocators include FTE, incurred claims, PMO, WCCCCR."

Question:

a) Please provide the full allocator workbook for FTE, claims incurred, PMO allocation, and WCCCR.

b) Please provide evidence that allocators reflect actual resource usage and service delivery.

c) Please provide any recent review or external validation of allocator methodology, if any.

Rationale for Question:

To review the Integrated Cost Allocation Methodology (ICAM) and validation of allocators.

RESPONSE:

a) Please refer to *PUB (MPI) 1-35* for the list of Basic allocators and *Part VIII Figure EXP-5 Summary Table of Assumptions* for the list of Basic allocators and assumptions.

b) Evidence supporting the appropriateness of the allocators is provided in the *2026 GRA Part X EXP Attachment A ICAM Review Report*, which includes KPMG's assessment of MPI's allocation methodology and allocation drivers. Additional details regarding the allocators applied to Basic are provided in *PUB (MPI) 1-35*. Corporate expenses are allocated to Basic in accordance with the ICAM described throughout the expense chapter, and total corporate expense variances are discussed in *Part VIII EXP Appendix 6*.

c) Please refer to the *2026 GRA Part X – Expenses, Section EXP.4 Basic Expenses: Cost Allocation Methodology for Normal Operating Expenses (IFRS 17).*

CC (MPI) 1-21

Part and Chapter:	**Part VIII – Expenses**	**Page No.:**	**18-19**
Topic:	**Capitalization Criteria**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses at pages 18-19, it states:

> "There are two types of CPFS (Corporate Project Funding Summary) expenditures incurred by MPI: facilities and infrastructure (which includes administrative expenditure on physical properties such as buildings and automobiles) and technology expenditure with the implementation of corporate initiatives. Under either, expenditure can be expensed or capitalized, dependent upon International Financial Reporting Standards (IFRS) and MPI evaluation of criteria under IFRS for capitalization on an item-by-item basis."

Question:

a) Please file a copy of MPI's IFRS Capitalization Policy.

b) Please file a schedule of projects capitalized vs. expensed in the forecast period with supporting explanatory narrative.

Rationale for Question:

To review MPI's capitalization policy and processes.

RESPONSE:

a) Please see *Appendix 1a, 1b, and 1c* for MPI's Capitalization Policies.

b) Please see *Part VIII EXP Appendix 25 -10 Year Summary Basic Corporate Project Expenditures (Expense and Deferred Development)* for the schedule of project cost forecasts split between deferred and expense. Of the projects listed, the Major Programs MyMPI & IRP Online initiative was the only project determined to meet the capitalization requirements.

6.6 Policy on Capitalization of Deferred Development Costs (Intangible Assets)

6.6.1 Policy Statement

This policy is set out to establish the treatment for capitalization of deferred development costs (intangible assets).

6.6.2 Policy Details

This policy documents the accounting policy for the treatment for capitalization of deferred development costs (intangible assets).

The Corporation has various initiatives and projects which are expensed or reviewed by management for capitalization in accordance with IAS 38 Intangible Assets. Deferred Development Costs, which are "internally generated intangible assets" under IAS 38 Intangible Assets will be evaluated for all lines of business (Basic, Extension, SRE and DVA) against the criteria for determining if such costs are to be deferred to future periods or expensed in the current period.

6.6.3 Capitalization and Amortization Decisions

Project development costs are to be capitalized as assets and deferred to future periods when they meet all the following four criteria:

1. Identifiability – the asset is separable and arises from contractual or other legal rights.
2. Control – the Corporation has the power to obtain the future economic benefit and/or restrict others to those benefits.
3. Future economic benefit – the Corporation benefits from the use of the asset (revenue, cost savings or other benefits).
4. Total project costs to be deferred are equal to or greater than $500,000.

Capitalization also applies when the intention is to complete, use or sell the intangible asset at a future date and that the flow of future economic benefits attributable to the use of the asset contain a degree of certainty on the basis of the evidence available at the time of the initial recognition.

When capitalizing a project, expenses incurred during the development phase that are directly attributable to preparing the asset for its intended use and that meet the recognition criteria may be considered to be deferred. Such expenses include:

i) Payments to outside companies such as contract fees, data centre services, consulting costs, travel and incidental costs;

ii) Payments associated with direct assigned employee compensation costs including travel and incidental costs;

iii) Data processing costs for testing computer systems being developed; and

iv) Packaged software costs.

Organizational and development projects will be amortized over a five-year period unless the useful life is deemed to be longer, but in no case shall the useful life exceed 10 years, starting from the month after the asset becomes available for use.

6.11 Policy on Capitalization and Depreciation of Property and Equipment

6.11.1 Policy Statement

This policy establishes the requirements relating to capitalizing property and equipment and the depreciation of property and equipment.

6.11.2 Policy Details

Furniture, equipment and computer equipment is recorded as capital assets if the cost of the individual asset equals or exceeds $5,000.00.

Land, land improvements, buildings, leasehold improvements, vehicles, systems furniture and demountable walls will be recorded as capital assets.

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Replacement costs are capitalized when incurred and if it is probable that future economic benefits associated with the item will flow to the Corporation and the cost of the item can be measured reliably. All repairs and maintenance costs are recognized in Net income (loss) attributable to Owner of the Corporation during the period in which they occur.

Depreciation is provided on a straight-line basis which will depreciate the cost of each asset to its residual value over its estimated useful life:

Land & Buildings

- HVAC systems 20 years
- land improvements 25 years
- roofing systems 30 years
- elevators/escalators 30 years
- buildings 40 years

Furniture & Equipment

- computer equipment 3 years

- vehicles 5 years
- furniture and equipment 10 years
- demountable wall systems 10 years

Buildings held under a long-term lease arrangement are depreciated on a straight-line basis over 40 years. Leasehold improvements are carried at cost and are depreciated over the term of the lease plus the first renewal period.

Tenant improvements are carried at cost and are depreciated over the term of the lease plus the first renewal period.

Depreciation of construction in progress will begin, in accordance with the above policy, when construction has been completed, and the property is deemed available for use.

Land is not subject to depreciation and is carried at cost.

6.12 Policy on Recognition and Measurement of Investment Property

6.12.1 Policy Statement

This policy establishes the requirements for the recognition and measurement of Investment Property

6.12.2 Policy Details

The Corporation applies IAS 40 in the recognition and measurement of investment property.

In the determination of what constitutes investment property relative to property and equipment, the Corporation considers only property that is 100 per cent utilized as investment property to be classified as investment property.

The Corporation's investment property, which is property held 100 per cent to earn rentals and/or capital appreciation, is measured initially at its cost, including transaction costs. The Corporation has elected to use the cost model to subsequently value its investment property. Therefore, the investment property's carrying amount is valued at cost less accumulated depreciation and impairment losses. Depreciation is based on the useful life of each component of the investment property along with the property's residual value.

The fair value of the investment property is disclosed based on an external valuation that occurs, at a minimum, every other year.

The Corporation assesses its investment property for impairment on an annual basis in accordance with the impairment test guidance set forth in IAS 36 Impairment of Assets.

Depreciation is provided on a straight-line basis which will depreciate the cost of each asset to its residual value over its estimated useful life:

- parkade 40 years
- surface parking lot held at cost

CC (MPI) 1-22

Part and Chapter:	**Part VIII—Expenses**	**Page No.:**	**19**
Topic:	**Deferred Development Costs**		
Sub Topic:			

Preamble to IR (If Any):

Page 19, Part VIII – Expenses it states:

> "Amortization expense is associated with intangible assets such as deferred development."

Question:

a) Please provide a 10-year summary, by project, of deferred development additions and amortization.

b) Please provide a summary, by project, of major technology assets entering amortization in 2027/28 – 2030/31 and reconcile to Appendix 17.

Rationale for Question:

To review the status of the remaining (post Program Nova) deferred development costs.

RESPONSE:

a) Please see *Part VIII EXP Appendix 25 - 10 Year Summary Basic Corporate Project Expenditures (Expense and Deferred Development)* for the schedule of project cost forecasts split between deferred and expense.

b) Please see *MPI Exhibit #11* - *Part VIII EXP Appendix 17 - Basic Deferred Development and Amortization Costs - Clean* for the forecasted amortization of all technology assets that qualify for deferral under *CC (MPI) 1-21 Appendix 1a*, including those that will be amortized during the period of 2027/28 – 2030/31.

All listed assets are expected to commence amortization before 2027/28, including the Major Programs MyMPI & IRP Online initiative, which is expected to begin amortization in 2026/27.

CC (MPI) 1-23

Part and Chapter:	**Part VIII – Expenses**	**Page No.:**	**8**
Topic:	**Commission structure review**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses at page 8 it states:

> "MPI pays compensation in the form of commissions and flat fees to brokers (approximately 300) across Manitoba for selling Basic insurance products. There are variable commissions related to the purchase of Basic insurance policies and flat fees which MPI pays for administering various types of transactions."

Also see for reference EXP Appendix 21: Expense details Broker Commissions Paid and Written.

Question:

a) Please provide a narrative discussion on the reasonableness and equity of the current broker commission structure.

b) Please provide broker channel performance metrics used to justify commission levels, if any.

Rationale for Question:

To review the current broker commission structure.

RESPONSE:

a) MPI believes that the current broker commission structure is reasonable and equitable because it is designed to compensate brokers in proportion to the services they perform while supporting consistent access to insurance and licensing services for customers across Manitoba.

The structure combines commissions for insurance sales with flat-fee compensation for transactional service. This approach recognizes that brokers contribute value in different ways, including policy administration, customer service, driver licensing support, and other activities performed on MPI's behalf. By compensating both sales and service-related transactions, the structure seeks to align compensation with the work performed.

The structure is equitable because the same commission and fee schedule applies across the whole broker network. Brokers are compensated using a common framework, established through negotiations with IBAM (Insurance Brokers Association of Manitoba) and reflected in legislation. This ensures consistent treatment regardless of broker size or location. Compensation naturally varies based on the volume and type of transactions completed.

b) MPI does not directly tie broker commission levels to specific broker performance metrics. Commission rates are established through negotiation with IBAM and then incorporated into legislation.

MPI does monitor a range of broker performance and service quality indicators, including transaction volumes, processing accuracy, compliance measures, audit results and customer service metrics. These are used to assess operational performance and identify opportunities for improvement within the broker channel, however they are not used to determine commission rates.

CC (MPI) 1-24

Part and Chapter:	**Part VIII– Expenses** **Part VIII – EXP Appendix 3, page 1**	**Page No.:**	**13** **20**
Topic:	**Compound Annual Growth Rates**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – Expenses at page 13 it states:

> "As noted in *Figure EXP App 3-3*, total corporate expense forecast has a compounded annual growth rate of 2.8% average over the 5-year forecast period."

Part VIII – EXP Appendix 3 at page 1 shows Compensation – Benefits (line 3) are growing at 5.1% for the 26/27 – 30/31 5-year Forecast period. For the same period Public Information/Advertising is growing at 4.7% (line 11), Furniture & Equipment is growing at 7.8% (line 18) , Initiative Implementation Placeholder at 28.5% (line 27) , etc.

In Part VIII – Expenses at page 20 MPI concludes:

> "MPI remains committed to effective management of operating expenses to achieve rate predictability and stability **while providing the Basic insurance product at an affordable price**." [emphasis added].

Question:

a) Please provide a detailed justification discussion as to the reasons expense categories are growing, on a compound basis, at rates higher than CPI.

Rationale for Question:

To review operating expense compound growth increases in excess of CPI which may impact customer affordability.

RESPONSE:

MPI does not agree that the selected expense categories demonstrate that MPI's overall expense forecast is growing in excess of CPI in the manner indicated. As filed in *Part VIII Expenses chapter, page 13*, the relevant key takeaway is that total corporate expenses have a compounded annual growth rate (CAGR) of 2.8% over the five-year forecast period (*Figure EXP App 3-3*). Basic's portion of these allocated expenses have a compounded annual growth rate of 3% over the five-year forecast period (*Figure EXP App 3-1*). This is the appropriate overall measure of the forecast trend because it reflects the combined impact of all expense categories, including increases, decreases and offsets across the corporate expense base. MPI also filed its CPI forecast in support of the Application, and the 2.8% total corporate expense CAGR is largely consistent with that CPI forecast.

The expense categories identified should not be interpreted as CPI-driven categories. The key drivers of MPI's corporate expense base are the largest categories identified in the key takeaways, including compensation, data processing, special services, merchant fees, and the initiative project placeholder. These categories represent the majority of corporate operating expenses over the 10-year period, but their underlying drivers are not simply general CPI. Compensation is driven by approved staffing levels, collective agreement and compensation assumptions, benefit costs and related payroll assumptions. Data processing is driven by technology licensing, data centre and vendor commitments, cloud and system requirements, and the timing and nature of technology modernization. Special services, merchant fees and other large categories are driven by service requirements, transaction volumes, contractual pricing, vendor arrangements, banking/transaction costs and business requirements. As a result, isolating individual categories and comparing their individual CAGR to CPI does not provide a meaningful assessment of MPI's overall expense management or affordability.

MPI also clarifies that the Initiative Implementation Placeholder CAGR cited in the preamble is not comparable to the other expense category CAGRs. The Initiative Implementation Placeholder is a forecast-period planning amount used for comparative and forecasting purposes and its historical spend was not $0, it is categorized where the actuals were incurred (as salaries and data processing expenses). Therefore, describing the 28.5% CAGR for the Initiative Implementation Placeholder as an actual increase in operating expenses is not accurate. The placeholder reflects how future initiative-related costs are presented in the forecast, not a like-for-like increase in an established actual expense category. Refer to *Part VIII EXP Appendix 22: Section 2.8 Initiative expenses* in the application and *PUB (MPI) 1-54* for details on the basis of the initiative placeholder.

Further, Basic expenses should be considered in the context of MPI's summary of Basic expenses as a share of corporate expenses (filed). Expenses are first budgeted and forecast at the corporate level and are then allocated to Basic using MPI's Integrated Cost Allocation Methodology. MPI submits it is not appropriate to isolate selected corporate category increases and imply that those isolated increases directly translate into Basic rate pressure. The overall corporate CAGR, the allocation methodology, and the full mix of expense increases and offsets also need to be considered.

MPI's evidence specifically presents an overall corporate CAGR of 2.8% to provide that broader context. *Figure EXP-2 line 7* also demonstrates Basic's share of corporate expenses as an overall percentage remains approximately stable throughout the forecast period. In that context, MPI's expense forecast remains disciplined and broadly aligned with the CPI forecast, while continuing to reflect the actual cost drivers required to deliver MPI's operations, technology services, and Basic insurance product.

CC (MPI) 1-25

Part and Chapter:	**Part VIII– Expenses** **Part VIII – EXP Appendix 8**	**Page No.:**	**2**
Topic:	**Staffing levels 2025/26**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII - EXP Appendix 8 at page 2, under the Category of 'Clerical', the total budget on line 39 was 515.6 FTEs, the actual clerical FTEs on line 7 are 212.5. This represents a reduction of 303.1 FTE. There appears to be a corresponding increase of 243.6 Technical/Professional FTEs on line 48.

Question:

a) Please provide a detailed FTE analysis explaining the movement of clerical and technical/professional FTEs and also provide the corresponding compensation impact on the compensation budget/forecasts.

Rationale for Question:

To clarify staffing FTE movements amongst staffing categories and assessing the impact on the compensation forecasts.

RESPONSE:

a) The change between 2024/25 and 2025/26 reflects an update to the job category assigned to positions for reporting purposes. MPI reviewed the duties for the positions included in the Operations, Claims, and Customer & Product Value Divisions, and aligned them to the appropriate job category based on the nature of the work performed. As a result, positions that had previously been reported in one staffing category were reported in the appropriate category in 2025/26. The changes do not represent new FTE growth, reductions, changes to job duties, or changes to required qualifications. The change did not impact compensation and salaries;

rather, it reflects the correction of the job category used for reporting purposes. For detailed view of the change in Job Category, refer to Appendix 20 filed as PUB (MPI) 2-40 Appendix 1 (2026 GRA).

CC (MPI) 1-26

Part and Chapter:	**Part VIII– Expenses** **EXP Appendix 10** **EXP Appendix 11**	**Page No.:**	**2** **4**
Topic:	**Improvement Initiative Staffing**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII, EXP Appendix 10 at page 2 shows Improvement Initiative Staffing of 50 FTEs (line 28).

These are excluded from Normal Staffing counts as shown on Appendix 11, page 4 which is 2038.8 for the forecasting period.

Appendix 10 shows a total staffing of 2,088.8 FTEs at page 3 (showing the additional 50 Improvement Initiative Staffing FTEs).

Question:

a) Please provide a narrative discussion for the need and justification of the 50 Improvement Initiative FTEs.

Rationale for Question:

To understand the need for the 50 Improvement Initiative FTEs post Nova.

RESPONSE:

a) The 2,089 FTEs are Treasury Board approved and what MPI therefore adheres to.

Currently, the 50 initiative FTEs represent staffing capacity required to support MPI's initiatives and are presented separately from normal staffing to avoid overstating MPI's ongoing operating workforce. This treatment is consistent with the 2026 GRA, where MPI explained that corporate initiative FTE counts were reduced to 50 and that total

corporate staffing included both normal operations and initiative FTEs. It is also consistent with the 2027 GRA, which continues to distinguish Normal Operations staffing from initiative staffing in *Part VIII EXP Appendix 10* and *Part VIII EXP Appendix 11*.

The need for these FTEs is driven by MPI's continuing modernization and initiative workload following Project Nova. Although Project Nova has closed, MPI continues to deliver projects. The 2026 GRA record described initiative expenses as project-specific and aligned to the current IT roadmap, with internal compensation forming part of the initiative expense forecast. The filed materials also explained that initiative expenses are distinct from normal operating expenses and, for rate-setting purposes, are treated separately in accordance with PUB direction on initiative expenses.

For the 2027 GRA, MPI's budget framework maintained a flat normal staffing ceiling and directed divisions to manage existing FTE capacity toward the most critical work. At the same time, the framework recognized that initiative funding and resourcing must be planned separately, and through approved business cases. The 2027 GRA also explained that certain roles previously funded through initiatives were reclassified into normal operations only where they represented ongoing, permanent operational needs. That distinction confirms that the remaining 50 initiative FTEs are not part of the normal operations baseline.

Accordingly, the 50 initiative FTEs are justified as a controlled and transparent resourcing provision for initiative delivery. They provide capacity to execute approved and planned modernization work, support transition and implementation activities, and reduce reliance on external resources where internal knowledge and continuity are required. Excluding them from normal staffing ensures that MPI's normal operations complement remains transparent and not inflated by initiative-related resourcing, while including them in total corporate staffing provides a complete view of the workforce capacity required to deliver both ongoing operations and the approved initiative portfolio. MPI has the latitude to shift between normal operating and initiative FTE's without exceeding its Treasury Board approved ceiling.

CC (MPI) 1-27

Part and Chapter:	**Part II -- MFR Appendix 1**	**Page No.:**	**2-3**
Topic:	**3.1 End-to-End Adjusting Strategy**		
Sub Topic:			

Preamble to IR (If Any):

In Part II – MFR Appendix 1 at pages 2-3 it states:

> "The End-to-End Adjusting Strategy addresses long-standing issues in the physical
>
> damage claims process, including delays, complexity, and inconsistent outcomes.
>
> **What has been delivered:**
>
> • A new claims model has been defined that moves to a more centralized,
>
> end-to-end approach.
>
> • Areas of rework, duplication, and delay have been identified and targeted for improvement.
>
> • A dedicated pilot team has been established to test process improvements before rolling out to general operations."

Question:

a) Please provide a narrative discussion on the long-standing operational issues in managing physical damage claims.

b) Please provide a copy of the 'new claims model' and explain how this redesigned operating model addresses the current operational issues.

   i. Please also provide expected cost savings, expected impact on claim cycle time and KPIs used to measure success.

c) Please elaborate whether a 'new claims model' is also under consideration for managing PIPP claims.

Rationale for Question:

To assess the new physical damage claims model and better understand the operational physical damage claims handling issues.

RESPONSE:

a) Physical damage claims have been challenged by long-standing operational issues that affect both customer experience and organizational performance. Customers continue to experience delays, unnecessary complexity, and inconsistent outcomes throughout the claims process, contributing to a decline in trust and confidence in the service provided. Feedback from customers consistently highlights frustration with having to navigate multiple points of contact, repeatedly follow up for updates and seek clarification on basic claim information and decisions. Due to the PD claims process inefficiencies, physical damage claim cycle time is higher than desired and is not in line with best practice.

   Internally, the current regional & location based adjusting model has resulted in fragmented work processes creating inefficiencies, rework, inconsistent decision-making, and unclear accountability. This regional model made sense when customers visited adjusters in person at the service center locations, but following COVID, the primary service delivery method for customers has been virtual. These challenges limit the ability to deliver a seamless and predictable customer experience while also reducing operational effectiveness and workforce capacity.

   These operational issues are reflected in the customer satisfaction results. Customer satisfaction within the adjusting portion of the claims journey is currently 57%, while total loss satisfaction is 54%, both significantly below the

corporate target of 70%. Performance challenges are also evident in claim cycle times. For example, a simple liability claim currently takes an average of 23 days to resolve. A significant contributor to this delay is the reliance on email-based communication and customer-completed documentation after the initial claim report, rather than resolving information requirements in real time while customers are actively engaged with an adjuster. This creates additional touchpoints, prolongs claim resolution, and increases effort for both customers and employees.

Collectively, these issues have created a claims experience that is more complex, slower, and less consistent than customers expect and deserve, underscoring the need for operational modernization and a more streamlined end-to-end claims model.

b) The redesigned claims operating model is intended to address the long-standing challenges within physical damage claims by creating a more centralized, streamlined, and customer-focused approach to claim resolution. The future-state model is designed to reduce complexity, minimize handoffs, clarify accountability, and enable more consistent decision-making across the province. By centralizing work and standardizing processes, the model creates a single integrated operation that is better positioned to leverage expertise, improve productivity, and deliver a more consistent customer experience regardless of geographic location.

The redesigned model directly addresses many of the operational issues identified within the current state. The existing regional structure has contributed to fragmented work, multiple handoffs, inconsistent processes, and unnecessary administrative effort. Under the new model, adjusters are focused on decision-making and customer interactions while clerical and administrative activities are consolidated and streamlined through dedicated support functions. This allows claims to move more efficiently through the process, reduces rework, and creates clearer accountability for outcomes.

From a customer perspective, the model emphasizes timely communication, faster decisions, and resolution at the earliest possible stage of the claim. The objective is to provide customers with greater clarity and certainty by addressing liability and information requirements during the initial customer interaction whenever possible, rather than relying on multiple follow-up emails, documentation requests, and delayed responses.

Success of the redesigned operating model will be measured through a combination of customer, operational, and employee metrics. Key performance indicators include end-to-end claim cycle time from First Notice of Loss to claim resolution, First Time Resolution Rate, customer satisfaction, and the volume of administrative tasks completed on claim files. Additional workforce measures include employee engagement within the Adjusting Operations Centre (AOC), regrettable turnover, and the percentage of Winnipeg-based operations adjusters integrated into the new operating model.

While the pilot remains in its early stages, initial results have been encouraging. Since the pilot launched on June 22, the team has handled 118 simple liability claims. Preliminary results show an average cycle time of one day compared to a pre-pilot average of 23 days, with 61% of claims resolved at the first notice of loss. These early outcomes suggest that direct customer engagement, rapid liability decisions, and early completion of administrative activities can significantly improve the speed and efficiency of claim handling.

A key contributor to these results has been the shift toward proactive customer engagement. Adjusters are speaking directly with customers at first contact or within 24 hours of claim reporting, enabling faster liability decisions and reducing delays associated with obtaining information after the initial report. Similarly, administrative activities such as witness contact and information gathering are occurring much earlier in the claim lifecycle. The elimination of driver's reports is also proving to be a significant process improvement and has contributed to the cycle-time reductions observed to date.

Although customer survey results are not yet available, anecdotal feedback has been positive. Early conversations indicate that customers value receiving timely decisions and proactive communication, even in situations where they are found liable. In addition, collaboration with the Contact Centre to ensure claims are routed to the appropriate adjuster at the outset has demonstrated early benefits and is expected to further improve performance as volumes increase.

Expected financial benefits from the redesigned operating model could be realized through increased operational efficiency, reduced administrative effort, improved workforce utilization, and lower levels of rework. As the pilot progresses and additional data becomes available, more detailed estimates regarding sustainable cost savings and long-term productivity improvements will be developed and validated.

c) A new model is not being considered for PIPP claims handling as the current PIPP model is already focused on end-to-end claims handling with centralization where appropriate.

CC (MPI) 1-28

Part and Chapter:	**Part II –Overview**	**Page No.:**	**4**
Topic:	**Claims Cost Increase Drivers**		
Sub Topic:			

Preamble to IR (If Any):

In Part II – Overview at page 4 it states:

> "Claims costs continue to increase, driven by upward pressure in both physical damage and PIPP experience. In particular, higher physical damage claim severity, reflecting ongoing increases in vehicle parts prices, continues to put pressure on MPI rates."

Part VI – Claims Forecasting – Redacted, page 12 indicates an increase of $59.3 million for rating year 2027/28 comparing the 2026 GRA to the 2027 GRA.

Part VI – Claims Forecasting -- Redacted, page 93-94 distributing the $59.3 million increase by coverage; indicating the major increases in Accident Benefits – Weekly Indemnity ($23.2 million) and Collision ($35.6 million).

Question:

a) Please provide a decomposition and a narrative discussion of claims cost increases over the last three fiscal years, separating:
   i. Physical damage frequency and severity (parts, labour, repair materials, etc.)
   ii. PIPP severity and frequency

b) Please provide a narrative discussion on the levers MPI exercises to mitigate and/or control claims cost increases.

Rationale for Question:

To clarify and understand, in general terms, the current claims cost drivers.

RESPONSE:

a)

i. Over the last three fiscal years, physical damage claims costs have been influenced by both claim frequency and claim severity. Repaired claim volume increased from 88,915 claims in fiscal year 2022/23 to 100,672 claims in fiscal year 2024/25, reflecting higher repair volumes. During the same period, average gross repair severity increased from $4,791 per claim to $5,260 per claim.

On the severity side, increased repair costs have primarily been driven by growth in vehicle parts costs, repair material costs, and the increasing complexity of vehicle repairs. Average parts cost increased from $1,895 per claim in fiscal year 2022/23 to $2,155 per claim in fiscal year 2024/25, while average repair material costs increased from $482 to $521 per claim. Parts counts remained relatively stable at approximately 7.4 parts per claim over the period; however, the average cost per part increased from $255 to $291. This indicates that increased parts expenditures were primarily driven by higher part prices rather than increased part quantities.

Physical damage claim severity is also affected by the increasing complexity of modern vehicle construction and repair. Newer vehicles incorporate advanced materials, safety systems, sensors, cameras, and calibration requirements that increase the cost and complexity of repairs and can result in additional repair procedures being required to restore vehicles to pre-loss condition.

Collectively, increased repair volumes, higher parts prices, higher repair material costs, and increasing vehicle complexity have contributed to upward pressure on physical damage claims costs over the last three fiscal years.

ii. Over the last three fiscal years, PIPP claims costs have been influenced by both claim frequency and claim severity.

On the frequency side, MPI's filed evidence indicates that PIPP claim frequency was materially affected by changes in mobility associated with the COVID-19 pandemic and the subsequent return to more normal driving activity. Pandemic-related reductions in mobility produced significant declines in PIPP claim frequency in accident years 2020 through 2022. As mobility increased following the pandemic, claim frequency also increased. MPI's current forecasting models for the major PIPP coverages include mobility and post-pandemic "new normal" parameters where they were found to be statistically significant, to isolate the impact of pandemic-era mobility reductions and ongoing changes in driving patterns. For the 2027 GRA, MPI noted that projected losses are higher than in the prior GRA primarily because of a flatter frequency outlook relative to the declining frequency assumed in the 2026 GRA.

On the severity side, PIPP costs have been affected by growth in wages, health care costs, and other injury-related benefits. MPI notes that Weekly Indemnity severity is primarily driven by wage growth, while other Accident Benefits coverages are affected by health care inflation, including the costs of medical supplies, prescription drugs, treatments, and associated services. Manitoba health care inflation peaked at 7.5% in April 2023 and had increased to 4.46% between March 2025 and March 2026.

b) MPI mitigates and controls physical damage claims cost increases through operational practices applied across the Repair, Total Loss, Salvage, and Subrogation dimensions.

In the Repair dimension, MPI applies estimating standards and monitors repair shop performance through Ask Approve Variance and Realized Parts Savings. These controls support accurate repair estimates and encourage the use of cost-effective alternative parts, where available, to help reduce repair costs.

In the Total Loss dimension, MPI uses Audatex as an external valuation tool to establish an initial vehicle value. MPI monitors the variance between the initial valuation and the final settlement amount to assess whether settlement outcomes remain aligned with valuations. Maintaining reasonable variance between these amounts supports MPIs ability to monitor and control total loss claim costs.

In the Salvage dimension, MPI recovers amounts from total loss vehicles through the salvage sale process. Salvage Return measures the amount recovered relative to a vehicle's actual cash value, and these recoveries help offset claim costs paid on total loss claims by reducing the net cost of the claim.

In the Subrogation dimension, MPI pursues recoveries from responsible parties where recovery opportunities exist. The Recovery Ratio reflects the proportion of incurred claim costs recovered through subrogation efforts. These recoveries help offset paid claim costs and reduce MPIs net claims cost exposure.

PIPP is focused on ensuring customers receive appropriate benefits based on their medical requirements. While many PIPP-related costs are beyond MPI's control, the focus remains on timely review of medical requirements and, where appropriate, ensuring funding decisions for higher-cost items consider multiple supplier alternatives, typically three. This approach helps balance quality and cost, in conjunction with occupational therapy assessments, to support medical appropriateness.

Supporting claimants in return-to-work remains an area of focus to help ensure the duration of income replacement is appropriate and aligned with each claimant's functional, psychological, and vocational abilities. Active case management is supported by several checkpoints, including multidisciplinary and leadership reviews, to confirm the appropriateness of the return-to-work plan.

CC (MPI) 1-29

Part and Chapter:	**Part VIII External Actuary Review**	**Page No.:**	**4-5**
Topic:	**Valuation Methodologies**		
Sub Topic:			

Preamble to IR (If Any)

In Part VIII – External Actuary Review at page 4, it indicates the Appointed Actuary prepared an extra policy valuation review as at September 30, 2025.

In Part VIII – External Actuary Review at page 5, Figure EAR-1 indicates an unfavourable claims incurred run-off of $57.5 million mainly caused by Valuation Methodology changes of $52.1 million.

Question:

a) For greater clarity, please explain the reason and value received for the extra valuation review as at September 30, 2025.

b) Please provide, for greater clarity, a narrative discussion on the various valuation methods used by the Appointed Actuary in valuing MPI's policy liabilities as at March 31, 2026, including the change in methodology resulting in an unfavourable run-off of $52.1 million. (For reference, please see Part VIII – EAR Attachment B pages 42 to 43).

Rationale for Question:

To clarify the change and financial impact in valuation methods used resulting in unfavourable claims incurred run-offs.

RESPONSE:

a) The valuation as at September 2025 provided the regular review of the policy liabilities at the mid of the fiscal year 2025/26. In addition, the Appointed Actuary also reviewed the study to update termination rates applicable to certain PIPP coverages. The review provided an early assessment of the impact to the policy liabilities due to the proposed changes to the termination rates.

b) The implementation of the PIPP Termination Rate & Methodology Update Project was the primary contributor to the unfavorable development, contributing 52.1M of the 57.5M development.

   i. Termination rates were revised to reflect MPI's own historical accident benefits data which is anticipated to reduce case reserves by $74M.

   ii. Corresponding changes were made to the actuarial valuation framework to ensure consistency with the updated case reserve assumptions. These included:

      - Increased reliance on paid loss data by switching to paid methodology for ultimate selection, reflecting reduced reliability of incurred data following changes to case reserving methodology since historical diagonals were not restated due to data limitations.

      - Adoption of a unified reserving approach combining Loss Development Factors (LDFs) and Cape Cod methods.

      - Refinement of segmentation, payment patterns, and tail factor assumptions to improve stability and responsiveness of estimates.

      - Key valuation assumptions (e.g., decay rate, tail factors, payment patterns) have been selected using a combination of historical analysis and actuarial judgment, with consideration of recent operational impacts

The remaining 5.4M in unfavourable development is driven by unfavourable development in non-catastrophe claims comprehensive coverages from rising severity and frequency in 2023 and 2024 loss years, combined with unfavourable development on non-indexed accident benefits from rising severity on permanent impairment benefits.

For more details on the different methods used by the Appointed Actuary, please refer to the Appointed Actuary Report in *Part VIII EAR Attachment A – External Actuary Report Signed Mar 31 2026.*

CC (MPI) 1-30

Part and Chapter:	**Part VIII – External Actuary Review** **Part VIII - EAR Attachment B -Appendix to the Appointed Actuary Report**	**Page No.:**	**7** **892**
Topic:	**PIPP Termination Rate & Methodology Update Project**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII – External Actuary Review at page 7 it states:

> **"EAR.2.2 Changes to the Valuation Methodology**
> The **termination rates and methodologies** for Weekly Indemnity and ABO Indexed were revised in FY 2025/26 (see *Attachment B – Appointed Actuary Report as at March 31, 2026 Appendix:* ***PIPP Termination Rate & Methodology Update Project****)*, and this change in methodology led to **unfavourable development of $52.1M.** Most of this was from Weekly Indemnity which had unfavourable development of $51.2M, most of which was from loss year 2023 and 2024. ABO Indexed had unfavourable development of $0.9M."

In Part VIII – EAR Attachment B at page 892 under PIPP Termination Rate & Methodology Update Project it states:

> "The total impact to liabilities of both case reserves and valuation changes across Weekly Indemnity and Personal Care Assistance sums to a $**100M reduction to reserves, as of March 31, 2026." Emphasis added.**

Question:

a) For greater clarity, please explain the apparent contradiction of an unfavourable run-off of $52.1 million and, on the other hand, a $100 million reduction in unpaid claims reserves.

Rationale for Question:

To clarify and better understand the financial impact of valuation methodology changes and the effect of the PIPP Termination Rate & Methodology Update.

RESPONSE:

The references to the unfavourable run-off of $52.1 million and the $100 million reduction in unpaid claims reserves relate to two separate but related measurements of claims liabilities.

The $52.1M unfavourable development represents the change in undiscounted actuarial ultimate loss estimates, which consists only of case reserves and IBNR. In contrast, the $100M reduction in reserves reflects the impact on total reserves, which includes ULAE, inflation, discounting, and risk adjustment in addition to the ultimate loss estimate.

As a result of the PIPP Termination Rate & Methodology Update Project, the updated termination rates have lengthened the benefit settlement pattern which increases exposure to inflation and time value of money. This lengthening of cashflows generates a net impact of $431M release in reserves from larger discounting impact partially offset by $265M increase to future inflation exposure. Changes to risk adjustment and ULAE represent the remaining impacts of the $100M release.

Part and Chapter:	**PART IX – Financial Forecasting: Investments**	**Page No.:**	**8-9**
Topic:	**Corporate Investment income and Investment Portfolio Assets**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please file a chart on a 'Corporate' basis similar to Figure FFI-1 Summary of Basic Line of Business Investment income and Figure FFI-2 Investment Portfolio Asset Values for the Basic Line of Business.

Rationale for Question:

To better understand the significance of the basic investment portfolio to the overall corporate average portfolio structure.

RESPONSE:

a) *Figure 1* and *Figure 2* below displays the "Corporate" basis similar to Figure FFI-1 and Figure FFI-2.

CC (MPI) 1-32

Part and Chapter:	**Part II – Legal Application** **Part VII – Rate Indication**	**Page No.:**	**7** **5**
Topic:	**Expansion of Rate Groups**		
Sub Topic:			

Preamble to IR (If Any):

In Part II – Legal Application at page 7 it states:

> "MPI currently uses rate groups 0 to 45 and assigns new vehicle descriptions to specific rate groups as they enter the local market (based on CLEAR recommendations as they become available). In the 2027 GRA, MPI applies for approval to again **expand the range of rate groups by adding rate groups 46 to 50** (rate groups 42 – 45 were added last year)."
>
> "Last year, the expansion of the Rate Groups lowered the overall rate indication by 3.16%. This year, due to +2 capping (no vehicle can move up more than two rate groups), **there is no estimated impact on rates as no vehicles will migrate upwards in 2027/28.** New vehicles sales could have vehicles in the higher rate groups but that information is not known at this time." [emphasis added].

In Part VII – Rate Indication at page 5 it states:

> "In addition, MPI is proposing to expand its CLEAR rate groups from +45 to +50, with a +2-cap applied to existing policies. The impact of this expansion is difficult to determine, as it depends on the volume and mix of future new vehicle purchases and the extent to which those vehicles are assigned to the newly created rate groups. **As a result, no impact has been included in the overall rate indication."** [emphasis added].

Question:

Similar to PUB (MPI) 1-4 including Appendix 1 from the 2026 GRA:

a) Please provide the number of vehicles and the amount of premium by rate group for Passenger vehicles for coverages that are affected by rate line prior to the addition of rate groups 46 to 50.

b) Please provide the number of vehicles and the amount of premium by rate group for Passenger vehicles for coverages that are affected by rate line after the addition of rate groups 46 to 50.

c) Please explain why MPI decided to add five additional rate groups in this Application.

Rationale for Question:

To assess and confirm the estimated premium impact of adding rate group 46 – 50, if any.

RESPONSE:

a) Please refer to *PUB (MPI) 1-10 Appendix 4*.

b) Please refer to *PUB (MPI) 1-10-part d)*.

c) MPI is proposing to add five additional rate groups in this application to improve the segmentation of vehicles within MPI's rate group structure and support a fairer allocation of costs among policyholders. MPI's current approved structure ends at rate group 45, and there is a concentration of vehicles assigned to the highest rate groups. Expanding the range to rate groups 46 to 50 provides additional granularity for vehicles with higher indicated rate groups, helping to ensure that premiums more accurately reflect expected risk while reducing cross-subsidization between lower-risk and higher-risk vehicles. As shown in *PUB (MPI) 1-10 Appendix 2*, the distribution of indicated rate groups without capping demonstrates that a number of vehicles have indicated rate groups at or above the current upper bound. As a result, vehicles with differing levels of expected risk may be grouped within the highest existing rate group. Expanding the rate group structure allows MPI to better distinguish among these vehicles and improve rate equity.

CC (MPI) 1-33

Part and Chapter:	**Part II – Overview**	**Page No.:**	**5**
Topic:	**RSR Transfers & Capital Strategy**		
Sub Topic:			

Preamble to IR (If Any):

In Part II at page 5, it states:

> "The capital position for Basic shows the Rate Stabilization Reserve (RSR) at 108% as at March 31, 2026 following a transfer of $72. million from the Extension line of business. **The Basic RSR will remain above its statutory target of 100**% Minimum Capital Target throughout the five-year forecast period, **again made possible by forecasting the continued transfer of excess capital from Extension**." [emphasis added].

Question:

a) Please provide a narrative discussion on the risks associated with the sustained reliance on Extension capital to maintain the Basic RSR at its statutory target of 100% MCT.

b) Please provide a detailed analysis of the rate impact on Extension Insurance to maintain the Basic RSR at its statutory target.

c) Please compare and contrast a premium deficiency and an MCT statutory target—how do these concepts relate and how are they different?

   i. For example, could the Basic insurance rates be adequate (not premium deficient) at an MCT of 10% or, alternatively, could the Basic premium rates be deficient at a Basic RSR at the statutory target of 100% MCT?

Rationale for Question:

To clarify and assess MPI's capital strategy.

RESPONSE:

a) This question can only be addressed by the PUB itself. MPI cannot surmise the Risk Appetite of the PUB and how it views, assesses, and weighs perceived/forecasted Extension Capital transfers to assist in the maintenance of capital adequacy of the Basic Line of Business (LOB).

One obvious risk would be the insufficient transfer of excess capital that leaves the RSR below its statutory target thereby triggering a capital build, particularly if forecasted transfers are also insufficient.

Section 18 of the MPIC Act establishes a clear framework for capital adequacy, requiring that MPI achieve the target MCT ratio within five years should it fall below 100% MCT. The plan to do so can include Extension transfers and if required a capital build on Basic rates. MPI remains committed to maintaining the financial strength of the Basic line of business and will pursue any required capital build in accordance with this statutory obligation, regardless of the availability of capital from the Extension line of business. Decisions regarding the transfer of excess Extension capital continue to be evaluated annually by MPI's Board of Directors which occurs after the conclusion of the GRA process.

With respect to rate adequacy of the Basic LOB, MPI targets zero underwriting profit for the Basic line of business. Growth in Basic capital is primarily driven by investment income on the RSR. If the required capital grows faster than available capital or if the premium rates prove to be insufficient compared to the actual claims costs and expenses, the capital position may deteriorate over time. This may happen for a variety of reasons such as adverse claims experience, effect of higher-than-expected inflation on loss reserves, lower investment income etc. Accordingly, maintaining the capital position requires that growth in available capital keeps pace with growth in required capital.

b) MPI manages the Extension line of business (LOB) independent of the Basic LOB capital adequacy framework. Extension profit targets are established annually and are approved by the MPI Board of Directors. These targets are set independently based on expected claims, operating expenses, profit objectives, and the long-term sustainability of the Extension LOB.

c) A premium deficiency arises when the rates are insufficient to cover expected claims and expenses attached to the rating year regardless of transaction date. Whereas the MCT is a measure of capital adequacy representing the level of available capital relative to required capital. While both are measures of financial strength, they represent different risks.

   Even if the corporation is rate adequate and a premium deficiency does not exist, the MCT ratio could be insufficient, where the required capital is expected to grow faster than the available capital. This may eventually result in capital deficiency without premium deficiency. Depending on the size of capital deficiency and expected duration with which to correct the deficiency, MPI could require remediation via capital build(s), particularly if Extension capital is not transferred to the RSR or insufficient to maintain the RSR's statutory target.

CC (MPI) 1-34

Part and Chapter:	**Part VII – Dislocation Reports**	**Page No.:**	**5**
Topic:	**Rate Group Changes and Rate Line Changes**		
Sub Topic:			

Preamble to IR (If Any):

In Part VII – Dislocation Reports at page 5 it states:

> "Rate group changes refer to changes based on the vehicle's specification (make, model year, declared value, etc.). Rate line changes refer to modifications in the relative differences between the established rate groups; determined from MPI's Generalized Linear Model techniques presented in *Part VII RC Appendix 2b - GLM Rate Line Relativities*."

Question:

a) For greater clarity, please explain by way of an example the difference between rate group changes and rate line changes.

b) By way of a narrative discussion please explain how the Generalized Linear Model (GLM) informed and assisted in establishing the rate line changes.

Rationale for Question:

To better understand the differences and establishment of rate group and rate line changes.

RESPONSE:

a) A rate group change occurs when a vehicle is assigned to a different rate group based on its characteristics, such as make, model, model year, or declared value. Each year, the Insurance Bureau of Canada (IBC) updates and maintains the Canadian Loss Experience Automobile Rating (CLEAR) tables using industry-wide claims experience. MPI uses these CLEAR assignments as the foundation for its vehicle classification system and updates its rate group

assignments accordingly. Further details regarding MPI's use of IBC's CLEAR tables are provided in *Part VII – Risk Classification chapter, RC.6 Passenger Vehicles and Light Trucks*.

A rate line change, by contrast, occurs when the relativities between rate groups are revised based on the results of MPI's rate line analysis. Further details regarding the development of rate line relativities are provided in *Part VII – Risk Classification chapter, RC.8 Rate Line Relativities*.

For example, a vehicle may remain in Rate Group 12 from one rating year to the next so there is no rate group change, but the Rate Group 12 relativity could be updated. Conversely, a vehicle may move from Rate Group 12 to Rate Group 14 because of updated CLEAR classification, leading to a premium change even if the rate line relativities remain unchanged.

b) The GLM informed the rate line changes by providing a multivariate framework for estimating relativities across rate groups while simultaneously controlling for other risk characteristics. Variables such as DSR, Insurance Use, Territory, and other rating factors were included to reduce potential confounding effects and isolate the relationship between rate group and expected loss costs.

Curve fitting for rate group relativities was incorporated directly within the GLM process, producing fitted relativities that reflect the expected physical damage costs associated with each rate group. Average PIPP loss costs and operating expenses were subsequently incorporated to develop the indicated rate line relativities.

As implemented in the 2027 GRA, the GLM methodology replicates the underlying objectives of the historical Minimum Bias Procedure (MBP) within a multivariate modeling framework. This approach maintains consistency with the existing risk classification framework, supports comparability between the GLM and MBP methodologies, and facilitates a smooth transition to GLM-based ratemaking while minimizing customer dislocation.

CC (MPI) 1-35

Part and Chapter:	**Part VIII - Revenues**	**Page No.:**	**6**
Topic:	**Upgrading and Other Changes**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII - Revenues per Figure REV -2 at page 3, line 3, the upgrading and other changes factor decreased as follows:

Year	Upgrading and Other Changes
2025/26A	4.23%
2026/27BF	4.36%
2027/28F	2.64%

Question:

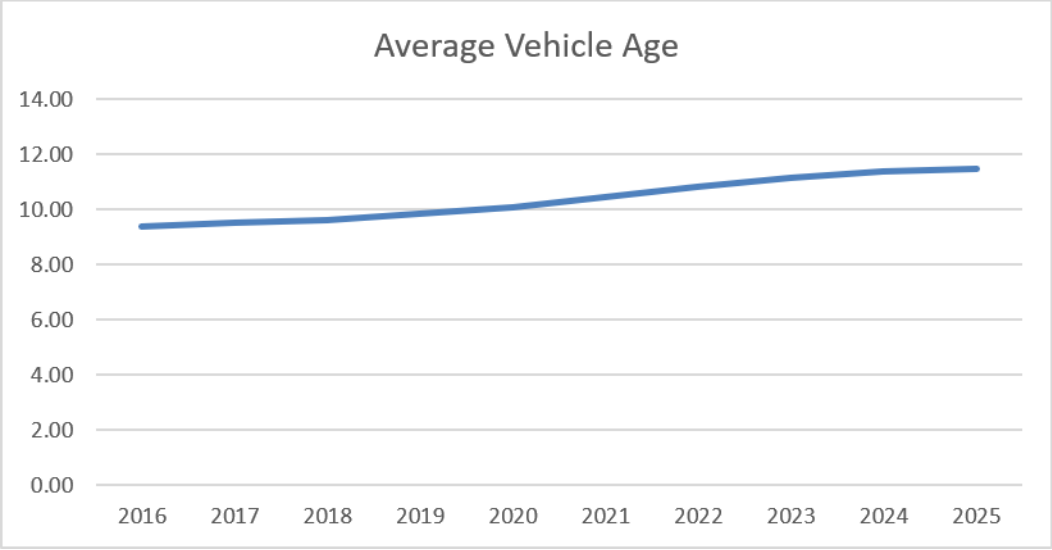
a) For greater clarity, please provide a narrative discussion as to the change in the upgrading and other changes factor from 2026/27 to 2027/28.

b) Please provide a historical chart of the Manitoba vehicle fleet age.

Rationale for Question:

To clarify the change in the upgrading and other changes factor from 2026/27 to 2027/28 and going forward.

RESPONSE:



a) The upgrade factor for the 2026/27 rating year is higher than that for 2027/28 due to the revenue impact of MPI's rate group expansion. Under the 2026 GRA, the highest rate group was +41. With the expansion to +45 and the proposed cap limiting upward movement to two rate groups per year, vehicles previously capped at +41 could transition to +43, resulting in additional premium revenue.

For 2027/28, the proposed expansion to +50 is expected to generate additional premium revenue primarily from new business. As of November 1, 2025, the highest rate group assigned within the existing portfolio is +43, meaning the proposed +2 rate group cap would limit these vehicles to +45 and they would not be affected by the further expansion to +50.

While newly written policies may be assigned to rate groups +46 through +50, the associated revenue impact is highly uncertain as it depends on the volume and mix of future new vehicle purchases. Given the lack of a reliable basis to quantify this impact, MPI has not reflected any additional adjustment in the 2027/28 upgrade factor.

b) Please see the figure below for the average age for MPI's fleet based on the historical rate model at a point in time. Please note that the chart below is based on CLEAR rated vehicles.

Figure 1 CC 1-35 (b) Historical Vehicle Age

CC (MPI) 1-36

Part and Chapter:	**Part VIII - Revenues**	**Page No.:**	**31-33**
Topic:	**Reinsurance program**		
Sub Topic:			

Preamble to IR (If Any):

In Part VIII - Revenues at page 32 it states:

> "The structure of the catastrophe reinsurance program remains largely unchanged, with an upper coverage limit of $400 million and an aggregate deductible of $50 million. However, the per-occurrence deductible has increased to $3 million (from $2 million). In addition, the program has been simplified from four layers to three, as the two lowest layers have been combined (previously $20M xs $50M and $80M xs $70M; now $100M xs $50M)."

Question:

a) By way of an example, for greater clarity, please demonstrate how the catastrophe program is applied to a catastrophic loss.

b) Please provide a narrative discussion as to the security and proportional participation of the reinsurers participating in MPI's catastrophe program.

c) Please provide an update on the June 9, 2026 hail storm in terms of number of claims, claims incurred to-date and estimated ultimate claims incurred, if available (please include the net loss to MPI and the potential recovery from reinsurers).

Rationale for Question:

To review MPI reinsurance program and its operations.

RESPONSE:

a) By way of example, based on MPI's current estimated ultimate loss of approximately $329.1 million for the June 9, 2026 severe storm catastrophic event, MPI would first retain the $3 million per-occurrence deductible and the $50 million annual aggregate deductible, leaving approximately $276.1 million of losses (=$329.1M - $53M) eligible for recovery under the catastrophe reinsurance program. The first $100 million of eligible losses would fall within the $100 million excess of $50 million layer, where MPI retains an 18.2% co-participation share, resulting in an additional retention of approximately $18.2 million. The remaining eligible losses would be recovered through the higher layers of the catastrophe reinsurance program. Based on the current estimate, MPI's total net retention would be approximately $71.2 million, consisting of the $50 million annual aggregate deductible, the $3 million per-occurrence deductible, and approximately $18.2 million of co-participation in the first layer. The remaining approximately $257.9 million would be recoverable from reinsurers. As the treaty is written on an annual aggregate basis, it does not contain reinstatement provisions. Please note that these amounts reflect all lines of business combined. Based on the current allocation assumption, that 91.5% of losses are attributable to the Basic line of business, approximately $65.1 million of MPI’s total net retention of $71.2 million is attributable to Basic.

b) MPI places its catastrophe reinsurance program with a diversified panel of reinsurers. The program is arranged through MPI's reinsurance broker and is designed to balance financial security, available market capacity, pricing, and diversification across multiple reinsurers. Participating reinsurers are generally required to maintain a minimum financial strength rating of A- (A.M. Best) or equivalent at the time of placement, and reinsurer security ratings are monitored on an ongoing basis.

The catastrophe program is structured on a layered basis, with participating reinsurers assuming proportional shares of the individual layers. Rather than relying on a single reinsurer, risk is distributed across multiple markets, reducing MPI's exposure to any

individual reinsurer. Each participating reinsurer is responsible only for its proportional share of covered losses within the layer in which it participates.

At the April 1, 2026 renewal, the $100 million excess of $50 million layer was 81.8% placed, resulting in MPI retaining an 18.2% co-participation share within that layer. The higher layers were placed among participating reinsurers based on their respective capacity commitments and risk appetite.

MPI and its reinsurance broker regularly assess the financial strength and security of participating reinsurers as part of the renewal process. Reinsurance market participation, available capacity, and pricing are influenced by reinsurers' assessment of MPI's catastrophe exposure, loss experience, and prevailing market conditions. As part of future renewals, MPI may also evaluate changes to program structure, including retentions, attachment points, co-participation levels, layering, and limits purchased, in order to maintain an appropriate balance between protection and overall program cost.

c) As of July 22, 2026, MPI had received 30,765 claims related to the June 9–12, 2026 Southern Manitoba Severe Convective Storm, with incurred losses of approximately $78.7 million.

Based on current projections, ultimate claim counts are estimated at approximately 37,399 claims and the current estimated ultimate loss for the event is approximately $329.1 million, based on an assumed average claim severity of approximately $8,800 per claim. This estimate excludes adjuster salaries, overtime, and certain claim handling expenses.

The June 9–12 catastrophe remains in the early stages of development, with less than two months having elapsed at the time of this writing. Approximately one-third of projected claims have been estimated to date. As additional claims are reported and more vehicles are inspected and estimated, both projected claim counts and ultimate severity assumptions will continue to be refined. Consequently, the ultimate loss estimate remains highly uncertain and may change materially as additional information becomes available.

Based on the current loss estimate for the June 9–12 catastrophe of $329.1 million, MPI's net retention is estimated to be approximately $71.2 million, consisting of the $50 million annual aggregate deductible, the $3 million per-occurrence deductible, and approximately $18.2 million related to MPI's co-participation in the first layer. The remaining approximately $257.9 million is currently estimated to be recoverable from reinsurers. Please note that these amounts reflect all lines of business combined. Based on the current allocation assumption that 91.5% of losses are attributable to the Basic line of business, approximately $65.1 million of MPI’s total net retention of $71.2 million is attributable to Basic.

In light of the magnitude of the June 2026 catastrophe event and the potential for catastrophe losses to approach the limits of the existing program, MPI purchased an additional $200 million of catastrophe reinsurance protection excess of a $70 million aggregate deductible, subject to a $3M per-occurrence deductible; effective July 10, 2026 to provide additional protection for the remainder of the 2026 catastrophe season.

CC (MPI) 1-37

Part and Chapter:	**Part X—Risk Management Framework** **Part X – RMF Appendix 2**	**Page No.:**	**3** **1-10**
Topic:	**Risk Appetite Statement**		
Sub Topic:			

Preamble to IR (If Any):

Part X – Risk Management Framework page 3 outlines the key categories of risk MPI is exposed to and outlines the approach of managing these risks:

- Strategy Risk
- Earnings Risk
- Solvency Risk
- Technology Risk
- People Risk
- Legal & Compliance Risk
- Operational Risk
- Reputation Risk

Part X – RMF Appendix 2 at pages 1-10 represent MPI's Risk Appetite Statement approved by the Board of Directors.

Risk appetite is the aggregate amount and type of risk an organization or individual is willing to accept in pursuit of strategic objectives. It acts as a guiding boundary, helping balance the desire for growth and innovation against the potential threats of failure or volatility. Risk appetite forms the foundation of a sound Enterprise Risk Management (ERM) framework. It essentially answers the question: *How much uncertainty is an organization (individual) comfortable with?*

In Part X – RMP Appendix 2 at pages 5 to 8, MPI defines its risk appetite for each risk category.

In Part X – RMF Appendix 2 at page 9 it states:

> "Risk limits are defined to **monitor that actual risk exposures** across MPI do not deviate too much from the defined risk tolerances. Exceeding risk limits will typically act as a trigger for a risk management action.
>
> Risk tolerances and risk limits are measured and monitored as per the **risk metrics** identified below:
>
> • **Key Risk Indicators (KRIs)**
>
> KRIs are metrics used by management to provide an early signal of increasing risk exposures in different areas of the corporation.
>
> • **Key Control Indicators (KCIs)**
>
> KCIs are metrics that provide information on the extent to which a given control is meeting its extended objectives (in terms of loss prevention, reduction, treatment, and acceptance). In so doing,
>
> they can be used to measure the effectiveness of particular risk controls at a particular point in time.
>
> By **monitoring a set of appropriate risk indicators and by checking their actual values and trends against agreed tolerances and limits**, an organization is able to see whether its risk exposures remain within its appetite for risk or exceed it. Hence the monitoring of risk indicators is an important mechanism by which an organization's management can gain assurance that it remains within its stated risk appetite." [emphasis added].

Question:

a) Please provide a copy of the report/analysis that "**monitors actual risk exposures** across MPI so as to not deviate too much from the defined risk tolerances".

b) Please provide a copy of the report/analysis of Key Risk Indicators (KRIs) and Key Control Indicators (KCIs).

c) Please provide a copy of the report/analysis that monitors the set of appropriate risk indicators and checks their actual values and trends against agreed to tolerances and limits.

Rationale for Question:

To review MPI's risk management operations and assess its effectiveness.

RESPONSE:

a) Actual risk exposures are monitored through reporting, which includes the use of Key Risk Indicators (KRIs) and Key Control Indicators (KCIs). Risk exposures are assessed against thresholds established in accordance with MPI's risk appetite and tolerances and are reported to the Risk Committee of the Board. The copy of the latest risk monitoring report is filed confidentially as *Appendix 1- Risk Monitoring Report - CONFIDENTIAL*.

   Following the recent ranking of the Top 7 Corporate Risks, which included some new risks not on the list last year, some KRIs are currently under development and will be incorporated into the reporting process as they are finalized in upcoming reporting periods.

b) KRIs and KCIs are included within the copy of the latest risk monitoring report, which is filed confidentially as *Appendix 1- Risk Monitoring Report - CONFIDENTIAL*.

c) For the analysis that monitors the set of appropriate risk indicators and checks their actual values and trends against agreed to tolerances and limits, see Appendix B of *Appendix 1- Risk Monitoring Report - CONFIDENTIAL*.

Appendix 1:
Risk Monitoring Report

This material is the subject of a confidential motion.

CC (MPI) 1-38

Part and Chapter:	**Part X—Risk Management Framework Appendix 2**	**Page No.:**	**7**
Topic:	**Risk Appetite Statement**		
Sub Topic:			

Preamble to IR (If Any):

In Part X – Appendix 2 at page 7, MPI lists the following as a Low Risk Appetite example under Risk Management Framework - People Risk:

> "Failing in developing employees with the necessary skills and competencies, including critical thinking and sound judgment, retention, succession, leadership development, and training."

Question:

a) Please describe, in narrative form, the hiring criteria and screening processes MPI applies before offering employment to an individual, including how these practices ensure alignment with MPI's low risk appetite for People Risk (e.g., integrity, competency, character, critical thinking, sound judgment, education, and cultural fit).

Rationale for Question:

To assess how MPI applies accretive hiring practices that ensure every new position demonstrably strengthens the corporation's value proposition and supports its long-term strategic and operational objectives.

RESPONSE:

a) MPI uses a structured, job-related recruitment process designed to identify candidates who meet the qualifications and competencies required for a position and who can contribute to the Corporation's strategic and operational objectives

in support of MPI's corporate values. The process begins before a position is posted. The hiring leader consults with HR to confirm the organizational need, approved budget, review the position description, and establish the required qualifications, competencies and other conditions of employment. This planning ensures that recruitment is based on a defined business requirement and that the selection criteria reflect the capabilities needed to perform the work and support MPI's future workforce needs.

External applications are screened against the established requirements for the position. Internal applicants are also assessed in accordance with the collective agreement, including applicable qualification and seniority provisions. MPI's internal application process requires candidates to explain how their education and experience relate to the position's requirements, providing additional role-specific information to support consistent and informed screening decisions. External candidates may participate in a structured pre-screening discussion to confirm qualifications, clarify experience, assess communication skills and cultural fit, and identify the strongest candidates for further consideration.

Candidates who advance may be assessed through one or more job-related methods, including structured interviews, behavioural or situational questions, technical questions, work samples, presentations and standardized testing. The assessment methods are selected based on the requirements and risks of the role and help mitigate People Risk. Structured questions and rating criteria enable the interview panel to evaluate candidates consistently and obtain specific examples demonstrating how they have applied relevant knowledge, exercised critical thinking and sound judgment, managed difficult situations, acted with integrity and worked effectively with others. Technical or skills-based assessments may also be used to validate competencies that cannot be adequately assessed through an application or interview alone. Pass marks and scoring guides are established where appropriate, interviewers are expected to document evidence supporting their scores and disclosed or potential conflicts of

interest are addressed before the assessment proceeds. These controls support objective, transparent and defensible selection decisions.

The final selection considers the evidence gathered throughout the process against the predetermined requirements of the position. Organizational fit is assessed in relation to observable, job-relevant behaviours and MPI's values and workplace expectations, rather than personal similarity or subjective preference. This includes the candidate's demonstrated integrity, accountability, respect, collaboration, adaptability, judgment and ability to contribute effectively within the role and team. Hiring leaders make the selection decision with advice and oversight from Talent Acquisition, which reviews the overall competition and provides recommendations based on recruitment practices, MPI procedures and, where applicable, collective agreement requirements.

Before employment is finalized for an external candidate, MPI conducts pre-employment checks applicable to the position. These generally include reference checks to validate relevant work history and performance and a criminal record check, with additional screening—such as a child abuse registry, vulnerable sector, credential, license or other job-specific verification—completed where the nature of the role requires it. Offers may be conditional on satisfactory completion of these requirements.

Collectively, these practices align with MPI's low risk appetite for People Risk.

CC (MPI) 1-39

Part and Chapter:	**Part II – Legal Application**	**Page No.:**	**5**
Topic:	**IT Initiative Expenses and Regulatory Deferral Account**		
Sub Topic:			

Preamble to IR (If Any):

In Part II – Legal Application at page 5 it states:

> "International Financial Reporting Standard (IFRS) 14 (Regulatory Deferral Accounts) was recently replaced by IFRS 20 (Regulatory Assets and Regulatory Liabilities), published May 27, 2026. **MPI will not be adopting the new standard because assets and liabilities arising from insurance contracts are not in scope under IFRS 20."**
>
> "**In its 2027 GRA, MPI is seeking to recover forecasted initiative expenses of approximately $10.1 million**. Concerning the RDA balance (as at March 31, 2027), MPI is seeking from the PUB a declaration that the assets in the RDA are no longer of any value for rate setting purposes because the **Basic rate deficiency created by the deferral of initiative expenses following the 2023 GRA was remedied through capital transfers from the Extension line of business."**
>
> "**MPI says that once the balance is written off, the PUB should close the RDA, given the advice under IFRS 20.**" [emphasis added.]

Question:

a) For greater clarity, please provide a narrative discussion highlighting MPI's rationale and IFRS 20 (Regulatory Assets and Regulatory Liabilities) support for seeking recovery (part of proposed rates) of the information technology initiative expenses in the 2027 GRA.

b) Please provide a detailed schedule, by initiative, for the forecasted initiative expenses of $10.1 million and the total amount of $18.3 million justifying the inclusion of initiative expense in the 2027 GRA proposed rates of only $10.1 million (See Figure EXP App 23-2 Part VIII – EXP Appendix 23 – Redacted).

   i. Please explain why MPI is not asking for inclusion of the full $18.3 million in 2027 GRA ratemaking.

c) Please provide a narrative discussion explaining the reasons MPI is not adopting IFRS 20 (formerly IFRS 14).

d) For greater clarity, please provide a narrative discussion to close the RDA (Regulatory Deferral Account). Please provided the current RDA balance similar to Part X – EXP Appendix 29 from the 2026 GRA.

e) Figure EXP App 23-1, Part VIII – EXP Appendix 23 at page 2 lists Basic Allocation of Initiative Expenses for three categories:

   i. Initiative expenses excluded for rating year (2-year average) per rate order (total for all years is $103.7 million)

   ii. Initiative expenses forecasted for fiscal year (total for all years is $113.6 million)

   iii. Actual initiative expenses incurred in fiscal year statement of operations (total for all years is $73.1 million)

   For greater clarity, please identify the correct basic regulatory current deferred amount which the corporation is seeking the PUB to declare of no value. Please provide an explanatory note in the response.

f) For greater clarity, please explain how a **Basic rate deficiency** created by deferral of initiative expenses can be remedied through capital transfers from Extension as opposed to basic rate increases.

Rationale for Question:

To clarify the current information and updates relating to IT Initiative Expenses, the RDA account, IFRS 14 and 20 (replacement standard).

RESPONSE:

a) MPI has addressed the accounting and rate-setting treatment of initiative expenses in the materials already filed, including *PUB (MPI) 1-40*, *PUB (MPI) 1-42* and *Part VIII EXP Appendix 23 - Summary of Regulatory Deferral Accounts*. As set out in *Part VIII EXP Attachment A - IFRS 20, Regulatory Assets and Regulatory Liabilities*, expressly excludes from its scope regulatory assets and regulatory liabilities that arise where premiums charged in insurance contracts within the scope of IFRS 17 are regulated. Accordingly, IFRS 20 does not provide MPI with an accounting basis to recognize a regulatory asset for these balances in its IFRS financial statements. The recovery of the forecasted initiative expenses included in the 2027 GRA is therefore a rate-setting matter, not the result of recognizing an IFRS 20 regulatory asset.

b) MPI refers to *Figure EXP App 23-2* for the schedule of prior year initiative expenses included for rate setting. As filed, MPI has included $10.1 million of initiative expenses for recovery in the 2027 GRA. *Part VIII EXP Appendix 23* explains that MPI considered, but did not proceed with, an inflationary adjustment to prior year initiative expenses in this application. MPI instead elected to keep the process of including initiatives simple, given the variances that naturally occur between forecasted and actual spending.

MPI is not seeking recovery of the full $18.3 million in 2027 GRA ratemaking because the application does not propose to true up all historical forecast, excluded, or actual initiative expense amounts into current proposed rates. As described in *Part VIII EXP Appendix 23*, different measures could be used to estimate an RDA balance, including amounts excluded from rates, expenses forecasted by fiscal year, actual expenses incurred, or combinations of those amounts. MPI's 2027 proposal is to recover the

$10.1 million identified in *Figure EXP App 23-2* and to discontinue the historical RDA practice going forward.

c) MPI is not adopting IFRS 20 because, as stated in Appendix 23 and further discussed in *PUB (MPI) 1-40* and *PUB (MPI) 1-42*, the standard contains an explicit scope exclusion for regulatory assets and regulatory liabilities arising where premiums charged in insurance contracts within the scope of IFRS 17 are regulated. MPI's rate-regulated Basic insurance premiums are within the scope of IFRS 17. As a result, IFRS 20 does not provide an accounting policy choice that would permit MPI to recognize an RDA balance for these amounts in its IFRS financial statements.

d) and e) MPI refers to *Part VIII EXP Appendix 23 (2027 GRA)* and to *Part VIII EXP Appendix 29 (2026 GRA)* for the detailed history, context and broader discussion of RDAs and initiative expenses. As stated in *Part VIII EXP Appendix 23*, MPI is seeking to have the PUB declare that RDA amounts are no longer of any value for rate-setting purposes and to abandon the practice of RDAs. A declaration of no value is not a reference to impairment or a write-off for accounting purposes, nor does it suggest that the underlying expenditures provided no value to ratepayers. Rather, it would acknowledge that there is to be no recovery of existing deferred amounts in future GRAs.

MPI further clarifies that the RDA consists only of amounts that are, or would be, expensed through the Statement of Operations but were tracked for PUB-specific rate-setting purposes. It is not an actual asset of the Corporation and is not reported in MPI's audited external financial statements. As *Part VIII EXP Appendix 23* explains, MPI does not believe there is a single confirmed RDA balance because the amounts excluded from rates were determined in relation to the applicable rating years in prior rate applications, while other potential measures could include fiscal year forecasted expenses or actual expenses incurred.

For that reason, MPI does not identify one definitive regulatory deferred amount as an IFRS-recognized asset. If the PUB accepts MPI's requested relief, the historical RDA balance would have no ongoing relevance for future rate setting. If the PUB does not accept MPI's position, MPI respectfully requests that the PUB provide clear direction in its 2027 Order regarding the amount it considers to be the RDA balance, how those expenses are to be accounted for rate-setting purposes, and the rules that will govern any such treatment going forward.

f) *Part VIII EXP Appendix 23* explains that deferred initiative expenses have effectively been funded through capital transfers from the Extension line of business. The reference to the Basic rate deficiency being remedied through Extension capital transfers should be understood in that context. Extension transfers can address the immediate Basic capital impact created when initiative expenses are deferred and not recovered through Basic rates. However, they are not a substitute for appropriate Basic rate action over time. If Basic rates do not recover the costs required to support Basic operations and initiatives, reliance on Extension transfers (absence a capital build) would reduce the Basic LOB capital otherwise available and would ultimately create a need for a future capital build, all things being equal. Rate adequacy is linked in part to Capital Adequacy (MCT) – albeit to different concepts. It is possible to be rate adequate while at the same time being capital deficient. This risk could be removed by ensuring Capital Adequacy is addressed absent Extension capital transfers, thereby allowing excess capital created by Extension transfers to be rebated to rate payors in the normal course.

CC (MPI) 1-40

Part and Chapter:	**Part II – COM Appendix 5**	**Page No.:**	**5-6**
Topic:	**Strategic Plan Post Closure NOVA**		
Sub Topic:	**2.4 IT Strategy and Alignment of Corporate Outcomes**		

Preamble to IR (If Any):

In Part II – COM Appendix 5 at page 5 it states:

> "MPI recognizes that following the closure of Project Nova, continuity of strategic direction must be matched with **clearer execution discipline**. For that reason, MPI's revised IT approach is not a continuation of prior delivery patterns. It is a roadmap-driven model with greater emphasis on sequencing, visibility, resourcing, and **alignment to business outcomes**.
>
> Overall, **MPI's IT strategy continues to evolve** as part of the broader Strategic Plan and reflects planning for the post-closure of Project NOVA. **The approach has shifted from large-scale transformation to a rolling, roadmap-driven model that prioritizes renewal, maintenance, and risk reduction.**
>
> Key themes for 2026/27 include:
>
> - Improving service reliability and system performance
> - Strengthening cybersecurity and data protection
> - **Addressing technical debt through planned upgrades**
> - Enhancing digital service accessibility
> - Providing better tools for employees" [emphasis added].

Question:

a) Please provide a list and detailed system description of MPI's 'mission critical' IT systems including their respective remaining life-cycle before expiry (that is, IT systems without which MPI could not operate).

b) Please provide a narrative interpretation (discussion) of the following statement: "**The approach has shifted from large-scale transformation to a rolling, roadmap-driven model that prioritizes renewal, maintenance, and risk reduction."**

c) MPI indicates that the IT technical debt will be addressed through planned upgrades. Please elaborate, in a narrative discussion, as to MPI's intent of replacing or upgrading its 'mission critical' systems in the foreseeable future and the rationale for either approach.

Rationale for Question:

To assess MPI's intend and approach to mitigating the IT risk relating to its mission critical systems.

RESPONSE:

a) Please refer to *Appendix 1 - Applications and Version information – Confidential.*

b) MPI's approach has evolved from pursuing large-scale enterprise transformation initiatives toward a continuous, roadmap-driven model focused on risk reduction, enterprise readiness, and incremental modernization. The strategy prioritizes stabilizing critical technology, reducing technical debt, strengthening foundational capabilities, and modernizing business services through smaller, manageable initiatives that can be delivered over time. This approach supports ongoing service reliability while reducing implementation risk and providing flexibility to adapt future modernization activities based on changing business needs, technology conditions, and organizational priorities.

Details of this approach will be provided as part of the Technology Roadmap that will be shared in the fall with the PUB.

c) MPI evaluates each major business service and supporting technology to determine the most appropriate treatment option, which may include upgrading,

modernizing, reusing, retiring, or replacing components. Current efforts are focused on reducing technical debt and technology risk through targeted upgrades and remediation activities. Future modernization initiatives will be prioritized through MPI's roadmap-driven planning process and will be based on business value, operational needs, risk reduction opportunities, technology lifecycle considerations, and affordability. This approach allows MPI to modernize incrementally while maintaining reliable service delivery and avoiding the risks associated with large-scale enterprise transformation programs.

Application and Version Information

This material is the subject of a confidential motion.

CC (MPI) 1-41

Part and Chapter:	**Part III – Overview**	**Page No.:**	**3**
Topic:	**Post Project Nova Stabilization**		
Sub Topic:			

Preamble to IR (If Any):

In Part III – Overview at page 3 it states:

> "Having achieved stability, MPI has now transitioned to execution."

Question:

a) Please provide detailed evidence supporting MPI's assertion that the organization has "transitioned from stability to execution." Include:

   i. KPIs used to measure organizational stability.

   ii. Internal dashboards or scorecards used since Project Nova's closure (March 2025).

   iii. Any third-party assessments validating MPI's stabilization progress.

   iv. Detailed projects in execution phase.

Rationale for Question:

To clarify and assess MPI's path to stability and transition to execution.

RESPONSE:

a) i.) In 2024/25 MPI implemented the Stability Strategy to address critical performance gaps while it built a long-term strategic plan. To measure organizational stability, MPI monitored a set of enterprise-level KPIs focused on customer outcomes, workforce stability, operational reliability, risk management, and execution performance. At the end of Q4, results were:

KPI	Baseline	Goal	Q4 Result
CX Index	69	70	73
Expected Wait Times Met	54%	70%	59%
Regrettable Turnover	4.51%	4.01%	2.56%
Risk-Based Initiative Delivery	N/A	80%	75%
Operational Success Index	99.8%	99.8%	99.9%
Cybersecurity KRIs	Not established	Target under development	Not available at year-end

Additional indicators of organizational stability included progress in clarifying leadership and management accountabilities, establishing capacity baselines for key delivery teams, and improving customer information and service-related measures. Collectively, these measures demonstrated increased organizational control, visibility, and accountability, providing the foundation required to shift focus from stabilization activities toward executing MPI's longer-term strategic priorities.

ii.) and iv.) Please see *Appendix 1 – PMO Monthly Update April 1 2026 (with March 2026 actuals) - Confidential* and *Appendix 2 – Major Programs KRI Reporting May 2026*.

iii) MPI has not completed any assessment specifically validating post-Project Nova stabilization progress.

Description/Overview

Scope updated based on Business Case finalization:
This two-phased initiative aims to [redacted]

The initial focus will be on meeting the priority data consumption needs associated with the Special Risk Extension (SRE) line of business, restoring user trust through improved data quality, governance, and accessibility.
This **includes the needs of various key data consumption areas such as Pricing, Reinsurance, Finance and Product Analysis & Design.**

[redacted]

Although this **project centers on the consumers of Special Risk Extension data**, the longer-term strategic vision extends beyond these initial stakeholders. Over time, MPI intends to roll these enhanced data capabilities out to the broader organization, ensuring that all business units eventually benefit from a unified, drill-down capable data ecosystem that supports informed decision-making, operational excellence, and long-term growth.

(CPG) Monthly Project Status Update

Initiative	Focus Area
3362 - Foundational setup for Enterprise Data Platform – Phase 1 and 2	**FY 2024/25 - Strategic**

Previous Month's Accomplishment

- Progress continued across multiple workstreams in March; however, delivery risk remains high, driven primarily by Source-to-Target Mapping (STM) delays, vendor quality issues, and DevOps/CI-CD readiness gaps. With June timelines approaching, several items remain on the critical path.
- Bronze-layer testing progressed, with Cigniti SIT targeted for completion by April 3, 2026.
- Defender for Fabric was enabled across all EDP environments.
- Continued alignment on environment manifest, security controls (RBAC, SIEM/Sentinel), and Fabric administration RACI.
- Multiple executive and technical escalation sessions were held to address delivery risks, vendor performance, and milestone alignment.
- STM reviews progressed slowly and inconsistently throughout the month.
- Lack of a clean, stable main branch and inconsistent use of the Enterprise Data Platform Git repository.
- CI/CD automation remains incomplete and unstable; manual deployments were approved to avoid further testing delays.
- Executive discussions initiated on potentially removing CI/CD scope from Coforge's contract, with a decision pending.
- Silver-layer deployment to Test is tentatively planned for April 7, 2026, accounting for the Easter long weekend.
- Any further slippage in STM, CI/CD, or Silver readiness materially increases risk to June milestones.

Continued alignment with Change Management, Disaster Recovery, and Transition to Operations teams.

Description/Overview

MPI sole sourced a business continuity management system from Continuity2 in 2023. That agreement comes to an end March 2025, and MPI will have to go to market for a replacement solution.

Without this initiative, [redacted]

We would also lose the ability to contact employees in the event of a crisis or emergency, as the BCM software and it's contact lists are leveraged for that.

Previous Month's Accomplishment (March 2026)

- MPI working with the Government of Manitoba to authorize the sole source contract for the project
- Implementation activities to be handled operationally, project close out in progress

Description/Overview

Taxis experience a disproportionately high claims incurred compared to other vehicle groups. The intent of this pilot project is to utilize third party telematics technology to collect data, and for MPI and the vendor (as outlined in section 3.1.1.4) to analyze that data (combined with MPI claims data) for the purposes of determining what driving behaviors lead to the increase in claims frequency and severity for taxis.

Description/Overview

The Cloud Migration Project involves [redacted] his is the first phase of a multi-year technology modernization and optimization initiative.

This "lift and shift" process is a necessary first step in a multi-phased strategy to modernize MPI's technology systems. It supports MPI's business vision by providing access to new technologies and services that support the accelerating pace of business changes and the changing expectations of our customers. This positions MPI to deliver cost efficient, modern, and secure products that will provide enhanced value for our customers and stakeholders.

The migration promotes a cloud-first approach for both new and existing workloads that sets out to achieve the following goals:
- Accelerate the decommissioning of our existing infrastructure assets at the Kyndryl datacenters.
- Manage risk by establishing a secure technology environment better able to adapt to a changing threat landscape.
- Optimize operational expenses, and
- Enable innovation, cost optimization, and continuous improvement in the delivery of new products and services for our customers.

Migration of business applications from the current datacenters to Microsoft's Azure Cloud will be planned, designed, scheduled, and executed by Kyndryl in close partnership with MPI and Microsoft. Migrations will be performed in multiple waves that prioritize lower-risk and development/test systems first, to reduce risk to critical business applications. Once migrated the project will be closed; a separate program will subsequently focus efforts on modernizing these systems on even more economical, performant, and innovative Cloud architectures.

Objectives:
- Migrate all in-scope business applications [redacted] method from the current legacy datacenters to Microsoft's Azure VMWare Solution ("AVS") environment by FY2025-26.
- Implement necessary changes to post-migration administration and support processes to maintain a low-risk environment.

		Resource				
		Risk				

Description/Overview

Background
This project will build upon content standards as part of the work in Content Management Phase 1 with deliverables including a 'Content Factory' that provide improvements in efficiency and optimization of the redevelopment of content. Phase 2 will build on this foundation to improve readability and accessibility of MPI's website by implementing plain language standards.

Scope
This project effort includes 3 major scope items by 3 vendors. All work estimated to be completed by March 2025.

1. Update public website plain language ... via vendor, York & Chapel
2. Provide translation services... via vendor, Documents
3. Provide plain language training... via vendor Eclectic Communications

Update (Sept 2025)
The contract with York and Chapel to update our website to plain language was cancelled due to deliverables not meeting publishing standards. Remaining funds have been diverted to increase the number of Plain Language Training courses offered internally.

Wayfinding work i.e. site structure will be represented in 302559.
Updating site content to plain language is the focus of this epic. A new plan is under development in the Communications team.

Notes

All training has been completed. The project is now officially closed.

Description/Overview

MPI requires the ability to communicate with its Customers, Brokers, and Partners using telephones. The contract for MPI's phone system (Genesys PureConnect) expires in January 2025, and a new solution must be in place by November 01, 2024 to ensure no service outages.

This initiative is multi-year in nature, and divided into two phases as follows:
- First phase is a like-for-like migration of the current capabilities to simplify the training program and ensure that the November 01, 2024 deadline is met.
- Second phase will introduce new capabilities in a prioritized manner that will provide additional benefits and communication channels

Description/Overview

MPI wishes to better characterize the financial risks associated with their operations and better inform capital management decision making through more detailed analysis of the potential future financial position of the organization. This will aid MPI with Financial Condition Testing (FCT), Own Risk Solvency Assessment (ORSA) and enhance forecasting abilities.

This solution will replace the FCT which has been completed externally due to the change from IFRS 4 to IFRS 17, allow for ad hoc stress testing and scenario analysis, reduce the time taken to produce, and increase the accuracy of the FCT, allowing us to better characterize financial risks to our operations. The Board of Directors has ordered that MPI perform the FCT inhouse as soon as possible, and to accomplish that, this Capital Modelling software is required.

The benefits will be seen shortly after implementation, as it will save us time in building these models.
MPI's enterprise risk management can benefit from quantitative information to inform our action plans when it comes to mitigating enterprise risks – this software will provide that quantitative information.

		Risk				

Description/Overview

With increasing mobile workforce a greater need for remote collaboration with customers, business partners and across MPI location, audio-visual systems that were put into City Place, St. Mary's Service center (2022) and Bison service center (Feb 2024) had significant uptake in usage and collaboration, other centers are requesting this tool to host team meeting to improve collaboration.

Current state issue that will be resolved/addressed by new equipment is:
1. Limited Collaboration in Hybrid Work Environment: Due to hybrid work arrangements, only half of the staff is in the office at a time, making it challenging to engage the entire team in meetings. This limits in-person collaboration, which was more effective prior to the pandemic.
2. Audio Challenges and Lack of Engagement in Virtual Meetings: Before audiovisual technology was enabled at certain locations (Bison & St Marys), virtual meetings relied on conference lines, leading to audio issues and making remote participants feel disconnected from discussions. They often felt forgotten and had difficulty hearing conversations, which impacted their engagement and participation.
3. Limited Technology in Satellite Locations: Managers overseeing multiple rural locations face challenges as they lack the necessary technology to facilitate hybrid meetings. This results in all collaboration meetings being conducted virtually from their desks, limiting opportunities for in-person interactions and collaboration among staff.
4. Need for Hybrid Meeting Options: There is a desire for a hybrid meeting option that allows staff to meet in person while also accommodating remote participation. This would enable greater flexibility in meetings, allowing staff to participate either virtually or at other locations.
Hardware and installation.
Start: hoping to start in Summer 2024. Pending government contact partnership for the equipment. Will go to LPM only after contract signed.
Finish: approx. 8 months.

Successful Implementation:
New Audio-Visual system is full installed in remaining 16 Service Centers locations.
Appropriately sized audio/visual system for each center (big/medium/small).
Systems: Microsoft Teams Rooms Pro.
Equipment: Screens, mic, speakers, cameras, mounting/shelving for accessories, cabling and computer technology.
Training of end users on new technology and equipment.
3rd party integrator will be completing most of the work (scoping sizing, installation and training)

Notes

Description/Overview

5.3.1.2A GRC Tool Implementation (one time cost) – RFP 24/25, Execution 25/26

[redacted]

An integrated GRC tool would streamline these processes, improve collaboration, and enable a proactive approach to managing IT risk and compliance across the enterprise.

Previous Month's Accomplishment

Progress:
CrossComply UAT has been completed, with TPRM UAT and Risk Oversight site review progressing through March. The project has transitioned pending items to operations, and the closeout report is now routed for approvals.

Challenges:
Alignment on remaining items to be operationalized required additional discussions with the sponsor.

Plans:
Finalize approvals on the closeout report and complete transition of all remaining items to operations, marking formal project closure.

		Risk				

Description/Overview

The Driver Licence Status Lookup tool will be a service available on MPI's public website. It will allow any user to enter a Manitoba driver's licence number and receive a report on the licence's validity, restrictions, and - after expected legislation is passed in June - class. Single or multiple licence queries are acceptable use cases.

Automating this functionality has been a longstanding request from MPI stakeholders, including vehicle rental companies, large employers like the Manitoba Trucking Association and the City of Winnipeg. This tool could also benefit other large employers, such as the Winnipeg Police Service, Manitoba Hydro, and foreign jurisdictions that provide driver licence reciprocity to Manitoba licence holder.

Attached business case was prepared in 2021. Note that this predates the addition of section 126.1 to the DVA, so regulations now provide clear authority to build and run this tool. A privacy assessment is underway (attached).
A business canvas will be developed to clarify and refine overall solution. Pending the proposed solution, LPM funding may be required.

Expected outcome (to date):
A user can navigate to a designated page on the MPI public site, provide a single PIC or a set of PICs and have the following near-real time driver status returned for each PIC:

"Invalid driver License" (suspended, cancelled)
"Valid Driver License" (regardless of restrictions)

This web page is NOT restricted. The only information for intake is a PIC. The only information returned is one of two statuses.

Notes

No further activities - project closed.

April 1, 2026

Corporate Planning & Governance
(CPG) Monthly Project Status Update

Initiative	Focus Area
3354 - Enterprise Feedback Management (EFM)	

Details

Status		Health		FY 2025/26 Financials		
Project Phase	**10 - Deferred**	Overall Health		$759,024	$14,260	($744,764)
Actual Start Date	**11/13/2024**	Budget		FY 2025/26 Budget	Actuals+Forecast	Variance
Functional Completion Date	**3/31/2026**	Schedule		$14,260	$0	($744,764)
Percentage Complete	**5%**	Scope		YTD Actuals as of March 31, 2026	Remaining Forecast (for FY 2025/26)	Remaining Unspent

Description/Overview

Strategy and Implementation of EFM tool that is being procured in PI 13

MPI's customer brand scores (i.e. CX index) have been declining over the past few years. MPI's CX index - one of the most important customer metrics - is currently 69, well below our target score of 80. MPI requires a solution will enable us to act on data as it unfolds.

Customer and employee surveying is critical for guiding corporate strategy to maximize value and tailor our priorities to meet the needs of these stakeholders. Currently, our surveying program cannot meet the surveying needs or fulfill requirements communicated to government around development an automated view of our customer across all channels and transactions. This initiative will deliver an Enterprise Feedback Management (EFM) solution to improve customer and employee data collection for automated surveys, web/app analytics, service metrics, channel-specific metrics, marketing data, and product data. A new solution is required as MPI lacks a centralized EFM and data warehouse solution that combines quantitative and qualitative research.

Notes

- Strategy department advised on April 25 that this initiative will be deferred and is not included in the current fiscal work.
- RFP document reviewed and completed by the business and has been handed over to the vendor management for next steps.

CC (MPI) 1-42

Part and Chapter:	**Part II – Overview**	**Page No.:**	**3-4**
Topic:	**Executive Team Additions**		
Sub Topic:			

Preamble to IR (If Any):

In Part II – Overview at pages 3 to 4 it states:

> "Since it last appeared before the PUB, MPI has welcomed two new members of its Executive Team, Rennie Stonyk (VP, Chief Legal & Risk Officer) and Tracy Riley (VP & Chief Information & Technology Officer)."

Question:

Please provide a narrative discussion explaining how the addition of the VP, Chief Legal & Risk Officer and VP, Chief Information & Technology Officer has influenced:

a) Risk governance practices

b) IT strategy development

c) GRA-related decision-making

Rationale for Question:

To assess the impact the addition to the Executive has on the organization.

RESPONSE:

a) MPI's Enterprise Risk Management (ERM) program maintains effective risk governance through defined accountabilities, established processes, regular reporting, and clear escalation paths. This structure provides and supports continuity should there be changes in executive personnel.

The appointments of Vice President, Chief Legal & Risk Officer, Rennie Stonyk, and the Vice President, Chief Information & Technology Officer, Tracy Riley, represent a continuation of the existing, mature risk governance framework and oversight practices already in place at MPI.

b) MPI has established a clear technology vision and strategy through 2030 with Chief Information & Technology Officer, Tracy Riley. This direction provides greater clarity and alignment across the organization, focusing investments and resources on strengthening foundational capabilities, reducing technology risk, and enabling future modernization initiatives. Please see responses to *CC (MPI) 1-40*, and *PUB (MPI) 1-121*.

c) As with risk governance, MPI's structure continues to support continuity despite changes at the executive management level. The Chief Legal & Risk Officer, Rennie Stonyk, maintains direct oversight of the Regulatory Affairs team and now has direct oversight of the Senior Regulatory Counsel, while senior management continues to collaborate on matters critical to the annual filing process. As a result, there has been no material impact on GRA decision-making within the Corporation.

CC (MPI) 1-43

Part and Chapter:	**Part II – Overview**	**Page No.:**	**10-12**
Topic:	**Enterprise Project Management Office (EPMO)**		
Sub Topic:			

Preamble to IR (If Any):

In Part II – Overview at page 10 it states:

> "MPI has established a new Enterprise Project Management Office (EPMO). The EPMO will now oversee all projects and programs across MPI, both Major Programs (large technology programs budgeted over $3 million) and non-major programs, to ensure they are aligned with the corporate strategy and delivering measurable value."

In Part II – Overview at pages 11 to 12 it states:

> "MPI is further strengthening the Customer & Product Value team with the talent, skills, and capacity to execute MPI's operational projects effectively, ensuring initiatives are delivered on schedule and within scope**.** It will do so by implementing the following enterprise-level capabilities:
>
> **• Consistency in Approach**
> Project management functions and resources are applied consistently across all initiatives under a unified structure to improve efficiency and value.
>
> **• Centralized Governanc**
> The EPMO will provide centralized governance and standards to ensure all projects are aligned with organizational goals.
>
> **• Strategic Alignment**
> Projects will be directly aligned to MPI's multi-year strategy, ensuring they deliver measurable value.

• Standardization and Visibility

Standardized delivery model and performance dashboards will provide transparency and support data-informed decision-making.

• Risk Mitigation and Resource Optimization

Ongoing monitoring of project performance will reduce risk, optimize resource utilization, and improve delivery outcomes.

• A Bridge Between Leadership and Teams

The EPMO will act as a liaison between executive leadership and project teams, improving stability for employees and enabling informed prioritization and decision-making."

Question:

a) Please provide a chart listing all major project ($3 million and over) describing each project.

b) Please provide the cost/benefit analysis for each major project.

c) Please provide a chart listing and describing each non-major project.

d) Please provide a copy of the EPMO charter, describe the governance structure, describe the project prioritization criteria and provide the Performance Dashboards.

e) Please provide a narrative discussion on the execution risk(s) faced by the EPMO.

Rationale for Question:

To gain a better understanding of the EPMO.

RESPONSE:

a) and c) Refer to the first column, labelled “Project Category”, in the *IT Appendix 9 Corporate Project Listing*. This column categorizes the projects listed by Major Programs, Non-Major Programs Projects with approved budgets >=$500,000, and Projects with approved budgets between $100K and $499K.

The “business objective” column provides the description of each project’s business objective.

b) A consolidated cost/benefit analysis document does not exist for each major project. Instead, the cost and benefit information can be found in the *IT Appendix 9 Corporate Project Listing*.

Projects with a Benefit Realization Plan status of “Approved” or “Approved – Benefit Tracking” have detailed benefit information documented within their respective Benefit Realization Plans. The NPV and Benefit Realization Plans, provide the cost/benefit details for each major project.

The benefits information is also included in each major project’s approved business case.

d) The EPMO is currently in the early stages of development and does not have a formal charter in place at this time. The Enterprise Project Management Office (EPMO) was established to strengthen MPI's ability to govern, prioritize, and deliver enterprise initiatives through a more consistent and integrated delivery model. The EPMO works in partnership with Strategy, Product Management, Finance, Architecture and business stakeholders to ensure initiatives are aligned with organizational priorities and are delivered using consistent governance, reporting, and project management practices.

While the EPMO is responsible for project governance, delivery oversight, and execution monitoring, enterprise prioritization and portfolio management are shared responsibilities. Strategy leads the annual planning process and maintains the Integrated Corporate Portfolio (ICP), while Product Management, the EPMO, Finance,

Architecture, and business leaders collaborate with Strategy through Corporate Planning and Governance (CPG) processes to assess strategic alignment, capacity, dependencies, funding requirements, and delivery feasibility.

Corporate Initiatives are identified and prioritized through MPI's annual planning process and ongoing governance practices. Prioritization considers several factors, including:

- Expected contribution toward strategic outcomes and Strategic KPIs
- Alignment to MPI's strategic pillars and corporate focus areas
- Feasibility of implementation, including organizational readiness, capacity, complexity, and dependency considerations
- Enterprise risks and the consequences of delaying or not undertaking the initiative
- Regulatory, operational, customer, technology, and financial considerations
- Funding requirements and delivery confidence

MPI continues to mature its annual planning, portfolio governance, and resource management practices to improve enterprise-wide visibility and support more informed prioritization decisions. Through the ICP, leaders maintain visibility into Corporate Initiatives and Major Programs committed to for the current fiscal year, as well as potential initiatives for future fiscal years. The ICP supports decision making by providing a consolidated view of current and planned work across the organization.

Performance monitoring occurs through a combination of EPMO reporting at the project level and quarterly strategic performance reporting at the corporate portfolio level. The quarterly strategic performance reports consolidate initiative performance, strategic achievements, and organizational outcomes into a single enterprise view. Initiative updates are assessed and reported within the context of strategic pillars, annual plans, and broader organizational performance, allowing leadership to evaluate progress, identify emerging execution challenges, and make prioritization and sequencing decisions where required. For EPMO performance dashboards, please reference IR *CC (MPI) 1-41*.

e) As the EPMO continues to mature, its primary execution risks relate to organizational capacity, consistent adoption of governance practices, cost and schedule performance, vendor dependency, solution complexity, and transition to operations. The EPMO's primary execution risks are similar to those faced by many organizations managing complex portfolios of cross-functional work. These risks are not unique to the EPMO and are managed collaboratively through MPI's integrated planning, portfolio governance, and delivery functions. To mitigate these risks, the EPMO works closely with Strategy, Product Management, Finance, Architecture, and business leaders during the fiscal year to monitor delivery against plans. This integrated approach helps identify potential constraints earlier and supports informed trade-off decisions when new priorities emerge or circumstances change via structures like the Corporate Planning & Governance committee and Strategy to Execution pipeline and associated phase gating, ICP and quarterly strategic performance reporting.

MPI has also introduced more centralized annual planning and portfolio management practices intended to improve visibility into future work, strengthen prioritization discipline against strategic outcomes, and better align commitments with available capacity. As part of this evolution, the organization continues to mature its resource management capabilities, portfolio reporting, and planning processes to provide a more comprehensive enterprise view of demand, capacity, sequencing, and delivery risk.

Individual project-based risks continue to be managed through formal business cases and charters, change control and Power BI[i] reporting and the RAAIDD framework.

[i] Power BI stands for Power Business Intelligence. It is a software platform.

CC (MPI) 1-44

Part and Chapter:	**Part V – Information Technology - Redacted**	**Page No.:**	**14, 16**
Topic:	**Third-Party Dependencies**		
Sub Topic:			

Preamble to IR (If Any):

In Part V – Information Technology - Redacted at page 14 it states:

> "MPI continues to use the following types of Third-Party Dependencies:
>
> - Vendors that provide services.
> - MPI continues to advance its cloud strategy in partnership with Microsoft and Kyndryl.
> - Microsoft's Azure platform remains the foundation of MPI's cloud infrastructure, supporting the modernization of MPI's digital environment.
> - **Kyndryl currently manages the cloud environment, and maintains the remaining legacy systems hosted in their datacenters.**
> - **Kyndryl will continue to deliver these services under the existing agreement until its scheduled conclusion in January 2027.** Planning is underway to assess future service needs and identify the most suitable partner to support MPI's next phase of digital operations." **Emphasis added**.

In Part V – Information Technology - Redacted at page 16 it states:

> "By consolidating Major Programs and the Project Management Office within the Customer & Product Value division under the EPMO, MPI is advancing a more integrated enterprise delivery model. This structure is intended to improve consistency, transparency, and oversight across the portfolio, while strengthening strategic alignment, clarifying governance and decision rights, enhancing risk and resource management, and supporting a more coordinated approach to modernization—including managing technology debt, **stabilizing legacy systems, and driving value-based investment decisions."**

Question:

a) Please list and provide a narrative discussion on the legacy systems hosted and maintained by Kyndryl.

b) Please provide a narrative discussion on the strategy relating to maintaining or replacing the legacy systems subsequent to January 2027 when Kyndryl's agreement expires.

Rationale for Question:

To better understand the IT risks and MPI's strategy relating to legacy systems. Also attempting to assess the mission criticality of the legacy systems.

RESPONSE:

a) Kyndryl hosts and maintains **[Redacted]**. The **[Redacted]** supports the Special Risk Extension insurance portfolio through the SIS application. The **[Redacted]** environment supports CARS, IWS, and AOL, which are used for important insurance, licensing, claims, and related business processes. These systems remain in Kyndryl data centres because they rely on specialized **[Redacted]** infrastructure and skills, were not suitable for the broader Azure cloud migration, and continue to support critical services. Kyndryl provides the hosting, monitoring, maintenance, backup, recovery, resiliency, and operational support needed to keep these systems stable and available. MPI continues to oversee these services through governance, reporting, and transition planning.

b) MPI's strategy is to maintain the legacy systems with Kyndryl beyond January 2027 **[Redacted]**. MPI is pursuing continuity of support, while adding flexibility to reduce, modernize, or replace services over time as business systems change. This approach protects core services, supports ongoing security and resiliency improvements, and avoids creating a rushed transition. Over the next contract period, MPI will continue reviewing options such as modernization, cloud hosting, vendor transition, or eventual decommissioning where business processes allow.

CC (MPI) 1-45

Part and Chapter:	**Part V – IT Appendix 2- Redacted** **Part V -IT Appendix 3 – Redacted**	**Page No.:**	**12** **1**
Topic:	**Requirements Management**		
Sub Topic:			

Preamble to IR (If Any):

In Part V – Information Technology, IT Appendix 2- Redacted at page 12 it states:

> "MPI established an enterprise Requirements Management Framework to address a recurring source of delivery risk: **unclear, inconsistent, and weakly governed requirements, particularly in complex and multi-year initiatives**. Historically, differing approaches to defining and managing requirements led to scope growth, misalignment between business intent and delivered solutions, rework, and reduced confidence in value realization. As initiatives scale and extend over time, these risks compound, making it harder to control cost, preserve strategic intent, and hold clear ownership for outcomes." [emphasis added].

Part V -IT Appendix 3 – Redacted, IT Risk Registry, page 1, Item 3, under Mitigation Strategy it states:

> "Review and revamp requirements gathering to address business needs."

Question:

a) Would MPI agree that one of the key reasons Project Nova failed was because a clear and detailed set of business requirements had not been prepared prior to acquiring software (Duck Creek, etc.) and engaging consultants to implement software that was not meeting MPI's business model and needs? If MPI does not agree, please elaborate.

b) The requirements framework (Part V IT Appendix 2 at page 12, Figure 8) organizes requirements into three levels (High Level, Mid-Level and Detailed Level Requirements). Would MPI agree that before any software and implementation resources are acquired and deployed, MPI would have prepared and approved a Detailed Requirements document and the potentially acquired software would, at minimum, meet in excess of 95% of the detailed requirements? If MPI does not agree, please elaborate.

Rationale for Question:

To gain a better understanding of the Requirements Management Framework.

RESPONSE:

a) MPI would not agree that the outcome of Project Nova can be attributed solely, or primarily, to the acquisition of software before a clear and detailed set of business requirements had been prepared.

As documented in the Project Nova Closeout Report, the Corporation's review concluded that the program was affected by a combination of strategic, organizational, governance, delivery, capacity, and planning challenges. These included unrealistic timelines, underestimation of system complexity, organizational capacity constraints, leadership turnover, governance shortcomings, implementation readiness challenges, and evolving understanding of requirements and business processes. Requirements management was identified as an area requiring improvement; however, it was one of several contributing factors rather than the singular reason for the program's outcome.

b) MPI does not agree with the statement as framed.

MPI’s Requirements Management Framework does not recommend a complete and approved set of Detailed Requirements before procurement activities begin. Rather, the framework uses a progressive requirements model: High-Level Requirements define the business need and desired outcomes, Mid-

Level Requirements define required capabilities and solution context, and Detailed Requirements provide the specific, testable information needed for build, configuration, testing, and implementation. Note that Enterprise Project Management Office (EPMO) manages processes and required deliverables within the project lifecycle.

Under the framework, High-Level and Mid-Level Requirements evolve through the Strategy-to-Execution process and are used as inputs into procurement, while Mid-Level Requirements are further refined in the context of the selected solution and Detailed Requirements begin during the Delivery and Implementation phases where requirements are validated, aligned and updated as necessary. This approach is particularly important where a commercial off-the-shelf solution (COTS) is being considered, as detailed requirements developed before solution selection can create a risk of designing around current-state processes and driving unnecessary customization. MPI's Requirements Framework therefore focuses Mid-Level Requirements on understanding business capabilities, target-state processes, and minimizing product fit-gap based on the selected solution's capabilities. Once this is understood, Detailed Requirements are developed as the final level of requirements before technical design and development.

MPI also does not agree that a fixed threshold, such as a product meeting more than 95% of detailed requirements, is the appropriate standard in all circumstances. Requirements must be sufficiently detailed to avoid misinterpretation, but not so prescriptive that they stifle innovation or become brittle to minor changes.

CC (MPI) 1-46

Part and Chapter:	**Part V – IT Appendix 2- Redacted**	**Page No.:**	**22**
Topic:	**Project Nova Vendor decisions**		
Sub Topic:			

Preamble to IR (If Any):

In Part V – Information Technology, IT Appendix 2- Redacted at page 22 it states:

> "Below is a summary of the key vendor engagement decisions originating from Project Nova:
>
> - **Infosys:** To meet advance notice requirements, MPI made an early decision not to renew the high-cost support and maintenance arrangement and preserve its contractual position, transitioning support to i3 Verticals at a significantly lower ongoing cost while maintaining service continuity.
> - **Duck Creek:** MPI undertook a rigorous assessment of available options, including careful review of vendor cost assumptions, internal delivery capacity, and proposed timelines, and concluded that reinitiating a large-scale implementation would not represent prudent value, particularly considering execution risk and the scale of further investment required."

Question:

a) For greater clarity, please confirm that the Duck Creek vendor contract has been concluded/terminated and that Duck Creek software is not being used by MPI. If this cannot be confirmed, please elaborate.

b) Please provide an analysis of the total sunk cost relating to the Duck Creek software, including any final legal settlement costs.

c) Infosys and Duck Creek are indicated as the 'key' vendor engagement decisions. Please provide a list of all terminated vendors and related sunk costs relating to Project Nova.

d) Please provide a list and related costs of continuing Project Nova vendors contributing to future IT initiatives.

Rationale for Question:

To gain a better understanding of terminated and continuing vendors relating to Project Nova.

RESPONSE:

a) **[REDACTED].**

b) Please see *PUB (MPI) 1-38 – Appendix 1 - Confidential* for the Onerous Contract memo, all details requested are contained therein. **[REDACTED]**.

[REDACTED].

c) **[REDACTED]**.

[REDACTED].

d) For the list and related costs of continuing Project Nova vendors contributing to future IT initiatives are detailed within *Appendix 1 – Vendor Costs – Confidential.*

Appendix 1:
Vendor Costs

This material is the subject of a confidential motion.

CC (MPI) 1-47

Part and Chapter:	**PART VI – Claims Forecasting**	**Page No.:**	**12**
Topic:	**2027 GRA Loss Cost Forecasts**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, Figure CF-4 in CF.1.4 at page 12 provides a comparison of the 2027/28 rating year loss costs by coverage to last year's GRA.

Question:

a) Did MPI conduct a reconciliation analysis to determine the differences between forecasts? If so, please provide the reconciliation analysis.

Rationale for Question:

To understand the differences in loss cost projections between GRAs.

RESPONSE:

See *PUB (MPI) 1-61* for the breakdown of the increases to Weekly Indemnity, *PUB (MPI) 1-62* for the breakdown of the increases to Accident Benefits Other (Indexed), and *CC (MPI) 1-48* for the breakdown of the increases to Bodily Injury.

For all remaining coverages, please find the explanation of the changes in projected ultimate loss cost by root causes in *Appendix 1*, with a narrative description for each cause written below.

Change in claim experience for prior years estimates the impact on the claims forecast from the changes in historical ultimate total losses for 2024 accident year and prior years between 2026 GRA and 2027 GRA.

Including latest year of claim experience estimates the impact of adding 2025 accident year on the claims forecast. This includes impact of on-levelling historical experience to 2025 accident year (using trends and assumptions in 2026 GRA) and shifting accident year weights to be applied for 2021 – 2025 accident years instead of 2020-2024 accident years.

Updating past trend estimates the impact of changing past loss trends to 2027 GRA assumptions on the claims forecast. This includes any changes to WFH factors used to derive the past trend in 2027 GRA. In this step, the change to WFH methodology has not been considered.

Updating future trend estimates the impact of changing future trends to 2027 GRA assumptions on the claims forecast.

Updating forecasted exposure estimates the impact of using the latest exposure forecast based on the experience as of March 31, 2026, in the claims forecast.

Changing WFH model estimates the impact of using alternative assumptions to estimate the impact of COVID-19 and subsequent impact of working from home. The change in the WFH assumption impacts MPI's view on past frequency trends and future frequency trends.

Increase in $1,000 Deductible estimates the impact of change in the Basic deductible from $750 to $1000 in the claims forecast effective April 1, 2026.

Loss Cost	Accident Benefits - Other (Non-Indexed)	Collision	Property Damage (Loss of Use)	Property Damage (Third Party Deductible Transfer)	Property Damage (Other)	Comprehensive Fire	Comprehensive Glass	Comprehensive Hail	Comprehensive Other	Comprehensive Vandalism	Comprehensive Theft (Combined)
2026 GRA Estimate for 2027/28 Rating Year	**$42.44**	**$674.93**	**$10.47**	**$31.22**	**$28.19**	**$12.70**	**$35.41**	**$7.45**	**$31.68**	**$15.86**	**$48.12**

CC (MPI) 1-48

Part and Chapter:	Part VI – Claims Forecasting	Page No.:	12
Topic:	2027 GRA Loss Cost Forecasts		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, figure CF-4 in CF.1.4 at page 12 presents large differences in the loss cost projections for accident benefits – weekly indemnity and bodily injury of over 20% in line no. 1.

Question:

a) Please explain what MPI believes are the reasons for the large increases beyond the rate of inflation.

Rationale for Question:

To understand the drivers of loss costs for the coverages experience large loss cost increases.

RESPONSE:

Please see *PUB (MPI) 1-61* for the breakdown of the increases to Weekly Indemnity.

Please find the breakdown of the increases for Bodily Injury by root causes in the table below, with a narrative description for each below the table.

Figure 1 - Breakdown of Comparison with 2026 GRA (2027/28 Rating Year) – Projected Ultimate Loss Cost

	Bodily Injury
2026 GRA Estimate for 2027/28 Rating Year	**$8.57**
Change in claim experience for prior years	$0.07
Including latest year of claim experience	$0.87
Updating past trend	$0.35
Updating future trend	$0.44
Updating forecasted exposure	$0.00
Changing WFH model	$0.18
Increase to $1,000 Deductible	$0.00
2027 GRA Estimate for 2027/28 Rating Year	**$10.49**
% Impact	
Change in claim experience for prior years	0.84%
Including latest year of claim experience	10.14%
Updating past trend	4.12%
Updating future trend	5.12%
Updating forecasted exposure	0.00%
Changing WFH model	2.16%
Increase to $1,000 Deductible	0.00%
Combined Impact	**22.37%**

Change in claim experience for prior years estimates the impact on the claims forecast from the changes in historical ultimate total losses for 2024 accident year and prior years between 2026 GRA and 2027 GRA.

Including latest year of claim experience estimates the impact of adding 2025 accident year on the claims forecast. This includes impact of on-levelling historical experience to 2025 accident year (using trends and assumptions in 2026 GRA) and shifting accident year weights to be applied for 2021 – 2025 accident years instead of 2020-2024 accident years.

Updating past trend estimates the impact of changing past loss trends to 2027 GRA assumptions on the claims forecast. This includes any changes to WFH factors used to derive the past trend in 2027 GRA. In this step, the change to WFH methodology has not been considered.

Updating future trend estimates the impact of changing future trends to 2027 GRA assumptions on the claims forecast.

Updating forecasted exposure estimates the impact of using the latest exposure forecasted based on the experience as of March 31, 2026, in the claims forecast.

Changing WFH model estimates the impact of using alternative assumptions to estimate the impact of COVID-19 and subsequent impact of working from home. The change in the WFH assumption impacts MPI's view on past frequency trends and future frequency trends.

Increase in $1,000 Deductible estimates the impact of change in the Basic deductible from $750 to $1000 in claims forecast effective April 1, 2026. This has no impact on Bodily Injury coverage.

CC (MPI) 1-49

Part and Chapter:	**PART VI – Claims Forecasting**	**Page No.:**	**40**
Topic:	**Deductible Adjustment**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, figure CF-12 in CF.5.4 at page 40 presents the calculation of the $1,000 deductible adjustment factor.

Question:

Please confirm:

a) whether the Reported Losses (4) column represents ground up losses; and

b) whether the Past Trend (2) column represents the trend based on ground up losses.

Rationale for Question:

To understand the components of the deductible adjustment.

RESPONSE:

a) The Reported Losses (4) represents the incurred losses, which is equivalent to the ground up losses minus the policy's Basic deductible at the time of the claim.

b) No, the Past Trend (2) is the severity trend based on the ultimate losses and ultimate claim counts from the March 2026 Valuation adjusted to the $750 deductible level. Further details on the ultimate losses and ultimate claim counts can be found in *CF.3.1* and *CF.3.2* respectively.

CC (MPI) 1-50

Part and Chapter:	**PART VI – Claims Forecasting**	**Page No.:**	**16**
Topic:	**Inflation**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, CF.2.1, MPI provides a discussion on inflation and various consumer price indices. At page 16, MPI concludes, "MPI believes pre-COVID long-term average trend is a best estimate of future trend, which is 3.00% for total loss severity."

Question:

a) Please confirm the basis of the 3.00% selection. If it is a combination of the vehicle parts, maintenance and repairs, and health care CPI, please provide the calculation of considerations in selecting 3.00%

b) Please clarify how many years would be required in the observation period for it to be considered a "long-term average" by MPI?

Rationale for Question:

To assess the reasonability of the inflation selection as it relates to claims forecasting.

RESPONSE:

a) The 3.00% selected trend was derived from observed severity experience and judgment rather than from a weighted combination of the vehicle parts, maintenance and repairs, and health care Consumer Price Index (CPI) measures.

   To evaluate the long-term severity trend underlying this experience, MPI reviewed historical severity growth over several pre-COVID observation periods

using varying starting years. MPI considered the 2012-2020 period to be the most representative of future experience, as it reflects the most recent stable pre-COVID environment while avoiding distortions associated with the COVID-19 pandemic and subsequent market disruptions. As illustrated in ***Figure 2***, MPI calculated the average annual percentage change in Collision Total Loss severity for each period from 2012–2020 through 2019–2020 to assess how the observed severity trend evolved over time and to support the selected trend.

Based on this analysis, MPI judgmentally selected an annual trend of 3.00%.

Figure 1 Ultimate Collision Total Loss Severity as of March 31, 2026

Line No.	Accident Year	Severity	% Change
1	2011	$4,866	
2	2012	$5,060	3.99%
3	2013	$5,336	5.45%
4	2014	$5,563	4.26%
5	2015	$5,968	7.27%
6	2016	$6,078	1.84%
7	2017	$6,425	5.72%
8	2018	$6,459	0.52%
9	2019	$6,789	5.11%
10	2020	$6,616	-2.54%

Figure 2 Collision Total Loss Trends

Line No.	Accident Year Range	Long-term Trend
1	2012-2020	3.51%
2	2013-2020	3.45%
3	2014-2020	3.17%
4	2015-2020	2.99%
5	2016-2020	2.13%
6	2017-2020	2.20%
7	2018-2020	1.03%
8	2019-2020	1.29%

b) MPI does not apply a fixed minimum number of years when determining whether an observation period represents a long-term average. Rather, the appropriate period is assessed based on the purpose of the analysis, the stability and credibility of the underlying experience, and the extent to which the period is considered representative of future conditions.

CC (MPI) 1-51

Part and Chapter:	**PART VI – Claims Forecasting Appendix 3**	**Page No.:**	**Appendix 3h Table 2**
Topic:	**Loss Trends**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting Appendix 3h table 2, MPI presents the selected and modeled loss trends for each coverage. For comprehensive (attempted & partial theft), MPI selects a frequency trend rate of −3.14%.

Question:

a) Please explain why consideration was not given to the 13-year trend rate beginning accident year 2013 and the 14-year trend rate beginning accident year 2012, given the similar model fit statistics.

Rationale for Question:

To understand the trend selection.

RESPONSE:

a) Consideration was given to the 13-year trend rate beginning accident year 2013 and the 14-year trend rate beginning accident year 2012. The adjusted R^2 value associated with 12-year trend rate beginning in accident year 2014 is slightly higher than the adjusted R^2 for models beginning in 2013 or 2012. MPI's model selection primarily involves maximizing adjusted R^2 while maintaining significant p-values (<0.05) for model parameters. The figure below shows Appendix 3h Table 2 with adjusted R^2 values to five decimal places for clearer comparison.

Figure 1 Appendix 3h Table 2 – Adjusted R^2 to Five Decimal Places

Starting Period	Years of Data	R^2	Adjusted R^2	Time p-value	Theft Parameter p-value	Time Coefficient	Theft Parameter Coefficient	Intercept
2012	14	0.90	0.87752	0.00	0.00	3.90%	20.31%	-722.66%
2013	13	0.91	0.88841	0.01	0.00	3.40%	20.28%	-720.15%
2014	12	0.91	0.88843	0.02	0.00	3.19%	20.29%	-719.18%
2015	11	0.91	0.88841	0.06	0.00	2.93%	20.35%	-718.13%
2016	10	0.91	0.88626	0.09	0.00	3.27%	20.24%	-719.29%
2017	9	0.94	0.92249	0.32	0.00	1.79%	20.93%	-714.98%
2018	8	0.94	0.91874	0.57	0.00	1.30%	21.22%	-713.84%
2019	7	0.94	0.91726	0.36	0.00	3.00%	20.00%	-716.99%
2020	6	0.96	0.93388	0.86	0.01	-0.85%	22.41%	-710.18%
2021	5	0.98	0.95633	0.37	0.18	13.53%	14.39%	-734.63%
2022	4	1.00	0.99928	0.08	0.03	10.24%	20.56%	-731.76%

CC (MPI) 1-53

Part and Chapter:	**PART VI – Claims Forecasting Appendix 3**	**Page No.:**	**Appendix 3i Table 2**
Topic:	**Loss Trends**		
Sub Topic:			

Preamble to IR:

In Appendix 3, MPI presents the selected and modeled loss trends for each coverage. For comprehensive (entire theft) at Appendix 3i Table 2, MPI selects a frequency trend rate of +4.82% even though frequency has been decreasing since accident year 2022.

Question:

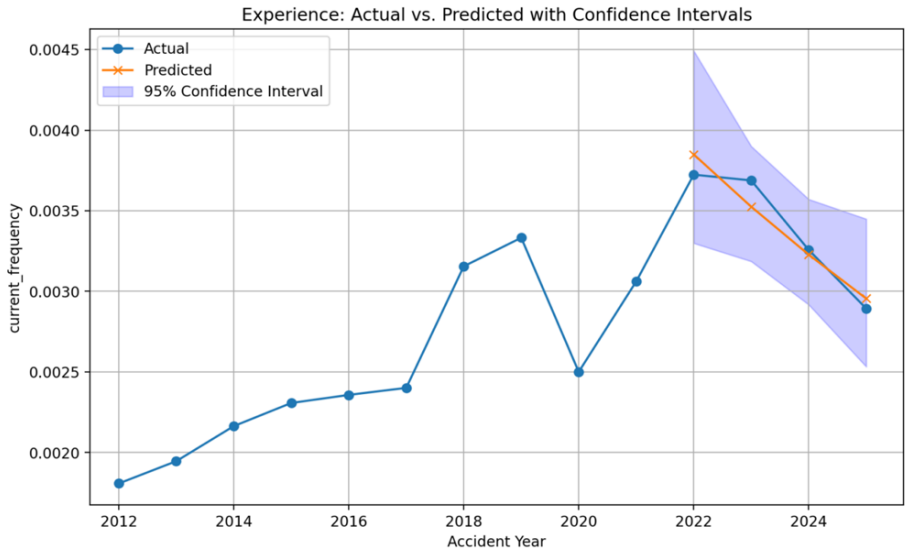
a) Please explain why MPI chose not to reflect the decreasing trend since accident year 2022 for the past trend given this decreasing pattern spans 4 of the 5 years used in the rate indication experience period.

Rationale for Question:

To understand the trend selection.

RESPONSE:

a) MPI selected the Comprehensive Entire Theft frequency past trend based on the regression model shown in Appendix 3i Table 2, which uses 14 years of data beginning in accident year 2012 and produces a selected frequency trend of +4.82%. Although Appendix 3i Table 1 shows that adjusted ultimate frequency decreased from 2022 to 2025, MPI's loss trending procedure considers regression models over both longer and shorter time periods to increase reliability and stability and to assess changes in trend patterns. For Comprehensive Entire Theft, time was statistically significant and included in the final frequency model, and the selected frequency trend differs from the prior analysis to reflect emerging industry experience, including that auto theft activity



peaked in 2022–2023 and has since declined. Accordingly, MPI did not select a trend based only on the decreasing experience beginning in 2022. The selection reflects the broader experience period and the considerations described in the Claims Forecasting Chapter.

Figure 1 Comprehensive (Entire Theft) Statistics by Model Starting Year

Starting Period	Years of Data	R^2	Adjusted R^2	Time p-value	Time Coefficient	Intercept
2012	14	0.72	0.69	0.00	-4.71%	-556.55%
2013	13	0.65	0.61	0.00	-4.35%	-558.30%
2014	12	0.55	0.51	0.01	-3.93%	-560.27%
2015	11	0.45	0.39	0.02	-3.60%	-561.72%
2016	10	0.34	0.25	0.08	-3.21%	-563.28%
2017	9	0.18	0.07	0.25	-2.40%	-566.23%
2018	8	0.02	-0.14	0.73	-0.76%	-571.70%
2019	7	0.03	-0.17	0.73	-1.04%	-570.87%
2020	6	0.10	-0.12	0.54	-2.59%	-566.74%
2021	5	0.12	-0.17	0.56	2.47%	-578.54%
2022	4	0.91	0.87	0.04	8.81%	-591.22%
2023	3	1.00	1.00	0.01	12.13%	-596.75%

Selected Trend	-8.43%	**2027 GRA Trend**	4.82%
Current Method	Trend based on 4 yrs of data, starting 2022 using log_linear method		
2027 GRA Method	Trend based on 14 yrs of data, starting 2012 using log_linear method		

Figure 2 Comprehensive (Entire Theft) Frequency Experience vs. Trend Beginning in 2022

CC (MPI) 1-54

Part and Chapter:	**PART VI – Claims Forecasting**	**Page No.:**	**31 and 32**
Topic:	**Theft Parameter**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting CF.4.7 at pages 31 and 32, MPI presents a theft parameter used to adjust the theft frequency due to catalytic converter thefts. The theft parameter has values of 1, 2, 6, 4, and 1 for accident years 2019 to 2023, respectively, and 0 for all other accident years.

Question:

a) Please provide the analysis used to determine the theft parameter values.

Rationale for Question:

To understand the theft parameter selections.

RESPONSE:

a) The data presented in *Figure 1* below was derived from a search of accident detail text, which is a free-text field and was not designed for structured reporting purposes. Consequently, the results may be incomplete or inconsistent due to variations in wording, spelling, terminology, level of detail provided, and differences in how incidents were described or recorded. In addition, there is a possibility that some relevant claims were not identified by the search criteria, while other claims that were not related to catalytic converter theft may have been captured.

Given these limitations, the results should be considered indicative of the general magnitude and trend of catalytic converter theft activity rather than a definitive count of such claims. Accordingly, MPI relied on actuarial judgment informed by the query results when selecting the catalytic converter theft parameter. This approach was considered more appropriate than directly adopting the queried claim counts, given the uncertainty inherent in using free-text claim descriptions to identify catalytic converter theft related claims.

Figure 1 Catalytic Converter Theft Count by Accident Year

Line No.	Accident Year	Claim Count	Theft Parameter
1	**2019**	256	1
2	**2020**	585	2
3	**2021**	2454	6
4	**2022**	1616	4
5	**2023**	240	1

CC (MPI) 1-55

Part and Chapter:	**PART VII – Rate Indication**	**Page No.:**	**30**
Topic:	**Credibility**		
Sub Topic:			

Preamble to IR:

In Part VII – Rate Indication at page 30, MPI presents the methodology to determine the credibility weighting of each class by using the *N / (N + K)* credibility, where *K* represents a selected constant so that the private passenger class is at least 99% credible and *N* is the number of insured units in the class. The credibility is determined on an overall class level.

Question:

a) Does MPI consider the credibility of the loss trend selections for coverages with low claims volume?

Rationale for Question:

To assess MPI's credibility approach.

RESPONSE:

a) Yes, MPI considers the credibility of loss trend selections for coverages with low claim volume; however, it does not apply a formal credibility-weighting approach such as the N/(N + K) methodology used in rate indication. For the purpose of loss trending, MPI assesses the credibility of the available experience through the trend model selection process, including consideration of claim volume, stability of overserved experience, model fit statistics and parameter significance. MPI recognizes that coverages with low claim volume may still exhibit observable patterns within the available data. For example, Bodily Injury is a low-frequency coverage, in some cases as low as 0.005% as shown in

Part VI CF Appendix 3f Table 1, yet the experience exhibits a distinct downwards trend when considering the experience presented in the original submission.

One of the reasons MPI does not consider credibility weighting in its loss trending for coverages with low claims volume is the lack of an appropriate complement of credibility. MPI would require external data to be used as a complement, in order to select trends for coverages with low claims volume. Additionally, there may be differences between the coverage MPI provides and the coverage the external data source provides which may cause discrepancies when comparing trends.

Within *CF.4.3*, MPI explains loss trending methodology used for the purpose of the 2027 GRA submission. Commentary is provided on considerations for credibility of data available. For coverages where claim count data is not reliable, trending directly on loss cost may be used instead. Credibility is directly considered in model selection by only choosing parameters with low p-values and models with high adjusted R^2 values.

CC (MPI) 1-56

Part and Chapter:	**PART VI – Claims Forecasting Attachment A – Mobility Data Report**	**Page No.:**	**25**
Topic:	**Mobility and New Normal Parameter**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting Attachment A – Mobility Data Report at page 25, MPI states, "The mobility and new normal parameters are included in claim frequency regression models when they are found to be jointly statistically significant."

Question:

a) Why did MPI only consider the parameters' significance jointly rather than independently?

b) When evaluating models, how does MPI address situations where only one of the parameters is significant? For example, a loss experience with COVID19 effect during the in-pandemic period followed by a post-pandemic period that returns to pre-pandemic levels (i.e., no evidence of a new normal).

Rationale for Question:

To understand MPI's parameter selections.

RESPONSE:

a) In accordance with Order No. 156 issued December 19, 2025, the Public Utilities Board directed MPI to determine a more evidence-based approach to work from home forecasting (now referred to as mobility). MPI considers joint significance rather than independent significance as analysis of various data sources suggests that mobility is settling into a new normal after the adverse experience

over the pandemic period. This aligns not only with the trends MPI sees emerging within its claims data but also reports delivered by Oliver Wyman for insurance regulators within Alberta and Ontario. Additional details may be found in *Part VI CF Attachment A Mobility Data Report*. Within this document MPI outlines the data sources used to draw its conclusion that post-pandemic mobility is different from pre-pandemic mobility. The main drivers behind this belief are the analysis of transit ridership data and commuting data released by Statistics Canada.

MPI's analysis indicates that evidence shows *both* a reduction in claims frequency during the pandemic and a difference in post-pandemic experience when compared to pre-pandemic experience. Through this analysis we combine the mobility parameter that uses Google's COVID-19 Mobility Reports and a new normal parameter to account for the new claims' frequency. MPI accounts for significance jointly when considering both parameters, as both are necessary to reflect the above evidence of behavior in claim frequency.

b) MPI employs the use of joint F-tests to assess whether the mobility and new normal parameters collectively provide statistically significant explanatory power within the frequency model. The mobility and new normal parameters are intended to capture different aspects of the same underlying phenomenon – the impact of pandemic-related changes driving behaviour and the post pandemic equilibrium. Since the parameters are evaluated as a single modelling construct, MPI relies on the joint test result rather than the individual p-values of each parameter. Consequently, MPI does not make inclusion decisions based on whether one parameter is individually significant and the other is not. If the joint F-test indicates that the mobility-related effects are statistically significant, both parameters are retained; otherwise, neither parameter is included. This approach aligns with MPI's objective of determining whether mobility-related factors, considered collectively, improve the explanatory power of the model.

As an example, see the regression results for Bodily Injury frequency as provided in *Part VI CF Appendix 03 Loss Trend Analysis Appendices*. MPI has provided these below for ease of reference.

Figure 1 Bodily Injury Frequency

Starting Period	Years of Data	R^2	Adjusted R^2	Time p-value	Mobility p-value	Time Coefficient	Mobility Parameter Coefficient	New Normal Coefficient	Intercept
2012	14	0.88	0.84	0.04	0.00	3.93%	1.74%	-10.20%	-958.88%
2013	13	0.89	0.86	0.02	0.00	5.18%	1.58%	-2.12%	-969.47%
2014	12	0.88	0.83	0.10	0.01	4.01%	1.71%	-9.17%	-960.08%
2015	11	0.90	0.86	0.53	0.00	1.37%	1.97%	-23.75%	-940.23%
2016	10	0.89	0.83	0.90	0.00	0.34%	2.04%	-28.91%	-932.99%
2017	9	0.87	0.80	0.81	0.01	-0.79%	2.10%	-33.73%	-925.92%
2018	8	0.86	0.76	0.53	0.02	-2.54%	2.10%	-39.35%	-916.81%
2019	7	0.83	0.66	0.43	0.07	-4.04%	1.98%	-41.24%	-911.91%
2020	6	0.81	0.52	0.30	0.65	-10.48%	0.40%	-23.82%	-916.45%
2021	5	0.72	-0.12	0.50	0.77	-10.19%	1.58%	-44.95%	-895.91%

The mobility p-value column groups both the mobility and new normal parameters together. This p-value shows whether the group of predictors (mobility and new normal) simultaneously influence the model when considered together. No individual column is output for mobility parameter p-value or new normal p-value, as they are not considered individually in our model. Likewise, this process is followed when trending frequency in all coverages may be affected by mobility.

CC (MPI) 1-57

Part and Chapter:	**PART VII – Rate Indication**	**Page No.:**	**10**
Topic:	**Claims Expenses**		
Sub Topic:			

Preamble to IR:

In the 2026 GRA, for rating year 2026/27, discounted fixed claims expenses was $40,561,733[1] corresponding to an average per unit cost of $29.83. In Part VII at page 10, in the 2027 GRA, for rating year 2027/28, discounted fixed claims expenses are $45,396,627 (an increase of 11.1%) corresponding to an average per unit cost of $32.76 (an increase of 9.8%).

Question:

a) Please provide an explanation for what MPI believes are the drivers for this increase.

Rationale for Question:

To understand the changes in fixed claims expenses.

RESPONSE:

a) The increase in MPI's fixed claims expenses is primarily attributable to the Manitoba Health Levy. The Manitoba Health Levy is a payment made by MPI to the Province of Manitoba to compensate the provincial health care system for the medical and hospital costs associated with motor vehicle injuries. The expected payment is based on the projected frequency and costs of the bodily injury claims.

MPI revised its forecast assumptions in two key areas that differ from those used in the prior year's projection:

[1] See 2026 GRA, Part VII – Rate Indication RI.2.2 Claims Expense at page 10 of 32.

1. **Bodily Injury Claims Frequency**: The projected bodily injury claims frequency is derived directly from the weekly indemnity loss cost projection. The implied frequency in the loss cost projection is higher than assumed in the prior years.

2. **Health Cost Index (HCI)**: The HCI, which is used to estimate future Manitoba health care costs, is projected to be higher than in previous years. This increase is primarily driven by a change in methodology, with the HCI now based on the average growth observed over the past 10 years (4.3%) rather than the approach used in prior projections, which assumed a linear pattern and fit a trendline. The previous approach is no longer suitable given the steep increase in HCI in the previous 2 years (15% and 6.2% respectively), while the new approach is expected to be more stable over time.

As a result of these assumption changes, the forecasted Manitoba Health Levy expense has increased relative to the prior year's projection.

CC (MPI) 1-58

Part and Chapter:	**PART VII – Rate Indication**	**Page No.:**	**13**
Topic:	**Anti-Theft Discount**		
Sub Topic:			

Preamble to IR:

In Part VII – Rate Indication at page 31, MPI includes a fixed expense component for anti-theft discount.

Question:

a) Please provide an explanation for what this expense line item represents.

Rationale for Question:

To understand the anti-theft discount expense.

RESPONSE:

a) The Anti-Theft Discount was introduced in 2002 to encourage vehicle owners to protect their vehicles from theft. Under the program, vehicles equipped with an immobilizer were eligible for a $40 discount on their Basic insurance premium.

Effective September 2018, the immobilizer incentive program was discontinued. However, customers who had already qualified for the discount through the installation of an aftermarket immobilizer continue to receive the discount as long as they retain ownership of the vehicle. Upon a change in ownership, the discount is removed and is not available to the new owner.

As no new discounts are being issued, this expense item represents a run-off program, with costs expected to decline over time as eligible vehicles change ownership.

CC (MPI) 1-59

Part and Chapter:	**PART VII – Rate Indication**	**Page No.:**	**11**
Topic:	**Operating Expenses**		
Sub Topic:			

Preamble to IR:

In the 2026 GRA, for rating year 2026/27, undiscounted fixed operating expenses were $100,670,961.[1] In the 2027 GRA, in Part VII at page 11 for rating year 2027/28, undiscounted fixed operating expenses are $110,760,771, an increase of 10.0%.

Question:

a) Please provide an explanation for what MPI believes are the drivers for this increase.

Rationale for Question:

To understand the changes in fixed operating expenses.

RESPONSE:

a) The increase in fixed operating expenses is mainly attributable to the change in initiative expenses from being excluded for rate setting. Please refer *to Part VIII EXP Appendix 23 Regulatory Deferral Assets* for details on initiative expenses being excluded for rating years per PUB order.

[1] See 2026 GRA, Part VII – Rate Indication, RI.2.3 Operating Expenses at page 11 of 32

CC (MPI) 1-60

Part and Chapter:	**Part VII – Risk Classification**	**Page No.:**	**14**
Topic:	**Rate Groups**		
Sub Topic:			

Preamble to IR:

In the 2025 GRA, MPI increased the maximum rate group from +40 to +42.[1] In the 2026 GRA, MPI increased the maximum rate group from +42 to +45.[2] In the current 2027 GRA in part VII – Risk Classification at page 14, MPI proposes to increase the maximum rate group from +45 to +50.

Question:

a) Please clarify whether MPI expects to increase the maximum rate groups in future GRAs. If so, what is the target or ideal maximum rate group that MPI intends to ultimately achieve?

Rationale for Question:

To understand the rate group changes.

RESPONSE:

a) MPI periodically reviews its rate group structure. The proposed expansion to rate group 50 is intended to improve the distribution of vehicles across the rating scale. Please refer to *PUB (MPI) 1-10(b)* for the distribution of indicated rate groups. MPI has not established a target maximum rate group and will continue to review the rate group structure over time as part of its regular rate setting process.

CC (MPI) 1-61

Part and Chapter:	**Part VII – Risk Classification RC Appendix 6**	**Page No.:**	**5**
Topic:	**Driver Safety Rating**		
Sub Topic:			

Preamble to IR:

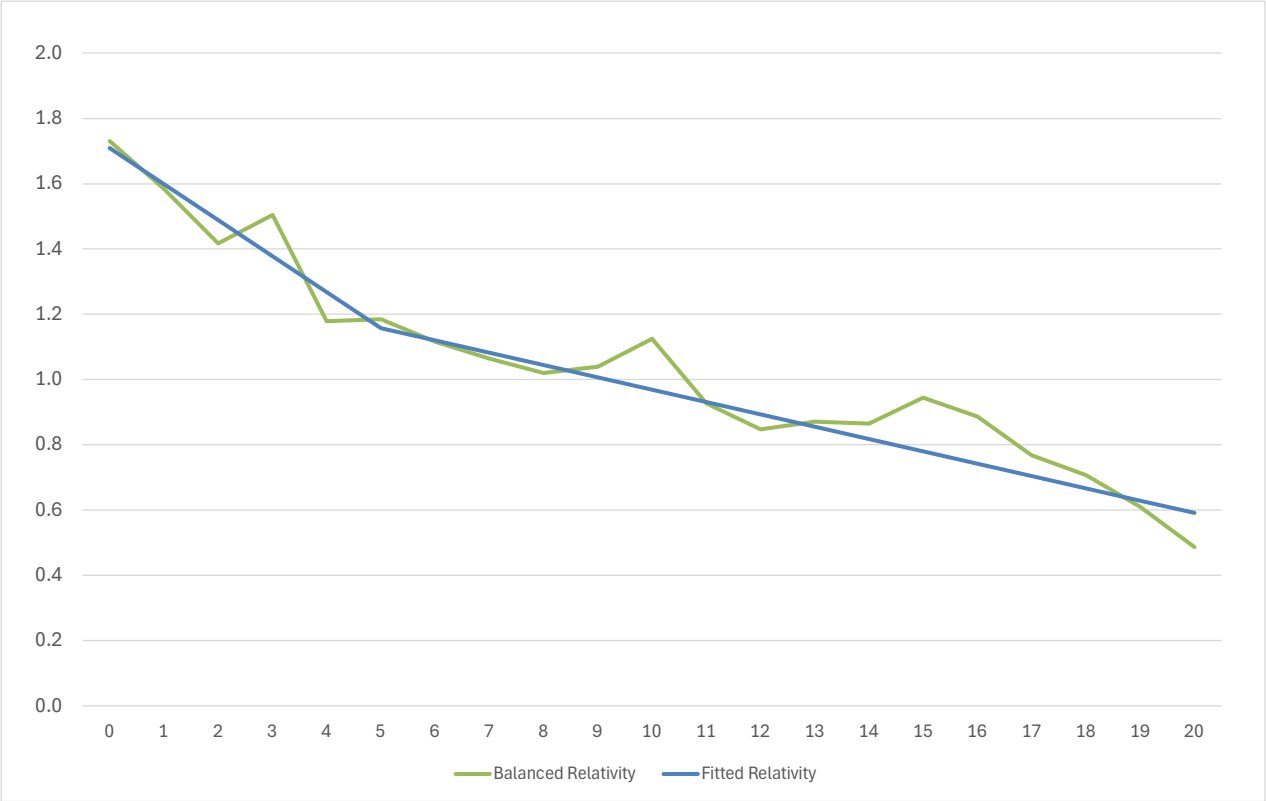
While complying with PUB Order 2/25 Directive no. 13 by fitting two contiguous straight-lines from DSR 0 to +20 in the 2026 GRA, MPI shifted the point of slope change from DSR +5 to DSR +4 with justification that it provided better alignment with the data.

At Part VII – Risk Classification RC Appendix 6 at page 5, MPI continues to present a two-segment fitted line with a slope change at DSR +4 noting this was still the optimal fit to the observed data and had a weighted R-squared of 93.6%.

Question:

a) Please provide an alternative Figure RC App 6-1 with the slope change at DSR +5 as originally directed in PUB Order 2/25 Directive 13. Please also include the weighted R-squared of this model.

b) In figure RC App 6-1, the fitted relativities overpredict DSR +4 to DSR +8 and underpredict DSR +14 to DSR +18. Please explain if MPI considered other models or methods to achieve a better fit. If so, please provide a discussion on those models and the considerations to prefer the selected model.



Rationale for Question:

To test alternate fits as it relates to the driver safety rating.

RESPONSE:

a) Please see ***Appendix 1*** for the alternative Figure RC App 6-1 with the slope change at DSR +5. This alternative fit results in a weighted R-squared value of 93.0%.

b) Please refer to response to ***PUB (MPI) 1-76***.

Balanced Relativity
Fitted Relativity

CC (MPI) 1-62

Part and Chapter:	**Part VII – Risk Classification RC Appendix 6**	**Page No.:**	**5**
Topic:	**Driver Safety Rating**		
Sub Topic:			

Preamble to IR:

At Part VII – Risk Classification RC Appendix 6, in Figure RC App 6-1 at page 5, MPI presents the fitted relativities over the balanced relativities. The balanced relativities show a reversal at DSR 5, DSR 10 and DSR 13 -15. This is consistent with what is observed in the 2026 GRA, 2025 GRA and to lesser extent the 2024 GRA.

Question:

a) What does MPI believe is the reason for the reversal in relativities at the noted DSR levels that appears to be consistent throughout the recent years?

b) Does MPI believe there is a risk component not adequately captured in the DSR definition or DSR progression rules that contribute to this behaviour?

c) Has MPI conducted any analysis or studies beyond curve fitting for relativities on DSR to identify potential weaknesses in the current DSR program? If so, please provide the findings.

Rationale for Question:

To understand DSR relativity behaviour.

RESPONSE:

a) MPI believes the observed reversals at certain DSR levels are primarily attributable to limited credibility and claim severity volatility within individual DSR levels. The DSR analysis is based on loss costs that include both PIPP and non-

PIPP losses over the historical experience period. For some DSR levels, exposure and claim volumes are relatively limited, resulting in greater year-to-year volatility in the observed loss costs.

This volatility can be amplified by the presence of infrequent but high-severity claims, particularly large PIPP claims, which can materially affect the loss experience of a DSR level with limited volume. As a result, the observed relativities may not always follow a perfectly monotonic relationship across adjacent DSR levels.

For instance, DSR 5 exhibited higher PIPP claims in 2022, and DSR 10 experienced higher PIPP claims in both 2020 and 2023, relative to the overall loss cost. These variations have influenced the raw relativities observed for these DSR categories.

While MPI uses five years of historical data to mitigate the impact of isolated adverse years, unusually severe experience can still introduce volatility into the raw relativities, particularly for DSR levels with limited exposure and claim volume. To reduce the impact of such volatility and maintain a smooth, monotonic relationship between DSR level and expected loss costs, MPI applies curve fitting to the raw relativities.

b) MPI does not believe the observed reversals indicate that there is a material risk component not adequately captured by the DSR framework or DSR progression rules.

The overall relationship between DSR level and loss cost remains consistent with expectations, with higher DSR levels generally exhibiting lower loss costs than lower DSR levels. The observed reversals are localized to a small number of DSR levels and are primarily attributable to limited credibility and higher volatility within those levels, particularly driven by large PIPP claims. MPI therefore views these reversals as normal statistical variation rather than evidence of deficiencies in the DSR framework or DSR progression rules.

c) Other than the curve fitting described in the filing, MPI has not conducted any separate study specifically intended to identify weaknesses in the current DSR framework.

CC (MPI) 1-63

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1h, Table 1 Appendix 1h, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

In Part VI – CF Appendix 1, for comprehensive (attempted and partial theft) reported claim counts (Appendix 1h, Table 1) and reported loss (Appendix 1h, Table 3), the selected loss development factor for ages 12-18 is based on the 3-year volume weight average, and ages 18-24 is based on the 5-year volume weight average. These selections are heavily influenced by the period of high theft claims of catalytic converter thefts.

Question:

a) Given MPI believes the elevated catalytic converter theft period has ended, as discussed in Section CF.4.7, does MPI believe the comprehensive (attempted & partial theft) development patterns based on recent years will continue or will return to historical levels?

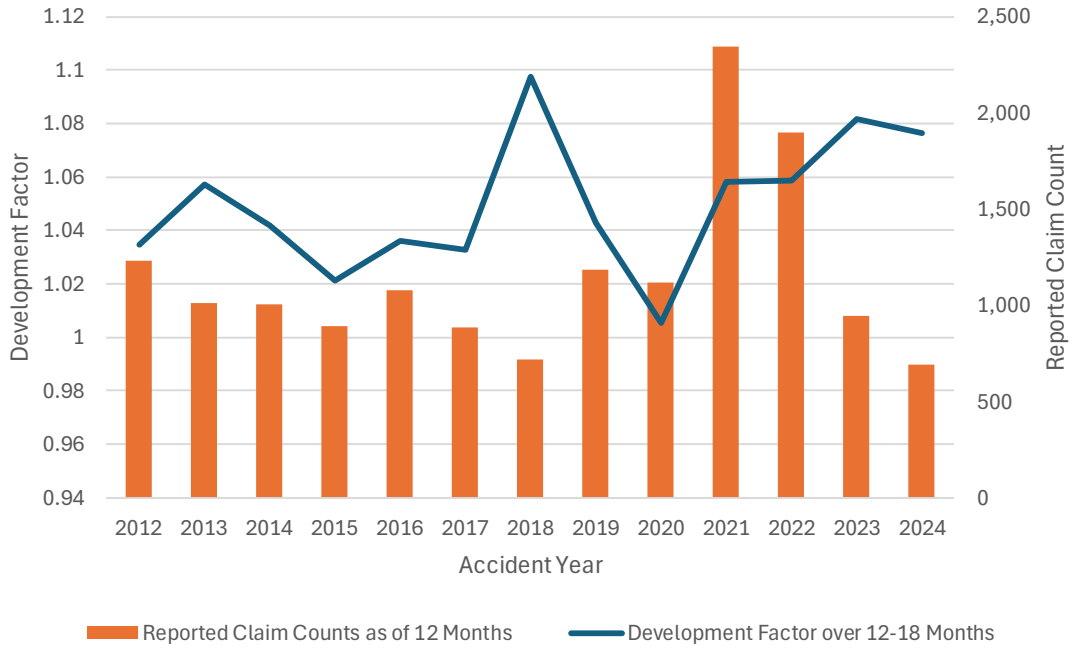
Rationale for Question:

To understand loss development selections.

RESPONSE:

a) Based on the available experience, MPI does not believe that the decline in catalytic converter theft activity, on its own, supports returning to development factors based on the earlier historical period. The recent development factors do not appear to have been driven primarily by the elevated volume of catalytic converter theft claims.

Figure 1 Comprehensive Attempted & Partial Theft 12-to-18 Month Reported Claim Counts Comparison



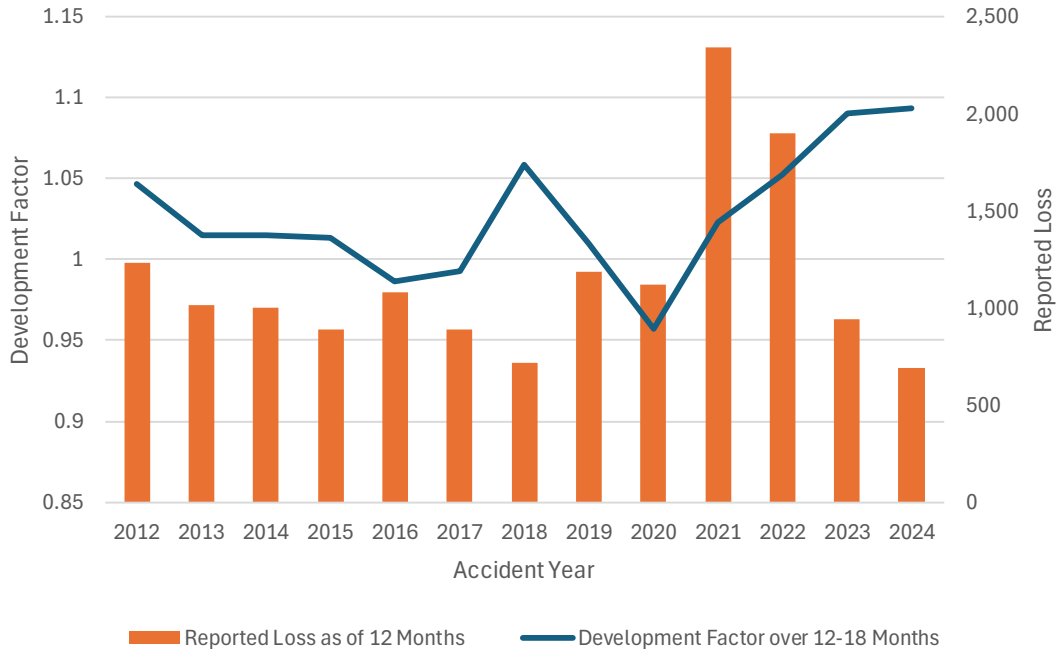


Figure 2 Comprehensive Attempted & Partial Theft 12-to-18 Month Reported Loss Comparison

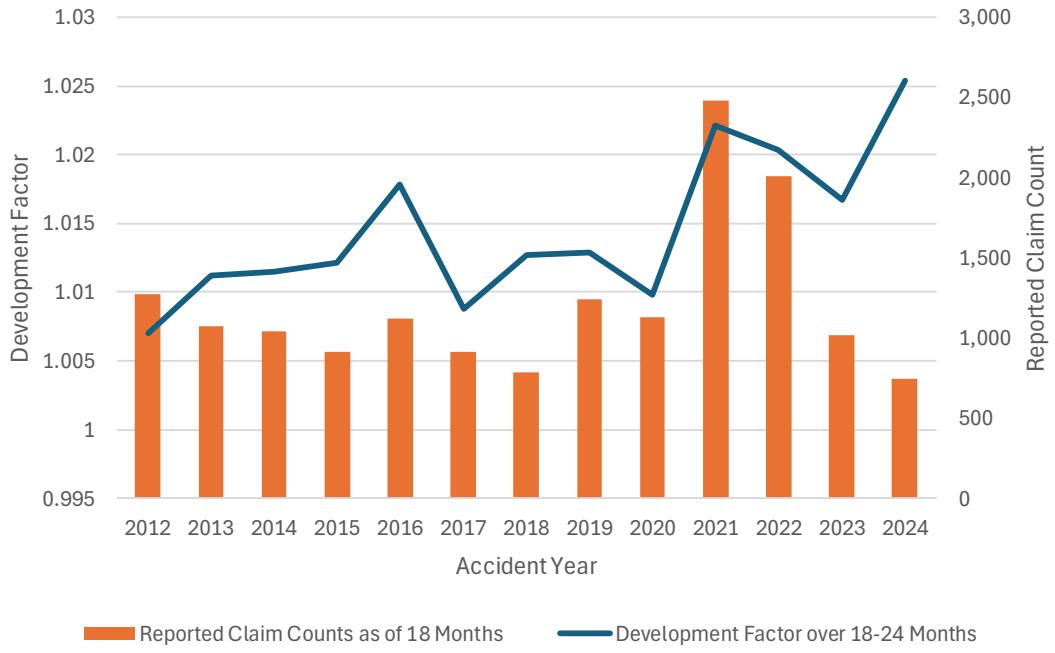
For the 12-to-18-month development period, the development factors remained elevated in 2023 and 2024 despite the substantial decline in reported claim counts and losses from the levels observed in 2021 and 2022. This indicates that the recent development pattern is not explained solely by the temporary increase in catalytic converter theft claims. Accordingly, MPI considers the three-year volume-weighted average to be a reasonable reflection of the most recent available development experience.

Figure 3 Comprehensive Attempted & Partial Theft 18-to-24 Month Reported Claim Counts Comparison



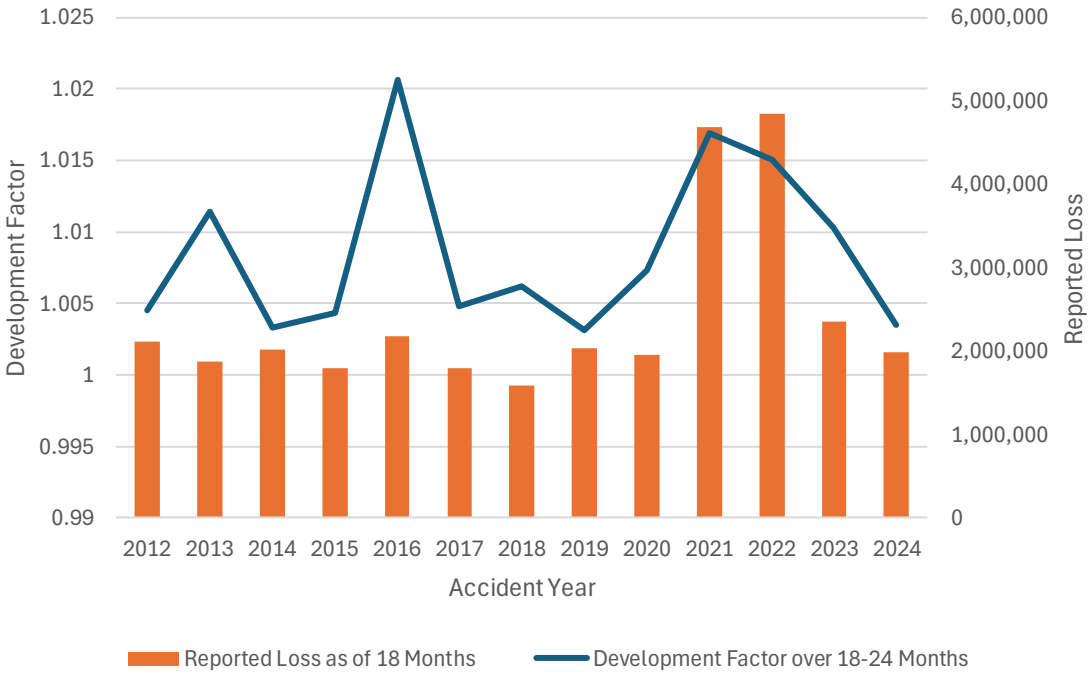


Figure 4 Comprehensive Attempted & Partial Theft 18-to-24 Month Reported Claim Counts Comparison

For the 18-to-24-month development period, the loss and claim count development is mixed. Claim count development remained elevated after the peak catalytic converter theft years, while reported loss development declined in 2023 and 2024 toward levels more consistent with portions of the earlier experience. The selected five-year volume-weighted average balances these differing observations and reduces reliance on any single development factor, while continuing to recognize the more recent experience.

Overall, the available experience does not provide sufficient evidence to conclude that Comprehensive Attempted & Partial Theft development will return to the earlier historical pattern solely because elevated catalytic converter theft activity has ended. MPI therefore considers the selected three-year and five-year volume-weighted averages reasonable based on the experience currently available. MPI will continue to monitor emerging development and will revise the selections if future experience provides evidence of a sustained change in the development pattern.

CC (MPI) 1-64

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1j, Table 1**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, CF Appendix 1, comprehensive (fire) reported claim counts (Appendix 1j, Table 1) are noticeably higher than the prior accident years.

Question:

a) Can MPI confirm that the spike corresponds to the elevated wildfire activity in 2025 or if there are other contributing factors?

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) MPI confirms the spike in reported comprehensive (fire) claim counts are directly related to the wildfire activity in 2025.

CC (MPI) 1-65

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1j, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

For comprehensive (fire) reported loss (Appendix 1j, Table 3), the loss amounts have increased significantly since 2019. The averaged reported loss in the 14-year period from accident year 2006 to 2019 at 6 months maturity was $3,172,002 and for the 6-year period since, spanning accident years 2020 to 2025 was $5,374,713.

Question:

a) Please provide a discussion on the contributing factors for the increase in losses, including any operational or claims handling practices that may have influenced these results.

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) MPI identifies both claim frequency and claim severity as contributors to higher Comprehensive Fire losses over the period in question.

The Claims Forecasting Chapter states that supply chain issues, pent-up consumer demand, and labour shortages following the COVID-19 pandemic resulted in rapid increases in auto parts prices and other vehicle repair costs beginning in 2021, placing significant cost pressure on vehicle repair severity. It also notes that key auto insurance cost components, including used vehicle

values, labour costs, and supply-chain-sensitive repair costs, are directly linked to macro-economic conditions.

In addition to these severity-related cost pressures, Comprehensive Fire losses have also been influenced by claim frequency. As noted in *CC (MPI) 1-64*, MPI confirmed that the increase in Comprehensive Fire claim counts corresponds to elevated wildfire activity experienced in 2025. The Claims Forecasting Chapter also notes that the 2025 Manitoba wildfire season was anomalous and, as a result, 2025 accident year experience was excluded from Comprehensive Fire loss trending. Increased wildfire-related claim volumes contributed to higher reported Comprehensive Fire losses.

For Comprehensive Fire specifically, MPI's trend analysis recognizes higher-than-normal inflation in accident years 2021 to 2023. The Claims Forecasting Chapter states that the severity model included a model parameter to isolate the effects of hyperinflation during those years and more reliably estimate the underlying severity trend.

In 2025, MPI's wildfire response differed from prior years primarily related to the scale, geographic spread, and operational complexity of the wildfire losses. This required a coordinated catastrophe-style response. MPI implemented temporary wildfire-specific handling processes to support customer access, ensure consistent claim review, expedite estimating and total loss decisions, coordinate salvage activities, and meet reporting requirements. These measures were implemented to manage an unprecedented volume of wildfire-related claims while maintaining timely service and consistent outcomes for impacted customers. MPI does not attribute the increase in reported losses to these administrative or claims handling practices. Rather, the increase in losses is primarily attributable to elevated wildfire-related claim volumes and broader claim cost pressures affecting physical damage claims.

CC (MPI) 1-66

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1l, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, CF Appendix 1, for comprehensive (hail) reported loss (Appendix 1l, Table 3), there is an uptick in the development factors along the most recent two diagonals for development ages 12 - 30.

Question:

a) Please provide a discussion on the contributing factors for the increase in losses including any operational or claims handling practice changes that may have influenced these results.

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) MPI notes that the period in question includes significant hail events experienced in Manitoba during 2023, including the August 2023 hail event, which was one of the largest hail catastrophes experienced by MPI and was identified in prior GRAs as the largest storm of 2023. The 2023 hail season generated substantial claim volumes that required specialized operational responses and placed significant demand on estimating and repair capacity.

   The 2023 hail events also occurred during a period of labour disruption, which affected normal estimating and claims handling activities. During this period, MPI implemented temporary hail handling processes and dedicated resources to

support customers and address elevated claim volumes. As a result of claim volume, estimating requirements, repair scheduling, parts availability, and repair capacity constraints, some hail claims required a longer period to progress from initial reporting to final settlement.

In addition, MPI experienced broader physical damage cost pressures during this period, including increases in vehicle repair costs associated with inflationary pressures affecting vehicle parts and other repair-related inputs. As claims matured and repairs were completed, these factors contributed to the continued development of reported losses.

Operational measures implemented during this period were intended to manage claim volumes and maintain customer service levels. MPI does not attribute increases in reported losses directly to those operational measures; however, claim volume, repair timing, and the broader repair cost environment may have influenced the timing and pattern of loss development.

CC (MPI) 1-67

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1m, Table 1 Appendix 1m, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, CF Appendix 1, for comprehensive (vandalism) reported claim counts (Appendix 1m, Table 1) and reported loss (Appendix 1m, Table 3), MPI selects for latest 3-year volume weighted average development factors.

Question:

a) Please explain why MPI deviates from the 5-year volume-weighted average development factor selections for the other comprehensive perils.

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) MPI selected the latest 3-year volume-weighted average development factors for Comprehensive (Vandalism) because the development experience observed in those most recent years is substantially higher than observed in the prior years of the 5-year average. The recent development factors are considered more representative of the expected emergence pattern for vandalism claims.

   Using a 5-year volume-weighted average would place weight on older development experience that is not reflective of the more recent emergence pattern and would result in lower selected development factors. Accordingly, MPI selected the latest 3-year volume-weighted average for both reported claim count

and reported loss development. Supporting development factors are provided in the figures below.

Figure 1 Vandalism Reported Claim Counts Development Factor (12-18 Months)

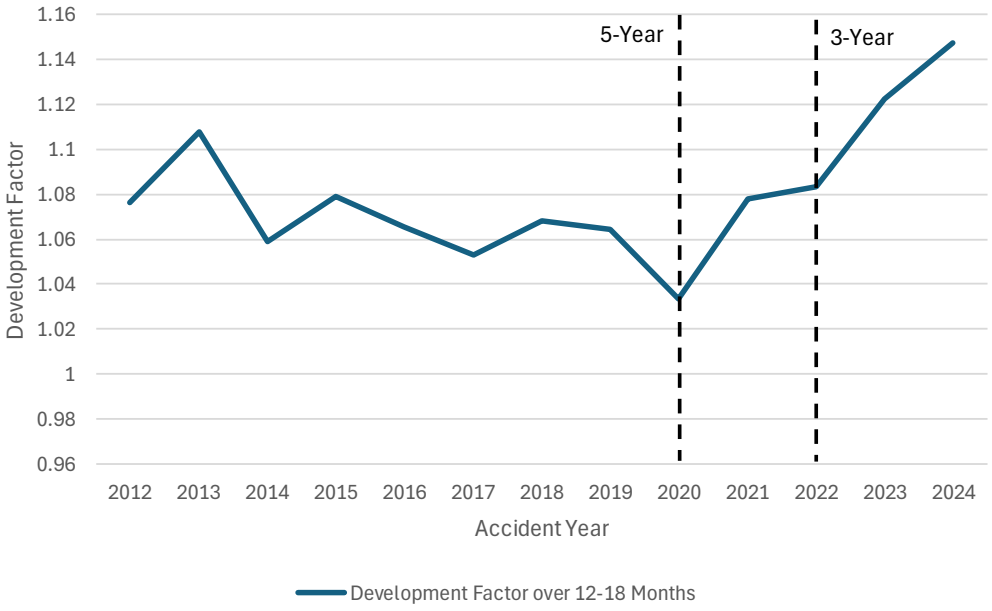

Figure 2 Vandalism Reported Loss Development Factor (12-18 Months)

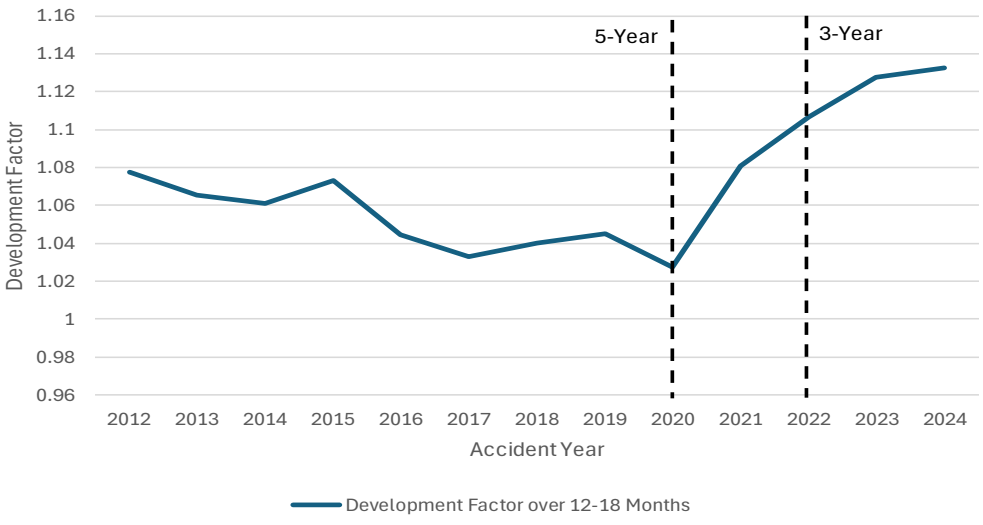

Figure 3 Vandalism Reported Claim Counts Development Factor (18-24 Months)

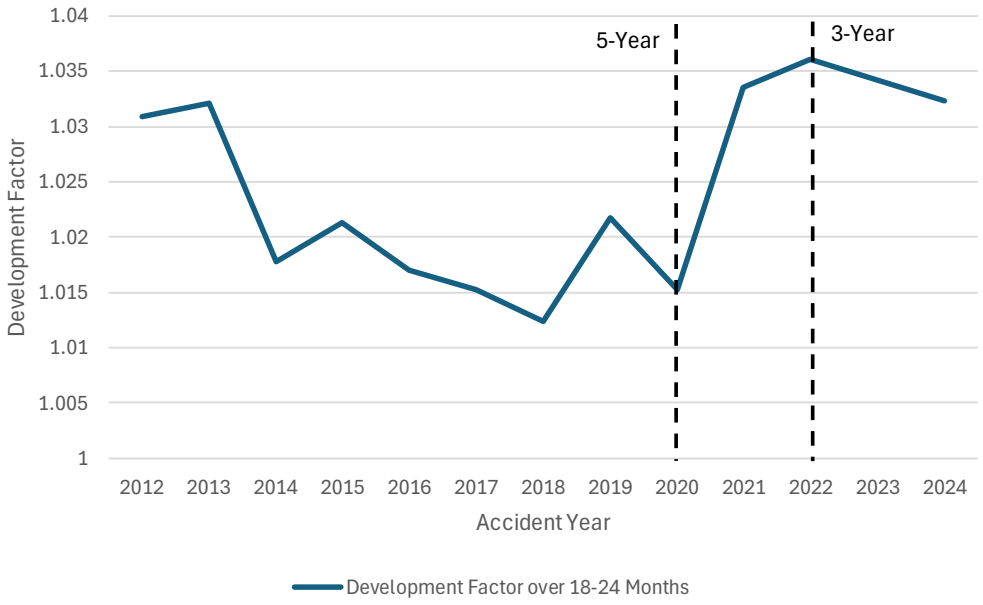

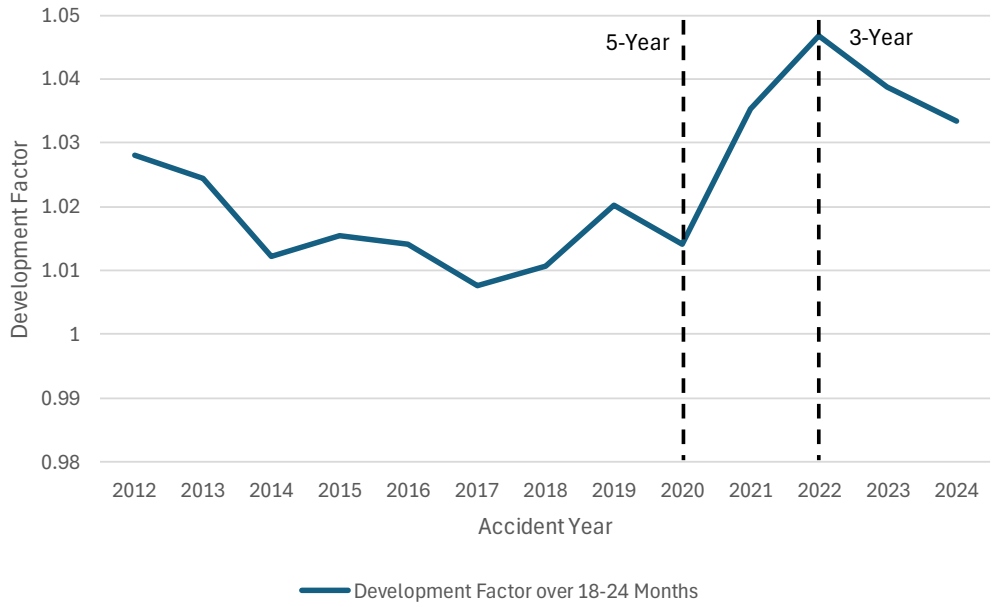

Figure 4 Vandalism Reported Loss Development Factor (18-24 Months)

CC (MPI) 1-68

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1n, Table 1 Appendix 1n, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

For comprehensive (other) reported claim counts (Appendix 1n, Table 1) and reported loss (Appendix 1n, Table 3), the most recent three or four diagonals appear elevated compared to the preceding years' development for ages 12 - 36.

Question:

a) Please provide a discussion on the contributing factors for the increase in, losses including any operational or claims-handling practices that may have influenced these results.

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) MPI notes that the period in question includes significant weather-related claim activity experienced during 2022 and 2023. Comprehensive (Other) coverage includes a variety of perils, including weather-related losses that may arise from the same events that generate hail-related claims. Elevated claim volumes associated with severe weather events contributed to increased reporting activity and higher losses during this period.

   The 2023 claim year also coincided with the labour interruption, which affected normal estimating and claims handling activities. Elevated claim volumes, combined with the operational impacts of the labour interruption, influenced

estimating timelines, claim review processes, repair scheduling, and repair completion timing. As a result, some claims required a longer period to progress from initial reporting through final settlement.

During this period, broader physical damage cost pressures also impacted claim severity, including increases in vehicle repair costs associated with inflationary pressures affecting vehicle parts and other repair-related inputs. As claims matured and repairs or settlements were completed, these factors contributed to the continued development of reported losses.

MPI implemented operational measures intended to manage elevated claim volumes and maintain customer service levels during periods of increased demand. These measures were designed to support timely claim processing and consistent claim handling practices. MPI does not attribute increases in reported claim counts or losses directly to these operational measures; however, claim volume, repair timing, settlement timing, and broader repair cost pressures may have influenced the observed pattern of loss development.

CC (MPI) 1-69

Part and Chapter:	**Part VI – Claims Forecasting CF Appendix 1**	**Page No.:**	**Appendix 1o, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, CF Appendix 1, for property damage (third party loss of use) reported loss (Appendix 1o, Table 3), the most recent four diagonals appear elevated compared to the preceding years development for ages 12 - 24.

Question:

a) Please provide a discussion on the contributing factors for the increase in losses including any operational or claims handling practices that may have influenced these results.

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) For Property Damage (Third Party Loss of Use), *Figure CF-56* shows that average rental days per invoice increased from 8.45 days in accident year 2020 to 13.55 days in accident year 2025. This represents an increase of 5.10 rental days per invoice, or approximately 60.4%. *Figure CF-56* also shows that average rental days per invoice peaked at 14.94 days in accident year 2023.

   The period also coincided with the 2023 labor interruption, which affected normal estimating and claims handling activities. These conditions contributed to longer repair timelines for some claims and, in turn, extended rental durations.

MPI has not implemented changes to claims handling practices for third party loss of use. Third Party Loss of Use rental duration is directly linked to repair timelines. Elevated rental days in 2023 reflected nation-wide repair and parts delays. MPI has observed ongoing improvements in repair cycle times, contributing to a steady reduction in rental days per claim.

CC (MPI) 1-70

Part and Chapter:	**VI – CF Appendix 1**	**Page No.:**	**Appendix 1q, Table 1 Appendix 1q, Table 3**
Topic:	**Loss Development**		
Sub Topic:			

Preamble to IR:

In Part VI – Claims Forecasting, CF Appendix 1, for property damage (other) reported claim counts (Appendix 1q, Table 1) and reported loss (Appendix 1q, Table 3), the most recent four diagonals appear elevated compared to the preceding years' development for ages 12 - 24.

Question:

a) Please provide a discussion on the contributing factors to the increase in losses including any operational or claims handling practice changes that may have influenced these results.

Rationale for Question:

To understand loss development selections.

RESPONSE:

a) MPI has not identified any significant operational or claims handling practice changes since 2022 that would explain the increase in Property Damage (Other) losses. Reported claim volumes have remained relatively stable, while the average cost of claims has increased.

   The primary factor identified as contributing to higher losses is inflationary pressures affecting both vehicle-related and non-vehicle property damage settlements, resulting in higher costs.

CC (MPI) 1-71

Part and Chapter:	**Part VII – Expenses Appendix 14: Road Safety Program Costs**	**Page No.:**	**1, 3**
Topic:	**Road Safety**		
Sub Topic:	**Road Safety Program Costs**		

Preamble to IR:

In Figure EXP App 14 at 1, it outlines Basic Road Safety Program Costs – Approved Budgets and Actuals.

In Figure EXP App 14 at 3 it outlines Total Corporate Road Safety Program Costs – Approved Budgets and Actuals.

Both Figures include 5 years of data, starting at fiscal year 2021/2022.

Question:

a) Please expand EXP App 14-1 and EXP App 14-3 to include the last 10 years of data.

Rationale for Question:

To better understand trends in MPI's funding of Road Safety programming going back 10 years.

RESPONSE:

a) Please see *Figure 1* below for Basic Road Safety Program Costs and *Figure 2* below for Corporate Road Safety Program Costs.

CC (MPI) 1-72

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**92**
Topic:	**Road Safety**		
Sub Topic:	**Urban and Rural Collisions**		

Preamble to IR:

In Part II- COM Appendix 7 at page 92, it states:

> "Rural and Urban Collisions: Rural areas tend to see the most severe collisions, while urban areas present greater risks for pedestrians and cyclists. Understanding these differences is critical to ensuring the strategy's programs reach the right communities with the right interventions."

Question:

Please provide 10 years of collision reports separated into Rural and Urban that include:

a) Injury severity compared to type of road user, and

b) Contributing factors to the collision for both major categories and sub-categories

Rationale for Question:

To better understand trends in MPI's collision data over the past 10 years at a more granular level, including the differences between urban and rural collisions.

RESPONSE:

a) The following figures present the number of victims broken down by rural and urban, based on injury severity, road user type, and collision occurrence (calendar year).

Figure 1 Number of Victims in Urban Areas Across Manitoba

Number of Victims in Urban Areas Across Manitoba

		2016	2017	2018	2019	2020	2021	2022	2023	2024	2025

Note: Rural areas include everywhere outside of the Winnipeg and Brandon municipalities.
Note: Values for 2016 - 2020 are based on data from previous Traffic Collision Statistics Reports. Data for 2021 - 2025 are based on the data supporting the Manitoba Collision

b) The following figures present the number of collisions broken down by rural and urban, collision occurrence (calendar year) and contributing factor. Up to three contributing factors may be assigned to each vehicle involved in a collision. The counts shown represent the number of collisions in which at least one vehicle was assigned the indicated contributing factor.

As a result, a single collision may be included across multiple contributing factor categories. For example, if one vehicle in a collision was assigned “turning improperly” and another was assigned “driving too fast for conditions,” that collision would be counted in both contributing factor categories.

For major categories, a collision is counted only once, regardless of the number of contributing factors assigned within that category. For example, if a collision involved both “turning improperly” and “driving too fast for conditions,” the collision would be counted once in the “Any Driver Action” category.

CC (MPI) 1-73

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**42**
Topic:	**Road Safety**		
Sub Topic:			

Preamble to IR:

On page 42 of Part II – COM Appendix 7, it states:

> "Priority:
> Enhance our understanding of Manitobans' attitudes, beliefs, and experiences related to road safety to inform program design, monitor cultural change, and track progress over time.
>
> Putting Strategy Into Action:
> Conduct research and data analysis in partnership with the Community Partners in Road Safety Committee to assess road safety attitudes and analyze collision risk factors across Manitoba."

Question:

a) Please provide survey results from the past 10 years, organized by year, about road safety attitudes and self-reported road safety behavior.

Rationale for Question:

To better understand trends in the data informing MPI's strategy and priorities surrounding road safety interventions.

RESPONSE:

MPI's current Traffic Safety Culture (TSC) Survey has been conducted annually since 2019. The TSC Survey is MPI's primary source for understanding Manitobans' road safety attitudes, beliefs, and self-reported behaviours and for monitoring changes over time. Accordingly, the results provided below include available TSC Survey results from 2019 onward.

Impaired Driving

Annual TSC Survey results related to impaired driving attitudes and self-reported behaviours are provided in the figures below. The results indicate generally stable attitudes toward impaired driving and consistently low acceptance of impaired driving behaviours over the reporting period.

Figure 1 Attitude Toward Impaired Driving Among Manitobans

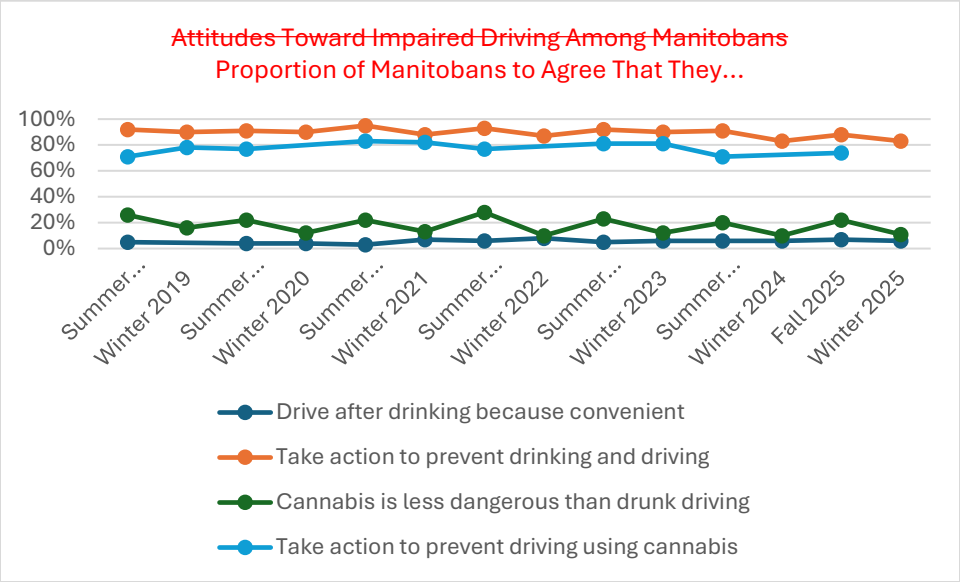

Figure 2 Perceived Acceptability of Impaired Driving Behaviours Among Manitobans

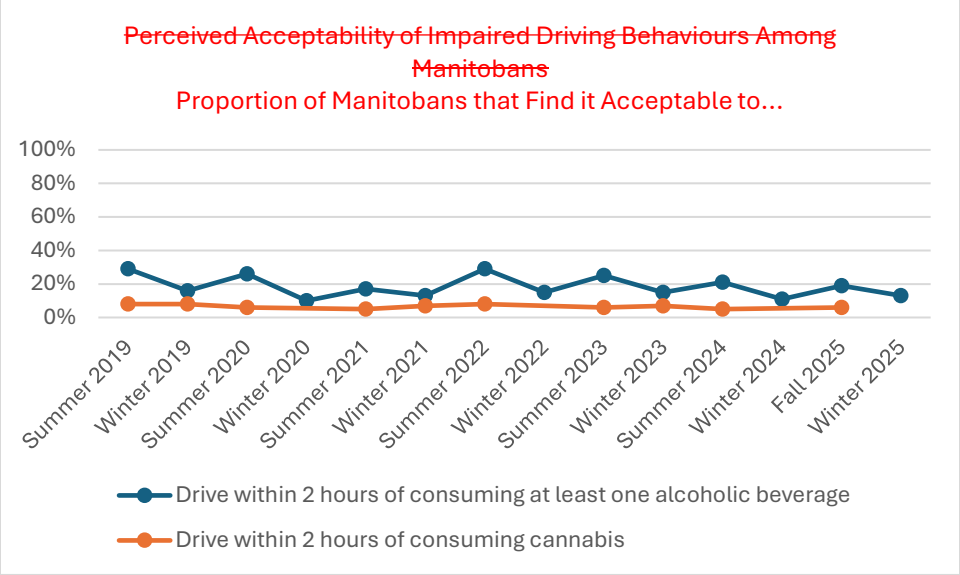

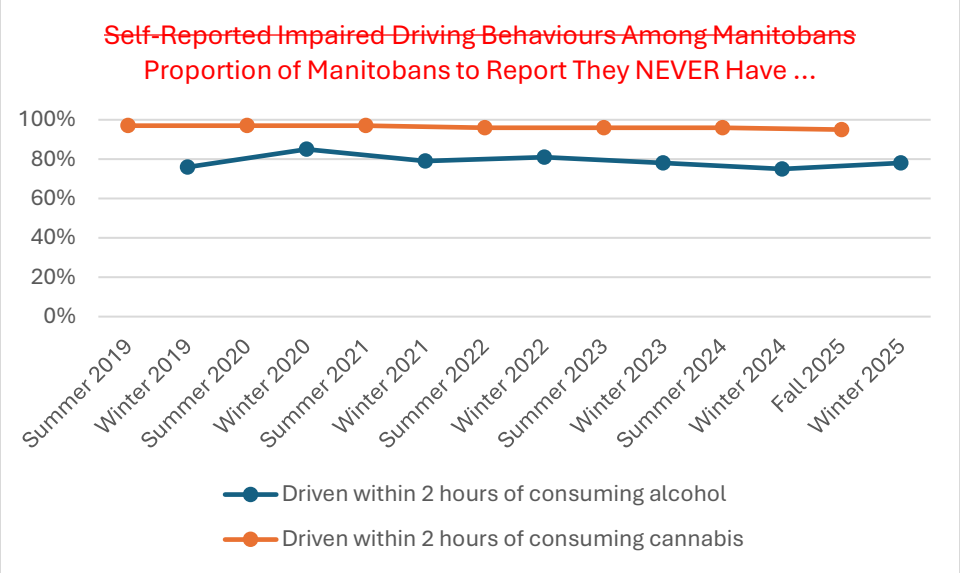

Figure 3 Self-Reported Impaired Driving Behaviours Among Manitobans

Speeding

Annual TSC Survey results related to speeding attitudes and self-reported behaviours are provided in the figures below. The results indicate generally stable attitudes toward

speeding over the reporting period, although the perceived acceptability of certain speeding behaviours increased modestly between 2023 and 2025.

Figure 4 Attitudes Toward Speeding Among Manitobans

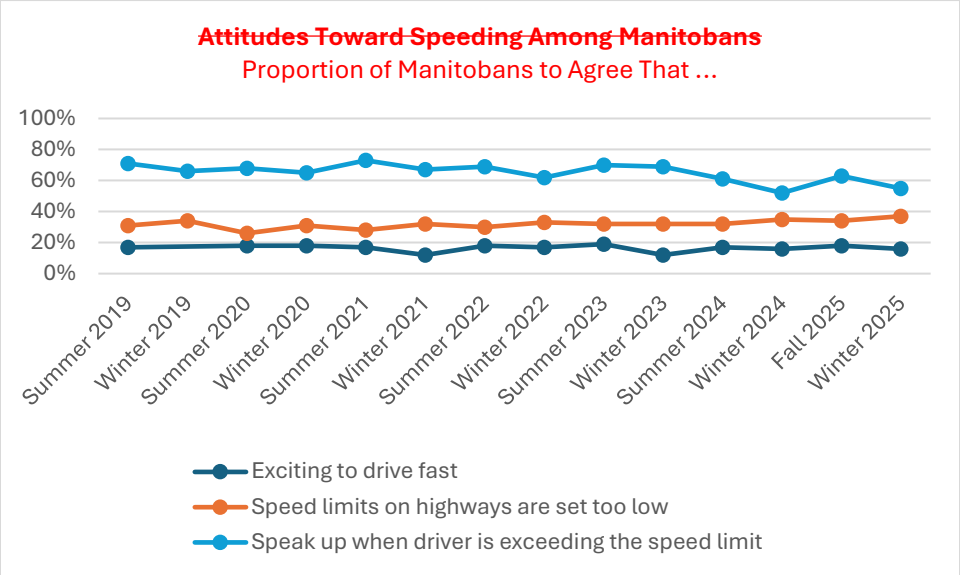

Figure 5 Perceived Acceptability of Speeding Behaviours Among Manitobans

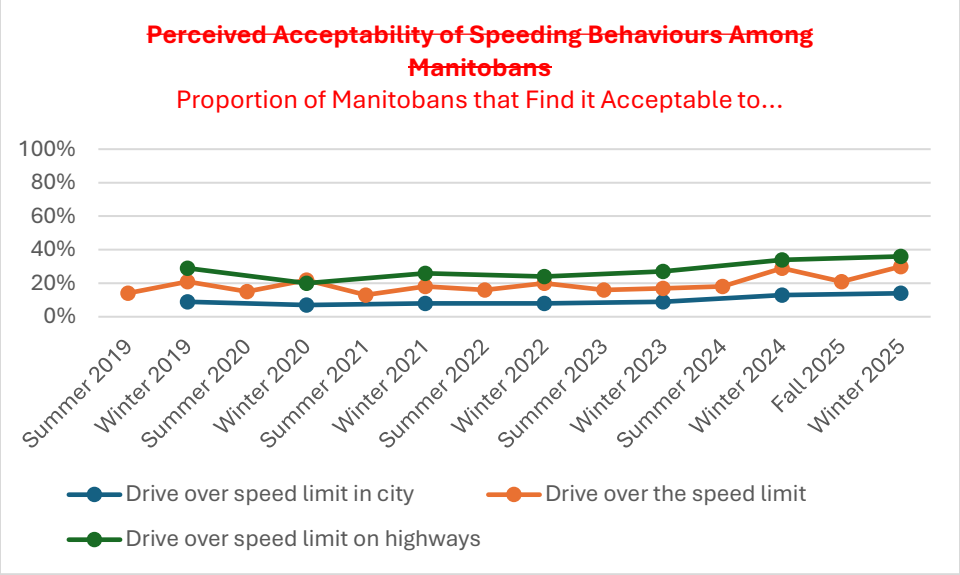

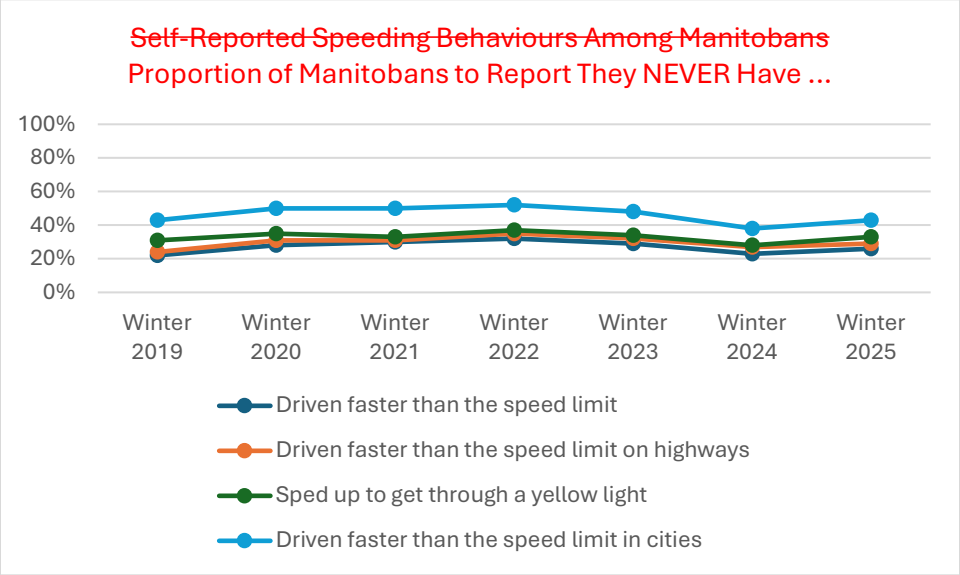

Figure 6 Self-Reported Speeding Behaviours Among Manitobans

Distracted Driving (Cell Phone Use)

Annual TSC Survey results related to distracted driving attitudes and self-reported behaviours are provided in the figures below. The results indicate consistently low acceptance of hand-held cell phone use while driving throughout the reporting period, although willingness to speak up when a driver is using a cell phone while driving declined modestly in recent survey years.

Figure 7 Attitude Toward Cell Phone Use While Driving Among Manitobans

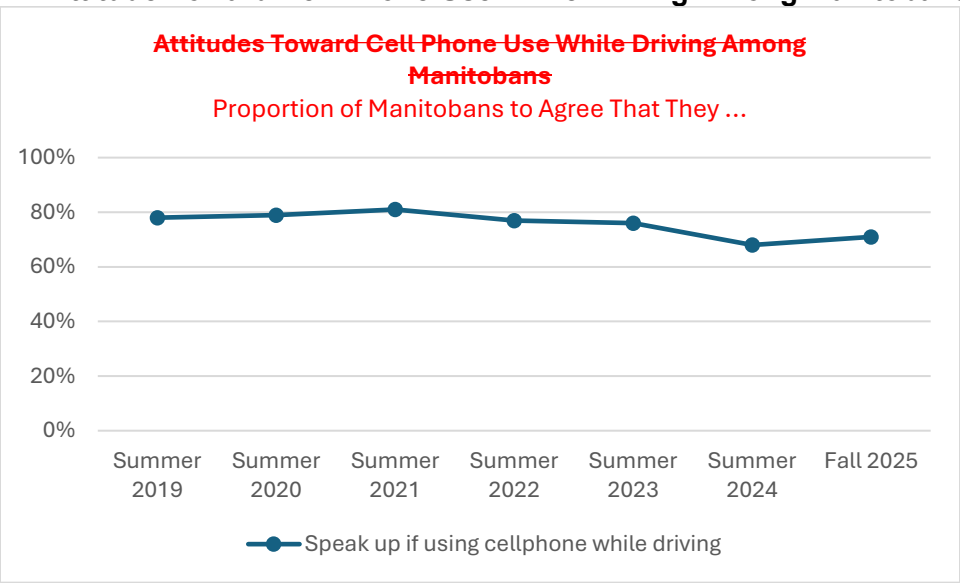

Figure 8 Attitude Toward Cell Phone Use Among Manitobans

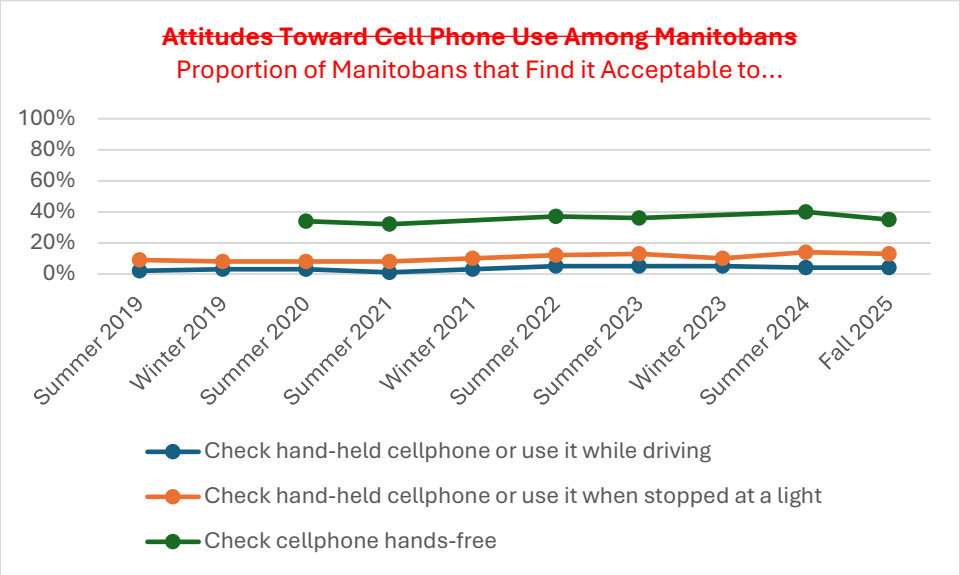

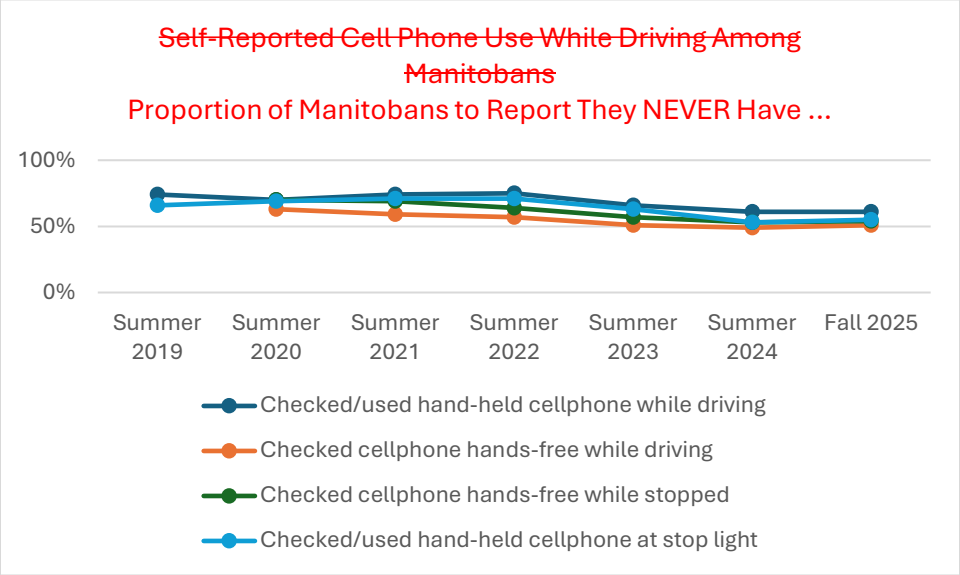

Figure 9 Self-Reported Cell Phone Use While Driving Among Manitobans

Seatbelt Use

Annual TSC Survey results related to seatbelt use attitudes and self-reported behaviours are provided in the figures below. The results indicate consistently strong support for seatbelt use and low acceptance of travelling without a seatbelt throughout

the reporting period, although willingness to speak up when a driver or passenger is not wearing a seatbelt declined modestly in recent survey years.

Figure 10 Attitude Toward Seatbelt Use Among Manitobans

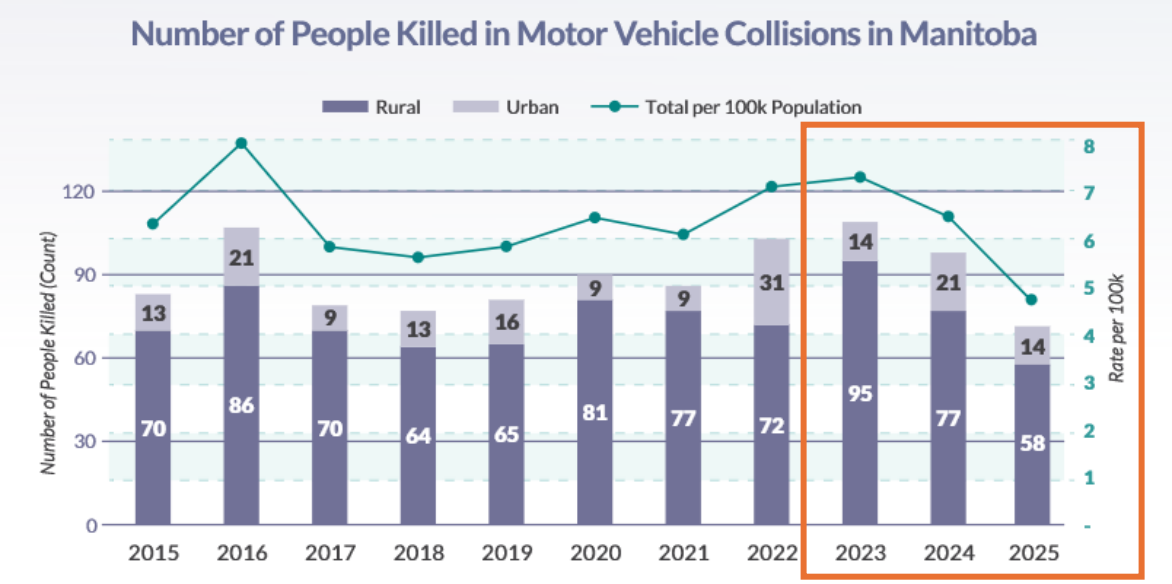
CC (MPI) 1-74



Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**1-96, 122, 133-144**
Topic:	**Road Safety**		
Sub Topic:	**Road Safety Strategy and Data**		

Preamble to IR:

MPI released its Road Safety Strategy 2030 on March 25, 2026. It is available publicly here: https://www.mpi.mb.ca/wp-content/uploads/Road-Safety-Strategy-2030.pdf

At page 3 of the Strategy, the "Number of People Killed in Motor Vehicle Collisions in Manitoba" graph is recreated below.[5]

Please note years 2023, 2024, and 2025.

[5] Orange emphasis added

At Part II – COM Appendix 7 at page 122, it details motor vehicle collision fatality rates in Manitoba.

The Manitoba Collision Dashboard, detailed at Part II – COM Appendix 7 at page 133-144, provides significant data on fatalities and collisions. It is available to the public at https://www.mpi.mb.ca/manitoba-collision-dashboard/

Question:

a) Please file the Road Safety Strategy 2030 on the record of this proceeding.

b) Please provide information on the sources of fatality data for the last 5 years, be it the Coroner's Officer, the Department of Transportation and Infrastructure, or other.

c) Please clarify whether any significant administrative changes have occurred in the last 5 years as to how fatality data are collected or processed.

d) Please clarify whether MPI is aware of any specific programs or reasons that resulted in a reduction in fatalities from 2023 to 2024 and 2024 to 2025.

e) Please produce a similar graph as the "Number of People Killed in Motor Vehicle Collisions in Manitoba" (page 3 of the Strategy) but for serious injuries.

f) Please explain the reasoning for not including serious injury trends and data in the Road Safety Strategy 2030.

g) Please provide information on how serious injury data is collected, such as whether it only comes from claims reported or other sources such as the City of Winnipeg, Department of Transportation and Infrastructure, or otherwise.

h) Please detail how other jurisdictions collect serious injury information, such as what sources they collect such data from and what is the threshold for serious injury.

Rationale for Question:

Provide the Road Safety Strategy on the record and clarify data collection methods for road safety.

For question e., we recognize this information is generally available within the Manitoba Collision Dashboard. However, given the importance of Road Safety in this proceeding and that both serious injuries and fatalities are important metrics in measuring road safety, we seek to have this comparative information on the record of this proceeding.

RESPONSE:

a) Please see ***Appendix 1*** for a copy of MPI's Road Safety Strategy 2030. The Strategy is also available on MPI's public website [https://www.mpi.mb.ca/road-safety-strategy-2030/].

b) Over the last five years, MPI has consistently relied on its maintained claims data records as the primary source for identifying motor vehicle collision fatalities. In addition to claims data, MPI also uses information from other sources to supplement, validate, and verify fatality records. Supplemental sources include:

- **RCMP Fatal Collision Incident Summaries**: MPI receives weekly updates from the RCMP regarding fatal collisions occurring within RCMP jurisdictions. These summaries include narrative summaries of fatal collisions and may provide supplemental information that may not be available when a claim is initially filed.

- **Manitoba Transportation and Infrastructure (MTI) Traffic Briefs**: MPI also receives traffic briefs from MTI that provide supplementary information regarding collision locations, roadway conditions, and other relevant collision characteristics.

- **News Media Reporting**: MPI monitors media reports of serious and fatal collisions to assist in the timely identification of potential fatalities and

emerging trends, pending receipt of official records and claims information.

- **Office of the Chief Medical Examiner**: MPI works with the Office of the Chief Medical Examiner to verify whether reported deaths were the result of motor vehicle collisions. This information is used to validate fatality records and ensure fatalities are classified appropriately.

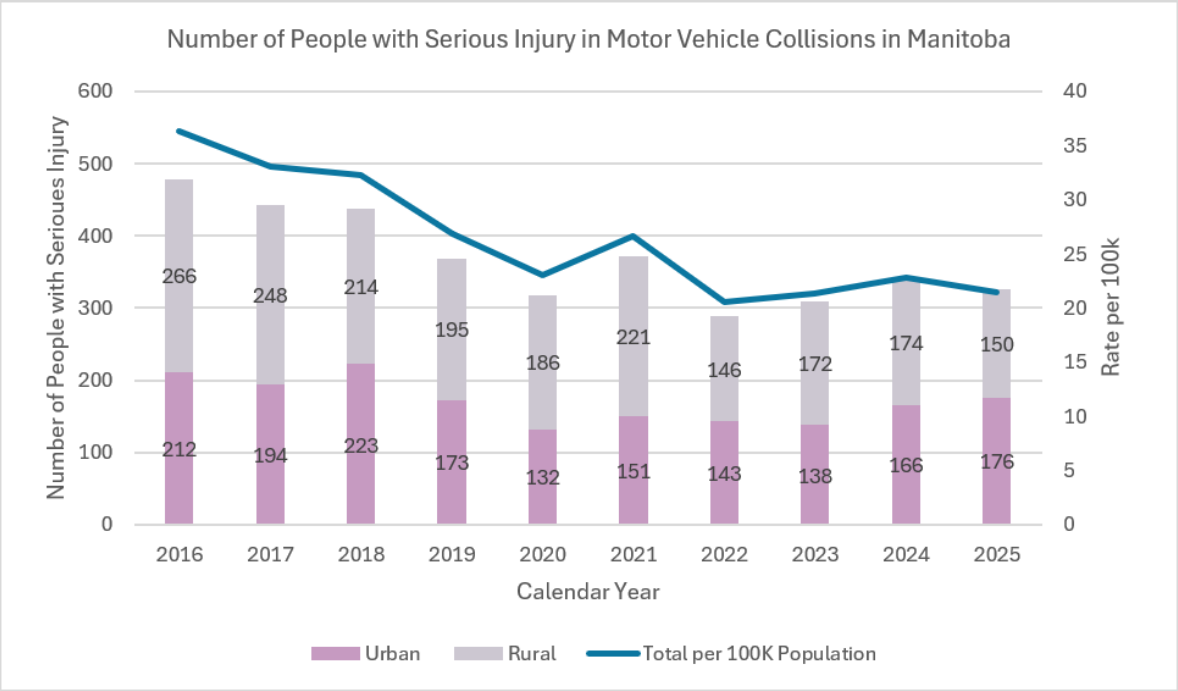
- **Collision Review Committee**: MPI participates on a committee comprised of multi-disciplinary government stakeholders who share and evaluate detailed information on severe collisions in the City of Winnipeg. This group helps establish a common understanding of the circumstances surrounding road fatalities and provides additional context to support MPI's monitoring and verification of fatality data.

c) MPI has not made any significant administrative changes within the last five years regarding how motor vehicle collision fatality data are collected or processed. The primary data sources used to collect motor vehicle collision fatalities have remained unchanged during this period.

MPI has undertaken several initiatives aimed at improving data quality, consistency, and transparency. These initiatives include enhanced data validation and quality review procedures and the implementation of the Manitoba Collision Dashboard, which provides more timely public access to road safety information. These improvements have focused on data quality assurance, verification, and reporting rather than changes to the underlying administrative processes used to collect or process fatality data. In addition, the Manitoba Collision Dashboard has increased transparency and supported a more standardized process for maintaining complete and reliable fatality collision records.

While the primary data sources remain unchanged, enhancements to data validation, cleaning, and reporting practices have improved the overall quality and accessibility of fatality information.

d) MPI is not aware of any specific program or individual initiative that can be identified as the direct cause of the reduction in fatalities between 2023 and 2024 or between 2024 and 2025.



MPI's 2025 fatality count remains preliminary. The 2025 figure was produced early in 2026 and is subject to change as additional information related to fatal collisions is received and validated. Therefore, the final 2025 fatality count may differ from the preliminary value currently reported.

The difference between 2023 and 2024 should also be considered in the context of a significant multi-fatality collision that occurred in Carberry in June 2023. That single collision resulted in 17 fatalities and had a substantial impact on the total number of fatalities recorded in 2023. As a result, the decrease in fatalities from 2023 to 2024 is influenced by the occurrence of that single event.

Beyond this, MPI is unable to attribute the reductions observed between 2023 and 2024 or between 2024 and 2025 to any specific program or intervention.

e) The figure below presents the number of people seriously injured in Manitoba between 2016 and 2025.

Figure 1 Number of people with Serious Injury in Motor Vehicle Collisions (MB)

Source: MPI Traffic Collision Statistics Report (2016-2020); Manitoba Collision Dashboard (2021-2025).

f) MPI's Road Safety Strategy 2030 establishes Manitoba's road safety vision, priorities, and areas of focus. MPI included fatality trends because they provide a clear and broadly understood measure of road safety outcomes. While serious injury trends are also important, including additional trend data was not necessary to support the strategy's purpose or key messages. Serious injury prevention remains a core objective of the Road Safety Strategy 2030.

g) MPI collects information on serious injuries resulting from motor vehicle collisions through its own collision reporting and claims administration processes, maintained within MPI's internal systems. MPI does not collect serious injury information from external sources for reporting purposes.

h) Canadian jurisdictions collect serious injury information through a variety of collision reporting systems. In Manitoba, serious injury information is primarily

derived from reported MPI claims and maintained within MPI's claims systems. Serious injury data in Ontario are obtained through police collision reports and Collision Reporting Centers. British Columbia primarily relies on police-reported collision data for road safety reporting and, in some cases, links this information with other injury data sources. Saskatchewan records serious injuries through its Traffic Accident Information System, which captures reportable collisions and injuries separately from SGI insurance claims data. In Alberta and Quebec, serious injury information is collected through provincial collision reporting systems that support road safety reporting. In some jurisdictions, collision data may also be supplemented by information from health records or insurance systems.

Canadian jurisdictions, including Manitoba, generally follow the National Collision Database (NCDB) definition maintained by Transport Canada for defining serious injuries. Under the NCDB, a serious injury is defined as an injury resulting in admission to a hospital for treatment or observation.

While this definition is broadly consistent across Canadian jurisdictions, British Columbia reports serious injuries as those that are "*serious, involving an overnight stay at the hospital.*"[2] This definition is more restrictive than the NCDB definition because it excludes certain hospital admissions that would otherwise be classified as serious injuries under the NCDB.

Safer Roads:
A Shared Journey
ROAD SAFETY STRATEGY 2030
MANITOBA
PUBLIC INSURANCE

CEO's Message

When we began developing MPI's next road safety strategy, we set out to build a plan that reflects the expectations of Manitobans and the responsibility we hold as a public insurer. Road safety is a core part of our mandate, and this strategy strengthens our commitment to improving outcomes for all road users across the province.

The direction set out in this document is shaped by the voices of Manitobans. Through one of the most extensive engagement processes MPI has undertaken, we heard from partners across the province including community leaders, Indigenous organizations, road safety advocates, law enforcement, and thousands of Manitobans. Their insights helped confirm the areas where MPI can make the greatest difference. The strategy also aligns with Canada's Road Safety Strategy 2035 and Beyond, which encourages jurisdictions to reduce serious harm on the roads through prevention, collaboration, and evidence informed action.

Our work over the next five years will focus on four pillars. These are: building a culture of road safety across the province, strengthening partnerships, shaping safer driving behaviours, and advancing road safety and reconciliation. Each pillar represents an area where MPI can influence meaningful change alongside road safety partners across the province.

This strategy is the product of careful listening and shared effort. It reflects the priorities of the people we serve and aligns with Manitobans' expectations for how MPI can contribute to safer roads. I want to extend my sincere thanks to everyone who took part in shaping this work. Your perspectives ensured this strategy is focused, practical, and aligned with Manitoba's needs.

I look forward to continuing this work together.

Satvir Jatana
PRESIDENT & CHIEF EXECUTIVE OFFICER

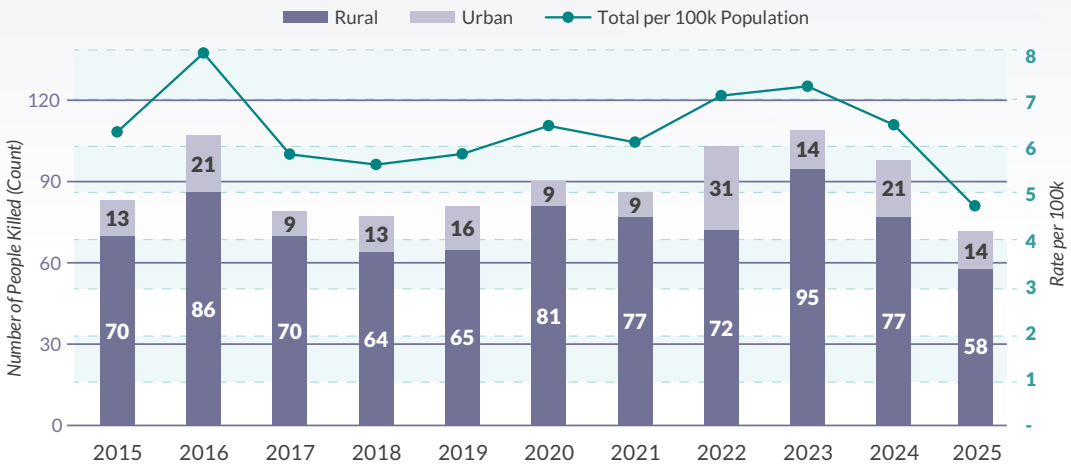
Introduction

Manitoba's roads are part of daily life. They connect our communities, keep our economy moving, and support travel to work, school, community and family events and all the moments in between.

Manitoba Public Insurance is proud to be a driving force behind safer roads in Manitoba. We must all recognize that road safety doesn't belong to one organization alone; it belongs to all of us. Every driver, cyclist, motorcyclist, and pedestrian plays a role.

MPI's Road Safety Strategy 2030 ("RSS 2030") outlines a clear and coordinated approach to reducing harm on Manitoba roads and moving toward a future with zero motor vehicle fatalities. It supports MPI's vision of being Manitoba's trusted auto insurer and driver services provider, dedicated to road safety for all. It also aligns with our mission to deliver exceptional service, affordable rates, and safer roads through efficient public auto insurance.

Manitoba's Road Safety Landscape



Motor vehicle collisions remain a leading source of preventable deaths and injuries in Manitoba. These impacts are felt across families, workplaces, and communities, highlighting the need for a coordinated and sustained approach to improving road safety.

Fatalities remain disproportionately high on rural highways, with speed, impairment, distraction, and failure to wear a seatbelt as common contributing factors. Each year, an average of 90 people lose their lives in motor vehicle collisions on Manitoba roads. Distracted and careless driving is the leading contributing factor in fatal collisions, appearing in 38 per cent of all fatalities, compared with 29 per cent for impaired driving and 25 per cent for speed. Twenty five percent of fatal collisions involve someone who was not wearing a seatbelt.

Manitoba's geography creates unique road safety challenges. Many rural and First Nation communities rely on highways with higher speed limits and long-distance travel, where serious collisions are most common. Severe weather, seasonal variability, and wildlife presence further contribute to collision patterns.

Urban centres like Winnipeg face different challenges, including higher traffic volumes and more interactions between vehicles and vulnerable road users. Stakeholders emphasized the need for coordinated education, awareness, design, and enforcement to protect people who walk, cycle, or use mobility devices.

Number of People Killed in Motor Vehicle Collisions in Manitoba

Evolving Partnerships

Manitoba's road safety landscape is increasingly shaped by expanding provincial partnerships. A wide range of stakeholders contribute to improving safety, and engagement feedback shows they view MPI as a key leader in coordinating education, awareness and training, driven by data. Stakeholders identified opportunities for MPI to improve how it shares collision data and to provide better support to communities so they can use facts to guide decision making and planning. There is strong interest in deeper collaboration, shared accountability, and clearer direction across the system.

Our Commitments

RSS 2030 positions MPI to make a meaningful impact on the safety of all road users by addressing the behaviours and conditions that lead to collisions and supporting a safer transportation system for all. It emphasizes building a stronger road safety culture, forming partnerships based on shared responsibility, improving driving behaviours using targeted and evidence-based programs, and advancing road safety and reconciliation in collaboration with Indigenous communities.

RSS 2030 provides a practical and forward-looking plan to guide our work over the next five years. Our goal is for MPI to contribute to a long-term and province-wide movement toward no fatalities on Manitoba's roads.

Commitment to Vision Zero

MPI is committed to Vision Zero and the principle that no loss of life on Manitoba's roads is acceptable. This commitment guides our approach to road safety. Our strategy reflects that commitment by recognizing that while people make mistakes on our roadways, those mistakes should not lead to fatal or life-altering outcomes.

Alignment with Canada's Road Safety Strategy 2035+

RSS 2030 aligns with the direction set by the Canadian Council of Motor Transport Administrators through Canada's Road Safety Strategy 2035+. The national vision, "Towards Zero: A Safe Road System for All Canadians," reinforces the idea that safety is a shared responsibility and that progress depends on prevention, collaboration, and evidence informed action.

RSS 2035+ provides both a national vision and a flexible framework that supports the tailored, Manitoba-specific approach reflected throughout this strategy. It reinforces the importance of coordinated action while giving MPI the scope needed to respond to the risks, challenges and opportunities identified through engagement with Manitobans.

Partnering for Safer Roads and Reconciliation

MPI is committed to ensuring RSS 2030 reflects the needs of all Manitobans. This commitment is strengthened by MPI's Indigenous Action Plan. As part of this work, MPI is committed to enhancing road safety for Indigenous communities, with particular attention to rural, remote, and northern regions where the proportion of collision-related deaths has been disproportionately higher than in the rest of the province.

MPI will continue working with Indigenous communities to guide the development of road safety initiatives that are inclusive, proactive, and responsive. This approach helps ensure that road safety programs support community priorities and contribute to safer roads for everyone in Manitoba.

Commitment to Equity, Inclusion, and Accessibility

MPI is committed to ensuring that road safety initiatives benefit all Manitobans. Equity, inclusion, and accessibility guide our efforts to reduce barriers and address the unique needs of Manitoba's diverse communities.

Through RSS 2030, MPI will design and deliver programs that are inclusive, culturally respectful, and accessible. We will continue working with partners to identify gaps, remove barriers, and ensure every person has an opportunity to travel safely on Manitoba's roads, regardless of their ethnic background, identity, abilities, socioeconomic status, or where they live.

Stakeholder Engagement

The development of RSS 2030 was informed by one of MPI's most comprehensive road safety engagement efforts. MPI designed this process to ensure that the voices of Manitobans were represented at every stage and that the strategy reflects a wide cross-section of experiences, perspectives, and expectations. Engagement spanned six months and involved meaningful input from provincial partners, local communities, industry, subject matter experts, and Manitobans from all regions of the province.

A Provincial Conversation on Road Safety

The scale of participation was extensive. MPI engaged 275 external organizations and heard from nearly 3,000 members of the public through surveys, outreach, and targeted conversations. Participants included Indigenous organizations, law enforcement, governments, industry, driver educators, community groups, and road safety organizations. They also included Manitobans who participated through MPI's open survey. This process represented a broad provincial conversation about what road safety means today and how it should evolve in the years ahead.

A Deliberate and Structured Engagement Process

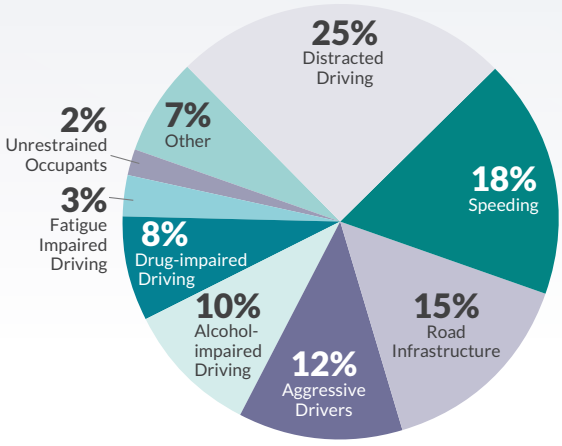
MPI's approach was grounded in international best practices. This ensured a structured and inclusive process that reached stakeholders with different roles, levels of influence, and experiences. Engagement activities followed a clear sequence: identifying key groups, confirming stakeholder profiles, selecting engagement methods, and then conducting outreach using multiple channels. This included surveys, in-depth one-on-one meetings, facilitated discussions, employee workshops, pre-engagement consultations, and outreach to Indigenous communities.

What We Heard

Across engagement activities, stakeholders described a road safety environment that is changing quickly and requiring a coordinated response. Participants consistently stressed the need to address high-risk behaviours that remain leading contributors to fatalities in Manitoba. Speeding, distraction, impairment, and failure to wear a seatbelt were raised in every engagement format. Stakeholders expressed that these behaviours have become normalized in many parts of the province and that education, training, and awareness need to evolve in order to address them effectively.

Engagement also showed that Manitobans want education that reflects the diversity of road users and travel environments. Stakeholders emphasized the importance of modernizing driver training, expanding programming for cyclists and pedestrians, improving access to training in rural and northern regions, and offering more resources for newcomers. Public survey results aligned with this feedback. Manitobans identified driver education, road design, and enforcement as the top factors influencing safety.

Throughout all engagement activities, stakeholders expressed a strong desire for better coordination and more consistent communication among the organizations involved in road safety. Many noted that no single organization can improve safety on its own. There was widespread encouragement for clearer data, more shared insights, and greater alignment across public awareness messages, enforcement activities, and educational programming. Participants consistently viewed MPI as an important partner in advancing this coordination.



How Engagement Shapes This Strategy

Stakeholder input is at the core of this strategy. MPI approached the engagement process with the view that the people and organizations who work in, interact with, and are affected by the road system every day are essential partners in shaping a credible and effective strategy. The conversations, surveys, workshops, and meetings generated a large volume of insights that MPI treated as foundational evidence when developing the strategy.

MPI completed a detailed review of all feedback and considered it alongside collision trends and emerging research. This helped us identify common themes supported by stakeholder perspectives, data, and the national framework that will help inform the path forward.

Safer Roads: A Shared Journey | ROAD SAFETY STRATEGY 2030
8

The Path Forward

The themes identified through stakeholder engagement inform strategic pillars that provide a strong foundation for MPI's direction in road safety, grounded in what Manitobans told us matters most. They outline where MPI can best support safer outcomes for Manitobans and describe the areas where focused efforts will have the greatest impact. Each pillar is supported by a set of priorities that outline the main areas of focus within that theme. Together, our strategic pillars and priorities provide a clear framework for our efforts in the years ahead.

Strategic Pillars

PILLAR 1: BUILDING A CULTURE OF ROAD SAFETY

Objective

Foster a province-wide culture where road safety is understood and valued by all Manitobans including drivers, passengers, pedestrians, cyclists, and motorcyclists alike.

Why This Matters

Sustainable improvements in road safety require a shift in attitudes. Stakeholders noted a trend of risky behaviours becoming normalized across the province and that changing this mindset is essential to progress. They also highlighted entrenched attitudes such as overconfidence, impatience, and a belief that collisions are inevitable. Driver attitudes and social norms are underlying factors that sustain high-risk behaviours such as speeding, distraction, and impaired driving, even when people are aware of the rules and the potential consequences. Creating a culture of safety means addressing these norms and making road safety a shared value of Manitobans.

A strong safety culture also aligns with national direction. Canada's Road Safety Strategy 2035+ highlights the need to foster a culture of road safety.

Over time, a stronger culture of road safety can support the effectiveness of other efforts contained in this strategy. When safe driving is widely understood as a shared community value, road safety initiatives by all organizations are more likely to be accepted and reinforced in day-to-day behaviour. This foundation is necessary if Manitoba is to move toward the long-term vision of no fatalities on our roads.

Priorities

1. Enhance our understanding of Manitobans' attitudes, beliefs, and experiences related to road safety to inform program design, monitor cultural change, and track progress over time.
2. Expand road safety education for younger Manitobans to help build safe road-use habits before they begin driving, and for adult learners who face barriers to accessing driver training.
3. Design and deliver public awareness and education campaigns that counter the normalization of high-risk behaviours and that help Manitobans understand how to share the road safely with other road users.
4. Increase public understanding of road safety by positioning MPI as a trusted, visible, and authoritative source of guidance that helps all Manitobans value and practice safe road behaviours.

PILLAR 2: STRENGTHENING PARTNERSHIPS THROUGH SHARED RESPONSIBILITY

Objective

Work collaboratively with road safety stakeholders to influence aspects of road safety that are not directly within MPI's mandate and strengthen efforts in areas of shared responsibility, ensuring a coordinated and effective approach to improving road safety.

Why This Matters

MPI works alongside many organizations that influence road safety in Manitoba, including Indigenous organizations, municipal and provincial partners, law enforcement agencies, non-profits, as well as community and industry advocacy groups. Stakeholders emphasized that meaningful progress depends on these groups working together.

Stakeholders identified opportunities for more coordinated messaging, joint initiatives, and improved sharing of collision data so that campaigns, enforcement efforts, and programs reinforce each other. Many also noted that MPI is increasingly viewed as a central leader in road safety, with a key role in supporting collaboration, long-term planning, and shared use of data.

The national road safety strategy reinforces this focus on shared responsibility. Canada's Road Safety Strategy calls for collective action that brings together governments, law enforcement, industry, non-governmental organizations, and road users under a common vision. Aligning with this approach means recognizing that progress depends on partners working together.

There are areas where many partners are already active in road safety, often working toward similar goals and facing similar challenges. Improving coordination supports more effective approaches across the province. At the same time, there are aspects of road safety that lie outside MPI's mandate where MPI can contribute its expertise, data, and resources to strengthen the work others are leading. By aligning efforts more closely across partners, organizations can achieve a greater collective impact on safety than any one organization could achieve alone.

Priorities

1. Improve coordination and consistency of road safety messaging among stakeholders through the existing Community Partners in Road Safety Committee.
2. Improve the quality, consistency, and usefulness of shared road safety data to better support infrastructure planning, policy development, and targeted safety initiatives.
3. Identify and support strategic sponsorships and community-based initiatives that align MPI and stakeholder priorities and amplify shared road safety objectives, particularly for underserved communities and populations with disproportionately high rates of fatalities and serious injuries.

PILLAR 3: SHAPING SAFER DRIVING BEHAVIOURS

Objective

Reduce high-risk behaviours such as speed, careless and distracted driving, impaired driving, and failure to wear a seatbelt through targeted education, data-led interventions, and community-based programs.

Why This Matters

Distracted driving, speeding, impaired driving, and failure to wear a seatbelt remain leading contributors to fatal collisions in Manitoba. Stakeholders also stressed the need for approaches that are more targeted, practical, and informed by data to help drivers make safer choices. They emphasized that MPI has an important role in shaping these habits through education, road safety programs, and interventions that respond to the specific risks faced by different groups of Manitobans.

Stakeholders highlighted that high-risk behaviours are often seen as routine, even when drivers understand the risks, and that more effort is required to change outcomes. They called for interventions that are more closely tailored to high-risk groups such as young and novice drivers, and that connect clearly to the real-life consequences of unsafe driving. Stakeholders emphasized the importance of modernizing driver education curricula, wider access to quality training in rural and northern communities, and better use of data to target programs where they are most needed.

Priorities

1. Continuously improve the relevance, effectiveness, and reach of driver education and training, ensuring that training and resources reflect current risks, best practices, and the needs of today's road users.
2. Enhance evidence-based interventions that support safer driving habits and improve public understanding of how unsafe driving behaviours lead to collisions and personal consequences.
3. Advance evidence-based technologies, analyses, and policies that improve Manitoba's road safety system and support high-risk and underserved populations.
4. Strengthen enforcement effectiveness by providing law enforcement partners with better data, insights, and operational collaboration, helping maintain enforcement as a key factor in promoting safe driving behaviours.

PILLAR 4: ADVANCING ROAD SAFETY AND RECONCILIATION

Objective

Advance reconciliation by embedding road safety into MPI's Indigenous Action Plan, building relationships with Indigenous communities, informing the development of road safety initiatives that address unique community challenges and improve outcomes.

Why This Matters

Indigenous communities experience unique road safety challenges that are shaped by systemic inequities. These realities contribute to disproportionate risk for Indigenous road users and require solutions that are informed by Indigenous voices. Addressing these gaps means building trust, honouring reconciliation commitments, and making sure everyone in Manitoba has an equal and fair experience on the road. MPI is committed to reconciliation, and its Indigenous Action Plan provides the foundation for this work.

Situating road safety work within MPI's Indigenous Action Plan creates an opportunity to align this strategy with broader reconciliation efforts across the organization. It helps ensure that the perspectives of Indigenous communities inform how MPI understands road safety, designs programs, and supports partners, and that road safety initiatives contribute to fair and inclusive outcomes. Stakeholders across sectors expressed support for this direction and reinforced that integrating reconciliation into road safety is a critical part of building a safer Manitoba for all.

Priorities

1. Embed road safety into MPI's Indigenous Action Plan by building strong relationships with Indigenous communities and organizations and by ensuring their perspectives guide how MPI supports and serves Indigenous road users.
2. Expand MPI's engagement with Indigenous communities (First Nations, Métis, and Inuit) by broadening the reach of road safety programs and ensuring these programs reflect community-identified needs, priorities, and contexts.

Looking Ahead

RSS 2030 sets a clear and coordinated direction for reducing fatalities on Manitoba's roads. It reflects the voices of Manitobans, the realities shown in collision data, and the national direction established through Canada's Road Safety Strategy 2035+. It positions MPI to lead, influence, and collaborate with partners across Manitoba through a shared commitment to building a safer road system.

The strategic pillars set out how MPI will turn this direction into action. Building a culture of road safety reflects the strong message from stakeholders that lasting progress depends on shifting attitudes and norms. Strengthening partnerships underscores that better outcomes require alignment among the many organizations that influence road safety. Shaping safer driving behaviours directs MPI's programs toward the high-risk behaviours most often linked to serious collisions. Advancing road safety and reconciliation ensures that MPI's road safety activities are aligned with our Indigenous Action Plan and reflect the experiences and priorities of Indigenous communities.

Sustained progress in reducing fatalities depends on coordinated effort. MPI will work alongside partners to carry this strategy forward and ensure that decisions and actions remain focused on what will most improve safety for Manitobans.

CC (MPI) 1-75

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**44, 89**
Topic:	**Road Safety**		
Sub Topic:	**Vision Zero**		

Preamble to IR:

In Part II – COM Appendix 7 at page 44, it explains MPI's public awareness campaigns are to "counter the normalization of high-risk behaviours and educate Manitobans on how to share the road safely with other road users."

In Part II – COM Appendix 7 at page 89, it states:

> "MPI is committed to Vision Zero and the principle that no loss of life on Manitoba's roads is acceptable."

Question:

a) Please explain whether MPI intends to promote the Vision Zero principle in any of its public education or advertising material and programming.

b) Please clarify how MPI measures and monitors the outcomes of advertising campaigns specifically?

Rationale for Question:

To better understand how MPI is aligning their Road Safety strategic approach with public programming.

RESPONSE:

a) MPI's public education and advertising activities are designed to support the reduction of road-related fatalities and serious injuries by encouraging safer

behaviours among all road users. This approach is reflected across MPI's road safety campaigns, educational materials, stakeholder partnerships, and community outreach efforts, which focus on addressing identified risk factors and promoting shared responsibility for road safety.

Messaging and programming are developed based on collision data, research, and emerging road safety issues, with an emphasis on preventing the most severe outcomes on Manitoba roadways. The 'Vision Zero' principle informs MPI's road safety initiatives, while messaging remains tailored to specific behaviours, audiences, and risk factors identified through data and analysis. The goal remains the same – eliminating loss of life on Manitoba's roadways.

b) MPI measures and monitors the effectiveness of its larger, multi-channel advertising campaigns through independent third-party evaluative research. These evaluations focus on the "three Rs": reach, recall and resonance.

The research is designed to assess whether campaigns are reaching the intended audiences, whether key messages are understood, and whether they are influential enough to encourage the desired behaviour changes. The evaluations also provide insight into the media channels where Manitobans most frequently see MPI advertising.

To monitor performance over time, individual campaign results are measured against an average, enabling MPI to track trends and benchmark campaign effectiveness consistently.

MPI also assesses performance of its advertising on individual channels on an ongoing basis using various techniques, including A/B testing[1] and measurement of digital awareness and engagement metrics including click through rates and impressions.

[1] A/B testing is a method of comparing two versions of paid digital adds specifically using a control version (A) and a modified variant (B) to see which one performs better.

CC (MPI) 1-76

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**38-47**
Topic:	**Road Safety**		
Sub Topic:	**Traffic Safety Culture**		

Preamble to IR:

In Part II – COM Appendix 7 at page 38, it states:

> "• Manitobans identify distracted driving, impaired driving (alcohol & drugs) and speeding as top road safety concerns.
> • Seatbelt non-use remains a critical contributing factor in fatal collisions.
> • Sustained change requires early intervention, education, and raising awareness of shared responsibility."

In Part II – COM Appendix 7 at pages 38-47, it outlines how MPI plans to "Foster a province-wide culture where road safety is understood and valued by all Manitobans." This includes:

- Conducting research and data (42),
- Expanding road safety education to younger Manitobans (43),
- Designing and delivering public education campaigns (44), and
- Increasing the public understanding of road safety through positioning MPI as a trusted source of guidance (45).

In *Traffic Safety Culture Primer* the authors identify at page 15 that "Growing traffic safety culture is a process- not a single intervention or countermeasures. […] growing traffic safety culture involves multiple interventions, strategies, and countermeasures. However, we also need a process to guide and align these efforts to grow shared beliefs supportive of a positive traffic safety culture."[6]

[6] Nicholas Ward, Jay Otto & Kari Finley, *Traffic Safety Culture Primer* (Bozeman: Montana State University Center for

At pages 16 and 17 of the *Traffic Safety Culture Primer*, a seven-step guide or implementation plan is put forward identifying how to grow traffic safety culture.

Question:

a) Is MPI familiar with this document?

b) Does MPI have a plan to include more than just single interventions or countermeasures to grow traffic safety culture?

c) Does MPI plan to create Action/Implementation plans for specific driving behaviours?

   i. If not, please provide reasoning.

   ii. If yes, please provide an Action/Implementation Plan outlining how traffic safety culture will be developed, introduced and implemented for at least one driving behaviour.

Rationale for Question:

To understand how MPI is actioning its traffic safety culture strategic pillar.

RESPONSE:

a) No. MPI is not familiar with the Traffic Safety Culture Primer document produced by Montana State University.

b) MPI's Road Safety Strategy 2030 is based on the premise that sustainable improvements in road safety require multiple coordinated interventions rather than individual countermeasures operating in isolation. Through extensive stakeholder engagement, MPI heard that risky driving behaviours have become increasingly normalized and that lasting improvements require a broader cultural shift supported by education, awareness, partnerships, enforcement, research, and community-based initiatives.

Health and Safety Culture, 2019), online:
<mdt.mt.gov/other/webdata/external/research/508Archive/TSC_PRIMER/PRIMER-ARCHIVE-04-03-2026.pdf>

This approach is reflected in Pillar 1, Building a Culture of Road Safety, which includes multiple priorities intended to work together to influence attitudes, beliefs, and behaviours over time, including:

- Enhancing MPI's understanding of Manitobans' attitudes, beliefs, and experiences related to road safety.
- Expanding road safety education for youth and adult learners.
- Delivering public awareness and education campaigns that address the normalization of high-risk behaviours.
- Strengthening MPI's role as a visible and trusted source of road safety information.

MPI also presented several examples of this approach during the 2026 Road Safety Technical Conference, including:

- The *Let's Buckle Up* pilot program, which combined observation, education and awareness activities, and enforcement to improve seatbelt use among high school students.
- Child passenger safety workshops delivered through partnerships with Safety Services Manitoba and the Child Passenger Safety Association of Canada.
- Ongoing road safety advertising, community outreach, enhanced enforcement initiatives, driver education improvements, and stakeholder engagement activities that collectively support safer road user behaviour.

MPI's Road Safety Strategy 2030 is not organized by individual driving behaviours. Rather, it is organized around four strategic pillars:

1. Building a Culture of Road Safety;
2. Strengthening Partnerships Through Shared Responsibility;
3. Shaping Safer Driving Behaviours; and
4. Advancing Road Safety and Reconciliation.

This structure reflects stakeholder feedback and MPI's view that many road safety initiatives influence multiple behaviours simultaneously. For example, driver

education, public awareness campaigns, community programming, stakeholder partnerships, and enforcement activities can each address distracted driving, speeding, impaired driving, seatbelt use, and other behaviours at the same time.

Examples of how the Strategy's pillars are being implemented were presented during the 2026 Road Safety Technical Conference and include:

- Conducting research and measuring road safety attitudes to better understand and monitor safety culture in Manitoba.
- Expanding youth road safety education and evaluating adult driver training programs.
- Modernizing driver education curriculum and resources to reflect current risks and best practices.
- Delivering targeted public awareness campaigns addressing impaired driving, distraction, speeding, careless driving, and seatbelt use.
- Supporting law enforcement through data sharing, enhanced enforcement initiatives, and coordinated education campaigns.

c) MPI does not currently plan to create separate action or implementation plans for individual driving behaviours because the Road Safety Strategy 2030 is designed to address road safety through an integrated, system-wide approach rather than through behaviour-specific plans.

Many of the interventions contained within the strategy are intended to influence multiple risk behaviours simultaneously. Organizing the strategy around strategic pillars provides flexibility to implement evidence-based initiatives, respond to emerging issues, collaborate with road safety partners, and address common underlying factors that contribute to collisions and fatalities.

Accordingly, MPI considers the Road Safety Strategy 2030, together with the actions and priorities developed under each pillar, to be its implementation framework for improving road safety outcomes in Manitoba.

CC (MPI) 1-77

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**22-31, 83, 91**
Topic:	**Road Safety**		
Sub Topic:	**Indigenous Partnerships**		

Preamble to IR:

In Part II – COM Appendix 7 at pages 22-31, it details MPI's engagement with stakeholders and the public while producing its Road Safety Strategy 2030.

In Part II – COM Appendix 7 at page 83, it states:

> "Review and update road safety content and materials in partnership with Indigenous communities."

At Part II – COM Appendix 7 at page 91, it states

> "Through RSS 2030, MPI will design and deliver programs that are inclusive, culturally respectful, and accessible. We will continue working with partners to identify gaps, remove barriers, and ensure every person has an opportunity to travel safely on Manitoba's roads, regardless of their ethnic background, identity, abilities, socioeconomic status, or where they live."
>
> "Culturally responsive programming: Materials and delivery adapted to reflect the needs and contexts of each community"

Questions:

a) Please explain if MPI will continue seeking stakeholder feedback throughout the lifecycle of the strategy and if so, how it plans to implement such feedback outside of the Community Partners in Road Safety Committee.

b) Please clarify how stakeholder feedback will be implemented to ensure programming is equitable and culturally responsive outside of the Community Partners in Road Safety Committee.

c) Please explain how partnerships with Indigenous communities will translate into changes to the Road Safety program throughout the fiscal year.

d) Please provide specific examples of how MPI demonstrates equity through their road safety approach in this GRA. Please include:

   i. the type of driving behaviour targeted,

   ii. stakeholders that will be involved, and

   iii. how the program is culturally responsive.

Rationale for Question:

To understand how MPI seeks and implement equitable stakeholder engagement.

RESPONSE:

a) Yes. MPI views stakeholder engagement as an ongoing component of Road Safety Strategy 2030 implementation. In addition to the Community Partners in Road Safety Committee, MPI regularly engages with a broad range of stakeholders, including government, law enforcement, Indigenous communities and organizations, educators, public health organizations, community groups, industry partners, and national road safety organizations.

   Stakeholder input is gathered through committees, partnerships, consultations, program delivery, research activities, and outreach initiatives. These insights help inform the development, refinement, and implementation of road safety programs, public education campaigns, enforcement initiatives, and other actions under Road Safety Strategy 2030.

b) Stakeholder feedback obtained outside of the Community Partners in Road Safety Committee is incorporated into the development, refinement, and delivery of road safety programs, services, communications, and outreach activities. Perspectives shared by Indigenous communities and organizations help MPI identify barriers, understand community-specific needs, and assess opportunities to improve program accessibility and relevance.

   To support equitable and culturally responsive programming, stakeholder input is considered when developing road safety messaging, educational resources, service delivery approaches, and partnership initiatives. Feedback is used alongside research, operational considerations, and organizational priorities to help ensure programs are responsive to the needs of Manitoba's diverse communities and populations.

c) Partnerships with Indigenous communities support the implementation of both Road Safety Strategy 2030 and MPI's Indigenous Action Plan. Through ongoing engagement with Indigenous governments, communities, organizations, and service providers, MPI seeks feedback to better understand community-specific road safety priorities, barriers to accessing programs and services, and opportunities to improve road safety outcomes.

   Feedback gathered through these partnerships helps inform the planning, refinement, and delivery of road safety programs. Based on identified needs, actions may include adapting educational materials and safety messaging, enhancing community outreach, improving access to driver education and licensing services, strengthening partnerships with community organizations, and incorporating Indigenous perspectives into program design and delivery.

   As part of the Year One Action Plan, MPI may develop culturally relevant outreach and educational materials that promote road safety. This could include resources focused on speed management, improved stop-sign visibility, seatbelt use, distracted driving prevention, and community-specific speed awareness initiatives.

Consistent with MPI's Indigenous Action Plan, these engagement activities support the development of programs and services that are equitable, accessible, culturally responsive, and reflective of community needs.

d) The following table provides examples of how MPI demonstrates equity and incorporates cultural considerations in its road safety initiatives.

	Examples of Cultural Considerations
Topic: Novice Drivers **Initiative(s)**: – University College of the North (UCN) Class 5 Adult Driver Training – Assiniboine College Class 5 Adult Driver Training – North End Community Renewal Corp. (Citizens' Bridge) Ready to Drive **Involved Stakeholders:** Underserved equity-deserving groups including Indigenous communities, new Canadians, low-income individuals, and persons with disabilities.	– All three programs prioritized employing female driving instructors to accommodate students who may not be comfortable with a male instructor due to religious beliefs, cultural requirements. – UCN and Assiniboine College deliver training to Indigenous and Métis communities, working directly with community coordinators to identify the needs of the students and learning environment. – Where possible, training is delivered in-community, reducing the need for travel to urban centres for training and testing. – University College of the North and Assiniboine College continue to expand services in First Nations, including remote and fly-in communities. – Addressed barriers include cost, access to training, literacy, and geographic location. – These programs are reaching a large number of Indigenous learners. For example, Indigenous participation is about 42% in UCN programs, 69% in Citizens' Bridge, and 51% in Assiniboine College.
Topic: Occupant Restraints **Initiative(s)**: – Child Passenger Safety Workshops – Rural Seatbelt Program **Involved Stakeholders:** Organizations serving Indigenous communities, new Canadians, new parents, guardians, and caregivers.	**Child Passenger Safety Workshops** – To support effective delivery, presentation materials and workshop delivery are being adapted to reflect and respect the cultural needs of each community. – The program intends to reach communities where car seat education has been identified as a need. It also leverages community organizations as delivery partners to reach target populations in trusted settings. – Child passenger safety has been identified by Indigenous communities as a priority. – To support effective delivery, presentation materials and workshop delivery are adapted to reflect and respect the cultural needs of each community. – Workshops are led by trained technicians and delivered directly within communities, including remote and northern communities, and facilitated through proactive outreach.

	Examples of Cultural Considerations
	– Considerations are being made for a train-the-trainer model in Indigenous communities. **Rural Seatbelt Program** – Collision and fatality data show that youth, particularly in rural areas, are less likely to wear seat belts and more likely to be seriously injured or killed in vehicle collisions as a result. – The Rural Seat Belt Pilot was an initiative conducted in Fall 2025 to increase seat belt use among rural high school students, where compliance rates are significantly lower than in urban areas. The program combined awareness, education, and enforcement to promote safer driving habits and reduce preventable injuries and fatalities among youth.
Topic: Pedestrian Safety **Initiative(s)**: High Visibility Gear Kits **Involved Stakeholders:** Indigenous communities	– Pedestrian safety has been identified as an important Road Safety issue by Indigenous partners. In many First Nations sharing a road with vehicles is necessitated by a lack of pedestrian infrastructure. – This program builds upon and incorporates feedback from a previous pilot program that saw reflective vests distributed in Peguis First Nation. People are more likely to use items with reflective material than they are to wear a reflective vest, on a regular basis. – Visibility gear kits contain: a backpack with front and back reflective material, a reflective toque, a rechargeable flashing light clip, and an emergency whistle. – High visibility pedestrian gear kits will be distributed to First Nations interested in the program that are identified as having pedestrian-vehicle collision hot spots. – MPI runs pedestrian safety radio ads on NCI radio in four languages: Cree, Ojibwe, Oji-Cree and English.
Topic: Off-road Vehicle Safety: **Initiative(s):** ATV and Snowmobile Presentations **Involved Stakeholders:**	– Many rural youth begin using ATVs and snowmobiles at an early age. This program aims to equip them with essential safety knowledge to help them develop responsible riding habits and reduce the risk of preventable injuries and collisions. – A key component is helmet use, which is strongly associated with reducing injury severity. MPI invested

	Examples of Cultural Considerations
Open to all Manitobans. Program was expanded in 2023, to increase efforts to deliver in Indigenous communities.	in ORV helmets, which are being distributed as door prizes to children attending presentations, helping overcome barriers to accessing safety gear in remote regions. – Presentation materials were recently updated by SSM in consultation with communities to better reflect the environments and culture of the intended recipients. – In collaboration with Safety Services Manitoba and the Interlake Tribal Council, a “train-the-trainer” model was introduced to support Indigenous facilitators in delivering workshops locally. – MPI runs ORV safety radio ads on NCI radio in four languages: Cree, Ojibwe, Oji-Cree and English.

CC (MPI) 1-78

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**51, 54**
Topic:	**Road Safety**		
Sub Topic:	**Community Partners in Road Safety Committee**		

Preamble to IR:

At Part II – COM Appendix 7 at page 51, it states:

> "Partners expressed a strong need for consistent road safety data and aligned messaging.
>
> Partners support quarterly forums to collaborate on safety planning"

At Part II – COM Appendix 7 at page 54, it states:

> "Implement new Terms of Reference` for the Community Partners in Road Safety Committee to clarify roles, strengthen accountability, and support more consistent coordination across members"

Question:

a) Please clarify how MPI will ensure its partners will deliver their responsibilities through the Community Partners in Road Safety Committee and more generally those identified in the Road Safety Strategy 2030.

b) Please detail whether MPI and its Community Partners in Road Safety Committee will create a coordinated Action Plan for achieving road safety in Manitoba, including information such as what behaviours will be targeted, when, and how.

    i. If this is not planned:

        1. what is the reason for not completing such an Action Plan, and

2. how does MPI intend to coordinate all stakeholders in a consistent and manageable manner.

Rationale for Question:

To understand how MPI will coordinate efforts between stakeholders as identified in pillar 2 of its Road Safety Strategy 2030.

RESPONSE:

a) Road safety in Manitoba is a shared responsibility involving many organizations with different mandates, authorities, and areas of expertise.

The Community Partners in Road Safety (CPRS) Committee provides a forum for these organizations to work collaboratively toward common road safety objectives. MPI's role is to support coordination, information sharing, and collective action where opportunities for collaboration exist, while recognizing that participating organizations remain responsible for their own operational decisions and commitments.

While MPI cannot direct or ensure that external organizations fulfill their responsibilities, MPI supports accountability through governance, transparency, coordination, and ongoing engagement.

As discussed during the 2026 Road Safety Technical Conference, the CPRS Committee adopted new Terms of Reference in April 2026 to re-establish a formal governance structure, defined member roles and responsibilities, meeting requirements, reporting expectations, and processes for creating and overseeing working groups. The Terms of Reference was developed collaboratively through a needs survey and committee working group.

Examples of these accountability mechanisms include:

- A permanent MPI Co-Chair and a rotating stakeholder Co-Chair elected annually by members.

- Clearly defined responsibilities for Committee members, including participation in meetings, sharing expertise, supporting working groups, and communicating information back to their organizations.
- Quarterly meetings with documented agendas, minutes, action items, and follow-up activities.
- Formal attendance requirements for members.
- Structured reporting requirements for Committee-approved working groups, including progress updates, completed actions, risks, mitigation plans, next steps, and timelines.

More broadly, Road Safety Strategy 2030 (RSS 2030) is founded on the principle of shared responsibility. Through stakeholder engagement, MPI consistently heard that no single organization can improve road safety on its own and that better outcomes require coordination among governments, law enforcement, community organizations, industry groups, Indigenous organizations, and road users. The CPRS Committee is intended to support this coordination by providing a forum for information sharing, collaboration, and alignment on road safety priorities.

b) At this time, CPRS Committee does not have plans to develop a single coordinated provincial Action Plan that assigns activities, timelines, and deliverables across all participating organizations.

The CPRS Committee Terms of Reference provide the governance framework through which stakeholders coordinate, share information, and undertake collaborative projects where appropriate.

The Committee's Terms of Reference provide a mechanism for members to identify specific road safety issues and create time-limited working groups to address those issues. Any member organization may propose a working group, provided the proposal includes:

- The road safety issue being addressed;
- A rationale for how the work will improve road safety;
- Participating organizations;

- Scope of work;
- Objectives and expected outcomes;
- Deliverables; and
- Project timelines.

This approach allows stakeholders to collaborate on specific issues as they arise while recognizing that participating organizations maintain their own mandates, resources, priorities, and decision-making processes.

The organizations represented on the CPRS Committee are independent entities with distinct mandates, governance structures, areas of expertise, legislative authorities, and operational priorities. Examples include governments, law enforcement agencies, Indigenous organizations, community groups, advocacy organizations, health-related stakeholders, and industry representatives.

Therefore, the CPRS Committee's approach is to:

- Establish shared road safety priorities through engagement and collaboration;
- Facilitate information sharing and coordination;
- Support evidence-based decision-making through collision data and research;
- Create opportunities for collaboration through working groups.

The CPRS Committee facilitates stakeholder coordination through the governance and collaboration mechanisms established in its Terms of Reference, supported by ongoing bilateral engagement among participating organizations. These mechanisms include:

- Quarterly CPRS Committee meetings to share information, discuss emerging issues, coordinate initiatives, and identify opportunities for collaboration.
- A co-chair governance model consisting of MPI and a stakeholder-elected rotating Co-Chair to support shared leadership and stakeholder ownership.

- Committee-approved working groups focused on specific road safety issues, each with defined objectives, participating organizations, expected outcomes, timelines, and reporting requirements.
- Regular sharing of collision data, research findings, best practices, and information about planned initiatives.
- As discussed during the Technical Conference, MPI uses both the CPRS Committee and direct stakeholder engagement as complementary approaches to coordination.

MPI's objective is not to direct the activities of all stakeholders, but rather to strengthen coordination, improve information sharing, support collaboration, and create opportunities for collective action where organizations identify common interests and shared road safety objectives. This approach reflects both the intent of the Committee's Terms of Reference and the shared responsibility principles contained in Road Safety Strategy 2030.

CC (MPI) 1-79

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**54**
Topic:	**Road Safety**		
Sub Topic:	**Post-Crash Response**		

Preamble to IR:

At Part II – COM Appendix 7 at page 54, in relation to the Community Partners in Road Safety Committee, it states:

> "Work collaboratively with road safety stakeholders to influence areas of road safety that MPI does not directly control."
>
> "Implement new Terms of Reference for the Community Partners in Road Safety Committee to clarify roles, strengthen accountability, and support more consistent coordination across members"

In the external document *A Guide to Applying the Safe System Approach to Transportation Planning, Design, and Operations* it states the following at page 57:

> "To apply the principles of a Safe System in the context of post-crash response, the following strategies can contribute to a Safe Systems:
> […]
> Enhance safety investments via research and sharing of trauma and road safety data."[7]

Question:

a) Is MPI aware of this document?

[7] Chapter 7, "Safe System Post-Crash Response" in National Academies of Sciences, Engineering, and Medicine. 2025. A Guide to Applying the Safe System Approach to Transportation Planning, Design, and Operations. Washington, DC: The National Academies Press. https://doi.org/10.17226/29147.

b) Is MPI aware of post-crash responses and how it relates to road safety?

c) Please explain whether MPI has considered how to implement post-crash responses into its Road Safety Strategy.

d) Please clarify whether emergency services are represented in the Community Partners in Road Safety Committee to address post-crash responses.

RESPONSE:

a) MPI is not aware of the external document *A Guide to Applying the Safe System Approach to Transportation Planning, Design, and Operations*, published by the National Academies of Science in Washington, D.C.

b) Yes. MPI is aware of post-crash responses and how it relates to road safety.

c) MPI recognizes the importance of effective post-crash response in improving road safety outcomes. This is why post-crash response was considered in the development of MPI's Road Safety Strategy 2030 (RSS 2030).

Post-crash response involves a range of organizations, including emergency medical services, police services, fire and rescue services, healthcare providers, and other agencies responsible for emergency response, treatment, and recovery. These organizations play a critical role in reducing the outcome severity by providing timely emergency response and medical care following a collision.

RSS 2030 *Pillar 2: Strengthening Partnerships Through Shared Responsibility* recognizes that road safety outcomes are influenced by many partners and that MPI does not have direct control over every aspect of the transportation system, including post-crash response and emergency care.

As a result, RSS 2030 does not include specific post-crash response initiatives led by MPI. Instead, the Strategy recognizes the important role of emergency

response and healthcare partners in the broader road safety system and reflects MPI's commitment to working collaboratively with road safety partners to improve road safety outcomes across Manitoba.

d) The Community Partners in Road Safety Committee currently includes representatives from Manitoba's two largest law enforcement agencies, the Winnipeg Police Service and the Royal Canadian Mounted Police. However, emergency medical services and healthcare providers are not currently represented on the Committee.

   MPI participates on a City of Winnipeg-led committee that reviews fatal collisions to establish a common understanding of the circumstances surrounding road fatalities and provides additional context to support MPI's monitoring and verification of fatality data. The committee includes representatives from law enforcement, emergency medical services, and healthcare organizations.

   Through these partnerships, MPI collaborates with organizations involved in post-collision response, including those not currently represented on the Community Partners in Road Safety Committee.

CC (MPI) 1-80

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**67**
Topic:	**Road Safety**		
Sub Topic:	**Road Safety Training**		

Preamble to IR:

At Part II – COM Appendix 7 at page 67, it states

> "Modernize training curriculum and key resources including the Driver's Handbook to better reflect current risks and best practices"

Question:

a) When was the original Driver's Handbook written?

b) Please explain the general process MPI uses to update its Driver's Handbook.

c) Please clarify whether MPI plans to completely revisit and rewrite the Driver's Handbook in the next 5 fiscal years.

Rationale for Question:

To understand how MPI plans to shape safer driving behaviours in their Road Safety strategy.

RESPONSE:

a) The Driver's Handbook was originally developed by the Province of Manitoba and was managed by the Division of Driver and Vehicle Licensing (DDVL). Responsibility for the handbook transferred to Manitoba Public Insurance in 2004 when DDVL merged with MPI. Prior to that, the handbook had been owned and maintained by the provincial government since 1962.

b) MPI updates the Driver's Handbook on an ongoing basis to ensure the information remains accurate, current, and aligned with legislative, regulatory, and road safety requirements.

Updates may be initiated in two ways:

1. **Content-driven updates** – Subject matter experts identify the need for content changes based on legislative amendments, policy updates, operational changes, safety considerations, or other emerging issues. Communications staff work with subject matter experts to revise content, coordinate translation requirements, manage design updates, facilitate review and proofing, and publish updated electronic and print versions. Where changes are significant, MPI also works with its broker network to replace existing handbook inventory.
2. **Print inventory replenishment updates** – When handbook inventory reaches reorder thresholds, the handbook content is reviewed for accuracy before reprinting. Minor updates may be incorporated as part of the reprint process, while more substantial revisions follow the same review, translation, design, and approval process used for content-driven updates.

MPI strives to maintain approximately one year of handbook inventory at any given time and routinely reviews handbook content when reprints are required.

c) MPI is planning a comprehensive review of the Driver's Handbook, with foundational work expected to begin during the current fiscal year. The review will assess the handbook's content, structure, and effectiveness in supporting safe driving behaviours. The process is expected to include stakeholder engagement and consideration of emerging road safety issues, research, and best practices.

The scope of the review will be determined as the project progresses. At this time, MPI has not finalized the specific form or extent of changes that may result from the review, nor has it established a five-year schedule for future handbook revisions.

CC (MPI) 1-81

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**42, 92**
Topic:	**Road Safety Evaluation and Monitoring**		
Sub Topic:			

Preamble to IR:

In Part II – COM Appendix 7 at page 42, it states:

> "Assess whether interventions are influencing how key populations perceive and experience road safety through ongoing evaluation."

In Part II – COM Appendix 7 at page 92, it states:

> "Aligning MPI's Strategy with Best Practice: Data
> Continuous Improvement: Ongoing monitoring and evaluation ensure the strategy adapts as new risks emerge and as programs demonstrate results."

Question:

a) Please provide an Annual Operational Plan for Road Safety initiatives in 2027/28.

b) Please provide a comprehensive Monitoring and Evaluation Plan for Road Safety initiatives in 2027/28.

c) Please clarify whether MPI will publish a "Year in Review" report identifying what has been implemented and what were the outcomes and results. If not, why not?

Rationale for Question:

To understand how MPI's Road Safety investments are being implemented and evaluated.

RESPONSE:

a)

Pillar	2027/28 Action
1. Build a Culture of Road Safety **Objective: Foster a province-wide culture where road safety is understood and valued by all Manitobans including drivers, passengers, pedestrians, cyclists, and motorcyclists alike.**	Develop annual report on Manitobans' road safety beliefs and attitudes, and progress on building a culture of road safety
	Design and deliver campaigns that change Manitobans' attitudes towards impaired driving, distracted driving, speeding, and seatbelt use
	Support the development and delivery of public education materials on safely sharing the road with new and emerging mobility modes, as legislative direction and driver education content are established.
	Create guidance for safely interacting with non-standard road users (commercial vehicles, farm equipment, motorcycles) and embed these principles into MPI's driver-training curriculum and driver handbook.
	Enhance MPI's profile as a primary source for road safety guidance and expertise.
	Proactively engage Manitobans through legacy and social media to ensure Manitobans receive clear, consistent information and guidance on road safety issues.

Pillar	2027/28 Action
2. Strengthening Partnerships Through Shared Responsibility **Objective: Work collaboratively with road safety stakeholders to influence aspects of road safety that are not directly within MPI's mandate and strengthen efforts in areas of shared responsibility, ensuring a coordinated and effective approach to improving road safety.**	Identify and engage community partners outside the traditional road-safety sector (such as healthcare providers, employers, schools, and community groups) to build cross-sector networks that promote shared responsibility for road safety.
	Work with community groups and organizations to assess and gather information on the needs of underserved audiences and use insights to guide updates to MPI programs and presentations.
3. Shaping Safer Driving Behaviours **Objective: Reduce high-risk behaviours such as speed, careless and distracted driving, impaired driving, and failure to wear a seatbelt through targeted education, data-led interventions, and community-based programs.**	Review and update driver training curriculum and materials for Driver Z and Adult Driver Training, including identifying and addressing cultural and language barriers.
	Revise and update the Driver's Handbook to ensure it accurately reflects current road-safety trends, modern infrastructure, and best practices for interacting with diverse and vulnerable road users.
	Extend the reach of the Adult Driver Training Program for Manitobans experiencing barriers to training, particularly in Indigenous communities.

Pillar	2027/28 Action
	Educate drivers on the tangible financial and human impacts of unsafe behaviours, incorporating human-centred impact stories to reinforce the real-world consequences of high-risk driving.
	Put forward proposals for legislative, regulatory, and policy updates that address emerging road-safety trends and issues brought forward by the road safety department
	Collaborate with law-enforcement partners to strategically strengthen school-zone safety through coordinated priorities, shared data, and targeted enforcement approaches.
	Work with enforcement partners to implement joint campaigns that pair education with enforcement.
4. Advancing Road Safety and Reconciliation **Objective: Advance reconciliation by embedding road safety into MPI's Indigenous Action Plan, building relationships with Indigenous communities, informing the development of road safety initiatives that address unique community challenges and improve outcomes.**	Engage with Indigenous communities across Manitoba to continue to build meaningful relationships and strengthen collaboration and consultation.
	Develop road safety campaigns and education materials tailored to Indigenous communities.
	Expand Manitoba Public Insurance's existing safety pilots such as Pedestrian Safety Kits to additional Indigenous communities.
	Continued efforts to include Indigenous talent in road safety campaigns.

Pillar	2027/28 Action
	Expand the ORV workshop program to reach more Indigenous communities with safety education.
	After the evaluation of existing road safety presentations and programming, aim to expand, change or develop new content to Indigenous communities based on their unique needs.
	Ensure revisions to MPI's driver handbook reflect community-identified needs, priorities, and contexts.
	Co-develop updates to driver education and training materials with Indigenous communities to reflect the lived experiences, learning preferences, and specific road safety risks identified by Indigenous communities.

b) MPI's monitoring and evaluation approach is designed to assess the effectiveness of road safety initiatives and support continuous improvement and evidence-informed decision-making. In 2027/28, MPI anticipates monitoring and evaluating the following road safety initiatives:

- Adult Driver Training Program: monitor program participation, the program's impact on training safer drivers, and opportunities to improve program accessibility and effectiveness.
- Winter Tire Program: evaluate the relationship between winter tire use and collision outcomes, including analysis of collision data to assess the program's road safety benefits.
- Enhanced Enforcement Program – evaluate the impact of targeted enforcement activities on road safety outcomes through analysis of collision and enforcement data.
- Road Safety Culture and Attitudes Research – develop and report on measures of Manitobans' road safety beliefs, attitudes, and self-reported behaviours to assess progress toward building a culture of road safety.

In addition to these evaluations, MPI will continue to:

- monitor collision, injury, and fatality trends
- analyze emerging road safety issues
- review stakeholder feedback and engagement findings
- assess available research and leading practices from other jurisdictions
- use evaluation findings to inform future road safety priorities, program improvements, and investment decisions.

Monitoring and evaluation results will be considered alongside operational, stakeholder, and research insights to assess progress toward the objectives of the Road Safety Strategy and identify opportunities for program refinement.

c) MPI does not currently intend to publish a standalone annual "Year in Review" report. MPI currently reports on its road safety activities, initiatives, and results through a number of existing channels, including:

- The General Rate Application, Road Safety Technical Conferences and supporting materials;
- MPI's Annual Report;
- Quarterly meetings of the Community Partners in Road Safety Committee; and
- Regular engagement with individual road safety partners to discuss road safety priorities and initiatives.

MPI believes these existing reporting mechanisms provide stakeholders with many opportunities to review its road safety activities.

CC (MPI) 1-82

Part and Chapter:	**PART II – COM Appendix 7: Road Safety Technical Conference Materials**	**Page No.:**	**73**
Topic:	**Road Safety**		
Sub Topic:	**Enhanced Enforcement Program**		

Preamble to IR:

In Part II – COM Appendix 7 at page 73, it states:

> "Under the Enhanced Enforcement Program (EEP), MPI provides funding to law enforcement agencies to support officer overtime for enforcement campaigns targeting high-risk driving behaviours.
>
> • Police agencies used a mix of targeted enforcement strategies, focusing resources on higher-risk locations such as school zones, rural highways, rail crossings, intersections, and other high-traffic areas."

Question:

a) Please clarify where in the Road Safety budget EEP funding is located and how much is dedicated to EEP initiatives.

b) Please provide more information on how higher-risk locations are chosen, including what type of data are relied upon to make such decisions.

c) Please provide a narrative discussion as to what police are directed to do when contracted for EEP campaigns.

d) Please explain how EEP campaigns are monitored.

Rationale for Question:

To understand more details of the EEP as a road safety mechanism.

RESPONSE:

a) Funding for the Enhanced Enforcement Program (EEP) is included within ***Part VIII EXP Appendix 14 - Road Safety Program Costs*** of the 2027 GRA under *Line 3 – Impaired Driving Prevention Strategies*. EEP funding is reported as part of MPI's Road Safety expenditures allocated to Basic insurance.

The forecasted Road Safety spend allocated to Basic for 2026/27 is approximately $11.8 million, which is approximately $941,000 higher than the average actual spend to date.

Within this allocation, MPI approved $1.438 million in 2026/27 specifically for EEP initiatives. While EEP funding is reported under *Line 3 – Impaired Driving Prevention Strategies*, the program supports enforcement activities beyond impaired driving, including speeding, distracted driving, and occupant safety (e.g., seatbelt use).

Line 3 also contains spending on other impaired driving prevention initiatives. As a result, the total amount reported under Line 3 should not be interpreted as the cost of the EEP alone.

b) "Higher-risk locations" for EEP campaigns are primarily identified by participating law enforcement agencies and supported by MPI collision data and findings from studies and initiatives (e.g., speed display sign data).

Participating law enforcement agencies also consider local information when proposing potential EEP locations, including collision patterns, traffic complaints, enforcement experience, school zones, pedestrian areas, and other community-specific road safety concerns.

Collision data is analyzed to identify locations with elevated road safety risk. Data considered includes collision frequency, collision severity, fatal and serious collisions, contributing factors, and collision trends.

MPI reviews this information together with enforcement agency proposals when approving annual EEP initiatives. The objective is to provide agencies with increased enforcement resources to target locations where there is evidence of a greater road safety risk and where enforcement activities have the greatest potential to improve road safety outcomes.

c) MPI does not direct policing decisions or enforcement activities, nor does it contract police services. Rather, through the Enhanced Enforcement Program, MPI makes funding available to law enforcement agencies that choose to participate and expand traffic enforcement efforts in identified road safety priority areas, such as impaired driving, distracted driving, speeding, and seatbelt compliance.

Law enforcement agencies interested in participating in the program submit proposals annually to MPI outlining enforcement activities that address road safety concerns within their communities. Agencies develop these proposals based on factors such as local collision patterns, enforcement experience, traffic complaints, school zones risks, pedestrian activities, and other community-specific road safety concerns.

Participating agencies enter into a Statement of Work with MPI and are required to carry out the activities described in their approved proposals. These activities are intended to supplement existing traffic enforcement efforts. Participating agencies determine the operational aspects of enforcement, including deployment decisions, locations, timing, and enforcement strategies, while carrying out the activities identified in the agreement.

d) EEP initiatives are monitored through reporting requirements established by MPI. Approved campaigns are governed by a Statement of Work that outlines campaign activities, funding parameters, performance expectations, and reporting requirements.

Participating agencies are required to identify campaign objectives and performance measures and to report on enforcement activities and outcomes.

Depending on the campaign, reported information may include enforcement hours, traffic stops conducted, offence notices and warnings issued, check stop activity, and education and awareness activities.

MPI reviews the information to confirm that approved activities were carried out and to assess campaign results relative to the stated objectives and performance measures. Reported information is also used to monitor program performance over time, including trends in enforcement activity, resource utilization, and other indicators relevant to the program's road safety objectives.

CC (MPI) 1-83

Part and Chapter:	**PART VIII – EXP Appendix 14: Road Safety Program Costs**	**Page No.:**	**1-4**
Topic:	**Road Safety Program Costs**		
Sub Topic:			

Preamble to IR:

In Part VIII – EXP Appendix 14, it states MPI's Road Safety Program Costs, both approved budgets and actuals, and forecast comparison.

In particular, Figure EXP App 14-2, Basic Road Safety Program Costs – Forecast Comparison describes the next 5 years of forecasted Basic Road Safety Program Costs.

Question:

a) Please explain where improving traffic safety culture is represented within Figure EXP App 14-2 for the forecasted years.

b) Please explain where stakeholder engagement is represented within Figure EXP App 14-2 for the forecasted years.

c) In Figure EXP App 14-2, please provide specific details as to what activities are included in budget line 10 – Safety Programming Other?

d) In Figure EXP App 14-2, please clarify and provide details about whether advertising and public campaigns are contained in other line items apart from 12 and 14.

Rationale for Question:

To understand the prudency and necessity of MPI's Road Safety budget.

RESPONSE:

a) Improving traffic safety culture is not represented as a standalone budget line within Figure EXP App 14-2. Rather, it is an outcome that is supported through a range of Road Safety activities and investments reflected throughout the forecast.

Activities intended to influence traffic safety culture are incorporated across multiple areas of the Road Safety budget, including driver education and improvement, impaired driving prevention, speed management, occupant safety education, motorcycle safety education, vulnerable road user education, safety programming, program evaluation, distracted driving initiatives, and departmental resources required to develop, implement, and support these activities.

Accordingly, improving traffic safety culture is reflected across multiple Road Safety budget lines and should not be viewed as being attributable to any single forecast category.

b) Stakeholder engagement is included within Line 16 – Departmental Expenses. Engagement activities associated with the ongoing delivery of MPI's Road Safety Strategy will be conducted by MPI staff and are therefore reflected in the departmental resources required to administer and support Road Safety programming.

c) Line 10 – Safety Programming Other includes road safety education, awareness, research, and program development activities that do not fall within the specific program categories identified elsewhere in Figure EXP App 14-2.

Examples of activities included within this budget line include:

- Driving tips and safe driving awareness initiatives, including the 60-Second Driver program and La Liberté French-language print advertisement
- Wildlife awareness campaigns that encourage drivers to exercise increased caution during periods of elevated wildlife activity
- The Traffic Safety Culture Survey used to monitor Manitobans' attitudes, beliefs, and self-reported behaviours related to road safety

- Delivery of pilot road safety programs informed by engagement conducted through MPI's Indigenous Action Plan

These activities are intended to complement MPI's broader Road Safety programming by advancing road safety priorities that are not reflected within other specific Road Safety forecast categories.

d) Yes, road safety advertising and public campaigns are contained in line items apart from 12 and 14. They are also incorporated within the below Road Safety program categories:

- Line 3 - Impaired Driving Prevention Strategies
- Line 4 - Speed Management Strategies
- Line 5 - Occupant Safety Education Strategies
- Line 8 - Motorcycle Safety Education
- Line 9 - Vulnerable Road User Education Strategies
- Line 10 - Safety Programming Other

CC (MPI) 1-84

Part and Chapter:	**PART VIII – Pro Formas** **PF-4 Statement of Operations - 2025/26 Comparative**	**Page No.:**	**10**
Topic:	**Explanation of Significant Variances – 2025/26 Comparative**		
Sub Topic:			

Preamble to IR:

In Pro Forma 4 – Statement of Operations – 2025/26 Comparative, Explanation of Significant Variances – 2025/26, at line item 41 on page 10, road safety program expenses were $1,225,000 lower than expected.

Question:

a) Please explain why Road Safety allocated expenses were $1,225,00 lower than the expected expenses for 2025/26.

Rationale for Question:

To understand MPI's Road Safety programming.

RESPONSE:

a) Road Safety expenses allocated to Basic were $1.225 million lower than expected in 2025/26, primarily due to lower spending on the Vulnerable Road Users Strategy ($459 thousand), Speed Management Strategy ($411 thousand), Vehicle Safety Strategy ($147 thousand), and other road safety initiatives ($208 thousand).

CC (MPI) 1-85

Part and Chapter:	**Part V – Information Technology and Governance**	**Page No.:**	**16**
Topic:	**Enterprise Project Management Office (EPMO)**		
Sub Topic:			

Preamble to IR:

In Part V – Information Technology and Governance at page 16 it states:

> "MPI established the Enterprise Project Management Office (EPMO) on April 20, 2026, to provide enterprise-wide oversight of Major Programs and the Project Management Office (PMO). The EPMO is designed to strengthen how the organization prioritizes, governs, and delivers its project portfolio by improving alignment to corporate strategy, enhancing accountability, and enabling more disciplined investment decisions across the enterprise.
>
> By consolidating Major Programs and the Project Management Office within the Customer & Product Value division under the EPMO, MPI is advancing a more integrated enterprise delivery model. This structure is intended to improve consistency, transparency, and oversight across the portfolio, while strengthening strategic alignment, clarifying governance and decision rights, enhancing risk and resource management, and supporting a more coordinated approach to modernization—including managing technology debt, stabilizing legacy systems, and driving value-based investment decisions."

Question:

a) Please provide a narrative discussion on what specific improvements are being made or what specific deficiencies are being addressed as a result of this revised organizational model when compared to the prior model. Please ensure to answer how the new structure will realize the following statement:

> "This structure is intended to improve consistency, transparency, and oversight across the portfolio, while strengthening strategic alignment, clarifying governance and decision rights, enhancing risk and resource management, and supporting a more coordinated approach to modernization—including managing technology debt, stabilizing legacy systems, and driving value-based investment decisions."

Rationale for Question:

To clarify and better understand how the creation of this new organizational structure will lead to the better outcomes described.

RESPONSE:

a) MPI established the Enterprise Project Management Office (EPMO) to provide a more consistent and integrated approach to governing and delivering Major Programs and PMO-managed initiatives. Major Programs will continue to retain their established governance structures, while also following Corporate Planning and Governance (CPG) intake processes to support enterprise prioritization and alignment. Under the prior model, project controls, reporting, governance expectations, and escalation processes were not always applied consistently across the portfolio. The revised model addresses this by centralizing oversight, clarifying accountabilities, and supporting more standardized delivery practices.

The EPMO addresses strategic misalignment, resource inefficiencies, and inconsistent governance by providing enterprise-wide visibility, clear prioritization, and alignment of projects with the corporate strategy. Organizations often run projects with weak links to business goals; the EPMO will help ensure initiatives are aligned to corporate strategy by connecting planning to execution and reducing low-value or no-value work. Without centralized oversight, work can become fragmented. This organizational change provides a single view of initiatives, enabling consistent reporting and progress tracking against strategic goals.

It is also important that competing demands and capacity constraints are well understood. The EPMO will support resource allocation based on enterprise priorities, helping ensure critical initiatives are appropriately staffed and bottlenecks are minimized. The EPMO will also reinforce consistent governance, supporting faster, data-driven decisions on prioritization, trade-offs, and investment. Standardized processes and communication will improve alignment and help teams understand how their work supports enterprise objectives.

Implementation of the EPMO is focused on five key areas: strategic alignment, governance frameworks, resource management, collaboration and communication, and tools and platforms. Strategic alignment will ensure projects support the organization's strategic objectives and priorities, including initiatives that contribute to the corporation's five focus areas. Governance frameworks will establish standardized practices across projects, programs, and portfolios to support consistent oversight and ensure investments are directed toward high-impact initiatives. Resource management will improve visibility into project performance, resource capacity, and financials to enable faster, data-driven leadership decisions. Collaboration and communication will help align stakeholders across teams, while tools and platforms will support portfolio coordination, executive dashboards, flexible workflows, and integrations that maximize business value.

The EPMO will improve consistency and transparency through common project controls, including tools such as the Project Control Log (PCL), which will be used for implementation projects to better identify key deliverables, approvals, dependencies, and accountabilities across initiatives. It will also strengthen governance by improving the flow of information to project, program, and executive steering committees, giving leadership clearer visibility into risks, issues, decisions, progress against strategic goals, and resource constraints.

The new structure also supports stronger vendor management by improving oversight of vendor commitments, deliverables, performance expectations, and

escalation processes. This will help provide greater transparency over vendor performance and support more disciplined management of scope, schedule, cost, and contractual obligations.

Strategic alignment will continue to be driven through the IT roadmap and Corporate Planning and Governance (CPG) prioritization process. The EPMO supports execution of those approved priorities by providing governance, reporting discipline, and delivery oversight. This strengthens the connection between approved corporate priorities and execution by improving visibility into delivery performance, resource capacity, financials, risks, and dependencies. Similarly, value-based investment decisions are supported through CPG and the Value Assurance team's assessment of business cases, while the EPMO provides improved delivery information, risk visibility, and performance reporting once initiatives proceed.

Overall, the revised model is intended to improve consistency, transparency, accountability, and executive visibility across the portfolio, while supporting more disciplined delivery of MPI's modernization priorities, including technology debt management and stabilization of legacy systems. The key change from the prior model is the move toward centralized enterprise visibility, clearer prioritization, more disciplined resource management, stronger governance, and more consistent reporting across the portfolio. This demonstrates that the revised model is not simply doing more of the same; it is intended to create a more integrated delivery model that improves decision-making, alignment, and accountability across the enterprise.

CC (MPI) 1-86

Part and Chapter:	Part V – Information Technology and Governance	**Page No.:**	17-18
Topic:	Corporate Planning and Governance (CP&G)		
Sub Topic:	Funding Approach		

Preamble to IR:

In Part V – Information Technology and Governance at pages 17-18, it states:

> "Under this model, annual funding is established through dedicated envelopes of $15 million for Major Programs and $5 million for smaller projects, providing a disciplined foundation for portfolio planning, prioritization, and oversight"

Question:

Please explain the following regarding this $20 million funding envelop:

a) Does this $20 million represents an annual spending cap for Major Programs and smaller projects or are there other funding sources for Major Programs and smaller projects? If there are other funding sources, please identify what those are.

b) How were each of these amounts determined?

c) Is this the sole funding source for legacy system renewal or does funding for legacy system renewal have different or additional funding sources, and if so, please identify what those are?

d) Please provide a narrative discussion on MPI's meaning of 'legacy system renewal and/or modernization.'

e) Please provide a list of legacy system that MPI contemplates on renewing/modernizing and the time line and urgency for renewal/modernization.

f) Do all initiatives that draw upon this $20 million allocation require business case approval, and if not please explain?

Rationale for Question:

To clarify and better understand the funding allocated to major and smaller programs and the rationale for this allocation.

RESPONSE:

a) $20M is the budgeted implementation costs for initiatives that qualify as Major Programs and EPMO initiatives.

b) Refer to 2027 GRA application *Part VIII EXP Appendix 22a* section 2.8 Initiative Expenses and *PUB (MPI) 1-45 part a)* for details.

c) This is not the sole source, as renewal and maintenance work that does not meet the criteria for Major Programs or EPMO is funded via IT operations.

d) Please refer to the response for *CC (MPI) 1-40 part c)*.

e) Details of this approach will be provided as part of the Technology Roadmap that will be shared in the fall with the PUB.

f) Yes, all EPMO and Major Programs initiatives that draw upon the $20 million Treasury Board approved budget require an approved business case.

CC (MPI) 1-87

Part and Chapter:	**Part V – Information Technology and Governance IT Appendix 2**	**Page No.:**	**12**
Topic:	**IT Summit 2026**		
Sub Topic:	**Requirements Management Framework**		

Preamble to IR:

In IT Appendix 2 at page 12, it states:

> "The Requirements Management Framework provides a consistent, enterprise-wide approach that clarifies ownership, standardizes artefacts, and establishes full traceability from approved business outcomes through to delivered capabilities. It is designed to protect executive intent and investment by ensuring there is a single source of truth for what was agreed, what changed, and why. Rather than adding a new layer of governance, the framework integrates directly into existing structures, strengthening scope control, change discipline, and decision making while reducing late-stage surprises and disputes."

Question:

a) Please provide a narrative discussion on how the Requirements Management Framework has been or will be applied throughout the full lifecycle of an initiative (Ideation to Implementation) to enhance "scope control, change discipline, and decision making while reducing late-stage surprises and disputes."

Rationale for Question:

To clarify and better understand how the new Requirements Management Framework will help reduce scope creep and related sources of project delays and cost overruns.

RESPONSE:

a) The Requirements Management Framework is intended to be applied throughout the full lifecycle of an initiative, from ideation through implementation, with requirements activities scaled to the complexity of the initiative. The framework provides guidance regarding requirements activities and documentation appropriate to each project phase and is adopted by Enterprise Project Management Office (EPMO) processes. This helps establish scope clarity early in the initiative and supports traceability between approved business outcomes and delivered functionality.

Through the project start up phase, the framework supports the capture of high-level requirements to support business case and procurement milestones. This helps ensure that the business outcomes approved at the outset remain traceable to the solution design that is funded and procured in later project stages. Once a business case has been approved and any required procurement activities are completed, more detailed requirements are captured to support implementation activities and remain traceable to the high-level requirements identified during project start up.

By establishing a record of approved requirements, decisions, and changes, the framework enables proposed scope changes to be assessed against approved outcomes by identifying which requirements are impacted and tracing those impacts through to more detailed requirements. This provides EPMO project processes with hierarchal requirements to support scope control, change discipline, and decision making while reducing late-stage surprises and disputes.

Detailed requirements are progressively elaborated within the IT Division, translating approved business outcomes and capabilities into functional and technical requirements with clear traceability from approved business needs through solution design, testing, and implementation. This helps protect approved business outcomes, reduce ambiguity and rework, minimize scope creep, strengthen change discipline, and improve the likelihood of successful project delivery.

CC (MPI) 1-88

Part and Chapter:	**Part V – Information Technology and Governance**	**Page No.:**	**15-16**
Topic:	**IT Appendix 8**		
Sub Topic:			

Preamble to IR:

In Part V – Information Technology and Governance, IT Appendix 8 provides an overview of the Benefit Realization Management (BRM) process.

Question:

Please:

a) advise what projects and programs are subject to the BRM process. If all projects and programs are not subject to this process, explain the criteria that determine BRM inclusion or exclusion.

b) provide a list of projects/programs that have completed the final Benefit Realization Assessment (12-month post project close). For projects/programs that are inflight, please provide a list of project/programs that have or are part of a quarterly benefit realization report.

c) provide a final completed Benefit Realization Assessment from a major program and a quarterly benefit realization report.

Rationale for Question:

To better understand the realization of value from Information Technology investments, as described in their respective Business Cases.

RESPONSE:

a) The criteria for BRM inclusion remains the same as in the 2026 GRA, the process applies to all initiatives included in MPI's Integrated Corporate Portfolio that have an approved project budget of $500,000 or greater and all Major Programs projects, regardless of budget.

b) To date, no projects have completed the 12-month benefit realization period.

Refer to the column labelled Benefit Realization Plan Status, in the *Part V IT Appendix 9 - Corporate Project Listing*. This column provides the status of the BRM plan for each project. An "Approved" status is for on-going projects that have approved BRM plans. The "Approved – Benefit Tracking" status is for closed projects with a BRM plan that is within the first 12 months after project closure, with the benefits being measured and monitored. The "Not applicable - approved prior to FY2024/25" status is for projects that were approved prior to the BRM process and do not have a BRM plan. The "Not applicable" status is for projects under $500,000.

c) ~~The Q1 2026/27 report is in progress of finalization and will be available on round 2 Information Requests. As no qualifying projects have yet completed the 12-month benefit realization period, there are currently no Benefit Realization Final Assessments available~~. Please see *Appendix 1*.

Objective	Outcome	Benefit	Status
Cost Reduction and Savings	Net Financial Benefit	Reduction in overall operational costs	
Risk Management/Exposure	Windows Outage Time	Reduction in Windows downtime due to ESX patching	**TBD***
Risk Management/Exposure	MPI System Downtime	Reduction in MPI downtime due to ESX patching	**TBD***
Risk Management/Exposure	ESX patching time	Reduction in time to complete ESX patching	**TBD***
Risk Management/Exposure	Recovery Time Objective (RTO)	Reduction in recovery time for system	**TBD****
Risk Management/Exposure	Recovery Point Objective (RPO)	Reduction in recovery point for system	**TBD****

**ESX patching expected in Q3 2026 (September to November)*

***Disaster Recovery exercise to occur in Q3 2026 (September 2026)*

Contact Center as a Service (CCaaS)

Planned Benefits

Objective	Outcome	Benefit	Status
Risk Management/Exposure	Availability – Uptime	Maintain existing uptime	
Risk Management/Exposure	Recovery Time Objective (RTO)	Reduction in recovery time for system	TBD*
Risk Management/Exposure	Recovery Point Objective (RPO)	Reduction in recovery point for system	TBD*
Improve customer experience/satisfaction	Average Speed of Answer (ASA)	Maintain comparable average speed for CC agents to answer calls	
Improve customer experience/satisfaction	Average Handle Time (AHT)	Maintain a comparable average speed to answering incoming calls after go-live	
Improve customer experience/satisfaction	Call Volumes	No significant unforecasted/unexpected increase/decrease	
Improve customer experience/satisfaction	Satisfaction Wait Time for CSR	Maintain or return comparable standards following go-live	
Improve customer experience/satisfaction	Overall Satisfaction First Notice of Loss (FNOL)	Maintain or return comparable standards following go live	
Increase Operational Efficiency/Effectiveness	Routine Patching Work	No longer require periodic Sunday patching exercises	
Increase Operational Efficiency/Effectiveness	Daily System Maintenance Time	Reduction in daily system maintenance time	

**Disaster Recovery exercise to occur in Q3 2026 (September 2026)*

Emergent Dis-Benefit

Increase Operational Efficiency/Effectiveness	Employee Performance Management Reporting	Increase in time to prepare monthly employee performance management reporting	

CC (MPI) 1-89

Part and Chapter:	**Part IX – INV Appendix 4**	**Page No.:**	**2, 6**
Topic:	**Investments**		
Sub Topic:	**Performance**		

Preamble to IR:

In Part IX – INV Appendix 4 at page 2, the performance commentary does not match the performance as shown in the tables in Appendix 4 at page 6.

e.g., The commentary states the "RSR … generated a return of 9.0%[8] and underperformed its benchmark by 0.8%[9]" and "Canadian large cap equities underperformed by 2.5%[10]

". The footnotes below show three differences, but there are other differences.

Question:

a) Please provide performance commentary that matches the figures reported in the related tables.

Rationale for Question:

To understand the performance of the investment portfolios in absolute terms and relative to benchmarks.

RESPONSE:

Appendix 4 commentary has been re-written and can be found in ***Exhibit #15***. The previous narrative was not fully updated and included inaccurate commentary about equities, Government Bonds and private assets. Appendix 4 return table has not been changed and accurately reflects MPI returns as of March 31, 2026.

[8] The return in the table at Appendix 4 page 6 shows 8.9%, not 9.0%.
[9] The underperformance in the table at Appendix 4 page 6 shows 0.6%, not 0.8%.
[10] The underperformance in the table at Appendix 4 page 6 shows -9.6%, not -2.5%.

CC (MPI) 1-90

Part and Chapter:	**Part II – Application COM Appendix 8a**	**Page No.:**	**29-36**
Topic:	**Investments**		
Sub Topic:	**Status of the OCIO's Services**		

Preamble to IR:

In Part II – Application COM Appendix 8a, WTW's agreement includes the items below.

Investment Management (Quarterly) (at page 29)

1. Core performance and attribution
2. Review of total fund structure
3. Portfolio profile and style analysis

Strategic Investment Management (starting at page 31)

4. General investment consulting services and enhancing committee knowledge
5. Review of investment policy manual
6. Manage research and selection
7. Transition services

In Part II – Application COM Appendix 8a at page 36, the Service Level Standards in the WTW agreement include the items below.

5. Work with MPI's investment team to complete the Annual review of Investment Policy Manual, investment objectives, benchmarks & peer universes for the Investment Committee meeting specified in the Investment Committee Work Plan and agreed to by the Vendor;
6. Work with MPI's investment team to provide updated capital markets assumptions by the deadlines set by MPI's Finance and AIU divisions (generally expected in mid-May of each year during the Term) and agreed to by the Vendor;
7. Complete annual review of investment mixes via Efficient Frontier Analysis by agreed upon deadlines during each year during the Term;

Question:

a) When will WTW's quarterly services (1 to 3 above) start?

b) Will capital market assumptions (Service Level Standard #6 at page 36) be updated and reflected in GRA filings each year?

c) Will the annual review of investment mixes via Efficient Frontier Analysis (Service Level Standard #7 at page 36) be completed before GRA filings each year?

d) Will the results of the annual review of investment mixes via Efficient Frontier Analysis be included in GRA filings each year?

Rationale for Question:

To understand what outputs from the OCIO's services will be reflected in Investment related GRA filings each year.

RESPONSE:

a) WTW was engaged effective October 1, 2025 and has progressively implemented the agreed service model across governance, investment monitoring, regulatory support, strategic investment management and forecasting activities. Quarterly reporting services commenced following the transition period and have been integrated into MPI's governance framework. WTW's first quarterly report, containing performance results as of March 31, 2026, was presented at the June 17, 2026 Investment Committee meeting. WTW's role is advisory and non-discretionary and includes investment monitoring, performance reporting, capital market assumptions, strategic investment analysis and governance support. MPI retains responsibility for all investment decisions, implementation activities and governance approvals.

b) WTW reviews its capital market assumptions on an ongoing basis, with formal updates typically undertaken quarterly and a comprehensive annual review completed through WTW's investment research and governance process. The assumptions are updated as appropriate to reflect changes in market conditions

and long-term expectations and are provided to MPI to support investment forecasting, financial modelling and strategic investment analysis. The updated assumptions are considered as part of the annual GRA process and to the extent they are relied upon in future GRA filings, MPI will determine the appropriate information to be disclosed in the filing. The inclusion, form and level of detail of any future disclosure will depend on the requirements of the filing and the relevance of the assumptions to the matters under consideration.

c) WTW periodically reviews MPI's investment strategy and asset mix using a range of analytical tools and frameworks, including asset liability management analysis and where appropriate, efficient frontier concepts. As discussed during the Technical Conference, efficient frontiers can provide useful insight into risk-return trade-offs but do not capture several considerations that are important to MPI's decision-making framework, including capital adequacy impacts, downside risk, recovery characteristics, liability considerations and governance objectives. Consequently, the annual review process should not be interpreted as a commitment to prepare or rely upon a standalone efficient frontier analysis each year. The specific analytical tools and methodologies employed will depend on the issues being considered and are intended to support a broader assessment of investment strategy rather than a single risk-return optimization exercise.

d) MPI will determine the appropriate investment-related disclosures to include in future GRA filings based on the relevance and materiality of the work being undertaken. As discussed during the Technical Conference, efficient frontier analysis is only one of several tools that may be used to assess investment strategy and does not, on its own, capture all of the considerations relevant to MPI's decision-making framework. Future reviews may incorporate a broader range of analyses, including asset liability management analysis, capital adequacy considerations, downside risk assessment, recovery characteristics and liability-related factors. Accordingly, MPI does not anticipate that the results of a standalone efficient frontier analysis would necessarily be filed each year. Rather, MPI would expect to provide disclosure regarding the investment

analysis and conclusions that are most relevant to the matters under consideration in the applicable GRA.

CC (MPI) 1-91

Part and Chapter:	**Part II – Application COM Appendix 8a** **Part IX – INV Appendix 1 - Redacted**	**Page No.:**	**31** **33**
Topic:	**Investments**		
Sub Topic:	**Investment Policy Statement Review - Rebalancing Policy**		

Preamble to IRR

In Part II – Application COM Appendix 8a at page 31, it states WTW agrees to review the investment policy statement annually.

In Part IX – INV Appendix 1 – Redacted at page 33, the Rebalancing Policy states that "the Investment Committee Working Group (ICWG) has the responsibility to rebalance", and that "if the weight of any asset class falls outside the allowable range, then that asset class will be rebalanced back into the target range for that asset class within six (6) months".

Question:

a) Please confirm that WTW's scope of work includes all five components: (1) Investment Policy Statement; (2) Operational Asset Liability Management Policy; (3) Rebalancing Policy; (4) Active Manager Monitoring Policy; and (5) Trading Approval Policy.
b) Please clarify when WTW plans to review the Rebalancing Policy.
c) Please explain whether MPI's Rebalancing Policy is unique when compared to WTW's other non-discretionary clients or common industry practice. If so, how?
d) Please clarify if MPI has any concerns about the current Rebalancing Policy. If so, what are the concerns and any potential remedies for MPI to consider?

Rationale for Question:

To understand WTW's responsibilities related to reviewing the Rebalancing Policy, and any concerns it might have with the current Rebalancing Policy as it relates to MPI's investment portfolio.

RESPONSE:

a) MPI's Investment Policy Manual contains five policies. WTW provides advisory services relating to certain aspects of MPI's investment governance framework, including investment policy, ALM, manager monitoring and investment strategy matters. Responsibility for the development, maintenance, approval and implementation of the policies remains with MPI.

b) MPI reviews the Investment Policy Manual on a periodic basis through its governance process. WTW may provide input and advice on investment-related matters where requested by MPI; however, responsibility for reviewing, maintaining and approving the Rebalancing Policy remains with MPI. WTW is not separately engaged to perform an independent review of the Rebalancing Policy and any input provided would occur in the context of broader investment policy, ALM or governance discussions.

c) MPI's Rebalancing Policy incorporates many features commonly found in institutional investment programs, including target asset allocations, permissible ranges, monitoring requirements, governance oversight and defined responsibilities for implementation. While the specific design of the policy reflects MPI's unique objectives, liabilities, governance framework and regulatory environment, WTW does not view the overall approach as unusual relative to common institutional practice. More generally, rebalancing policies are typically tailored to the circumstances of each organization and there is no single industry standard that is appropriate in all situations. Accordingly, while certain aspects of MPI's policy may differ from those of other organizations, those differences generally reflect MPI's particular operating environment and governance requirements rather than a fundamentally unique approach to portfolio rebalancing.

d) MPI does not have concerns about the current Rebalancing Policy.

CC (MPI) 1-92

Part and Chapter:	**Part II – Application COM Appendix 8a**	**Page No.:**	**29**
Topic:	**Investments**		
Sub Topic:	**OCIO Services Agreement - Asset Mix Rebalancing**		

Preamble to IR:

In Part II – Application COM Appendix 8a at page 29, WTW's agreement requires WTW to perform the services below.

> **2. Review of Total Fund Structure**
>
> - Review actual asset allocation relative to policy target weights set out in the Investment Policy Statement section of the Investment Policy Manual. Vendor will show the actual asset allocation mix versus policy weighting in its reporting. In a non-OCIO relationship, Vendor will only show these deviations, but will not recommend rebalancing the portfolio under an advisory arrangement.
> - Provide the market value of each asset class and investment manager; and

Question:

a) Please clarify WTW's responsibilities related to making rebalancing "recommendations", given the first bullet above. i.e., Will WTW recommend rebalancing the portfolio, or will WTW not recommend rebalancing because WTW's agreement is an advisory arrangement?

Rationale for Question:

To understand WTW's responsibilities related to making recommendations for rebalancing the investments portfolio.

RESPONSE:

a) WTW may provide analysis and advice related to asset allocation, portfolio positioning and investment strategy as part of its advisory services to MPI. However, WTW does not have authority to direct or implement portfolio rebalancing activities. Responsibility for monitoring compliance with the Rebalancing Policy, determining whether rebalancing actions are required and approving and implementing any rebalancing decisions remains with MPI. Any advice provided by WTW would be considered by MPI within its established governance and decision-making framework.

CC (MPI) 1-93

Part and Chapter:	**Part II - COM Appendix 8a - Redacted**	**Page No.:**	**21-22**
Topic:	**Investments**		
Sub Topic:	**OCIO Services Agreement - Active Management**		

Preamble to IR:

In Part II - COM Appendix 8a - Redacted at pages 21-22, WTW's services agreement includes the work below:

Investment Management:

- Quarterly monitoring of investments (performance, risk, attribution analysis, factor analysis) vs. benchmarks and peers;
- Monitoring interest rate risk and credit hedge ratios;
- Annual review of asset classes;
- Review of benchmarks when needed; and
- Monitoring investment managers (performance vs. benchmark & peer groups); and

Strategic Investment Work:

- Advise on the implementation of the investment policy statement (ie: active vs. passive decisions, optimal geographic, sector, factor & style exposures, etc.);
- Based upon a review of investment manager performance in accordance with the manager monitoring policy propose terminations of managers as necessary; and
- Work with internal (ALM Lead) and external resources (fixed income manager) to monitor and report on the effectiveness of MPI's ALM strategy.

Question:

a) Please explain when is the OCIO expected to advise MPI on the implementation of the investment policy statement (i.e., active vs. passive decisions).

Rationale for Question:

To understand if/when the active management program of investments might change under the new OCIO arrangement.

RESPONSE:

a) WTW provides advice through recurring governance activities, including annual policy reviews, quarterly reporting, ALM and risk appetite reviews, capital market assumption development, investment monitoring and ad hoc strategic discussions. As part of the current ALM review, WTW is evaluating strategic questions such as asset allocation, implementation considerations and the balance between active and passive approaches. This work is intended to support MPI's assessment of potential investment strategies and trade-offs. Any advice or recommendations provided by WTW are considered through MPI's governance process, with all investment decisions, policy approvals and implementation activities remaining the responsibility of MPI.

CC (MPI) 1-94

Part and Chapter:	**Part II – COM Appendix 6**	**Page No.:**	
Topic:	**Investments**		
Sub Topic:	**OCIO's Services**		

Preamble to IR:

In PUB Order 156-25, the Public Utilities Board ordered that "MPI shall hold an ALM technical conference by no later than May 1, 2026".[11] The reasoning provided was to "review preliminary findings in the 2026 ALM study period" with the earlier timeframe "to allow sufficient time to incorporate stakeholder feedback."

Questions from the Consumers Coalition and the Coalition of Manitoba Motorcycle Groups (CMMG) were submitted and responded to, forming Part II – COM Appendix 6 on the record of this filing.

Following the April 28, 2026 ALM Technical Conference, the Consumers Coalition and CMMG submitted recommendations to MPI on May 8, 2026.

Question:

a) Please file the jointly issued recommendations submitted to MPI on May 8, 2026.

b) Please provide a narrative as to the usefulness of holding the technical conference before May 1, 2026 and how MPI intends to incorporate the recommendations as stakeholder feedback.

Rationale for Question:

To understand MPI's integration of stakeholder feedback following the ALM technical conference.

[11] PUB Board Order 156-25, order no. 24 at page 140.

REPONSE:

a) See *CC (MPI) 1-94 Attachment A* for the recommendations submitted to MPI on May 8, 2026.

b) The timing of the Technical Conference was outlined in Order No. 156/25, Directive 24 which stated that "MPI shall hold an ALM Technical Conference by not later than May 1, 2026". MPI had suggested to the PUB that it be held in August 2026 but the CC and CMMG both recommended it be held earlier (spring 2026), which meant the only meaningful work underway at the time was with respect to MPI's Risk Appetite.

Notwithstanding this limitation, there are two primary reasons why MPI considered the Technical Conference to be useful:

i. At the time of the October 2025 PUB hearing, MPI had not yet finalized its agreement with WTW. While stakeholders were aware that MPI intended to retain an external consultant, they did not yet know which firm was selected. In MPI's view, the Technical Conference provided an opportunity for stakeholder to meet the WTW team and for the WTW team to explain their approach with the ALM study and answer any other questions the stakeholders may have regarding WTW's relationship with MPI.

ii. As stated, the Technical Conference provided an opportunity for MPI and WTW to present the proposed Risk Appetite to stakeholders and seek feedback in the early stages of the ALM process. This approach allowed MPI to consider stakeholder input prior to proceeding with the ALM study.

MPI and WTW reviewed the feedback provided by stakeholders at the Technical Conference and in subsequent submissions. The feedback is being considered alongside MPI's risk appetite, objectives, governance framework, and technical analysis in the development of the ALM Study which will be provided after the August 12, 2026 Investment Committee meeting.

2026 ALM Technical Conference

Recommendations Submitted on behalf of Consumers Coalition (CC) & the Coalition of Manitoba Motorcycle Groups (CMMG)

May 8, 2026

2026 ALM Technical Conference: 12 Recommendations

Overview 3
Past Recommendations That Remain Unaddressed 4
Ensuring Accountability and Progress by MPI 4
Summary of Recommendations 5
Beliefs → Concerns → Recommendations 8
Belief #1. SUSTAINABILITY 9
Recommendation #1. Return/Risk Definitions for Asset Mix Decision 9
Recommendation #2. Time Horizon for Decision-Making 10
Belief #2. MINIMUM RISK PORTFOLIO 10
Recommendation #3. Liability Risk Modeling 11
Belief #3. ADDITIONAL RISK 11
Recommendation #4. Risk Tolerance (as Distinct from Appetite) 12
Belief #4. TOTAL PORTFOLIO 12
Recommendation #5. Timing of Asset Class Exclusions 13
Belief #5. CONSTRAINTS 13
Recommendation #6. Cost of Constraints 14
Recommendation #7. Cost of Fixed Income Constraints 15
Recommendation #8. Cost of the Duration Constraint 15
Recommendation #9. Cost of the MCT Constraint 16
Belief #6. COST, RISK, AND RETURN PREDICTABILITY 16
Recommendation #10. Break-Even Inflation and US TIPS 16
Other Recommendations 16
SHADOW PORTFOLIOS 16
Recommendation #11. Shadow Portfolios 17
ADDITIONAL OPPORTUNITIES TO PROVIDE FEEDBACK 17
Recommendation #12. Additional Feedback 17

Overview

The submissions and recommendations of the Consumers Coalition (CC) and the Coalition of Manitoba Motorcycle Groups (CMMG), informed by the jointly retained expert on investments Mr. Valter Viola, with respect to the 2026 Asset Liability Management (ALM) Technical Conference are below.

One purpose of the ALM Technical Conference was to "allow for Interveners to provide meaningful feedback to MPI about the study."[1] This document provides feedback informed by Mr. Valter Viola, adopted jointly by CC and CMMG, as a set of 12 recommendations that address our concerns at this early, but important, stage of the ALM Process. MPI stated that it welcomes feedback on "the proposed Risk Appetite, asset class considerations, and overall ALM Framework."[2] As such, these submissions and recommendations address the ALM Framework and Risk Appetite but are more limited with regards to asset class considerations given the early stage of the ALM Process.

Some of these recommendations are not new, in some cases reflecting concerns from as far back as the 2017 GRA.[3] While MPI stated that it "does not believe recommendations made in 2016 are relevant to an ALM Study underway in 2026, being prepared by a different consultant,"[4] a selection of recommendations are still relevant for the following reasons:

1. some past recommendations have not been fully addressed;
2. to ensure accountability and continued progress from MPI in responding to and addressing previous recommendations made by CAC Manitoba and CMMG and accepted by the PUB;[5] and
3. the beliefs upon which prior recommendations were based continue to be robust and relevant today.

As noted by MPI,[6] "MPI retains full responsibility for all strategic decisions, approvals, and implementation;" the OCIO's role "is limited to analysis, advice, and reporting." The recommendations, therefore, are addressed to MPI rather than the OCIO.

While not a formal recommendation, CC and CMMG saw great value in allowing stakeholders to submit questions in advance of the Technical Conference. This important

[6] Source: MPI's response to Q3 submitted by CC and CMMG on March 30, 2026

procedural step resulted in an informed dialogue at the Technical Conference between stakeholders, MPI, and the OCIO. Further, this procedural change coupled with the opportunity for stakeholders to make recommendations has allowed intervenors to better provide meaningful feedback at this early stage, with the objective of enabling the PUB to assess the prudence and reasonableness of MPI's investment portfolio management in the context of the Corporation undertaking its next ALM Study.

Past Recommendations That Remain Unaddressed

One example of a past recommendation that has not been addressed relates to the effectiveness of MPI's duration policy, which has a "dollar duration" matching requirement. This self-imposed constraint increases inflation risk when (nominal) bonds are reduced and (nominal) duration is lengthened to comply with the constraint, given the:

- inflation risk arising from the liabilities; and
- lack of inflation protection in the bonds designated to hedge interest rate risk.

Ensuring Accountability and Progress by MPI

A concern is that, by not implementing past concerns/recommendations, MPI may "reverse course" and revert its strategy to something already addressed. One example of MPI "reversing course" relates to Real Return Bonds (RRBs).

After initially rejecting RRBs, which were shown by Mercer to improve return/risk tradeoffs, MPI began buying RRBs only to halt the program before it was completely implemented.

This "reversal" may be symptomatic of an inconsistent application of a set of prudent and robust investment beliefs over time. It may also reflect overconfidence regarding shorter-term forecasts (e.g., inflation levels and/or volatilities). That is one reason Mr. Viola makes his supporting investment beliefs explicit in his recommendations, noting that it is the beliefs that are key (with consistent recommendations that follow).

Summary of Recommendations

1. *Return/Risk Definitions for Asset Mix Decision*	To inform its long-term asset mix decisions, MPI should define return/risk based on valuations that reflect market values – including those related to the liabilities – rather than accounting ones (which may be materially different).
2. *Time Horizon for Decision-Making*	MPI's time horizon for assessing its risk tolerance, risk appetite, and the relative attractiveness of different asset allocations in the ALM Study should be relatively long (e.g., closer to 10+ years, rather than 5 years).
3. *Liability Risk Modeling*	For purposes of long-term asset allocation decision-making, MPI should continue to "break the link" (recursive) between liability valuations (and the liabilities' risk) and the yield on some of its assets.
4. *Risk Tolerance (as Distinct from Appetite)*	MPI should clearly distinguish between its risk tolerance and its risk appetite, as MPI defines them in the ERM Policy, clarifying its decision to increase (or decrease) the risk it chooses to take as a result of its ALM Study.
5. *Timing of Asset Class Exclusions*	Any decision to exclude key asset classes from the ALM Study should be deferred until their marginal economic impact on the total portfolio has been sufficiently analyzed and assessed.
6. *Cost of Constraints*	The ALM Study should disclose all key constraints, along with their cost (e.g., lower return at a given level of risk). This includes, for example, the cost of excluding (or limiting) asset classes that would otherwise be reasonably considered for inclusion in the ALM Study. e.g., The cost could be quantified as the vertical distance between the efficient curve "with" and "without" the applicable constraint at key risk levels.* * *Key risk levels could include those levels associated with the:* • *current or pre-ALM Study asset mix;* • *lower limit of risk tolerance/appetite; and* • *upper limit of risk tolerance/appetite.*

7. Cost of Fixed Income Constraints	The ALM Study should quantify the cost of any fixed income constraints. At a minimum, the ALM Study should show the effects "with and without" the MUSH Bonds, as well as the "incremental" or stepped effects of taking different types of risk within fixed income, including: • inflation risk (e.g., RRBs/ILBs); • credit risk (e.g., Corporate Bonds); and • liquidity risk (e.g., Private Credit). These effects should "reveal themselves" horizontally (along the risk spectrum or an efficient frontier) as well as vertically (e.g., across different efficient frontiers).
8. Cost of the Duration Constraint	The ALM Study should quantify the cost of the duration policy's constraint. At a minimum, the ALM Study should show how the return/risk tradeoffs as well as the duration (as distinct from dollar duration) at different risk levels for: a) the current dollar-duration matching policy; and b) a policy that has the same duration as the liabilities (e.g., 10).
9. Cost of the MCT Constraint	The ALM Study should quantify the cost of the MCT constraint at key risk levels.
10. Break-Even Inflation and US TIPS	The ALM Study should quantify the "break-even" cost of RRBs (Canadian-issued), as this term is commonly defined in past GRAs, and show the effects of including (and excluding) US TIPS. The ALM Study should disclose the "incremental cost" (e.g., lower yield) that MPI should be indifferent to paying to purchase RRBs, recognizing that any such "one-time" cost could be amortized over the longer term to maturity of these RRBs.

11. Shadow Portfolios	Should the PUB determine that Shadow Portfolios remain relevant and useful, the methodology for selecting any Shadow Portfolios should consider their purpose (established by the PUB in Order 176/19 Directive 13.13) and any input from stakeholders regarding the measurement principles to be used.* * *The methodology for selecting the Shadow Portfolios should be clearly defined and established in advance (i.e., before policy asset allocation decisions are approved as a result of the ALM Study). If simplicity is one principle, the Shadow Portfolio could be defined at the risk level chosen as a result of the ALM Study, which would enable a simple "return difference" as a measure of the performance effect (with no need for a "risk adjustment").*
12. Additional Feedback	Along with the filing of the 2027 GRA, MPI should provide a timeline for the ALM study outlining key milestones and potential opportunities for stakeholders to provide further feedback at key stages. Stakeholders should be given additional opportunities to provide feedback regarding the ALM Study before key milestone have passed.

Beliefs → Concerns → Recommendations

In the 2017 GRA, CAC Manitoba adopted Mr. Valter Viola's recommendations, which were prefaced by describing an "inconvenient truth" which is that "we don't know very much" (in investments) because the signal/noise (return/risk) ratio is low yet we still "need to make investment decisions."[7] This is one reason for making any investment beliefs explicit.

Mr. Viola listed two other "inconvenient truths" (below), from his 2017 GRA evidence.

TRUTH	We don't know very much	Beneficiaries/ owners ≠ managers	Correlations are not perfect
	Low signal/noise (return/risk) ratio	*Institutions manage $ for clients/beneficiaries*	*Risks don't add (1 + 1 ≠ 2)*
Truth and Consequence	We need to make investment decisions but **we don't know very much**	The interests of stakeholders[1] may not be aligned because **beneficiaries/owners are not the same as managers**	The effect of an investment on total portfolio risk depends on the characteristics of other assets in the portfolio because **correlations are not perfect**
HELPFUL TOOLS	BELIEFS[2]	CAPITAL/REGULATORY FRAMEWORK[3]	RISK FRAMEWORK[3]

1. Stakeholders include MPI, rate-payers and Manitoba Finance.
2. Beliefs support long-term portfolio design (e.g., asset mix).
3. Capital/Risk/Regulatory Frameworks provide a focus (clarity in mission) and process to overcome common barriers to excellence.

The fact that "correlations are not perfect" – the third inconvenient truth above – is particularly important at this early stage of the ALM Process. As noted above, "risks don't add," and "the effect of an investment on total portfolio risk depends on the characteristics of other assets in the portfolio because correlations are not perfect." This third truth underscores the importance of **not** rejecting asset classes from further consideration until the ALM process is sufficiently advanced. In other words, it would be imprudent to reject asset classes without considering the marginal impact of capital market assumptions (correlations, volatilities, and returns) in a robust manner. This is a fundamental economic principle, and one that is best applied at a later stage (not when risk appetites are being established).

[7] Source: MPI's Investment Portfolio: Risk, Return and Good Practice by Valter Viola (September 26, 2016) (page 6) at https://www.pubmanitoba.ca/pdf/mpi17/mpi_investment_portfolio_valter_viola_2016_09_26.pdf

The key beliefs that informed Mr. Viola's recommendations are listed below, followed by our concerns and the recommendations addressing those concerns for this ALM Study.

Belief #1. SUSTAINABILITY

The major stakeholder risk is that the current provisions will not be sustainable in the future (recognizing that investment returns are one of many factors which will contribute, positively or negatively, towards sustainability).

Concern: Focus on Accounting "Earnings" (Rather than Economics)

We are concerned that MPI may revert and focus on accounting "earnings" (GAAP/IFRS) and earnings volatility instead of return/risk metrics that reflect market economics.

MPI stated at the Technical Conference that MPI's "earnings risk appetite that we're taking to Risk Committee in June, there's a statement around variance or deviation away from net income, but there's also a -- a statement of return on equity, so relative to surplus."[8]

As a result of the 2017 GRA Recommendations, MPI pivoted away from an "earnings" (accounting-based) definition of return/risk in its ALM Studies to a set of metrics that reflect the underlying "economics" or market-based valuations (i.e., Surplus Volatility, where the economic risks from the liabilities were modeled independently of the asset mix).

In the first (of two) Mercer ALM Studies (filed in the 2017 GRA)[9], MPI adopted a "nominal" – rather than "real" – framework, which essentially ignored the effects of inflation volatility. In the second Mercer ALM Study (filed in the 2023 GRA), MPI adopted a "real" framework, which then addressed a key concern and related recommendation.

Recommendation #1. Return/Risk Definitions for Asset Mix Decision

To inform its long-term asset mix decisions, MPI should define return/risk based on valuations that reflect market values – including those related to the liabilities – rather than accounting ones (which may be materially different).*

* ***This is an adapted version of a recommendation made by Mr. Viola in the 2017 GRA.***

[8] Source: Ms. Satvir Jatana, MPI ALM Technical Conference Transcript (April 28, 2026) at pg 143, lines 16-20.
[9] In the first Mercer (2017/2018) Study, the Liability Benchmark Portfolio was defined in **nominal** terms.

Concern: Focus on the Short Term (at the Expense of the Long Term)

We are concerned that MPI's decision-making is overly focused on the short term, a concern raised by CAC Manitoba in the 2017 GRA:

> "there are grounds to be concerned that the MPI portfolio is inadequately protected against real interest rate risk, and that the Corporation's focus on short-term rate stability comes at the expense of the long-term interests of ratepayers and leads to an acceptance of an excessive level of risk for the return gained, and indeed that the Corporation's selection of risk-return met -- metrics understates the market risk faced by the Corporation."[10]

WTW's presentation at the Technical Conference illustrated results over a five (5) year period, which is a short time horizon, given the longer-term durations of the liabilities (10 years or longer for Basic and EFB). As WTW noted:

> "we spent a fair bit of time … looking at the current structure and at a very high level, considering whether it was actually within kind of the framework of what we were hearing for the key risk metrics you were trying to manage. And that included downside severity, capital adequacy, the ability … to recover if there was negative outcomes … across a wide range of economic scenarios."[11]

Recommendation #2. Time Horizon for Decision-Making

MPI's time horizon for assessing its risk tolerance, risk appetite, and the relative attractiveness of different asset allocations in the ALM Study should be relatively long (e.g., closer to 10+ years, rather than 5 years).

Belief #2. MINIMUM RISK PORTFOLIO

Determining the Minimum Risk Portfolio is the first step towards responsible long-term management of the portfolio.

[10] Source: Mr. Byron Williams, MPI General Rate Application Transcript (November 2, 2016) at pg. 2205, lines 5-6

[11] Source: Mr. Marcus Turner, MPI ALM Investment Technical Conference Transcript (April 28, 2026) at pg 19, lines 7-15

Concern: Potential Fixed Income Bias via Recursive Link of Discount Rate

We are concerned that the metrics that MPI will use to assess return/risk tradeoffs in the ALM Study may be biased to favour certain fixed income asset classes if the outcomes of scenarios reflect a "recursive" link between the liabilities and the assets. As noted in Mr. Viola's 2017 GRA evidence, economic theory suggests "breaking the link" is more appropriate.[12]

In the most recent ALM Studies by Mercer, this recursive link was broken by Mercer's establishment of a Liability Benchmark Portfolio whose composition was unrelated to the asset mix scenarios being simulated.

Our concern was summarized in Mr. Viola's 2019 GRA evidence:

> "While the Liability Benchmark Portfolios break the recursive link between liability valuations and the yield on some assets for asset allocation decision-making, a link may still exist that creates an incentive to concentrate risk within fixed income. That is why this issue is "mostly" addressed. If the yield on the bonds owned is used to value liabilities, there may be an incentive to take more risk in fixed income (e.g., inflation and credit risk, less liquidity) to reduce the valuation of liabilities (higher discount rate). This may result in less diversification, and lower risk-adjusted returns."[13]

Recommendation #3. Liability Risk Modeling

For purposes of long-term asset allocation decision-making, MPI should continue to "break the link" (recursive) between liability valuations (and the liabilities' risk) and the yield on some of its assets.*

* ***This is an adapted version of a recommendation made by Mr. Viola in the 2017 GRA.***

Belief #3. ADDITIONAL RISK

Taking additional risk beyond the Minimum Risk Portfolio should be done only if the expected additional returns justify doing so.

[12] Source: MPI's Investment Portfolio: Risk, Return and Good Practice by Valter Viola (September 26, 2016) (page 11) at https://www.pubmanitoba.ca/pdf/mpi17/mpi_investment_portfolio_valter_viola_2016_09_26.pdf

[13] Source: MPI's Investment Portfolio: Asset/Liability Analysis and Previous Recommendations (Two Revisions), October 3, 2018 (page 24)

Concern: Risk Tolerance (as Distinct from Appetite)

We are concerned that MPI's potential decision to consider a higher risk appetite may be driven by increased "rate pressure," rather than any potentially higher additional risk premia.

> MR. VALTER VIOLA: "... is there something that's happened in the last year that says now ... we're comfortable dialing up risk ... compared, to a year ago? ... that said we can stomach some more?"
>
> MS. SATVIR JATANA: "I would say at the Board level ... we know that there continues to be pressure on the rate and keeping our -- of course our mandate in mind of affordability. ... where there's so much pressure on the rate, you know, vehicle severity continues to climb, the question becomes, you know, how much -- how do you deliver on your affordability and whether there's other instruments that can be leveraged."
>
> "... Hence, ... I would say that's probably the -- one of the main reason." [14]

At this stage of the ALM Process, no capital market assumptions have been disclosed, so it is not clear whether any equity risk premium (compared to a bond or cash reference point) has changed since the last ALM Study.

Recommendation #4. Risk Tolerance (as Distinct from Appetite)

MPI should clearly distinguish between its risk tolerance and its risk appetite, as MPI defines them in the ERM Policy, clarifying its decision to increase (or decrease) the risk it chooses to take as a result of its ALM Study.

Belief #4. TOTAL PORTFOLIO

The additional risk to the Total Portfolio is the relevant risk to consider if risk beyond the Minimum Risk Portfolio is taken.

[14] Source: Mr. Valter Viola, Ms. Satvir Jatana, MPI ALM Investment Technical Conference Transcript (April 28, 2026) at pg 121, lines 6-22

As noted in Mr. Viola's evidence in the 2017 GRA:

> "Together, Beliefs #3 and #4 imply that the attractiveness of any asset class should be assessed, not in isolation, but in the context of the other assets that are in the portfolio or contemplated to be in the portfolio, and the MRP that is defined in Belief #1 and #2."[15]

Concern: Premature Exclusions

While we recognize the importance of establishing prudent controls related to risk ("guardrails"), we are concerned that certain asset classes might be "prematurely" rejected from further consideration for reasons that are inconsistent with the goals and key considerations of the ALM Process and that the cost of doing so could be excessive ("inefficient").

> MR. MARCUS TURNER: "... the Investment Committee knows their investment philosophy and their framework and their guardrails better than any of us. They will presumably be able to tell us, look, do not spend any time on asset class 'X', 'Y'. 'Z'. So, we'll start with the broad list and not be exclusionary and narrow it down to what's pragmatic, and that will drive the outcomes. So, in other words, inflation like [sic] bonds, as an example, if they're included, they wouldn't be looked at in isolation to say let's reduce inflation."[16]

Recommendation #5. Timing of Asset Class Exclusions

Any decision to exclude key asset classes from the ALM Study should be deferred until their marginal economic impact on the total portfolio has been sufficiently analyzed and assessed.

Belief #5. CONSTRAINTS

Constraints never increase expected risk-adjusted returns.

Concern: Costly Constraints

More generally, we are concerned that even well-intentioned constraints, such as "guardrails," may have a high cost. Any material constraints, therefore, should be

[15] Source: MPI's Investment Portfolio: Risk, Return and Good Practice by Valter Viola (September 26, 2016) (page 17) at https://www.pubmanitoba.ca/pdf/mpi17/mpi_investment_portfolio_valter_viola_2016_09_26.pdf

[16] Source: Mr. Marcus Turner, MPI ALM Investment Technical Conference Transcript (April 28, 2026) at pg 148-149, lines 24, 25, 1-9.

disclosed so their costs can be compared to the costs of alternative risk management treatments that might be available.

Recommendation #6. Cost of Constraints

The ALM Study should disclose all key constraints, along with their cost (e.g., lower return at a given level of risk). This includes, for example, the cost of excluding (or limiting) asset classes that would otherwise be reasonably considered for inclusion in the ALM Study.

e.g., The cost could be quantified as the vertical distance between the efficient curve "with" and "without" the applicable constraint at key risk levels.*

* ***Key risk levels could include those levels associated with the:***
  - ***current or pre-ALM Study asset mix;***
  - ***lower limit of risk tolerance/appetite; and***
  - ***upper limit of risk tolerance/appetite.***

Concern: Inflation Risk is Not Fully Integrated in Decision-making

In a response to a written question, MPI indicated that "inflation is considered as part of an integrated assessment of asset liability outcomes rather than as a standalone or dominant driver of decision making."[17]

Despite MPI's assertion we remain concerned that inflation risk is **not** considered as part of an integrated assessment of asset liability outcomes, and that it is a standalone or **less** dominant driver of decision making.

> "Regarding inflation risk, something that we discussed with the working group and that we wanted to do is to split into two (2) categories, which is the inflation risk from PIPP benefits, which is from the liabilities, and also the pricing risk, which come from new money and, also, what we meant by CRCs, the cost for car repairs. And this is more passed through on premiums as, you know, those costs and that inflation regarding that specific economic factor is not that much linked to -- to CPI (INDISCERNIBLE) on its own. So, that's why we wanted to split both of them into a pricing risk and an inflation risk in -- in the liabilities."[18]

[17] Source: MPI's response to Q22 submitted by CC and CMMG on March 30, 2026
[18] Source: Mr. Marc-Philippe Aubuchon, MPI ALM Investment Technical Conference Transcript (April 28, 2026) at pg 24, lines 5-18

Recommendation #7. Cost of Fixed Income Constraints

The ALM Study should quantify the cost of any fixed income constraints.

At a minimum, the ALM Study should show the effects "with and without" the MUSH Bonds, as well as the "incremental" or stepped effects of taking different types of risk within fixed income, including:

- **inflation risk (e.g., RRBs/ILBs);**
- **credit risk (e.g., Corporate Bonds); and**
- **liquidity risk (e.g., Private Credit).**

These effects should "reveal themselves" horizontally (along the risk spectrum or an efficient frontier) as well as vertically (e.g., across different efficient frontiers).

Concern: Interest Rate Risk is a Standalone/Dominant Driver of Decision-making

We are concerned that MPI's duration policy treats interest rate risk as a standalone or dominant driver of decision making and that the dollar-duration matching policy decreases risk-adjusted returns.

Mr. Viola's recommendation that CAC Manitoba adopted from the 2019 GRA reflected our concern:

> "**Duration Policy "Basis" Risk:** Re-examine the effectiveness of the **duration policy**, which uses (nominal) bonds as the basis for matching the inflation and real interest rate sensitivity of Basic and Pension Liabilities, since inflation **volatility** is not zero."[19]

Recommendation #8. Cost of the Duration Constraint

The ALM Study should quantify the cost of the duration policy's constraint.

At a minimum, the ALM Study should show how the return/risk tradeoffs as well as the duration (as distinct from dollar duration) at different risk levels for:

a) **the current dollar-duration matching policy; and**
b) **a policy that has the same duration as the liabilities (e.g., 10).**

[19] Source: MPI's Investment Portfolio: Asset/Liability Analysis and Previous Recommendations (Two Revisions) by Valter Viola (October 3, 2018) (page 6) at https://www.pubmanitoba.ca/v1/proceedings-decisions/appl-current/pubs/2019-mpi-gra/cac-ex/cac-11-2-v-viola-2-corrections-clean.pdf

Concern: Cost of MCT Constraint

We are concerned that the constraints imposed by the MCT methodology are too costly, given the MCT methodology and the inconsistency of MCT risk metrics compared to those that are used in ALM Studies.

Recommendation #9. Cost of the MCT Constraint

The ALM Study should quantify the cost of the MCT constraint at key risk levels.

Belief #6. COST, RISK, AND RETURN PREDICTABILITY

Costs are more predictable than risks and risks are more predictable than returns.

Concern: Overconfidence (Short-termism)?

Recommendation #10. Break-Even Inflation and US TIPS

The ALM Study should quantify the "break-even" cost of RRBs (Canadian-issued), as this term is commonly defined in past GRAs, and show the effects of including (and excluding) US TIPS.

The ALM Study should disclose the "incremental cost" (e.g., lower yield) that MPI should be indifferent to paying to purchase RRBs, recognizing that any such "one-time" cost could be amortized over the longer term to maturity of these RRBs.

Other Recommendations

SHADOW PORTFOLIOS

The following recommendations address some additional concerns and reflect various principles, rather than beliefs per se.

Concern: Relevance and Reliability of Shadow Portfolio Performance

We are concerned that MPI, the PUB, and/or other stakeholders do not have a shared view about the relevance and reliability of the metrics used to assess the performance of the Shadow Portfolios.

Recommendation #11. Shadow Portfolios

Should the PUB determine that Shadow Portfolios remain relevant and useful, the methodology for selecting any Shadow Portfolios should consider their purpose (established by the PUB in Order 176/19 Directive 13.13) and any input from stakeholders regarding the measurement principles to be used.*

* ***The methodology for selecting the Shadow Portfolios should be clearly defined and established in advance (i.e., before policy asset allocation decisions are approved as a result of the ALM Study). If simplicity is one principle, the Shadow Portfolio could be defined at the risk level chosen as a result of the ALM Study, which would enable a simple "return difference" as a measure of the performance effect (with no need for a "risk adjustment").***

ADDITIONAL OPPORTUNITIES TO PROVIDE FEEDBACK

Concern: Additional Opportunities to Provide Feecback

We are concerned by stakeholders' limited opportunities to provide further feedback regarding the ALM Study as it progresses. As noted by Mr. Scarfone "it might behoove MPI to have another technical conference … to update all the Interveners and the PUB and garner even more feedback with respect to the work that's not yet been completed."[20]

Recommendation #12. Additional Feedback

Along with the filing of the 2027 GRA, MPI should provide a timeline for the ALM study outlining key milestones and potential opportunities for stakeholders to provide further feedback at key stages. Stakeholders should be given additional opportunities to provide feedback regarding the ALM Study before key milestone have passed.

Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

LA.1.4 states "In its 2027 GRA, MPI is seeking to recover forecasted initiative expenses of approximately $10.1 million"

Question:

a. If these initiative expenses are not deemed to be recoverable, where does this expense fall/who pays for them?

b. What would the required rate change be if recovery of these initiative expenses were disallowed (broken down by major class)?

Rationale for Question:

To determine the impact and responsibility of initiative expenses.

RESPONSE:

a. The MPI ratemaking process is on a break-even basis based on forecasted claims and expenses. If initiative expenses are not included in the ratemaking process, the expenses will come from the RSR as the Basic line of business is underpriced. Over time, this results in capital deficiency and a capital build application.

b. Please refer to *PUB (MPI) 1-6 part (a)* for the required rate change by major classes if recovery of initiative expenses were disallowed.

7	2029/30	2.54%	n/a	n/a	0.04%	n/a	n/a

Question:

a. What is causing the larger discrepancy in last year's projected DSR upgrade factor for 2025/26 (Figure REV-15)?

b. It appears that the most recent year has the largest difference in the DSR upgrade factor (2025/26(a) in this year's GRA and 2024/25(a) in the 2026 GRA). Does MPI have a plan to improve the estimate for the first projected year? If so, please provide details on possible estimate improvements

Rationale for Question:

To determine the appropriateness of the DSR upgrade factor estimates

RESPONSE:

a) Please note that the indicated 2025/26 DSR upgrade of -0.80% is not comparable to the 0.04% forecast presented in 2026 GRA. This is partly because the indicated result is calculated using the approved 2026/27 DSR discount structure, while the forecast in the 2026 GRA was based on the 2025/26 DSR discounts.

Specifically, MPI determines the 2025/26 DSR upgrade by re-rating the in-force portfolio at two points in time using the approved 2026/27 rate table and DSR discounts. As a result, the indicated -0.80% reflects the movement of drivers through the DSR scale under the updated discount structure. In contrast, the 0.04% forecast was developed using the prior DSR discounts and therefore reflects a different basis.

b) Similar reasoning was discussed in 2026 GRA for 2024/25 on page 13 of *Part X REV 2.2*. The intent of the DSR upgrade component is to capture the impact of natural movements of drivers through the DSR scale, independent of any changes to the DSR discount structure itself.

MPI does not view the difference between the forecasted and indicated DSR upgrades as evidence of a material forecasting deficiency. Rather, the comparison reflects differing underlying discount assumptions. The proposed changes to DSR discounts are typically finalized near the end of the GRA process and are captured as part of MPI's overall rate indication, therefore not fully reflected in the original DSR upgrade forecast. Accordingly, MPI does not currently propose any changes to the DSR upgrade methodology.

Sub Topic:			

Preamble to IR (If Any):

"The rate model does not account for the addition of the new Driver Safety Rating (DSR) level that was introduced by MPI in the 2025 GRA (DSR level +20), given that the population of vehicles is based on the population at November 1, 2025. To account for this, MPI forecasted an additional decrease in revenue from the additional movements not captured in the rate model (e.g., policies moving from DSR +19 to DSR +20). The estimated additional impact is a decrease of 0.85% to the average vehicle premium."

Question:

How is the additional impact of a 0.85% decrease selected?

Rationale for Question:

To understand how the decrease in premium is estimated

RESPONSE:

The additional impact arising from changes in the DSR levels is estimated by first summarizing policy counts by the DSR levels based on the November 1, 2025 population. Policies are then segmented according to their estimated renewal status. Policies that have already renewed into the 2025 rating year require one additional renewal to be fully on-level to the 2026 DSR levels, while policies that have not yet renewed require two renewals.

MPI then applies a transition matrix based on historical year-over-year movements in DSR levels to estimate the expected future distribution of policies across DSR levels. For DSR levels 19 and 20, the transition experience of DSR level 18 was used, as insufficient historical experience exists for levels 19 and 20.

The overall impact from DSR movements is determined by comparing the weighted average DSR discount under the current and projected DSR level distributions. To isolate the impact of the DSR level changes, the effect of natural DSR drift — which is already reflected in the premium trend — is removed. The resulting amount (decrease of 0.85%) represents the selected additional impact attributable to the DSR level changes.

This analysis is performed at the major class level, with impacts calculated separately for each major class and then aggregated to determine the overall impact.

CMMG (MPI) 1-4

Part and Chapter:	**Part VII – Dislocation Reports**		**Page No.:**	**13 of 20**
PUB Approved Issue No:		**2. Ratemaking**		
Topic:		**b. Ratemaking Methodology**		
Sub Topic:				

Preamble to IR (If Any):

"The 3.1% reflects the impact on the rate model population of vehicles (i.e., the population as of November 1, 2025). As discussed in RI.3, the use of a static population will not capture the additional movements for policies moving from DSR +19 to DSR +20. As a result, MPI expects an additional decrease of **– 0.7%**1 in premium revenue by rating year 2027/28 because of changes to the distribution of vehicles by DSR level. The total impact of both the 3.1% and -0.7% is the applied for overall rate change of 2.38% for rating year 2027/28.

"1 Using the DSR simulation model discussed in Revenues REV 2.2 with changes to the vehicle discount yields an overall DSR upgrade factor of -4.6%. The -**1.3%** is the calculated additional impact from DSR simulation and the rate model due to forecasted movements that are not captured by the rate model."

From Part VII – Rate Indication *Page 20 of 36*

"To account for this, MPI forecasted an additional decrease in revenue from the additional movements not captured in the rate model (e.g., policies moving from DSR +19 to DSR +20). The estimated additional impact is a decrease of **0.85%** to the average vehicle premium."

Question:

How do these different impacts of DSR Upgrades reconcile with one another (Figure REV 15 vs -0.85% vs -0.7% vs -1.3%)?

Rationale for Question:

To understand the different figures used for the additional revenue required

RESPONSE:

MPI would like to correct Footnote 1 in the Part VII Dislocation Report chapter. The footnote should read:

> *"[1] Using the DSR simulation model described in Revenue Requirement REV 2.2, incorporating the vehicle discount changes, results in an overall DSR upgrade factor of -**3.01%**. The **-0.7%** represents the additional impact estimated through the DSR simulation model and rate model to account for forecasted movements not captured within the rate model."*

Please note that these percentages measure different impacts and are applied to different bases. Therefore, they are not directly comparable.

- *Figure REV-15* reflects the annual premium trend applied to actual written premiums and is used within the Financial Forecast Models.
- The -0.85% represents the estimated adjustment required to align MPI's rate model, based on the in-force population as at November 1, 2025, with the approved 2026 DSR levels and vehicle discounts.
- The additional -0.7% reflects the estimated adjustment required to align the rate model with the forecasted 2027 DSR levels and vehicle discounts.

These additional adjustments are necessary because the rate model is based on an in-force population that has not yet fully renewed into the approved 2026 DSR levels and vehicle discounts. As a result, MPI must estimate the impacts associated with future DSR level and discount changes that are not yet reflected in the rate model.

CMMG (MPI) 1-5

Part and Chapter:	**Part VI – Claims Forecasting - Redacted**	**Page No.:**	**40 of 95**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

"As the increase in the Basic deductible from $750 to $1,000 reduces each affected Basic forecasted claim by up to $250, MPI recognizes that the severity trend applicable to claims settled at a $1,000 deductible may differ from the severity trend calculated at the prior $750 deductible level. MPI uses the historical data in Figure CF-12 to trend the losses for 2021-2025 to future accident years. This data is used to project the adjustment factor for a $1,000 deductible applicable to each forecasted year, as shown in the table below.

Question:

a) Does the loss trend analysis take into consideration that the data analyzed does not account for the increase in deductible when selecting the trend factor to apply? If so, how?

b) Did MPI do an analysis to estimate the possible difference and impacts of adjusting the historical data before the trend is analyzed? If so, please provide

c) What is the typical impact on trend with an increase in deductible? Does it increase or decrease the trend? Please comment on frequency, severity and loss cost

Rationale for Question:

To evaluate the impact of adjusting the losses for the increase in deductible before the trend analysis.

RESPONSE:

a) Yes, the loss trend analysis adjusts historical losses to the current product level, which reflects the $750 deductible level, prior to selecting the trend factor. The selected trend factors are based on historical losses adjusted to the current product level ($750 deductible). The impact of the planned increase to a $1,000 deductible is not reflected in the trend selection and is instead incorporated through the deductible adjustment factor applied after trending.

b) No, MPI did not perform a separate analysis to estimate the impact of adjusting the historical data for the deductible change prior to conducting the trend analysis.

c) MPI did not perform an analysis of the impact of the deductible increase on the selected trend factors. In general, increases in deductibles are expected to reduce claim frequency and aggregate loss costs, as smaller claims may no longer exceed the deductible threshold. The impact on average claim severity can vary depending on the relative reduction in claim counts and incurred losses. While deductible changes can affect the observed loss distribution, the direction and magnitude of any impact on measured severity trends is case-specific and depends on the underlying claims experience. Accordingly, MPI did not assume that the proposed deductible increase would systematically increase or decrease the selected trend factors and instead reflected the deductible change through a separate deductible adjustment factor.

Part and Chapter:	**Part VI – Claims Forecasting - Redacted**	**Page No.:**	**46 of 95**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

CF.7 Accident Benefits – Personal Care Assistance to CF.9.1 Accident Benefits - Other (Indexed) provides the current selected trends. As these sub-coverages are separated in this year's GRA, no comparison to prior selections is provided

Question:

a) Please provide a combined weighted current selections for coverages that were separated in this GRA so a comparison to prior selections can be made

Rationale for Question:

To evaluate the impact of separating the sub-coverages and implied change in trend selections

RATIONALE FOR REFUSAL TO FULLY ANSWER THE QUESTION:

MPI is unable to provide a directly comparable combined current trend selection for the coverages that were separated in the 2027 GRA.

The current trends were selected separately based on the historical frequency, severity and loss cost experience of each underlying coverage. A weighted average of the separately selected trends would depend on the weighting basis used and would not represent the trend that would result from regression analysis of the combined historical experience.

Similarly, calculating the year-over-year change in the aggregate projected loss cost would not isolate the selected future trend. The projected loss costs reflect the cumulative effect of the selected trend, the changing mix of the underlying coverages, and other applicable forecast adjustments. Comparing that change to the prior combined trend selection could therefore obscure the underlying reasons for differences between the current and prior forecasts.

A directly comparable current selection would require MPI to recombine the historical losses and claim counts and perform the trend analysis and model-selection process on the combined experience. MPI did not perform such an analysis because Personal Care Assistance, Travel and Other (Indexed), and Attempted & Partial Theft and Entire Theft, were separately analyzed and projected in the 2027 GRA to better reflect their distinct claims experience.

CMMG (MPI) 1-7

Part and Chapter:	**Part VIII – REV Appendix 2**	**Page No.:**	**2 of 4**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

"Rate change – Historical overall rate change for Extension is provided in Figure EXP App 2-1. In the 2026 GRA, MPI increased the Basic deductible from $750 to $1,000 and introduced a $750 deductible option under Extension. This change facilitates the transition of customers to the new $750 deductible while maintaining premium neutrality. However, maintaining premium neutrality requires a reduction in profitability in the short term. To gradually return to the previous profitability levels while preventing rate shock for customers, MPI continues to assume a 2% rate increase year on year in the subsequent years.

2026 GRA Part VIII – RI Appendix 3 page 2 of 2 states

Figure RI App 3-2 2026 Product Change Impact

	Projected Avg Premium	Basic $750		Basic $1,000	
Line of Business	Before Rate Change	Avg Premium	Rate Change	Avg Premium	Rate Change
Basic	1,012.88	1,063.59	5.01%	1,033.86	2.07%
Extension $750	0.00	0.00	NA	29.73	NA
Total	1,012.88	1,063.59	5.01%	1,063.59	5.01%

Question:

a. In last year's GRA increasing the Basic Deductible lowered the required premium by $29.73. How does the presented illustration compare with the actual average premium charged for Extension to move back to a $750 deductible for the 2025/26 year?

b. What would be the overall required premium in this year's GRA without the increased in deductible (eg by removing the adjustments made to historical data for the increase in deductible)?

i. What is the increase in total claims cost by major class?

ii. What is the increase in pure premium by major class?

iii. What is the rate change required by major class?

Rationale for Question:

To understand the customer impact of increasing the Basic Deductible to average premiums

RATIONALE FOR REFUSAL TO FULLY ANSWER THE QUESTION:

a) MPI assumes that CMMG is referring to actual results for the 2026/27 rating year. MPI does not believe that providing actual results would be representative of the transfer to Extension and therefore respectfully declines to provide the requested analysis. At present, MPI has only four complete months of actual experience for the 2026/27 rating year, which is insufficient to produce a reliable or representative assessment. In addition, the $29.73 figure was an estimate determined prior to the issuance of the PUB Order and was not based on subsequent actual experience.

   Further and in any event, premiums for the Extension line of business are outside the scope of the PUB's regulatory authority.

b) MPI will not be providing an alternative required premium that excludes the adjustments made to historical data to reflect deductible increases. Completing such an analysis would require significant effort and extensive rework of its claims forecasting and major class allocations, to name a few. Given the complexity of this exercise and the resources required to perform it, MPI does not believe that undertaking this work is feasible or proportionate to the value of the information that would be produced, particularly given that detailed consideration of the Basic deductible increase was an issue in the 2026 GRA.

CMMG (MPI) 1-8

Part and Chapter:	**Part VII – Risk Classification**	**Page No.:**	**17 of 40**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

> "RC.6.3 Motorcycles and Mopeds MPI also assigns motorcycles and mopeds to rate groups based on owner declared values. In 2021/22, the maximum declared value increased from $50,000 to $70,000, prompting MPI to expand the rate group range by introducing rate groups 10 and 11 to supplement the existing range of 0 to 9."

CLEAR assigns rate groups based on loss costs. Loss cost is frequency times severity. Declared value represents the severity component.

Question:

For each year in the last 5 years, please provide:

a) Collision and comprehensive claim counts by declared value ranges/rate group, body style and engine displacement
b) Collision and comprehensive claim amount totals by declared value ranges/rate group, body style and engine displacement
c) Exposure counts by declared value ranges/rate group, body style and engine displacement

Rationale for Question:

To understand the appropriateness of using declared value alone to determine rate group and if frequency varies by declared value.

RESPONSE:

In response to parts (a), (b), and (c), *Appendix 1* provides five years of historical collision claim counts, collision incurred losses before and after adjustment for product change impacts, and earned units, which are used as the exposure measure, for major class 4. The data is summarized by rate group, body style and engine displacement with motorcycle declared value ranges associated with each rate group provided in Table 1-1 in *Appendix 1*.

Basic comprehensive coverage is not available for motorcycles and mopeds; therefore, comprehensive claim counts and incurred losses are not applicable and have not been provided.

CMMG (MPI) 1-9

Part and Chapter:	**Part VII – RC Appendix 6**	**Page No.:**	**3 of 15**
PUB Approved Issue No:	**11. Driver Safety Rating (DSR)**		
Topic:			
Sub Topic:			

Preamble to IR (If Any):

> "MPI did not use the data for merit-eligible motorcycles and merit-eligible motorhomes. These vehicle types are not considered 'typical' because they are insured by a small subset of Manitobans. Further, given their seasonal nature, these vehicle types do not reflect the same risk as vehicles that are used throughout the year. Finally, the riskiness of these vehicle types is different than the more general passenger vehicles and light trucks (e.g., there is a higher proportion of PIPP losses to total losses for motorcycles)1."

Noting that:

- The data uses claims experience for all months of the year and DSR discounts are annual percentages.
- Manitoba population can be broken into different subsets. Exposures in Territory 4 is small, for example.
- Short rate cancellation can account for seasonal use when calculating earned exposures
- DSR discount is applied to total premium, including PIPP

Question:

Please expand why motorcycle data should be excluded from the analysis to determine the DSR indication.

Rationale for Question:

To understand the appropriateness of excluding motorcycles experience when determining DSR discounts

RESPONSE:

As described in *Part VII RC Appendix 6 Section 2.2* in 2027 GRA, motorcycle vehicle types are not considered representative of the broader merit-eligible vehicle population due to their limited exposure, seasonal nature, and distinct risk characteristics.

In particular, motorcycle claim experience differs from that of passenger vehicles and light trucks, including a higher proportion of Personal Injury Protection Plan (PIPP) losses relative to total losses. Further, MPI currently uses one DSR scale for all merit eligible vehicles as prescribed by legislation. The DSR level represents the driving behaviour of an individual, including scenarios where the individual drives multiple classes of vehicles.

As a result, incorporating motorcycle experience into the DSR analysis could introduce vehicle-specific effects that are not representative of the broader merit-eligible population for which the DSR framework is intended.

Question:

How does the 2026 GLM have values for Rate Groups 10 and 11 if they were only introduced in this year's GRA?

Rationale for Question:

To understand the results of the GLM model comparison

RESPONSE:

Rate Groups 10 and 11 were not introduced as part of the current 2027 GRA. Rather, they were introduced in 2021/22 when the maximum declared value threshold was increased from $50,000 to $70,000, as described in *Part VII RC 6.3*. Accordingly, Rate Groups 10 and 11 were already present in the data used to develop the 2026 GLM model.

CMMG (MPI) 1-11

Part and Chapter:	**Part VII – RC Appendix 2b**	**Page No.:**	**5 of 16**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

For the 2027 GRA, DSR is modeled directly as an explanatory variable, following the same approach taken in 2026 GRA. This approach reflects the timing reality that proposed DSR discounts are typically finalized after the rate line relativity analysis. All DSR levels, both positive and negative, are treated as distinct categories without curve fitting. This approach simplifies the modeling process while maintaining alignment with the current structure of MPI's risk classification framework.

Implementation of Order 4/23, Directive 16 moves vehicle discounts one half of the way to the actuarially indicated percentage.

Question:

For the questions below, please comment on the appropriateness of its use in the rate line relativity models, overfitting risk, impact on the signal/lift of other explanatory variables.

a. Please explain why using the entire DSR categories in the GLM are preferred compared to using the current DSR discounts offset?

b. Please explain why using entire DSR categories in the GLM are preferred compared to using an offset of halfway to the DSR indicated discount?

c. Please explain why using the entire DSR categories in the GLM are preferred compared to a curve?

Rationale for Question:

To understand the appropriateness of using DSR as a categorical variable on the GLM model

RESPONSE:

a) MPI did not use the current DSR discounts as offsets in the Rate Line Relativities GLM models. The purpose of including DSR in the GLM is to control for observed differences in driver risk, rather than to reproduce the current discount structure. Using the current discounts as fixed offsets could limit the model's ability to isolate the actual DSR-related risk differences present in the experience data. Any remaining DSR effect could then be attributed to other explanatory variables, potentially biasing the estimated rate group relativities.

   MPI does not believe this approach introduces a material overfitting risk or distorts the estimated effects of other explanatory variables. Rather, inclusion of DSR as an explanatory variable helps reduce potential confounding by ensuring differences in driver risk are appropriately recognized within the model, rather than being attributed to other rating variables.

   As MPI continues its transition toward a more comprehensive GLM-based ratemaking framework, alternative approaches to incorporating DSR, including offsets or other parameterizations, may be considered where appropriate. However, at this stage of implementation, MPI's focus was on producing stable and credible relativity results that remain aligned with the existing ratemaking framework.

b) Please refer to part a).

c) Similar to MPI's response in part a), MPI considered it appropriate to retain DSR as individual categories rather than applying a curve in the Rate Line Relativities

GLM models. Treating DSR levels as distinct categories allows the model to account directly for observed differences in driver risk without imposing a specific functional form on the relationship. While fitting a curve to smooth the DSR discounts may be appropriate for developing an intuitive discount scale, DSR serves as a control variable in the Rate Line Relativities in GLM. Accordingly, MPI considered it more appropriate to use the observed DSR categories directly to ensure DSR related effects are captured within the model rather than reflected in other rating variables.

CMMG (MPI) 1-12

Part and Chapter:	**Part VII – RC Appendix 2b**	**Page No.:**	**14 of 16**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**b. Ratemaking Methodology**		
Sub Topic:			

Preamble to IR (If Any):

DSR (Parameters 17 through 56): The model indicates that the only statistically significant DSR levels are DSR level -20, -13, -12, -8, -4 to 1, 3, 4, 6 and 18. All other DSR level standard errors (%) are above 50%, indicating their coefficient estimates are statistically insignificant or may require the use of other statistical diagnostics to determine their value to the model.

Question:

a. The model indicates that only a subset of DSR levels are significant. Are insignificant DSR levels still included in the final model when determining the rate line relativities?

b. Are other insignificant variables (excluding Accident Year) included when determining the final rate line relativities?

c. If yes to 2 or 3, please comment on the appropriateness of not removing the insignificant variables/categories and keeping them impacts, fit on sample data, statistical tests, model coefficients, impact on the signal/lift of other explanatory variables.

Rationale for Question:

To understand the use of the GLM outputs in the rate line relativity analysis

RESPONSE:

a) and b) Yes.

c) DSR levels and other rating variables (for example Territory 3, 4 and 5) that are not individually statistically significant remain in the final Rate Line Relativities in MPI's Generalized Linear Models (GLM). Variables such as DSR and Territory are included

as control variables to account for differences in risk characteristics and reduce potential confounding effects in the estimation of rate group relativities. The fitted relativities for these variables are conditional on the model specification and are not used directly in ratemaking.

Consistent with the approach used in the 2026 GRA, all relativities, including those that are not individually statistically significant, were retained to align with the current risk classification framework and support comparability between the GLM and Minimum Bias Procedure (MBP) methodologies. In some cases, statistical insignificance may reflect limited volume within a particular category rather than a lack of underlying relationship.

MPI considers this approach appropriate for the 2027 GRA as it supports a smooth transition to GLM-based ratemaking while minimizing customer dislocation and maintaining comparability with the historical MBP approach used in developing rate group relativities. As MPI continues to mature its GLM-based ratemaking framework, it may evaluate opportunities for further refinement and enhancement where appropriate.

CMMG (MPI) 1-13

Part and Chapter:	**Part II – COM Appendix 7**	**Page No.:**	**74 of 153**
PUB Approved Issue No:	**20. Road Safety**		
Topic:	**Motorcycle Collisions**		
Sub Topic:			

Preamble to IR (If Any):

MPI completed a collision analysis of motorcycle collisions which identified certain key findings related to motorcycle collisions.

The purpose of the motorcycle collision analysis was to identify opportunities for collision prevention for motorcyclists through analysis of collisions involving motorcycles.

The motorcycle collision analysis was presented to CMMG in July 2025.

Question:

a. Please file a copy of the motorcycle collision analysis and findings.

b. Since the motorcycle collision analysis has been completed, what changes has MPI made to its road safety strategy for motorcyclists in consideration of the findings of the study?

    i. Where changes have not been made, please identify what plans MPI has to modify or update its road safety strategy for motorcyclists in consideration of the findings of the study?

c. Since the motorcycle collisions analysis has been completed, please identify how MPI has modified messaging to motorcyclists and/or motorists to specifically address the key issues identified in the analysis.

Rationale for Question:

To examine how MPI is adjusting its road safety strategy and messaging in light of findings from the motorcycle collision analysis.

RESPONSE:

a. Please see ***Appendix 1*** for a copy of the Motorcycle Collision Analysis.
Note: The purpose of the motorcycle collision analysis was to identify opportunities to prevent collisions involving motorcyclists through analysis of motorcycle-involved collisions. The analysis was not developed for ratemaking purposes or to assess motorcycle insurance premiums. Therefore, the findings should not be used to draw conclusions regarding ratemaking or motorcycle insurance rates.

b. As the Motorcycle Collision Analysis was completed before the development of MPI's Road Safety Strategy 2030 (RSS 2030), it served as one of many inputs used to inform the Strategy's approach to motorcycle safety.

MPI undertook an extensive engagement process with road safety stakeholders and Manitobans across the province to gather input and insights that helped inform RSS 2030. This work included stakeholder and public surveys, as well as one-on-one meetings with key stakeholders, including the CMMG.

Key insights from those engagements, which aligned with findings from the analysis, included the need to increase motorcycle awareness among all road users, expand access to modernized rider training, improve data sharing and insights, and strengthen collaboration among road safety partners. This feedback helped shape the Strategy's focus on coordinated road safety messaging, education and training, stakeholder engagement, and shared responsibility for improving motorcycle safety in Manitoba.

In response to findings that highlighted the importance of rider training and motorist awareness, as well as stakeholder engagement and discussion at the

2026 Technical Conference, MPI has committed to working with stakeholders to explore enhancements to motorcycle training and to review motorcycle-related content in the Driver's Handbook and other driver education materials.

Motorcycle safety is reflected in RSS 2030 as part of the broader commitment to reducing serious injuries and fatalities for all road users through education, awareness, collaboration, and evidence-based road safety initiatives. RSS 2030 recognizes motorcyclists as vulnerable road users and incorporates motorcycle safety within its shared-responsibility approach to road safety. More specifically:

- *Pillar 1: Building a Culture of Road Safety* - Motorcycle safety is reflected through efforts to increase awareness and understanding of vulnerable road users. This includes promoting safe interactions between motorists and motorcyclists, delivering public education campaigns, and fostering a culture in which all road users recognize their shared responsibility for road safety. RSS 2030 emphasizes education and awareness as key tools for reducing harm on Manitoba roads.

- *Pillar 2: Strengthening Partnerships Through Shared Responsibility* - Stakeholder feedback highlighted the need for stronger coordination, better data sharing, and more consistent road safety messaging. In RSS 2030, motorcycle safety is supported through collaboration with motorcycle interest groups such as the CMMG, rider training providers such as Safety Service Manitoba, law enforcement, municipalities, and other community partners – all of whom participate in the Community Partners in Road Safety Committee. Consistent with RSS 2030's emphasis on shared responsibility and stakeholder engagement, MPI will continue to engage and collaborate with these partners to identify emerging issues, share information, inform road safety initiatives, and support ongoing efforts to reduce motorcycle-related collisions, injuries, and fatalities in Manitoba.

- *Pillar 3: Shaping Safer Driving Behaviours* - This pillar has the most direct connection to motorcycle safety. For motorcyclists, this includes promoting safe riding behaviours, encouraging training and skill development, and expanding access to training opportunities. For drivers, this includes increasing driver awareness of motorcycles on the road through updates to driver education curriculum and training materials such as MPI's Driver's Handbook. This work will be supported by stakeholder collaboration and informed by data and analysis, including findings from MPI's Motorcycle Collision Analysis and analysis of customers' Knowledge Test results related to motorcycles (*see Day 1, Session 1: Review of 2024 Technical Conference Commitments of MPI's 2026 Technical Conference presentation*).

b(i). Not applicable.

c. Following the 2025 completion of the motorcycle collision analysis, MPI reviewed its motorcycle safety communications and adjusted messaging to better address a few collision factors identified through the analysis.

A key finding was that many of the contributing factors of motorcyclist and vehicle collisions shared a common theme: motorists failed to notice, detect, or properly identify motorcyclists in traffic. Based on these findings, and feedback received from CMMG, MPI has put messages like "Look Twice for Motorcyclists" and "See the Rider" into market over the past two years. This messaging encourages motorists to be more aware of motorcycles and to reinforce the presence of a person behind every motorcycle.

For its most recent spring/summer 2026 campaign, MPI worked with CMMG to develop a campaign that featured some of its members—real-life Manitoban riders—to further humanize motorcyclists. MPI values the relationship it has with CMMG and the perspectives shared in helping to develop creative concepts that resonate with both motorists and riders.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Motorcycle Collision Analysis Findings

Overview

Purpose

As stated in the project charter, the purpose of the following analysis is to identify opportunities for collision prevention for motorcyclists through analysis of collisions involving motorcycles.

To achieve this purpose, this analysis assesses the characteristics of collisions involving motorcycles and performs a deep dive into the major contributing factors associated with motorcycle collisions.

Scope

The following points were deemed **in-scope** for this analysis.

- Gather data on relevant motorcycle collisions from 2019-2023 from MPI databases.
- Analyze the types and causes of motorcycle collision by injury status (Physical Damage Only, Injury, Fatality)
- Assess variables that significantly impact injury and fatality motorcycle collisions.
- Share findings with CMMG and integrate subject matter expertise into interpretation of data.
- Provide recommendations on areas to focus on to prevent motorcycle collisions in Manitoba.

The following was deemed **out-of-scope** for this analysis.

- Any analysis or use of the data related to ratemaking or motorcycle insurance premiums. While both MPI and CMMG understand the importance of these areas, we agree that this data and analysis is solely applicable to collision prevention and safety improvements.
- Any potential safety initiatives that arise from this project's findings. This project will be deemed complete once the set of recommendations has been developed.

Based on the above, the following are some high-level characteristics of the data pulled for the following analysis.

- The motorcycle collision data was queried on December 18, 2024, and covers the 2019 - 2023 calendar years. This includes all incidents involving a motorcycle, except incidents classified as "Glass Only" which are chips in glass usually due to small stones.
- The three injury levels used in this analysis are Physical Damage Only (PDO), Injury (Any level of injury except fatality), and Fatal. These injury levels indicate the highest level of injury sustained by a motorcyclist involved in a collision.
- The analysis does not make a distinction between at-fault or not-at-fault collisions. If a motorcyclist is riding too fast for the conditions, the relevance to our situation is not whether this factor would contribute to the motorcyclist being at-fault or not.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Project process

This following is the process taken from initial conception to final analysis.

1. Discussed the upcoming analysis during the 2024 PUB Hearings.
2. MPI and CMMG held a kick-off meeting to discuss the purpose of the analysis, scope of the analysis, and how findings might be used.
3. MPI and CMMG agreed to a project charter.
4. MPI conducted a descriptive analysis to obtain a detailed understanding of the characteristics of collisions involving motorcycles with the intent to identify variables that are of greatest concern in the causes of motorcycle collisions.
5. MPI shared the descriptive analysis with CMMG for review, met to discuss findings, then identified areas for a more detailed analysis.
6. MPI conducted more detailed analysis of agreed-upon areas, developed recommendations, and shared final draft of analysis with CMMG for review.

Recommendations

These are the recommended areas to focus on based on the analysis.

1. Motorcyclists under 30 years of age get into twice as many collisions as motorcyclists between 30 and 59 years of age: 63 versus 32 collisions per 10,000 motorcyclists. Prioritizing the development of a safer riding culture among younger motorcyclists should be a key area of focus.

2. Careless driving is the primary factor in motorcycle collisions and is included in 28% of such incidents. These primarily involve reckless driving behaviours, such as motorcyclists following too closely, changing lanes unsafely, or losing control of the motorcycle. Enhancing education and/or training on increasing awareness of surroundings and handling may help reduce the occurrence of these collisions.

3. Of the collisions involving careless driving, 25% are related to navigating atypical road surface conditions, such as gravel roads, potholes or debris. This includes taking appropriate measures when navigating turns, exit ramps, or slippery surfaces such as dirt, gravel, or sand. However, a more holistic approach is likely required to reduce these instances further. The work of the MTI-CMMG Motorcycle Road Debris Working Group is expected to include recommendations in this area.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Descriptive Characteristics of Motorcycle Collisions

Population Statistics

On average there are 86,393 motorcyclists with active licences in each calendar year from 2019 – 2023, and about 86% of them are male. Note that not all individuals with a valid licence actively own a motorcycle. This analysis focuses on the most frequent types and causes of collisions and is not designed to compare collision rates across groups of motorcyclists. This data and analysis is not appropriate for a rate-based analysis.

In an average year, the number of collisions involving motorcycles is 259, though in 2021 there was a spike in motorcycle collisions of 303.

In any given year, between about 50% to 60% of motorcycle collisions result in an injury.

Demographics

Males make up about 91% of all collisions (93% PDO, 89% Injury, 94% Fatal). Comparing collision rates of males to females indicate that males get into 56% more motorcycle collisions than females.

The youngest motorcyclists (15 – 29 years of age) have collision rates about twice as high as those between 30 – 59 years of age: 63 versus an average of 32 motorcycle collisions per 10,000 motorcyclists in the younger age group compared to those in the older age group, respectively.

Within each age group, more than 50% of collisions result in an injury.

Geographic Distribution of Collisions

Most collisions occur within the Winnipeg area and other highly populated areas surrounding Winnipeg. This pattern holds for both PDO and injury-related collisions. Fatal collisions are discussed in more depth later in this report, but they tend to occur in more rural areas.

Locations with more than ten collisions over the five-year study period include highly populated areas around Winnipeg, the city of Brandon, Thompson, and the Whiteshell.

Temporal Patterns of Collisions

The analysis showed that most collisions occur between June and August, as expected.

Most motorcycle collisions occur on weekends, particularly on Saturdays, and during the afternoon hours. This aligns with the recreational nature of motorcycle riding, as most people ride on weekends.

Weather and Lighting Conditions

Motorcycle collisions tend to occur during clear or cloudy weather, likely due to the recreational nature of riding and the preference for favourable weather conditions.

Nighttime riding is the second most common lighting situation for collisions while the first is daytime riding, but we lack the data required to compare the safety of nighttime to daytime riding. Both have unique hazards and risks. Riding during high traffic periods carries different risks

Box 6300, Winnipeg, MB R3C 4A4 | Ph: 204-985-7000 | Fax: 204-943-9851
C.P. 6300, Winnipeg (MB) R3C 4A4 | Tél. : 204 985-7000 | Téléc. : 204 943-9851

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

compared to riding at night, when it may be more difficult for other vehicles to see motorcyclists on the road.

Major Contributing Factors

MPI records four types of major contributing factors: driver action, environmental condition, human condition, and vehicle condition.

- **Driver Action**: This indicates how the driver was acting at the time of the collision.

  Driver action is the most common reason for collisions. Careless driving, following too closely, and driving too fast for conditions are the top three most common driver actions reported for the motorcyclists involved in the collision.

  Careless driving behaviour is investigated further in the next section.

- **Environmental Condition**: Anything related to the driving environment.

  Common factors include collisions with wild animals (mainly deer) and issues with the driving surface (defects, obstructions, debris).

- **Human Condition**: If the driver's physical condition is inhibited in some way.

  Generally uncommon as a reason for collisions, but when it occurs it is usually distraction or inattention related. Motorcyclists may be more aware of their physical state due to the inherent risks of riding.

- **Vehicle Condition**: If there was something defective with the vehicle.

  This was rarely a significant issue in motorcycle collisions.

Multi-Vehicle Collisions Involving Non-Motorcycle Vehicles

In multi-vehicle collisions with a motorcycle and another type of vehicle, the main factors attributed to the non-motorcycle driver were typically related to driver action, particularly careless driving and lane changing behaviour.

Environmental, human, and vehicle-related contributing factors associated with the other vehicle are not major concerns in motorcycle collisions.

Correlation Between Conviction History and Subsequent Motorcycle Collisions

The correlation analysis explores the relationship between conviction history in one year and collision history in the following year.

For motorcyclists with zero convictions in a calendar year, about 24 motorcyclists out of 10,000 will get into one collision the following year. When considering motorcyclists with one conviction, about 52 out of 10,000 will get into one collision the following year.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

There is an increasing trend in the number of collisions for motorcyclists with two or more convictions in the previous year. However, this should be interpreted cautiously due to the small number of collisions, as this leads to lower confidence in the estimates.

Investigating Causes of Motorcycle Collisions

Information from 1,306 motorcycle claims for incidents which occurred between 2019-2023 is analyzed further. Of all the claims considered, there are 707 single vehicle claims and 599 multi-vehicle claims. The summaries below are reported at the claim level, with each count or collision count representing a single filed claim.

Careless Driving

A number of different factors can contribute to the cause of a collision, one of which MPI refers to as careless driving. All 361 single and multi-vehicle collision claims recorded as careless driving are considered. The two most prevalent themes attributed to careless driving claims include driver action and road surface conditions.

The most prevalent categories within driver action are driver behaviour and losing control. Different driver behaviours account for collisions which involve factors within the motorcyclist's control, such as following a vehicle too closely or changing lanes unsafely. These are present in approximately 30% of careless driving claims. A motorcyclist losing control can be associated with about 18% of the careless driving claims studied. The 64 claims where a motorcyclist lost control of their motorcycle were investigated further. While there were a number of codes assigned to these claims, approximately 25% of claims where a motorcyclist lost control were related to behaviour taken while approaching a corner, turn, or exit ramp. Furthermore, 19% of instances where a motorcyclist lost control can be attributed to the motorcyclist losing their balance or there being some form of operator error, such as hitting the throttle instead of the brakes.

Across all careless driving claims, different road surface conditions accounted for approximately 25% of scenarios a motorcyclist encountered. These include instances where a motorcyclist comes across loose gravel/sand, which was the most common road surface condition and was a factor in 19% of careless driving claims.

Environmental and vehicular conditions are also considered; however, they are factors in less than 10% of these careless driving claims. Environmental conditions include circumstances such as slippery road surface, obstructions or debris in roadway, and the wind.

Avoiding Action

There are several reasons why a motorcyclist might take action to avoid a collision. This could involve, but is not limited to, avoiding third-party vehicles, poor road surface conditions, wildlife, or domestic animals. A total of 24 collisions in the data utilized for this project were initially recorded in the traffic accident report as motorcyclists avoiding action, including 20 single vehicle and 4 multi-vehicle collisions. The accident detail text was reviewed for all 707 single vehicle claims to determine if more accidents may have involved the motorcyclist taking avoiding action, in addition to the 20 initially coded as such. It was determined that the motorcyclist was taking avoiding action in 56 additional single-vehicle claims. In total, 80 claims in the study involved a motorcyclist taking avoiding action – 76 single-vehicle and 4 multi-vehicle claims.

Box 6300, Winnipeg, MB R3C 4A4 | Ph: 204-985-7000 | Fax: 204-943-9851
C.P. 6300, Winnipeg (MB) R3C 4A4 | Tél. : 204 985-7000 | Téléc. : 204 943-9851

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Motorcyclists tried to avoid third party vehicles who cut them off in about 15% of these 80 claims. In fact, 50% of the 80 avoiding action claims were the result of motorcyclists avoiding a third-party vehicle. Approximately 33% of the avoidance claims were due to motorcyclists attempting to avoid wildlife, primarily deer.

Collision Configuration: 'Other'

Each claim is assigned a specific collision configuration to illustrate how the collision occurred. There are 16 different collision configurations recognized by MPI such as rear end, head on and side swipe. If a collision does not match any of the 16 pre-defined configurations, it is assigned a collision configuration of 'other': 664 collisions reported from 2019 – 2023 met these criteria.

A summary of the claim perils for these 664 collisions based on injury status can be found in Table 2. It is clear that the vast majority of claims were recorded as a collision, rather than a collision with a domestic animal or wildlife. Collisions with wildlife represent a much larger proportion of these claims than collisions with a domestic animal, accounting for about 18% of claims recorded with a collision configuration of 'other'.

Table 2: Summary of claim perils for collisions with a configuration of "other": physical damage only (PDO).

	Claim Peril			
Claim	**Collision**	**Collision With Domestic Animal**	**Collision With Wildlife**	**Total**
Fatal	13	0	1	14
Injury	276	4	62	342
PDO	247	3	58	308
Grand Total	**536**	**7**	**121**	**664**

Fatalities

Of all the claims reviewed, 17 involved a fatality, and the analysis identified two primary themes. First, a third-party (TP) vehicle was involved in 7 (41%) of these 17 claims. These incidents were largely attributed to a lack of awareness or poor judgment on the part of the TP vehicle driver, resulting in 5 out of the 7 fatal collisions involving TP vehicles. Most of these occurred at highway intersections.

The second theme, accounting for 35% of the fatalities, involved motorcyclists losing control of their vehicles. These single-vehicle collisions typically occurred on roadway curves, where motorcyclists lost control, veered into a ditch, and were ejected from their motorcycles.

While road surface and environmental conditions occasionally contributed to fatalities, the vast majority were linked to driver behaviour. Most fatalities resulted from poor judgement by the TP or the motorcyclist losing control – both linked to driver behaviour and decision-making. In fact, these were the most prevalent factors found within careless driving claims, which were discussed in detail earlier, and 7 fatalities were recorded with careless driving as a major contributing factor.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Table 3: Summary of factors in incidents with fatalities[1]

Factor	Number of Claims
Collision with TP Vehicle (multi-vehicle collision)	**7**
FP hit TP vehicle	4
TP crossed intersection before safe to do so	2
TP failed to stop at stop sign	1
FP passed TP vehicle using oncoming lane, TP turned left in front of motorcycle	1
FP hit by TP vehicle	3
FP crossed intersection before safe to do so	1
Head on – TP changed lanes improperly while turning	1
Read end – TP failed to stop for traffic stalled for highway construction	1
FP Lost Control (single-vehicle collision)	**6**

Drove into ditch	2
Collided with cement culvert	1
Passing TP	1
BAC beyond limit (collided with median)	1
Drifted into ditch	1
Road Surface Conditions	**2**
Loose gravel	2
Environmental Conditions	**1**
Mud (FP was hit by TP after falling in oncoming traffic lane)	1
Wildlife	**1**
Deer	1
Grand Total	**17**

Recommendations

These are the recommended areas to focus on based on the analysis.

1. Motorcyclists under 30 years of age get into twice as many collisions as motorcyclists between 30 and 59 years of age: 63 versus 32 collisions per 10,000 motorcyclists. Prioritizing the development of a safer riding culture among younger motorcyclists should be a key area of focus.

2. Careless driving is the primary factor in motorcycle collisions and is included in 28% of such incidents. These primarily involve reckless driving behaviours, such as motorcyclists following too closely, changing lanes unsafely, or losing control of the motorcycle. Enhancing education and/or training on increasing awareness of surroundings and handling may help reduce the occurrence of these collisions.

[1] blood alcohol concentration (BAC); first-party (FP); third-party (TP). FP refers to the motorcyclist.

Part and Chapter:	**Part II – COM Appendix 7**	**Page No.:**	
PUB Approved Issue No:	**20. Road Safety**		
Topic:	**Motorcycle fatalities**		
Sub Topic:			

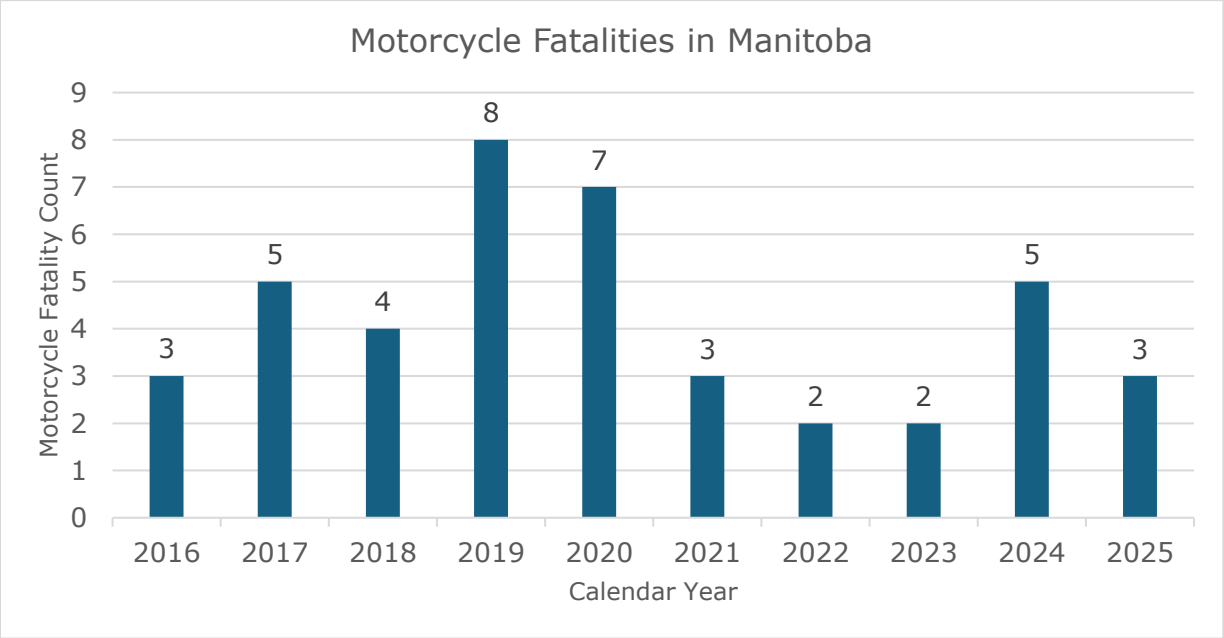
Preamble to IR (If Any):

Question:

a. Please provide a chart identifying motorcycle collision fatalities over the last 10 years.

b. Please identify how many motorcycle fatalities have occurred in 2026 to date.

c. Please provide a narrative discussion of motorcycle fatalities over the last 10 years and any underlying reasons for fluctuations that MPI is able to identify.



Rationale for Question:

To examine rates of motorcycle fatalities on Manitoba Roads.

RESPONSE:

a. The figure below shows the number of motorcycle collision fatalities in Manitoba for the 10-year period from 2016 to 2025. These counts may differ slightly from previously reported figures, due to ongoing collision investigations and subsequent data updates.

Figure 1 Motorcycle Fatalities in Manitoba

b. Between January 1 and July 15, 2026, a total of six motorcycle fatalities in Manitoba were reported to MPI.

c. Motorcycle fatalities continue to be a road safety concern due to the vulnerability of motorcyclists and the severity of outcomes when collisions occur. Between 2016 and 2025, 42 motorcycle collision fatalities were reported in Manitoba. Annual fatalities fluctuated from a high of eight fatalities in 2019 to two fatalities in both 2022 and 2023 (see ***Figure 1*** above).

MPI's analysis of fatal motorcycle collisions occurring between 2019 and 2023 identified human behaviour as a contributing factor in most fatal motorcycle collisions. Two common collision scenarios were observed:

1) Collisions involving another vehicle (41%), which frequently occurred at highway intersections.
2) Loss of control by the motorcyclist (35%), which often occurred on curves where the rider left the roadway and was ejected from the motorcycle.

Fatal motorcycle collisions were more likely to occur in rural areas and during the summer riding season, particularly in June and July. Of all 17 fatalities recorded during this period, careless driving (7), driver judgement errors (7), and loss of control (6) were identified as key contributing factors. Road surface conditions and wildlife-related events were identified less frequently but were contributing factors in some collisions.

Variations in riding exposure, traffic volumes, weather conditions, and the occurrence of severe collision events likely contribute to the fluctuations in annual motorcycle fatality counts.

While collision analysis can identify common characteristics and contributing factors associated with fatal motorcycle collisions, caution should be exercised when interpreting year-to-year changes due to the small sample size. With relatively few fatalities each year, even minor changes in the number of cases can result in noticeable fluctuations, making it difficult to attribute changes to any single factor.

CMMG (MPI) 1-15

Part and Chapter:	**Part II – COM Appendix 7**	**Page No.:**	**Pg 67 of 153**
PUB Approved Issue No:	**20. Road Safety**		
Topic:	**Driver Training/Motorcycle Training**		
Sub Topic:			

Preamble to IR (If Any):

MPI has identified that a main focus of the Road Safety Strategy is creating a culture of road safety in Manitoba. One Pillar of the Road Safety Strategy is "Shaping Safer Driver Behaviours' where reference is made to modernizing the training curriculum including the Driver's Handbook.

Question:

a. Please confirm that MPI has plans to update driver curriculum and the driver training handbook (both for private passenger vehicles and motorcycles) in response to the findings from the motorcycle collision analysis.

b. Please provide an expected timeline for updates to the curriculum and handbook.

Rationale for Question:

To understand how MPI intends to implement the findings from the motorcycle collision analysis into driver training and curriculum development.

RESPONSE:

a) MPI has plans to update its Driver's Handbook, including content related to both private passenger vehicles and motorcycles. Work on the handbook review and update is expected to begin in the current fiscal year.

While the planned updates are not being undertaken solely in response to the motorcycle collision analysis, the findings from that analysis will help inform the

review process and the consideration of potential enhancements to driver education materials.

Stakeholder engagement will be an important part of the handbook review and update process to help ensure the materials reflect current safety priorities, user needs, and best practices.

b) Foundational work for the updates to the Driver's Handbook is expected to begin during the current fiscal year. The scope of the review will be determined as the project progresses. At this time, MPI has not finalized the specific form or extent of the changes that may result from the review, nor has it established a formal timeline for the completion of the work.

CMMG (MPI) 1-16

Part and Chapter:	**Part VIII – EXP Appendix 14**	**Page No.:**	**1 - 4**
PUB Approved Issue No:	**20. Road Safety**		
Topic:	**Road Safety Budget**		
Sub Topic:			

Preamble to IR (If Any):

The historic Road Safety Programs costs demonstrate that MPI has underspent on Road Safety programs as compared to the budgeted amount in every year since the 2021 – 2022 year.

MPI has spent an average of 10.7M on road safety from 2022-2026. This is despite budgetary allowances of over 14 M in some years.

Question:

a. Has MPI reduced the forecast budget for road safety based on historical underspending?

b. Please provide a narrative discussion examining the Corporation's history of underspending on road safety issues as compared to the forecast amount.

c. Please identify what happens to road safety budget that is not spent (IE is it re-distributed to other basic expenses, or is it held for future road safety initiatives?)

Rationale for Question:

To examine MPI's Road Safety budget and historic spending.

RESPONSE:

a) MPI has not reduced the overall forecast budget for Road Safety based solely on historical underspending. MPI's forecast reflects the planned program delivery and expected level of expenditures required to deliver the Road Safety Strategy over the forecast period.

Historical underspending is considered in the forecasting process, but it is not applied mechanically as a reduction to the Road Safety forecast. MPI reviews prior actual spending, known program requirements, expected timing of initiatives, and planned strategy actions when developing the forecast. In some cases, forecast amounts are reallocated between program lines to better align spending with updated priorities or delivery plans.

b) MPI acknowledges a history of underspending on road safety issues as compared to the forecast amount. The recurring underspend is primarily attributable to the nature of Road Safety spending relating to direct program activity rather than fixed departmental costs. These direct program expenditures depend on the timing of program launches, partner delivery, procurement, program development, evaluation work, and the scope of initiatives able to be implemented in a given year. Where initiatives are delayed, revised, delivered through a different approach, or completed at a lower cost than forecast, actual spending has been lower than budget.

The current forecast reflects MPI's planned Road Safety activities and its new Road Safety Strategy. The 2026 Road Safety Technical Conference materials (filed) explain that MPI's Road Safety budget is aligned to support delivery of the Road Safety Strategy, with spending focused on the behaviours contributing most to serious collisions, including impairment, distraction and careless driving, speed, and occupant restraints, as well as communities and road users most exposed to harm, including new drivers, vulnerable road users, and First Nations communities. The forecast reflects planned program delivery, stakeholder-informed priorities, and the expected cost of delivering Road Safety initiatives over the forecast period. This is consistent with MPI's

prior evidence that Road Safety spending is dynamic and that future spending is adjusted as programs change.

c) Unspent amounts are reflected in actual results for the applicable fiscal year and are not carried forward. If a Road Safety initiative is delayed, deferred, or revised, the related future-year budget requirement is considered through the normal annual zero-based budget process.

Consumers Coalition (CC)

MANITOBA
PUBLIC INSURANCE

CC/MPI CI 1-2

Part and Chapter:	**Part V — Information Technology - Confidential**	**Page No.:**	**13**
Topic:	**Modernized the Workforce**		
Sub Topic:			

Preamble to IR (If Any):

In Part V – Information Technology – Confidential at page 13 it states:

"Modernized the Workforce: Aligned internal capabilities with the demands of a rapidly evolving technology landscape."

Question:

a) In general terms, please provide a narrative discussion describing the process and activities executed resulting in a 'modernized workforce' for MPI.
b) Please describe MPI's success in hiring IT talent and expertise when required to implement and manage MPI's required technologies.

Rationale for Question:

To better understand how MPI modernized its workforce to meet the technological challenges facing MPI.

Response:

a) MPI's workforce modernization efforts focused on enhancing the skills and capabilities of existing staff to align with evolving technology requirements. Using an industry-recognized skills framework, employees assessed their current competencies, identified development opportunities, and established targeted

learning plans. These activities supported workforce planning, helped address capability gaps, and strengthened MPI's ability to support current and future technology initiatives.

b) MPI's approach has focused on ensuring access to the technology skills and expertise required to support its operations through a combination of workforce development, recruitment, and external partnerships. The primary emphasis has been on developing internal capabilities through structured learning and upskilling programs, while leveraging external expertise where specialized knowledge or additional capacity is required. This approach has enabled MPI to maintain the capabilities needed to support and advance its technology environment.

Attention: Jennifer Dubois, Associate Secretary

Dear Ms. Dubois:

RE: Manitoba Public Insurance Corporation (MPI) 2027 General Rate Application (GRA) – MPI Exhibits #29, #30 and #31

Please find enclosed the following MPI Exhibits:

Exhibit #29	Blackline and Clean version of CC (MPI) 1-88
Exhibit #30	CC (MPI) 1-88 Appendix 1 – Q1 2026/27 BRM Report
Exhibit #31	MPI responses to Round Two Information Requests

MPI has provided confidential responses to certain Round Two Information Requests where the response contains commercially sensitive, personal, or otherwise confidential information. Where applicable, MPI has filed redacted public versions of those responses as part of MPI Exhibit #31, with the corresponding confidential materials provided to the PUB and approved parties in accordance with the Board's confidentiality procedure.

MPI filed the Annual Business Plan (Part XI SFR Appendix 3) as Exhibit #19, Part IX Asset Liability Management Chapter as Exhibit #24, and Part V IT Attachment A – Gartner IT Benchmarking Report as Exhibit #26.

The following supplemental filings remain outstanding:

- FCT Report – anticipated September 2026
- Quarterly Financial Statements (SFR Appendix 2) – anticipated early October 2026
- Annual Report (SFR Appendix 1) – anticipated early October 2026

PUBLIC INSURANCE

PUB (MPI) 2-1

Part and Chapter:		**R1 Qn. No.:**	**PUB (MPI) 1-1**
PUB Approved Issue No:	**1. Requested vehicle rate and any changes to other fees and discounts**		
Topic:			
Sub Topic:			

Preamble to IR (If Any):

MPI provided excerpts of Board of Directors, Investment Committee and Audit Committee minutes on relevant topics.

In the Risk Committee minutes dated March 18, 2025, Agenda Item 2.3 Risk Appetite Statement, it was RESOLVED that the Members recommend that the Board of Directors approve the proposed Risk Appetite Statement as presented with the following changes:

1. Earnings Risk, Solvency Risk, and Reputation Risk are not being recommended to be approved at this time;

In the Board of Directors meeting dated March 25, 2026, item 26-038 was

C. Ostapowich presented Agenda Item 3.1 2027 Preliminary Rate Indication Basic & Extension

In the Board of Directors meeting dated May 27, 2026, item 26-085 was

C. Ostapowich and S. Kauk presented Agenda Item 2.2 General Rate Application

Item #8 of the resolution was rescinded per resolution indexed as 26-117 of the June 24, 2026 Board of Directors meeting.

Subsequent to the filing of the initial GRA, several data errors were noted, particularly:

A reserve imbalance of approximately $10 million with an amended RMO-1 and supporting documentation filed in MPI Exhibit 8; and

Acquisition expenses were inadvertently omitted from operating expenses, resulting in an understatement of $6.7 million of undiscounted costs, as documented in MPI Exhibit 9. The correction of this error increased the rate indication from +2.38% to 2.86%.

Question:

a) With regards to Agenda Item 2.3:

   a. Please provide an explanation with regards to why Earnings Risk, Solvency Risk and Reputation Risk were not being recommended to be approved at that time.

b) With regards to Item 26-038:

   a. Please indicate the basis of the preliminary rate indication for Basic. For example, what data was used, what simplifying assumptions were made.

c) With regards to Item 26-085:

   a. Please provide the relevant minutes from the June 24, 2026 Board of Directors meeting.

   b. Please file a copy of any analysis or presentations prepared related to the proposed rate change approved by the MPI Board.

d) With regards to the two errors noted in the preamble, please provide any minutes from the Board of Directors meeting relevant to the errors.

e) Please provide any minutes from Board of Directors etcetera meetings from June 2026 to current that are relevant for the issues mentioned in PUB (MPI) 1-1.

Rationale for Question:

To gain greater insight into the above matters.

RESPONSE:

a) A comprehensive Risk Appetite Statement (RAS) review was completed and approved in two phases.

The first phase was approved on March 25, 2026, and included the Strategy, Technology, People, Legal and Compliance, and Operational risk appetite categories. The Reputation risk category was also reviewed during this phase. The Earnings and Solvency risk categories were deferred for further stakeholder engagement and were not included in this review.

The second phase was approved on June 24, 2026 and focused on the Earnings and Solvency risk categories following additional consultation and review with relevant stakeholders. The June revisions also reflected Board feedback arising from the March review of the Reputation risk appetite category.

b) The preliminary rate indication was based on the following assumptions:

- Unallocated Loss Adjustment Expense (ULAE) ratio consistent with ULAE ratio used in 2026 PUB Order of 13%.
- An updated claims forecast based on Google mobility data and a September valuation.
- Payment patterns were updated to reflect the September valuation.
- Additional revenue revised to be subtracted from claims costs prior to the application of variable expenses.
- Update to new money yield of 4.40% based on January 31, 2026.
- Updated premium trend based on November 2025 In-Force policies.

c) Please refer to *CC CI (MPI) 1-8 Appendices 1 and 2 – Confidential*.

d) Please refer to *Appendix 1* for the material presented to MPI's Board of Directors on August 19, 2026. The meeting minute is scheduled to be reviewed and approved at its next meeting, on September 23, 2026.

e) Please see *Appendix 2* for related minutes from the following meetings:

- Technology Committee – May 20, 2026

- Investment Committee – June 17/26

- BoD – June 24/26.

2. Legal, Risk and Compliance Update

GRA Update

$10.1 M Imbalance in EDW and BI3

A $10.1 million imbalance between the Enterprise Data Warehouse (EDW) and BI3 was identified by the Claims division during a routine operational review of a claim in late May 2026. The discovery prompted a comprehensive investigation and reconciliation of all reserves recorded in both EDW and BI3. Due to the time required to understand, investigate, and quantify the issue, it was not identified early enough to assess its impact on rate allocations, and the resulting implications were not included in the original General Rate Application (GRA).

The investigation identified two isolated system issues that caused reserve changes to be recorded correctly in BI3 but not transmitted properly to EDW. A full reconciliation of all open and closed claims confirmed that the total imbalance was limited to $10.1 million, of which approximately $8.5 million (85%) related to three claims. As every claim was reviewed as part of the reconciliation process, MPI has confirmed that $10.1 million represents the full extent of the imbalance. The imbalance spans multiple loss years because it arose from reserve change transactions on open claims; however, the transactions themselves occurred during the 2025/26 loss year.

The root causes of both system issues have been identified, and corrective system changes have been implemented. Testing protocols have also been enhanced to include these uncommon scenarios in future system testing. Because the issue was detected through operational processes rather than an automated control, MPI has implemented a monthly reconciliation process to address the control gap. In addition, Data & Analytics will establish a formal communication process to ensure timely awareness across the data community when data issues affecting EDW or other data sources are identified, assessed, or resolved.

The actuarial team was not informed of the imbalance until June 24, 2026, the date the application was filed. As a result, the original GRA submission incorporated analyses that reflected the imbalance. Therefore, MPI filed amendmended documentation.

Although the imbalance did not affect MPI's overall indicated rate change, as ultimate losses were derived using a paid-loss methodology, it did affect the allocation of indicated rate changes among major classes. Specifically,

loss costs for Income Replacement Indemnity (IRI) coverage were overstated for Major Classes 1 and 3.

To correct the imbalance, MPI manually adjusted the incurred losses associated with the three claims responsible for approximately $8.5 million of the total discrepancy. Of these claims, only one affected the allocation of costs among major classes. A second claim arose from an accident that occurred prior to 2012 and therefore fell outside the experience period used in the analysis. The third claim involved an unidentifiable vehicle and consequently affected only MPI's pooled claims experience.

Pursuant to PUB Order 97/05, when an accident involves only MPI-insured vehicle(s) and no other injured party, total Personal Injury Protection Plan (PIPP) costs must be allocated equally on a per-vehicle basis across the rating categories of the involved vehicles. Consistent with this requirement, MPI allocated the imbalance equally between the vehicles involved in the claim, which belonged to Major Classes 1 and 3.
The imbalance also affected the calculation of major class relativities. However, given the relatively small size of the adjustment and the mitigating effect of credibility weighting within the relativity methodology, MPI did not revise the major class relativities.

Operating Expenses Calculation Error

On July 27, 2026, MPI made the PUB aware that MPI had discovered an error in the calculation of its Operating Expenses when preparing the rate indication. The error was discovered when responding to Information Requests. Acquisition expenses of $6.7 million were inadvertently omitted when the rating algorithm was updated to reintroduce initiative expenses (which had not been included since the 2023 GRA under PUB order). When the spreadsheet formula was revised, the step required to add acquisition expenses was not performed.

MPI presented this to the PUB as human error. The impact of this error was approximately 48 basis points and would have increased the rate indication from 2.38% to 2.86%.

MPI proposed to the PUB that the GRA not be formally amended given that Round 1 Information Requests had already been received and suggested instead that it be treated as a known underpricing for the 2027-28 rating year, and should the estimate prove correct, the Rate Stabilization Reserve would respond, i.e., MPI would not seek recovery of the $6.7 million in the 2028 GRA.

The PUB agreed but asked that certain documents be filed to show the impact of the error on the rate indication. On August 6, 2026, with its

26-117 **Minutes of the May 27, 2026, Board of Directors Meeting**

The minutes of the meetings of the Board of Directors held on May 27, 2026, were distributed to the Members prior to the meeting. Since drafted, Management has received information that results in changes to the minutes.

UPON MOTION duly proposed, seconded and unanimously carried, it was

RESOLVED that the minutes of the Board of Directors meeting held on May 27, 2026, are hereby approved, with the following revisions:

(a) The original draft minute documented for Agenda Item 4.4, noted that C. Wong, provided the report on the outstanding items from the March 17, 2026, Investment Committee meeting.

The minute will be revised and corrected to reflect that *M. McLaren provided the report on the outstanding items from March 17, 2026, Investment Committee meeting.*

(b) The original draft minute documented for Agenda item 2.2 General Rate Application:

Board of Directors Meeting
MINUTES

UPON MOTION *duly proposed, seconded and unanimously carried, it was*

RESOLVED *that the Members authorize Management to request approval by the Public Utilities Board (PUB) the following relief in the 2027 General Rate Application:*

1. *in accordance with accepted actuarial practice, an overall rate increase of 2.38% for compulsory automobile insurance provided through the Basic line of business;*

2. *in compliance with PUB Order 156/25, Directive 10, movement of all DSR discounts one-half of the way toward their actuarially indicated discounts for each DSR level and then rounded down to the nearest whole number, with base rates adjusted to off-balance these changes;*

3. *further expansion of the CLEAR rate groups (46 – 50), with maximum upward movement capping of +2;*

4. *notwithstanding PUB Order 156/25, Directive 7, to include approximately $10.1M of initiative expenses in the 2027 GRA;*

5. *in compliance with PUB Order 30/26, Review of Directive 7 (Continued Deferral of Integration Costs), to seek recovery of certain forecasted initiative expenses, i.e., those initiatives that meet the prudency test in the context of a rate-regulated entity, initiatives that are useful or being used;*

6. *readvance proposal from last year that the RDA balance (not including $10.1M of initiative expenses sought this year for recovery in rates) are no longer of any value and therefore not recoverable from basic customers,*

7. *as supported by the financial forecast, no capital build or rebate provision because, on March 31, 2026, the balance of the Rate Stabilization Reserve was at a*

PUB (MPI) 2-2

Part and Chapter:	**Part VII – Rate Indication**	**R1 Qn. No.:**	**PUB (MPI) 1-4** **PUB (MPI) 1-66** **PUB (MPI) 1-67**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Data Error**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-4c)

The valuation of Accident Benefits reserves and ultimate loss estimates is based on a paid claims methodology. As paid methodologies rely exclusively on paid claims data, the case reserve imbalance did not affect the resulting reserves or the ultimate loss estimates.

PUB (MPI) 1-66 with regards to Weekly Indemnity and PUB (MPI) 1-67 with regards to Accident Benefits Other - Indexed

Ultimate Selection: The ultimate losses for the three most recent insurance years were selected based on the higher of the incurred and paid Bornhuetter-Ferguson (B/F) methods, reflecting increased uncertainty associated with immature accident years.

MPI Exhibit 8

MPI acknowledges that the imbalance also affects the calculation of major class relativities. However, given the relatively small size of the adjustment and the mitigating effect of credibility weighting within the relativity methodology, MPI has not revised the major class relativities presented in Part VII Risk Classification, RC Appendix 4.

Question:

a) Please confirm that the external actuary is aware of the error and has determined that it is not material to his valuation.

b) Please reconcile between the response to 1-4 with regards to the use of a paid methodology, and the response to 1-66 and 1-67 with regards to the use of the higher of the incurred and paid Bornhuetter Ferguson.

c) Please confirm that the corrected data in MPI Exhibit 8 can be incorporated in the Compliance filing for the Major Class relativities.

Rationale for Question:

To better understand the impacts of the error.

RESPONSE:

a) The external actuary is aware of the error and has confirmed that it is not material to the valuation.

b) Information requests 1-66 and 1-67 compare the increase in the ultimate loss between GRA 2026 and GRA 2027, which is equivalent to comparing the ultimate loss estimates from the September 2024 valuation and the December 2025 valuation. Across these valuation dates, the ultimate losses were estimated using the higher of the incurred and paid Bornhuetter-Ferguson methods. The paid Cape Cod methodology referenced in information request 1-4 was adopted for the December 2025 ultimate loss estimates used in GRA 2027.

c) MPI can confirm that the corrected data can be reflected in the Compliance Filing for the Major Class relativities. As noted in MPI Exhibit 8, MPI adjusted the incurred losses for the three claims that were primarily responsible for the observed imbalance. Of these claims, only one would affect the relativity analysis. However, because the claim exceeds MPI's serious loss threshold, the associated loss amount would already have been excluded from the development of the Major Class relativities. Consequently, the correction is not expected to have a material impact on the resulting Major Class relativities.

PUB (MPI) 2-3

Part and Chapter:	**Part VII – Ratemaking**	**R1 Qn. No.:**	**PUB (MPI) 1-5**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**New Money Yield**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-5 b)

> For ratemaking purposes, MPI continues to believe that a naïve interest rate forecast is the best estimate, so the new money yield calculation is based on the returns as of March 31st based on the actual asset duration.
>
> The difference between the values shown in the FFI tables and the values in the RI-1 table are due to some of the FFI assumptions being forward looking rather than naive.
>
> Real Estate, the new money yield calculation uses MPI's real estate benchmark return of 3.74%. MPI's real estate benchmark is the MSCI Quarterly Property Fund Index. The financial forecast model uses a projected return of 5.90% based on WTW's capital market assumptions. This represents WTW's forward-looking assumptions rather than the historical return assumption used in the new money yield calculation.

Question:

a) Please explain why MPI believes that the naïve forecast is appropriate for ratemaking but not appropriate for the financial forecast.

b) Please explain why MPI considers the historical average for Real Estate to be a better estimate of the expected return for purposes of the New Money Yield for ratemaking than WTW's capital market assumptions.

c) Please provide an alternative PF-1, PF-2 and PF-3 based on a naïve forecast for investment income, including spreads (removing projected changes in discount rates for Employee Future Benefits), with consistent assumptions to those used in the New Money Yield.

Rationale for Question:

To better understand MPI's views on investment income.

RESPONSE:

a) As explained in *PUB (MPI) 1-90(a)*, the two assumptions are used for different purposes. For ratemaking, MPI uses the New Money Yield methodology. This methodology uses a naïve return assumption based on the real estate benchmark, an objective and consistently applied estimate of future returns for ratemaking purposes. For the financial forecast, the objective is to estimate future financial results. As a result, MPI uses forward-looking assumptions, including WTW's capital market assumptions, which reflect expected future market conditions and asset class returns.

b) As noted in response to part (a), MPI uses the New Money Yield methodology for ratemaking purposes, which is based on historical benchmark experience and a naïve forecast approach. Given the direct impact that NMY has on the rate indication, MPI considers stability, objectivity and consistency to be important. Accordingly, MPI considers the benchmark approach appropriate because it is transparent. The benchmark (MSCI Quarterly Property Fund Index) return is calculated using annualized quarterly return over the previous 10 years.

c) Please see *Figure 1* to *Figure 3* below for alternative PF-1, PF-2 and PF-3, reflecting an updated Real Estate return of 3.74% and the removal of projected changes in discount rates for Employee Future Benefits.

PUB (MPI) 2-4

Part and Chapter:	**Part VII – Rate Indication**	**R1 Qn. No.:**	**PUB (MPI) 1-6** **PUB (MPI) 1-7**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Initiative Expenses**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-6 requested alternative rate indications with various amounts of initiative expenses included:

a) Excluded the $10.1 million of initiative expenses, with projected units of 1,385,741, reducing the fixed operating expense per unit from $102.53 to $95.11, a decrease of $7.42 per unit, and reducing the rate indication from 2.38% to 1.66%, a decrease of 0.72%

b) Included all excluded initiative expenses, using amounts in line 30 of PF-1 ($18.3 million for 2027/28 and $18.5 million for 2028/29) instead of amounts in line 31 of PF-1 ($10.2 million), increasing the fixed operating expense per unit from $102.53 to $108.58, an increase of $6.05 per unit, and increasing the rate indication from 2.38% to 2.95%, an increase of 0.57%.

MPI Exhibit 9

Acquisition expenses were inadvertently omitted from operating expenses, resulting in an understatement of $6.7 million of undiscounted costs, as documented in MPI Exhibit 9. The correction of this error increased the rate indication from +2.38% to 2.86%

Question:

How was the error noted in MPI Exhibit 9 considered in the two rate indications provided in PUB (MPI) 1-6?

Rationale for Question:

To better understand the initiative expenses.

RESPONSE:

Correcting b) in the preamble, the rate indication would show an increase of 0.59% (not 0.57%), from 2.38% to 2.97% (not from 2.38% to 2.95%).

The error noted in MPI Exhibit 9 was not considered in either of the two rate indications provided in response to PUB (MPI) 1-6.

PUB (MPI) 2-5

Part and Chapter:	**Part VII – Ratemaking**	**R1 Qn. No.:**	**PUB (MPI) 1-9**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Major Class Loss Cost**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-9 c requested an alternative Figure RI-14. An exhibit labeled RI-14 was provided but is not RI-14.

PUB (MPI) 1-9d provided Comprehensive catastrophe claims by Major Class in Figure 4. Figure CF-35 provided total Comprehensive catastrophe claims. Figure 4 amounts are lower than Figure CF-34 amounts for each year.

Question:

a) Please provide the requested Figure RI-14.

b) Please explain why the Work From Home adjustment had not been applied in the filing for the noted coverages? Please indicate which approach MPI considers to be more accurate.

c) Please reconcile from Figure 4 to Figure CF-35.

d) Similar to Figure 4, please provide non-catastrophe Comprehensive claims by accident year, and calculate a ratio of Catastrophe Comprehensive claims to non-catastrophe Comprehensive claims by Major Class and accident year.

e) Please comment on whether the catastrophe claims are a similar ratio to the non-catastrophe claims for each Major Class.

Rationale for Question:

To better understand the Major Class Loss costs.

RESPONSE:

a) Please see the requested Figure RI-14 below.

Figure 1 - Rating Year 2027/28 Major Classification Required Rate Changes - Breakeven Rates, With WFH Adjustment

b) MPI did not apply the Work From Home (WFH) adjustment in this analysis for the noted coverages because its impact on the resulting Major Class loss cost is not material.

c)

The WFH adjustment is determined by coverage (e.g., collision) and accident year and, within a given accident year, is applied uniformly across all Major Classes. As a result, the adjustment does not affect the distribution of losses between Major Classes for any individual accident year.

MPI acknowledges that minor differences may arise when weighted average loss costs are calculated, as the WFH adjustment varies by accident year. Consequently, the average loss costs derived using five- or ten-year periods may differ slightly from those calculated without the adjustment. However, MPI's analysis indicates that the resulting impact on the Major Class allocations is minimal and not material to the final rate indication. Accordingly, MPI does not believe that incorporating the WFH adjustment into this analysis would meaningfully improve the accuracy of the results.

d) Please see the figure below for the requested reconciliation. Remaining amounts in column 10 result from minor data differences.

e)

Figure 2 - Reconciliation of Catastrophe Losses

g) There is significant variation in the ratio of catastrophe to non-catastrophe incurred losses across Major Classes. However, catastrophe losses are low-frequency, high-severity events and subject to considerable year-to-year volatility. As a result, historical catastrophe experience at the Major Class level is not sufficiently credible to conclude that the observed differences represent persistent differences in catastrophe exposure between Major Classes. Accordingly, MPI does not consider the historical ratios sufficiently credible to support prospective differentiation of catastrophe costs by Major Class.

PUB (MPI) 2-6

Part and Chapter:	**MPI Exhibit 16 Part VIII Exp 2 Appendix 23a**	**R1 Qn. No.:**	**CC(MPI) 1-39 (b)**
PUB Approved Issue No.:	**IT Initiative Expenses and Regulatory Deferral Account**		
Topic:	**RDA**		
Sub Topic:			

Preamble to IR (If Any):

MPI is not seeking recovery of the full $18.3 million in 2027 GRA ratemaking because the application does not propose to true up all historical forecast, excluded, or actual initiative expense amounts into current proposed rates.

MPI provided a schedule supporting the $10.1 million in initiative spending being recovered.

MPI has indicated that the prior-year initiative expenses, for rate-setting, include $10.123 million based on 2025/26 actuals of which $18.316 million was incurred in that year. [PUB(MPI) 1-38 e]

MPI provided a schedule of Initiative expenses in PUB(MPI) 1-41 Appendix 1 – Redacted that indicates deferred initiative expenses including the onerous contract of $36.971 million to be 56.453 million or 19.482 million, excluding the onerous contract charge.

Question:

a) Please provide an RDA schedule of initiative expenses that have been excluded for rating years, based on the actual spending that was incurred in each year, from 2022/23 to 2025/26. Please do not include impairment write-offs of deferred development expenses.

b) Please update the schedule in Figure EXP App 23-2 to include the $8.2 million in Basis initiative costs that are not being recovered and articulate why these costs are not being sought for recovery.

c) Please confirm the ICAM (or other) allocation percentage/methodology applied to arrive at the Basic portion of the ($10.1 million,) for each of the four category totals (Closed, In-progress, Amortization, Digital Ongoing).

d) With respect to the BI3 upgrade, please provide the current status versus the spring 2027 rebase line, indicate the remaining costs to complete, and whether there are any residual risks related to the amount proposed

Rationale for Question:

To understand the changes in the shares of the non-assignable expense pool.

RESPONSE:

a) An RDA schedule does not exist. The PUB has yet to opine and define outstanding amounts or the governance rules with which these amounts would be subject to. Refer to *PUB (MPI) 1-41 Appendix 1 - Redacted* for the schedule of actual initiative expenses incurred for 2023/24 to 2025/26. The schedule does not include 2022/23, as Order 4/23 was not in effect for the 2022 rate application. Removing impairments and write-offs (lines 76 to 78 of the schedule) results in the totals illustrated in the table, below.

Figure PUB 2-6a
Actual Initiative Expenses Excluding Impairment

Line No.	Project	2023/24	2024/25	2025/26
1	***(C$000s, except where noted)***			
2	**Actual Initiative Expenses Excluding Impairment**	10,290	14,286	48,494

b) The $8.2 million reflects the difference between the 2027/28 placeholder forecast of $18.3 million and the $10.1 million in 2025/26 initiative spending included for recovery in this application. The $18.3M is forecasted expense excluded for rate setting and is independent of the prior year actual initiative spend of $10.1M requested for inclusion in rates.

Refer to figure below for the details of the 2027/28 $18.3 million forecast:

PUB (MPI) 2-7

Part and Chapter:	**Part VII – Rate Indication**	**R1 Qn. No.:**	**PUB(MPI) 1-6** **PUB(MPI) 1-41**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures**		
Topic:	**Regulatory Deferral Account**		
Sub Topic:	**Reconciliation of RDA balance**		

Preamble to IR (If Any):

In response to PUB(MPI) 1-6 c & d MPI has stated its position on how to address the RDA.

> "MPI is unable to provide the requested alternative rate indication on the basis proposed. As set out in Part VIII – EXP Appendix 23, Summary of Regulatory Deferral Accounts, the PUB has not previously confirmed what it views to be the dollar amount of the RDA balance or the practice of accounting for it. MPI also explained that the value of the RDA balance is not clear because the expenses excluded from rates were determined by reference to the applicable rating year in each of the last three rate applications, and different dollar amounts or combinations of amounts could be used to estimate a balance, including forecasted amounts excluded from rates, expenses forecasted by fiscal year, actual expenses incurred after the GRA, or combinations of those amounts. Accordingly, there is no confirmed 2025/26 RDA balance that MPI can reliably use as the basis for an alternative RI-14 scenario spread over 10 years. Preparing such a scenario would require MPI to first select a balance from among several possible approaches, each of which would be dependent on assumptions about what should be included, what period should be used, and whether the measure should reflect forecasted, excluded, or actual expenses. In MPI's view, presenting a rate indication on that basis would imply a level of precision and acceptance of an RDA balance that does not exist."
>
> According to PUB(MPI) 1-41 MPI proposes to recover $10.1 million of 2025/26 actual integration expenses in the test years. This represents a portion of the 2025/26 actual

initiative expenses. MPI represents that the Actual 2025/26 initiative expenses for 2025/26 was $56.4 million including onerous contract charge of $36.97 million.

MPI proposes to not seek recovery of prior actual initiative expenses nor the onerous contract charge and have been excluded from rates, and only seek recovery of the $10.1 million. The basis of the recovery is understood to be actual initiative expenditures, not forecast amounts.

Actual integration costs that have been incurred are set out in PUB(MPI) 1-41, which equates to $90.897 million until the end of 2025/26, including an onerous contract charge and $53,926 excluding it. [PUB(MPI) 1-41(a)]

In response to CC(MPI) 1-39 MPI in part states MPI does not believe there is a single confirmed RDA balance because the amounts excluded from rates were determined in relation to the applicable rating years in prior rate applications, while other potential measures could include fiscal year forecasted expenses or actual expenses incurred. For that reason, MPI does not identify one definitive regulatory deferred amount as an IFRS-recognized asset. If the PUB accepts MPI's requested relief, the historical RDA balance would have no ongoing relevance for future rate setting. If the PUB does not accept MPI's position, MPI respectfully requests that the PUB provide clear direction in its 2027 Order regarding the amount it considers to be the RDA balance, how those expenses are to be accounted for rate-setting purposes, and the rules that will govern any such treatment going forward.

To understand how an alternative disposition of the RDA balance (for actual amounts not included in rates in prior applications) may be dealt with, MPI is requested to provide the following information.

Question:

a) Please indicate to what extent the $53.9 million in integration/initiative expenses incurred and included in the list provided in PUB(MPI) 1-41 Appendix 1 up to the end of 2025/26 provides or is expected to provide value to customers?

b) Please provide alternative rate indication (RI-14) including the 2025/26 Regulatory Deferral Account balance (excluding onerous contract and impairment charges) spread over 10 years, instead of the proposed $10.1M of initiative expenses included in the filing.

c) Please file a PF-1, PF-2 and PF-3 on that basis.

Rationale for Question:

To understand the sensitivity of the rate indication of including various amounts of initiative expenses.

RESPONSE:

a) Refer to *Part VIII EXP Appendix 23 – Regulatory Deferred Asset - Confidential* for details of the value of the $10.1 million in initiative costs requested in the rate application and refer to *Part VIII EXP Appendix 23a – Supporting evidence recover costs - Confidential* for supporting details. The value to customers of amounts beyond $10.1 million is not the subject of any relief sought in this General Rate Application.

b) and c) Refer to response in *PUB (MPI) 1-6 part c)*.

PUB (MPI) 2-8

Part and Chapter:	**Part VII – Rate Indication**	**R1 Qn. No.:**	**PUB (MPI) 1-10**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Vehicle Rate Groups**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-10a

Similar to PUB (MPI) 1-3c from the 2026 GRA, please provide loss ratio information based on the projected rate groups, providing earned premiums and claims by each of the proposed 51 rate groups.

The total number of vehicles for rate groups 45-50 is 237,197 with $361,641,284 of earned premium, and $345,435,508 of claims, for an average loss ratio of 96%

2026 GRA PUB (MPI) 1-3 had a total number of vehicles for rate group 45 of 159,560, with $253 million of premium and $214.9 million of claims for an average loss ratio of 85%

PUB (MPI) 1-10b

Please provide a distribution of the indicated rate group without capping.

The number of vehicles for rate groups 51 and higher is 67,532

2026 GRA PUB (MPI) 1-3 had 18,456 vehicles for rate groups 51 and higher.

Question:

a) Why has the number of vehicles that are 45 or higher increased substantially in one year?

b) Why has the average loss ratio of rate group 45 and higher increased substantially from last year?

c) Why has the number of vehicles with uncapped rate groups of 51+ increased from 18,456 to 67,532 in one year?

Rationale for Question:

To better understand the vehicle rate group changes.

RESPONSE:

a) The analysis presented in 2026 IR PUB (MPI) 1-3c was based on earned insurance units from January 1, 2020, to December 31, 2024, while the analysis in 2027 IR PUB (MPI) 1-8a covers the period from January 1, 2021, to December 31, 2025. The differences between the two tables reflect the removal of calendar year 2020 and the inclusion of calendar year 2025. The increase in earned units from 159,560 to 237,197 is attributable to the differing experience in these two years and new vehicles moving into the higher rate groups.

b) The primary driver of the increase in the average loss ratio is the removal of calendar year 2020 from the analysis. Incurred claims in both 2020 and 2021 were unusually low because of the COVID-19 pandemic. As a result, replacing calendar year 2020 with calendar year 2025, combined with the additional claims development reflected through December 31, 2025, increases the overall level of incurred claims in the experience period. Consequently, the average loss ratio increased relative to the prior analysis.

c) Please note that the referenced total of 18,456 vehicles in rate group 51 or higher for 2026 is derived from IR PUB (MPI) 1-3 Appendix 2, which was based on indicated rate groups for the 2025 rating year. An updated version of this analysis, using indicated rate groups for the 2026 rating year, was subsequently provided in response to Undertaking #14 (2026 GRA). This updated information supersedes the figures presented in IR PUB (MPI) 1-3 Appendix 2 and should be relied upon instead. Based on the updated analysis, the total policy count of vehicles with an indicated rate group of 51 or higher in 2026 is 35,224.

   The increase is driven primarily by new vehicles being assigned to rate groups 50+, which account for approximately 73% of the growth in the vehicle count.

PUB (MPI) 2-9

Part and Chapter:	**Part VII – Generalized Linear Models**	**R1 Qn. No.:**	**PUB(MPI) 1-11**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Ratemaking methodology**		
Sub Topic:	**Generalized Linear Models**		

Preamble to IR (If Any):

Within the Rate Line Relativities GLM model (passenger vehicles and light trucks), PIPP losses are excluded from the response variable (non-PIPP loss cost), however PIPP remains embedded in the calculation of the 'Vehicle Rate Group' explanatory variable, which is a weighting of Collision, Comprehensive and Accident Benefits CLEAR rate groups.

Question:

a) As the response variable is the non-PIPP loss cost, and the resulting 'Vehicle Rate Group' relativities are only applied to physical damage costs, how was it assessed whether including Accident Benefit CLEAR rate groups in the MPI 'Vehicle Rate Group' calculation bias the physical damage rate group signal?

b) Has MPI considered an alternative treatment for Accident Benefit CLEAR rate group, as the response variable does not include PIPP losses, and the resulting relativities are only used for physical damage coverages?

Rationale for Question:

To better understand the GLM modeling performed to date.

RESPONSE:

a) MPI's Vehicle Rate Group is an established classification variable that is derived from the CLEAR framework. The CLEAR framework provides separate recommendations for collision, comprehensive and accident benefit coverages, which are combined by MPI to determine the Manitoba Vehicle Rate Group. This approach reflects the structure of MPI's Basic product, which combines these coverages within a single compulsory insurance product. Accordingly, the inclusion of the Accident Benefits CLEAR component is inherent to the underlying Vehicle Rate Group structure and is not a feature introduced as part of the GLM methodology.

In addition, as discussed in *Part VII RC.6*, the Accident Benefits component represents a relatively modest adjustment to the final Manitoba Vehicle Rate Group. Most of the variation in vehicle rate group assignments arises from the collision and comprehensive CLEAR components, which form the primary basis for differentiating physical damage risk across vehicles. Therefore, MPI considers the established Vehicle Rate Group structure to remain an appropriate vehicle classification variable for estimating physical damage rate group relativities.

b) MPI did not consider an alternative treatment for the Accident Benefits CLEAR component as part of the development of the Rate Line Relativities under GLM. As part of its first full year of transitioning to a GLM-based framework, MPI retained the existing Vehicle Rate Group structure to ensure consistency with the prior ratemaking framework.

PUB (MPI) 2-10

Part and Chapter:	**Part VII – Generalized Linear Models**	**R1 Qn. No.:**	**PUB(MPI) 1-12**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Ratemaking methodology**		
Sub Topic:	**Generalized Linear Models**		

Preamble to IR (If Any):

The GLM models for Major Class Relativities incorporate an adjustment to remove the serious losses and applying a serious loss loading. There is no indication that a similar treatment is applied to the GLM models for Rate Line Relativities.

Question:

a) What's the definition for serious loss? Are the serious losses only for PIPP losses?

b) How will the non-PIPP losses caused by a big hailstorm be treated in the Rate Line Relativities model if there is any?

Rationale for Question:

To better understand the GLM modeling performed to date.

RESPONSE:

a) MPI defines a serious loss as a PIPP claim with incurred losses exceeding $500,000 per incident. The serious loss adjustment applies only to PIPP experience and is used in the Major Class Relativities analysis.

b) Non-PIPP losses associated with the 2026/27 catastrophe event will be removed from the incurred loss experience before fitting the Rate Line Relativities model. This treatment is intended to reduce volatility in the model data and better ensure that the estimated rate line relativities reflect underlying claims experience, rather than the impact of a significant catastrophic weather event such as a big hailstorm.

PUB (MPI) 2-11

Part and Chapter:	**Part VII – Generalized Linear Models**	**R1 Qn. No.:**	**PUB(MPI) 1-16**
PUB Approved Issue No:	**2. Ratemaking**		
Topic:	**Ratemaking methodology**		
Sub Topic:	**Generalized Linear Models**		

Preamble to IR (If Any):

The modeling framework comprises three distinct approaches: Major Class Relativities GLM models, Rate Line Relativities GLM models, and a minimum bias model for DSR. Because none of these models incorporate offsets, each set of relativities is estimated under an independent specification that is not conditional on a unified set of pricing variables.

Question:

a) Why is DSR not included as a control variable in both Major Class and Rate Line Relativities GLM models?

b) How did MPI assess whether re-estimating the common variables in each model, rather than holding the final selected relativities from the other models fixed, could materially affect the relativities ultimately used in the final rate?

Rationale for Question:

To better understand the GLM modeling performed to date.

RESPONSE:

a) DSR is included as a control variable in the Rate Line Relativity analysis but is not included in the Major Class Relativity analysis. This is consistent with MPI's historical

ratemaking framework and the approach taken in the full transition to GLMs in the 2027 GRA. The objective of the transition was to replace the Minimum Bias Procedure (MBP) estimation methodology while maintaining the existing rating structure and minimizing unnecessary rate dislocation, rather than to redesign the overall ratemaking framework or develop a single integrated pricing model.

Consistent with MPI's historical methodology, DSR continues to be determined through a separate ratemaking analysis that reflects driver behaviour. The Major Class Relativity analysis is designed to estimate relativities for rating factors such as Territory, Insurance Use, and GVW within vehicle classifications. Accordingly, the analysis focuses on estimating the rating factors that are the primary subject of that component of the ratemaking framework, while retaining the established treatment of DSR as a separate rating component.

In contrast, the Rate Line Relativity analysis is intended to estimate Vehicle Rate Group relativities. To isolate the relationship between Vehicle Rate Group and loss cost, the model includes other relevant risk characteristics, including DSR (where applicable), territory, insurance use, and other rating variables as control variables. This approach helps ensure that the estimated Vehicle Rate Group relativities reflect vehicle-specific risk differences independently of these other factors. Because driver behaviour and other rating factors are correlated with claim frequency and severity, controlling for these variables reduces the potential for their effects to be attributed to Vehicle Rate Group. In this context, DSR is included to support the estimation of Vehicle Rate Group relativities, rather than to determine DSR relativities or discounts, which continue to be established through the separate DSR analysis.

b) MPI did not perform a separate quantitative assessment of holding selected relativities fixed in one model and re-estimating the remaining relativities in another model. Consistent with MPI's historical MBP framework, each analysis was designed to estimate a specific component of the rating structure, and the resulting relativities were incorporated into the final ratemaking process using the same framework that has historically been employed.

The objective of the 2027 GRA transition was to replace the estimation technique used to derive individual rating variables while maintaining the existing rating structure and minimizing unintended rate dislocation. Accordingly, MPI did not seek to redesign the overall ratemaking framework or evaluate alternative approaches for combining rating variables. Rather, the transition was intended to modernize the estimation methodology used to derive existing rating components while preserving the underlying rating structure.

As a result, the GLM analyses were developed to estimate the same rating components that were previously derived using MBP techniques, thereby maintaining consistency with MPI's established ratemaking framework. While alternative modelling approaches could produce different relativities, evaluating the impact of such approaches was outside the scope of the 2027 GRA transition.

PUB (MPI) 2-12

Part and Chapter:	**Part VIII Pro Formas**	**R1 Qn. No.:**	**PUB (MPI) 1-17**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Interest Rates**		
Sub Topic:			

Preamble to IR (If Any):

The cash-flow weighted average discount rate at March 31 2024 was 4.62%, at March 31 2025 was 3.66% and at March 31 2026 was 4.15%.

The change in the discount rate from 2024 to 2025 was -0.96%, and from 2025 to 2026 was +0.49%. The change in discount for the 2025 year end was -$56 million whereas it was +$90 million for the 2026 year end.

Question:

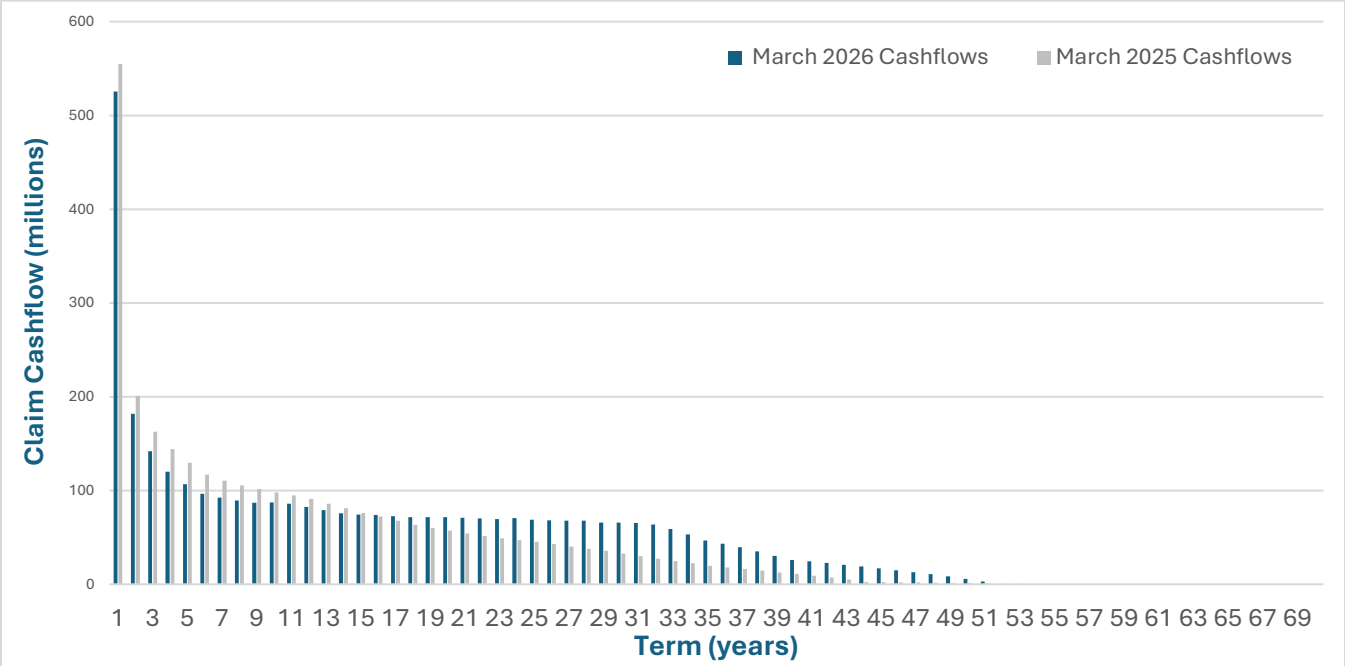
Please reconcile why a -0.96% change caused a change in discount of only -$56 million, whereas a change half the magnitude, of +0.49% caused a change in discount of +$90 million. Is it correct that $35 million of the change in 2026 is due to changes (maybe a lengthening?) in payment patterns due to the PIPP Termination Rate & Methodology Update project?

Rationale for Question:

To better understand the impact of changes in interest rates.

RESPONSE:

Figure 1 Cashflow profile



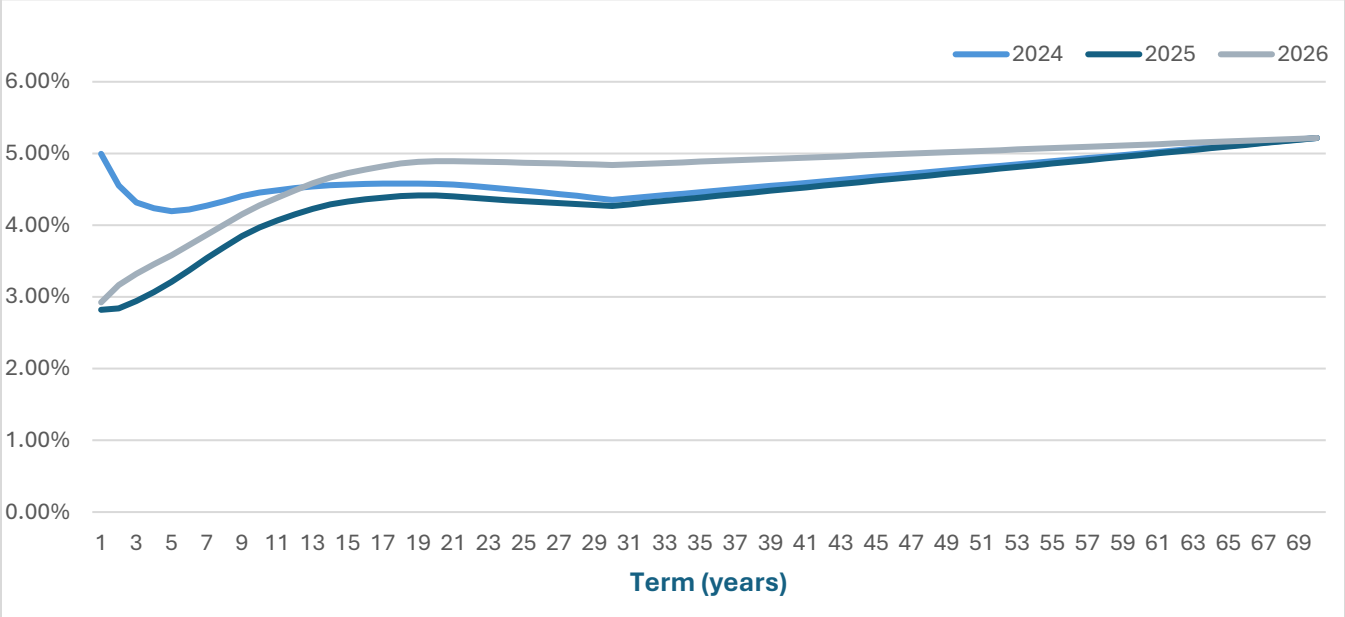


Figure 2 Yield Curves

While the cash flow weighted average discount rate provides a useful summary measure, it does not fully capture the impact of changes in the shape of the yield curve, which have a material effect on the claim liability valuation. The 0.96% decrease in the weighted average discount rate from 2024 to 2025 was primarily driven by changes within the first ten years of the yield curve. In contrast, the 0.49% increase from 2025 to 2026 was more broadly distributed across all maturities, including longer durations where a significant portion of projected claim cash flows occur as shown in Figure 1. As a result, the 2025 to 2026 yield curve change had a greater impact on the claim liability valuation than would be implied by the weighted average discount rate alone.

Yes. Approximately $35 million of the change in the 2026 is attributable to the PIPP Termination Rate & Methodology Update project. The project resulted in a lengthening of the projected payment patterns (shown in Figure 1), which increased the sensitivity of the liabilities to discounting.

PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Financial Forecast**		
Sub Topic:	**Future Rate Changes**		

Preamble to IR (If Any):

PUB (MPI) 1-20

Please provide an alternative PF-1 which includes:

i. A line item for the additional revenue sought in this application; and

ii. A separate line item for the revenue for the indicated rate change in each of the three future rating years beyond this application.

In the response, the revenue for all future rating years was aggregated in one line.

Question:

a) Please provide one line for each future rating year.

b) Please indicate the assumed additional rate increase percentage implied for 2028/29, 2029/30 and 2030/31.

Rationale for Question:

To better understand the revenue impact.

RESPONSE:

a & b) Please refer to *Figure 1* below for the requested information.

PUB 2-013 Figure 1 2027 GRA - Alternate PF-1 with Additional Revenue split into separate line items

PUB (MPI) 2-14

Part and Chapter:	**Part VIII Pro Formas**	**R1 Qn. No.:**	**PUB (MPI) 1-21**
PUB Approved Issue No.:	**4. Financial Forecast**		
Topic:	**Employee Future Benefits**		
Sub Topic:			

Preamble to IR (If Any):

In prior GRAs, the assumptions used to estimate employee future benefit obligations were held constant throughout the forecast period, resulting in no forecasted remeasurement gains or losses. For the 2027 GRA, the assumptions were refined to reflect projected changes in discount rates. As a result, forecasted remeasurement gains are recognized in 2026/27 and 2027/28. These remeasurement amounts are recognized through Other Comprehensive Income and do not impact Net Income for Rate Setting Purposes.

Question:

a) Please explain the rationale for this change in methodology and discuss whether it is consistent with reflecting no change in interest rates for forecasting purposes, using a naïve interest rate forecast.

b) Please indicate to what extent the MCT is affected if this change were not implemented on 2027/28 and 2028/29.

Rationale for Question:

To understand the basis of the Change in Remeasurement of Employee Future Benefits.

RESPONSE:

a) For the 2027 GRA, the forecast assumed a slight increase to the discount rate in 2026/27 and a nominal increase in 2027/28. The impact of this on the forecast is isolated to remeasurement gains recognized in 2026/27 and 2027/28. These gains are recognized through Other Comprehensive Income and affect only Accumulated Other Comprehensive Income and the Provision for Employee Future Benefits on the Statement of Financial Position. The resulting remeasurement gains do not impact Net Income for Rate Setting Purposes and as discussed in part (b), do not impact the MCT ratio.

b) The MCT is unaffected by this change. While remeasurement gains increase Total Equity, the increase is offset by a corresponding increase in the adjustment to Capital Available line under the MCT calculation, as the net defined benefit pension plan surplus asset is included in that adjustment. Accordingly, there is no impact to the MCT ratio in 2027/28 and 2028/29.

PUB (MPI) 2-15

Part and Chapter:	**Part VII – Rate Indication and Part VIII Pro Formas**	**R1 Qn. No.:**	**PUB (MPI) 1-23**
PUB Approved Issue No:	**1. Ratemaking** **4. Financial Forecast** **10. Claims Forecasting**		
Topic:	**June 9th hailstorm**		
Sub Topic:			

Preamble to IR (If Any):

Considering the responses provided to PUB(MPI) 1-23

> Response b) MPI estimated the impact of this event to be a reduction of approximately 20 percentage points in the Basic MCT ratio during 2026/27.
>
> Response g) had indicated that an estimate of the catastrophic (cat) reinsurance premium for the 2027/28 year and the 2028/29 year would be about $46.6 million, which is about $27 million higher than that included in the filed rate indication. The fixed operating cost per unit shown in Figure 3 has increased to $121.91 from $102.53, or $19.38, resulting in a change in the rate indication from 2.38% to 4.26%, an increase of +1.88%.

Question:

a) If MPI considers the other catastrophe events that have also occurred during this year, what would be the total estimated reduction in the MCT ratio?

b) Relative to existing cat modelling, where would the current cat events fall?

c) For reinsurance purchasing, please describe the process MPI follows to determine its catastrophic exposure coverage.

d) Please provide an estimated impact of the current year catastrophe events on Extension, to the extent that they may impact the amount of forecast capital transfers to Basic.

e) When calculating the cat loading factor to be applied to Comprehensive, do the cat recoveries for each historical year reflect the current program, with the 18.2% MPI participation in the first layer, and the $3 million per event deductible? If not, please provide corrected values and rate indication.

f) Based on current estimates for retained catastrophe events in 2026/27, assuming non-cat comprehensive claims are as forecast, if the 2026/27year was added to the 9 year average, what would be the indicated cat loading factor?

g) Using the above calculated cat loading factor, what would be the alternative rate indication (RI-14)?

h) Has the Board of MPI considered the combined effect of the data error from Exhibit 9 that understated the rate indication by 0.48% with the current expectation that the catastrophe reinsurance premiums in the rating year will be substantially higher than the amounts included in the rate indication, increasing the rate indication by an additional 1.88%?

i) Was Board approval required for the purchase of the additional reinsurance protection? Please provide any Board minutes with regards to this.

j) Please provide any other Board minutes related to the 2026 catastrophe events.

k) Please provide two alternative scenarios with PF-1, PF-2, and PF-3, incorporating the following changes:

i) The first scenario would include projected future rate increases consistent with the approach followed in the 2027 GRA. Please include the estimated amount of rate increase in each year.

ii) The second scenario would exclude projected future rate increases, consistent with the approach followed in PUB (MPI) 1-19a.

iii) For both scenarios:

(1) Increase the incurred claims forecast for 2026/27 to include the current estimate of the known catastrophe claims as per PUB (MPI) 1-29 versus the level included in the forecast.

(2) Increase the reinsurance premium for 2026/27 to reflect the additional known costs for the current year (purchase of additional coverage etc).

(3) Increase the reinsurance premium for 2027/28 and 2028/29 in line with the estimate of PUB (MPI) 1-23g.

Rationale for Question:

To better understand the potential effects of the June 9th hailstorm.

RESPONSE:

a) In developing this estimate, consideration was given to:

- Estimated ultimate losses arising from catastrophe events, as detailed in *PUB (MPI) 1-29 c)*;

- Estimated costs associated with the purchase of additional reinsurance coverage, as detailed in *PUB (MPI) 1-23 g);* and

- The resulting impact on Extension's capacity to transfer surplus capital to Basic.

Collectively, these factors are estimated to reduce Basic's forecasted year-end MCT ratio by approximately 35 percentage points relative to the original forecast (estimated impact to equity as at the end of the first forecast year is approximately $160 million).

b) The current year catastrophe events are estimated to result in approximately $392.4 million of ultimate loss as of July 22, 2026 as per *PUB (MPI) 1-29 c)*. Based on catastrophe modelling prepared for the April 1, 2026 renewal, the RMS Aggregate Exceedance Probability (AEP) model indicates that the aggregate impact of the current year catastrophe events is expected to be in the range of a 95- to 100-year aggregate return period event.

The June 9-12, 2026 Severe Convective Storm is currently estimated at approximately $329.1 million of ultimate loss as of July 22, 2026 as per *PUB (MPI) 1-29 c)*. Under the RMS Occurrence Exceedance Probability (OEP) model, this corresponds to an event with a return period of approximately 85 years.

The return-period comparisons are based on the catastrophe model output prepared in advance of April 1, 2026 renewal and have not been adjusted for subsequent inflation, exposure growth, or portfolio changes.

c) MPI determines the level of catastrophe reinsurance coverage through an assessment of its catastrophe exposure, financial risk tolerance, capital position, and reinsurance market conditions. This process is conducted in collaboration with its reinsurance broker and incorporates catastrophe modelling, actuarial analysis, and market intelligence to evaluate alternative program structures and coverage levels.

A key component of this evaluation is the reinsurance broker's Reinsurance Evaluation Framework (REF), which provides a structured approach for comparing alternative reinsurance arrangements. The framework evaluates both quantitative and qualitative considerations, including total reinsurance cost, MPI's retained catastrophe losses under severe loss scenarios, and execution considerations. The framework is designed to support collaboration between MPI and the broker and allows different reinsurance structures to be assessed.

The catastrophe analysis supporting the REF incorporates catastrophe modelling and actuarial assessments tailored to MPI's portfolio. The reinsurance broker utilizes catastrophe models to evaluate the potential impact of catastrophe events across a range of return periods and to estimate metrics such as expected retained losses, attachment probabilities, reinstatement costs, and volatility transfer under alternative reinsurance structures.

MPI reviews the modelling outputs together with its broker to assess the level of catastrophe risk that can be appropriately retained while maintaining financial stability and protecting capital. The broker analysis includes stochastic modelling and stress testing of alternative structures to evaluate how each option would perform under a wide range of catastrophe scenarios.

In addition to modelling and actuarial analysis, MPI's reinsurance strategy considers historical catastrophe experience, changes in insured values and exposure concentrations, and available market capacity. The reinsurance broker also provides MPI with market intelligence regarding reinsurer appetite, pricing conditions, and potential structural alternatives to support renewal decisions.

The result of this process is a recommended catastrophe reinsurance structure that balances reinsurance cost, volatility reduction, capital protection, and MPI's risk tolerance. The selected program is then reviewed and approved through MPI's governance processes as part of the annual reinsurance renewal strategy.

d) After incorporating the revised ceded premium and claims forecasts, the 2026/27 extension transfers would decrease to $32.073 million - refer to *PUB (MPI) 2-015*, part k, Figure 03, line 8), a $9.811 million reduction from the base filing.

The corresponding 2026/27 Basic MCT would decrease from 105.2% to 81.1%, while the 2026/27 Extension MCT would remain unchanged at 200%.

e) The catastrophe recoveries in the original calculation of catastrophe loading factor did not reflect the current program. When using the values as of the current program, the selected

catastrophe adjustment factor increases from 1.19 to 1.22. See the figure below for an updated calculation. The only change occurs in 2023, with a decrease in the CAT reinsurance recovery.

Figure PUB 2-15 e – Updated CAT Adjustment Factor

Line No.	(1) Accident Year	(2) Ultimate Loss Including CAT	(3) Ultimate CAT Loss	(4) CAT Reinsurance Recoveries	(5) Ultimate Attritional Loss	(6) Net CAT Adjustment Factor

16 (1) April 1 to March 31
17 (2) From March 2026 Valuation
18 (3) From March 2026 Valuation
19 (4) CAT Reinsurance recoveries based on current CAT treaty and 91.5% allocation to Basic, from March 2026 Valuation
20 (5) From March 2026 Valuation
21 (6) = [(2) - (4)] / (5)
22 (7) 9-year Average of CAT Adjustment Factors in (6) for 2017 year to 2025 year, rounded to 2 decimal points.

Applying the above catastrophe loading factor increases the overall rate to 2.73% from 2.38%. Please note that the quoted numbers do not include the adjustment noted in *MPI exhibit #9*. Further, beyond the revised cat loading factor, all other assumptions remain unchanged.

f) The indicated catastrophe loading factor, including 2026/27 in the experience period, is 1.25. The CAT reinsurance recoveries in column (4) have been restated as described in part

e). With the addition of 2026/27, MPI used a 10-year average beginning in 2017, when paintless dent repair was introduced for hail claims and reduced claims costs. See the *Figure 2* for the full calculation.

Figure PUB 2-15 f - CAT Adjustment Factor With 2026/27 Year

Line No.	(1) Accident Year	(2) Ultimate Loss Including CAT	(3) Ultimate CAT Loss	(4) CAT Reinsurance Recoveries	(5) Ultimate Attritional Loss	(6) Net CAT Adjustment Factor
1	2012	$72,151,528	$16,680,042	$0	$55,471,486	1.3007
2	2013	$75,120,459	$14,599,967	$0	$60,520,492	1.2412
3	2014	$71,704,052	$3,955,279	$0	$67,748,773	1.0584
4	2015	$121,184,644	$41,967,315	$0	$79,217,328	1.5298
5	2016	$118,751,055	$34,792,179	$0	$83,958,877	1.4144
6	2017	$72,951,079	$0	$0	$72,951,079	1.0000
7	2018	$114,354,216	$36,996,970	$0	$77,357,246	1.4783
8	2019	$86,883,394	$8,122,391	$0	$78,761,003	1.1031
9	2020	$85,075,981	$5,240,859	$0	$79,835,122	1.0656
10	2021	$87,507,278	$1,900,137	$0	$85,607,141	1.0222
11	2022	$118,071,385	$16,514,588	$0	$101,556,797	1.1626
12	2023	$280,840,165	$165,101,898	$83,839,743	$115,738,267	1.7021
13	2024	$174,505,892	$47,236,930	$0	$127,268,962	1.3712
14	2025	$145,473,993	$4,511,288	$0	$140,962,705	1.0320
15	2026	$501,948,378	$359,000,000	$285,670,000	$142,948,378	1.5130
16				**(7) Selected CAT Adjustment Factor**		**1.2500**

17 (1) April 1 to March 31

18 (2) From March 2026 Valuation, 2026 year = March 2026 Forecasted Non-CAT Loss + PUB 1-29 c) CAT Loss.

19 (3) From March 2026 Valuation, 2026 year from PUB 1-29 c) response.

20 (4) CAT Reinsurance recoveries based on current CAT treaty and 91.5% allocation to Basic, from March 2026 Valuation, 2026 year from PUB 1-29 c) response.

21 (5) From March 2026 Valuation, 2026 row from PUB 1-29 c) response.

22 (6) = [(2) - (4)] / (5)

23 (7) 10-year Average of CAT Adjustment Factors in (6) for 2017 year to 2026 year, rounded to 2 decimal points.

g) Using the above calculated cat loading factor, the alternative rate indication would increase to 3.08% from 2.38%. An alternative version of Figure RI-14 can be seen below. Please note

that this figure includes adjustments outlined in *MPI Exhibit #8*, but not those in *MPI Exhibit #9*. Further, beyond the revised cat loading factor, all other assumptions remain unchanged.

Figure PUB 2-15 g - Rating Year 2027/28 Major Classification Required Rate Changes - Breakeven Rates, With Alternative Cat Loading

h) Please refer to *PUB (MPI) 2-1 - Appendix 1* for the material presented to the Board of Directors in regards to *MPI Exhibit #9*.

i) Per MPI's signing authority policy and Risk Committee Terms of Reference, the Risk Committee has authority to approve the purchase of reinsurance. The Risk Committee approval occurred at the July 3, 2026 Risk Committee meeting. Formal minutes regarding this topic are pending final approval, which is expected to occur in September.

j) Discussion of the June hailstorm occurred at the June and July Risk Committee meetings as well as the June Board of Directors meeting. Minutes for the above-mentioned Risk Committee are pending final approval, which is expected to occur in September. In response to this request MPI is providing the following final minute provided as *Appendix 1 - BoD – June 24/26.*

k) Please refer to the following Pro Forma statements which capture the information requested in the two scenarios described above (Scenario 1 - refer to figures ***Figure PUB 2-015K 1 to 3*** / Scenario 2 refer to ***Figures PUB 2-015K 3 to 6***). The below re-forecast captures the items identified throughout the information request parts above, including an updated 5-year Basic claims forecast, revised 2026/27 Extension claims forecast, updated forecasted reinsurance cost, and updated expense allocation. Other assumptions have been held constant.

PUB (MPI) 2-16

Part and Chapter:	**Part VII – Rate Indication and Part VIII – Pro Formas**	**R1 Qn. No.:**	**PUB(MPI) 1-23** **PUB(MPI) 1-85 (b)** **CC(MPI) 1-36**
PUB Approved Issue No.:	**4. Financial Forecast** **10. Claims Forecasting**		
Topic:	**June 9th hailstorm**		
Sub Topic:			

Preamble to IR (If Any):

MPI estimates the net retention from the hailstorm on June 29th event will be approximately $65.1 million. Putting in place renewing the existing reinsurance coverage will be between $50 million and $60 million for the fully placed program.

Based on assumptions of retention, applying the 80% placement assumption, MPI estimates catastrophe reinsurance premium of approximately $40 million to $48 million, of which $36.6 million to $43.9 million would be attributable to basic.

MPI does not intend to change the rate request. The rate request was developed based on the best estimate assumptions and information available at the time of filing.

The Corporation does not have a policy to refile rate applications based on significant events. MPI states forecasts will never be exact. They are completed with the best information at a specific time period. Given the inherent inaccuracies of forecasting actual rate need, MPI believes no measurable benefit can be taken from resubmitting updated forecasts, particularly considering the administrative burden placed on its employees and the correction that occurs within an annual filing

Question:

a) Please discuss the merits of having a policy to update rate applications based on significant events.

b) Please explain the Corporation's rationale in accepting a regulatory lag to address a known material rate event.

c) Please describe how catastrophic events and subsequent management action are modelled in MPI's FCT?

d) How has MPI included the known cat events in this year's FCT?

e) Please indicate to what extent the rate indication would have to change to make up for the estimated known losses from the June 9th hailstorm (including the other significant weather events since June 9th) and the estimated additional reinsurance costs.

f) Please explain how the hailstorm in August 2023 affected the duration of claims liabilities. Please demonstrate and explain.

g) Please explain why MPI has retained 18.2% co-participation of the $100 million excess of $50 million layer.

h) Has MPI determined the availability or cost of full coverage?

Rationale for Question:

To better understand the potential effects of the June 9th hailstorm.

RESPONSE:

MPI notes that the preamble to this IR references a June 29 event. MPI is not aware of a significant event occurring on that date and has therefore responded based on the major hailstorm event that occurred June 9, 2026.

a) The merit of a policy that updates rate applications following significant events is that it helps maintain rate adequacy in the subsequent rating year, thereby reducing

regulatory lag. However, this benefit must be balanced against the trade-off between responsiveness to emerging experience and rate stability.

Auto insurance pricing is inherently uncertain, as actual experience will differ from expectations due to factors such as natural catastrophes, claims trends, inflation, investment returns, mobility changes, and other external influences. While a significant event may warrant consideration in a rate application, a significant event should not automatically result in a rate change based on preliminary estimates alone. In the case of the recent catastrophe event, the ultimate cost remains uncertain and continues to develop.

In addition, the longer-term impact of the event on future reinsurance costs and reinsurance program structure is not yet known. Sound actuarial practice therefore considers whether long-term expected future costs have materially changed, rather than reacting immediately to short-term volatility. Reserves, capital, reinsurance, and regular rate reviews are mechanisms used to manage such uncertainty while supporting stable and predictable rates for policyholders.

MPI addressed the issue of regulatory lag in its submission last year for the discontinuance of the October update (*2026 GRA MPI Exhibit #17*):

> *"Manitobans, unlike the customers of Saskatchewan Government Insurance (SGI) and Insurance Corporation of British Columbia (ICBC), enjoy the benefits of an annual GRA, which allows for annual adjustments to the forecasts upon which the rate indication is based. Indeed, because the rate indication includes forecasts for two years, a refresh of the second year forecast occurs every year, generating another forecast for the new second year.*"

Regular rate reviews work to mitigate any regulatory lag.

b) See a).

c) Catastrophe events are modelled in the FCT by increasing direct incurred losses and corresponding ceded recoveries in the forecast period in which the event is assumed to occur. The resulting increase in ultimate losses and recoveries is incorporated into the projected claim liabilities using assumptions consistent with those applied to catastrophic comprehensive claims in MPI's Financial Forecast Model and the March 31, 2026 valuation.

Subsequent management actions may or may not be considered depending on the severity of the scenario without consideration towards management action. Where necessary, management actions considered are limited to increases to the forecasted Basic premium rate change and are modelled to occur in the two years following the onset of the shock event. Any such rate action is limited to 2.5% in compliance with the proposed capital management plan to ensure future forecasted rate changes do not exceed 5%.

The resulting impacts on net income, financial position and the MCT ratio are projected through the FCT forecast horizon and presented in a format consistent with OSFI's P&C-1 Insurance Return.

d) MPI has not incorporated the known catastrophe events that occurred after March 31, 2026, into this year's FCT scenarios. The base scenario reflects MPI's financial position and forecast assumptions as at March 31, 2026. The FCT assesses catastrophe risk through a dedicated adverse scenario that measures the financial impact of a severe hypothetical catastrophe event occurring during the forecast period.

For the benefit of readers, the FCT report will include a supplementary subsection discussing the estimated financial impact of the recent catastrophe events and the purchase of additional reinsurance on the base scenario. The estimated impacts presented will be determined by assuming catastrophe loss assumptions and reinsurance cost assumptions consistent with those provided in PUB IR 2-15 (a).

e) The rate indication would increase from 2.38% to 4.61% to make up for the estimated known losses from the June 9th hailstorm (including the other significant weather events since June 9th) and the estimated additional reinsurance costs. Please note that the quoted numbers do not include the acquisition costs adjustment noted in *MPI Exhibit #9*.

f) Based on the Liability for Incurred Claims as of March 31, 2024, the August 2023 hailstorm reduced the estimated duration of claim liabilities by approximately 0.3 years, resulting in a duration of 7.15 years for the Basic portfolio. The hailstorm generated a significant volume of Comprehensive claims, which have a shorter settlement pattern than other coverages within the Basic portfolio.

g) MPI's decision to retain 18.2% co-participation of the $100 million excess of $50 million catastrophe reinsurance layer was the result of a deliberate strategy to reduce overall reinsurance costs while maintaining substantial catastrophe protection.

At the time of renewal, reinsurance market conditions were relatively soft, and MPI had experienced two loss-free treaty years since the large 2023 Winnipeg catastrophe event. Despite the favourable loss experience, reinsurance premiums have increased significantly in recent years. As a result, MPI sought to balance affordability and protection by accepting a greater level of risk retention in exchange for lower premium costs.

Based on catastrophe modelling and market conditions, MPI’s reinsurance broker suggested a premium of approximately $16.25 million for the $100 million excess of $50 million layer. MPI directed the broker to market the layer at a target premium of $14.5 million, with the objective of securing approximately 80% market participation. The placement ultimately achieved 81.8% participation from reinsurers, resulting in MPI retaining the remaining 18.2% share of the layer.

This approach reduced the cost of Layer 1 coverage to approximately $11.85 million. Overall, MPI's catastrophe reinsurance spend for all lines of business decreased to approximately $21.3 million in 2026/27, compared to $28.8 million in the prior year. The portion allocated to Basic also decreased from approximately $26.4 million to $19.5 million. MPI considered the resulting co-participation level to be an appropriate trade-off between risk retention and premium savings, given its capital position, catastrophe modelling results, and recent loss experience.

h) As part of the renewal process, MPI and its reinsurance broker evaluated both the availability and expected cost of obtaining full placement for the $100 million excess of $50 million catastrophe reinsurance layer.

The reinsurance broker’s estimated premium for 100% placement of this layer was approximately $16.25 million. This pricing was developed through a market exercise conducted by the broker and reflects reinsurer feedback and pricing indications received during the renewal process. Reinsurer pricing varied, with some markets indicating premiums above the broker’s price and others below it.

The premium is not necessarily the price at which every reinsurer would participate. Rather, the broker seeks to identify a mid-range price that is broadly representative of market conditions and provides a reasonable expectation that the program can be successfully placed. The broker recognizes that some reinsurers will view the price as too low and will have little or no appetite to participate at that level, while other reinsurers may view the pricing more favourably. The objective is to identify a marketable price that enables MPI to secure the desired level of catastrophe protection.

MPI therefore had visibility into the estimated cost of obtaining full coverage and considered that information when assessing various placement and retention options. Based on its recent loss experience, capital position, market conditions, and objective of reducing reinsurance costs, MPI elected to pursue a lower premium

strategy that ultimately resulted in 81.8% placement of the layer and 18.2% co-participation by MPI.

Accordingly, MPI considers approximately $16.25 million to be the estimated cost of fully placing the $100 million excess of $50 million layer, based on the pricing developed by its broker from market feedback obtained during the renewal process.

PUB (MPI) 2-17

Part and Chapter:	**Part VIII Pro Formas**	**R1 Qn. No.:**	**PUB (MPI) 1-26**
PUB Approved Issue No:	**4. Financial Forecast**		
Topic:	**Extension Forecast**		
Sub Topic:	**Extension Premium Changes**		

Preamble to IR (If Any):

PUB (MPI) 1-26a MPI declined to provide the EPF-2. We note that MPI provided APF-2 in the 2027 GRA which includes Basic and Extension, and hence by subtracting PF-2 from APF-2, it should result in EPF-2.

PUB (MPI) 1-26b requested assumptions underlying the Extension premium forecast.

The impact of forecast Extension capital transfers is relevant to the Basic MCT ratio.

Extension Motor Vehicle revenue from premiums forecasts (and actual) in GRA 2024 through 2027:

	Fiscal Year						
GRA	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29	2029/30
2024	189,940	196,385	203,076	209,943	217,023		
2025	192,686	213,889	233,322	242,991	253,015	263,525	
2026		216,786	240,761	256,489	272,673	288,562	305,282
2027			239,804	254,952	272,533	290,773	310,569

The 2025 GRA premium forecast increased due to an increase in the Basic deductible.

Question:

a) Please confirm if similar assumptions were used for the 2027 GRA Extension premium forecast as were used in the 2026 GRA Extension premium forecast.

b) Please confirm if similar assumptions as those used in the Basic forecast are used for the Extension forecast with regards to volume growth, vehicle upgrade, and DSR change.

Rationale for Question:

To understand the reasonableness of the Extension premium forecast.

RESPONSE:

a) For assumptions used in the Extension premium forecast, please refer to *Figure REV App 2-4 Extension Written Premium Assumptions* in the 2027 GRA and *Figure REV App 4-2 Extension Written Premium Assumptions* in the 2026 GRA.

b) Similar assumptions are used for the Extension forecast where the same underlying policyholder activity drives results. Changes in Basic related to volume growth, vehicle upgrades, and DSR movement implicitly flow through to Extension assumptions because Extension coverage is generally linked to the same policyholders and vehicles.

PUB (MPI) 2-18

Part and Chapter:	**Part VIII - Revenues, REV.4** **Part VIII - Pro Formas,** **Figure PF-1 (line 14)**	**R1 Qn. No.:**	**PUB(MPI) 1-29**
PUB Approved Issue No.:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT roadmap**		
Topic:	**Figure EXP App 18-2**		
Sub Topic:	**Vacancy Allowance**		

Preamble to IR (If Any):

$4,500,000 reflects the estimated compensation costs associated with the 50 initiative FTE (using an average $90,000 salary x 50 FTE). As MPI has an approved FTE ceiling of 2,089, all FTE (normal operations and initiative) are budgeted for. Vacancy due to normal staffing fluctuations throughout the year is reflected through the contra allowance of $3,500,000.

It is not clear how the vacancy allowance applies to the initiative compensation cost forecast.

Question:

a) Please provide the supporting build-up of the $90,000 salary used in the $4.5 million estimated compensation cost and explain whether it includes benefits and overtime.

b) Please reconcile the average salary used in the analysis for the provision with that provided in PUB (MPI) 1-46, Fig 3.

c) Please explain to what extent the vacancy contra allowance of $3.5 million relates to the $4.5 million budget line item.

Rationale for Question:

To understand the reinsurance premium forecast and its assumptions.

RESPONSE:

a) Corporate 2026/27 regular salaries (account 505510) is $189,399 thousand within total compensation salaries costs of $193,879 thousand. Compensation salaries include many other accounts such as sick leave, retirement pay, vacation pay, etc. that vary year to year and are not used in calculating the average salary for purposes of estimating the vacancy allowance. $189,399 / 2,089 corporate FTE = approximately $90k per FTE. As filed previously in the 2026 GRA, 2027 GRA, and PUB (MPI) 1-48, and PUB (MPI) 2-22 a), the vacancy estimate simply recognizes that, from a compensation dollar budgeting perspective, it is not realistic to assume 100% of approved positions will be actively paid for every day of the year. Including this contra amount helps govern overbudgeting compensation dollar costs. This dollar allowance represents approximately 1.75% of total regular salary costs in excess of $200 million and does not have a material impact on the overall labour cost estimate. MPI will continue to review the provision annually as part of its regular budgeting process.

b) There is no reconciliation to provide. Refer to part a).

c) As filed previously in the 2026 GRA, 2027 GRA, and PUB (MPI) 1-48, the vacancy allowance is simply a dollar allowance against budgeted regular salaries to reflect normal turnover and hiring patterns against the 2,089 corporate FTE budget. The $4.5M placeholder is the compensation budget for the 50-initiative FTE budgeted as part of initiative dollars. As previously filed in the 2027 GRA, it was unknown during MPI's preparation of its filing which roles would be filling these positions (as its project dependent), therefore a forecasted placeholder utilizing an average dollar has been assumed which is consistent with the placeholder implementation budget overall.

Topic:	**Compensation**		
Sub Topic:	**2027/28 Salary Increase and FTE Reconciliation**		

Preamble to IR (If Any):

Question:

a) Please file any market, competitive analysis, or compensation studies undertaken to warrant the re-classification and additional pay to remain competitive. .

b) Please describe the peer group market which MPI is comparing itself to related to salary adjustments.

c) Please indicate how the salary bands (potential wage impact) have changed as a result of the reclassification of clerical staff to technical.

d) Please explain how the classification changes affected the span of control metric.

e) Please provide the targets used by MPI.

Rationale for Question:

To understand changes in the Corporation's staffing budget.

RESPONSE:

a) Adjuster positions in Operations and Claims divisions were re-classified to higher pay scales to remain market competitive and support internal equity. Market analysis has been filed for the Operations division as *Appendix 1 – Market Analysis*.

The Claims division includes specialty adjusting functions such as commercial, subrogation, bodily injury and out of province adjusting. At MPI, specialized functions require experience as an adjuster from Operations and additional education in the Chartered Insurance Professional program. The pay bands for the specialized adjusting roles are evaluated with consideration to the adjusting experience required, specialized expertise and educational requirements.

b) The peer group market is comprised of other public sector organizations and organizations in the geographical area and/or industry from which Manitoba Public Insurance seeks talent.

c) The movement between Clerical and Technical/Professional was an exercise in correcting the Job Category only. There was no impact to salary bands or compensation as a result of this re-categorization.

d) The movement between Clerical and Technical/Professional was an exercise in correcting the Job Category only. There was no impact to reporting relationships or span of control as a result of this re-categorization.

e) MPI uses a target of aligning the pay grade midpoint to the 50th percentile of the applicable external market.

Overview

Data was captured from MPI's peer group market of other public sector organizations and organizations in the geographical area and/or industry from which Manitoba Public Insurance seeks talent

Compensation analysis between Manitoba Public Insurance and Saskatchewan Government Insurance has been shared as our closest industry comparator

External market data, provided through the Canada Mercer Benchmark Database, is provided at the 50th percentile of base pay using the applicable benchmark and geodifferential

The Canada Mercer Benchmark Database is a comprehensive employer-reported salary and compensation survey database tracking over 1,300 employers across more than 10,000 jobs

Pre-Reclassifications (Operations)

Job	MPI					SGI (in-scope SK/MB)				External Benchmark Base Pay 50th Percentile

PUB (MPI) 2-20

Part and Chapter:	**Part VIII - EXP Appendix 18 EXP Appendix 24-1 Data Processing Expenses (2026 GRA)**	**R1 Qn. No.:**	**PUB(MPI) 1-44**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures**		
Topic:	**Data Processing Expenses**		
Sub Topic:			

Preamble to IR (If Any):

MPI provides the detail of External Labour to be $13.0 million in 2026/27 and to decline to $6.3 million in 2028/29.

Based on direction provided in PUB(MPI) 1-126 MPI Consultants and external consultants costs, the derived costs for external consultants were forecast to be $ 9.9 million in 2026/27 and forecast to decline to $4.6 million in 2028/29.

Question:

a) Please reconcile the consultant costs per PUB(MPI) 1-126 with the forecast data processing external labour. Indicate the implied external FTE count that is represented in the forecast for external labour.

b) Please explain the assumptions around external labour and what is behind the major reduction in this year's forecast versus last year's application.

Rationale for Question:

To understand the components of data processing and special services expenses.

RESPONSE:

a) Please refer to *PUB (MPI) 1-53* which provides detailed breakdown of implied consultant counts based on Corporate and Basic forecasts. Consultant counts were calculated based on total dollars / $252,000 annual salary (as noted in *PUB (MPI) 1-126*). Annual salary was calculated based on $125/hour x 8 hours/day x 252 days/year.

Please note that *PUB (MPI)1-44* External Labour is $13.0M in 2026/27 and *PUB (MPI) 1-53* is $14.1M due to the inclusion of both capital and expense amounts.

b) Please refer to *PUB (MPI) 2-23 (a)* for a discussion about the reduction in forecasted normal operations external labour.

Please note that line 9 referenced in *PUB (MPI) 1-53 Figure 1* includes $2.8M of initiative dollars within the 2026/27 forecast of $9.9M. By comparison, forecasted initiative consultant dollars for 2027/28 and beyond are not currently available. The 2027/28 initiative budget is a placeholder and, as explained in *PUB (MPI) 1-53(d)*, has not yet been allocated by nature of expense because the related business cases were not available at the time of filing to determine how those costs would be classified, including the extent to which they would relate to consultants, external labour, or other expense categories. Accordingly, where the forecasted dollars represent an unallocated placeholder only, the forecasted consultant count based on implied dollars is nil.

PUB (MPI) 2-21

Part and Chapter:	**Part VIII - EXP Appendix 11** **Figure EXP App 11-4 (lines 24-38)** **Figures EXP App 11-7, 11-8,11-9** **EXP Appendix 6, Figure EXP App 6-2**	**R1 Qn. No.:**	**PUB(MPI) 1-46-Figure 1**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Severance and Retirement Provisions**		

Preamble to IR (If Any):

MPI notes that Employees are expected to utilize all earned vacation entitlement in the applicable vacation year, in the form of scheduled days off. Employees are paid out for any unused vacation balances upon retirement and/or termination.

MPI recorded vacation payouts of $2.4 million in 2024/25 and $1.8 million in 2025/26.

Question:

a) Please update the response to Figure 1, in the same format as Figure EXP APP 12-1 from the 2026 GRA, including gross salaries, vacancy allowance, and total net salaries. Please provide in both pdf and excel with active formulas.

b) Please explain the major change in salary vacation payout for 2024/25 and 2025/26.

c) Please explain whether the Corporation has a maximum carry-forward of vacation days.

Rationale for Question:

To understand the components of forecast compensation expense.

RESPONSE:

a) Please see *PUB (MPI) 2-22 (a).*

b) MPI pays out unused vacation balances when an employee terminates and/or retires. The amount paid out is dependent on various factors, such as: the number of employees who retire/ terminate, salary upon retirement, timing of retirement (i.e., at or near vacation roll over on April 1st) and unused vacation balances. The year over year change is indicative of both a higher volume of employee departures and a higher dollar value of payments to retired/ terminated employees with unused vacation balances in F2024/25 vs. F2025/26. It is reasonable to anticipate that this account will fluctuate based on the factors described above.

c) A maximum of up to ten days of vacation entitlement may be carried-over for use in the following year. In exceptional circumstances, the responsible Vice-President must authorize requests exceeding ten days.

PUB (MPI) 2-22

Part and Chapter:	**Part VIII - EXP Appendix 11** **Figures EXP App 11-1, 11-2** **PUB (MPI) 1-37 (2026 GRA)**	**R1 Qn. No.:**	**PUB(MPI) 1-48**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures**		
Topic:	**Compensation**		
Sub Topic:	**Vacancy Allowance**		

Preamble to IR (If Any):

MP MPI adjusted the vacancy provision from $6 million (which was based on an implied 60 FTEs) to $3.5 million, reflecting a more realistic expectation of maintaining approximately 40 FTEs as surge capacity at any given point in time.

On June 30th, 2026, MPI had 60 vacant positions.

Question:

a) Please update Figures 1 & 2 including the 2027/28 and 2028/29 test years, and the compensation analysis in Figure EXP appendix 12-1 (prepared on consistent basis as 2026 GRA) based on the June 30th vacant positions.

b) Please explain how MPI determined that a vacancy provision of 40 FTE was achievable given prior historical vacancy levels.

Rationale for Question:

To understand the vacancy allowance and its basis.

RESPONSE:

a) There are no actual vacancy figures available for the 2027/28 and 2028/29 test years because those years have not yet occurred. MPI provided the 2026/27 information in *PUB (MPI) 1-48* for illustrative purposes as requested, and the assumed implied "vacant" FTE remains the same through the forecast period. Accordingly, there is no additional actual vacancy information to prepare for the test years.

For the second request to prepare the 2026 GRA equivalent table, the premise and requested format do not provide a meaningful or supportable basis for the information being sought. The compensation analysis in Figure EXP Appendix 12-1 from the 2026 GRA considered only normal operations, whereas the vacancy provision in the 2027 GRA is applied against MPI's total approved corporate FTE complement of 2,089. Presenting vacancy only through a normal operations table would therefore not reflect the basis upon which the vacancy provision is determined and could be misleading.

As stated in the response to PUB (MPI) 1-48, historical comparisons of "dollar vacancy" are not directly comparable for this purpose because the dollar value of vacancy depends on what salary costs were initially included in the budget. If prior budgets did not include the same level of funded compensation, comparing vacancy dollars across years can be misleading. Preparing the compensation analysis on the same basis as Figure EXP Appendix 12-1 would risk presenting information that is not comparable or supportable. MPI has instead provided the requested information for the 2027 GRA in Appendix 11 on an appropriate basis that aligns with how the compensation budget is prepared and can be supported. In *PUB (MPI) 1-48*, MPI also provided a look-back comparing actual regular salary dollars to the budget for regular salaries account, which provides the level of detail previously filed in EXP Appendix 12-1 but in a more appropriate form. MPI no longer prepares or maintains the Figure EXP Appendix 12-1 schedule in the requested form.

b) MPI's vacancy provision is a budgeting estimate rather than a forecast of specific vacant positions. Recent vacancies (as per *PUB (MPI) 1-48*) were approximately 50 FTE at March 31 and 60 FTE at June 30, and vacancy levels are expected to fluctuate throughout the year. The provision of approximately $3.5 million is equivalent to roughly 40 FTE when using the implied average regular salary per FTE, calculated as total regular salaries divided by 2,089 FTE. As filed in *PUB (MPI) 1-48* part b), the vacancy amount in the budget is a dollar-level planning assumption only. It reflects a proxy for normal timing differences that occur throughout the year as staff move in and out of roles, start dates vary, and positions are temporarily vacant during regular turnover. It is not a headcount management tool and does not imply that roles are being held, delayed, or intentionally left unfilled. At all times, staffing remains aligned to the approved corporate headcount. The vacancy estimate simply recognizes that, from a compensation dollar budgeting perspective, it is not realistic to assume 100% of approved positions will be actively paid for every day of the year. Including this contra amount helps govern overbudgeting compensation dollar costs.

This dollar allowance represents approximately 1.75% of total regular salary costs in excess of $200 million and does not have a material impact on the overall labour cost estimate. MPI will continue to review the vacancy provision annually as part of its regular budgeting process.

PUB (MPI) 2-23

Part and Chapter:	**Part VIII - EXP Appendix 18** **Figure EXP App 18-7**	**R1 Qn. No.:**	**PUB (MPI) 1-53**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures**		
Topic:	**Data Processing**		
Sub Topic:	**Consultant Costs and Counts**		

Preamble to IR (If Any):

The 2027/28 initiative budget is a placeholder and therefore not allocated by nature of expense, accordingly, the forecasted consultant count based on implied dollar is nil as the forecasted dollar is an unallocated placeholder only.

Question:

a) Please explain why the number of consultants supporting operational activities varied from 15.4 FTE in 2025/26 to a budget of 28.5 FTE in 2026/27. Please elaborate on what program consultants are forecast to support in the current year and why there is a budgeted drop-off in 2027/28.

b) Please explain how the corporation determined the allocation of initiative FTEs Corporate and to Basic for 2026/27.

Rationale for Question:

To understand consulting costs and consultant counts.

RESPONSE:

a) The explanation for the reduction in normal operations external labour budgets between the 2026/27 and 2027/28 forecast years is explained in the IT Chapter under IT

Capacity & Capability Management Figures 13 and 14. The decreased budget is representative of this. The higher consultant count in 2026/27 represents a budget based on a higher historical usage of consultants, including for support of legacy programs and the allocation of budgetary funds for precautionary usage, which is no longer done.

MPI prepares its capacity forecasts based on the best information available at the time, including known operational needs, project demand, historical usage, and expected internal capacity. Actual demand can shift more quickly than the budget process allows MPI to adjust. As a result, MPI may seek approval for external labour on an as-needed basis where required to support critical operational or business needs. Any such approvals would reflect a change in demand or timing rather than a change in the forecasting approach described in the IT Chapter.

b) The tables provided in *PUB (MPI) 1-53* and *Figure EXP App 18-7* provide detailed budget dollars and implied consultant counts. The consultant counts for both Corporate and Basic were calculated based on total dollars / $252,000 annual salary (as noted in *PUB (MPI) 1-126*). Annual salary was calculated based on $125/hour x 8 hours/day x 252 days/year. For periods with actual results, the average consultant rate was used (please refer to *PUB (MPI) 1-53, figure 2* for historical average consultant hourly rate).

PUB (MPI) 2-24

Part and Chapter:	**Part VIII - Expenses, Figure EXP-3 (lines 29-32)** **EXP Appendix 22, section 2.8** **EXP Appendix 23a** **Figure EXP App 6-1, line 34**	**R1 Qn. No.:**	**PUB(MPI) 1-54 (c)**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Initiative Expenses**		
Sub Topic:	**Initiative Implementation Placeholders**		

Preamble to IR (If Any):

Figure EXP App 12-2 allocates the placeholder budgets using the WCCCCR and net incurred claims operating allocator, while Appendix 12 states the allocator selection principle directly: initiative expense allocators "will be reviewed at the inception of each project to confirm their appropriateness based on the specific facts, circumstances, scale and scope of the actual project work."

MPI proposes recovery of $10.1 million in initiative expenses in 2027/28 for closed projects as described in Appendix 23a.

Question:

a) Please explain the basis on which MPI determined that the WCCCCR and Net Claims Incurred allocator is appropriate for the IT Major Programs and Non-Major Programs placeholders, given that Appendix 12 states initiative allocators are reviewed against the facts, circumstances, scale and scope of each project, and no project has yet been identified for this placeholder spending.

b) Please explain why a claims and customer-contact-driven allocator is an appropriate proxy for placeholder spending that is not yet allocated to any specific project or nature of expense.

Rationale for Question:

To understand the basis and governance for the initiative implementation placeholders.

RESPONSE:

a and b) The $10.1M is historical actual implementation spend allocated based on the nature of the initiative expenses. The use of this forecast proxy for placeholder budgeting does not affect rate-setting. MPI is seeking rate recovery in the 2027 GRA based on historical actual initiative expenses for closed projects, as described in *Part VIII EXP - Appendix 23a*, rather than on the placeholder allocation of future uncommitted work. The placeholder therefore informs the overall expense forecast presentation but does not determine the amount proposed for recovery in rates.

As set out in *Part VIII EXP - Appendix 22*, section 2.8, the IT Major Programs implementation amount is intentionally presented as a placeholder because the future work has not yet been sufficiently defined through approved business cases. The Application states that the amount has not been allocated by nature of expense, such as licensing or external labour, or to individual projects. It further states that MPI does not have a sufficiently reliable basis at this time to pre-allocate those future amounts to specific projects or expense categories, because any such allocation would necessarily be preliminary and subject to change. Accordingly, MPI adopted a simplified placeholder approach to reflect the likelihood of continued implementation spending without creating an artificial degree of precision that would require ongoing retrospective justification or reconciliation.

MPI reiterated this rationale in *PUB (MPI) 1-7*. In that response, MPI explained that the placeholder improves the accuracy and reliability of the forecast by avoiding arbitrary early allocations between capital and operating expense, or among specific expense categories, before the underlying work has been sufficiently defined through business casing, the RFP process, and the related Statement of Work. MPI explained that the historical volatility in projected initiative expenses is precisely the issue the placeholder approach is intended to address. Attempting to forecast future initiative

spending at a detailed capital versus operating expense level, or by specific nature of expense, requires assumptions about work that may not yet be scoped, approved, sequenced, or supported by a completed business case. Those assumptions can imply a degree of certainty that does not yet exist and can create the need for later explanations or reconciliations when the actual work plan, timing, vendor model, or delivery approach differs from the preliminary forecast.

With respect to the allocator applied to the placeholder, MPI acknowledges that Appendix 12 states that initiative allocators will be reviewed at the inception of each project based on the facts, circumstances, scale and scope of the actual project work. That principle remains unchanged. The allocator used for the placeholder is not intended to be a final project-specific allocation. It is a forecast proxy used only for budget presentation purposes in circumstances where the future work has not yet been business cased and therefore cannot be reliably assigned to a specific project, cost category, capital or operating treatment, or final line-of-business beneficiary. Selecting another allocator or attempting to construct a more detailed allocation before the work is known, would not be more accurate; it would simply replace a transparent placeholder with a different set of unsupported assumptions.

For that reason, MPI has used the WCCCCR and net incurred claims operating allocator as a reasonable forecast proxy for the placeholder until specific projects are approved and sufficient facts are available to confirm the appropriate allocation. Once individual initiatives are business cased and initiated, MPI will review the allocator at project inception, in accordance with Appendix 12, and determine the appropriate allocation based on the actual facts, circumstances, scale and scope of the approved project work.

PUB (MPI) 2-25

Part and Chapter:	**Part VIII - Expenses, Figure EXP-3 (lines 29-32) EXP Appendix 22, section 2.8 EXP Appendix 23a Figure EXP App 6-1, line 34**	**R1 Qn. No.:**	**PUB(MPI) 1-54d**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures4. Financial forecast**		
Topic:	**Initiative Expenses**		
Sub Topic:	**Initiative Implementation Placeholders**		

Preamble to IR (If Any):

Question:

Please refile Figure PUB 1-54d to include 2026/27 and, if available, also include 2027/28.

Rationale for Question:

To understand the basis and governance for the initiative implementation placeholders.

RESPONSE:

The intent of Figure PUB 1-54d was to present actual initiative expenditures from recent fiscal years to support the reasonableness of the $20 million placeholder for future implementation work. As initiative expenditures for 2026/27 and 2027/28 are already forecast at the placeholder amount of $20 million annually ($15 million for Major Programs and $5 million for EPMO non-Major Programs), and there are no actuals, there are no comparative amounts with which to populate the forecast period.

Preamble to IR (If Any):

MPI has indicated that the Nova project has been terminated, yet spending is going to continue on system modernization.

Question:

a) Please provide the Project NOVA Deferred Development Continuity Schedule in Excel with formulas intact.

b) Please extend the schedule to include 2026/27 and 2027/28.

c) Please identify on this schedule the amortization for 2025/26 relates to (IE R1, R2 etc.)

Rationale for Question:

To understand the completeness of Nova-related losses and the basis for allocating them to Basic.

RESPONSE:

a) This schedule was provided by MPI in *PUB (MPI) 1–057-part c*. Refer to *Appendix 1* for the Project NOVA Deferred Development Continuity Schedule in Excel with formulas intact.

b) As Project NOVA has been closed, there are no further forecasted costs and therefore no data to extend a schedule into the forecast period.

c) Refer to below figure for the 2025/26 Project Nova deferred development amortization by Asset and Line of Business.

PUB (MPI) 2-27

Part and Chapter:	**Part VIII - EXP Appendix 5, 5a, 5bPUB (MPI) 2-60 (2026 GRA)**	**R1 Qn. No.:**	**PUB(MPI) 1-37, PUB(MPI) 1-59**
PUB Approved Issue No.:	**9. Cost of operations and cost containment measures** **4. Financial forecast**		
Topic:	**Financial Forecasts**		
Sub Topic:	**DVA Operations and Funding**		

Preamble to IR (If Any):

Question:

a) Please file an update to PUB(MPI) 2-60 (2026 GRA) extended to 2030/31.

b) Please provide a comparison between (a) and PUB(MPI) 2-60 from the 2026 GRA.

c) Provide any correspondence or analysis on the updated funding agreement for DVA.

d) Please extend Figures 1 and 2 to include the period from 2020/21 to 2024/25.

Rationale for Question:

To understand the change in reserves and their impact on the rate indication.

RESPONSE:

a) Please refer to 2027 GRA Round 1 *PUB (MPI) 1-37* and *PUB (MPI) 1-59* for detail on DVA operating expenses, government funding and surplus/deficit.

b) Please see *Figure 1* below which compares the DVA financials from the 2027 GRA Base filing to that of 2026 GRA. Please note that all this information can also be found in the

Statement of Operations and the Statement of Changes in Equity provided in *PUB (MPI) 1-59*.

c) Please refer to *CC (MPI) 2-13* regarding an updated funding agreement for DVA.

d) For fiscal years 2020/21 through 2024/25, please refer to the DVA Statement of Operations and DVA Statement of Financial Position included in the notes to the audited financial statements in MPI's Annual Reports.

PUB (MPI) 2-28

Part and Chapter:	**Part II – COM Appendix 3 2025 GRA, MPI Exhibit 8, Part IV – BMK Appendix 4, Figure BMK App 4-1**	**R1 Qn. No.:**	**PUB(MPI) 1-32**
PUB Approved Issue No.:	**5. Updates to the Corporate Strategic Plan and the development/implementation and alignment of KPIs**		
Topic:	**Multi-Year Strategy**		
Sub Topic:	**Strategic KPIs and Performance Benchmarks**		

Preamble to IR (If Any):

Reference – Part e) - In response to part e) of PUB (MPI) 1-32, MPI noted "The strategic KPIs were developed based on the specific outcomes anticipated through the Corporate Strategic Plan rather than in comparison to other jurisdictions identified through previous benchmarking exercises."

Reference – Part f) - "% of Planned Work Completed Within Schedule"

Reference – Part h) - In response to part h), MPI noted "Customer Satisfaction Although the planned increases are modest, the targets require MPI to maintain performance gains while continuing to improve customer experience in an environment of changing customer expectations and service demands."

Question:

a) Referring to Part e), please articulate the value driven within MPI and MPI's stakeholder community of the prior benchmarking exercises, and how these comparisons aided MPI management in assessing and implementing performance improvement opportunities.

b) Please comment on how MPI intends to replace the value identified above but lost with the termination of the external benchmarking exercise.

c) Please comment on MPI's intent to conduct performance comparisons to other jurisdictions or companies alongside its inward-focused measures.

d) Referring to Part f), please provide the formula and specific inputs to measure and assess the "% of Planned Work Completed Within Schedule" for FY25/26, including definitions or semantics for the inputs, the list of planned work packages used to develop the result and the data sources that feed the formula for the measure.

e) Please comment on the selection process for choosing the "% of Planned Work Completed Within Schedule" measure versus other measures of efficiency/ effectiveness. Please also comment on the factors of cost and quality noted in PUB (MPI) 1-32, and any MPI consideration given to an index measure for work efficiency/effectiveness that included schedule, cost and quality.

f) Please describe the "environment of changing customer expectations and service demands". How have customer expectations and service demands changed, and how has MPI determined what new, evolving or incremental expectations customers are demanding (e.g. surveys, focus groups, etc.).

Rationale for Question:

To understand the rationale for the individual Strategic KPIs and the set of Strategic KPIs as a whole.

RESPONSE:

a) The prior Crown benchmarking exercise provided MPI and its stakeholders with a common comparative view of selected corporate and operational measures across MPI, SGI/SAF and ICBC. Where the measures, definitions and operating contexts were sufficiently comparable, the exercise provided useful external context for interpreting MPI's results and understanding differences among the Crown insurers.

For MPI management, the comparisons supplemented internal performance information by helping identify results that warranted further review. Comparative differences could be considered alongside MPI's own historical trends, budgets, forecasts, operating model and

business conditions to determine whether further analysis or performance-improvement activity was appropriate. The comparisons were an input to management assessment; they did not, on their own, establish that MPI's performance was satisfactory or deficient, nor did they prescribe a particular management response.

For stakeholders, the exercise provided additional context regarding MPI's performance relative to other public auto insurers. Its usefulness, however, depended on the measures being based on current, consistently defined and comparable information. Differences in insurance products, mandates, accounting treatment, service-delivery models and operating environments would limit the conclusions that could appropriately be drawn from individual results.

The former benchmarking exercise was therefore one component of MPI's broader performance measurement and management system. It complemented, but did not replace, MPI's internal trend analysis, budgeting and forecasting processes, operational reporting and management oversight. MPI continues to use these mechanisms, together with targeted external comparative information where meaningful and available, to assess results and identify performance-improvement opportunities.

b) MPI does not agree that the value of performance comparison was lost with the discontinuation of the former Crown benchmarking exercise. Rather, the specific public benchmarking schedule was discontinued because certain comparative information from SGI/SAF and ICBC was no longer publicly disclosed and could only be used for internal collaboration. Reconstructing that schedule using historical or publicly available information would not provide the same comparability, reliability or current decision usefulness as the former jointly understood exercise.

MPI continues to obtain the performance insights previously supported by benchmarking through a combination of:

- strategic KPIs that assess the enterprise-level outcomes of the Corporate Strategic Plan;
- internal trend and variance analysis;
- comparison of actual results against budgets, forecasts, milestones and historical performance;

- operational and initiative-level performance reporting; and
- targeted external comparative information where measures are sufficiently comparable and the information is available for appropriate use.

These mechanisms serve complementary purposes. MPI's strategic KPIs provide a stable view of whether the Corporate Strategic Plan is producing its intended outcomes. Internal trend, budget and forecast analysis help management understand the drivers of MPI's results and identify areas requiring attention. Targeted external comparisons provide additional context and learning where differences in definitions, mandates, products and operating models do not prevent meaningful comparison.

Accordingly, MPI has not sought to replace the former 17-measure benchmarking schedule with a single alternative exercise. It has adopted a broader approach that combines internally governed performance measures with targeted external context where meaningful and available. This preserves the value of external learning while ensuring management decisions are based on current, reliable and useful information.

c) MPI does not characterize its strategic KPIs and broader performance measures as solely inward-focused. The strategic KPIs assess enterprise-level outcomes relevant to MPI and its stakeholders, including affordability, financial stability, organizational effectiveness, customer value and corporate responsibility. They are supported by internal trend analysis, budget and forecast comparisons, operational reporting and initiative-level performance measures.

MPI intends to continue conducting performance comparisons with other jurisdictions or organizations where the measures are sufficiently comparable, the information is current and reliable, and its use is permitted. As explained in ***PUB (MPI) 1-33***, MPI continues to use targeted external comparative information where it is meaningful and available.

External comparisons may provide useful context, identify alternative practices and support further investigation of performance-improvement opportunities. However, differences in mandates, products, coverage, accounting practices, service-delivery models and operating environments must be considered when interpreting comparative results. For this reason, MPI does not intend to recreate the former 17-measure Crown benchmarking schedule using incomplete or non-comparable public information.

External comparison will therefore be used alongside, rather than in place of MPI's internally governed measures. Strategic KPIs will continue to assess whether MPI's Corporate Strategic Plan is achieving its intended outcomes, while targeted comparisons with other jurisdictions or organizations will provide additional context and opportunities for learning where meaningful and feasible.

d) For purposes of this measure, the unit of measurement was a corporate initiative included in the FY2025/26 annual planning portfolio and scheduled to complete during FY2025/26. An initiative was counted as complete where its year-end status was "Done." Initiatives recorded as planned or unplanned carry-over were included in the denominator but counted as incomplete. Initiatives with an approved year-end status of cancelled, deferred, or on hold were excluded from the denominator.

The FY2025/26 portfolio contained 30 initiatives. Four initiatives were excluded because they were cancelled, deferred, or on hold, resulting in 26 included initiatives. Of those 26 initiatives, 17 were complete and nine were incomplete at fiscal year-end. The result was:

17 ÷ 26 × 100 = 65.38%, rounded to 65%.

Total Initiatives Start of 25/26	30
Total Not Included (Cancelled/Deferred/On Hold)	4
Total Not Complete	9

Migrate Physical Servers to Cloud Environment	Done	

e) MPI refers to its response to *CC (MPI) 2-10(g)*. As explained in that response, schedule performance was selected because it directly measures whether MPI establishes realistic annual commitments and delivers them as planned. Cost and quality are monitored separately through MPI's financial and initiative-level controls. MPI did not adopt a composite schedule, cost and quality index because maintaining separate measures provides clearer visibility into each aspect of performance.

f) The "environment of changing customer expectations and service demands" reflects changes in how customers expect MPI to deliver its services and the volume of services MPI is required to provide.

MPI's research indicates that customers' core priorities have remained relatively consistent. Manitobans continue to place the greatest importance on affordable insurance, honesty and transparency, knowledgeable staff, trustworthiness and accountability. However, expectations for service delivery continue to evolve, with customers expecting clearer information, timely and predictable service, convenient access, effective issue resolution and respectful interactions.

Service demands have also increased as Manitoba's population and the number of drivers and vehicles have grown. The 2027 GRA forecasts annual driver-unit growth of 1.35%[1] and vehicle-unit growth of approximately 1.85% to 1.87%.[2] This growth affects demand for driver licensing, vehicle registration and related insurance services.

[1] Part VIII Revenues Chapter Figure REV-22;
[2] Part VIII Revenues Chapter Figure REV-8.

MPI identifies customer expectations through its ongoing Voice of Customer program, including the recurring CX Vision & Image Study, customer-experience surveys across major customer journeys, analysis of satisfaction drivers and open-ended customer feedback. These sources allow MPI to monitor what customers value, how expectations differ by journey and where service improvements are required.

PUB (MPI) 2-29

Part and Chapter:	**2025 GRA, MPI Exhibit 8, Part IV – BMK Appendix 4, Figure BMK App 4-1**	**R1 Qn. No.:**	**PUB (MPI) 1-33**
PUB Approved Issue No.:	**5.Updates to the Corporate Strategic Plan and the development/implementation and alignment of KPIs**		
Topic:	**Multi-Year Strategy**		
Sub Topic:	**Strategic KPIs and Performance Benchmarks**		

Preamble to IR (If Any):

Question:

a) Please confirm that MPI no longer keeps track of the measurement data for the 17 measures previously incorporated into the benchmarking exercise.

b) Please confirm that MPI no longer feels it is useful to continue tracking the 17 internal measures for internal variance analysis and management decision-making purposes (despite there being no competitive data to compare against).

Rationale for Question:

To understand MPI performance results from 2022/23 to 2025/26 and going forward.

RESPONSE:

a) and b) MPI does not track the 17 legacy Crown benchmarking measures in the same form as they were previously incorporated into the discontinued Crown benchmarking exercise. As stated in MPI's 2026 GRA evidence and responses, including PUB (MPI) 2-63, the prior operational benchmarking exercise with SGI/SAF and ICBC was discontinued because certain comparative data from

other Crown insurers is no longer publicly disclosed and is subject to restrictions on external filing.

MPI does not agree that discontinuing the legacy 17-measure schedule means that performance measurement, internal variance analysis, or management decision-making are no longer useful. Rather, MPI has moved away from reproducing the historical Crown benchmarking schedule because, without current and comparable external data from SGI/SAF and ICBC, that schedule no longer provides the same level of comparability, reliability, or decision-usefulness as the former jointly understood benchmarking exercise.

MPI continues to monitor performance through multiple KPI frameworks, quarterly reporting, operational reporting, budgeting processes, and targeted external comparative information where meaningful and available. This includes, among other measures, strategic KPIs, budgeting framework KPIs, customer and service measures, and claims cost control KPIs. MPI also compares its own internal trends over time and assesses KPI results against budget and forecast expectations to support tracking, variance analysis, and management decision-making. The claims cost control KPIs are specifically designed to provide visibility into key claims cost drivers, identify trends, support operational decisions, and improve cost management in areas where MPI has some degree of operational influence, including physical damage claims activities such as repair, total loss, salvage, and subrogation.

MPI also continues to compare its performance to peers and industry information where the data is meaningful, available, and appropriately comparable. As explained in PUB (MPI) 2-63, meaningful external comparisons are conducted particularly in areas where MPI shares common vendors with other insurers, such as Mitchell International and CarPart, which provide standardized information on repair costs and service metrics. MPI also uses other industry and peer information as appropriate to provide external context. However, this information must be interpreted with care because insurers operate under different mandates, systems, service delivery models, market conditions, regional

cost structures, and modernization stages. As a result, peer information is used as directional context rather than as a definitive benchmark unless the underlying definitions, methodologies, and operating context are sufficiently comparable.

MPI's position is that the former 17-measure Crown benchmarking schedule is no longer maintained in that format because it cannot be consistently updated with data that is sufficiently reliable and comparable for external filing. MPI continues to rely on internally governed KPIs (previously reported items in this schedule like revenues, operating expenses, number of claims, loss ratios, expense ratios etc.), including claims cost control KPIs, internal trend analysis over time, comparison of KPI results against budget and forecast expectations, and targeted peer and industry comparative information where meaningful and available, to support tracking, variance analysis, management decision-making, accountability, and continuous improvement.

PUB (MPI) 2-30

Part and Chapter:	**Part VIII – EAR Attachment B**	**R1 Qn. No.:**	**PUB (MPI) 1-61**
PUB Approved Issue No:	**10. Claims Forecasting** **13. Run-off of prior years**		
Topic:	**Accident Benefits – Weekly Indemnity**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-61:

> The update to the PIPP termination rates reduced undiscounted case reserves by approximately $31M. The corresponding impact on the undiscounted IBNR was an increase of approximately 83M. As a result, the undiscounted actuarial ultimate losses increased by approximately $51.2M, which is the unfavorable development shown in the valuation report and Exhibit 3.
>
> The $18M decrease discussed in Part VIII EAR Attachment B reflects the overall impact on Weekly Indemnity reserves after considering all components of the reserve. While undiscounted ultimate losses increased by $51.2M, changes in undiscounted IBNR, ULAE reserve, inflation, discounting and risk adjustment resulted in a net increase of approximately $13M from the actuarial valuation assumption changes. When combined with the $31M reduction in case reserves from the updated termination rates, the overall impact was a reduction of approximately $18M in Weekly Indemnity reserves.

Question:

a) Please confirm that the following interpretation of the movements as set out below is correct:

   i) Reduction in undiscounted case reserves -$31 million.

ii) Increase in undiscounted IBNR +$83 million.

iii) Changes in ULAE reserve, inflation, discounting and risk adjustment is -$69 million

b) Please quantify the impacts of each of the respective changes: ULAE reserve, inflation, discounting, and risk adjustment.

c) Please confirm that the average time until payment for Weekly Indemnity has increased for the outstanding claims.

d) Please provide the average time until payment for Weekly Indemnity for the test year for the 2026 GRA and for the 2027 GRA.

e) Please confirm that the projected claims costs by fiscal year for rating year 2027/28 for Weekly Indemnity as shown in columns 6 and 7 in Table 2 of RI Appendix 1 reflect the changes in payment pattern from the PIPP termination study. If not, please provide a revised rate indication in which the changes in payment pattern are reflected.

Rationale for Question:

To understand the impact of the changes for Weekly Indemnity.

RESPONSE:

The figures shown in *Part VIII EAR Attachment B – PIPP Termination Rate & Methodology Update Project* reflect the impact across all accident years. By contrast, the *Report on the Valuation of Actuarial and Other Policy Liabilities* presents the development of undiscounted ultimate estimates for only the most recent 20 accident years. As a result of these differing scopes, variances may exist between the two views, as illustrated in *Figure 1*. Accordingly, the responses below refer to the impact across all accident years as presented in *Part VIII EAR Attachment B – PIPP Termination Rate & Methodology Update Project.*

Figure 1 – PIPP Termination Rate & Methodology Update Project Impact

(1) Accident Years	(2) Case Reserves	(3) IBNR	(4) Ultimate Loss	(5) ULAE reserve	(6) Inflation	(7) Discounting	(8) Risk Adjustment	(9) Liability for Incurred Claim
All	(30,884,949)	83,423,234	52,538,285	10,197,114	144,213,050	(224,510,958)	(477,510)	(18,040,018)
2006 to 2025	(40,118,904)	91,337,846	51,218,942	10,691,759	115,844,685	(177,424,060)	9,008	340,334

(1) April 1 to March 31
(4) = (2) + (3)
(9) = (4) + (5) + (6) + (7) + (8)

a) The reduction in discounted case reserves of $31 million and increase in undiscounted IBNR of $83 million are consistent. The remaining impact from change in ULAE reserve, inflation, discounting and risk adjustment is -$71 million resulting in the overall $18 million decrease to reserves as shown in *Figure 1*.

b) As shown in *Figure 1*, the impact of each respective change is as follows:

ULAE reserve:	Increase of $10.2 million
Inflation:	Increase of $144.2 million
Discounting:	Decrease of $224.5 million
Risk Adjustment:	Decrease of $0.5 million

The reason for listing these together is that they are all closely related as a part of the new valuation methodology. All these impacts were created by the changes to the modelling process and are not stepwise sequential changes. As such, it can be misleading to attempt to interpret each of these on an individual basis.

c) Yes, for outstanding Weekly Indemnity claims, the average estimated length of time for payments has increased.

d) The average time until payment for Weekly Indemnity is projected to increase from 16.6 years in the 2026/27 forecast from the 2026 GRA to 19.9 years in the 2027/28 forecast from 2027 GRA.

e) Confirmed.

PUB (MPI) 2-31

Part and Chapter:	**Part VI Claims Forecasting**	**R1 Qn. No.:**	**PUB (MPI) 1-62**
PUB Approved Issue No:	**10. Claims Forecasting** **13. Run-off of prior years**		
Topic:	**Accident Benefits – Personal Care Assistance**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-62:

> The update to the PIPP termination rates reduced undiscounted case reserves by approximately $43M. The corresponding impact on the undiscounted IBNR was an increase of approximately $44M. As a result, the undiscounted actuarial ultimate losses increased by approximately $0.9M, which is the unfavourable development shown in the valuation report and Exhibit 3.
>
> The $82M decrease discussed in Part VIII EAR Attachment B reflects the overall impact on Accident Benefit Other - Indexed reserves after considering all components of the reserve. While undiscounted ultimate reserves increased by $0.9M, changes in undiscounted IBNR, ULAE reserve, inflation, discounting and risk adjustment resulted in a net decrease of approximately $39M from the actuarial valuation assumption changes. When combined with the $43M reduction in case reserves from the updated termination rates, the overall impact was a reduction of approximately $82M in Accident Benefit Other Indexed reserves.

Question:

a) Please confirm that the following interpretation of the movements as set out below is correct:

   i) Reduction in undiscounted case reserves -$43 million.

ii) Increase in undiscounted IBNR +$44 million.

iii) Changes in ULAE reserve, inflation, discounting and risk adjustment -$82 million.

b) Please quantify the impacts of each of the respective changes: ULAE reserve, inflation, discounting, and risk adjustment.

c) Please confirm that the average time until payment for Accident Benefits – Personal Care Assistance has increased for the outstanding claims.

d) Please confirm that the projected claims costs by fiscal year for rating year 2027/28 for Personal Care Assistance as shown in columns 6 and 7 in Table 2 of RI Appendix 1 reflect the changes in payment pattern from the PIPP termination study. If not, please provide a revised rate indication in which the changes in payment pattern are reflected.

Rationale for Question:

To understand the impact of the changes for Personal Care Assistance.

RESPONSE:

The figures shown in *Part VIII - EAR Attachment B – PIPP Termination Rate & Methodology Update Project* reflect the impact across all accident years. By contrast, the *Report on the Valuation of Actuarial and Other Policy Liabilities* presents the development of undiscounted ultimate estimates for only the most recent 20 accident years. As a result of these differing scopes, variances may exist between the two views, as illustrated in *Figure 1*. Accordingly, the responses below refer to the impact across all accident years as presented in *Part VIII - EAR Attachment B – PIPP Termination Rate & Methodology Update Project*.

Figure 1 PIPP Termination Rate & Methodology Update Project Impact

(1) Accident Years	(2) Case Reserves	(3) IBNR	(4) Ultimate Loss	(5) ULAE reserve	(6) Inflation	(7) Discounting	(8) Risk Adjustment	(9) Liability for Incurred Claim
All	(43,074,984)	47,919,652	4,844,668	3,957,324	120,444,048	(206,383,826)	(4,909,721)	(82,047,507)
2006 to 2025	(43,349,337)	44,214,647	865,310	3,380,997	93,421,053	(158,324,247)	(3,860,733)	(64,517,621)

(1) April 1 to March 31
(4) = (2) + (3)
(9) = (4) + (5) + (6) + (7) + (8)

a) The reduction in discounted case reserves of $43 million is consistent between both views, while the total increase in undiscounted IBNR from all accident years is $48 million along with a decrease of $87 million from change in ULAE reserve, inflation, discounting and risk adjustment.

b) As shown in ***Figure 1***, the impact of each respective change is as follows:

ULAE reserve: Increase of $4.0 million
Inflation: Increase of $120.4 million
Discounting: Decrease of $206.4 million
Risk Adjustment: Decrease of $4.9 million

The reason for listing these together is that they are all closely related as a part of the new valuation methodology. All these impacts were created by the changes to the modelling process and are not stepwise sequential changes. As such, it can be misleading to attempt to interpret each of these on an individual basis.

c) Yes, for outstanding Personal Care Assistance claims, the average estimated length of time for payments to continue has increased.

d) Confirmed.

PUB (MPI) 2-32

Part and Chapter:	**Part VII – Rate Indication**	**R1 Qn. No.:**	**RI Appendix 1 Table 2**
PUB Approved Issue No:	**10. Claims Forecasting**		
Topic:	**Accident Benefits**		
Sub Topic:			

Preamble to IR (If Any):

For each of the Accident Benefits coverages, at the bottom of the respective Table 2, there are cashflows projected to occur after 2082/83, in the row labelled “Thereafter” in column 7 Rating Year 2027/28 Indexed. The following table summarizes the values for each coverage (in $000s):

Coverage	Rating Year 2027/28 Indexed (col 7)	Discounted Paid (col 10)	Implied Discount Factor	Discount Factor for 2082/83
Weekly Indemnity	74,231	16,329	22.00%	9.18%
Other (indexed)	9,970	2,619	26.27%	9.18%
Travel (indexed	68	20	29.57%	9.18%
Personal Care Assistance (indexed)	34,597	8,365	24.18%	9.18%
Other (non-indexed)	368	167	45.54%	9.18%

As calculated, the implied discount factor is greater than the discount factor for 2082/83 which would imply payment is expected to occur prior to 2082/83

Question:

For each of the above coverages, please confirm that the amounts in “Thereafter” are included in the by-year amounts, and hence they are not included in the total at the bottom. If not, please provide a corrected payment pattern which reflects the expected payment date, such that the discount factor is consistent with the payment date, and provide a corrected RI Appendix 1 Table 2 for each coverage.

Rationale for Question:

To better understand the payment patterns for Accident Benefits.

RESPONSE:

Confirmed, the amounts in “Thereafter” are included in the by-year amounts and hence are not included in the total at the bottom. The row labelled “Thereafter” is no longer necessary.

PUB (MPI) 2-33

Part and Chapter:	**Part VI Claims Forecasting**	**R1 Qn. No.:**	**PUB (MPI) 1-70** **PUB (MPI) 1-71b** **PUB (MPI) 1-72b** **PUB (MPI) 1-73b** **PUB (MPI) 1-74**
PUB Approved Issue No:	**orecasting**		
Topic:	**Collision, Accident Benefits, and Comprehensive**		
Sub Topic:			

Preamble to IR (If Any):

PUB (MPI) 1-70 to 1-74 requested the use of alternative trends.

Question:

a) For Collision:

i) Please provide a graph showing:

(1) the historical ultimate loss cost for years 2012 to 2025 at a deductible level of $750;

(2) the 2027 GRA selected loss cost but at $750 deductible for consistency for the five projected years; and

(3) PUB (MPI) 1-70a projected ultimate loss cost (at the same 750 deductible level) for the five projected years.

ii) Please compare the projected loss costs of the two approaches (the filed approach and the alternative approach) and provide MPI's perspective on the strengths and weaknesses of each approach and the resulting projected loss costs.

b) For Accident Benefits Other indexed:

i) Please provide a graph showing:

(1) The historical ultimate loss cost for accident years 2012 to 2025;

(2) the 2027 GRA selected loss cost for the five projected years; and

(3) PUB (MPI) 1-71b projected ultimate loss cost for the five projected years.

ii) Please compare the projected loss costs of the two approaches and provide MPI's perspective on the strengths and weaknesses of each approach and the resulting projected loss costs.

c) For Accident Benefits Other non-indexed:

i) Please provide a graph showing:

(1) The historical ultimate loss cost for accident years 2012 to 2025;

(2) the 2027 GRA selected loss cost for the five projected years; and

(3) PUB (MPI) 1-72b projected ultimate loss cost for the five projected years.

ii) Please compare the projected loss costs of the two approaches and provide MPI's perspective on the strengths and weaknesses of each approach and the resulting projected loss costs.

d) For Comprehensive Partial Theft:

i) Please provide a graph showing:

(1) the historical ultimate loss cost for years 2012 to 2025 at a deductible level of $750;

(2) the 2027 GRA selected loss cost at $750 deductible for the five projected years; and

(3) PUB (MPI) 1-73b projected ultimate loss cost (at the same deductible level of 750) for the five projected years.

ii) Please compare the projected loss costs of the two approaches and provide MPI's perspective on the strengths and weaknesses of each approach and the resulting projected loss costs.

e) For Comprehensive Total Theft:

i) Please provide a graph showing:

(1) the historical ultimate loss cost for years 2012 to 2025 at a deductible level of $750;

(2) the 2027 GRA selected loss cost at $750 deductible for the five projected years; and

(3) PUB (MPI) 1-74a projected ultimate loss cost (at the same deductible level of 750) for the five projected years.

ii) Please compare the projected loss costs of the two approaches and provide MPI's perspective on the strengths and weaknesses of each approach and the resulting projected loss costs.

Rationale for Question:

To gain more insight into the loss cost trends.

RESPONSE:

a) For Collision:

Figure 1 Basic Collision - Ultimate Loss Cost Comparison Chart

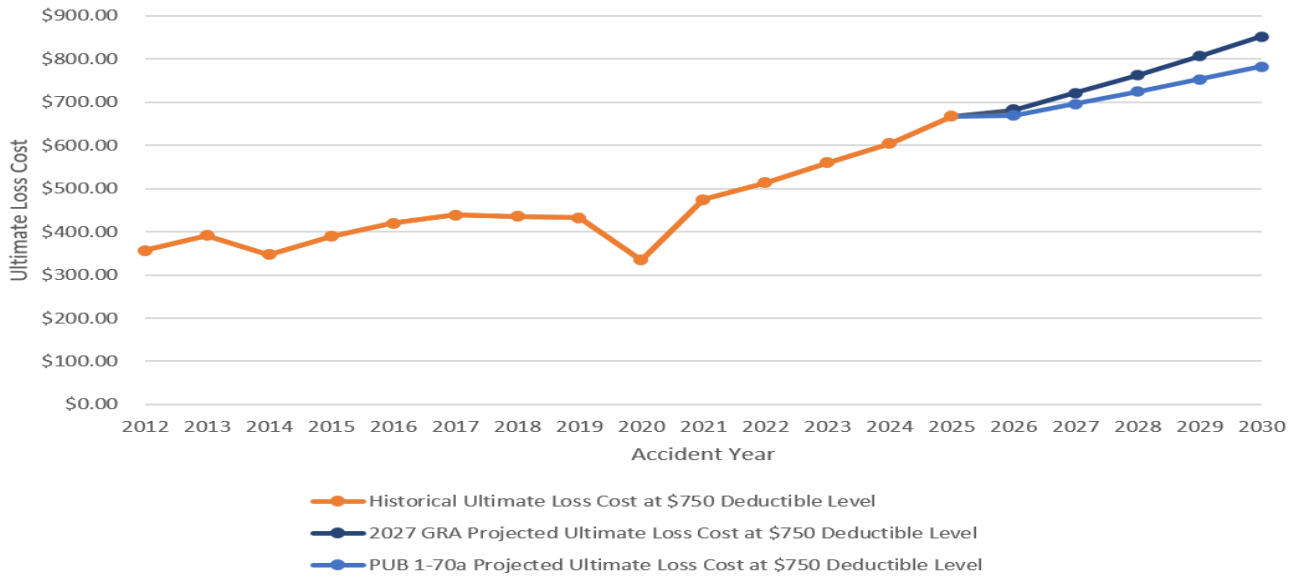

Figure 2 Basic Collision - Ultimate Loss Cost Projection Comparison

Line No.	(1) Accident Year	(2) 2027 GRA Ultimate Loss Cost	(3) PUB 1-70a Ultimate Loss Cost	(4) $ Difference	(5) % Difference
1	**2026**	$681.79	$669.41	($12.38)	-1.82%
2	**2027**	$721.33	$696.03	($25.31)	-3.51%
3	**2028**	$762.45	$723.70	($38.74)	-5.08%
4	**2029**	$805.91	$752.48	($53.42)	-6.63%
5	**2030**	$851.84	$782.41	($69.44)	-8.15%
6	(1) April 1 to March 31				
7	(2) 2027 GRA projected ultimate loss cost at $750 deductible level				
8	(3) PUB 1-70a projected ultimate loss cost at $750 deductible level				
9	(4) = (3) - (2)				
10	(5) = (3) / (2) - 1				

The alternative approach in PUB 1-70a applies the selected historical severity trend of 3.98% uniformly to the projected period. It provides a useful sensitivity test of MPI's future severity selection. However, it assumes that the aggregate historical trend is directly applicable to future years and does not explicitly reflect expected changes in the underlying drivers of Collision severity, (e.g., known changes in labour rate or material costs).

In contrast, MPI's 2027 GRA future severity trend is developed using a component-based, forward-looking analysis. As described in CF-12.1, the approach considers expected changes in repair-cost components, including labour rates, parts costs, labour hours, parts count and materials. The resulting repair severity trend is then combined with the expected total loss severity trend based on their respective weights. This provides a more direct link between the projected severity trend and the factors expected to affect Collision claim costs during the forecast period.

The principal limitation of MPI's filed approach is that it requires more assumptions and is therefore subject to uncertainty if the underlying repair-cost components develop differently than expected. Nevertheless, MPI considers the filed approach more likely to provide a reasonable estimate of future Collision loss costs because it explicitly reflects the underlying cost drivers expected to apply during the forecast period, while the alternative is more appropriately viewed as a sensitivity scenario.

b) For Accident Benefits Other (Indexed):

Figure 3 ABO Indexed - Ultimate Loss Cost Comparison Chart

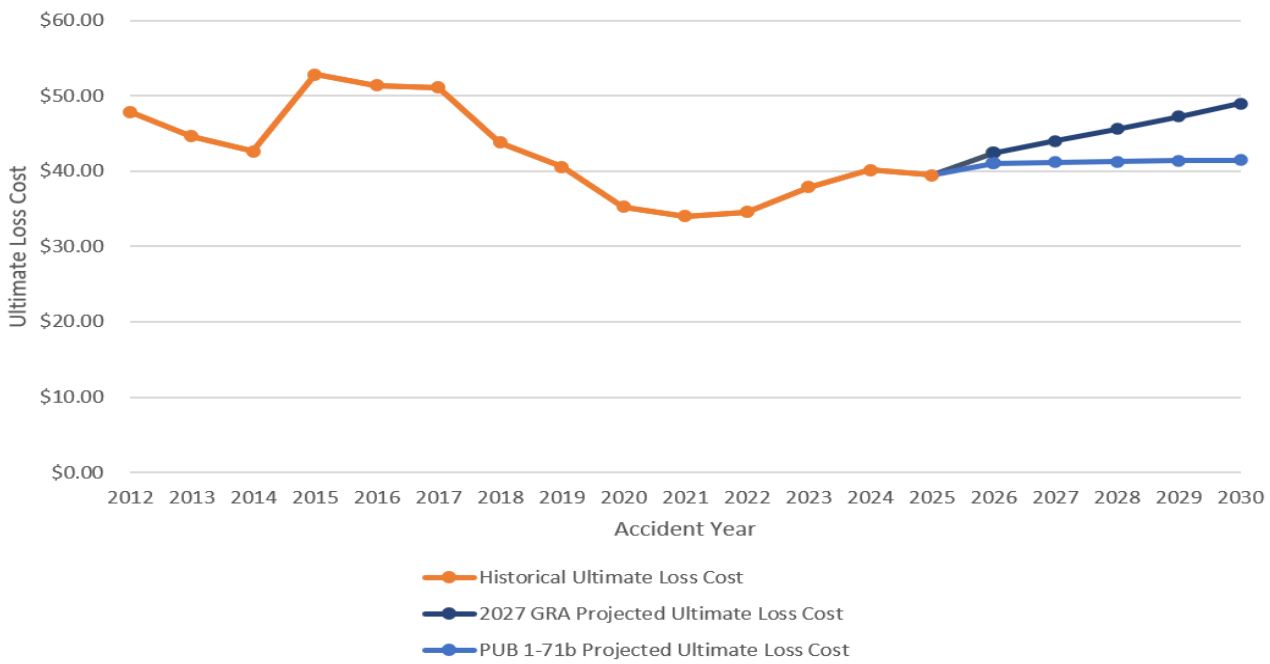

Figure 4 ABO Indexed - Ultimate Loss Cost Projection Comparison

Line No.	(1) Accident Year	(2) 2027 GRA Ultimate Loss Cost	(3) PUB 1-71b Ultimate Loss Cost	(4) $ Difference	(5) % Difference
1	**2026**	$42.44	$41.06	($1.39)	-3.27%
2	**2027**	$43.98	$41.15	($2.83)	-6.43%
3	**2028**	$45.58	$41.25	($4.33)	-9.49%
4	**2029**	$47.24	$41.35	($5.88)	-12.45%
5	**2030**	$48.95	$41.45	($7.50)	-15.32%

6 (1) April 1 to March 31
7 (2) 2027 GRA projected ultimate loss cost
8 (3) PUB 1-71b projected ultimate loss cost
9 (4) = (3) - (2)
10 (5) = (3) / (2) - 1

The PUB 1-71b alternative produces lower projected loss costs than the 2027 GRA filed approach because it applies the longer-term historical severity trend of 3.12% for the future projection period, rather than continuing the selected 2021–2025 severity trend of 6.60%. The difference in projected loss costs therefore reflects the lower future severity trend assumption under the alternative approach.

The principal strength of the PUB 1-71b approach is that it places weight on a longer historical period and may reduce the influence of shorter-term volatility or unusually high recent severity experience. It also provides a useful sensitivity test of the impact of using a lower, longer-term future severity trend.

However, the limitation of this approach is that it assumes future severity will revert to the longer-term average trend without specific evidence that such a change is expected after 2025. In MPI's view, the more recent 2021–2025 experience is relevant because it reflects the current cost environment affecting Accident Benefits Other (Indexed) claims. As described in CF.2.1, "Health Care inflation rate peaked at 7.50% in April 2023 but began gradually subsiding thereafter. Inflation has begun rising again, reaching 4.46% between March 2025 and March 2026." If the 2021–2025 severity trend is considered an appropriate basis for the selected historical trend, then MPI does not believe there is sufficient support to select a

materially lower future trend absent evidence that the underlying cost drivers are expected to moderate.

MPI's filed approach has the strength of maintaining consistency between the selected past severity trend and the future severity trend, which MPI generally considers appropriate unless there is evidence that future experience is expected to differ from recent experience. The limitation of the filed approach is that it places greater weight on the recent higher trend and could overstate projected loss costs if severity growth moderates toward the longer-term average. In addition, MPI selected the trending period that maintained the highest adjusted R^2 value across all other time periods.

For these reasons, MPI considers the filed approach reasonable because there is no clear evidence supporting a post-2025 reduction in the severity trend, and the PUB 1-71b approach is more appropriately viewed as a sensitivity scenario rather than MPI's best estimate.

c) For Accident Benefits Other (Non-Indexed):

Figure 5 ABO Non-Indexed - Ultimate Loss Cost Comparison Chart

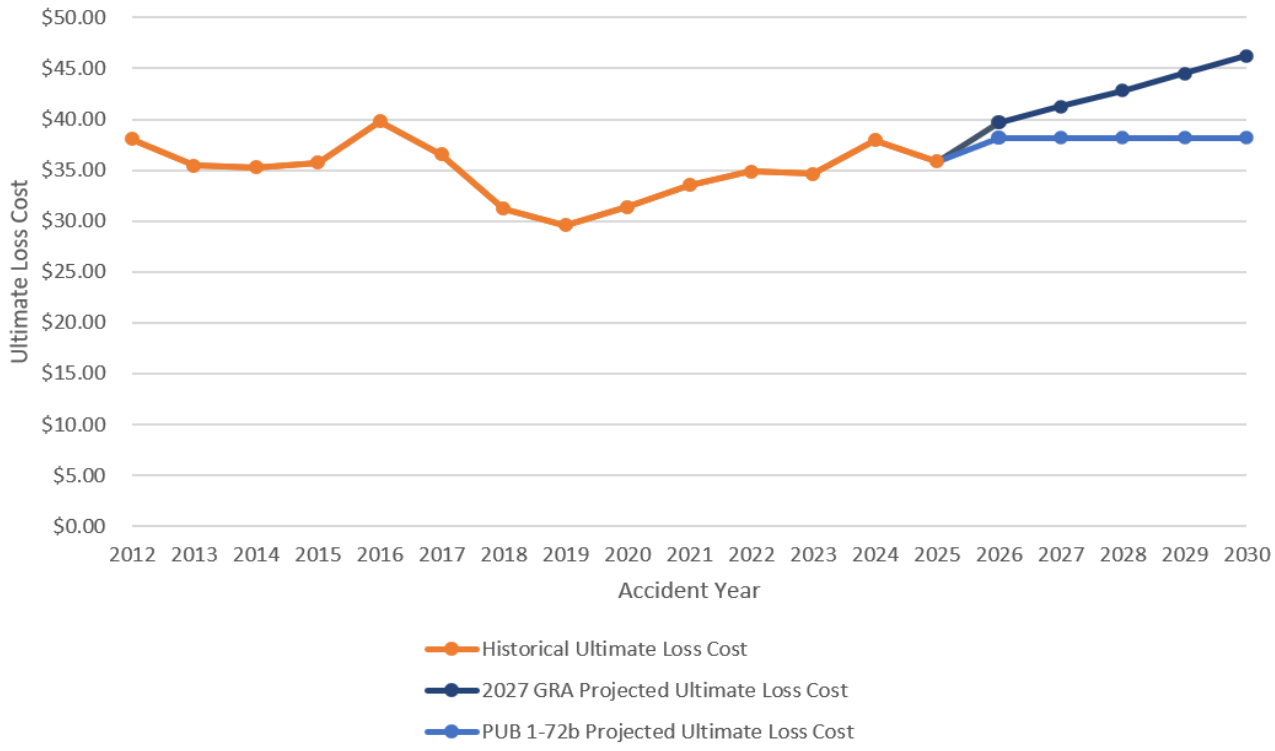

Figure 6 ABO Non-Indexed - Ultimate Loss Cost Projection Comparison

Line No.	(1) Accident Year	(2) 2027 GRA Ultimate Loss Cost	(3) PUB 1-72b Ultimate Loss Cost	(4) $ Difference	(5) % Difference
1	**2026**	$39.67	$38.18	($1.49)	-3.76%
2	**2027**	$41.23	$38.18	($3.04)	-7.38%
3	**2028**	$42.84	$38.18	($4.66)	-10.87%
4	**2029**	$44.51	$38.18	($6.33)	-14.22%
5	**2030**	$46.25	$38.18	($8.07)	-17.45%

6 (1) April 1 to March 31
7 (2) 2027 GRA projected ultimate loss cost
8 (3) PUB 1-72b projected ultimate loss cost
9 (4) = (3) - (2)
10 (5) = (3) / (2) - 1

The PUB 1-72b loss cost projection assumes a 0% future loss cost trend while retaining the 2027 GRA selected past trend of 3.91%. This produces lower projected loss costs than MPI's filed approach because the projected years do not reflect continued loss cost growth.

The principal strength of the PUB 1-72b approach is that a 0% future trend is broadly consistent with the longer-term 2012–2025 loss cost experience and may reduce the influence of more recent increases that could prove temporary. It also provides a useful sensitivity test of the impact of assuming that recent loss cost growth does not continue into the forecast period.

However, the limitation of this approach is that it assumes future loss cost growth will moderate to 0% after 2025, despite increasing loss cost experience since 2019. In MPI's view, if the more recent increasing experience is considered credible for selecting the 3.91% past trend, then there is not sufficient support to reduce the future trend to 0% absent evidence that the underlying drivers of that increase are expected to dissipate.

MPI's filed approach has the strength of maintaining consistency between the selected past and future loss cost trends and reflects the more recent increasing experience observed since 2019. The limitation of the filed approach is that it could overstate projected loss costs if the recent increase is temporary and future experience reverts to the longer-term flat trend.

On balance, MPI considers the filed approach reasonable because there is no clear evidence supporting a post-2025 reduction in the loss cost trend to 0%. If the recent increasing experience were instead considered random variation within a longer-term flat trend, then a 0% trend for both past and future years would be more internally consistent, as reflected in PUB 1-72a.

d) For Comprehensive Attempted & Partial Theft:

Figure 7 Comprehensive Attempted & Partial Theft - Ultimate Loss Cost Comparison Chart

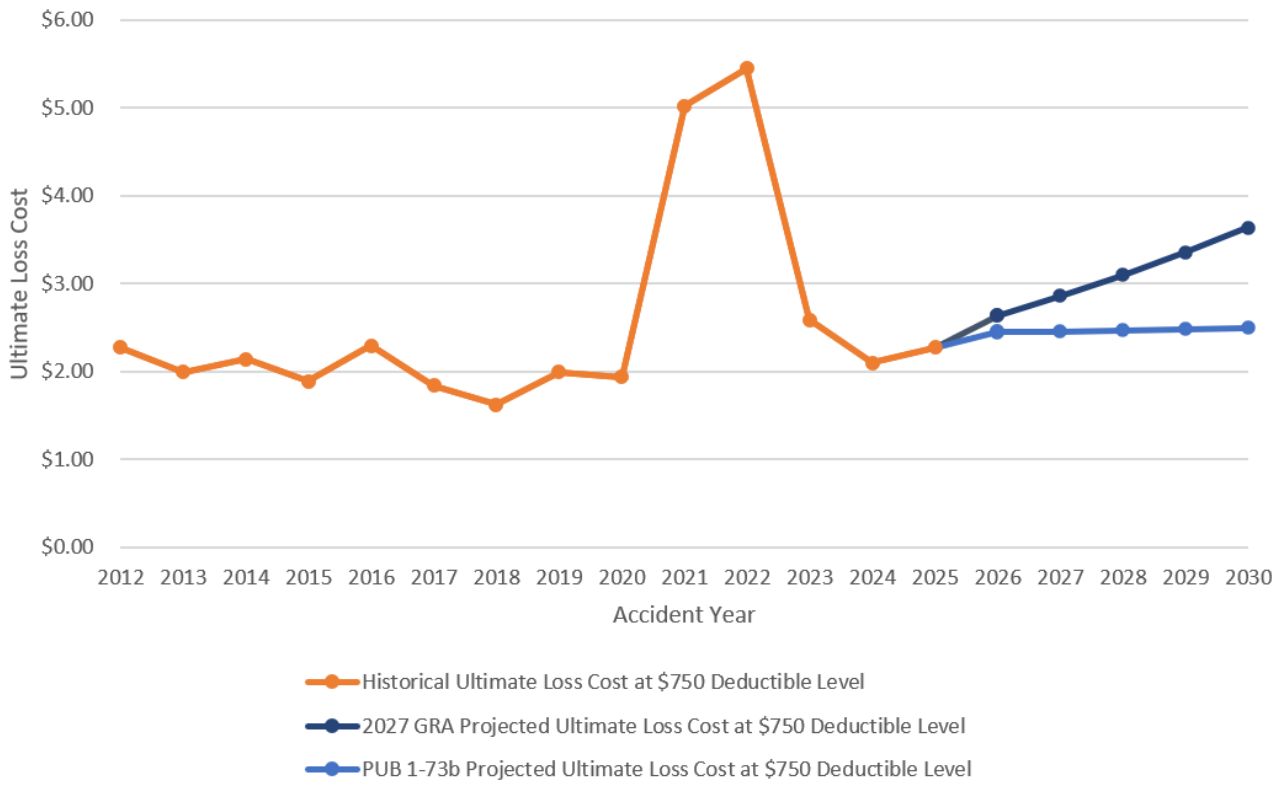

Figure 8 Comprehensive Attempted & Partial Theft - Ultimate Loss Cost Projection Comparison

Line No.	(1) Accident Year	(2) 2027 GRA Ultimate Loss Cost	(3) PUB 1-73b Ultimate Loss Cost	(4) $ Difference	(5) % Difference
1	**2026**	$2.64	$2.45	($0.19)	-7.27%
2	**2027**	$2.86	$2.46	($0.40)	-14.01%
3	**2028**	$3.10	$2.47	($0.63)	-20.26%
4	**2029**	$3.36	$2.48	($0.87)	-26.06%
5	**2030**	$3.64	$2.49	($1.14)	-31.43%
6	(1) April 1 to March 31				
7	(2) 2027 GRA projected ultimate loss cost at $750 deductible level				
8	(3) PUB 1-73b projected ultimate loss cost at $750 deductible level				
9	(4) = (3) - (2)				
10	(5) = (3) / (2) - 1				

The PUB 1-73b alternative produces lower projected loss costs than MPI's filed approach because it applies the longer-term historical severity trend of 3.74% for the future projection period, rather than continuing the selected 2019–2025 severity trend of 11.88%. The difference in projected loss costs therefore reflects the lower future severity trend assumption under the alternative approach.

The principal strength of the PUB 1-73b approach is that it places weight on a longer historical period and may reduce the influence of the higher recent severity trend. It also provides a useful sensitivity test of the impact of assuming that recent Comprehensive Attempted and Partial Theft severity growth does not continue into the forecast period.

However, the limitation of this approach is that it assumes future severity will moderate to the longer-term average after 2025, without specific evidence that the underlying drivers of the recent increase are expected to dissipate. In MPI's view, the more recent 2019–2025 experience is relevant because it reflects the current cost environment for Comprehensive Attempted and Partial Theft claims. If the 2019–2025 severity trend is considered an appropriate basis for the selected historical trend, then MPI does not believe there is sufficient support to select a materially lower future trend absent evidence that future experience is expected to differ.

MPI's filed approach has the strength of maintaining consistency between the selected past severity trend and the future severity trend and reflects the more recent increasing experience observed since 2019. The limitation of the filed approach is that it could overstate projected loss costs if the recent increase is temporary and future severity growth reverts toward the longer-term average. In addition, MPI selected the trending period that maintained the highest adjusted R^2 value across all other time periods.

Therefore, MPI considers the filed approach reasonable because there is no clear evidence supporting a post-2025 reduction in the severity trend to 3.74%. For this reason, MPI views the PUB 1-73b approach as a useful sensitivity scenario rather than MPI's best estimate.

e) For Comprehensive Entire Theft:

Figure 9 Comprehensive Entire Theft - Ultimate Loss Cost Comparison Chart

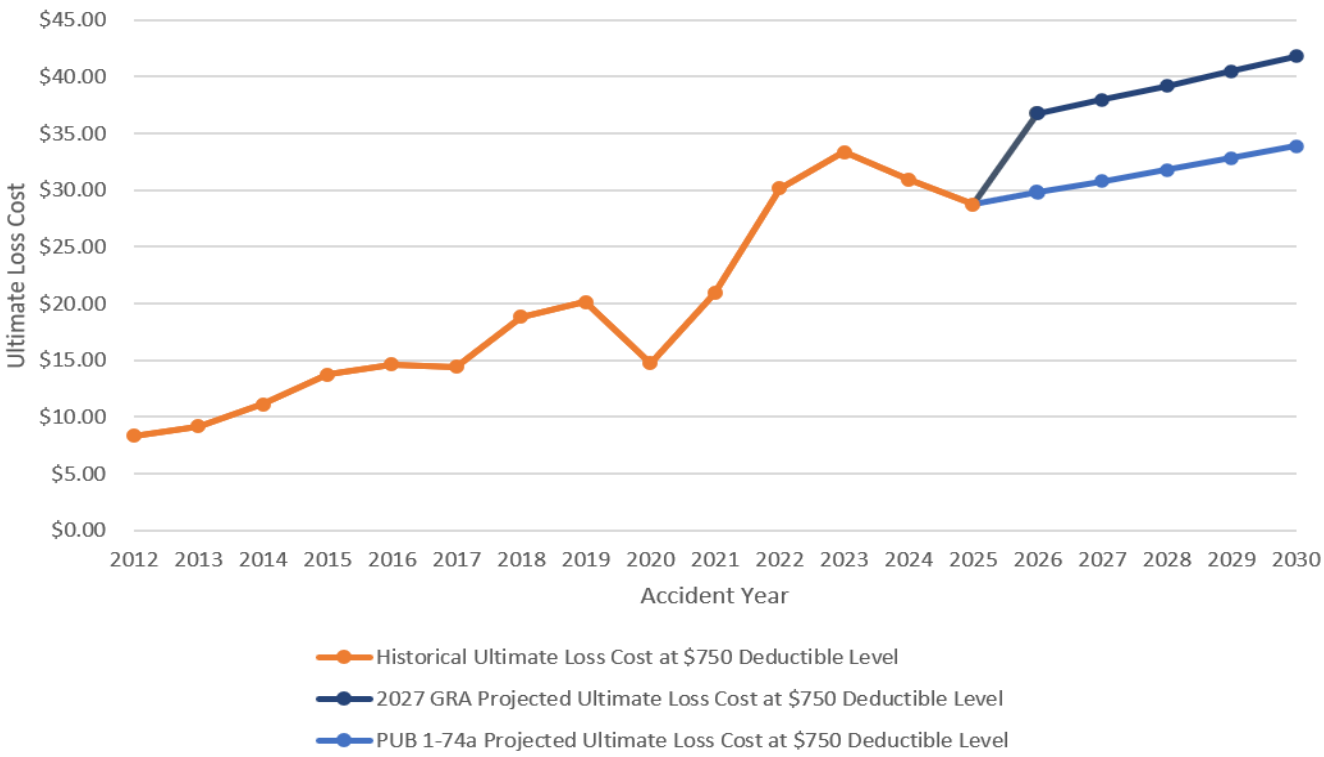

Figure 10 Comprehensive Entire Theft - Ultimate Loss Cost Projection Comparison

Line No.	(1) Accident Year	(2) 2027 GRA Ultimate Loss Cost	(3) PUB 1-74a Ultimate Loss Cost	(4) $ Difference	(5) % Difference
1	**2026**	$36.74	$29.79	($6.95)	-18.93%
2	**2027**	$37.95	$30.76	($7.18)	-18.93%
3	**2028**	$39.19	$31.77	($7.42)	-18.93%
4	**2029**	$40.48	$32.82	($7.66)	-18.93%
5	**2030**	$41.81	$33.90	($7.91)	-18.93%
6	(1) April 1 to March 31				
7	(2) 2027 GRA projected ultimate loss cost at $750 deductible level				
8	(3) PUB 1-74a projected ultimate loss cost at $750 deductible level				
9	(4) = (3) - (2)				
10	(5) = (3) / (2) - 1				

The PUB 1-74a alternative produces lower projected loss costs than MPI's filed approach because it assumes a 0% past loss cost trend when determining the average on-level loss cost for accident years 2021–2025. Under this approach, the selected historical years are effectively averaged without trend adjustment, resulting in a lower starting point for the 2026–2030 projection. The future trend of 3.28%, derived from the selected frequency and severity trends, is then applied to that lower base.

The principal strength of the PUB 1-74a approach is that it gives direct weight to the recent observed loss cost experience, including the decline observed in 2024 and 2025. It also provides a useful sensitivity test of the impact of assuming that recent lower loss cost experience represents a change in trend rather than variation around the selected frequency and severity trends.

However, the limitation of this approach is that it treats the recent decline in loss costs as support for a 0% historical loss cost trend, even though the underlying selected frequency and severity trends remain positive and were developed separately based on the observed characteristics of Entire Theft experience. In MPI's view, the 2024 and 2025 loss cost declines are better interpreted as random variation within the selected trend rather than evidence that the historical loss cost trend should be set to 0%. In addition, this approach ignores the statistically substantial frequency and severity trends identified by MPI in it's filed approach.

MPI's filed approach has the strength of relying on the selected historical frequency and severity trends, resulting in loss cost trends of 18.42% for 2021–2023 and 8.26% for 2024 and 2025, which MPI considers more directly tied to the underlying drivers of Entire Theft loss costs. MPI assumes that this growth will lower to 3.28% as a result of no further growth in claim frequency. The limitation of MPI's filed approach is that projected loss costs may be higher than actual loss costs if the recent lower loss cost experience in 2024 and 2025 reflects an emerging sustained change rather than random variation.

MPI considers the filed approach reasonable because the selected frequency and severity trends are well-defined for the historical period, and MPI does not view the recent decline in loss costs as sufficient evidence to override those selections with a 0% historical loss cost trend. Further, if the historical loss cost trend were set to 0%, it is unclear why the PUB 1-74a future trend should continue to reflect an increasing 3.28% trend rather than also be set to 0%. For these reasons, MPI views PUB 1-74a as a useful sensitivity scenario rather than MPI's best estimate.

PUB (MPI) 2-34

Part and Chapter:	**Part IX - Investments** **INV Appendix 1** **INV Appendix 6** **Part XII INV Appendix 9 (2026 GRA)**	**R1 Qn. No.:**	**PUB(MPI) 1-80 Appendix 1**
PUB Approved Issue No.:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)**		
Topic:	**Investment Governance**		
Sub Topic:			

Preamble to IR (If Any):

As per the MPI Investment Policy Statement, active manager performance is measured over the long term (4 years); active managers must add value net of fees over their contractual benchmark index in order to justify their higher fees relative to a passive strategy. MPI presents a Dashboard report to the Investment Committee quarterly, which classifies underperforming investment managers as follows

Green: No concerns

Yellow: Emerging concerns

Red: Concerns and added to the Watchlist

An active equity manager who meets either of the two factors is added to the Yellow category:

- Underperforms the contractual benchmark net of fees over the most recent two year period by more than 1.0% or
- Ranks in the bottom quarter of the relevant peer group over the most recent two-year period.

In INV Appendix 7:

> Over 1 year as of March 31, 2026, QV underperformed by 31.30%, driven by negative sector allocation as security selection was also negative (−6.7%). The materials, consumer discretionary, and financials sectors were the main drivers of negative sector allocation (a combined −22.1%), with the fund's significant underweight to materials the single largest detractor as it missed a benchmark sector return fueled by the gold and silver rally.

In MPI Exhibit 15:

> Canadian small cap equities underperformed by 31.3% and were broadly in line with target weights. Underperformance was primarily due to underweight exposure to the materials sector during a period of strong commodity-driven benchmark returns.

IN PUB(MPI 1-80):

> Canadian Small Cap was a negative contributor to relative outperformance (detracted 0.42% out of +1.88%), as it underperformed the benchmark (by 669 bps) and was overweighted (by 2.0%).

The watchlist status for QV investors is yellow based on the current dashboard filed

Question:

a) Please describe the criteria that has landed QV on yellow status.

b) Provide the Investment Committee / Board materials that reviewed the QV mandate after the 1-year result of –31.3 pp became known.

c) State the quantitative termination or review triggers (if any) contained in the IPS or manager agreement and confirm whether any of those triggers have been met.

d) Please file the June 30th Investment Performance Report.

e) Please provide the current status of the QV investment manager given the current performance.

Rationale for Question:

To understand Investment Manager Performance.

RESPONSE:

a) QV was assigned a yellow status because it met one of the two quantitative criteria set out in MPI's Manager Monitoring Policy. Specifically, the manager underperformed its benchmark, net of fees, by more than 1.0% over the most recent two-year period. As of March 31, 2026, the manager was not ranked in the bottom quartile of its designated peer universe and therefore did not meet the second quantitative criterion for Watchlist placement.

   Accordingly, MPI continued to monitor the mandate's performance in accordance with its Manager Monitoring Policy. The matters being monitored included benchmark-relative performance, peer group ranking, and whether subsequent performance results demonstrated improvement relative to the manager's stated objectives.

b) QV's performance was reviewed as part of the regular quarterly investment performance reporting presented to the Investment Committee.

   No separate Investment Committee report was prepared specifically to evaluate the QV mandate following the underperformance result. The Committee's consideration of the mandate occurred within the context of its regular review of quarterly investment performance, manager monitoring reports, and Watchlist monitoring activities.

   Materials provided to the Committee included quarterly performance reports showing benchmark-relative performance, peer rankings, and manager monitoring commentary prepared in accordance with MPI's Manager Monitoring Policy.

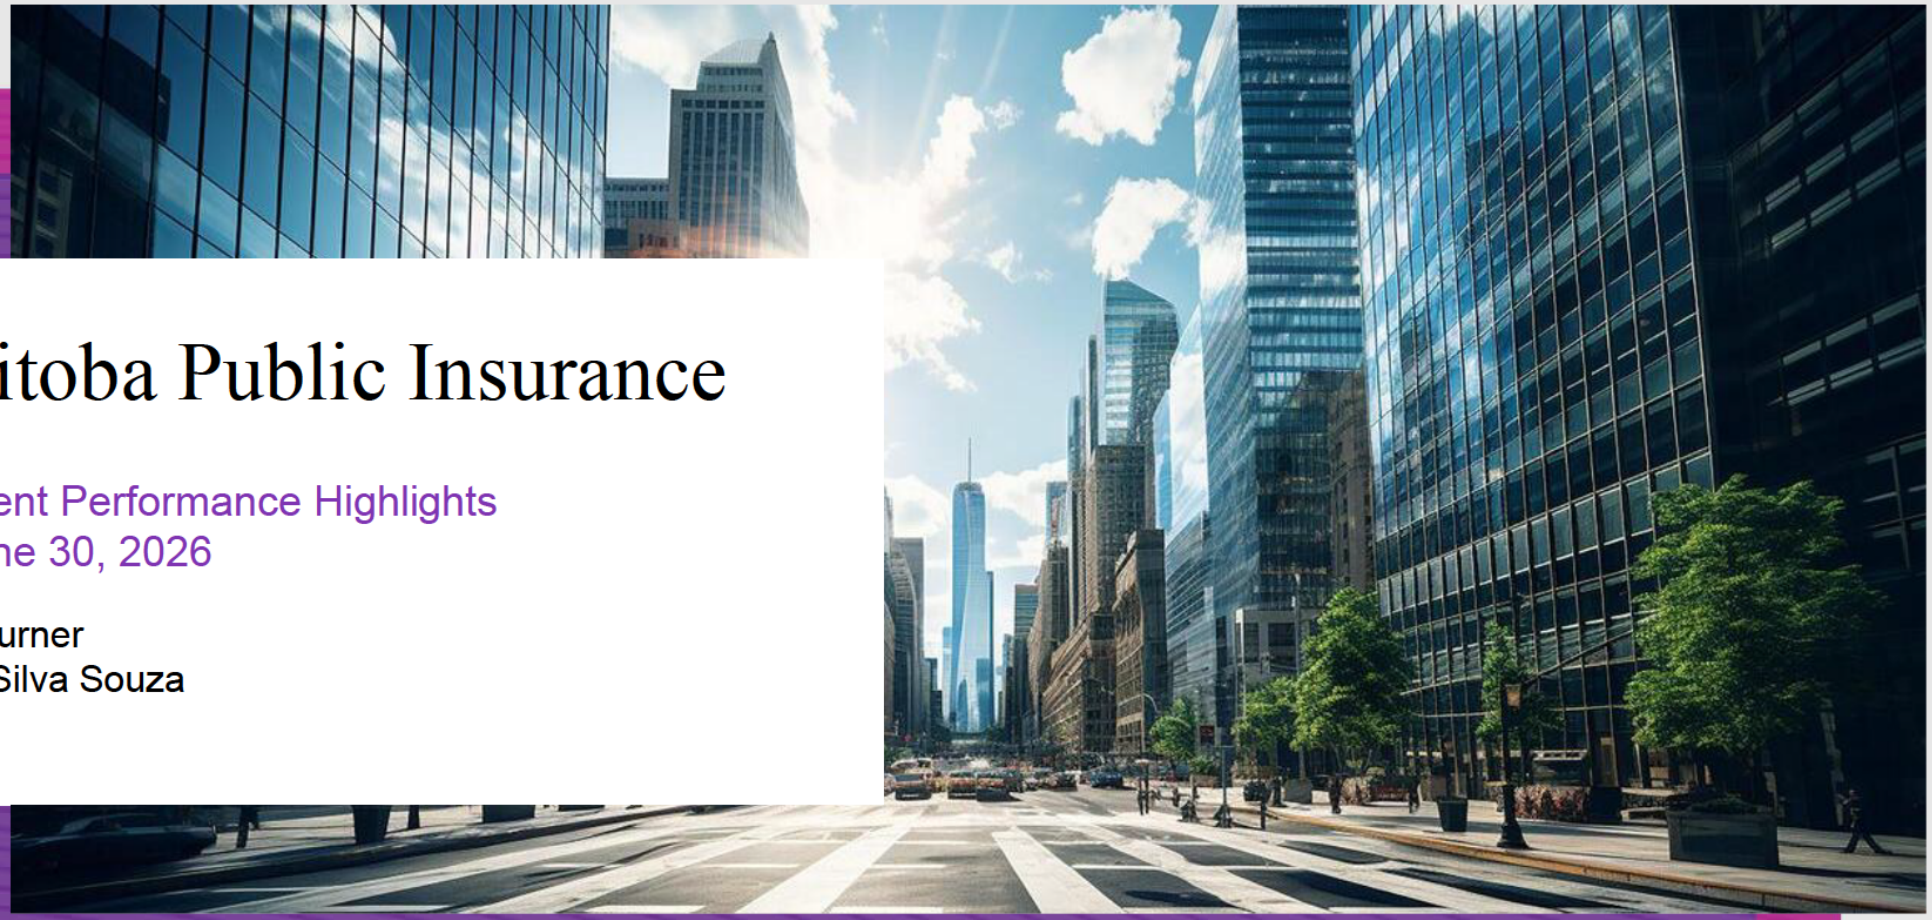
c) MPI's Manager Monitoring Policy is included in the Investment Policy Manual filed with the Application. The policy outlines both quantitative and qualitative criteria used to assess investment managers.

As noted in response to PUB 2-34(a), QV met one of the two quantitative criteria for heightened monitoring, having underperformed its benchmark, net of fees, by more than 1.0% over the most recent two-year period. The manager was not ranked in the bottom quartile of its peer group as of March 31, 2026.

d) The June 30, 2026 Performance Report has been filed in response to this request. Please refer to *Attachment A - Investment Performance Highlights as of June 30, 2026 - CONFIDENTIAL*.

The report notes that QV's longer-term performance remained below its benchmark. As of June 30, 2026, the mandate generated an annualized return of 19.6% over four years compared to 23.1% for the benchmark, resulting in annualized underperformance of 3.5%. The mandate was also ranked in the third quartile of the applicable peer universe over the same period. However, recent performance had improved, with the mandate returning 7.8% during the quarter ended June 30, 2026, outperforming the benchmark by 1.9%.

WTW's commentary in the report reflected continued monitoring of the mandate's longer-term relative performance while acknowledging the improvement in recent results.



MPI's Watchlist decisions are governed by the Manager Monitoring Policy contained in the Investment Policy Manual, which establishes specific quantitative and qualitative criteria for Watchlist placement and retention. Accordingly, observations contained in WTW's performance reports form part of the information considered by MPI but do not, in themselves, determine a manager's Watchlist status.

As noted in MPI's response to PUB 2-34(e), QV was subsequently placed on the Watchlist on June 30, 2026, for qualitative reasons following the departure of a portfolio manager, in accordance with MPI's Manager Monitoring Policy.

e) QV was placed on MPI's Watchlist on June 30, 2026, for qualitative reasons following the departure of one of the portfolio managers.

As set out in MPI's Manager Monitoring Policy, watchlist placement serves two purposes. First, it communicates MPI's concerns regarding identified issues to the investment manager. Second, it initiates a formal evaluation process regarding the manager's continued retention.

Accordingly, MPI's assessment has changed since the Round 1 response insofar as the manager has now been placed on the Watchlist. Placement on the Watchlist does not constitute a decision to terminate the manager, but rather represents an intermediate step in MPI's manager oversight process while further evaluation is undertaken.

Investment performance overview

key takeaways as of June 30, 2026

Performance

- **Returns positive across portfolios**, with stronger outcomes in growth-oriented and return-seeking strategies
- **Equities led performance**, while fixed income and alternatives provided modest, stabilizing, and diversifying returns

Positioning

- **Asset mixes remains broadly aligned with policy**; no material positioning concerns
- **Investment strategy review is underway,** and several changes are being explored/recommended.
- **Preliminary work suggests the overall balance between the RSA and LHA remains broadly appropriate**, so changes are likely to be more evolutionary than revolutionary.

Committee focus areas

Current performance and portfolio structure highlight a small number of areas to monitor

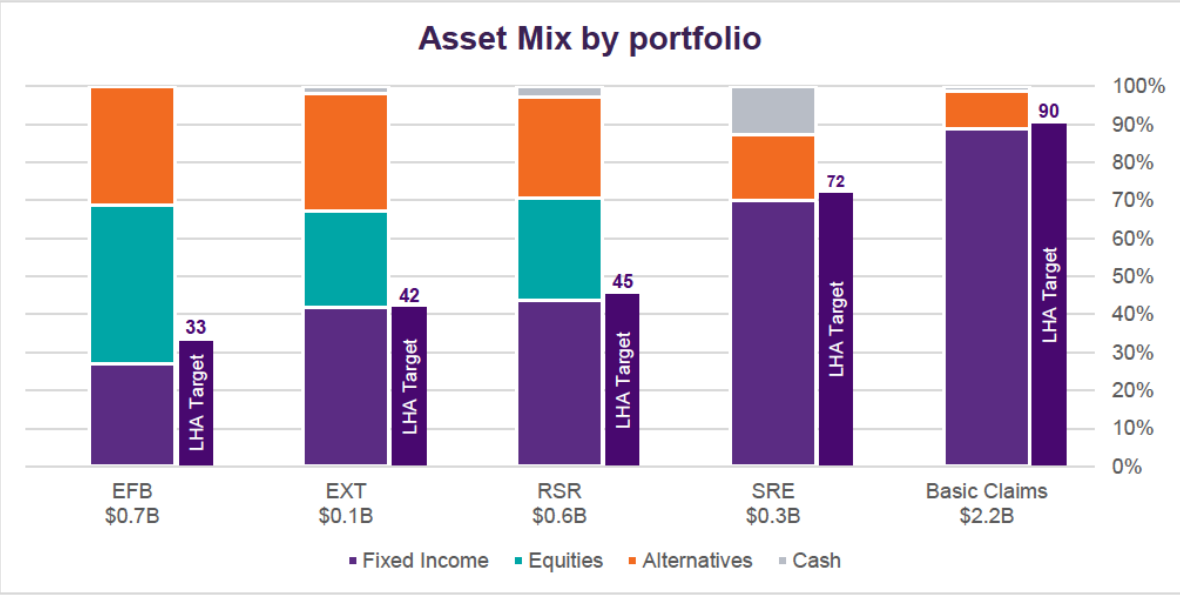
Strategy Review Update

- Portfolio remains conservatively positioned.
- Liability-hedging review identified opportunities to improve efficiency without increasing risk.
- Future capital will be redeployed gradually as real asset liquidity becomes available.

Equity dispersion and positioning

- Recent small-cap strength masks longer-term underperformance in Canadian small cap and low-volatility equities.
- Meaningful underperformance warrants continued monitoring of QV Investors and Acadian.
- Distinctive Canadian equity and small-cap exposure should be examined through the strategy review.

Real Assets



- Relative performance and current yield levels warrant attention, particularly for TD Greystone.
- Managers continue to implement their mandates as intended.
- No manager shows signs of material deterioration or presents an immediate concern.
- The foundation remains solid; continue evaluating structure, liquidity and portfolio-yield objectives.

Current positioning remains appropriate; focus is on monitoring key areas and refining risk framework going forward

Asset allocation by portfolio

Differences reflect distinct roles across MPI portfolios

Differences in asset mix are intentional and drive differences in expected return and risk across portfolios.

Overall positioning remains conservative

- The total program remains heavily weighted to fixed income and real assets
- Limited allocation to equities at the aggregate level (~12%)
- Positioning reflects MPI's priority on rate stability and capital strength
- Recent strategy review work concluded that the overall balance between liability-hedging assets and return-seeking assets remains broadly appropriate.
- The strategy review identified opportunities to improve liability-hedging efficiency through a more concentrated provincial and corporate bond structure and a reduced MUSH allocation.

Portfolios are structured for distinct roles

- **Basic / SRE:** liability-driven, focused on stability and capital preservation
- **RSR / EXT:** balanced portfolios supporting rate stability and surplus growth
- **EFB:** longer-term horizon with greater allocation to return-seeking assets

Portfolio performance overview

Results and benchmark comparison as of June 30, 2026

Performance by portfolio

Portfolio	Market Value ($M)	Performance (%)					
		3-Month		1-Year		4-Year (Ann.)	
		Return	Added Value	Return	Added Value	Return	Added Value
MPI - Total	**3,933.6**						
BASIC	2,235.9	2.8	0.8	4.7	0.5	4.6	-0.4
SRE							
RSR	593.4	3.9	-0.3	10.9	-0.8	8.2	-1.2
EXT							
EFB	730.9	5.1	-0.4	13.8	-0.2	10.5	-0.1

Overall, performance outcomes are consistent with portfolio design: delivering stability in liability-driven portfolios and higher return potential in growth-oriented portfolios.

3-Month results

- Positive absolute returns were observed across all portfolios, with stronger results in the more growth-oriented portfolios.
- Despite the lower absolute returns, the portfolios with large Fixed Income components (Basic Claims and SRE) were the only ones to outperform their respective benchmarks.
- Underperformance across the RSR, EXT, and EFB portfolios was primarily driven by equity.

Longer-term performance

- 1-year relative performance was challenged in equity-oriented portfolios, reflecting the difficult environment for active equity management. Absolute returns remained strong.
- 4-year results show modest relative underperformance, but positive absolute performance.

Key Drivers of Q2 2026 Performance

Three conclusions from portfolio attribution across the MPI portfolios

Real assets and private credit supported Q2 results; equity positioning, led by Global Low Volatility, drove relative headwinds.

01 REAL ASSETS & PRIVATE CREDIT

Real assets and private credit led the positive contribution

- Infrastructure and real estate delivered solid absolute returns, led by First Sentier, Kindle Voyager and listed real estate.
- Private debt remained stable and generally outperformed fixed income benchmarks.

02 EQUITY

Equity positioning was the principal relative headwind

- Global Low Volatility remained the largest detractor as defensive equities lagged a rising market.
- Negative equity allocation effects in RSR and EXT offset positive selection; Canadian small cap and global equity were mixed.

03 FIXED INCOME

Fixed Income reinforced resilience and stability

- Fixed income reinforced resilience; relative results were mainly driven by outperformance at the investment-level, rather than an overallocation to fixed income.
- The Addenda Fixed Income mandates under the Basic Claims portfolio outperformed their respective benchmarks.

Active manager overview (cont.)

Manager	Performance	Style	Key rationale
QV Investors	● Attention	● Monitor	Underperformance across the 4-year period. Canadian Small Cap exposure provides limited diversification benefits and higher volatility than broad Canadian Equities.
Acadian	● Attention	● Monitor	Underperformance across the 4-year period. Global Low Volatility strategies have faced headwinds in recent years, resulting in weaker relative performance and reduced upside capture. The overall risk-return appeal has diminished compared to other equity approaches.
Addenda	● Monitor	—	While the Government Bond strategies underperformed their respective benchmarks across the last 4 years, the Corporate Bond strategies added value.
DOF	● Monitor	—	Very modest underperformance across the 4-year period.
Parking Lots	● Attention	—	Continuous decreases in market value following multiple appraisals in recent years.
TD Greystone	● Attention	—	Manager has underperformed across the 4-year period.
Brookfield	● Monitor	—	Manager has underperformed since inception, although performance history only begins December 2024.

Portfolios remain resilient; strategy work confirms the path forward

The overall foundation remains sound. While a small number of areas warrant continued monitoring, the strategy review has identified a range of opportunities to improve portfolio efficiency, strengthen implementation, and support long-term objectives.

01 Performance aligned

Positive short- and long-term results remain broadly consistent with portfolio design.

Differences primarily reflect mandate structure, asset-class behavior and investment style.

02 Focus is contained

Most managers are delivering as expected; QV Investors and Acadian remain the principal areas of monitoring due to long term underperformance.

No material organizational, process or structural concerns have been identified.

03 Strategy direction is clear

Strategy work confirmed the balance between liability-hedging and return-seeking assets remains broadly appropriate.

Next: improve hedging efficiency by concentrating provincial/corporate bonds and reducing MUSH exposure.

Maintain the portfolio structure, advance liability-hedging refinements, monitor priority managers and calibrate downside tolerance.

Risk appetite review

MPI is currently evaluating its investment risk appetite

Illustrative impact of increasing risk

	Current	Moderate Increase	Higher increase
Return	Lower	Moderately higher	Higher
Volatility	Low	Moderate	Higher
Downside Risk	Limited	Manageable	More pronounced
Capital Impact (MCT)	Stable (~100%)	Declines (~93%)	Further decline (~87%)

Variation across strategies (large cap, small cap, low volatility) impacted portfolio outcomes. The appropriate balance depends on MPI's tolerance for downside risk and capital variability.

Current portfolio is highly resilient and conservative

- Designed to support rate stability and capital strength.
- Performs consistently across a wide range of market environments.
- Emphasizes downside protection and capital preservation

Increasing return potential involves trade-offs

- Higher exposure to return-seeking assets can improve long-term returns.
- Also leads to greater volatility and more pronounced capital strain in adverse markets.
- Trade-offs become increasingly visible as risk increases.

Focus of the review is on defining guardrails

- Objective is to determine acceptable downside risk and capital variability.
- Not focused on specific asset classes or implementation decisions.
- Aims to establish clear parameters for future portfolio decisions.

Disclaimer

Towers Watson Canada Inc. and/or WTW Investment Management Canada Limited, (collectively 'WTW") have prepared this report for Manitoba Public Insurance ("Client") to assist with the ongoing monitoring of the Client's investment managers and, where appropriate, to review actual against target asset allocation. This report is intended to identify where action may be appropriate, but should not be used as the sole basis for making changes to investment managers or investment strategy. This report does not address the achievement of the Client's wider strategic goals and objectives unless otherwise explicitly stated to the contrary. In preparing this report we have placed reasonable reliance on data supplied to us by third parties including the Client's investment manager(s) and other individuals and organizations involved with or associated with Client's portfolio. In particular we have relied upon information, both quantitative and qualitative, supplied by applicable investment managers, and on any market data and benchmark information specified in the report. While reasonable care has been taken to gauge the reliability of this data, this report carries no guarantee of accuracy or completeness and WTW, and its parent, affiliates and their respective directors, officers and employees ("WTW") accept no responsibility and will not be liable for any errors or misrepresentations in the data made by any third party.

The written comments included in the report should be considered in conjunction with the supporting verbal comments and other background information provided by WTW. Any opinions on and ratings of investment managers or funds contained in this report are not intended to imply, nor should they be interpreted as conveying, any form of guarantee or assurance by WTW of the future performance and risk of those investment manager(s) or funds. It should be noted in particular that we have not necessarily researched the investment managers' legal, operational or compliance procedures, and accordingly make no warranty and accept no responsibility for any consequences that might arise in this regard. In addition, past investment performance is not necessarily indicative of future performance.

This report is provided to the Client solely for its use, for the specific purpose indicated. This report is based on information available to WTW as of the date of the report and takes no account of subsequent developments. It may not be provided to any other party without WTW's prior written permission, except as may be required by law. In the absence of our express written permission to the contrary, WTW and its affiliates and their respective directors, officers and employees accept no responsibility and will not be liable for any consequences howsoever arising from any third party's use of or reliance on this report or the opinions we have expressed. This report is not intended by WTW to form a basis of any decision by a third party to do or omit to do anything.

Return and market value data provided by the Client for periods up to 2026.

WTW Investment Management Canada Limited may, from time to time, receive an internal revenue allocation when acting as the Canadian exempt market dealer for a related party investment fund. We may be perceived to be financially motivated to recommend an investment in a related party fund and to favour our interests over yours. In doing so, while not a referral arrangement, WTW Investment Management acts as the exempt market dealer in Canada for the distribution of the affiliated TWIM and AMX Funds. WTW Investment Management earns an internal intercompany revenue split or a placement agent fee for the provision of services such as local client service, KYC and suitability assessments. Accordingly, prior to referring a client to a TWIM Fund or AMX Fund, WTW Investment Management must determine that making the distribution is in the client's best interest including a consideration of the benefits to the client of making the particular distribution over alternatives or at all.

WTW has arrangements in place to handle conflicts of interest. In particular, WTW might receive revenue from asset managers for services rendered or the asset manager might buy or own WTW securities. Neither of these items influence our recommending or appointing of such asset manager for our clients.

PUB (MPI) 2-35

Part and Chapter:	**Part IX - Investments** **Sections C.1**	**R1 Qn. No.:**	**PUB [MPI] 1-81 (b)**
PUB Approved Issue No.:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)** **14. Update on Asset Liability Management Study (a) Risk Appetite & Portfolio Changes** **4. Financial forecast (d) Investment income forecast**		
Topic:	**Investment Strategy**		
Sub Topic:	**Pending Risk Appetite and Asset Mix Decisions**		

Preamble to IR (If Any):

WTW has not yet presented the potential asset mixes to the Investment Committee (IC). WTW will present an ALM update at the August 2026 IC meeting. The ALM chapter will be filed following the meeting. The recommended changes to the investment asset mix will be presented to the IC in November 2026.

Question:

a) Please file the presentation material, including related analysis, presented at the August 2026 IC meeting.

b) Please provide a summary of recommended portfolio changes proposed by WTW and the rationale for those recommended changes.

Rationale for Question:

To understand the status of the asset mix review and its effect on the investment income forecast.

RESPONSE:

a) Please see the August 12, 2026 Investment Committee materials filed with this response (*MPI Exhibit #24 - Part IX Asset Liability Management Chapter*). The materials show that the investment strategy review has advanced from foundational analysis to the evaluation of portfolio refinements. The analysis confirms that the Basic Claims portfolio remains aligned with rate stability and capital-strength objectives, while identifying opportunities to improve liability matching and portfolio efficiency. The materials are advisory and support MPI's governance process, they should not be interpreted to mean that the recommendations have been finally approved or implemented unless expressly confirmed by MPI.

b) The August 2026 analysis identifies a preferred direction for the Basic Claims portfolio's liability-hedging assets: reduce MUSH bond exposure from approximately 17% to approximately 5%, retain primarily longer-duration MUSH holdings, eliminate the Real Return Bond allocation, and increase Corporate Bond allocations. The analysis indicates that these refinements are expected to improve liability matching, portfolio yield and liability tracking error without materially increasing overall portfolio risk. The materials also contemplate redeploying excess MUSH exposure to SRE and RSR and maintaining current return-seeking-asset allocations in the near term while real-asset liquidity remains constrained. These are recommendations for consideration and remain subject to MPI's final governance, approval and implementation processes.

PUB (MPI) 2-36

Part and Chapter:	**Part IX - Investments** **Figure INV-3**	**R1 Qn. No.:**	**PUB(MPI) 1-83 (a) & (g)** **CC(MPI) 1-90**
PUB Approved Issue No.:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)**		
Topic:	**Investment Performance**		
Sub Topic:			

Preamble to IR (If Any):

MPI has indicated it understands that the minimum filing requirements are intended to provide sufficient information to explain and support the filing. MPI has not included benchmark or peer comparison commentary because differences in investment mandates, objectives, liabilities, governance structures, asset allocations, risk tolerances, funding circumstances, and reporting practices can materially affect results and limit the usefulness of such comparisons. Given these differences, peer comparisons may not provide a meaningful basis for evaluating MPI's investment performance and could be misleading without extensive context.

MPI has prepared this analysis in prior rate applications but has elected to not provide this information this year.

In reviewing MPI's previous application filings and the filed 2025 annual reports for ICBC and SGI, it appears that the following results are evident:

Line No.	Year-end Period	ICBC 31-Mar	SGI 31-Mar	MPI 31-Mar
1	2021	11.2%	18.4%	8.9%
2	2022	2.9%	3.5%	0.6%
3	2023	1.4%	2.7%	-0.8%
4	2024	8.0%	6.3%	3.4%
5	2025	8.4%*	8.8%**	8.9%
6	2026	5.5%*	5.8%**	?
6	Annualized Return			
7	Over the 5 year period: 2021-2025	6.3%	7.8%	4.1%
8	MPI Value Added	-2.2%	-3.7%	

*https://icbc.com/assets/en/5zp5LxLIznBZi8nODF4yQt/ar-26.pdf pg. 32

**https://sgi.sk.ca/documents/37148/6535623/5443+-+SGI+Auto+Fund+Annual+Report+2025-26_WEB_SECURED.pdf page 18

MPI states it will determine the appropriate investment-related disclosures to include in future GRA Filings based on the relevance and materiality of the work being undertaken.

Question:

a) Please confirm the accuracy or revise the table above and provide any narrative interpretation.

b) Please update the table to incorporate MPI investment returns for 2025/26 and provide the six year average comparison in similar format to that provided above.

c) Please explain the differences in investment mandates, objectives, liabilities, governance structure, asset allocations, risk tolerance, funding circumstances, and reporting practices for both SAF and ICBC referenced in MPI's response to PUB(MPI) 1-83 (g) that warrant not providing the information.

d) Confirm whether the annual Efficient Frontier analysis and updated capital market assumptions prepared by WTW will be available to be filed in each future GRA. If not, explain how the reasonableness of the investment income forecast is capable of being tested by the Board.

Rationale for Question:

To understand MPI's investment returns relative to comparable peers.

RESPONSE:

a) MPI confirms that the returns for the 2025 and 2026 year-end periods for ICBC and SGI have been sourced from the annual reports linked above. The returns for prior years are consistent with those provided in previous GRA applications. As previously explained in the INV Chapter and PUB1_083, MPI will refrain from providing any narrative interpretation of these results.

b) MPI's total portfolio, measured on a market value basis, generated a positive return of 4.4% during the 2025/26 fiscal year (holding period return for the 12 months ended March 31, 2026). A comparison of six-year average returns is provided in *Figure 1*. As previously explained in the *Part IX Investments Chapter* and *PUB (MPI) 1-83*, MPI will refrain from providing any narrative performance comparisons with ICBC and SGI.

Figure 1 – Fiscal Year Total Portfolio Returns

Line No.	Year-end Period	ICBC 31-Mar	SGI 31-Mar	MPI 31-Mar
1	2021	11.20%	18.40%	8.90%
2	2022	2.90%	3.50%	0.60%
3	2023	1.40%	2.70%	-0.80%
4	2024	8.00%	6.30%	3.40%
5	2025	8.40%	8.80%	8.90%
6	2026	5.50%	5.80%	4.40%
7	Annualized return over the 6-year period: 2021-2026	6.20%	7.50%	4.20%
8	MPI Value Added	-2.00%	-3.30%	

c) MPI's position is not that peer information has no value in all circumstances, but that meaningful comparisons require a high degree of comparability across objectives, constraints and portfolio construction. MPI's Basic portfolio supports compulsory automobile insurance liabilities and is managed with a strong emphasis on liability matching, capital adequacy, liquidity and rate stability. These objectives differ from many public pension plans, endowments, sovereign funds and other investment organizations whose primary focus may be maximizing long-term returns.

As a result, institutions may differ materially in:

- the nature and duration of the liabilities being supported;
- funding arrangements and capital requirements;
- investment mandates and return objectives;
- governance structures and delegated decision-making authority;
- permitted asset classes and strategic asset allocations;
- risk tolerances and downside-risk constraints; and
- performance measurement and reporting practices.

These differences can lead to materially different portfolio structures and expected outcomes. For example, MPI's Basic portfolio currently maintains a significantly larger allocation to fixed income than many return-seeking institutional portfolios because of its liability-sensitive mandate. Consequently, differences in reported total returns may

simply reflect differences in portfolio objectives, risk exposures and asset allocation decisions rather than differences in investment effectiveness.
For this reason, MPI does not believe that peer return comparisons, in isolation, provide a reliable basis for assessing the performance of the Basic portfolio. Performance is more appropriately assessed relative to the portfolio's stated objectives, policy benchmark and risk parameters, which are designed to support MPI's specific mandate and obligations to policyholders.

Even among Canadian public auto insurers, differences in capital frameworks, regulatory environments, funding arrangements, liability profiles and portfolio objectives can materially affect investment strategy and outcomes. Accordingly, MPI does not consider simple peer return comparisons to be a meaningful measure of comparative effectiveness.

d) MPI will determine future investment disclosures based on their relevance and materiality to the applicable General Rate Application.

WTW's capital market assumptions are time-sensitive and are developed to support long-term asset-liability management and strategic asset allocation analysis. Similarly, efficient frontier analysis is one analytical tool used to evaluate potential risk-return trade-offs. However, neither updated capital market assumptions nor efficient frontier analysis, in isolation, captures all considerations relevant to MPI's investment strategy, including liabilities, capital adequacy, downside outcomes, liquidity requirements, recovery characteristics, implementation considerations and governance objectives.

MPI therefore does not propose an unconditional commitment to file updated capital market assumptions or a standalone efficient frontier analysis in future General Rate Applications. The information included in a future GRA will be determined based on the issues under consideration and the extent to which specific investment analyses are relevant to the forecasts, strategy, or approvals being sought.
Where updated assumptions or investment analysis materially support a position advanced in a future GRA, MPI would provide appropriate supporting information to facilitate regulatory review.

PUB (MPI) 2-37

Part and Chapter:	**Part IX - FFI** **Figure FFI-4** **Figure FFI-1 (lines 12-18)** **Sections FFI.5, FFI.6**	**R1 Qn. No.:**	**PUB(MPI) 1-86 – Attachment A**
PUB Approved Issue No.:	**4. Financial forecast (d) Investment income forecast**		
Topic:	**Investment Income Forecast**		
Sub Topic:	**Equity Return and Dividend Assumptions**		

Preamble to IR (If Any):

WTW indicates that it models ‘black swan” events using a two-state model whereby the models switch among different states for normal and stressed market conditions. Returns are pulled from the "normal" outcome with a 95% probability and the "bad" outcome with 5% probability. WTW describes that regime (switching between the models) creates more frequent and severe downside events that would have occurred under a normal or log-normal distribution and allows for converging correlations between the models

Question:

Please clarify how the severity of the "bad" state is calibrated for Canadian fixed income, equities, real estate, and infrastructure, and whether the 1-in-20 and 1-in-100 outcomes were compared for reasonableness against historical Canadian market stress periods.

Rationale for Question:

To assess whether the investment income forecasts relied on to support the Basic revenue requirement sufficiently reflect downside risk under extreme market conditions.

RESPONSE:

Please refer to the *Attachment A – WTW Regime Switching Modelling*.

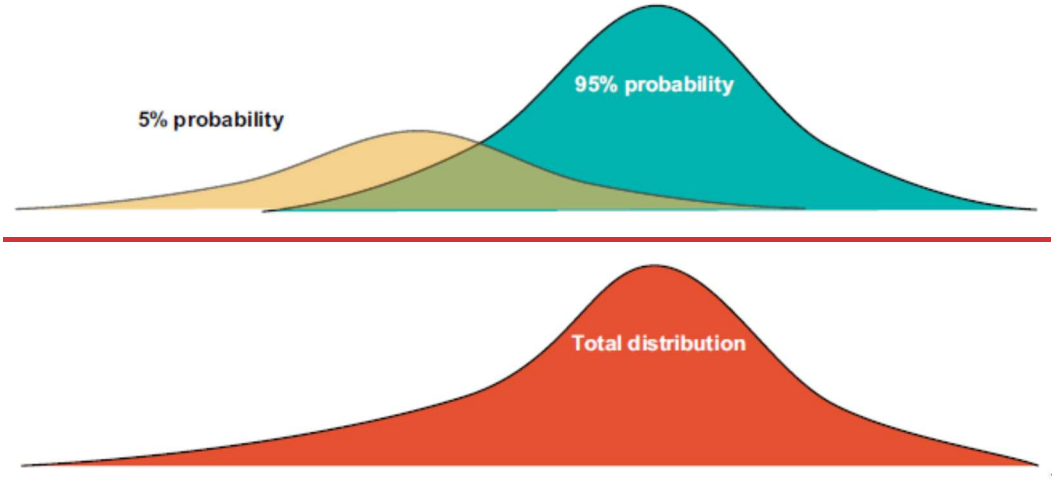
Regarding question: PUB 2-37(a):

Please explain how WTW's two-state capital market model captures adverse or "bad-state" outcomes and how those outcomes affect the resulting assumptions.

WTW's Canadian Investment Model is a simulation-based framework used for long-term asset-liability modelling, strategic asset allocation and risk-budgeting analysis. It models a broad distribution of potential outcomes rather than relying on one deterministic forecast.

~~Broadly, our model incorporates fat-tailed return distributions for equities and certain alternatives and assumes correlations among return-seeking assets increase during fat-tail events. Government yield curves and credit spreads are simulated and used in fixed-income returns and liability discount rates. In this way, adverse states affect the distribution of returns, volatility, correlations and downside outcomes reflected in the resulting assumptions.~~

~~Even though, our regime-switching model, as all model, is a simplified representation of reality, and the projected outcomes should not be interpreted with greater precision than the methodology supports, it permits us and our clients to more closely examine the components and impact of extreme scenarios such as stock market corrections, hyperinflation, deflation and negative real interest rates.~~



~~What happened in the early 2000s, the financial crisis and even the recent COVID years has outlined that extreme events do happen and can have a tremendous impact on fund returns.~~

~~In that context, we have developed several model features that make our capital market assumptions particularly robust and thorough, including non-normality, converging correlations, and serial correlation. As evident in most return distributions in reality non-normality forms a key part in the process of assessing risk.~~

~~We have thus incorporated "fat tails" in our asset model since 2006. Our proprietary asset model switches among different states for normal and stressed market conditions in order to produce a fat tail distribution. Return is pulled from the "normal" outcome with 95% probability and the "bad" outcome with 5% probability. This regime switching methodology creates more frequent and severe downside events than would have occurred under a normal (or lognormal) distribution. The resulting distribution shape displayed below in Figure 1 is therefore more consistent with historical experience and allows for 2008-like scenarios to occur.~~

Manitoba Public Insurance Page 1 of 3

~~Figure 1: How We Model "Black Swan" Events~~

~~Our regime-switching methodology also allows for converging correlations during negative events, so that when a "bad" outcome occurs for one class, it is much more likely to also occur for other asset classes. These bad events are also more likely to occur in simulation scenarios where cash and Treasury rates are lower (i.e., a flight to quality crisis scenario). Converging correlations happen when markets are stressed and investors sell risky assets from various return-seeking asset classes simultaneously in order to de-risk their positions.~~

The Model incorporates a two-state regime-switching framework representing both normal and adverse market conditions. The severity of the adverse, or "bad-state," regime is reflected through more frequent and more severe downside outcomes than would arise under a normal distribution. For Canadian equities and certain alternative asset classes, this is achieved through fat-tailed return distributions and an increase in correlations among return-seeking assets during periods of market stress. For fixed income, the Model simulates government yield curves and credit spreads and incorporates assumptions regarding the level, path and volatility of yields.

The 1-in-20 and 1-in-100 outcomes are generated from the distribution of outcomes produced by the Model. These outcomes were not calibrated by assigning specific historical market events to prescribed frequencies. Rather, historical market experience was used as a reasonableness and validation check to assess whether severe market outcomes were appropriately represented within the Model's distribution.

When the current regime-switching framework was calibrated on the common modelling platform used by the U.S. and Canadian Investment Models, severe historical drawdowns, including those experienced during the 2008 global financial crisis, were reviewed to confirm that such outcomes were represented within the range of outcomes generated by the Model. In addition, a 2023 analysis compared the left tail of the Canadian equity distribution produced by the Model with historical Canadian equity return data and found

Manitoba Public Insurance Page 2 of 3

that the Model's left-tail outcomes were consistent with historical experience. This provided additional validation that extreme downside scenarios are adequately represented in the Model.

For Canadian fixed income, assumptions regarding the future path and volatility of yields are reviewed periodically. Canadian yield-volatility assumptions were reviewed against historical results in 2025 and were retained as appropriate for the intended use of the Canadian Investment Model.

Real estate and infrastructure assumptions are incorporated within the Model's broader return, volatility, correlation and adverse-state framework. However, separate historical Canadian stress-testing exercises were not performed to directly calibrate or validate the 1-in-20 and 1-in-100 outcomes for real estate and infrastructure against specific historical Canadian market stress periods as representative of broad global core asset classes and since historic returns are relatively shorter for these asset classes. Accordingly, the reasonableness assessment for those asset classes is based on the overall Model calibration and validation process rather than a direct comparison of those percentile outcomes to particular historical market events.

As with any economic model, the Canadian Investment Model is a simplified representation of reality. Its projected outcomes should therefore not be interpreted with greater precision than the methodology supports, particularly in relation to extreme events.

September 8, 2026

2027 GRA - Round 2 Information Requests
PUB (MPI) 2-37 - Attachment A

Regarding question: PUB 2-37(a):

Please explain how WTW's two-state capital market model captures adverse or "bad-state" outcomes and how those outcomes affect the resulting assumptions.

WTW's Canadian Investment Model is a simulation-based framework used for long-term asset-liability modelling, strategic asset allocation and risk-budgeting analysis. It models a broad distribution of potential outcomes rather than relying on one deterministic forecast.

The Model incorporates a two-state regime-switching framework representing both normal and adverse market conditions. The severity of the adverse, or "bad-state," regime is reflected through more frequent and more severe downside outcomes than would arise under a normal distribution. For Canadian equities and certain alternative asset classes, this is achieved through fat-tailed return distributions and an increase in correlations among return-seeking assets during periods of market stress. For fixed income, the Model simulates government yield curves and credit spreads and incorporates assumptions regarding the level, path and volatility of yields.

The 1-in-20 and 1-in-100 outcomes are generated from the distribution of outcomes produced by the Model. These outcomes were not calibrated by assigning specific historical market events to prescribed frequencies. Rather, historical market experience was used as a reasonableness and validation check to assess whether severe market outcomes were appropriately represented within the Model's distribution.

When the current regime-switching framework was calibrated on the common modelling platform used by the U.S. and Canadian Investment Models, severe historical drawdowns, including those experienced during the 2008 global financial crisis, were reviewed to confirm that such outcomes were represented within the range of outcomes generated by the Model. In addition, a 2023 analysis compared the left tail of the Canadian equity distribution produced by the Model with historical Canadian equity return data and found that the Model's left-tail outcomes were consistent with historical experience. This provided additional validation that extreme downside scenarios are adequately represented in the Model.

For Canadian fixed income, assumptions regarding the future path and volatility of yields are reviewed periodically. Canadian yield-volatility assumptions were reviewed against historical results in 2025 and were retained as appropriate for the intended use of the Canadian Investment Model.

Real estate and infrastructure assumptions are incorporated within the Model's broader return, volatility, correlation and adverse-state framework. However, separate historical Canadian stress-testing exercises were not performed to directly calibrate or validate the 1-in-20 and 1-in-100 outcomes for real estate and infrastructure against specific historical Canadian market stress periods as representative of broad global core asset classes and since historic returns are relatively shorter for these asset classes. Accordingly, the reasonableness assessment for those asset classes is based on the overall Model calibration and validation process rather than a direct comparison of those percentile outcomes to particular historical market events.

As with any economic model, the Canadian Investment Model is a simplified representation of reality. Its projected outcomes should therefore not be interpreted with greater precision than the methodology supports, particularly in relation to extreme events.

PUB (MPI) 2-38

Part and Chapter:	**Part IX - INV Appendix 5 Shadow Portfolio Returns**	**R1 Qn. No.:**	**PUB(MPI) 1-89-Appendix 1**
PUB Approved Issue No.:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)**		
Topic:	**Investment Performance**		
Sub Topic:	**Actual Returns Versus Passive Policy and Shadow Portfolios**		

Preamble to IR (If Any):

For the Basic Claims portfolio, timing effects were the main source of the difference between actual and passive policy returns in 2021/22, 2022/23 and 2024/25, while active positioning was the main source in 2023/24.

Question:

a) Please provide the definition of timing effects. Explain how they are calculated in Appendix 1, including the formula or methodology used to separate timing effects from active positioning.

b) For each of the last three fiscal years please explain the primary drivers of the negative timing effect in provincials (rebalancing lag, cash flow timing, duration decisions).

c) For the EFB – large timing swings, please explain the primary sources of the large negative timing effects in Canadian Equity (–3.98%) and Global Equity LV (–1.16%) in 2025/26 and the large positive infrastructure timing effect in FY 2024/25 (+3.45%).

Rationale for Question:

To understand actual returns relative to the passive policy benchmarks.

RESPONSE:

a) Timing effects represent the portion of the difference between the actual portfolio return and the passive policy return that is attributable to changes in portfolio exposures during the period. Timing effects reflect market timing, security trading timing and tactical asset allocation decisions.

The timing effects were calculated based on the following formulas.

Active positioning = Average active relative weight x Benchmark return
Average active weight is the difference between the portfolio's average actual weight and its passive average policy weight.

Timing effect = (Actual - Passive Policy Return Contribution) – Active positioning

The total difference between the actual and passive policy return contributions is separated into:

- The effect of maintaining average asset class weight above or below the passive policy weight, and
- The residual effect associated with changes in the portfolio exposures during the measurement period.

b) The primary driver of the negative timing effect in provincial bonds over each of the last three fiscal years was the portfolio's duration relative to the benchmark.

For FY 2023/24, the duration factor reduced relative performance by 36 bps with the portfolio having a longer duration than the benchmark (by 0.9 years on average) in a rising interest rate environment. During the period, the IPS benchmark for Provincials bonds within the Basic Claims portfolio was changed from a blended 55%/45% FTSE

Mid/Long Provincials Indices to a 100% FTSE Mid Provincials Index. The decline in the portfolio duration was lower than the decline in the benchmark duration.

For FY 2024/25, the duration factor reduced relative performance by 15 bps with the portfolio having a longer duration than the benchmark (by 2.3 years on average) and a lengthening of the portfolio duration in a rising interest rate environment.

For FY 2025/26, the duration factor reduced relative performance by 105 bps with the portfolio having a longer duration than the benchmark (by 4.2 years on average) and a lengthening of the portfolio duration in a rising interest rate environment.

c) In FY 2025/26, for the EFB portfolio, the negative timing effects in Canadian Equity were primarily explained by the reduced allocation to the asset class in months of significant positive benchmark returns (4.5% on average) and an increased allocation to the asset class in a month of negative benchmark return (-0.9%).

In FY 2025/26, for the EFB portfolio, the negative timing effects in Global Equity LV were primarily explained by the reduced allocation to the asset class in months of significant positive benchmark returns (2.5% on average).

In FY 2024/25, for the EFB portfolio, the positive timing effects in infrastructure were primarily explained by the increased allocations to the asset class in months of significant positive benchmark returns (0.6% on average). During the period, the net impact of the increased allocation to GDIF, the first capital contributions to the Brookfield Super Core Infrastructure Fund and the sales of the BMO Infrastructure ETF had a positive timing effect.

PUB (MPI) 2-39

Part and Chapter:	**Part IX - FFI** **Section FFI.12** **Figure FFI-4**	**R1 Qn. No.:**	**PUB(MPI) 1-90**
PUB Approved Issue No.:	**4. Financial forecast (d) Investment income forecast and (e) Interest rate forecast**		
Topic:	**Investment Income Forecast**		
Sub Topic:	**Real Estate Return Assumption in the Model Versus the New Money Yield**		

Preamble to IR (If Any):

For purposes of forecasting future investment income, MPI uses the 5.90% forward-looking assumption. For purposes of the New Money Yield calculation, MPI uses the 3.74% benchmark-based assumption. MPI considers each assumption appropriate within its respective framework.

Question:

a) Setting aside the different purposes of the two calculations, what does MPI consider its single best estimate of the expected long-term return on the real estate portfolio that is actually held?

b) Please explain why a 216 basis point difference between the return used to forecast investment income and the return used in the New Money Yield is considered reasonable for the same real estate holdings.

c) To what extent does the New Money Yield Methodology employ Future Forecast Assumptions?

d) Please elaborate on what is meant by respective framework and explain why it is internally consistent and appropriate to use a historical return for determination of the

future return for real estate in the New Money Yield Calculation and to use WTW's forward-looking capital market assumption for investment income purposes.

e) Please explain to what extent WTW's capital market assumptions are utilized by the Corporation's Investment Committee and the determination of the NMY.

Rationale for Question:

To understand the real estate return assumptions and the use of two different real estate return assumptions for NMY and investment income purposes.

RESPONSE:

a) As noted in *PUB (MPI) 1-90* and *PUB (MPI) 2-3*, MPI considers WTW's forward-looking capital market assumption of 5.90% to be its single best estimate of the expected long-term return for the real estate asset class. This assumption reflects WTW's forward-looking assessment of expected future market conditions and long-term return expectations and is used as an input to MPI's strategic asset allocation, ALM, and long-term financial forecasting processes.

The assumption is intended for modelling and decision-support purposes and should be considered within the context of the broader capital market modelling framework, including assumptions regarding volatility, correlations, inflation, and the expected behaviour of other asset classes. It is not intended to be a prediction of future realized returns. Actual returns will vary from year to year and may differ materially from the long-term assumption.

b) MPI considers the difference reasonable because the two assumptions are derived using different methodologies and are used for different purposes.

The New Money Yield assumption is based on MPI's established, board approved ratemaking methodology. Under this methodology, a naïve return assumption based on the real estate benchmark is used as an objective and consistently applied estimate of future returns for ratemaking purposes. By contrast, the 5.90% real estate return

assumption used in WTW's capital market assumptions is a forward-looking estimate intended for strategic asset allocation, asset-liability modelling, and long-term financial forecasting.

The forward-looking assumption is developed as part of a broader capital market modelling framework that incorporates expected returns, volatility, correlations, inflation expectations, and the behaviour of other asset classes. It is intended to support long-term decision-making and is not a prediction of future realized returns.

Accordingly, MPI considers the difference between the two assumptions reasonable because they address different questions using different methodologies and are applied within different analytical frameworks.

c) The New Money Yield methodology does not employ future forecast assumptions. The methodology is based on current portfolio characteristics, market yields as at the valuation date or historical benchmark returns where applicable.

d) It is appropriate to use two different real estate return assumptions because the assumptions are applied for different purposes and are derived using different methodologies.

The NMY is a critical assumption used to discount future claims liabilities. Given the direct impact that it has on rate indication, MPI considers stability, objectivity and consistency to be important. Accordingly, the methodology uses a naïve return assumption based on the real estate benchmark. MPI considers the benchmark based approach appropriate because it is transparent, and less sensitive to short term changes in market expectation. By contrast, WTW's 5.90% real estate assumption is a forward-looking capital market assumption used in support of strategic asset allocation, asset-liability modelling, and long-term financial forecasting.

WTW's assumption is developed as part of a broader capital market modelling framework that considers expected returns, volatility, correlations, inflation expectations,

and the behaviour of other asset classes. The assumption is intended to support long-term decision-making and is not a prediction of future realized returns.

Accordingly, MPI considers the use of different assumptions appropriate because each assumption is applied within a different analytical framework and is intended to address a different objective. The New Money Yield supports ratemaking and investment income estimation, while the forward-looking capital market assumption supports long-term strategic analysis and financial forecasting.

e) WTW's capital market assumptions are not utilized in the determination of the New Money Yield. The NMY is determined using its established methodology and does not incorporate forward-looking capital market assumptions.

WTW's capital market assumptions are used as inputs to strategic investment analysis, including asset-liability management studies, liability-hedging analysis, strategic asset allocation reviews, and evaluation of alternative portfolio structures.

In the August 2026 strategy review, the capital market assumptions were used to evaluate portfolio efficiency, liability matching, tracking error, expected risk and return characteristics, and alternative liability-hedging and return-seeking asset structures.

The assumptions are not determinative on their own. The results of these analyses are considered alongside other factors, including liabilities, capital impacts, liquidity requirements, implementation constraints, and MPI's investment objectives.

The assumptions are intended to support long-term strategic analysis and should not be interpreted as predictions of future realized returns.

PUB (MPI) 2-40

Part and Chapter:	**Part IX - Investments** **INV Appendices 1, 6, 7, 8, 10** **PUB (MPI) 2-39 (2026 GRA)**	**R1 Qn. No.:**	**PUB(MPI) 1-92 (f)**
PUB Approved Issue No.:	**8. Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value and peer universe basis (e.g. asset mix)**		
Topic:	**Investment Performance**		
Sub Topic:	**Performance Report Updates and Investment Policies Manual Changes**		

Preamble to IR (If Any):

WTW's performance, as well as any reporting that is required from the OCIO, is monitored by the MPI internal Investment team and, when appropriate, MPI senior management.

Question:

a) Please indicate the composition of the Investment Team.

b) Please indicate what framework or guidance is used to determine "when appropriate" to involve MPI senior management.

Rationale for Question:

To understand Investment Portfolio Management.

RESPONSE:

a) The internal ALM & Investments Management Team consists of four members: the Manager, Investments; two Senior Investment Analysts; and the ALM Lead. Three members are CFA charter holders, while the fourth is currently enrolled in the CFA Program. The ALM Lead also holds the Associate of the Society of Actuaries (ASA) and Associate of the Canadian Institute of Actuaries (ACIA) designations.

b) WTW's performance is measured against the Service Level Standards set out in the Service Agreement with WTW and is reviewed quarterly by the internal investment team. The results of this review are reported to the Investment Committee for information. At each Investment Committee meeting there is an in-camera session with the Investment Committee and the Vice President & Chief Actuary to discuss WTW's performance.

MPI Investment team responsibilities can be found in section 3.7 of the Investment Policy Statement, which is part of the Investment Policy Manual that has been submitted as an Appendix in this GRA.

Reports and recommendations related to the MPI Investment Portfolio are reviewed by MPI senior leadership. The reports and recommendations are then presented to the Investment Committee Working Group and the Investment Committee.

Any recommended changes to the asset mix or the Investment Policy Manual must be approved by the Investment Committee.

PUB (MPI) 2-41

Part and Chapter:	**Part VIII Expenses**	**R1 Qn. No.:**	**PUB(MPI) 1-95 (b)**
PUB Approved Issue No.:	**16. Changes, if any, to integrated cost allocation methodology since the 2026 GRA**		
Topic:	**Cost Allocation**		
Sub Topic:	**ICAM**		

Preamble to IR (If Any):

As claims emerge under the revised coverage structure, the resulting shift in claims incurred between Basic and Extension will be incorporated into the claims incurred allocator through the normal operation of the historical rolling-average methodology. Over time, the allocator will therefore reflect the actual experience associated with the coverage changes without requiring any departure from the approved ICAM.

Question:

a) Please file in both PDF and Excel the determination of the claims incurred allocator utilized in this application.

b) Please provide an analysis, utilizing the actual claims incurred for 2026 year-to-date, based on forecast claims and the current estimate of known cat claims and based on the determination of the four-year rolling average, how it is expected to impact the allocator to Basic.

Rationale for Question:

To understand how the changes in coverage could potentially impact the test year rates.

RESPONSE:

a) Please see *Figure 1* below, replicated and provided electronically as *Appendix 1*, for Basic claims incurred allocators applied in the 2027 GRA.

Figure 1 Basic claims incurred allocators

PUB (MPI) 2-42

Part and Chapter:	**Part X - RMF Appendix 1 (Summary of Changes, March 25, 2026)** **Part X - RMF chapter**	**R1 Qn. No.:**	**PUB(MPI) 1-96(c)**
PUB Approved Issue No.:	**15. Risk Assessment and Risk Management**		
Topic:	**Risk Appetite**		
Sub Topic:	**Direction of the March 25, 2026 Risk Appetite Changes**		

Preamble to IR (If Any):

To build organizational capability, a dedicated Workforce Planning Lead role was introduced to support senior leadership in developing workforce planning practices, tools, and workforce strategies aligned to business objectives. The strategy is to focus on building processes and educating our leaders over the next two years while ensuring the new ERP will provide the technology and data insights needed to increase our maturity levels further.

Key deliverables in the 2026/27 fiscal year include implementing key workforce planning enablers, including a Workforce Capacity Assessment Tool, Critical Positions and Key People Assessment Tool, and the development of Divisional Workforce Plans aligned to organizational strategy.

Question:

a) Please provide an update on the development of each of the tools and Divisional Workforce plans.

b) What specific, measurable improvement in workforce-planning maturity is expected by the end of 2026/27 and by the end of the two-year period? How will that improvement be assessed?

c) Who is responsible for the workforce-planning maturity initiative, and how (and how often) will progress be reported to senior management and the Board/Risk Committee?

Rationale for Question:

To understand the changes to the Risk Appetite Statement and their effect on the management of the affected risks.

RESPONSE:

a) Development of the Workforce Capacity Assessment Tool is progressing as planned with focus on the most critical areas as identified by the Executive. Following initial pilot work and validation, refinements are being incorporated to support broader implementation through to March 31, 2028. The tool will provide a consistent approach for leaders to assess workforce capacity, measuring supply and demand, and to align resources with business priorities.

The Critical Positions and Key People Assessment Tools have been developed and are currently being implemented across the organization. The tool supports the identification of critical workforce dependencies and informs succession and risk mitigation planning. Development of a standardized Workforce Planning Framework is progressing as planned. Engagement with divisional leadership teams is underway, with workforce plans being developed that will help establish a baseline understanding of workforce challenges and support actions to address key people-related risks.

b) By the end of 2026/27, the organization expects to have established foundational workforce planning practices through the implementation of common workforce planning tools and methodologies, the development of initial divisional workforce plans, and increased visibility into critical workforce risks. By the end of the two-year period, workforce planning is expected to become more integrated into business planning and strategic decision-making, supported by improved workforce data, greater organizational visibility of workforce risks, and more mature workforce analytics capabilities. Progress each year will be assessed using a workforce planning maturity framework and key implementation measures, including completion of divisional workforce plans, adoption of workforce planning tools, completion of critical position and key people assessments, and the degree to which workforce planning is

integrated into business planning processes. The workforce planning strategy is to focus efforts on education and adoption of operational workforce planning to position to move towards greater maturity as MPI implements the new Enterprise Resource Planning which will provide better data and analytics capabilities.

c) The Workforce Planning Lead is responsible for leading the workforce planning maturity initiative, supported by the Director of Human Resources and the VP of People & Culture. This includes the development of frameworks, tools, and workforce planning practices. Successful implementation is supported through collaboration with People & Culture leadership, Executive leadership, and Divisional leadership teams. Progress and updates are provided to the Chief People Officer bi-weekly. Semi-annual updates are provided to the Executive and the Governance and HR Committee of the Board. This action is also tracked by the Enterprise Risk Management team through MPI's ERM program and their reporting to the Risk Committee of the Board. Reporting will focus on progress against key deliverables, workforce planning maturity, and emerging workforce-related risks and mitigation.

PUB (MPI) 2-43

Part and Chapter:	**Part X - RMF Appendix 4 as approved (MPI Exhibit #3, June 30, 2026)** **Part X - RMF chapter**	**R1 Qn. No.:**	**PUB(MPI) 1-97 (a), (d),(e)**
PUB Approved Issue No.:	**15. Risk Assessment and Risk Management** **7. Capital Management Plan (a) Transfers of Extension excess capital**		
Topic:	**Risk Appetite**		
Sub Topic:	**Replacement of the Earnings Risk Appetite Thresholds**		

Preamble to IR (If Any):

The loss ratio deviation thresholds were removed from the Earnings Risk appetite because they primarily measured specific drivers of insurance performance rather than the enterprise financial outcome that the Earnings Risk category is intended to capture.

The Earnings Risk appetite measures of maintaining ROE within ±5% of 0% and net income within ±$30 million of budget (across a five-year period) are therefore intended to assess whether financial results remain reasonably consistent with the Corporation's break-even mandate while recognizing normal year-to-year variability. These measures provide a reasonable tolerance for short-term fluctuations while helping to identify whether financial performance is trending materially above or below the level anticipated through the ratemaking and budgeting processes. Please note that MPI currently does not have an approved Capital Management Plan but adheres to its statutory target.

Question:

a) Please describe the specific thresholds, frequency, and escalation path (to ERMC / Risk Committee) that now apply when Basic loss ratios deteriorate, given that they are no longer formal Earnings Risk appetite statements.

b) Given that MPI has no approved Capital Management Plan, how do the new Basic ROE ±5% of 0% and Extension ROE 40% ±10% thresholds interact with decisions on Extension excess capital transfers and with the statutory capital target?

c) Please quantify the Extension ROE and net income implied by the 2027 GRA forecast and state whether those forecasts sit inside the new 40% ± 10% appetite band.

Rationale for Question:

To understand the revised Earnings Risk appetite and how performance will be monitored against it.

RESPONSE:

a) The loss ratio deviation thresholds previously included in the Earnings Risk Category were removed and have not been replaced with new loss ratio-specific appetite thresholds.

Loss ratio deterioration continues to be monitored through regular actuarial, financial and risk management processes, including ongoing assessments of Insurance Risk (e.g., Pricing Risk, Reserve Risk and Catastrophe Risk). The frequency of monitoring varies based on the nature of the analysis and reporting process. Material deterioration is assessed based on its potential impact on financial performance, capital adequacy, rate stability, or other approved risk appetite measures and is escalated through MPI's established management, ERM Committee, and Risk Committee/ Board reporting processes as appropriate.

b) The ROE thresholds for each line of business are established independently, based on their financial objectives and risk profile. The earnings appetite measures, therefore, serve as benchmarks to monitor the financial performance of each line of business and rather than as triggers for capital transfer. Decisions regarding capital transfers are made separately by the management and Board taking into account capital targets, financial health of each line of business and the Corporation's overall financial position.

c) The 2027 GRA forecast shows 5-year equity weighted rolling average ROEs marginally above the proposed Extension ROE risk appetite of 40% ± 10%. This result is primarily driven by the unusually strong ROEs achieved in 2024/25 and 2025/26, which continue to influence the rolling average throughout most of the forecast period. The metric returns to the acceptable range by the end of the forecast horizon.

PUB (MPI) 2-44

Part and Chapter:	**Part III Basic Autopac Coverage Chapter(section BAC.3)**	**R1 Qn. No.:**	**PUB(MPI) 1-101(d)**
PUB Approved Issue No.:	**17. Status update on report to be prepared by experts on Traumatic Brain Injuries (TBI) setting out: current scientific knowledge and proven medical best practices and best practicable technology to diagnose, assess and manage brain injuries; appropriate insurance for victims of s; and a comparison of leading medical and insurance practices to the current practices and procedures of MPI**		
Topic:	**Traumatic Brain Injury**		
Sub Topic:			

Preamble to IR (If Any):

PUB(MPI) 1-101(d):

> *The General Rate Application was prepared and filed on June 24, 2026, and MPI had just received approval from the Minister's Office to waive tender and enter into an agreement with the vendor (on June 23, 2026). The responsible business unit has since met with vendor management to work through the process of establishing a Statement of Work (SOW), which is expected to be finalized and executed in early August 2026.*

Question:

a) Please provide the agreement with the service firm selected to perform the TBI assessment.

b) Please provide the agreed Statement of Work.

c) Please provide a timetable for when the report or analysis is to be completed.

Rationale for Question:

To understand the timing of the TBI report.

RESPONSE:

a) and b) Please see *Appendix 1 - TBI Advisory Documentation – Confidential.*

c) Work has commenced and the SOW is scheduled for conclusion November 30, 2026.

Statement of Work

This Statement of Work ("SOW") is entered into between Manitoba Public Insurance Corporation ("MPI" or the "Client") and PricewaterhouseCoopers LLP ("PwC"), effective as of the date of last signature below (the "Effective Date").

This SOW, together with PwC's General Terms and Conditions attached hereto as Schedule A (the "General Terms"), constitutes the entire agreement between the parties with respect to the Services described herein and supersedes all prior discussions, proposals, and communications, whether written or oral. In the event of any conflict or inconsistency between the body of this SOW and the General Terms, the body of this SOW shall prevail with respect to the Services described herein.

Background and Purpose

Following Public Utilities Board ("PUB") Order 2/25 dated January 7, 2025, the Government of Manitoba directed MPI to commission an independent investigator to examine MPI's current process of handling claimants with Traumatic Brain Injuries ("TBI").

The purpose of this engagement is for PwC to prepare an assessment report of MPI's current processes and procedures on claims where a TBI has been identified, in comparison to leading practices, and to identify prioritized, actionable opportunities for improvement within MPI's control.

Scope and Deliverables

The Services are organized into three stages: (A) Pre-Assessment Planning; (B) Assessment Execution; and (C) Reporting and Presentation. PwC will develop and provide the deliverables expressly identified in this SOW, including the interim work products identified below and the Comprehensive Final Report, accompanying presentation, and agreed supporting exhibit pack.

For clarity, materials created or collected during the engagement fall into three categories:

1. MPI deliverables: materials expressly identified in this SOW as deliverables or work products to be provided to MPI, including the assessment plan, current-state process map, gap analysis, draft report, Comprehensive Final Report, accompanying presentation, and agreed supporting exhibit pack.
2. Source information: information collected or reviewed to support the assessment, including interview information, claimant survey or interview information, file assessment records, documents provided by MPI, and other source materials. Source information will be used to inform the findings and recommendations and may be summarized, anonymized, aggregated, referenced, or included in the agreed supporting exhibit pack, as appropriate and subject to applicable privacy, confidentiality, and consent requirements.

3. PwC internal working papers: PwC's internal analyses, notes, quality review materials, proprietary methodologies, templates, tools, and other internal working papers prepared for the purpose of performing the Services. Unless expressly identified as part of the deliverables or agreed supporting exhibit pack, PwC internal working papers do not form part of the deliverables to MPI and remain PwC property, subject to any applicable legal, regulatory, or PUB production requirements.

The parties acknowledge that the Comprehensive Final Report, accompanying presentation, and agreed supporting exhibit pack are intended to be the formal client-facing deliverables that may be filed with or produced to the PUB. The parties will work together to ensure that any materials intended for PUB filing are identified before finalization and are prepared in a manner that appropriately addresses confidentiality, personal information, personal health information, and any required anonymization or aggregation.

A. Pre-Assessment Planning

Prior to conducting the assessment, PwC will:

- Conduct a kickoff meeting with MPI to align expectations and establish clear communication protocols;
- Work with MPI to define the objectives, scope, and timelines of the assessment. In this meeting, MPI will provide an overview of the current process to aid in defining the assessment plan; and
- Develop a detailed assessment plan outlining the methodologies, tools, and data collection techniques to be used.

B. Assessment Execution

In conducting the assessment, PwC will:

- Use a defined framework to assess and compare MPI's current processes and procedures against leading practices and comparator jurisdictions; and
- Evaluate how MPI currently handles TBI claims and identify strengths and weaknesses that are within MPI's control.

The framework will evaluate MPI's practices across the following dimensions: Process Clarity, Consistency, Documentation, Decision Quality, Coordination Effectiveness, Timeliness, and Claimant Experience.

Data collection activities underpinning the assessment will include, for example: structured interviews with claims and rehabilitation leaders; a review of a sample of de-identified TBI claim files (suggested up to 30 files, drawn from the prior three years), which

shall be de-identified by MPI prior to disclosure to PwC and stripped of direct and indirect identifiers reasonably capable of identifying individual claimants; engagement with approximately 10–15 claimants (or their authorized representatives) through a brief survey or interview to capture the claimant perspective; and review of relevant procedures, clinical reference frameworks, and training materials.

The approach to capturing claimant perspectives will remain flexible, balancing engagement needs with the PUB timeline while ensuring informed claimant consent, appropriate claimant authorization, respecting individual confidentiality and protection of personal health information. PwC shall ensure participation is voluntary and that claimants are informed how their information will be collected, used, disclosed, and reflected in any resulting report. Unless expressly authorized by the claimant, any reporting arising from claimant interviews shall be anonymized and presented in aggregate form such that individual claimants cannot reasonably be identified.

.

C. Reporting and Presentation

After concluding the assessment, PwC will develop and provide:

- A summary of findings and actionable recommendations;
- The intended outcome of each recommendation; and
- The impact and priority of completing each recommendation.

PwC will provide a final report detailing the assessment findings, recommendations, and impact assessment. PwC will present the findings to MPI to ensure clarity and facilitate informed decision-making. PwC may also be asked to make available a suitable Representative to present the findings to the PUB at MPI's request.

Work Products and Final Deliverable

The final deliverable is the Comprehensive Final Report and Presentation to MPI. The following interim work products will be developed and shared with MPI to inform and support the final report:

#	Work Product/Deliverable	Overview
1	Assessment plan	Methodology, framework, data requirements, interview list, sampling approach.
2	Current-state process map	End-to-end map of MPI's TBI claim handling; strengths and weaknesses within MPI's control.
3	Gap analysis	Comparator-grounded practices against the reference jurisdictions.
4	Draft report	Full draft for MPI factual review. Findings and recommendations with intended outcome, impact and priority.

#	Work Product/Deliverable	Overview
5	Final report and exhibit pack	Final report, supporting evidence pack, methodology appendix, references (ready for PUB filing).
6	PUB testimony support	Suitable representative available on two weeks' notice to provide preparation support and attend one PUB hearing or testimony session relating to the report. Any additional hearing attendances, testimony sessions, document production requests, or related support requested after the first appearance shall be billed at PwC's standard rates and reimbursed in accordance with the PUB Testimony / Presentation Reimbursement section..

PwC Team

The engagement will be led by the following team:

Engagement Partner	[redacted]
Quality Review Partner	
Engagement Director	
Strategic Advisor	

The core team will be supported by PwC's National and Global Specialist Panel in Insurance, as required. Additional staff members will be onboarded as required by the project. We reserve the right to change staff as required, but you will be consulted should changes be required for the named individuals.

Timing and Duration

Eight (8) weeks from commencement of the Services, to be completed no later than three (3) months from commencement.

- Project Start Date: August 6, 2026
- Estimated Completion Date: November 30, 2026

Fees and Payment

Fixed Fee: **$315,000**, exclusive of applicable GST/HST.

Fees will be invoiced in two instalments over the course of the eight-week engagement. The first instalment, issued at the project midpoint, reflects effort expended on planning, data collection, and current-state evaluation. The second and larger instalment, issued

upon delivery of the final report and presentation, reflects the concentration of analytical effort and value in the gap analysis, findings, and prioritized recommendations that are delivered to MPI at the close of the engagement.

Invoicing Schedule

Milestone	Payment %	Amount (CAD)
[redacted]		
Total	**100%**	**$315,000**

Expenses

Reasonable out-of-pocket expenses (travel, meals, accommodation) will be billed at cost, subject to MPI's prior written approval.

PUB Testimony / Presentation Reimbursement

Other than attendance at the PUB hearing as included in the Deliverables, if PwC is requested or authorized by Counsel or Client, or required by government regulation, regulatory agency, subpoena, or other legal process to produce PwC's Deliverables, working papers, or personnel for testimony, interview, or presentation with respect to Services performed under this SOW, MPI will reimburse PwC for its and its Subcontractors' (and their respective counsels') reasonable expenses and professional time incurred in responding to such request, provided that such reimbursement obligation shall not apply when PwC is an original party to the proceeding.

Client/Purchaser's Responsibilities

- MPI will provide a project sponsor responsible for decision-making and an executive responsible for issue escalation.
- MPI will provide an overview of the current TBI claims process during the kickoff meeting to inform the assessment plan.
- MPI will schedule interviews and workshops and ensure timely availability of relevant stakeholders.

- MPI will provide requested documentation and data within forty-eight (48) working hours of request, where reasonably possible.
- MPI will provide input and comments on draft deliverables within seven (7) working days of receipt.
- MPI will cover any legal fees associated with the engagement.
- MPI will have the opportunity to review the Deliverables, provide input, and approve them prior to use. Once finalized, the Deliverables are intended for MPI's use as its own work product and may be filed with, produced to, or relied upon by MPI in regulatory, administrative, or legal proceedings. Notwithstanding the foregoing, PwC may identify itself as the author of the Deliverables and may present, explain, defend, or provide testimony regarding the Deliverables as required herein or where requested by MPI or required by law. The Deliverables will not otherwise be presented as PwC-branded materials.

Key Assumptions

- The engagement is advisory in nature and does not constitute an audit, assurance, or certification engagement, and does not include actuarial analysis or an opinion on compliance with laws, regulations, or best practices.
- PwC's review focuses on claims administration and process, and does not extend to medical or clinical decisions, clinical appropriateness, diagnoses, or treatment decisions, the appeals process (AICAC), or unrelated MPI initiatives (e.g., NOVA).
- Analysis is based on information provided by MPI, or ifomration collected by PwC through interviews, and publicly available sources, including for the jurisdictional scan, and is not independently verified. Any material limitations affecting the reliability of the assessment will be identified in the final report.
- Recommendations are advisory, with management and implementation decisions resting with MPI.
- Claimant engagement will be subject to appropriate authorization and confidentiality protections, with the approach adapted as needed to align with the PUB timeline. Claimants will be advised by PwC of how their information will be collected, used, disclosed and incorporated into any resulting report.
- Successful delivery depends on timely access to data, stakeholders, and MPI feedback on interim work products.
- The parties acknowledge that the final report may be filed with, produced to, or otherwise disclosed in connection with regulatory proceedings. Accordingly, the report will be drafted to avoid the inclusion of personal information or personal health information except where expressly agreed by the individual and MPI.

Acceptance Terms
Deliverables will be deemed accepted if MPI does not provide written feedback within seven (7) working days of receipt or requests a reasonable extension.

Signed for and on behalf of PricewaterhouseCoopers LLP:

Name: [redacted]
Title:
Signature: [redacted]
Date: 2026 - 08 - 07

1. Introduction

1.1 **Interpretation** – In this agreement, the following words and expressions have the meaning given to them below:

- **Agreement** – these terms and the SOW to which they relate (including any exhibits and schedules).
- **Deliverables** – the deliverables set out in the SOW (if applicable).
- **PwC, we, us or our** – PricewaterhouseCoopers LLP, a limited liability partnership organized under the laws of the Province of Ontario, or such affiliated legal entity that has signed the SOW.
- **Services** – the services set out in the SOW.
- **you, your** – the client party that has signed the SOW.

1.2 **Changes** – Either we or you may request a change to the Services, Deliverables or this Agreement. Any change will be effective only when agreed in writing.

1.3 **Services/Deliverables** – We are providing the Services and Deliverables solely for your internal use and benefit set out in the SOW or relevant Deliverable and not for any other person's or entity's use, benefit, or reliance, and we disclaim any contractual or other responsibility, liability, or duty of care to any person or entity other than you in connection with the Services and Deliverables. Unless otherwise provided in this Agreement or as required by law, you shall not disclose a Deliverable or its contents to anyone else or make the benefit of the Services available to anyone else or authorize any other party to rely upon a Deliverable or our Services.

2. PwC Firms, Service Providers and Subcontractors

2.1 **PwC Network** – We are a member of the global network of PricewaterhouseCoopers firms (PwC Firms), each of which is a separate and distinct legal entity.

2.2 **Subcontractors and Service Providers** – We may use other PwC Firms, service providers and subcontractors to provide the Services and support service delivery. For administrative purposes, services provided by subcontractors that are owned by PricewaterhouseCoopers LLP and provide services outside of Canada may be invoiced separately. We remain solely responsible for the Services and Deliverables and no other PwC Firm has any liability in connection with the Services. We are entering into this Agreement on our own behalf and for the benefit of all other PwC Firms that will be providing Services under this Agreement.

2.3 **Restriction on Claims** – You agree that claims or actions relating to the Services, Deliverables and this Agreement shall be brought against us alone, and not against: (i) any individual, (ii) another PwC Firm (or its partners, members, directors or employees), or (iii) our subcontractors.

2.4 **Group Members** – You will ensure that none of your subsidiaries, affiliates, associated entities or holding companies bring any claim or action against us or any other PwC Firm.

3. Your Responsibilities

3.1 **Your Obligations** – The performance of our Services and provision of the Deliverables depends on you performing your obligations under this Agreement. We are not responsible for any consequences arising from you not fulfilling your obligations.

3.2 **Information and Access** – In order for us to advise you properly, you will make sure that you provide us with access to all information, documents, technology,

tools, applications and other materials (including those of a third party) we may require from you to perform the Services (Client Materials). You will also make sure that: (i) any Client Materials given to us by you, or anyone else working with or for you, are: (a) given promptly, (b) accurate and (c) complete; and (ii) any assumptions are appropriate. We will not verify any Client Materials given to us and we assume no responsibility and make no representations with respect to the accuracy or completeness of any Client Materials provided by you or on your behalf. You grant us a royalty-free, non-exclusive, non-transferable and sublicensable licence to use Client Materials in direct connection with the performance of the Services and the provision of the Deliverables.

3.3 **Oral advice and Draft Deliverables** – You may rely on our final written Deliverables, but should not rely on oral advice or draft Deliverables provided during the term of this Agreement. If you wish to rely on something we have said to you, please let us know and, if practical, we will prepare a written Deliverable on which you may rely.

4. Information Protection

4.1 **Confidential Information** – Confidential Information means non-public information marked "confidential" or "proprietary" or that otherwise should be understood by a reasonable person to be confidential in nature, provided by a party or on its behalf, but does not include information which: (i) is or becomes generally available to the public other than as a result of a breach of an obligation under this clause; or (ii) is known to the receiving party prior to disclosure hereunder; or (iii) is independently developed by the receiving party without use of or reliance on Confidential Information; or (iv) is received from a third party who owes no obligation or confidence in respect of the information. We and you will use the other's Confidential Information only in relation to the Services, and the receiving party will not disclose Confidential Information except where required by law or professional obligation. You agree that we may give Confidential Information to third-party service providers, subcontractors and other PwC Firms, only to the extent they are required to perform the Services, as long as they are bound by reasonable confidentiality obligations.

4.2 **Personal Information** – The parties agree that should the delivery of the Services or Deliverables require the disclosure of "Client Personal Information", as defined in the Data Protection Addendum attached as Schedule A (DPA), all rights and responsibilities with respect to Client Personal Information shall be solely governed by the DPA, including all applicable Schedules thereto.

4.3 **Reportable and Notifiable Transaction Disclosures** – Certain federal, provincial and foreign laws and regulations require taxpayers, advisors and other persons to disclose to a tax authority information in respect of certain transactions or other matters. These laws and regulations may require a disclosure to be made by us or by other PwC Firms. You will promptly advise us if you determine that any matter covered by this Agreement is required to be disclosed. The parties shall cooperate with each other with respect to making any required disclosure by either party. If we believe we are required to make such disclosure, we will make the disclosure, and where applicable, coordinate with other PwC Firms, if disclosure is required by other PwC Firms. Where a party is required to make such a disclosure, that party, where practicable, shall share that disclosure with the other party before it is made to the relevant tax authority.

4.4 **Tax Structures & Confidentiality** – Notwithstanding anything to the contrary in this Agreement, you have no obligation of confidentiality with respect to any portion of any materials, advice or Deliverables to the extent they concern the tax structure or tax treatment of any transaction or series of transactions, including the details or structure of a transaction or series under which a Canadian tax benefit could result.

4.5 **Compliance and Restricted Data** – You are responsible for abiding by and making us aware of all industry-, sector- or client-specific laws, requirements, and regulations applicable to the Services, Deliverables, you and Client Materials, and for providing us with timely updates regarding any changes to those applicable laws, requirements, and regulations. Without limiting the foregoing, as certain jurisdictions have strict laws around exporting restricted classes of software or data, you shall advise us in writing immediately if Client Materials that may be disclosed to

or accessed by us in performing the Services are subject to export control restrictions under applicable laws.

4.6 **Data Analytics** – Notwithstanding any other provision of this Agreement, PwC and other PwC Firms may use Confidential Information received hereunder, so long as no Client Personal Information (as defied in the Addendum) is included, to develop, enhance, modify and improve the services and offerings of PwC and other PwC Firms, or for the performance of data analysis or other insight generation. PwC and other PwC Firms may use or disclose information collected or generated in connection with these purposes to current or prospective clients to provide them services or offerings, provided that PwC and other PwC Firms will not use or disclose your Confidential Information in a manner that would permit you to be identified by third parties without your consent. For clarity, we will not sell any of your Confidential Information to third parties.

4.7 **Referring to you and the Services** – We may wish to refer to you and the Services we have performed for you when marketing our services. You agree that we may do so, as long as we do not disclose your Confidential Information, if we first receive your permission in writing.

4.8 **Working with Competitors** – You agree that we may work with your competitors or other parties whose interests may conflict with yours, as long as we do not disclose your Confidential Information and we comply with our ethical obligations.

4.9 **Information Request** – In the event we receive a request from a third party (including a demand from a government agency or a regulatory authority, subpoena or summons) for information, we will promptly notify you, where not prohibited by law or other authority.

4.10 **Reimbursement of Costs Incurred** – You agree to reimburse us for our professional time and expenses, as well as reasonable fees and expense of our legal counsel, incurred by us in responding to any investigation that is requested or authorized by you or an investigation of you required by government regulation, subpoena or other legal process.

5. Intellectual Property

5.1 **Deliverables** – Subject to our continued ownership of PwC Materials, you will own all Deliverables as specified in the SOW, including any interim work products, final reports, presentations, supporting exhibit packs, appendices, and other deliverable specifically designated as Deliverables in the SOW.

5.2 **PwC Materials** – We retain all rights (including ownership and intellectual property rights) in our working papers. Other than the licenses granted below, we also retain all rights (including ownership and intellectual property rights) in our materials, hardware and software, as well as any general skills, know-how, processes, procedures, reports, plans, designs, analyses or other intellectual property (including any non-client specific versions of any Deliverables) which we may have discovered, created or developed prior to, concurrently with, or as a result of the Services (PwC Materials). You have a non-exclusive, non-transferable license to use PwC Materials included in the Deliverables for your own internal use as part of such Deliverables. To the extent we provide you with access to PwC Materials that are not included in the Deliverables, you have a non-exclusive, non-transferable license to use such PwC Materials for your own internal use as part of your use of the Services until this Agreement is terminated. Nothing in this Agreement shall be interpreted as assigning to you any rights (including any ownership or intellectual property rights) held by a third party or other PwC Firm.

6. Liability

6.1 **Limitations on Liability** – Our aggregate liability for or relating to any and all claims, losses, actions, liabilities, damages, costs and expenses in connection with, arising out of, or relating to this Agreement or its subject matter, whether as a result of actual or alleged breach of contract, tort (including negligence), extra-contractual liability or otherwise, regardless of the theory of liability asserted, is limited to no more than the total amount of fees paid to us under the SOW. We will only be liable for our proportionate share of any loss or damage, based on our responsibility relative to the responsibility of others. We shall have no liability arising from or relating to any Client Materials, including any third-party hardware, software, information or materials selected or supplied by you, or the use of any third party software used in relation to the Services, whether owned or licensed by us or you and whether or not such third-party software is required in order to take the benefit of any Deliverables provided pursuant to the Services.

6.2 **Exclusions** – In no event will either you or us be liable for any special, indirect, consequential, punitive or exemplary damages, whether as a result of breach of actual or alleged contract, tort (including, but not limited to, negligence), extra-contractual liability or otherwise, regardless of the theory of liability asserted.

6.3 **No Duty of Care to Third Parties** – You acknowledge and agree that we owe no duty of care to any third party and that we are relying on the instructions, information and materials provided to us by you in our performance of the Services and preparation of the Deliverables. You will indemnify us, our partners, principals, employees, subcontractors and other PwC Firms and hold us and them harmless from and against all third-party claims, losses, liabilities and damages arising from or relating to the Services or Deliverables.

6.4 **Unlimited Liability** – Notwithstanding any other provisions in this Agreement, a party's liability will not be limited for: (i) indemnification, payment and reimbursement obligations, (ii) death or personal injury due to that party's negligence, (iii) that party's fraud, or (iv) anything else that cannot by law or regulation be limited.

7. Termination

7.1 **By Either Party** – Either party may terminate this Agreement, for any reason, upon fourteen (14) days written notice to the other party. We will not be liable for any loss, cost or expense arising from such termination.

7.2 **Termination by PwC for Independence** – We will resign from performing all or any portion of the Services or providing all or any portion of the Deliverables and terminate this Agreement in the event that circumstances arise that would make the continuation of all or any portion of the Services by PwC in conflict with any independence or other professional regulations, standards, guidelines, laws or regulations to which PwC conforms. We will notify you immediately should we become aware of any such potential circumstances and our resignation shall be effective immediately.

7.3 **Fees Payable on Termination** – You agree to pay us for all Services we perform and Deliverables we provide up to the date of termination, including services performed, work-in-progress and expenses incurred.

8. Governing Law

8.1 **Law and Jurisdiction** – This Agreement and any dispute arising from it, whether contractual or non-contractual, will be governed by the laws of the Province of Ontario and the federal laws of Canada applicable therein and are subject to the exclusive jurisdiction of the courts of the Province of Ontario.

9. General

9.1 **Matters Beyond Reasonable Control** – No party will be liable (other than payment obligations) to the other if it fails to meet its obligations due to matters beyond its reasonable control.

9.2 **Entire Agreement** – This Agreement, once executed by both parties, forms the entire agreement between the parties in relation to the Services and Deliverables. It replaces any earlier agreements, representations or discussions, including non-disclosure agreements entered into in advance of this Agreement.

9.3 **Your Actions** – Where you consist of more than one party, an act or omission of one party will be regarded as an act or omission of all.

9.4 **Assignment** – Without written consent, neither party may assign any of its rights, obligations or claims under this Agreement.

9.5 **Survival** – Any clause that is meant to continue to apply after termination of this Agreement will do so.

9.6 **Severability** – If a court or regulator with proper jurisdiction determines that a provision of this Agreement is invalid, then that provision will be interpreted in a way that is valid under applicable law or regulation. If any provision is invalid, the rest of this Agreement will remain effective

Solicitation and Hiring of PwC Personnel – For the duration of this Agreement, and for 12 months after its termination or completion, you will not directly or indirectly solicit or hire any PwC partner or employee who has taken part in the performance of the Services without our prior written consent. This clause will not apply to someone you hire through an advertisement in the public domain.

DATA PROTECTION ADDENDUM

This Data Protection Addendum (this "***Addendum***") forms part of the agreement to which it is attached (such agreement and any applicable Statements of Work thereunder, collectively the "***Agreement***") between **PricewaterhouseCoopers LLP** ("***PwC***" or "***PwC Canada***") and **Manitoba Public Insurance** ("***Client***"). Capitalized terms in this Addendum have the same meaning as in the Agreement, unless otherwise defined in this Addendum. The order of precedence for resolving any conflict or inconsistency among the documents that form the Agreement is: (i) any applicable Statement of Work; (ii) this Addendum; and (iii) the main body of the Agreement.

This Addendum establishes how PwC will protect the confidentiality and security of Client Personal Information (as defined below). This Addendum consists of the main body of this Addendum and the following Schedules, which form an integral part of this Addendum:

Schedule A (Client Personal Information)

Schedule B (GDPR Specific Provisions)

Schedule C (Information Security Controls)

Schedule D (Subprocessors and Other PwC Member Firms)

1. **Definitions**. For purposes of this Addendum, the following definitions will apply:

   - "***Applicable Data Protection Laws***" means any applicable law relating to the processing or safeguarding of Personal Information, and includes, as applicable, Canadian Privacy Laws and the GDPR.
   - *"**Canadian Privacy Laws**"* means any applicable Canadian federal or provincial legislation relating to the collection, use, disclosure, retention, processing or safeguarding of Personal Information or Personal Health Information, including but not limited to the *Personal Information Protection and Electronic Documents Act* (S.C. 2000, c. 5) ("***PIPEDA***"), Manitoba's *Freedom of Information and Protection of Privacy Act* ("FIPPA"), Manitoba's *Personal Health Information Act* ("PHIA"),Quebec's *Act Respecting the Protection of Personal Information in the Private Sector*, C.Q.L.R. c. P-39.1 ("***Quebec's Privacy Act***"), the *Personal Information Protection Act*, S.B.C. 2003, c. 63 in British Columbia ("***BC PIPA***"), and the *Personal Information Protection Act*, S.A. 2003, c. P-6.5 in Alberta ("***Alberta PIPA***")
   - "***Client Personal Information***" means Personal Information that is provided by or on behalf of Client to PwC in connection with PwC's performance of Services pursuant to the Agreement, or is collected by PwC on Client's behalf, but does not include information about Client's representatives that PwC collects to manage the Client relationship.
   - "***GDPR Personal Information***" means Client Personal Information that is subject to the GDPR.
   - "***GDPR***" means collectively, *Regulation (EU) 2016/679 on the protection of natural persons with regard to the processing of Personal Data and on the free movement of such data*, and as transposed into United Kingdom national law by operation of section 3 of the *European Union (Withdrawal) Act 2018* and as amended by the *Data Protection, Privacy and Electronic Communications (Amendments etc.) (EU Exit) Regulations 2019*.
   - *"**Other PwC Member Firms**"* are the member firms of the PwC network, which is a global network of firms that provide professional services under the PwC brand. Other PwC Member Firms are separate and independent legal entities that may share data and resources with PwC Canada to provide services to clients or for administrative purposes.
   - "***Personal Information***" means information that relates to an identified or identifiable individual, including personal health information as defined under PHIA,but does not include information that has been anonymized or aggregated such that it is not personal information under Applicable Data Protection Laws.
   - *"**process**" or "**processing**"* means any operation or set of operations performed on Client Personal Information, whether by automatic means, such as collection, use, disclosure, recording, storage, deletion, or destruction.
   - *"**Security Incident**"* means a breach of PwC's security safeguards that results in the

accidental or unlawful destruction, loss, or theft of, or unauthorized use, disclosure of or access to, Client Personal Information in PwC's possession or custody.

- "***Services***" means the services to be performed by PwC as set forth in and pursuant to the Agreement.
- "***Subprocessor***" means a third-party organization that is engaged by PwC or Other PwC Member Firms to provide applications, functionality, data processing, IT services or other services to PwC in connection with the performance of Services under the Agreement.

2. **Description of Client Personal Information**. Client will provide PwC, in connection with the performance of Services, with the types of Client Personal Information for the categories of data subjects that are listed in **Schedule A** or in the Agreement. If the parties sign a Statement of Work under the Agreement after this Addendum, the Statement of Work will list the types and categories of Client Personal Information that Client will provide to PwC for that Statement of Work where they are different from those listed in **Schedule A**. Client will not provide PwC with any Client Personal Information that is not agreed by the parties and listed in **Schedule A** or the Agreement.

3. **Processing of Client Personal Information**. PwC shall process Client Personal Information in accordance with Applicable Data Protection Laws and Client's instructions as set out in this Addendum and/or the Agreement. PwC shall process Client Personal Information for the duration of the Agreement (or longer as permitted by applicable law), to provide the Services, for administrative, regulatory compliance or back-office support purposes and for any other purposes identified in this Addendum and/or the Agreement. If PwC is required by applicable law to process Client Personal Information outside of Client's instructions, PwC shall inform Client of that legal requirement before processing unless such disclosure is prohibited by applicable law.

4. **GDPR Personal Information.** Client agrees not to provide any GDPR Personal Information to PwC, unless agreed to by PwC and set out in **Schedule A** or the Agreement. When PwC processes GDPR Personal Information, PwC shall comply with the GDPR Specific Provisions set out in **Schedule B**.

5. **Other PwC Member Firms, Subprocessors and Subcontractors**. Client acknowledges and permits PwC to utilize and transfer Client Personal Information to Other PwC Member Firms and Subprocessors as set out in **Schedule D**, and any subcontractors (to the extent provided for in the Agreement), to facilitate its performance of the Services. PwC will ensure that any Other PwC Member Firms, Subprocessors or subcontractors are required to provide at least the same level of protection to Client Personal Information as is required by this Addendum.

6. **Data Subject Request**. If PwC receives a request from a data subject or individual to exercise their rights under Applicable Data Protection Laws ("***Data Subject Request***") regarding Client Personal Information, PwC will notify Client as permitted by law. At Client's request, PwC will provide reasonable assistance to Client to respond to the Data Subject Request. Client will pay PwC's reasonable and documented costs incurred by PwC for providing such assistance.

7. **Payment Card Information.** Client acknowledges that PwC does not maintain compliance with the Payment Card Industry Data Security Standard. Client shall not provide PwC, directly or indirectly, any payment card information, including any information relating to a payment card transaction unless: (i) such information is expressly set out in the Agreement; and (ii) the provision occurs only at a Client facility using Client devices and systems.

8. **Security Controls**. PwC will implement and maintain the security controls set out in **Schedule C**. These security controls are designed to meet Applicable Data Protection Laws and protect against unauthorized or unlawful processing, accidental loss, destruction, or damage of Client Personal Information. PwC may update the security controls by adopting new or enhanced security technologies, provided that such changes do not diminish the level of security for Client Personal Information.

9. **Security and Privacy Questionnaire**. On Client's written request, and not more than once a year, PwC will complete a written security and privacy assessment questionnaire related to the Services, provided that this does not violate applicable law or PwC's confidentiality obligations. PwC will also meet with Client to discuss the assessment results and reasonably address any assessment deficiencies based upon risk severity.

10. **Client Representations**. Client represents that it shall comply with Applicable Data Protection Laws

and is responsible for providing any required notices and obtaining any required consents or authorizations from individuals and/or regulatory authorities, as applicable, to allow for the processing of Client Personal Information by PwC, Other PwC Member Firms, Subprocessors, and any subcontractors (to the extent provided for in the Agreement), for the performance of the Service. Client must also ensure that Client Personal Information is accurate before transferring or disclosing it to PwC.

11. **Security Incident**. If PwC learns of a Security Incident, PwC will notify Client without undue delay. PwC will take reasonable steps to mitigate the effects and minimize the damage resulting from the Security Incident. If Client reasonably requests and subject to applicable law and PwC's confidentiality obligations, PwC will meet with Client to discuss the Security Incident, including the procedures that were followed during the investigation of any Security Incident, chain of custody information, forensic analysis to determine the root cause, data restoration, and the remedial/corrective actions, as applicable and available at the time.

12. **Retention of Client Personal Information**. At the termination or expiration of the Agreement, PwC shall promptly and securely destroy all Client Personal Information it processes (including all electronic and hard copies). Alternatively, at the request and cost of Client, PwC shall return all Client Personal Information it processes as part of the Services. Notwithstanding the foregoing, PwC may retain copies of Client Personal Information as provided by its document retention policies, provided such retention complies with applicable laws and professional standards. PwC will protect any Client Personal Information it retains in accordance with PwC's obligations under this Addendum. To the extent computer backups are created as part of PwC's standard operating procedures, PwC will securely destroy such backups in accordance with the applicable destruction schedule, which is typically within 30 calendar days.

Schedule A: Client Personal Information

1. Nature and purpose of processing Client Personal Information

PwC will process Client Personal Information for the purposes of performing the Services under the Agreement.

2. Types of Client Personal Information to be processed

PwC may process the following types of Client Personal Information, and any additional types of Client Personal Information as set out in the Agreement and as relevant in the context of the Services including:

- Personal Information, such as name, address, contact information, financial information, employment and education details, goods or services, visual images, personal appearance and behaviour, geolocation data, etc.
- Sensitive Personal Information / other categories of Personal Information, including information relating to physical or mental health data, genetic data or biometric data, criminal offences and alleged offences and proceedings, racial or ethnic origin, religious or philosophical beliefs, trade union membership, sex life or sexual orientation.

3. Categories of Data Subjects

Data subjects may include any or all of the following individuals: Client's current and former employees, members, partners, officers, contractors and staff; Client's current and former customers and/or individuals who receive goods and services from Client; research participants, consultants and other professional experts; and other categories of data subjects as set out in the Agreement and as relevant in the context of the Services.

Schedule B: GDPR Specific Provisions

The following provisions also apply to the processing of GDPR Personal Information.

1. Where PwC acts as a **controller** (as that term is defined in the GDPR), PwC may process such Client Personal Information to: (i) provide the Services; (ii) administer, manage, and develop its business and services; (iii) ensure security, quality, and risk management; (iv) inform Client about PwC and its services; and/or (v) comply with any applicable legal, regulatory or professional requirements or standards.
2. Where PwC acts as a **processor** (as that term is defined in the GDPR) in providing the Services, this Section 2 applies.
    a. Sections 2 and 3 of the body of this Addendum, Schedule A, and the applicable Statement of Work (if any) describe the processing details (including duration, nature and purpose) and the Client Personal Information involved and categories of data subjects.
    b. Client authorizes PwC to engage those processors permitted under the Agreement and this Addendum, including those set out in **Schedule D**. PwC will update the hyperlink(s) set forth in **Schedule D** to notify Client of any changes in Other PwC Member Firms and/or Subprocessors. If Client notifies PwC in writing of any objections to such changes, PwC will cooperate with Client in good faith to find a commercially reasonable, mutually agreeable resolution.
    c. PwC shall:
        i. follow Client's documented instructions to process Client Personal Information, including for transfers to a third country or an international organization, unless applicable law requires otherwise, in which case PwC shall inform Client before processing unless, prohibited by law;
        ii. immediately inform Client immediately if an instruction from Client infringes Applicable Data Protection Laws, in PwC's opinion;
        iii. require persons authorized by PwC to process Client Personal Information to keep it confidential or comply with a statutory confidentiality obligation;
        iv. implement and maintain the technical and organizational measures in **Schedule C**;
        v. assist Client, at Client's request and as possible, with technical and organizational measures to respond to Data Subject Access Requests (to the extent that the relevant Client Personal Information is not accessible to Client through the Services or otherwise);
        vi. assist Client, at Client's request, with Client's obligations under Articles 32-36 of the GDPR considering the nature of processing and the information available to PwC;
        vii. delete or return to Client all Client Personal Information, at Client's request in accordance with Section 12 of this Addendum; and
        viii. provide Client with all information to demonstrate PwC's compliance with this Addendum and cooperate with audits by Client or another auditor mandated by Client that is not a PwC competitor. For the avoidance of doubt, the audits described must be conducted as described in Section 9 of this Addendum.
3. PwC will ensure that any subcontractors (to the extent provided for in the Agreement), Other PwC Member Firms, or Subprocessors that access GDPR Personal Information will provide at least the same level of protection as is required by this Addendum and adhere to Applicable Data Protection Laws for cross-border data transfers (including, but not limited to, the use of Standard Contractual Clauses, Binding Corporate Rules, and/or adequacy decisions as issued by the European Commission).

Schedule C: Information Security Controls

1. Internal Organization

a. PwC maintains a dedicated Information Risk & Security group, led by its Chief Information Security Officer. The Information Risk & Security team includes specialists in threat and vulnerability management, incident response, application security and IT risk management.

2. Human Resources Security

a. PwC personnel receiving access to Client information undergo pre-employment background checks.

b. PwC partners, principals, and staff are required to agree to maintain the confidentiality of Client information and to complete information security and privacy awareness training.

3. Access Control

a. PwC follows a formal process to grant or revoke access to PwC resources. System access is based on the concepts of least-privilege and need-to-know-access, so that authorized access is commensurate with defined responsibilities.

b. PwC has established documented procedures for secure creation and deletion of user accounts, including processes to disable and/or delete accounts for terminated personnel.

c. PwC's security policy establishes password requirements that include password change, reuse and complexity.

4. Physical and Environmental Security

a. Data centers used by PwC are surrounded by perimeter fencing and require key card access through multiple gates to enter the facility. Access to the data centers is limited based on role, not position. Access is strictly limited to authorized security personnel and the facilities team.

b. Security systems and supporting controls are implemented in all PwC offices to provide access control, video monitoring and auditing services.

5. Operations Management

a. PwC's IT organization has established and maintains a standard operating procedures governance process, including a repository of procedures, formal review and approval processes, and revision management, as well as a change control process, which includes risk assessment, test and back out procedures, communication planning, management review, and approval components.

b. PwC maintains separate development and production environments. Lab environments are required to be separated from production environments by firewalls. PwC has established procedures requiring the use of the change management process to transfer changes from development to production.

c. PwC uses enterprise class security solutions to provide a secure computing environment. These solutions are centrally managed and configured to retrieve updates automatically. PwC laptops run a security suite which includes virus protection anti-spyware, firewalls, host intrusion detection, application whitelisting, endpoint rights management, privileged user management, whole disk encryption and device access control that prevents writing to any device other than PwC encrypted devices. PwC server systems run server class versions of the antivirus and application whitelisting solutions used for laptops.

d. PwC laptops use software that provides automated, mandatory encrypted backup. PwC server systems have their data securely replicated to a recovery facility. When written to tape media the data is encrypted and stored off-site using a top tier third party service.

e. PwC systems are configured to use a network time server designed to ensure log synchronization for event correlation. PwC maintains system audit logs for servers and network devices that log the occurrence of system faults and security events and facilitate examination of abnormal activities. Security logs are collected to a central security information and event management (SIEM) system to prevent modification or removal of administration and user activities.

f. PwC has established processes and procedures for performing continuous vulnerability scans of its IT systems, Vulnerability assessment reports are presented to both IT operations organization and IT leadership. PwC has patch management processes and tools to assess and deploy operating system and application-specific patches and updates. PwC continually reviews patches and updates as they are released to determine their criticality. Patches released on a regularly scheduled basis are applied following the release; off-cycle or other patches determined to be critical are applied as needed to ensure protection from vulnerabilities.

6. Communications Security

a. Only IT-approved and managed wireless networks are permitted on the PwC network, and technologies are in place to identify and disable ports with rogue wireless networks attached. Wireless access security controls are centrally managed and use WPA2 Enterprise for encryption and authentication.

b. All Internet ingress points feature firewall segregation. Intrusion detection system appliances are located at strategic points in the network. The intrusion detection system feeds a central SIEM system that is monitored by PwC. Firewall logging is enabled to track communications (failed and successful access attempts) between the Internet and the internal PwC network. Console access to the firewalls is limited to administrative personnel. PwC requires encryption in transit of Personal Information transmitted over public or wireless networks. PwC uses virtual private network (VPN) software and two-factor authentication to enable secure, Internet-based remote access to the PwC internal network by PwC personnel and contractor endpoints.

7. Supplier Relationships

a. PwC has implemented security controls designed to ensure that external parties who provide IT and other back office services to PwC do so in a manner consistent with PwC's standards for the security of information systems. PwC's third-party risk management (TPRM) program is designed to ensure that external parties meet PwC standards through risk categorization, due diligence, contractual requirements, and ongoing monitoring and assessments.

b. Access to PwC systems is controlled using a least privilege principle (e.g., providers are only permitted a level of access to systems consistent with the business need for access). Access is controlled at the physical, network, platform and application levels.

8. Business Continuity

a. PwC maintains a Business Continuity Program that evaluates and manages potential threats and responds to actual events to minimize disruption to PwC's services and operations, and is designed so that, should a disaster occur, PwC can continue to deliver on client obligations.

b. PwC's Business Continuity Management (BCM) Program Office has implemented policies and a management system of activities to support the program, which includes business impact analysis, risk assessments, plan development, testing and exercising, training and awareness, and maintenance.

9. Assessment

a. During the term of the Agreement, Client may request to assess PwC's compliance with the terms of this addendum, which assessment shall be limited to: (i) PwC's completion of a

Client-provided written security self-assessment questionnaire related to the Services performed by PwC under the Agreement, provided that completing such questionnaire does not violate applicable law or PwC's confidentiality obligations; (ii) the parties meeting to discuss the results of the assessment and PwC's information security program; and (iii) PwC's reasonable treatment of any noted deficiencies based upon risk severity.

Schedule D: Subprocessors and Other PwC Member Firms

Sharing and transferring Client Personal Information

PwC Canada will only share Client Personal Information with others as permitted by Applicable Data Protection Laws and this Addendum and/or Agreement. PwC will implement appropriate contractual arrangements and security mechanisms to protect Client Personal Information and to comply with its obligations under this Addendum.

PwC Canada is part of a global network of firms and may share data and resources with Other PwC Member Firms in connection with the performance of Services under the Agreement. PwC may also use third-party Subprocessors to provide applications, functionality, data processing, IT services, or other services to PwC Canada. As a result, Client Personal Information may be transferred outside the countries where PwC Canada and Client are located. PwC Canada will ensure that all transfers of Client Personal Information are in accordance with Applicable Data Protection Laws and this Addendum. Where PwC Canada transfers GDPR Personal Information to a country that is not recognized by the European Commission as providing an adequate level of protection for personal data, the transfers will be under an agreement which covers GDPR requirements for cross-border data transfers, such as the Standard Contractual Clauses, Binding Corporate Rules, or adequacy decisions as issued by the European Commission.

PwC Canada may transfer Client Personal Information to:

Other PwC Member Firms

For details of Other PwC Member Firms locations, please visit https://www.pwc.com/gx/en/about/office-locations.html#/.

PwC Canada may share Client Personal Information with Other PwC Member Firms for administrative purposes and to provide professional services to clients (e.g. when providing services involving advice from Other PwC Member Firms in different territories).

Client Personal Information may be stored on Other PwC Member Firms' servers in the USA, EU and UK. IT support and services are provided by PwC India and PwC's IT Services company.

Clients' business contact information is visible to and used by Other PwC Member Firms to learn more about a contact, client or opportunity they have an interest in. Please see https://www.pwc.co.uk/who-we-are/privacy-statement/business-contacts.html for more information about how Other PwC Member Members process this type of data.

For more information about PwC Canada's practices, please refer to our privacy policy. https://www.pwc.com/ca/en/privacy-policy.html

Third Party Subprocessors

PwC Canada engages third-party organizations that provide applications, functionality, data processing, IT services or other services to PwC Canada in connection with the performance of Services under the Agreement. These third-party organizations include providers of information technology, cloud-based software-as-a-service providers, identity management, website hosting and management, data analysis, data back-up, security and storage services, among others, that help PwC Canada provide, run and manage its internal IT systems and deliver the Services. The servers powering and facilitating that cloud infrastructure are in secure data centers around the world, and Client Personal Information may be stored in any one of them.

PUB (MPI) 2-45

Part and Chapter:	**Part V – Information Technology**	**R1 Qn. No.:**	**PUB(MPI) 1-111**
PUB Approved Issue No.:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT Roadmap** **9. Cost of operations and cost containment measures**		
Topic:	**Capital Expenditures**		
Sub Topic:	**Cost of Capital**		

Preamble to IR (If Any):

In response (b), MP notes that while not driven primarily by NPV or immediate financial returns, MPI's IT modernization is essential to address technology debt, mitigate critical security and operational risks, and ensure long-term operational stability.

Question:

a) Please describe the specific quantitative and qualitative evaluation framework used by MPI uses to evaluate, prioritize, and justify major IT modernization initiatives when NPV is not the primary decision-making factor, including but not limited to specific scoring criteria, weighting methodology, approval thresholds and the scoring matrix used to evaluate potential projects.

b) Please provide an example of a recent business case, that demonstrates methods outlined in part a), completed for IT modernization capital expenditures.

c) Please identify the Key Performance Indicators (KPIs), qualitative metrics, or risk-reduction measures MPI uses to assess the ongoing performance, success, and value-for-money of these modernization programs.

Rationale for Question:

To understand any changes to business case cost of capital pertaining to modernization initiatives.

RESPONSE:

a) Major IT modernization initiatives are evaluated, prioritized, and justified using the same governance, business case, portfolio planning, and prioritization processes that MPI applies to other initiatives. MPI does not use a modernization-specific scoring matrix, prescribed weighting methodology, or universal NPV-based approval threshold for approving IT modernization work.

MPI evaluates initiatives based on the business need being addressed, the risk of deferring the work, the criticality of the affected systems or capabilities, alignment with corporate and technology strategies, and the availability of resources.

These assessments are considered through MPI's annual portfolio review and provide the basis for prioritizing and justifying initiatives in a manner that balances financial considerations with technology risk, operational criticality, and strategic alignment.

Accordingly, major IT modernization initiatives are approved through MPI's existing governance and business case processes and are not subject to a modernization-specific scoring matrix, prescribed weighting methodology, or NPV-based approval threshold.

b) MPI reiterates that IT modernization expenditures should not be referred to as “capital” expenditures in isolation. As previously filed, IT modernization can either be expensed or capitalized in accordance with IFRS. For an example of a recent business case for IT modernization-related expenditure, MPI refers to the applicable business case and supporting governance materials already filed in the 2026 and 2027 GRA record (Reference from this year’s application - *CC CSI (MPI) 1-3 Appendix 1 – ERP Replacement Assessment and Planning Lean Business Case – Confidential*, and *CC CSI (MPI) 1-3 Appendix 2 – Infor Upgrade Lean Business Case – Confidential*).

c) MPI assesses the ongoing performance, success, and value-for-money of modernization initiatives through a combination of benefit realization practices, risk reduction assessments, project delivery oversight, and established governance processes.

Where applicable, initiatives are supported by Benefit Realization Management (BRM) practices that define expected outcomes and provide a mechanism to assess whether anticipated benefits have been achieved following implementation. The assessment of realized benefits helps inform whether an initiative has delivered its intended value. The BRM framework describes how benefit realization management is applied to projects, programs, and change initiatives, including benefit tracking and post-implementation reviews.

Technology risk reduction is assessed through MPI's Application Portfolio Management (APM) practices. APM is used to capture and assess risks associated with applications, including supportability, contractual, and security risks. Modernization initiatives are set up to address one or more identified risks. Upon completion of an initiative, the affected application is reassessed to determine whether the identified risks have been mitigated or remediated. The updated assessment is recorded in APM and results in a revised application risk score, providing a measurable indication of risk reduction achieved through the investment.

PUB (MPI) 2-46

Part and Chapter:	**Part V – Information Technology**	**R1 Qn. No.:**	**PUB(MPI) 1-116**
PUB Approved Issue No.:	**18. Update on the revised 5-year IT Strategic Plan and rolling IT Roadmap**		
Topic:	**IT.6.4.2 Major Programs Projects Overview (3-Year Focus)**		
Sub Topic:	**MyMPI Online**		

Preamble to IR (If Any):

In response (d) i. and ii., MPI indicates there are no updates regarding online service adoption rates for Manitobans.

Question:

a) Please indicate whether MPI has scheduled a future review or update of online service adoption rate forecasts. If so, please provide the expected timeline for this update.

b) If no update is currently scheduled, please identify the specific operational milestones, performance thresholds, or external triggers (e.g., launch of specific online portals, shifts in customer transaction channels) that would prompt MPI to review and update these forecasts.

c) Please provide the critical path for online service adoption, including:

   i. The schedule of planned customer-facing digital features and migration campaigns.

   ii. Critical milestones required to realize planned cost savings, operational efficiencies, or channel shift benefits.

   iii. Any known critical path risks, gating factors, or dependencies that could delay public uptake.

Rationale for Question:

To understand MyMPI's current state and the future forward looking roadmap for online services leveraged from the MyMPI initiative.

RESPONSE:

a) MPI has not scheduled a future review or update of online service adoption rate forecasts.

b) MPI has not scheduled an update to online service adoption rate forecasts and has not established specific operational milestones, performance thresholds, or external triggers that would initiate a review of such forecasts.

MPI will continue to monitor customer uptake and usage of MyMPI and IRP Online services through the associated Benefits Realization Management (BRM) processes. MPI is currently assessing future digital capability opportunities, including customer expectations and potential future portal enhancements, through its Core Portal Capabilities initiative. Should future digital capability planning require updated adoption forecasts, MPI would determine the appropriate forecasting approach and supporting assumptions at that time, informed by available operational, customer, channel usage, and comparable jurisdiction data.

c) MPI's current focus is on the delivery, maturation, and benefits realization of digital capabilities, including IRP Online and MyMPI services, rather than achieving a predetermined online adoption forecast. As previously indicated, MPI does not currently maintain updated forecasts regarding online service adoption rates for Manitobans.

Accordingly, MPI has not established a forecast-driven critical path for online service adoption. Rather, digital initiatives are governed through capability delivery, implementation, and benefits realization plans.

i. Customer-facing digital features are implemented in accordance with approved project and operational plans. MPI continues to assess future digital capability opportunities through its Core Portal Capabilities initiative; however, it does not currently maintain a schedule of digital feature releases or migration campaigns for the purpose of achieving a forecasted adoption rate.

ii. MPI has not established specific online adoption milestones, channel-shift thresholds, or forecast-based targets that must be achieved to realize planned benefits. Benefits are evaluated through initiative-specific benefits realization processes, including those established for MyMPI and IRP Online.

iii. As MPI does not currently maintain an online service adoption forecast, it has not identified forecast-specific critical path risks, gating factors, or dependencies related to achieving a predetermined level of customer uptake. Future digital capability planning would consider customer needs, technology readiness, operational requirements, and benefits realization objectives, as appropriate.

PUB (MPI) 2-47

Part and Chapter:	**Part V – IT Appendix 2**	**R1 Qn. No.:**	**PUB(MPI) 1-102**
PUB Approved Issue No.:	**19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);**		
Topic:	**IT Benchmarking**		
Sub Topic:	**Gartner Recommendations Fiscal Year 2025/26**		

Preamble to IR (If Any):

Referring to Response (a), MPI states

> "As operational improvements, they do not require formal project governance through the Project Management Office (PMO)."

In response (b), MPI states:

> "The implementation of these improvements is not expected to have a material impact on MPI's IT staffing requirements, resource allocation, or organizational structure."
>
> In PUB (MPI) 1-104, MPI has provided further updates regarding the area of responsibility and engagement of external consultants.

Question:

a) Please provide MPI's definition of "materiality" or "material impact" as it applies to IT project budgeting, operational expenditures, and resource allocation.

b) Specifically regarding "Foster the Data Ecosystem", given that establishing and fostering a modern data ecosystem may require specialized skills (e.g., data governance, data engineering, and analytics) and significant coordination:

   i. Please provide rationale used by MPI to arrive at the conclusion that this specific area would not require dedicated, incremental resources.

ii. Please provide rationale supporting the conclusion that this specific area would not have material impact on IT staffing, resource allocation, or organizational structure.

iii. In the context of leveraging and governing data within the “data ecosystem”, please file MPI’s existing policies, governance frameworks, and guidelines governing the adoption, ethical use, and oversight of Artificial Intelligence (AI) and machine learning.

c) Please reconcile the statement provided indicating implementing Gartner recommendations “is not expected to have material impact” against the engagement of consultants noted in MPI’s response to PUB (MIP) 1-104 (b). Please provide a response for the public record and a more detailed response in confidential filing, if required.

Rationale for Question:

To clarify the notion of ‘materiality’ pertaining to Gartner recommendations and to obtain a sampling of progress towards

RESPONSE:

a) In the context of PUB (MPI) 1-102, MPI's reference to the improvements not having a "material impact" on IT staffing requirements, resource allocation, or organizational structure was intended to convey that the work is expected to be delivered using existing staff and within MPI's current organizational framework. The improvements are not expected to require additional permanent staffing, create new organizational units, alter reporting relationships, or result in significant changes to how IT resources are allocated.

Accordingly, MPI assessed that the implementation of these improvements could be accommodated through existing operational management practices and organizational structures and therefore would not have a material impact on IT staffing requirements, resource allocation, or organizational structure. This is consistent with MPI's response

that the improvements are operational in nature and do not require formal PMO project governance.

b) MPI already has dedicated resources supporting the data ecosystem, including data governance, data transformation, data modelling, and reporting capacity.

MPI does not expect this specific Gartner recommendation to require new permanent resources, structural changes, or a material reallocation of IT resources. The work can be advanced within MPI's current staffing model and organizational structure.

MPI may reassess future data and AI-related roles as AI use grows and governance requirements become clearer. Any future roles would be considered through MPI's normal planning and approval processes.

MPI has established governance controls for the adoption, use, and oversight of artificial intelligence and machine learning through its Artificial Intelligence Control Policy CP.4 (*Appendix 1 - Confidential)*, and AI Governance Committee Charter *(Appendix 2 - Confidential)*. These documents establish MPI's controls for AI governance, risk, privacy, security, and compliance. MPI is filing both documents in response to this request.

c) The statements in PUB (MPI) 1-102 and PUB (MPI) 1-104 address different aspects of the work and are not inconsistent.

As stated in PUB (MPI) 1-102, MPI's assessment that the Gartner recommendations were not expected to have a material impact on IT staffing requirements, resource allocation, or organizational structure was intended to convey that the work could be managed within MPI's existing organizational framework and delivered using existing staff. The improvements were not expected to require additional permanent staffing, the creation of new organizational units, changes to reporting relationships, or significant changes to IT resource allocation.

As noted in PUB (MPI) 1-104, MPI engaged external consulting resources to provide specialized support for advancement of the data ecosystem initiative. Accountability and responsibility for managing and implementing the work remained with MPI's IT Division.

The engagement of external consulting resources does not, in and of itself, constitute a material impact on MPI's IT staffing requirements, resource allocation, or organizational structure. The support provided did not result in the creation of permanent positions, changes to reporting structures, or organizational restructuring. Accountability for the work remained within MPI's existing organizational structure.

Accordingly, MPI's statements are consistent. PUB (MPI) 1-104 describes the use of external consulting resources to support a specific initiative, while PUB (MPI) 1-102 reflects MPI's assessment that implementation of the Gartner recommendations could be accommodated within MPI's existing staffing model, resource structure, and organizational framework without requiring material changes to those areas.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Corporate Policy

ARTIFICIAL INTELLIGENCE (AI) CONTROL POLICY			
Policy No.	CP.4	**Policy Owner**	Director, Data & Analytics
Date of Last Review	Initial release	**Approval Date**	February 12, 2025
Effective Date	February 12, 2025	**Approver**	Board
Additional information about this policy This is a Corporate Policy with a corporate-wide impact on all Representatives of MPI. The document is available in alternate formats upon request.			

1. Policy Statement

This policy establishes the position of The Manitoba Public Insurance Corporation ("MPI" or the "Corporation") with respect to the use of AI Technology.

2. Background

AI Technology can produce outputs that resemble human-created content such as text or images based on human user prompts. AI Technology is used to conduct analysis and pattern recognition in support of applications such as process automation and predictive analytics.

The rapid evolution of AI Technology presents unique opportunities for MPI but at the same time also creates risks. The objective of this policy is to effectively govern the use of AI Technology so MPI can take advantage of the opportunities it presents while protecting the Corporation and its Data from AI risks.

No AI Technology can be used unless its use has been approved in accordance with this policy.

3. Policy Objective

The objective of this policy is to establish a governance framework around the approval of AI Technology. The governance framework is designed to decrease the potential risks associated with AI Technology use.

4. Scope

This policy applies to the use of all AI Technology at MPI by employees and board members.

5. Definitions

The following definitions apply to this Policy:

1

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

"Artificial Intelligence" (AI) is a field of computer science aimed at simulating human intelligence using machines.

"AI Governance Committee" means a committee at MPI responsible for AI usage and the evaluation of all AI usage requests.

"AI Model" means a computer program that is used to interpret and respond to Datasets and create predictions based on its training. This relates to machine learning, deep learning, and generative AI all of which are terms used to build AI Models but are not used in this policy.

"AI System" means the infrastructure setup that uses the AI model to produce output.

"AI Technology" means any information technology system that contains an AI Model and AI System.

"AI Usage Impact Assessment Process" means the process followed by the AI Governance Committee to approve or reject AI usage cases in accordance with the principles set out in this Policy.

"Authorization Boundary" means the defined perimeter of a network (including that of its cloud service providers) within which an organization and its cloud service providers apply security controls to keep its Data safe.

"Cloud Service Provider" means a company that provides digital storage and computing resources remotely over the internet on a contractual basis.

"Data" means any information captured in or processed by a computer or other information technology system. Information is processed and organized Data which has meaning.

"Dataset" means a collection of Data.

"Data Owner" means the individual who is accountable for the trustworthiness of Data and for supporting the security and privacy of Data that is produced within their purview (Further details can be referenced here: Data Governance – MPIIntranet).

"Enterprise AI System" means an AI System either part of another company's software or created and managed by the organization itself.

"Public AI system" means a third-party AI system available to the public, either free or paid, that uses input Data to improve its algorithm.

"Personally Identifiable Information" (PII) means information about an identifiable individual including personal and health information. Please see the *Access and Privacy Policy* for examples of personal information and personal health information.

"Subject Matter Expert" (SME) means an MPI employee with advanced knowledge or skills in a specific area.

"Users" means employees of MPI and members of MPI's board of directors.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

6. **Guiding Principles**

These guiding principles are to be used as a common reference point for the **responsible use of AI Technology** at MPI.

Principle #1 – Data Security

All MPI Data must remain within the Authorization Boundary. Approved AI Technology use is acceptable within MPI's network. MPI Data cannot be used in AI Technology outside the Authorization Boundary unless approved in writing by the AI Governance Committee and the relevant Data Owner.

Principle #2 – Data Privacy

To adhere to MPI's privacy obligations under FIPPA and PHIA, Users must respect the privacy of proprietary MPI Data including any customer and employee Data. This obligation means Users must never send Data outside the Authorization Boundary or to any Public AI Systems. In addition, Users must never input PII Data, Vendor provided Data, or Payment Card Industry (PCI) Data into any Public AI Systems.

Principle #3 – Data Integrity

To ensure proper handling, any AI generated Data must be labelled before being incorporated into Datasets. Labelling enables identification in the event of any future reviews, adjustments or corrections. Over time, unverified or low-quality AI generated Data can compromise Data integrity at MPI.

Principle #4 – Reliable, Fair Transparent

Individual employees and members of the board of directors are responsible for their AI Technology output. AI Technology output must be accurate, fair, transparent and easily explainable. Any lack of clarity or bias in AI Technology can undermine trust and lead to unreliable, unfair or non-transparent output.

Principle #5 – Copyright Infringement

Be mindful that AI Technology may have improperly used copyright information and inputting MPI or Vendor copyright information into AI Technology without appropriate permission may violate the Copyright of the material.

Principle #6 – Accountability

All Users are responsible for decisions made with AI Technology. AI Technology is used to support, not replace human judgement and its output must be validated. Users are accountable for AI Technology use as set out in principles 1 – 5.

Principle #7 – AI Literacy

MPI will provide training on the Responsible Use of AI Technology. All Users must complete this training focused on principles 1-6 before using AI Technology. This

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

training will assist Users to apply these principles and ensure decisions are made in a responsible manner.

7. **AI Usage Impact Assessment**
Any AI System to be used by a business unit at MPI must obtain the necessary approvals and undergo MPI's AI Usage Impact Assessment. This assessment will be used to evaluate intention and potential risks of developing and using the AI System and Technology within the Corporation. The procedure for conducting the usage impact assessment is outlined in Appendix A.

8. **Roles and Responsibilities**

A. Executive Committee will:

- Oversee the governance of AI Technology and implementation of this policy through the Office of the Chief Information & Technology Officer (CITO) and the AI Governance Committee.

B. MPI AI Governance Committee will be:

- Implementing this Policy by developing training and sign off on the Policy through the MPI Learn portal.
- Evaluating all requests for AI Technology usage in accordance with the AI Usage Impact Assessment Process and the principles set out in the Policy.
- Leveraging technology to enforce and monitor compliance with the Policy.
- Communicating Policy implementation, outcomes of the AI Usage Impact Assessment Process, and on issues related to AI Usage at MPI generally.

C. Director, Data & Analytics will:

- Monitor and implement the requirements of this policy on behalf of the CITO as the responsible policy owner.
- Be the SME and contact person for AI-related questions or concerns.

D. Directors, Managers, and their delegates will:

- Monitor and enforce the terms of this policy within their business areas.
- Notify the AI Governance Committee by email to AI@mpi.mb.ca of any non-compliance with this policy as well as any misuse or unintended consequences of AI Technology.
- Notify the IT Service Desk and the AI Governance Committee through the email provided above regarding the use of AI to create deceptive, harmful, or misleading content, producing content that could be considered discriminatory, offensive, or otherwise unethical. Ensure that all employees under their supervision are informed of this policy and their responsibilities when using AI Technology.

E. All Employees of MPI will:

- Comply with the expectations outlined in this policy and its associated procedures.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

- Complete all relevant training courses that may be periodically required.
- Report concerns or instances of noncompliance to their managers, supervisors or directly to the AI Governance Committee.

9. Related Documents

The following laws and compliance regulations must be applied when considering usage of AI Technology at MPI:

- *The Freedom of Information and Protection of Privacy Act* (FIPPA)
- *The Personal Health Information Act* (PHIA)
- *Personal Information Protection and Electronic Documents Act* (PIPEDA)
- Copyright laws applicable to MPI
- In addition to the above, any applicable contracts that relate to the ownership, storage or use of information.

This policy requires all Users to use AI Technology in a manner consistent with all applicable corporate directives, policies, standards, and guidelines that includes the following:

- G.20: Cyber and Information Security Directive
- G.27: Access and Privacy Policy
- P.35 Progressive Discipline
- Cyber and Information Security Governance Page (Policies and Standards)
- Cloud Computing Policy
- IT Policies and Standards
- Data Governance Policies and Information Mini Site
- Acceptable Use Policy
- AI Governance Committee Charter

All alleged violations or noncompliance of this policy must be investigated. This may result in disciplinary action, which may include termination of employment. Additionally, depending on the nature of the violation, individuals may be subject to legal action resulting in civil and/or criminal liability.

10. Exceptions to the Policy

There are no exceptions to this policy.

11. Owner/Inquiries

Inquiries regarding this policy can be directed to the AI Governance Committee responsible for the oversight of AI usage across the Corporation at: AI@mpi.mb.ca

12. Transitions Provisions

Although this policy is effective from the date it is approved, it is understood that not all the requirements defined in it can be complied with until the AI Governance Committee is fully functional. The Corporation will comply with the policy to the greatest extent possible as the process and practice evolves and matures.

5

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

13. Periodic Review

This policy will be reviewed every two years or as required to ensure its effectiveness in addressing emerging risks, and its compliance with changing laws and regulations.

Any necessary revisions will be made in alignment with the Policy Management Framework.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Appendix A: Procedures: AI Usage Impact Assessment

Any AI system to be used by a business unit at MPI must obtain the necessary approvals and undergo MPI's AI Usage Impact Assessment. This assessment is used by the AI Governance Committee along with other technical considerations to evaluate the AI Technology requests and its potential risks.

The steps in the process are as follows:

1. **Request for Approval & AI usage impact assessment checklist**
   The following is part of submitting a request for approval to use AI:

   Only Directors and above are allowed to submit requests for an AI Usage Impact Assessment. If an MPI employee has a request they must submit it to their supervisor who in turn needs to bring the request to their appliable manager and ultimately their Director to make the request for their AI usage case.

   A. All questions within the AI Usage Impact Assessment checklist are answered by the business unit.
   B. Clarity about the location of the AI system and flow of Data with respect to the Authorization Boundary.
   C. Requests are reviewed by senior leaders not lower than the position of a Director within the area of business where the AI Technology is intended to be used.
   D. Documented authorization for Data use within the AI Technology by the applicable Data owner(s).

2. **Review of Request**
   Once the above is obtained, requests for approval will be subject to review by: MPI's AI Governance Committee. The AI Governance Committee will consult with the applicable SMEs and Data Owners as required.

   The Guiding Principles set out in the Policy are the framework for the review and the AI Governance Committee Charter provides more detail related to the technical application of these principles.

3. **Assessment Outcome**
   The outcome of the assessment and review of the request for use of AI Technology is communicated to the requestor.

   The AI Governance Committee will issue one of the following four decision related to each AI usage request: 1-Pass, 2-Fail, 3-Resubmit, 4-Condition Pass and Resubmit.

   1. Pass means that the AI usage request complies with the Guiding Principles is acceptable and may be used by the requestor or more broadly within the Corporation depending on the nature of the request.

8

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

2. Fail means that the AI usage request does not comply with the Guiding Principles and is unlikely to comply even if resubmitted.
3. Resubmit further information means that the AI usage request generally meets the Guiding Principles, but it needs to be re-submitted to confirm additional documentation for the AI Governance Committee to confirm a final adjudication of Pass or Fail.
4. Resubmit conditional means that the AI usage request did not comply with the Guiding Principles but if resubmitted with conditions or limitations related to the proposed use case it may upon further evaluation comply with the Guiding Principles.

4. Rejections and Reassessments
Following the assessment, business units may need to revise their proposed use case and guidelines resubmit for re-assessment.

5. If step 4 is completed, proceed to perform steps 2 and 3 again.

6. Continued Monitoring of Approved Use Cases
After any approved usage of AI, the following obligations must be adhered to:

- Business units and their Users must not use AI outside the scope of the approved use case and guidelines. If a business unit wants to change or expand its approved use case or guidelines it needs to go through the assessment and approval processes again.
- Unless approved in the applicable use case, Users must not upload or share any Data that is confidential, proprietary, or protected by regulation or third-party contractual obligations. This includes any business Data, and any Data related to any member of the board of directors, employees and customers.
- All Users of AI Technology must review and validate AI-generated content for accuracy, appropriateness, and compliance with corporate principles and standards before use or dissemination.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

AI Governance Committee Charter

Document Version

Document Number	AI_001
Revision Number	2
Effective Date	February 20, 2025
Owner	[redacted]
Approver	Other AI Governance Committee members

Committee Goals

1. To implement and maintain the AI Policy its framework, procedures and practices to control known and emergent AI risks
2. To establish and maintain the responsible AI principles set out in the Policy across MPI
3. To execute any strategic direction related to AI set by MPI Executive Committee

Committee Responsibilities

The Committee is responsible for AI usage at MPI, these responsibilities as set out in the AI Policy are as follows:

1. Implementation: implement the policy by developing training and sign off on the policy through the MPI Learn portal.
2. Evaluation: evaluate all requests for AI Technology usage in accordance with the AI Usage Impact Assessment Process and the principles set out in the Policy.
3. Compliance: leverage technology to enforce and monitor compliance with the policy.
4. Communication: communicate policy implementation, outcomes of the AI Usage Impact Assessment Process, and on issues related to AI Usage at MPI generally.

1. Implementation

- Develop training policy sign off with KMS to run through the MPI Learn portal.
- Support the development of MPI's AI strategy by ensuring AI goals, objectives and initiatives are aligned with corporate goals, objectives and initiatives.
- Ensure Policy framework is in place and used to assess AI risks and mitigation plans.

2. Evaluation

- Evaluate all requests for AI Technology usage in accordance with the AI Usage Impact Assessment Process and the principles set out in the Policy. This includes the review and approval of AI use cases and projects proposed by the different business units and teams within the organization, based on viability, as well as the potential benefits and risks of AI.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

3. Compliance

- Coordinate with Enterprise Architecture on the maintenance of a corporate catalog of approved and unapproved AI use-cases including owner, purpose, business process supported, approval outcome, and other relevant details e.g., AI third party details.
- Monitor and evaluate the performance and impact of the AI solutions deployed by the organization, using the appropriate metrics and indicators
- Ensure corporate compliance with policies, standards and contractual obligations related to MPI data assets and the use of AI by blocking access to sites which are not approved for use and leveraging other technology to monitor compliance.
- Periodically review and assess compliance of proposed AI systems, vendors, or models in accordance with MPI's AI Policy.

4. Communication

- Promote AI training and literacy within the organization.
- Maintain awareness of AI implementation and its impact throughout the organization.
- Ensure MPI stays informed and up to date on AI advancements and best practices.
- Communicate risks to business and end users.
- The following table relates to the Committees communication commitments:

Event	Purpose	Frequency	Communication Medium	Feedback mechanism
Executive Steering Committee meetings	Update EC on program status	TBD	Meetings; Annual status reports	Immediate discussion; Comments captured in meeting minutes
	EC as decision making body			
	Set strategic direction			
AI Governance Council meetings	Update Council on program status	Quarterly	Meetings; Quarterly status reports	Immediate discussion; Comments captured in meeting minutes
	Monitor & Resolve issues			
	Develop recommendations			

The Committee

STRUCTURE

The Director, Data & Analytics will serve as the chair of the AI Governance Committee (the Committee). The Committee is structured to have five members, four representatives from the Information Technology Division and one from Legal representing their areas of expertise as follows:

1. Data Governance
2. Enterprise Architecture
3. Cybersecurity
4. Technology Operations
5. Legal

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

MEMBERS

There will be five (5) voting members each representing areas of the business that bring expertise and perspectives related to AI Use at the Corporation in accordance with the Structure listed above.

DELEGATES

Each Voting Member will also have a Delegate the involvement of the delegates is important to manage the workload and ensure that all 5 areas of the corporation are represented at every meeting.

Delegates will be copied on all meetings and information related to the operation of the Committee as it is very important, they stay up to speed on all decisions and operations of the Committee.

Delegates will be involved in the Evaluation of AI Technology usage cases to the same extent and with the same authority to vote on the approval or denial of AI Technology as Members.

ATTENDANCE

If the Member can attend a Monthly Meeting the attendance of the Delegate is optional.

If the Member is unable to attend a Monthly Meeting the attendance of the Delegate is required.

If a Committee Members is unable to attend a Monthly Meeting they must advise their Delegate.

VOTING

Delegates attending a meeting with the Member present are not entitled to a vote should one be required.

When a Delegate attends a Monthly Meeting where the Member is not present the Delegate is entitled to Vote on behalf of the Member. The Delegate should vote either in the manner they have been instructed by the Member or if no instructions are provided then in the manner to which they feel best represents the concerns of the area of expertise.

In the unlikely event of a voting tie, the chair of the committee will provide the deciding vote.

Committee Members

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Monthly Meetings

FOCUS

- The AI Governance Committee will meet monthly, with a focus on Implementation, Compliance and Communications, and additional meetings may be called to address urgent issues or special circumstances.

AGENDA AND MINUTES

- Items of business to be addressed in the monthly meeting must be submitted 48 hours prior to the Committee Chair at AI@mpi.mb.ca and stored on the AI Governance Committee SharePoint site.
- The Committee Chair will aim to circulate the Monthly Meeting agenda 24 hours prior to the meeting.
- Meeting participants are expected to understand MPI's AI strategy, MPI's AI principles, and MPI's risk posture.
- Meeting attendance and minutes will be documented by *TBD person* and stored on the Committee SharePoint site.

EVALUATIONS

- The Evaluation of individual AI Technology usage requests should be handled separately from the Monthly Meetings as part of a working group process integrated with the MPIServices intake process.
- Work to perform Evaluations in accordance with the AI Impact Assessment Process carried out to ensure compliance with Principles of Responsible AI use do not need to involve the entire committee.

OTHER BUSINESS

- Meetings with MPI Executive Committee will be determined on an as-needed basis.
- Task forces or subcommittees may be formed by the AI Governance committee if there is a need to focus on particular risk assessments, governance processes, or technologies.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Appendix A

Additional Details related to Guiding Principles

The AI policy has outlined various guiding principles on the responsible use of AI. This section contains further elaboration of details related to applicable standards and processes for select principles.

Principle #1 - Data Security

A. **The Authorization Boundary** needs to be carefully considered when making any Data security decisions. Subject to this policy, while the use of AI Technology within the Authorization Boundary is generally considered acceptable, the transmission of Data outside the Authorization Boundary is not acceptable.

B. **Key considerations** to determine whether the AI Technology is being used within the Authorization Boundary are as follows:

- **Internal Components**: All elements that process, store, or transmit Data should be within the Authorized Boundary.
- **External Connections**: Any connections to systems external to the Authorized Boundary must be disclosed, and their associated risks evaluated.
- **Data Flow**: Understanding whether and how Data moves across the Authorized Boundary is crucial for maintaining security and compliance, especially concerning personally identifiable information (PII) and other sensitive Data.

C. **AI Systems** (including Public and Enterprise AI Systems) must be secure and approved for use.

- Data may only be used in systems and network environments that have been approved and equipped with acceptable security controls in place within the Authorization Boundary.
- Data must not leave the Authorization Boundary and must not be entered into any third-party AI System without obtaining required approval in accordance with the AI Usage Impact Assessment Process.
- Data Owners must give formal approval before Data is used in an AI System. In addition, AI Technology must not be used for business purposes without prior approval in accordance with the AI Usage Impact Assessment Process.
- Ensure there are documented details on how the AI Model was built, including what specific Data as used as input for training any applicable Data preparation (e.g., Data obfuscation used for training or generating output) and the algorithms used. Obfuscation is the process of replacing sensitive information with Data that looks like real production information, making it useless to malicious actors.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

D. **The Impact of Encryption:** Encryption is a way to protect Data by scrambling it so that only people with the right key can access the Data. It adds an additional layer of security, meaning that even if Data is intercepted or accessed outside the Authorized Boundary, it remains protected. However, it is essential to consider the following criteria:

- **Key Management:** The security of Encryption Keys is critical. If Encryption Keys are compromised, the protection offered by Encryption can be undermined.
- **Access Controls:** Ensure that only authorized personnel can access Encrypted Data, reinforcing the integrity of the Authorization Boundary.
- **Compliance:** While Encryption can help meet regulatory requirements, it does not eliminate the need for a well-defined Authorization Boundary.

E. **For any third-party AI system**: there must be clear documentation of:

- what Data is being used;
- where the input Data is stored and transmitted/processed;
- how the third party will use the Data;
- processes and safeguards put in place to avoid Data from being used for training or shared with other entities; and
- any suspected or confirmed cases of compromised Data confidentiality, or inappropriate use, must immediately be reported to MPI Cybersecurity.

Principle #2 - Data Privacy

The privacy of MPI employee and customer Data must be respected at all times and there must be adherence to MPI's privacy obligations. The following should be considered when assessing Data privacy:

- Whether there is a risk of sending proprietary Data outside the Authorization Boundary to third-party services hosting AI models and thereby losing ownership of this Data.
- PII must be protected from any unauthorized collection, use, disclosure, destruction or alteration under *The Freedom of Information and Protection of Privacy Act* (FIPPA) and *The Personal Health and Information Act* (PHIA).
- Never enter any PII into any AI System as doing so may result in a breach of privacy, violating Manitoba compliance laws and potentially leading to litigious situations. This includes all customer Data and PII.
- Do not enter any Payment Card Industry (PCI) information into any AI System – PCI information must be protected under the Payment Card Industry – Data Security Standard (PCI-DSS) (e.g. credit card numbers, names, expiry dates or Personal Identification Numbers).
- Do not enter any Vendor-provided Data into an AI system to avoid potential risks of violating copyright.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Principle #3 - Data Integrity

Ensure proper handling of Data involved in AI usage.

- Unverified, low quality AI Technology outputs that are added to databases can compromise Data integrity over time.
- Any AI-generated Data output must be labeled as such before being incorporated into Data repositories to enable its identification in the event of any future reviews, adjustments or corrections.

Principle #4 – Reliable, Fair, and Transparent

Outputs from AI Technology must be trustworthy, that is factually accurate and produces fair predictions which are easily explainable and transparent meaning we know how predications are being made in non-technical terms.

- It is challenging to understand and explain the internal reasoning for content generated by AI Technology. This leads to a lack of trust in using its output for decision-making within business environments. AI Technology can return results which are believable but inaccurate.
- AI Systems could produce prejudiced outputs (e.g., the AI Technology might have been trained using mainly Data from a certain demographic group and this can potentially lead to suboptimal results for a different demographic group. As a result, overreliance on AI generated output could unintentionally lead to systemic bias.

Principle #5 - Accountability

The human end user is accountable for decisions made using any AI tools.

- AI Technology should only be used as a supplement to any human driven decisions made. AI Technology outputs should be validated by human end users for accuracy and appropriateness.
- Ultimately, end users will be making decisions and are accountable for any issues, outcomes, and decisions made. Issues may include but not limited to copyright violations, sensitive Data exposure, poor Data quality, and bias or discrimination in outputs.

Principle #6 – Copyright infringement

Be mindful of mitigating legal risks.

- Output from AI Technology can be direct copies from other information sources upon which the AI Model was trained. Improper use of copyrighted information creates a legal risk of copyright infringement.
- There is also the risk of MPI or MPI vendor intellectual property being compromised, improperly used, or improperly disclosed without permission or against the law when entered into the AI Technology.

MANITOBA PUBLIC INSURANCE SOCIÉTÉ D'ASSURANCE PUBLIQUE DU MANITOBA

Principle #7 – AI Literacy:

MPI will provide training to develop internal MPI knowledge regarding the safe and responsible use of AI Technology.

- AI is an evolving field. It is important to stay up to date on its latest advancements, risk awareness, compliance requirements and best practices to ensure appropriate and responsible AI Technology use.
- Prior to use of AI Technology, Representatives must complete MPI provided training related to Data protection, privacy, integrity, and responsible AI Technology use.

Various criteria considered for AI Usage Impact Assessment

The following are various considerations that are reviewed for AI Usage. Note that this list is not exhaustive and may include considerations not listed here.

- Clarity about the location of the AI System and flow of Data with respect to the Authorization Boundary.
- Risk of MPI Data exposure to external entities because of the AI System.
- Disclosure and details about the AI System.
- Type of MPI Data into third-party AI Systems (e.g., is it non-identifying and non-confidential Data that is not human related?).
- Provision of a clear mechanism to ensure AI System is factually accurate and produces fair predictions that are explainable.
- Provision of a clear framework on how the AI System will be monitored and governed by prospective owners/users to minimize and mitigate risks and/or harms to MPI.
- AI Technology will be assessed upon its legal terms, privacy impacts, privacy and security controls and features, terms of service, reputation including prior breaches and privacy policy.
- AI Technology will also be assessed against existing MPI corporate directives, policies, standards, and guidelines.

Part and Chapter:	**Part V – Information Technology Appendix 2**	**R1 Qn. No.:**	**PUB(MPI) 1-105**
PUB Approved Issue No.:	**19. Information Technology (IT) benchmarking, Value Assurance and Benefits Realization Management (BRM);**		
Topic:	**IT Benchmarking**		
Sub Topic:			

Preamble to IR (If Any):

Question:

a) Please provide Gartner Statement of Work covering the Gartner IT Benchmarking services.

Rationale for Question:

To further refine the understanding of the scope of work and engagement pertaining to Gartner's IT Benchmarking services.

RESPONSE:

a) Please see *Attachment A.*

Consulting Services Agreement - Gartner Canada Co.

This **Consulting Services Agreement** ("**Agreement**"), dated as of 5 June, 2025 (the "**Effective Date**"), is between Gartner Canada Co. located at 40 King Street West, 36th Floor, Suite 3601, Toronto, Ontario, M5H 3Y2 ("**Gartner**") and The Manitoba Public Insurance Corporation located at 234 DONALD AVE 9TH Floor, WINNIPEG, Manitoba, R3C 4A4, Canada ("**Client**"), and sets forth the terms and conditions for the provision of consulting and benchmarking services to be performed by Gartner or its Affiliates for Client (collectively, the "**Services**"). For purposes of this Agreement, "**Affiliates**" means any entity that, directly or indirectly, controls, is controlled by, or is under common control of that party. "**Control**" means direct or indirect ownership of 50% or more of the stock or other interests entitled to vote for the election of the board of directors or other governing body of the entity.

1. ***Agreement.*** This Agreement is applicable to all Services provided by Gartner during the term of this Agreement as set forth in Request for Proposal 3389 posted by the Client on MERX February 14, 2025 (the "RFP") and the Proposal of Gartner received by the client dated March 7, 2025 (the "Proposal"). Both the RFP and Proposal are incorporated into this Agreement by reference. The RFP and Proposal contain the scope of the Services, the deliverables to be provided by Gartner (the "Deliverables"), specific responsibilities of Client, and the fees and payment schedule for the Services. The parties may make changes to this Agreement provided that both parties agree to the changes in writing.

2. ***Term of Agreement.*** This Agreement comes into effect as of June 5, 2025, and shall continue until and including June 4, 2030 (the "**Initial Term**"), unless otherwise terminated, suspended or extended in accordance with the terms and conditions of this Agreement.

3. ***Renewals.*** MPI may, at its sole option, not later than ninety (90) days prior to the expiration of the Initial Term, renew the Agreement for an additional twenty-four (24) month term (the "**First Renewal Term**"), on the same terms and conditions as were in force during the Initial Term. [redacted]

   If MPI has exercised its renewal rights provided in the above subsection (b), then MPI may, at its sole option, not later than ninety (90) days prior to the expiration of the First Renewal Term, renew the Agreement for a second additional twenty-four (24) month term (the "**Second Renewal Term**"), on the same terms and conditions as were in force during the First Renewal Term. The pricing for the Second Renewal Term, will be calculated in the same manner as for the First Renewal Term based other than the CPI as a percentage will then be applied to the prices that were in effect during the First Renewal Term.

   The "**Term**" shall collectively mean the Initial Term and all additional renewal terms.

4. ***Effect of Termination.*** Upon termination of this Agreement, Gartner shall complete the Services in process as of the effective date of termination.

5. ***Intellectual Property.*** Client shall retain all right, title and interest in any proprietary materials supplied to Gartner ("Client Materials"), and grants Gartner all necessary rights and licenses for Gartner to fulfill its obligations under each SOW. Excluding any Client Materials, Gartner shall retain sole and exclusive ownership of the Deliverable(s), Gartner tools, methodologies, questionnaires, responses, and proprietary research and data generated in the course of performing the Services, together with all intellectual property rights therein (the "Gartner Materials"). Gartner grants Client a perpetual, non-exclusive, royalty-free license to use the Deliverables, subject to the limitations set forth in Section 7 (Use of Deliverables). Gartner shall not be restricted in its use of ideas, concepts, know-how, data and techniques acquired or learned in the course of performing the Services, provided that Gartner shall not use or disclose any of Client's confidential information, as defined in Section 8 (Confidentiality).

6. ***Benchmarking Services.*** With respect to any benchmarking services performed by Gartner, Gartner will only use Client's data in an aggregate and anonymous format. Client acknowledges that the contents of the benchmarking Deliverables are based upon information which is proprietary to Gartner and contained in Gartner's database. Client's data will become part of the database. The database will be used by Gartner in future consulting and benchmarking engagements.

7. ***Use of Deliverables.*** Subject to payment in full of the applicable fees, Gartner grants to Client, for internal purposes only, a worldwide, royalty-free, perpetual license to use, reproduce, display, distribute copies of, and prepare derivative works of the Deliverables. Unless the Deliverable is identified in a SOW as intended for external distribution by Client such as a Request for Proposal or similar document, Client shall not make the Deliverables available, in whole or in part, to anyone outside of Client, or quote excerpts from the Deliverables to the public. Notwithstanding the foregoing, Client may share the Deliverables with (i) its outside auditors and/or accountants, (ii) third parties who have signed appropriate confidentiality agreements with Client who are engaged by Client to review or implement suggestions or to further research the issues contained in the Deliverables, (iii) governmental or regulatory bodies as required by law, and (iv) with Client's Affiliates provided that its Affiliates are made aware of the obligations under this Section and that Client remains liable for the use made of the Deliverables by its Affiliates.

   Notwithstanding the wording of Sections 7 above and 8 below, Gartner acknowledges and accepts that the Client will be required to provide Deliverables to its regulator the Public Utilities Board of Manitoba ("PUB"), and Gartner will be required to present Deliverables to the PUB as part of the Services provided. MPI agrees to only provide Deliverables to the PUB through a confidential submission process, unless otherwise approved in writing by Gartner. Through such confidential process, the PUB and all parties to a general rate application proceeding in receipt of the deliverables (e.g. the PUB panel, intervenors, and consultants) will be required to keep the deliverables confidential and sign the PUB's approved form of non-disclosure agreement and undertaking to destroy all Confidential Information at the end of such proceeding.

8. ***Confidentiality & Data Protection.***
   a) The parties agree to keep confidential and not to use or disclose to any third parties any non-public business information of the other party learned or disclosed in connection with each SOW, including the Gartner Materials. The obligation of the parties with respect to the confidential information shall terminate with respect to any particular portion of the confidential information if and when: (i) it is in the public domain at the time of its communication; (ii) it is developed independently by the receiving party without use of any confidential information; (iii) it enters the public domain through no fault of the receiving party subsequent to the time of the disclosing party's communication to the receiving party; (iv) it is in the receiving party's possession free of any obligation of confidence at the time of the disclosing party's communication; (v) it is communicated by the disclosing party to a third party free of any obligation of confidence; or (vi) the receiving party has the disclosing party's written permission.

   b) Each party shall provide notice to the other of any demand made upon it under lawful process to disclose or provide any of the other party's confidential information. The receiving party agrees to cooperate with the disclosing party, at the disclosing party's expense, if the disclosing party elects to seek reasonable protective arrangements or oppose such disclosure. Any confidential information disclosed pursuant to such lawful process shall continue to be confidential information.

   c) In performing its obligations under this Agreement, each of Gartner and Client will comply with all applicable data protection legislation. In the event that any personal data is exchanged under this Agreement or any SOW, the parties shall treat such personal data in accordance with their respective privacy policies.

9. ***Warranties.*** Client warrants that Gartner's use of any materials furnished by Client in connection with a SOW does not infringe any copyright, trademark, trade secret or other right of any third party. Gartner warrants that the Deliverables, in the form provided to Client, do not infringe any copyright, trademark, trade secret or other right of any third party.

   EXCEPT AS PROHIBITED BY APPLICABLE LAW OR OTHERWISE SET FORTH ABOVE, ALL SERVICES ARE PROVIDED ON AN "AS IS" BASIS AND GARTNER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A

PARTICULAR PURPOSE. THE INFORMATION IN THE DELIVERABLES HAS BEEN OBTAINED FROM SOURCES THAT GARTNER BELIEVES TO BE RELIABLE. ALL DELIVERABLES SPEAK AS OF THE DATE OF DELIVERY TO THE CLIENT. GARTNER HAS NO OBLIGATION TO ADVISE CLIENT OF ANY CHANGE IN THE INFORMATION OR VIEWS CONTAINED IN THE DELIVERABLES.

10. ***Limitation of Liability.*** Neither party shall be liable for any consequential, indirect, special or incidental damages, including but not limited to, lost profits, business failure or loss of use, arising out of use of the Deliverables or the Services, whether or not advised of the possibility of such damages. Except for liability for personal injury or death or for damage to property caused by the negligence or willful misconduct of a party or its employees, or a party's breach of its confidentiality obligations under this Agreement, each party's total liability arising out of this Agreement and the provision of the Services shall be limited to the fee paid by Client under the SOW under which such liability arises. Unless otherwise prohibited by applicable law, and except for actions by Gartner for payment, no action or proceeding arising out of this Agreement may be brought more than two years after the events giving rise thereto.

11. ***Fees and Expenses.*** [redacted]

12. ***Acceptance of Deliverables.*** All Deliverables provided by Gartner to Client shall be deemed to be accepted within 15 days of receipt by Client unless Gartner receives written notice of non-acceptance within 15 days after delivery. Any notice of non-acceptance must state in reasonable detail how the Deliverables did not conform to the SOW and Gartner shall use its reasonable business efforts to correct any deficiencies in the Deliverables so that they conform to the SOW. Client shall not withhold any payment for Services except for material and substantial non-conformity with the SOW.

13. ***Assignment.*** The parties may not assign any rights or delegate any obligations under this Agreement without the prior written consent of the other party, which consent shall not be unreasonably withheld, provided (i) Gartner may assign any rights or obligations under this Agreement to any of its affiliates and subsidiaries without the prior consent of Client and (ii) each party may assign its rights to a successor entity provided that upon the merger or consolidation of such party or the transfer of all or substantially all of its assets to a third party, the surviving entity is controlled by the person(s) controlling such party prior to the date of such merger, consolidation or transaction. Any assignment in violation of this Agreement is void. This Agreement shall be binding upon the successors, legal representatives and permitted assigns of the parties.

14. ***Force Majeure.*** Neither party shall be in breach of this Agreement to the extent performance is prevented or delayed by natural disasters, war, acts of God or any similar event, that is beyond the reasonable control of either party.

15. ***Publicity.*** Neither party shall use the name of the other party in any announcements, press releases or advertisements, or for any commercial purpose, without the prior written consent of the other, except that Gartner may name Client in client listings.

16. ***Independent Contractors.*** The relationship of the parties is that of independent contractors. Neither party shall be deemed to be the employees, agents, joint ventures or partners of the other, and neither party shall have the authority to bind the other. Nothing contained in this Agreement shall preclude Gartner from rendering services to others or developing work products that are competitive with, or functionally comparable to, the Services.

17. ***No Third-Party Beneficiaries.*** This Agreement is for the benefit of the parties only. None of the provisions of this Agreement are for the benefit of, or enforceable by, any third party. The parties agree that no third party shall have the right to (i) rely on the Services provided by Gartner, or (ii) seek to impose liability on Gartner as a result of the Services or any Deliverables furnished to Client.

18. ***Entire Agreement.*** This Agreement, together with the SOWs, constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes all prior documents and agreements, and shall not be effective until accepted by an authorized representative of Gartner and Client.

19. ***Amendments/Controlling Document.*** Any change to the provisions of this Agreement shall be made by written amendment signed by both parties. The provisions of this Agreement shall control any inconsistencies with SOWs unless otherwise specifically agreed by the parties in writing by referencing the provision of this Agreement being modified. This Agreement and any amendments thereto may be executed in counterparts.

20. ***Severability.*** If any term of this Agreement or a SOW is to any extent invalid, illegal, or incapable of being enforced, such term shall be excluded to the extent of such invalidity, illegality, or unenforceability; all other terms hereof shall remain in full force and effect.

21. ***Notices.*** All notices under this Agreement shall be by email to the addresses below or in writing and sent by hand delivery, courier or certified mail, return receipts requested, to the other party's address set forth below. Notices shall be effective upon receipt. A party may change its address by giving written notice to the other party in accordance with this Section.

234 DONALD AVE 9TH FL
WINNIPEG, Manitoba, R3C4A4 Canada
Attention: Manager, Strategic Sourcing & Vendor Management
Email: purchasingservices@mpi.mb.ca

22. ***Governing Law.*** This Agreement, and any dispute arising from it, shall be governed by and construed in accordance with the laws of Ontario and the laws of Canada applicable therein.

23. ***Dispute Resolution.*** Any dispute arising out of or in connection with this Agreement shall be decided by a single arbitrator under the International Arbitration Rules of ADR Chambers International, or such other dispute resolution entity jointly agreed upon by the Parties. The decision of the arbitrator shall be final and binding, and the award may be entered in any court having jurisdiction over the Parties. The Parties consent to the jurisdiction of the Courts of the Province of Ontario. The prevailing Party shall be entitled to an award of its reasonable attorneys' fees and costs, in addition to an award of damages or other relief, if any. This clause is without prejudice to either Party's right to seek interim relief against the other Party (such as an injunction) through the courts of Canada to protect its rights and interests, or to enforce the obligations of the other Party.

24. ***Survival.*** Sections 4 to 12, 17, 22, 23 and 24 shall survive any expiration or termination of this Agreement.

[THE REMAINDER OF THIS PAGE HAS BEEN LEFT INTENTIONALLY BLANK]

The parties have caused this Agreement to be executed by their authorized representatives, to be effective on the Effective Date.

PUB Approved Issue No.:	**Top-Down Operating Expense Budget Process**		
Topic:			
Sub Topic:			

Preamble to IR (If Any):

MPI does not currently have a finalized list of approved 2027/28 corporate initiatives. The Corporation is in the process of its annual planning and prioritization cycle. The Executive Committee is scheduled to meet in September 2026 to review and prioritize potential corporate initiatives for 2027/28. As part of that alignment process, leadership reviews current corporate initiatives that are expected to carry-over in 2027/28, previously identified initiatives, and potential new additions in order to support prioritization and trade-off discussions across the overall portfolio of work to achieve strategic KPI milestones. Following that workshop, selected initiatives will undergo further analysis to determine solution options and estimated resource requirements.

Question:

Please file the preliminary list of selected potential corporate initiatives for 2027/28 following the September workshop, along with the status of existing and new initiatives.

Rationale for Question:

To review the status of planned corporate initiatives.

RATIONALE FOR REFUSAL TO FULLY ANSWER THE QUESTION:

MPI declines to provide the preliminary list requested. The potential initiatives considered at the September 2026 workshop will remain at an early stage of MPI's

annual planning process and will not represent approved initiatives or commitments to deliver.

MPI's staged planning process is designed to support appropriate due diligence before it commits to a portfolio of work. Potential problems and opportunities are first identified and prioritized. Selected items then proceed through further analysis to assess solution options, expected outcomes, dependencies, estimated resource requirements and feasibility within available organizational capacity. The results of that work inform subsequent decisions about which initiatives MPI can reasonably commit to delivering.

Providing a preliminary list immediately following the workshop could therefore create a misleading impression that the initiatives have been approved, funded or scheduled when those determinations have not yet been made. It could also imply certainty regarding proposed solutions before alternatives and delivery feasibility have been sufficiently assessed.

Topic:	**Investments**		
Sub Topic:	**Investment Policies Manual Changes**		

Preamble to IR (If Any):

In PUB(MPI)1-92 at page 21, MPI revised its **annual expected returns** in the Investment Policy Manual (below).

Canadian Corporate Bonds Corporate Bonds – Long-Term Pooled Fund	FTSE Canada Long Term Corporate Bond Index plus 25 basis points over a rolling four-year period annualized before management fees
Corporate Bonds – Basic Claims Separately Managed Account (SMA)	~~25~~50% FTSE Canada Mid Term Corporate Bond Index and ~~75~~50% FTSE Canada Long Term Corporate Bond Index plus 25 basis points over a rolling four-year period annualized before management fees
MUSH Bonds	50% FTSE Short Term Provincial Bond Index plus 50% FTSE Mid Term Provincial Bond Index
Commercial Mortgages	40% FTSE Canada Mid Term Bonds and 60% FTSE Canada Short Term Bonds plus 50 basis points per annum
Private Debt Private Debt - Universe	FTSE Canada All Corporate Bond Index plus 100~~75~~ bps gross of investment management fees over a rolling four-year period annualized
Private Debt - Long	FTSE Canada Long Term Overall Bond Index plus ~~75~~50 basis points gross of investment management fees over a rolling four-year period annualized

Canadian Equities Large Market Capitalization Equities	S&P/TSX Capped Composite Total Return Index ~~plus 150 basis points over a rolling four-year period annualized~~
Small to Mid-Market Capitalization Equities	S&P/TSX Small Cap Total Return Index plus ~~150 basis points over a rolling four-year period annualized~~
Global Equities Global Equities	MSCI World Index in Canadian dollars ~~plus 150 basis points over a rolling four-year period annualized~~
Low Volatility Equities	MSCI World Index in Canadian ~~U.S.~~ dollars ~~plus 90 basis points over a rolling four-year period annualized~~
Alternative Investments Canadian Real Estate Infrastructure	MSCI Quarterly Property Fund Index~~REALPAC/IPD Canadian Property Index~~ 90% x (5-year break-even inflation rate[1] + 4%) plus (10% x DJBGINAT[2])

MPI also revised its **benchmarks** in the Investment Policy Manual (below) at pages 24-25.

Basic Claims

Asset Class	Benchmark	Minimum	Target	Maximum
Cash and Equivalents	FTSE Canada 91 Day T-Bill Index	0%	0%	5%
Fixed Income				
Provincial Bonds	20~~100~~% FTSE Mid-Term Provincial Bond Index 80% FTSE Long-Term Provincial Bond Index	25%	35%	45%

15

Manitoba Public Insurance **Page 24 of 45**

August 6, 2026 **CONFIDENTIAL** **2027 GRA - Round 1 Information Requests**
PUB (MPI) 1-92 - Appendix 1 - Redacted

Real Return Bonds	100% FTSE Canada Real Return Bond Index	0%	4%	10%
Corporate Bonds	25~~50~~% FTSE Mid-Term Corporate Bond Index 75~~50~~% FTSE Long-Term Corporate Bond Index	18%	28%	38%
Non-Marketable Bonds	50% FTSE Short-Term Provincial Bond Index and 50% FTSE Mid-Term Provincial Bond Index	8%	18%	28%
Commercial Mortgages	40% FTSE Canada Mid-Term Bonds and 60% FTSE Canada Short Term Bonds + 50 basis points per annum	2%	5%	8%
Total Fixed Income		85%	**90%**	100%
Alternative Investments				
Canadian Real Estate	MSCI Quarterly Property Fund Index	0%	10%	15%
Total Alternative Investments			**10%**	

Question:

Please explain:

a) Why the expected returns for Private Debt increased by 25 bps;

b) Why the expected returns for Canadian Equities and Global Equities were reduced by 150 bps;

c) Why the expected returns for Low Volatility Equities were reduced by 90 bps;

d) Why the benchmark weights were changed in the Basic Portfolio for Provincial Bonds and Corporate Bonds;

e) Why the benchmark weights were **not** changed in the Basic Portfolio for Commercial Mortgages;

f) What impact the benchmark weight changes have on the benchmark duration of:

   a. the Provincial Bond benchmark,

   b. the Corporate Bond benchmark, and

   c. the Basic Portfolio's benchmark given Basic's 35% target weight to Provincial Bonds and 28% target weight to Corporate Bonds; and

g) How the duration of the Basic Liabilities compares to the Basic Portfolio's Benchmark duration before and after the benchmark changes.

Rationale for Question:

To understand the rationale for changing the benchmarks and the expected returns relative to benchmarks ("value added"), and the potential implications on investment risk.

RESPONSE:

a) The expected return for Private Debt was increased by 25 bps to align with the manager's stated performance target.

b) **Canadian Equities**: At the time of MPI's initial allocation to Canadian equities, MPI was invested in segregated management accounts. Under these agreements, the managers were expected to outperform their benchmark by 150 basis points over a rolling four-year period.

Following the 2018 ALM study, MPI transitioned from a single portfolio structure to five portfolios with varying risk and return objectives. As part of this transition, MPI moved from segregated accounts to pooled funds managed under the same investment philosophy. Unlike the segregated mandates, the pooled funds are benchmarked directly against the index and do not carry an explicit performance objective of outperforming the benchmark by 150 basis points.

Accordingly, the reduction in the expected return assumption reflects the change in mandate structure and aligns the expected return target with the objectives of the pooled fund mandates.

Global Equities: In April 2025 MPI replaced Guardian, an active investment manager, with a passive iShares MSCI World mandate. A passive mandate is expected to track its benchmark over the long term, before fees, rather than generate returns above the benchmark.

c) The expected returns were adjusted to be consistent with the agreement with the manager. The manager's mandate is to seek market-like returns (as measured by MSCI World Index) with considerably lower level of volatility.

d) The PIPP Termination Rate & Methodology Update (*Part VIII EAR Attachment B*) resulted in an increase in the duration of MPI's liabilities by approximately two years. To maintain the portfolio's liability hedging effectiveness, the duration of the fixed income assets was also increased by two years.

The benchmark allocations for Provincial Bonds and Corporate Bonds were adjusted to reflect the revised target duration of the portfolio.

e) The benchmark for Commercial Mortgages within the IPS is the same benchmark used by TD Asset Management (TDAM) to manage the mandate. Since the benchmark is aligned with the manager's stated benchmark, no changes were required. MPI normally adjusts target weights based on an ALM study. The current target weights have been in place since the approval of the last ALM study. The allocation to commercial mortgages (5% target in Basic Claims) was not adjusted because there was no change in target allocation from year to year. Moreover, if there was a target allocation change for Commercial mortgages, there would be corresponding changes impacting other asset classes.

f) a. The Provincial Bond Benchmark increased from 6.4 to 12.8.
b. The Corporate Bond Benchmark increased from 9.2 to 10.8.
c. The Basic Claims Benchmark increased from 6.3 to 9.

g) Prior to the PIPP Termination Rate & Methodology Update, the duration of Basic Claims Liabilities was 7.2. After the change, the duration increased to 9.1.

Prior to the PIPP project the duration of the Basic Claims Benchmark was 6.3. After the change, the duration increased to 9.0.

Prior to the change, the duration of the benchmark (6.3) was lower than the duration of the asset portfolio (7.0). As a result of these changes, the benchmark of the Basic Claims is now closely aligned with the asset and liability duration of the portfolio.

d) The PIPP Termination Rate & Methodology Update (*Part VIII EAR Attachment B*) resulted in an increase in the duration of MPI's liabilities by approximately two years. To maintain the portfolio's liability hedging effectiveness, the duration of the fixed income assets was also increased by two years.

The benchmark allocations for Provincial Bonds and Corporate Bonds were adjusted to reflect the revised target duration of the portfolio.

e) The benchmark for Commercial Mortgages within the IPS is the same benchmark used by TD Asset Management (TDAM) to manage the mandate. Since the benchmark is aligned with the manager's stated benchmark, no changes were required. MPI normally adjusts target weights based on an ALM study. The current target weights have been in place since the approval of the last ALM study. The allocation to commercial mortgages (5% target in Basic Claims) was not adjusted because there was no change in target allocation from year to year. Moreover, if there was a target allocation change for Commercial mortgages, there would be corresponding changes impacting other asset classes.

f) a. The Provincial Bond Benchmark increased from 6.4 to 12.8.
b. The Corporate Bond Benchmark increased from 9.2 to 10.8.
c. The Basic Claims Benchmark increased from 6.3 to 9.

g) Prior to the PIPP Termination Rate & Methodology Update, the duration of Basic Claims Liabilities was 7.2. After the change, the duration increased to 9.1.

Prior to the PIPP project the duration of the Basic Claims Benchmark was 6.3. After the change, the duration increased to 9.0.

Prior to the change, the duration of the benchmark (6.3) was lower than the duration of the asset portfolio (7.0). As a result of these changes, the benchmark of the Basic Claims is now closely aligned with the asset and liability duration of the portfolio.

CC (MPI) 2-2

Part and Chapter:	**Part IX – INV Appendix 10**	**Page No.:**	
Topic:	**Investments**		
Sub Topic:	**Value Added (vs Benchmark) and Information Ratios**		

Preamble to IR (If Any):

The Value Added and Information Ratio figures in Appendix 10 are incorrect, given errors in certain cell references.

The trailing 1, 2, 3, and 4-year return calculations for the Basic Portfolio in Appendix 10 appear to use the correct cell references (i.e., periods ending March 2026 in row 65), but the returns for the RSR and EFB Portfolios as well as the benchmark returns for Basic, RSR, and EFB Portfolios are incorrectly referencing cells for the period ending March 2025 in row 53 (rather than row 65 for 2026).

Question:

Please provide a revised spreadsheet, reflecting the corrected calculations.

Rationale for Question:

To enable the PUB and other stakeholders to assess the quality of MPI's active management (i.e., probability of skill) over a sufficiently long period of time.

RESPONSE:

Please see *MPI Exhibit #22* for a blackline and clean version of *Part IX INV Appendix 10*.

CC (MPI) 2-3

Part and Chapter:	**Part IX – INV Appendix 9** **Part IX – INV Appendix 10**	**Page No.:**	**1-3**
Topic:	**Investments**		
Sub Topic:	**Performance Attribution Report**		

Preamble to IR (If Any):

In PUB Order No. 156/25, at page 123, the Board states:

> "the Board sees merit in MPI adopting attribution reporting as recommended by Mr. Viola. Such reporting will assist in evaluation […] relative performance. […] The Board will expect to receive attribution performance reporting […] in the 2027 GRA. The Board further notes that the OCIO will be responsible for providing the […] information at the next GRA."

The reporting recommended by Mr. Viola is described in two documents from the 2026 GRA, submitted on behalf of the Consumers Coalition and Coalition of Manitoba Motorcycle Groups:

- **Evidence (CC-07):** available at https://www.pubmanitoba.ca/v1/proceedings-decisions/appl-current/pubs/2026-mpi-gra/cc-07-mpi-2026-gra-performance-attribution-paper_to-file.pdf; and

- **Testimony Presentation (CC-11):** available at https://www.pubmanitoba.ca/v1/proceedings-decisions/appl-current/pubs/2026-mpi-gra/cc-11-viola-performance-attribution-testimony-mpi-2026-gra.pdf.

Page 19 of the Testimony Presentation paper (CC-11) says that "to enable the PUB and other stakeholders to assess the quality of MPI's active management (i.e., probability of skill), MPI should:

1. implement regular […] performance attribution reporting that quantifies security selection vs asset allocation and other effects; and

2. disclose other relevant data (e.g., tracking error) and report risk-adjusted performance (e.g., Information Ratios) over a sufficiently long period of time."

Page 20 of the Testimony Presentation paper, recreated below, states that MPI should consider: 1. a simple approach; 2. increase the data frequency from annual to monthly; and 3. expand the horizon beyond 4 years.

Page | 20

IMPLEMENTATION ALTERNATIVES FOR PERFORMANCE ATTRIBUTION

1. Consider the simple, quick, and cheaper approach and make information available in GRA 2027.
2. Adopt a more robust approach, if appropriate, later.

Simple, Quick, and Cheaper	More Robust, Slower, and More $
1. Adopt a simple performance attribution approach at the total portfolio level.	1. Undertake a search for a sufficiently robust performance attribution system, then implement it.
2. Increase the data measurement frequency (from annual to monthly).	2. Ideally, attribution is performed for past periods; otherwise, data will be available prospectively only (i.e., it will take years to have data available).
3. Expand time horizon (beyond past 4 years).	
The cost is the time it takes to: a) gather inputs, which should generally be available; and b) apply a simple performance attribution approach (e.g., use XL file provided).	The cost is unknown until a search is undertaken, though cost estimates are likely available.

The attribution reported by the OCIO shows:

- a 3-month (year-to-date) period of performance ending March 31, 2026, but not a longer history; and

- selection, allocation, and interaction effects but no "adjustment".[1]

Question:

a) Please:

   a. describe the OCIO's attribution methodology; and

   b. explain how it differs from the approach in the Evidence paper (CC-07) from the prior year's GRA.

b) Please clarify what formulas were used to calculate each effect (i.e., selection, allocation, and interaction).

c) Please explain why the OCIO's approach does not require the "adjustment" noted in the Evidence paper's "simple approach."

   a. Please explain whether the OCIO's approach is different from the "simple approach" used in the Evidence paper, eliminating the need for an adjustment.

   b. Please explain if the increased frequency (monthly, rather than annual) made this adjustment immaterial for the 3-month period reported by the OCIO.

d) Please provide an Excel file that shows the performance attribution for the Basic, RSR, and EFB portfolios (including the formulas) using monthly data over a sufficiently long period of time (i.e., minimum of 5 years or from April 2021 to March 2026).

[1] The Evidence paper included an "adjustment", which was "needed for the measurement error arising from the … simplified approach". The paper noted that "a more robust approach … would eliminate the need for any adjustment. Also, by … increasing the frequency of observations to monthly (from annual), the size of this adjustment would fall."

Rationale for Question:

To understand the methodology used to attribute the value added relative to benchmark and to enable the PUB and other stakeholders to assess the quality of MPI's active management (i.e., probability of skill) over a sufficiently long period of time.

RESPONSE:

a) WTW's OCIO performance attribution methodology is based on the Brinson-Fachler attribution framework, which decomposes total active return relative to benchmark into three components: asset allocation, security selection, and interaction effects. Asset allocation measures the impact of deviations from benchmark weights across asset classes, security selection measures the impact of portfolio returns relative to benchmark returns within each asset class, and interaction measures the combined effect of allocation and selection decisions. The sum of these effects equals the portfolio's total active return relative to benchmark.

   The methodology differs from the approach described in the prior-year Evidence paper. The Evidence paper presented a simplified attribution framework intended to illustrate attribution concepts using an arithmetic "building block" methodology. As noted in the paper, the simplified approach can produce residual differences between the sum of the attribution effects and total active return, requiring an adjustment to reconcile the results. The paper also noted that changing portfolio weights and the compounding of returns over multiple periods can affect attribution results and that more formal attribution methodologies address these considerations directly.

   By contrast, the Brinson-Fachler methodology used within the OCIO framework is a formal benchmark-relative attribution methodology widely used by

institutional investors. It attributes active return using benchmark weights and benchmark returns at the asset-class level and decomposes active return into allocation, selection and interaction effects. The methodology is specifically designed to explain active return in a multi-asset portfolio context and to provide a consistent attribution of benchmark-relative performance across the portfolio structure.

Accordingly, while both approaches seek to identify the drivers of active return, the Evidence paper used a simplified illustrative methodology to demonstrate attribution concepts, whereas the OCIO framework applies the Brinson-Fachler methodology as the formal attribution framework used for investment reporting and analysis. The Brinson-Fachler methodology provides a comprehensive and institutionally accepted framework for measuring the contribution of allocation, selection and interaction decisions to total active return.

b) MPI's OCIO performance attribution is based on the Brinson-Fachler attribution framework, which decomposes active return relative to benchmark into three components: allocation, selection, and interaction effects. Active return is defined as the difference between the portfolio return and the benchmark return.

The attribution effects are calculated as follows:

*Allocation Effect -> Measures the impact of overweighting or underweighting an asset class relative to its benchmark weight.

$$\text{Allocation}=(WPi-WBi)\times(RBi-RB)$$

Where: WPi = portfolio weight of asset class iii ; WBi = benchmark weight of asset class iii ; RBi = benchmark return of asset class iii and RB = total benchmark return. A positive allocation effect results when the portfolio

overweights asset classes that outperform the total benchmark or underweights asset classes that underperform the total benchmark.

*Selection Effect -> Measures the impact of manager or security performance within an asset class relative to the benchmark return for that asset class.

$$\text{Selection}=WBi\times(RPi-RBi)$$

Where: RPi = portfolio return of asset class iii and RBi = benchmark return of asset class iii . A positive selection effect indicates that the portfolio outperformed its benchmark within the asset class.

*Interaction Effect -> Measures the combined impact of both allocation and selection decisions.

$$\text{Interaction}=(WPi-WBi)\times(RPi-RBi)$$

A positive interaction effect occurs when the portfolio is overweight an asset class that outperforms its benchmark, or underweight an asset class that underperforms its benchmark.

The total active return is equal to the sum of the allocation, selection, and interaction effects across all asset classes: $\text{Active Return}=\sum\text{Allocation } i+\sum\text{Selection } i+\sum\text{Interaction } i$

Under the Brinson-Fachler framework, these attribution effects provide a consistent decomposition of active return and identify the extent to which performance relative to benchmark was driven by asset allocation decisions, manager/security selection decisions, or the interaction between the two.

c) The OCIO attribution methodology does not require the adjustment referenced in the Evidence paper because it applies the Brinson-Fachler attribution framework, which is specifically designed to attribute active return in a benchmark-relative portfolio structure. Under this framework, active return is systematically decomposed into allocation, selection, and interaction effects using portfolio weights, benchmark weights, portfolio returns, and benchmark returns for each asset class. The methodology provides a consistent explanation of active return within the portfolio's benchmark structure.

The approach differs from the simplified methodology described in the Evidence paper. As noted in the paper, the illustrative methodology was intended to demonstrate attribution concepts using a simplified arithmetic framework. The paper further notes that changing asset weights and the compounding of returns across multiple periods can result in small differences between the sum of the attribution effects and total active return, requiring a residual adjustment to reconcile the results.

By contrast, the OCIO framework applies a formal benchmark-relative attribution methodology commonly used for institutional portfolio analysis. It is specifically designed to attribute active return across multiple asset classes using a consistent framework for allocation, selection, and interaction effects and therefore does not rely on the simplifying assumptions underlying the illustrative approach.

With respect to attribution frequency, the Evidence paper correctly notes that increasing the frequency of observations reduces the impact of changing weights and compounding effects. Accordingly, use of monthly observations rather than annual observations would generally reduce the size of any residual adjustment under the simplified methodology and could make the adjustment immaterial for practical purposes. However, the adjustment arises

from the simplified attribution methodology itself rather than from the reporting frequency. The OCIO framework therefore does not depend on monthly frequency to address this issue.

d) WTW is unable to provide an Excel file showing monthly performance attribution for the Basic Claims, Rate Stabilization Reserve (RSR), and Employee Future Benefits (EFB) portfolios for the full period April 2021 through March 2026 using the current attribution methodology.

The current OCIO performance measurement and attribution process was implemented effective January 1, 2026 and utilizes detailed portfolio, benchmark, and holdings information maintained within WTW's performance measurement system. This framework supports Brinson-Fachler attribution analysis, which decomposes active return into allocation, selection, and interaction effects.

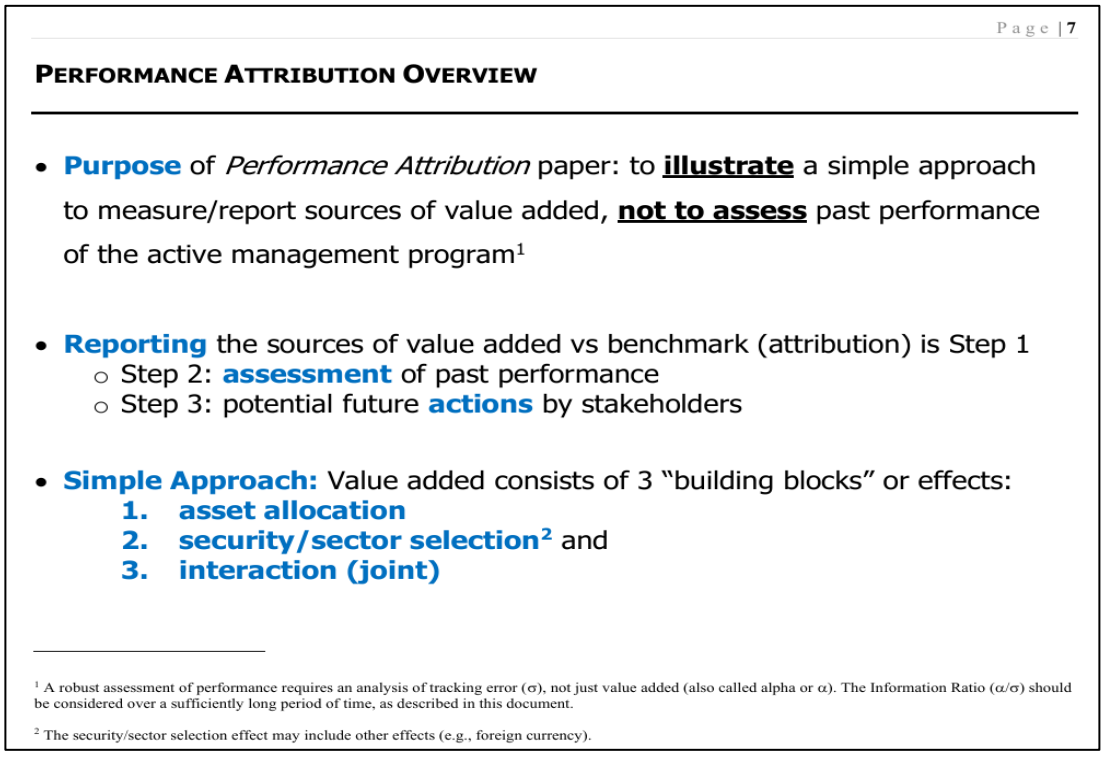
Prior to January 1, 2026, while portfolio return information is available, WTW does not maintain the historical benchmark construction data required to perform attribution analysis on a consistent basis. Specifically, WTW does not have a complete historical record of the monthly policy weights and benchmark returns necessary to calculate attribution effects under the Brinson-Fachler methodology.

As a result, WTW cannot reliably reconstruct monthly attribution results for the period April 2021 through December 2025 in a manner that is consistent with the current attribution framework. Without the underlying benchmark structure and policy allocations, it is not possible to determine the relative impact of asset allocation and manager selection decisions during the period.

WTW can provide monthly attribution results, supporting calculations, and formulas for periods beginning January 1, 2026, including January through June 2026 as *Attachment A, B, and C (electronic only)*.

The attribution effects in the attached file are calculated using the Brinson-Fachler methodology. To reconcile attribution effects with total active return over multiple periods through the summation of individual monthly attribution, WTW applies the Carino linking methodology. Carino adjusts individual period attribution effects to reflect the impact of geometric compounding and ensure that multi-period attribution reconciles to the portfolio's cumulative active return.

The Carino factors included in the attached file were calculated at the quarterly level. Accordingly, the linked attribution effects are intended to reconcile to quarterly active return, not to individual monthly active returns. Monthly attribution effects therefore should not be summed directly to derive year-to-date attribution results, as such periods require appropriate linking adjustments to account for compounding.



Accordingly, the inability to provide monthly attribution for the full five-year period reflects limitations in the historical benchmark and policy allocation data available within WTW's systems and does not reflect a limitation of the attribution methodology itself.

CC (MPI) 2-4

Part and Chapter:	**Part IX – INV Appendix 10**	**Page No.:**	
Topic:	**Investments**		
Sub Topic:	**Value Added (vs Benchmark) and Information Ratios**		

Preamble to IR (If Any):

Exhibit CC-11 from the 2026 GRA is the Performance Attribution Testimony Presentation paper submitted by Valter Viola.[1] On page 7, recreated below, it describes its purpose, which was to illustrate a simple attribution approach for measuring/reporting the sources of value added vs the benchmark.

Page | 7

PERFORMANCE ATTRIBUTION OVERVIEW

- **Purpose** of *Performance Attribution* paper: to **illustrate** a simple approach to measure/report sources of value added, **not to assess** past performance of the active management program[1]

- **Reporting** the sources of value added vs benchmark (attribution) is Step 1
  - Step 2: **assessment** of past performance
  - Step 3: potential future **actions** by stakeholders

- **Simple Approach:** Value added consists of 3 "building blocks" or effects:
  1. **asset allocation**
  2. **security/sector selection**[2] and
  3. **interaction (joint)**

[1] A robust assessment of performance requires an analysis of tracking error (σ), not just value added (also called alpha or α). The Information Ratio (α/σ) should be considered over a sufficiently long period of time, as described in this document.

[2] The security/sector selection effect may include other effects (e.g., foreign currency).

[1] Filed on behalf of the Consumers Coalition and the Coalition of Manitoba Motorcycle Groups. Available at https://www.pubmanitoba.ca/v1/proceedings-decisions/appl-current/pubs/2026-mpi-gra/cc-11-viola-performance-attribution-testimony-mpi-2026-gra.pdf.

Page 11 of the CC-11 paper, recreated below, answered the PUB's question related to active management risk ("tracking error") and showed the Information Ratios ("IRs") associated with various performances (e.g., 0.00 IR for a median manager and +0.67 IR for a top quartile manager) before considering any active management fees.

Q2. A) Assessing Skill

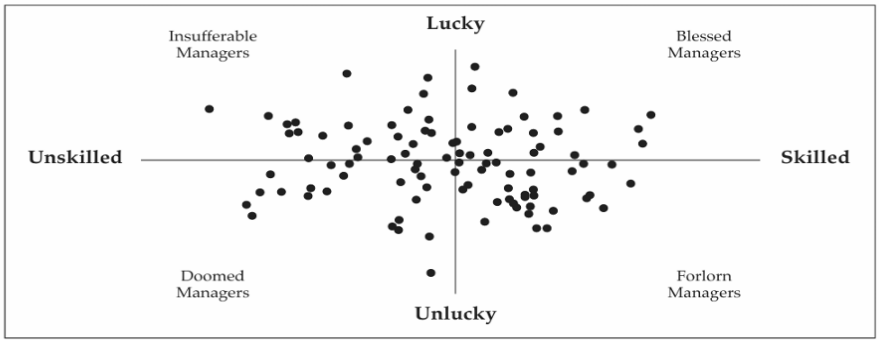
Question 2. a) Was the alpha the result of **skill (or luck/chance)?**
Answer: We need more data (and likely time).

The *Performance Attribution* paper stated that a discussion of risk and Information Ratios (alpha/tracking error) was beyond the scope of the introductory paper, whose focus was exclusively on the alpha (numerator) part of the return/risk equation. This paper, then, did not address tracking error (denominator).

Performance	Outperform Comparable Peers[7]	IR	Total Portfolio Risk Target
Top Decile	90%	~ 1.30	~ 75 bps
Top Quartile	75%	~ 0.67	~ 150 bps
Top Third	67%	~ 0.40	~ 250 bps
Median	50%	0.00	n/a

However, In PUB (CC) 12 a), the **PUB asked for a description of "how the risk analysis would be incorporated … and … how MPI should utilize the results"**. Our response is below.

"Active risk … should be integrated with … value added … by comparing realized IRs with expected or target IRs …
MPI and other stakeholders could use these results to inform their confidence about … risk-adjusted returns (e.g., skill …) and … "quality" or reliability of … metrics (e.g., … private market valuations …, as well as … benchmarks).
… stakeholders could use … "IR Standards" to help inform their assessments of … performance. The table … shows … IRs that are consistent with various percentile performances … before costs …
The final column shows the … risk target for a fund that seeks 100 bps of value added (gross) … e.g., A Top Quartile fund … should take an average of 150 bps of tracking error."



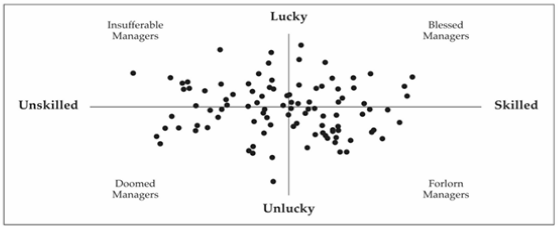
Pages 13 and 14 of the CC-11 paper, recreated below, described 4 types of managers: Blessed, Forlorn, Insufferable, and Doomed.

BIG PICTURE 1: FOUR TYPES OF MANAGERS

On the next page, a former colleague at Canada Pension Plan Investment Board, Dr. Donald Raymond, elaborates on the 4 types of managers, which are illustrated below.

Insufferable	Blessed
Doomed	Forlorn

Figure 1. Four Stylized Manager Types



Source: Based on Grinold and Kahn (1999).

BIG PICTURE 1: FOUR TYPES OF MANAGERS (CONTINUED)

Dr. Raymond described a practical approach to assess skill. Below are excerpts from his paper.[5]

"Figure 1 … breaks a manager's realized return into two components— skill and luck—and plots it ... Each dot represents a manager. The skill component is plotted along the horizontal axis; **on the right … are … skilled managers**, and **on the left … are the unskilled managers**. The component resulting from luck is plotted along the vertical axis; **managers above the … line are … lucky** …, and the **ones on the bottom are … unlucky** … This diagram divides the manager universe into four quadrants. In the bottom left quadrant are the **doomed managers**. They are managers without skill who additionally have had a bad draw from the return distribution and are destined to go out of business. The top left quadrant represents the **insufferable managers**.

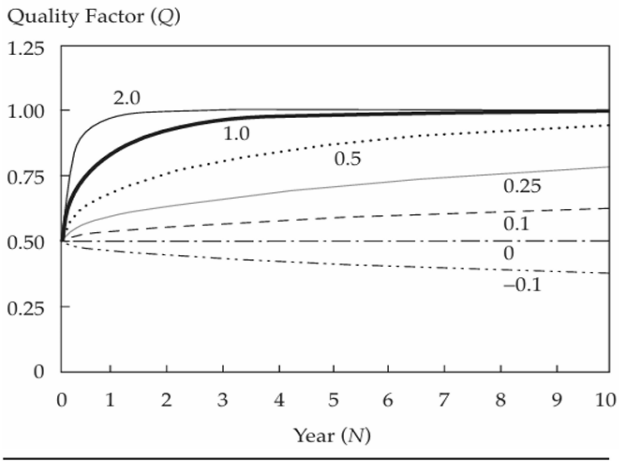
Figure 1. Four Stylized Manager Types

Source: Based on Grinold and Kahn (1999).

These are managers without skill who happen to have had good returns, so they have been lucky. In the top right quadrant are the **blessed managers**. They have skill and have also been lucky, so they are … happy. In contrast, the managers on the lower right are **forlorn**; they have skill but have had a bad draw and have either not added value or added less value than they otherwise should have based on their skill alone."

[5] Source: *Paying (Only) for Skill (Alpha)— A Practical Approach*, in CFA Institute Conference Proceedings Quarterly (June 2008), by Donald M. Raymond, CFA, Senior Vice President at Canada Pension Plan Investment Board

Pages 15 and 16 of the CC-11 paper, recreated below, described a "Quality Factor" for various Information Ratios ("IRs") over time, where 0.5 reflects a 50% probability that a manager has skill (rather than luck).



BIG PICTURE 2: QUALITY FACTOR OVER TIME FOR VARIOUS INFORMATION RATIOS

We can assess the quality of performance (vs benchmark).

On the next page, Dr. Raymond describes a "Quality Factor" for various Information Ratios.

This Quality Factor represents the probability that the performance is the result of skill (not luck) over different time horizons and is illustrated here.

Figure 2. Quality Factor over Time for Various IRs

BIG PICTURE 2: QUALITY FACTOR (CONTINUED)

Below are excerpts from Dr. Raymond's paper.

"We defined the probability (*Pr*) that a manager has skill as 1 minus the probability that the manager is lucky. If … active returns are normally distributed, this probability is the cumulative normal distribution, $F(\bullet)$, of the information ratio, … at time N (number of years) multiplied by the square root of time. We define Q_N, the quality factor at year N, as the probability that the manager has skill:

$$\begin{aligned} Pr\{\text{skill}\} &= 1 - Pr\{\text{luck}\} \\ &= 1 - Pr\{\text{realized returns were due to chance}\} \\ &= F(IR_N \times \sqrt{N}) \\ &= Q_N, \end{aligned}$$

where Q_N is bounded between zero and one.

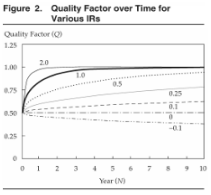


Figure 2 is a visual representation of Q, or the quality factor. Each line is a function of time for managers with different IRs. They all start … at time zero with the quality factor equal to 0.5, meaning that without any performance information, the **managers start off with a 50 percent probability that they have skill**. As they start to generate active returns, **the quality factor can be measured**, and as shown, for a manager with a high IR (such as 2), the quality factor goes up to 1 very quickly. After one year, it is at about 0.95, meaning there is a 95 percent chance they have skill, and after two years, it is essentially 1. **A manager with an IR of 1 after one year has a quality factor of about 0.8. It takes five or six years before it finally goes up to 1, indicating that the value added is most likely a result of skill.** For a low IR, such as 0.1, it takes a long time to get the quality factor up to 1. In fact, even after 10 years, it is approximately 0.62.

So, Q starts at 0.5 and rises to 1 faster for managers with high IRs."

Question:

a) Would MPI agree that the quality factor described in the CC-11 paper (pages 15 – 16) is a reasonable way to inform the overall assessment of active management skill, including MPI's skill? If not, please explain.

b) Please provide the value added **expected** in each portfolio (i.e., Basic, RSR, and EFB), gross of any active management fees, including all calculations and any key assumptions, using:

   a. the Annual Expected Returns from the Investment Policy Statement; and

   b. the asset class benchmark weights and benchmark returns.

Rationale for Question:

To confirm MPI's value added goals and to enable the PUB and other stakeholders to assess the quality of MPI's active management (i.e., probability of skill) over a sufficiently long period of time.

RESPONSE:

a) MPI notes that the Quality Factor framework described in the CC-11 paper was developed by Mr. Viola and is presented in that context. MPI has not independently evaluated or validated the methodology and therefore does not express a view on the appropriateness of the framework as a measure of active management skill. MPI's assessment of investment performance is based on its established governance framework, which considers a range of quantitative and qualitative factors, including long-term performance results, value added relative to benchmarks, risk-adjusted measures, and manager-specific considerations.

b) The calculations of the expected value-added for the Basic, RSR & EFB portfolios including the annual expected returns for each asset class, the asset classes benchmark weights and the benchmarks returns for FY 2025/26 are presented under *Appendix 1 - Expected Value Added March 2026*. The annual expected returns were based on the IPS that was effective from April 1, 2025 to March 31, 2026.

Basic Claims Portfolio
FY 2025/26

Asset Class	Benchmark Weights (%)	Benchmark Returns (%)	Annual Spreads (%)	Annual Expected Returns (%)
Real Return Bonds	4.0%	-1.23%	-	-1.23%

CC (MPI) 2-5

Part and Chapter:	**Part IX – Investments, C.6** **Appendix 4 (MPI Exhibit #15)** **Appendix 10**	**Page No.:**	**9** **3**
Topic:	**Investments**		
Sub Topic:	**Asset Class and Investment Manager Performance**		

Preamble to IR (If Any):

In Part IX – Investments C.6 on page 9, MPI states that it "approved the switch to the iShares MSCI World ETF from Guardian as the new manager of global equities before the end of the 2024/25 fiscal year. The transition was implemented in April 2025."

In Part IX – Investments Appendix 4 at page 3, MPI stated that "Global equities **outperformed** by 4.0% and were broadly in line with target weights, benefiting from broad market strength and favorable positioning". However, Appendix 10 in Part IX - INV shows a Global Equities return of 11.44% relative and a benchmark return of 14.62%, or an **underperformance** of more than 3% (not 4% **outperformance**) in the fiscal year ended March 31, 2026. Also, the monthly volatility of the value added in Global Equities (i.e., tracking error) does not appear to have fallen since April 2025, based on a review of the data in Appendix 10.

Question:

a) Please confirm the performance of the Global Equities portfolio (i.e., underperformance, rather than outperformance, for the year ended March 31, 2026).

b) Please describe the nature of the "favorable positioning" that contributed to performance in Global Equities.

c) Please confirm that the iShares MSCI World ETF seeks to track (rather than outperform) the index composed of developed market equities.

d) Please confirm that the iShares MSCI World ETF excludes Emerging Markets.

e) Please confirm that the Global Equities benchmark excludes Emerging Markets.

f) Please explain if MPI would have expected the ETF to have lower tracking error relative to the developed market equities index than Guardian. If not, why not?

g) Please explain if MPI would have expected the tracking error in Global Equities to fall after the transition to the ETF (from Guardian) since April 2025. If so, why did it not fall? If not, why not?

Rationale for Question:

To understand the strategy in Global Equities (i.e., active or passive) as well as its past performance.

RESPONSE:

a) Global equities asset class comprises Global Core mandate (Guardian/iShares MSCI World Index ETF) and Global Low Volatility mandate (Acadian).

Appendices 4 and 10 use “Global” to refer to different portfolio levels. In Appendix 4, Global refers to the Global Core mandate, which outperformed the benchmark by 4.0% (18.6%-14.6%), whereas in Appendix 10, Global refers to the total Global equities asset class, which underperformed by more than 3.0% (11.44%-14.62%).

b) Guardian fund transitioned to the MSCI World Index ETF (ticker URTH) on April 7, 2025. President Trump's Liberation Day announcement (April 2, 2025) resulted in the URTH ETF declining by 11% over the period from April 2 to April 7. The Guardian fund is more concentrated and the valuation was less impacted over the same period. As a result, the portfolio avoided a portion of the market decline before transitioning to URTH at a lower valuation. This one-time "favorable positioning" contributed to Global Core Equities outperformance.

c) Yes, iShares MSCI World ETF is a passive investment that seeks to track (rather than outperform) the index composed of developed market equities.

d) Yes, iShares MSCI World ETF excludes exposure to Emerging Markets.

e) Yes, the Global equities benchmark excludes exposure to Emerging Markets.

f) Yes, MPI expected the URTH ETF to have lower Tracking Error relative to the developed market equities index than the Guardian fund.

g) As expected, the Tracking Error of the URTH ETF is lower than that of the Guardian fund. URTH ETF Tracking Error is expected to be 0.1%-0.2%. The higher-than-expected 1-year Tracking Error for Global core equities as of March 31, 2026, is due to the transition of the Guardian fund intra-month (April 7, 2025). The April 2025 return for Global core equities includes returns of the Guardian fund from April 1, 2025 – April 15, 2025, and the URTH ETF from April 16, 2025 – April 30, 2025, whereas benchmark performance for April 2025 is based on the difference between beginning and end-of-month valuations (PFaroe, MPI's performance tracking software, records transactions mid-month, irrespective of the actual transaction dates. Therefore, PFaroe recorded Guardian/URTH transactions on April 15 instead of April 7).

CC (MPI) 2-6

Part and Chapter:	Part IX – INV Appendix 5	Page No.:	1
Topic:	Investments		
Sub Topic:	Value Added (vs Benchmark)		

Preamble to IR (If Any):

In Part IX – INV Appendix 5, the notes on page 1 indicate that "for Real Return Bonds, the monthly returns of the RRB Canada Index were applied" but "for other asset classes, the returns were based on the benchmarks as defined in the Investment Policy Statement."

The RRB benchmark in the Investment Policy Statement is the FTSE Canada Real Return Bond Index.

Question:

a) Why is the FTSE Canada Real Return Bond Index not used as a benchmark in performance calculations?

b) What is the difference between the RRB Canada Index and the FTSE Canada Real Return Bond Index in terms of: i) the index publisher; and ii) the index constituents?

c) How different would the returns of the two indices have been in the fiscal year ending March 31, 2026?

Rationale for Question:

To confirm the accuracy of the value added relative to the benchmarks in the Investment Policy Statement.

RESPONSE:

a) The FTSE Canada Real Return Bond Index is the benchmark used in the Investment Policy Statement and is the same index referred to in the notes as the "RRB Canada Index." The note in *Part IX – INV Appendix 5* uses an older naming convention and was not updated for this year's filing, but the benchmark used in the performance calculations has not changed. MPI will update the note in future reports to ensure it is consistent with the terminology used in the IPS.

b) There is no difference. The RRB Canada Index and the FTSE Canada Real Return Bond Index are the same index and therefore have the same publisher and index constituents.

c) There would have been no difference in returns for the fiscal year ending March 31, 2026, as both names refer to the same index.

CC (MPI) 2-7

Part and Chapter:	**CC (MPI) 1-1 (a) (b) (c) (d) (e) (f) (g)**	**Page No.:**	
Topic:	**Strategic Plan Implementation and Cost Implications**		
Sub Topic:			

Preamble to IR (If Any):

In response to CC (MPI) 1-1 (a), MPI indicated that it does not actively maintain the 5-Year Action Plan Roadmap associated with the execution/implementation of its multi-year strategic plan filed by MPI in the 2026 GRA. MPI further indicates that progress against approved Corporate Initiatives within the Strategic Pillars is monitored and reported through MPI's quarterly strategic performance reporting and Integrated Corporate Portfolio governance process. These reports provide more visibility into active, completed, deferred, on-hold and cancelled Corporate Initiatives, including supporting rationale where priorities, sequencing, or delivery plans have changed.

In response to CC (MPI) 1-1 (b), MPI provided a list of customer insights (timely service, clearer information, convenient access to service, respectful treatment and MPI's delivery on its mission) that MPI was using as the primary driver of strategy and execution and examples of corporate initiatives/operational efforts to respond to these customer insights.

In information requests CC (MPI) 1-1 (c) and CC (MPI) 1-1 (d), the Consumers Coalition requested that MPI:

- Provide a detailed description of the most impactful (5 to 10) external transformative forces that are shaping/re-shaping the auto insurance industry in the next 5 to 10 years, using the PESTLE framework (political, economic, sociological, technological, legal and environmental); and

- Describe how MPI's multi-year strategic plan and the "Be Ready for What's Ahead" strategic pillar is addressing the threats and opportunities that result from the most impactful external transformative forces that are shaping/re-shaping the auto insurance industry (as described in part c of this information request).

In response to CC (MPI) 1-1 (c) and (d), MPI indicated that it had not conducted a formal PESTLE analysis and does not have one to provide or share.

In response to CC (MPI) 1-1 (e), MPI indicated that the work on the "Designing a Service Model for the Future" program under the "Be Ready for What's Ahead" pillar of the MPI strategic plan has advanced in two primary areas since the 2026 GRA: (i) development of a comprehensive Winnipeg facility and service delivery assessment, and (ii) implementation of a formal customer experience and operational performance target-setting framework.

In response to CC (MPI) 1-1 (f), MPI indicated that the work on the "Adapting Products and Services in a Changing World" program under the "Be Ready for What's Ahead" pillar of the MPI strategic plan has progressed with work to respond to evolving customer expectations, emerging technologies, changing operating conditions, stakeholder feedback and legislative or regulatory requirements.

In the response to CC (MPI) 1-1 (g) Appendix 1, MPI provides a list of currently active (12 initiatives), deferred (2 initiatives), cancelled (2 initiatives) and carry-forward (10 initiatives) Corporate Initiatives (26 initiatives in total) that were identified through the 2025/26 and 2026/27 business planning process and well as Corporate Initiatives added after 2026/27 planning.

Question:

a) Please provide the most recent version of reports of MPI's quarterly strategic performance reporting and Integrated Corporate Portfolio governance reporting processes detailing active, completed, deferred, on-hold and cancelled Corporate Initiatives, including supporting rationale where priorities, sequencing, or delivery plans have changed.

b) Please provide a detailed description of the most impactful (5 to 10) external transformative forces that are shaping/re-shaping the auto insurance industry in the next 5 to 10 years, using a framework or form of MPIs choosing (SWOT etc.);

c) Please describe how MPI's multi-year strategic plan and the "Be Ready for What's Ahead" strategic pillar is addressing the threats and opportunities that result from the most impactful external transformative forces that are shaping/re-shaping the auto insurance industry (as described in part b of this information request).

d) Please provide a detailed description of any customer insights that MPI has collected with respect to customer expectations related to the threats and opportunities that result from the most impactful external transformative forces that are shaping/re-shaping the auto insurance industry (as described in part b of this information request).

e) Please provide a summary of the findings of the comprehensive Winnipeg facility and service delivery assessment referred to in the response to CC (MPI) 1-1 (e).

f) Please provide a summary of the formal customer experience and operational performance target-setting framework referred to in the response to CC (MPI) 1-1 (e).

g) Please provide a detailed description of the evolving customer expectations, emerging technologies, changing operating conditions, stakeholder feedback and legislative or regulatory requirements that MPI refers to in the response to CC (MPI) 1-1 (f).

h) Please confirm (or otherwise explain) if the 26 Corporate Initiatives listed in the response to CC (MPI) 1-1 (f) Appendix 1, are all of the initiatives in MPI's current Integrated Corporate Portfolio (ICP). If not, please provide the list and description of other initiatives in the current MPI ICP that were not listed/described in this information request response (Appendix 1).

Rationale for Question:
